C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Plan or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or (4) for a Smaller Controlled Affiliate (as defined in Exhibit A), failure to comply with any of the applicable requirements of Standards 2, 3, 4, 5 or 7 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(e); or (6) failure by a Controlled Affiliate that meets the standards of 2E(1) but not 2E(2) above to obtain BCBSA's written consent to a change in the identity of any owner, in the extent of ownership, or in the identity of any person or entity with the authority to select or appoint members or board members, provided that as to publicly traded Controlled Affiliates this provision shall apply only if the change affects a person or entity that owns at least 5% of the Controlled Affiliate's stock before or after the change; or (7) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans, any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Plan shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between BCBSA, the Plan and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

- (1) Controlled Affiliate shall no longer comply with item 2(E) above;
- (2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or
- (3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(e)(3)(vii) and (viii) of this Agreement

Amended as of March 18, 2004

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(b) hereof, or in the event the Controlled Affiliate is a Larger Controlled Affiliate (as defined in Exhibit A), upon termination of this Agreement, the provisions of Paragraph 7.G. shall not apply and the following provisions shall apply, except that, in the event of a partial termination of this Agreement pursuant to Paragraph 7(B)(ii) of this Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the geographic area for which the Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA, subject to any conflicting state law and state regulatory requirements. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan shall be jointly liable for payment to BCBSA of an amount equal to the Re-Establishment Fee (described below) multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any other Plan is permitted by BCBSA to use marks or names licensed by BCBSA in the Service Area established by this Agreement, the Re-Establishment Fee shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates and the denominator of which is the total number of Licensed Enrollees in the Service Area.

Amended as of June 16, 2005

The Re-Establishment Fee shall be indexed to a base fee of \$80. The Re-Establishment Fee through December 31, 2005 shall be \$80. The Re-establishment Fee for calendar years after December 31, 2005 shall be adjusted on January 1 of each calendar year up to and including January 1, 2010 and shall be the base fee multiplied by 100% plus the cumulative percentage increase or decrease in the Plans' gross administrative expense (standard BCBSA definition) per Licensed Enrollee since December 31, 2004. The adjustment shall end on January 1, 2011, at which time the Re-Establishment Fee shall be fixed at the then-current amount and no longer automatically adjusted. For example, if the Plans' gross administrative expense per Licensed Enrollee was \$278.60, \$285.00 and \$290.00 for calendar year end 2004, 2005 and 2006, respectively, the January 1, 2007 Re-Establishment Fee would be \$83.27 (100% of base fee plus \$1.84 for calendar year 2005 and \$1.43 for calendar year 2006). Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Plan or any other Licensed Controlled Affiliates of the Plan to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this sub paragraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. At least 50% of the Re-Establishment Fee shall be awarded to the Plan (or Plans) that receive the new license(s) for the service area(s) at issue; provided, however, that such award shall not become due or payable until all disputes, if any, regarding the amount of and BCBSA's right to such Re-Establishment Fee have been finally resolved; and provided further that the award shall be based on the final amount actually received by BCBSA. The Board of Directors shall adopt a resolution which it may amend from time to time that shall govern BCBSA's use of its portion of the award. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Plan or its other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.M. and

Amended as of June 16, 2005

any costs associated with reestablishing the Service Area, including payments made by BCBSA to a Plan or Plans (or their Licensed Controlled Affiliates) for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to examine and audit and/or hire at terminated entity's expense a third party auditor to examine and audit the books and records of the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan to verify compliance with this paragraph 7.H.

(5) Subsequent to termination of this Agreement, the terminated entity and its affiliates, agents, and employees shall have an ongoing and continuing obligation to protect all BCBSA and Blue Licensee data that was acquired or accessed during the period this Agreement was in force, including but not limited to all confidential processes, pricing, provider, discount and other strategic and competitively sensitive information ("Blue Information") from disclosure, and shall not, either alone or with another entity, disclose such Blue Information or use it in any manner to compete without the express written permission of BCBSA.

(6) As to a breach of 7.H.(1), (2), (3), (4) or (5) the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. This Agreement shall remain in effect until terminated by the Controlled Affiliate or the Plan upon not less than eighteen (18) months written notice to the Association or upon a shorter notice period approved by BCBSA in writing at its sole discretion, or until terminated as otherwise provided herein. The Plan's right to terminate without cause upon such notice is unfettered and may be exercised in the Plan's sole discretion.

J. In the event the Controlled Affiliate is a Smaller Controlled Affiliate (as defined in Exhibit A), the Controlled Affiliate agrees to be jointly liable for the amount described in H.3. and M. hereof upon termination of the BCBSA license agreement of any Larger Controlled Affiliate of the Plan.

K. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless the Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of the Plan's license agreement upon the required 6 month written notice.

L. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

M. In the event that the Plan has more than 50 percent voting control of the Controlled Affiliate under Paragraph 2(E)(2) above and is a Larger Controlled Affiliate (as defined in Exhibit A), then the vote called for in Paragraphs 7(C) and 7(D) above shall require the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans.

Amended as of September 19, 2014

N. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

8. DISPUTE RESOLUTION

The parties agree that any disputes between them or between or among either of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Cross and Blue Cross Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

9. LICENSE FEE

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit C.

10. JOINT VENTURE

Nothing contained in the Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between Plan and Controlled Affiliate or between either and BCBSA.

Amended as of September 19, 2014

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

Amended as of June 16, 2005

THIS PAGE IS INTENTIONALLY BLANK.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

16. HEADINGS

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

EXHIBIT A

CONTROLLED AFFILIATE LICENSE STANDARDS

November 2014

PREAMBLE

For purposes of definition:

A "smaller Controlled Affiliate:" (1) comprises less than fifteen percent (15%) of Sponsoring Plan's and its licensed Controlled Affiliates' total member enrollment (as reported on the BCBSA Quarterly Enrollment Report, excluding rider and freestanding coverage, and treating an entity seeking licensure as licensed);* or (2) underwrites the indemnity portion of workers' compensation insurance and has total premium revenue less than 15 percent of the Sponsoring Plan's net subscription revenue.

A "larger Controlled Affiliate" comprises fifteen percent (15%) or more of Sponsoring Plan's and its licensed Controlled Affiliates' total member enrollment (as reported on the BCBSA Quarterly Enrollment Report, excluding rider and freestanding coverage, and treating an entity seeking licensure as licensed.)*

Changes in Controlled Affiliate status:

If **any** Controlled Affiliate's status changes regarding: its Plan ownership level, its risk acceptance or direct delivery of medical care, the Controlled Affiliate shall notify BCBSA within thirty (30) days of such occurrence in writing and come into compliance with the applicable standards within six (6) months.

If a smaller Controlled Affiliate's health and workers' compensation administration business reaches or surpasses fifteen percent (15%) of the total member enrollment of the Sponsoring Plan and licensed Controlled Affiliates, the Controlled Affiliate shall:

Amended as of September 19, 2014

EXHIBIT A (continued)

1. Within thirty (30) days, notify BCBSA of this fact in writing, including evidence that the Controlled Affiliate meets the minimum liquidity and capital (BCBSA "Health Risk-Based Capital (HRBC)" as defined by the NAIC and state-established minimum reserve) requirements of the larger Controlled Affiliate Financial Responsibility standard; and
2. Within six (6) months after reaching or surpassing the fifteen percent (15%) threshold, demonstrate compliance with all license requirements for a larger Controlled Affiliate.

If a Controlled Affiliate that underwrites the indemnity portion of workers' compensation insurance receives a change in rating or proposed change in rating, the Controlled Affiliate shall notify BCBSA within 30 days of notification by the external rating agency.

*For purposes of this calculation,

The numerator equals:

Applicant Controlled Affiliate's member enrollment, as defined in BCBSA's Quarterly Enrollment Report (excluding rider and freestanding coverage).

The denominator equals:

Numerator PLUS Sponsoring Plan and all other licensed Controlled Affiliates' member enrollment, as reported in BCBSA's Quarterly Enrollment Report (excluding rider and freestanding coverage).

Amended as of September 19, 2002

EXHIBIT A (continued)

STANDARDS FOR LICENSED CONTROLLED AFFILIATES

Each licensed controlled affiliate shall be subject to certain standards as determined below:

1. What percent of the licensed controlled affiliate is controlled by the Sponsoring Plan and other Plans?

More than 50% by Sponsoring Plan ↓ Standard 1A, 4	50% by Sponsoring Plan ↓ Standard 1B, 4	100% Plan control but less than 50% Sponsoring Plan Control and its offers solely Medicaid products and services ↓ Standard 1(C)
---	---	--

IN ADDITION,

2. Is risk being assumed?

Yes			No	
↗	↓	↘	↗	↓
Controlled Affiliate underwrites any indemnity portion of workers' compensation insurance ↓ Standards 7A-7E, 11	Controlled Affiliate comprises < 15% of total member enrollment of Sponsoring Plan and its licensed affiliates, and does not underwrite the indemnity portion of workers' compensation insurance ↓ Standard 2 (Guidelines 1.1, 1.2) and Standard 11	Controlled Affiliate comprises ≥ 15% of total member enrollment of Sponsoring Plan and its licensed affiliates, and does not underwrite the indemnity portion of workers' compensation insurance ↓ Standard 6H	Controlled Affiliate comprises < 15% of total member enrollment of Sponsoring Plan and its licensed affiliates ↓ Standard 2 (Guidelines 1.1, 1.3) and Standard 11	Controlled Affiliate comprises ≥ 15% of total member enrollment of Sponsoring Plan and its licensed affiliates ↓ Standard 6H

IN ADDITION,

3. Is medical care being directly provided?

Yes ↓ Standard 3A	No ↓ Standard 3B
-------------------------	------------------------

IN ADDITION,

4. If the controlled affiliate has health or workers' compensation administration business, does such business comprise 15% or more of the total member enrollment of Plan and its licensed controlled affiliates?

Yes		No

Standards 6A-6J	Controlled Affiliate is not a former primary licensee and is not subject to Standard 1(C) ↓ Standards 5, 8, 9B, 10, 11	Controlled Affiliate is a former primary licensee ↓ Standards 5, 8, 9A, 11
		Controlled Affiliate is not a former primary licensee and is subject to Standard 1(C) ↓ Standards 5, 8, 9B, 11

EXHIBIT A (continued)

Standard 1 - Organization and Governance

1A.) The Standard for more than 50% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA, (the "Sponsoring Plan"), has the legal authority, directly or indirectly through wholly-owned subsidiaries: 1) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof; and 2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan does not concur; and 3) to exercise control over the policy and operations of the Controlled Affiliate. In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate.

1B.) The Standard for 50% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA, (the "Sponsoring Plan"), has the legal authority, directly or indirectly through wholly-owned subsidiaries:

- 1) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; and
- 2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan does not concur; and
- 3) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan.

Amended as of September 19, 2014

EXHIBIT A (continued)

Notwithstanding anything to the contrary in 1) through 3) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by Sponsoring Plan before the Controlled Affiliate can:

- o change the geographic area in which it operates
- o change its legal and/or trade names
- o change any of the types of businesses in which it engages
- o create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business
- o sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced
- o make any loans or advances except in the ordinary course of business
- o enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate)
- o conduct any business other than under the Licensed Marks and Name
- o take any action that the Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate.

1C.) The Standard for 100% Plan control but less than 50% Sponsoring Plan Control:

A Controlled Affiliate shall be organized and operated in such a manner that (i) it offers solely Medicaid products and services; and (ii) a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA (the "Sponsoring Plan,") has the legal authority together with Other Plans:

Amended September 19, 2014

- 1) to select all members of the Controlled Affiliate's governing body; and
- 2) to prevent any change in the articles of incorporation, bylaws, or other establishing or governing documents of the Controlled Affiliate; and
- 3) to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such 100% control and ownership by Plans shall be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute the Addendum to Controlled Affiliate License.

Amended September 19, 2014

EXHIBIT A (continued)

Standard 2 - Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers. If a risk-assuming Controlled Affiliate ceases operations for any reason, Blue Cross and/or Blue Cross Plan coverage will be offered to all Controlled Affiliate subscribers without exclusions, limitations or conditions based on health status. If a nonrisk-assuming Controlled Affiliate ceases operations for any reason, Sponsoring Plan will provide for services to its customers. The requirements of the preceding two sentences shall apply to all lines of business unless a line of business is specially exempted from the requirement(s) by the BCBSA Board of Directors.

Standard 3 - State Licensure/Certification

3A.)The Standard for a Controlled Affiliate that employs, owns or contracts on a substantially exclusive basis for medical services is:

A Controlled Affiliate shall maintain unimpaired licensure or certification for its medical care providers to operate under applicable state laws.

3B.)The Standard for a Controlled Affiliate that does not employ, own or contract on a substantially exclusive basis for medical services is:

A Controlled Affiliate shall maintain unimpaired licensure or certification to operate under applicable state laws.

Standard 4 - Certain Disclosures

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of 1) the structure of the Blue Cross and Blue Shield System; and 2) the independent nature of every licensee; and 3) the Controlled Affiliate's financial condition.

Amended as of September 19, 2014

EXHIBIT A (continued)

Standard 5 - Reports and Records for Certain Smaller Controlled Affiliates

For a smaller Controlled Affiliate that does not underwrite the indemnity portion of workers' compensation insurance, the Standard is:

A Controlled Affiliate and/or its Sponsoring licensed Plan shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

Standard 6 - Other Standards for Larger Controlled Affiliates

Standards 6(A) - (I) that follow apply to larger Controlled Affiliates.

Standard 6(A): Board of Directors

A Controlled Affiliate Governing Board shall act in the interest of its Corporation in providing cost-effective health care services to its customers. A Controlled Affiliate shall maintain a governing Board, which shall control the Controlled Affiliate, composed of a majority of persons other than providers of health care services, who shall be known as public members. A public member shall not be an employee of or have a financial interest in a health care provider, nor be a member of a profession which provides health care services.

Standard 6(B): Responsiveness to Customers

A Controlled Affiliate shall be operated in a manner responsive to customer needs and requirements.

Standard 6(C): Participation in National Programs

A Controlled Affiliate shall effectively and efficiently participate in each national program as from time to time may be adopted by the Member Plans for the purposes of providing portability of membership between the licensees and ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's Service Area.

Amended as of September 19, 2014

EXHIBIT A (continued)

Such programs are applicable to licensees, and include:

1. BlueCard Program;
2. Inter-Plan Teleprocessing System (ITS);
3. National Account Programs;
4. Business Associate Agreement for Blue Cross and Blue Shield Licensees, effective April 14, 2003; and
5. Inter-Plan Medicare Advantage Program.

Standard 6(D): Financial Performance Requirements

In addition to requirements under the national programs listed in Standard 6C: Participation in National Programs, a Controlled Affiliate shall take such action as required to ensure its financial performance in programs and contracts of an inter-licensee nature or where BCBSA is a party.

Standard 6(E): Cooperation with Plan Performance Response Process

A Controlled Affiliate shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Plan Performance Response Process and in addressing Controlled Affiliate performance problems identified thereunder.

Standard 6(F): Independent Financial Rating

A Controlled Affiliate shall obtain a rating of its financial strength from an independent rating agency approved by BCBSA's Board of Directors for such purpose.

Standard 6(G): Local and National Best Efforts

Notwithstanding any other provision in the Plan's License Agreement with BCBSA or in this License Agreement, during each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Cross Mark.

Standard 6(H): Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers. **Amended as of November 21, 2014**

EXHIBIT A (continued)

Standard 6(I): Reports and Records

A Controlled Affiliate shall furnish to BCBSA on a timely and accurate basis reports and records relating to compliance with these Standards and the License Agreements between BCBSA and Controlled Affiliate. Such reports and records are the following:

- A) BCBSA Controlled Affiliate Licensure Information Request; and
- B) Biennial trade name and service mark usage material, including disclosure material; and
- C) Changes in the ownership and governance of the Controlled Affiliate, including changes in its charter, articles of incorporation, or bylaws, changes in a Controlled Affiliate's Board composition, or changes in the identity of the Controlled Affiliate's Principal Officers, and changes in risk acceptance, contract growth, or direct delivery of medical care; and
- D) Semi-annual "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC, Annual Certified Audit Report, Insurance Department Examination Report, Annual Statement filed with State Insurance Department (with all attachments), and

Amended as of November 17, 2011

EXHIBIT A (continued)

Standard 6(J): Control by Unlicensed Entities Prohibited

No Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled Affiliate thereof to obtain control of the Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services.

Standard 7 - Other Standards for Risk-Assuming Workers' Compensation Controlled Affiliates

Standards 7(A) - (E) that follow apply to Controlled Affiliates that underwrite the indemnity portion of workers' compensation insurance.

Standard 7 (A): Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 7(B): Reports and Records

A Controlled Affiliate shall furnish, on a timely and accurate basis, reports and records relating to compliance with these Standards and the License Agreements between BCBSA and the Controlled Affiliate. Such reports and records are the following:

- A. BCBSA Controlled Affiliate Licensure Information Request; and
 - B. Biennial trade name and service mark usage materials, including disclosure materials; and
 - C. Annual Certified Audit Report, Annual Statement as filed with the State Insurance Department (with all attachments), Annual NAIC's Risk-Based Capital Worksheets for Property and Casualty Insurers; and
 - D. Quarterly Estimated Risk-Based Capital for Property and Casualty Insurers, Insurance Department Examination Report; and
- Amended as of November 17,
2011**

EXHIBIT A (continued)

- E. Notification of all changes and proposed changes to independent ratings within 30 days of receipt and submission of a copy of all rating reports; and
- F. Changes in the ownership and governance of the Controlled Affiliate including changes in its charter, articles of incorporation, or bylaws, changes in a Controlled Affiliate's Board composition, Plan control, state license status, operating area, the Controlled Affiliate's Principal Officers or direct delivery of medical care.

Standard 7(C): Loss Prevention

A Controlled Affiliate shall apply loss prevention protocol to both new and existing business.

Standard 7(D): Claims Administration

A Controlled Affiliate shall maintain an effective claims administration process that includes all the necessary functions to assure prompt and proper resolution of medical and indemnity claims.

Standard 7(E): Disability and Provider Management

A Controlled Affiliate shall arrange for the provision of appropriate and necessary medical and rehabilitative services to facilitate early intervention by medical professionals and timely and appropriate return to work.

Amended as of November 16, 2000

EXHIBIT A (continued)

Standard 8 - Cooperation with Controlled Affiliate License Performance Response Process Protocol

A Controlled Affiliate and its Sponsoring Plan shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Controlled Affiliate License Performance Response Process Protocol (ALPRPP) and in addressing Controlled Affiliate compliance problems identified thereunder.

Standard 9(A) - Participation in National Programs by Smaller Controlled Affiliates that were former Primary Licensees

A smaller controlled affiliate that formerly was a Primary Licensee shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's service area and be subject to certain relevant financial and reporting requirements.

A. National program requirements include:

- BlueCard Program;
- Inter-Plan Teleprocessing System (ITS);
- National Account Programs.

B. Financial Requirements include:

- Standard 6(D): Financial Performance Requirements and Standard 6(H): Financial Responsibility; or
- A financial guarantee covering the Controlled Affiliate's Inter-Plan Programs obligations in a form, and from a guarantor, acceptable to BCBSA.

Amended as of November 21, 2014

EXHIBIT A (continued)

Standard 9(A) - Participation in National Programs by Smaller Controlled Affiliates that were former Primary Licensees

C. Reporting requirements include:

- The Semi-annual Health Risk-Based Capital (HRBC) Report.

Amended as of June 13, 2002

EXHIBIT A (continued)

Standard 9(B) - Participation in National Programs by Smaller Controlled Affiliates

A smaller controlled affiliate shall participate in national programs in accordance with BlueCard and other relevant Policies and Provisions shall effectively and efficiently participate in national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the controlled affiliate's service area and be subject to certain relevant financial and reporting requirements.

A. National program requirements include:

- BlueCard Program;
- Inter-Plan Teleprocessing System (ITS);
- National Account Programs.

B. Financial Requirements include:

- Standard 6(D): Financial Performance Requirements and Standard 6(H): Financial Responsibility; or
- A financial guarantee covering the Controlled Affiliate's Inter-Plan Programs obligations in a form, and from a guarantor, acceptable to BCBSA.

Amended as of June 20, 2013

EXHIBIT A (continued)

Standard 10 - Participation in Inter-Plan Medicare Advantage Program

A smaller controlled affiliate for which this standard applies pursuant to the Preamble section of Exhibit A of the Controlled Affiliate License Agreement shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the controlled affiliate's service area.

National program requirements include:

- A. Inter-Plan Medicare Advantage Program.

EXHIBIT A (continued)

Standard 11: Participation in Master Business Associate Agreement by Smaller Controlled Affiliate Licensees

Effective April 14, 2003, all smaller controlled affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

Amended as of September 19, 2014

EXHIBIT B

ADDENDUM TO CONTROLLED AFFILIATE LICENSE TO BE EXECUTED BY CONTROLLED AFFILIATES LICENSED UNDER CONTROLLED AFFILIATE LICENSE STANDARD 1C.

ADDENDUM TO CONTROLLED AFFILIATE LICENSE

This Addendum is made to that certain Blue Cross Controlled Affiliate License Agreement executed by and among Blue Cross and Blue Shield Association ("Licensor"), _____ ("Controlled Affiliate Licensee") and _____ ("Sponsoring Plan") dated the ____ day of _____, _____ ("Agreement"). The parties to this Addendum are Licensor, Controlled Affiliate Licensee, Sponsoring Plan, and the undersigned other Plans ("Other Plans"). This Addendum is made and shall be deemed effective as of the date of the Agreement.

WHEREAS, the Sponsoring Plan asserts that it can serve the Medicaid market in its Service Area more efficiently and with less risk though a Medicaid enterprise jointly owned and controlled with other Plans than through a wholly owned and controlled Medicaid enterprise;

WHEREAS, in such circumstance Controlled Affiliate License Standard 1C. permits the licensing of a Controlled Affiliate that is less than 50% owned and controlled by the Sponsoring Plan but which is 100% owned and controlled by Plans including the Sponsoring Plan, subject to certain conditions;

WHEREAS, one such condition is that the Sponsoring Plan and all such other owning and controlling Plans enter into this Addendum.;

NOW THEREFORE, for good and valuable consideration, including the promises and covenants set forth herein, the parties agree as follows:

1. The Sponsoring Plan shall participate operationally in Controlled Affiliate's business that is conducted under the Licensed Marks. The parties understand that participation may take many forms, one of which should be providing a network of providers in the Service Area of the Controlled Affiliate for the Medicaid services being offered under the Agreement and being involved in network development and provider relations.
2. Each of the Other Plans agrees that (i) it will cooperate fully with the Sponsoring Plan and BCBSA as needed to enable Sponsoring Plan and Controlled Affiliate Licensee to meet their obligations to Licensor under the Agreement and all associated rules and regulations of Licensor, including the Brand Regulations, (ii) it will not take any action, either individually or jointly with any of the Other

Plans, that would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement, and (iii) it will not fail to take any action, either individually or jointly with any of the Other Plans, where such failure would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement.

3. Each of the Other Plans acknowledges that it has reviewed the Agreement and understands that Sponsoring Plan has the right to terminate the Agreement without cause upon notice as provided in Paragraph 7 of the Agreement, and that such right is unfettered and may be exercised by Sponsoring Plan in its sole discretion.

WHEREFORE, by signing below the parties agree to be bound to the terms stated herein.

EXHIBIT C

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENT**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

FOR RISK PRODUCTS:

For Controlled Affiliates not underwriting the indemnity portion of workers' compensation insurance:

An amount equal to its pro rata share of Sponsoring Plan's dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on health care plans and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by Sponsoring Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

For Controlled Affiliates underwriting the indemnity portion of workers' compensation insurance:

An amount equal to 0.35 percent of the gross revenue per annum of Controlled Affiliate arising from products using the marks; plus, an annual fee of \$5,000 per license for a Controlled Affiliate subject to Standard 7.

Amended as of September 19, 2014

EXHIBIT C (continued)

FOR NONRISK PRODUCTS:

For third-party administrative business, an amount equal to its pro rata share of Sponsoring Plan's dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on health care plans and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by Sponsoring Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

For non-third party administrative business (e.g., case management, provider networks, etc.), an amount equal to 0.24 percent of the gross revenue per annum of Controlled Affiliate arising from products using the marks; plus:

- 1) An annual fee of \$5,000 per license for a Controlled Affiliate subject to Standard 6 D.
- 2) An annual fee of \$2,000 per license for all other Controlled Affiliates.

The foregoing shall be reduced by one-half where both a BLUE CROSS® and BLUE SHIELD® License are issued to the same Controlled Affiliate. In the event that any license period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Amended as of September 19, 2014

EXHIBIT 1A

**CONTROLLED AFFILIATE LICENSE AGREEMENT
APPLICABLE TO LIFE INSURANCE COMPANIES**

(Includes revisions adopted by Member Plans through their November 21, 2014 meeting)

This agreement by and among Blue Cross and Blue Shield Association ("BCBSA")

_____, ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as
_____, ("Plan").

WHEREAS, BCBSA is the owner of the BLUE CROSS and BLUE CROSS Design service marks;

WHEREAS, the Plan and the Controlled Affiliate desire that the latter be entitled to use the BLUE CROSS and BLUE CROSS Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE CROSS in a trade name ("Licensed Name");

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to the Controlled Affiliate the exclusive right to use the licensed Marks and Names in connection with and only in connection with those life insurance and related services authorized by applicable state law, other than health care plans and related services (as defined in the Plan's License Agreements with BCBSA) which services are not separately licensed to Controlled Affiliate by BCBSA, in the Service Area served by the Plan, except that BCBSA reserves the right to use the Licensed Marks and Name in said Service Area, and except to the extent that said Service Area may overlap the area or areas served by one or more other licensed Blue Cross Plans as of the date of this License as to which overlapping areas the rights hereby granted are non-exclusive as to such other Plan or Plans and their respective Licensed Controlled Affiliates only. Controlled Affiliate cannot use the Licensed Marks or Name outside the Service Area or in its legal or trade name; provided, however, that if and only for so long as Controlled Affiliate also holds a Blue Cross Controlled Affiliate License Agreement applicable to health care plans and related services, Controlled Affiliate may use the Licensed Marks and Name in its legal and trade name according to the terms of such license agreement.

Amended as of June 12, 2003

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in relation to the sale, marketing and rendering of authorized products and further agrees to be bound by the conditions regarding quality control shown in Exhibit A as it may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees that Plan and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by Plan or by BCBSA) a report to Plan and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of Exhibit A.

D. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner that it is subject to the bona fide control of a Plan or Plans. Absent written approval by BCBSA of an alternative method of control, bona fide control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Controlled Affiliate's governing body having not less than 51% voting control thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Plan or Plans shall own at least 51% of any for-profit Controlled Affiliate. If the Controlled Affiliate is a mutual company, the Plan or its designee(s) shall have and maintain, in lieu of the requirements of items (a) and (c) above, proxies representing 51% of the votes at any meeting of the policyholders and shall demonstrate that there is no reason to believe this such proxies shall be revoked by sufficient policyholders to reduce such percentage below 51%.

3. SERVICE MARK USE

Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks, and shall comply with such rules (applicable to all Controlled Affiliates licensed to use the Marks) relative to service mark use, as are issued from time-to-time by BCBSA. If there is any public reference to the affiliation between the Plan and the Controlled Affiliate, all of the Controlled Affiliate's licensed services in the Service Area of the Plan shall be rendered under the Licensed Marks. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks by Controlled Affiliate shall inure to the benefit of BCBSA.

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the option of Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENTS

Controlled Affiliate shall promptly notify Plan and BCBSA of any suspected acts of infringement, unfair competition or passing off which may occur in relation to the Licensed Marks. Controlled Affiliate shall not be entitled to require Plan or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to Plan and BCBSA, free of charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate hereby agrees to save, defend, indemnify and hold Plan and BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of Controlled Affiliate's rendering of health care services under the Licensed Marks.

7. LICENSE TERM

The license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods upon evidence satisfactory to the Plan and BCBSA that Controlled Affiliate meets the then applicable quality control standards, unless one of the parties hereto notifies the other party of the termination hereof at least sixty (60) days prior to expiration of any license period.

This Agreement may be terminated by the Plan or by BCBSA for cause at any time provided that Controlled Affiliate has been given a reasonable opportunity to cure and shall not effect such a cure within thirty (30) days of receiving written notice of the intent to terminate (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period). By way of example and not for purposes of limitation, Controlled Affiliate's failure to abide by the quality control provisions of Paragraph 2, above, shall be considered a proper ground for cancellation of this Agreement.

This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

A. Controlled Affiliate shall no longer comply with Standard No. 1 (Organization and Governance) of Exhibit A or, following an opportunity to cure, with the remaining quality control provisions of Exhibit A, as it may be amended from time-to-time; or

B. Plan ceases to be authorized to use the Licensed Marks; or

C. Appropriate dues for Controlled Affiliate pursuant to item 8 hereof, which are the royalties for this License Agreement are more than sixty (60) days in arrears to BCBSA.

Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks including any use in its trade name.

In the event of any disagreement between Plan and BCBSA as to whether grounds exist for termination or as to any other term or condition hereof, the decision of BCBSA shall control, subject to provisions for mediation or mandatory dispute resolution in effect between the parties.

Upon termination of this Agreement, Licensed Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of the Blue Cross and Blue Shield Association and provide instruction on how the customer can contact the Blue Cross and Blue Shield Association or a designated licensee to obtain further information on securing coverage. The written notification required by this paragraph shall be in writing and in a form approved by the Association. The Association shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

8. DUES

Controlled Affiliate will pay to BCBSA a fee for this license in accordance with the following formula:

▲ An annual fee of five thousand dollars (\$5,000) per license, plus

▲ .05% of gross revenue per year from branded group products, plus

▲ .5% of gross revenue per year from branded individual products plus

▲ .14% of gross revenue per year from branded individual annuity products.

The foregoing percentages shall be reduced by one-half where both a BLUE CROSS® and BLUE SHIELD® license are issued to the same entity. In the event that any License period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Plan will promptly and timely transmit to BCBSA all dues owed by Controlled Affiliate as determined by the above formula and if Plan shall fail to do so, Controlled Affiliate shall pay such dues directly.

Amended as of November 20, 1997

-4b-

9. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between Plan and Controlled Affiliate or between either and BCBSA.

9A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

10. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

Amended as of June 16, 2005

-4c-

(The next page is page 5)

11. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by a writing executed by all parties.

12. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such finding shall in no way effect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

13. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of the Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

EXHIBIT A
CONTROLLED AFFILIATE LICENSE STANDARDS
LIFE INSURANCE COMPANIES
Page 1 of 2

PREAMBLE

The standards for licensing Life Insurance Companies (Life and Health Insurance companies, as defined by state statute) are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote of all Plans. Each Licensed Plan is required to use a standard controlled affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Life Insurance Company maintains compliance with the license standards.

An organization meeting the following standards shall be eligible for a license to use the Licensed Marks within the service area of its sponsoring Licensed Plan to the extent and the manner authorized under the Controlled Affiliate License applicable to Life Insurance Companies and the principal license to the Plan.

Standard 1 - Organization and Governance

The LIC shall be organized and operated in such a manner that it is controlled by a licensed Plan or Plans which have, directly or indirectly: 1) not less than 51% of the voting control of the LIC; and 2) the legal ability to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the LIC with which it does not concur; and 3) operational control of the LIC.

If the LIC is a mutual company, the Plan or its designee(s) shall have and maintain, in lieu of the requirements of items 1 and 2 above, proxies representing at least 51% of the votes at any policyholder meeting and shall demonstrate that there is no reason to believe such proxies shall be revoked by sufficient policyholders to reduce such percentage below 51%.

Standard 2 - State Licensure

The LIC must maintain unimpaired licensure or certificate of authority to operate under applicable state laws as a life and health insurance company in each state in which the LIC does business.

EXHIBIT A
CONTROLLED AFFILIATE LICENSE STANDARDS
LIFE INSURANCE COMPANIES
Page 2 of 2

Standard 3 - Records and Examination

The LIC and its sponsoring licensed Plan(s) shall maintain and furnish, on a timely and accurate basis, such records and reports regarding the LIC as may be required in order to establish compliance with the license agreement. The LIC and its sponsoring licensed Plan(s) shall permit BCBSA to examine the affairs of the LIC and shall agree that BCBSA's board may submit a written report to the chief executive officer(s) and the board(s) of directors of the sponsoring Plan(s).

Standard 4 - Mediation

The LIC and its sponsoring Plan(s) shall agree to use the then-current BCBSA mediation and mandatory dispute resolution processes, in lieu of a legal action between or among another licensed controlled affiliate, a licensed Plan or BCBSA.

Standard 5 - Financial Responsibility

The LIC shall maintain adequate financial resources to protect its customers and meet its business obligations.

Standard 6 - Cooperation with Affiliate License Performance Response Process Protocol

The LIC and its Sponsoring Plan(s) shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Affiliate License Performance Response Process Protocol (ALPRPP) and in addressing LIC compliance problems identified thereunder.

Exhibit 1A1

Exhibit 1A1

**CONTROLLED AFFILIATE
TRADEMARK LICENSE AGREEMENT
FOR LIFE AND DISABILITY INSURANCE PRODUCTS**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____, ("Life and Disability Controlled Affiliate") which is a company offering life and disability insurance products owned and controlled by _____, _____ (individually, "Sponsoring Plan" and when referred to collectively, "Sponsoring Plans").

Whereas, BCBSA is the owner of the BLUE CROSS and BLUE SHIELD word and design service marks and any derivatives thereof ("Licensed Marks");

Whereas, each Sponsoring Plan is licensed separately by BCBSA to use one or more of the Licensed Marks in a particular Service Area;

Whereas, the Sponsoring Plans and the Life and Disability Controlled Affiliate desire that the latter be entitled to use the appropriate Licensed Marks in connection with life and disability insurance products in some or all of such Sponsoring Plans' Service Areas and in the Service Areas of other Regular Member Plans, as defined in the BCBSA By-laws, ("Blue Plans") consistent with the terms of this Agreement.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

A. Subject to the terms and conditions of this Agreement, BCBSA hereby grants to the Life and Disability Controlled Affiliate the limited right to use the Licensed Marks in connection with and only in connection with the following life and disability insurance products authorized by state law: (1) Group: Term Life, Long Term Disability, Whole Life, Benefit Life, Universal Life; (2) Individual: Term Life, Whole Life, Dependent Life, Spouse Life; (3) Other: Disability Income, Short Term Disability, Long Term Disability, Income Replacement; and (4) such other life and disability products approved by BCBSA in writing ("Licensed Products") in the Service Areas served by the Sponsoring Plans or in the Service Area or Areas of one or more other licensed Blue Plans, provided that such Blue Plans have consented to such use as authorized by this Agreement. Life and Disability Controlled Affiliate may not use the Licensed Marks in its legal or trade name.

B. Notwithstanding that the license granted to Life and Disability Controlled Affiliate is a license to use all of the Licensed Marks, Life and Disability Controlled Affiliate may only use those of the Licensed Marks in

the Service Area of a Sponsoring Plan or other consenting Blue Plan as described below that such Plan is authorized to use as a Blue Plan pursuant to its separate license agreements with BCBSA.

C. Life and Disability Controlled Affiliate may use the Licensed Marks in the Service Areas of Sponsoring Plans or in the Service Area of a Blue Plan that is not a signatory to this Agreement only after such Sponsoring Plan(s) or non-signatory Blue Plan consents to such use by executing a written consent in substantially the same form as the Consent Agreement attached as Exhibit B.

D. The following provisions apply with respect to Consent Agreements once such agreements have been fully and properly executed:

(1) All sales, marketing and advertising materials developed by and proposed for use by Life and Disability Controlled Affiliate in the Service Area of Sponsoring Plan or consenting Blue Plan (hereinafter, such consenting Sponsoring Plan or consenting Blue Plan collectively referred to "Consenting Plan(s)") must clearly identify the Consenting Plan (for example, a statement on such materials that reads "This product is offered with the cooperation of Blue Cross and/or Blue Shield of [Geography]");

(2) To the extent the Consenting Plan has separate divisions or other Affiliates that use the Licensed Marks in distinct geographic areas within its Service Area, consent obtained under this Agreement may be limited to one or more of such specific geographic areas as specified by the Consenting Plan in its signed Consent Agreement. For purposes of this entire Agreement, all references to the Service Area of a Sponsoring Plan, Blue Plan or Consenting Plan may include the entire Service Area or a distinct geographic area within such Service Area as specified in this Section 1 D (2);

(3) Where BCBSA has licensed two or more Blue Plans to use the same Licensed Marks in the same Service Area, in addition to the requirements set forth in Section D (1) above, the sales, marketing and advertising materials referenced in such section above must be communicated to the Consenting Plan's existing and prospective accounts through or with the approval of such Consenting Plan, and the personnel of such Consenting Plan must actively participate in all sales and marketing activities conducted by Life and Disability Controlled Affiliate in the same Service Area, including participating in meetings (whether in-person or via telephone, video or internet conference) with both existing and prospective accounts of the Consenting Plan;

(4) Life and Disability Controlled Affiliate shall be entitled to use in a Service Area only those Licensed Marks that the Consenting Plan has been granted by BCBSA the license to use under its Blue Plan license agreements (for example, if a Consenting Plan is licensed to use only the Blue Cross Marks in its Service Area, the materials used by Life and Disability Controlled Affiliate in that Service Area may only contain or reference the Blue Cross Marks and not the Blue Shield Marks).

(5) If a Consent Agreement is terminated, Life and Disability Controlled Affiliate shall, unless BCBSA and the Consenting Plan agree in their sole discretion to a phase out in writing, immediately (i) cease all use of the Licensed Marks, including in connection with any and all sales and marketing of the Licensed Products in the Service Area where consent has been terminated, and (ii) notify its customers that it is no longer a licensee and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in form approved by BCBSA.

2. QUALITY CONTROL

A. Life and Disability Controlled Affiliate agrees to use the Licensed Marks only in relation to the sale, marketing and administration of the Licensed Products and further agrees to be bound by the conditions regarding quality control shown in Exhibit A and the Guidelines to Administer the Standards for Trademark License Agreement for Life and Disability Insurance Products attached thereto.

B. Life and Disability Controlled Affiliate agrees that BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Life and Disability Controlled Affiliate's rendering of service and use of the Licensed Marks.

C. Life and Disability Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by BCBSA) a report to BCBSA demonstrating Life and Disability Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of Exhibit A.

D. As used herein, a Life and Disability Controlled Affiliate is defined as: An entity organized and operated in such a manner that it is 100% owned and controlled by Sponsoring Plans. Absent written approval by BCBSA of an alternative method of control, control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Life and Disability Controlled Affiliate's governing body having not less than 100% voting control

thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Sponsoring Plan or Plans shall own at least 100% of any for profit Life and Disability Controlled Affiliate.

3. SERVICE MARK USE

Life and Disability Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and shall ensure all uses of the Licensed Marks comply with the BCBSA Brand Regulations, as amended by BCBSA from time to time. Life and Disability Controlled Affiliate recognizes and agrees that all use of the Licensed Marks by Life and Disability Controlled Affiliate shall inure to the benefit of BCBSA.

4. SUBLICENSING AND ASSIGNMENT

The license hereby granted to Life and Disability Controlled Affiliate to use the Licensed Marks is and shall be personal to Life and Disability Controlled Affiliate and shall not be assignable by any act of the Life and Disability Controlled Affiliate, directly or indirectly, without the written consent of BCBSA. Said license shall not be assignable by operation of law, nor shall Life and Disability Controlled Affiliate mortgage or part with possession or control of this license or any right hereunder, and the Life and Disability Controlled Affiliate shall have no right to grant any sublicense to use the Licensed Marks.

5. INFRINGEMENTS

Life and Disability Controlled Affiliate shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off which may occur in relation to the Licensed Marks. Life and Disability Controlled Affiliate shall not be entitled to require BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Life and Disability Controlled Affiliate agrees to render to BCBSA, free of charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks by BCBSA. BCBSA shall have sole control of the defense and resolution of any claim of infringement brought or threatened by others.

6. LIABILITY INDEMNIFICATION

Life and Disability Controlled Affiliate hereby agrees to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of Life and Disability Controlled Affiliate's conduct.

7. LICENSE TERM

A. The license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods, unless either BCBSA or Life and Disability Controlled Affiliate notifies the other party in writing of the termination hereof at least sixty (60) days prior to expiration of any license period.

B. This Agreement may be terminated by BCBSA for cause at any time provided that Life and Disability Controlled Affiliate has been given a reasonable opportunity to cure and shall not effect such a cure within thirty (30) days of receiving written notice of the intent to terminate (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period). By way of example and not for purposes of limitation, Life and Disability Controlled Affiliate's failure to abide by the conditions regarding use of the Licensed Marks set forth in Section 1 of this Agreement or the quality control provisions of Section 2 (other than with respect to Section 2 D which is subject to immediate termination as stated in Section 7 C (1) below) shall be considered proper grounds for termination of this Agreement.

C. This Agreement and all of Life and Disability Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

(1) Life and Disability Controlled Affiliate shall no longer comply with Section 2 D (or Standard No. 1 (Organization and Governance) of Exhibit A); or

(2) Any Sponsoring Plan ceases to be authorized to use the Licensed Marks; or

(3) Appropriate fees for Life and Disability Controlled Affiliate pursuant to Section 8 of this Agreement are more than sixty (60) days in arrears to BCBSA.

Upon termination of this Agreement for cause or otherwise, Life and Disability Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks.

In the event of any disagreement between Life and Disability Controlled Affiliate and BCBSA as to whether grounds exist for termination or as to any other term or condition hereof, the decision of BCBSA shall control, subject to provisions for mediation or mandatory dispute resolution in effect between the parties.

Upon termination of this Agreement, Licensed Life and Disability Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of BCBSA and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

8. ROYALTIES

Life and Disability Controlled Affiliate will pay to BCBSA a fee for this license in accordance with the following formula:

- An annual fee of five thousand dollars (\$5,000) per license, plus
- .05% of gross revenue per year from group products sold under the Licensed Marks, plus
- .5% of gross revenue per year from individual products sold under the Licensed Marks

In the event that any license period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Life and Disability Controlled Affiliate will promptly and timely transmit to BCBSA all fees owed by Life and Disability Controlled Affiliate as determined by the above formula.

9. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between any Sponsoring Plan and Life and Disability Controlled Affiliate or between among them and/or BCBSA.

10. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the

Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by: (a) a writing signed by all parties; or (b) a writing approved by the affirmative vote of three-fourths of the Blue Plans and three-fourths of the total then current weighted vote of all the Blue Plans as officially recorded by the BCBSA Corporate Secretary. Upon such adoption by the Blue Plans, this Agreement and all other Trademark License Agreements for Life and Disability Insurance Products then in effect shall simultaneously be amended.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such finding shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of the Life and Disability Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

EXHIBIT A

**LICENSE STANDARDS APPLICABLE TO TRADEMARK LICENSE
AGREEMENT FOR LIFE AND DISABILITY INSURANCE PRODUCTS
Page 1 of 2**

Standard 1 - Organization and Governance

Any Life and Disability Controlled Affiliate licensed under the Trademark License Agreement for Life and Disability Insurance Products ("licensee") shall be organized and operated in such a manner that it is an entity organized and operated in such a manner that it is 100% owned and controlled by Sponsoring Plans. Absent written approval by BCBSA of an alternative method of control, control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Life and Disability Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Sponsoring Plan or Plans shall own at least 100% of any for profit Life and Disability Controlled Affiliate.

Standard 2 - State Licensure

The licensee must maintain unimpaired licensure or certificate of authority to operate under applicable state laws as a life company in each state in which the licensee does business.

Standard 3 - Records and Examination

The licensee shall maintain and furnish, on a timely and accurate basis, such records and reports regarding the licensee as may be required in order to establish compliance with the Agreement. The licensee shall permit BCBSA to examine the affairs of the licensee and shall agree that BCBSA's board may submit a written report to the chief executive officer(s) and the board(s) of directors of the Sponsoring Plan(s).

Standard 4 - Mediation

The licensee, its Sponsoring Plan(s) and all consenting Blue Plans shall agree to use the then-current BCBSA mediation and mandatory dispute resolution processes, in lieu of a legal action between or among another licensed Life and Disability Controlled Affiliate, a Sponsoring Plan and or consenting Blue Plan or BCBSA.

EXHIBIT A

**LICENSE STANDARDS APPLICABLE TO TRADEMARK LICENSE
AGREEMENT FOR LIFE AND DISABILITY INSURANCE PRODUCTS
Page 2 of 2**

Standard 5 - Financial Responsibility

The licensee shall maintain adequate financial resources to protect its customers and meet its business obligations.

Standard 6 - Cooperation with BCBSA Governance

The licensee shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of and in addressing licensee compliance problems that may be identified in connection with the operation or administration of the Trademark License Agreement for Life and Disability Insurance Products.

EXHIBIT B
CONSENT AGREEMENT

This Consent Agreement is made and entered into by and among the undersigned Blue Plan, and _____ ("Life and Disability Controlled Affiliate"), and the Blue Cross and Blue Shield Association ("BCBSA") and shall be deemed effective on _____ ("Effective Date").

Whereas, BCBSA owns the Blue Cross and Blue Shield word and design service marks and any derivative mark thereof (the "Brands");

Whereas, the undersigned Blue Plan is licensed to use one or more of the Brands within a specific geographic area ("Service Area");

Whereas Life and Disability Controlled Affiliate is licensed by BCBSA to use one or more of the Brands to offer life and disability insurance products ("Products") as defined and authorized in the Trademark License Agreement for Life and Disability Insurance Products ("Life and Disability License Agreement");

Whereas neither the Blue Plan nor its affiliates offer the Products under any of the Brands in such Blue Plan's Service Area or portion thereof where Blue Plan has consented to sale of the Products by Life and Disability Controlled Affiliate; and

Whereas BCBSA and the undersigned Blue Plan desire to consent to Life and Disability Controlled Affiliate's use of the Brands in Blue Plan's Service Area consistent with the terms of the Life and Disability License Agreement and this Consent Agreement.

Now, therefore, in consideration of the obligations and conditions stated in this Agreement, Blue Plan, Life and Disability Controlled Affiliate and BCBSA agree as follows:

1. Life and Disability Controlled Affiliate may market, sell, administer and underwrite the Products in Blue Plan's Service Area under the Brands licensed to Blue Plan in such Service Area subject to the terms of this Consent Agreement, the Life and Disability License Agreement and Blue Plan's license agreement(s) with BCBSA. Life and Disability Controlled Affiliate's rights under the Brands to offer the Products under the Brands are limited to offering the Products only under the Brand(s) licensed to the consenting Blue Plan.
2. Life and Disability Controlled Affiliate shall work with the undersigned Blue Plan to develop a written sales and marketing agreement that identifies the relationship between it and Blue Plan for the sales, marketing and customer service for the Products. The term of the sales and marketing agreement shall be the same as the term of this Consent Agreement.

3. All sales, marketing and advertising materials developed by and proposed for use by Life and Disability Controlled Affiliate in a consenting Blue Plan's Service Area must clearly identify the consenting Blue Plan (for example, a statement on such materials that reads "This product is offered with the cooperation of Blue Cross and/or Blue Shield of [Geography]");
4. Life and Disability Controlled Affiliate may use the Brands to sell the Products in the following Service Area or portion thereof as designated by Blue Plan:

5. If two or more Blue Plans to use the same Licensed Marks in the same Service Area, Life and Disability Controlled Affiliate shall work with the consenting Blue Plan in the following manner: (a) the sales, marketing and advertising materials must be communicated to the consenting Blue Plan's existing and prospective accounts through or with the approval of such Blue Plan, and (b) the personnel of such Blue Plan must actively participate in all sales and marketing activities conducted by Life and Disability Controlled Affiliate in the same Service Area, including participating in meetings (whether in-person or via telephone, video or internet conference) with both existing and prospective accounts of the consenting Blue Plan;
6. Life and Disability Controlled Affiliate shall be entitled to use in a Service Area only those Licensed Marks that the consenting Blue Plan has been granted by BCBSA the license to use under its license agreement (for example, if a consenting Blue Plan is licensed to use only the Blue Cross Marks in its Service Area, the materials used by Life and Disability Controlled Affiliate in that Service Area may only contain or reference the Blue Cross Marks and not the Blue Shield Marks).
7. If this Consent Agreement is terminated, Life and Disability Controlled Affiliate shall, unless each BCBSA and the Blue Plan agree in their sole discretion to a phase out in writing, immediately (i) cease all use of the Licensed Marks, including in connection with any and all sales and marketing of the Licensed Products in the Service Area where consent has been terminated, and (ii) notify its customers that it is no longer a licensee of BCBSA and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in form approved by BCBSA.

8. The term of this Consent Agreement shall be one year from the Effective Date. Unless either Blue Plan or Life and Disability Controlled Affiliate provides the other party with written notice of its desire not to renew this Consent Agreement at least 60 days prior to expiration of the term or any extended term or unless terminated as provided in Paragraph 9 below, this Consent Agreement shall automatically renew for subsequent one year periods.
9. This Consent Agreement may be terminated as follows:
 - A. Upon mutual written consent of Life and Disability Controlled Affiliate and Blue Plan;
 - B. By Blue Plan or Life and Disability Controlled Affiliate upon 60 days advance written notice to the non-terminating party and BCBSA; or
 - C. By Blue Plan immediately if Life and Disability Controlled Affiliate does not comply with this Consent Agreement or the sales protocol agreement.
10. This Consent Agreement shall automatically terminate if Blue Plan's primary licensee agreement terminates for any reason or if the Life and Disability License Agreement terminates for any reason.

Exhibit 1B

**BLUE CROSS
CONTROLLED AFFILIATE LICENSE AGREEMENT
APPLICABLE TO REGIONAL MEDICARE ADVANTAGE PPO PRODUCTS
(Adopted by Member Plans at their November 21, 2014 meeting)**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as _____ ("Controlling Plans"), each of which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE CROSS and BLUE CROSS Design service marks;

WHEREAS, under the Medicare Modernization Act, companies may apply to and be awarded a contract by the Centers for Medicare and Medicaid Services ("CMS") to offer Medicare Advantage PPO products in geographic regions designated by CMS (hereafter "regional MAPPO products").

WHEREAS, some of the CMS-designated regions include the Service Areas, or portions thereof, of more than one Plan.

WHEREAS, the Controlling Plans and Controlled Affiliate desire that the latter be entitled to use the BLUE CROSS and BLUE CROSS Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE CROSS in a trade name ("Licensed Name") to offer regional MAPPO products in a region that includes the Service Areas, or portions thereof, of more than one Controlling Plan;

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with the sale, marketing and administration of regional MAPPO products and related services.

This grant of rights is non-exclusive and is limited to the following states: _____ (the "Region"). Controlled Affiliate may use the Licensed

Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Region under any name or mark except business conducted in the Service Area of a Controlling Plan provided that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks and Name in connection with health care plans and related services in the Service Area of such Controlling Plan; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by the Controlling Plans or by BCBSA) a report or reports to the Controlling Plans and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that the Controlling Plans and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Cross License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

- (3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:
- (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
 - (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
 - (c) to exercise control over the policy and operations of the Controlled Affiliate; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

3. SERVICE MARK USE

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within the Region may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Region the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name in connection with the sale, marketing and administration of regional MAPPO products and related services.

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of any Controlling Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENT

Controlled Affiliate shall promptly notify the Controlling Plans and the Controlling Plans shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require the Controlling Plans or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to the Controlling Plans and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate and the Controlling Plans hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to Controlled Affiliate's rendering of services under the Licensed Marks and Name.

7. LICENSE TERM

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) any one of the Controlling Plans ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Cross License Agreement any one of the Controlling Plans ceases to be authorized to use the Licensed Names and Marks in the Region.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Controlling Plans or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Controlling Plans advising of the specific matters at issue and granting the Controlling Plans an opportunity to be heard and to present their response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this

Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or
(4) failure to comply with any of the applicable requirements of Standards 2, 3, 4, or 5 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(E); or (6) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans (including the Controlling Plans), any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Controlling Plans shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between or among BCBSA, any of the Controlling Plans and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

- (1) Controlled Affiliate shall no longer comply with item 2(E) above;
- (2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(E)(3)(vii) and (viii) of this Agreement.

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name, except to the extent that it continues to be authorized to use the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan.

-7-

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers to whom it provides products or services under the Licensed Marks pursuant to this Agreement that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(B) hereof, upon termination of this Agreement the provisions of Paragraph 7(G) shall not apply and the following provisions shall apply, except that, in the event that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks in the Service Area of a Controlling Plan and termination of this Agreement is due to a partial termination of such Controlling Plan's license pursuant to Paragraph 15(a)(x)(ii) of the Blue Cross License Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the Region and the geographic area for which the Controlling Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for payment to BCBSA of an amount equal to \$25 multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any Plan other than a Controlling Plan is permitted by BCBSA to use marks or names licensed by BCBSA in a geographic area in the Region, the payment for Licensed Enrollees in such

geographic area shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans in such geographic area and the denominator of which is the total number of Licensed Enrollees in such geographic area. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Controlling Plans or any other Licensed Controlled Affiliates of the Controlling Plans to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this subparagraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans (including the Controlling Plans) or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Controlling Plans or their other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.K. and any costs associated with reestablishing the terminated Controlling Plan's Service Area or the Region, including any payments made by BCBSA to a Plan or Plans (including the other Controlling Plans), or their Licensed Controlled Affiliates, for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to audit the books and records of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans to verify compliance with this paragraph 7.H.

(5) As to a breach of 7.H.(1), (2), (3) or (4), the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless a Controlling Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of such Controlling Plan's license agreement upon the required 6 month written notice.

J. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

K. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

8. DISPUTE RESOLUTION

The parties agree that any disputes between or among them or between or among any of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Cross and Blue Cross Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of each Controlling Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

9. LICENSE FEE

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit B.

10. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between the Controlling Plans and Controlled Affiliate or between either and BCBSA.

Amended as of September 19, 2014

-10-

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with

0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

16. HEADINGS

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

EXHIBIT A

**CONTROLLED AFFILIATE LICENSE STANDARDS
APPLICABLE TO REGIONAL MEDICARE
ADVANTAGE PPO PRODUCTS**

November 2014

PREAMBLE

The standards for licensing Controlled Affiliates for Medicare Advantage PPO Products are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote. Each Controlling Plan is required to use a standard Controlled Affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Controlled Affiliate maintains compliance with the license standards.

Standard 1 - Organization and Governance

A Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

- (1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;
- (2) Each Controlling Plan is authorized pursuant to a separate Blue Cross License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and
- (3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:
 - (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
 - (b) prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
 - (c) exercise control over the policy and operations of the Controlled Affiliate; and

EXHIBIT A (continued)

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

Standard 2 - Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 3 - State Licensure/Certification

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

EXHIBIT A (continued)

Standard 4 - Certain Disclosures

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of:

- a. the structure of the Blue Cross and Blue Shield System; and
- b. the independent nature of every licensee.

Standard 5 - Reports and Records for Controlled Affiliates

A Controlled Affiliate and/or its Controlling Plans shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

Standard 6 - Best Efforts

During each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Cross Marks.

Standard 7 - Participation in Certain National Programs

A Controlled Affiliate shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's service area.

National program requirements include:

- a. Inter-Plan Teleprocessing System (ITS); and
- b. Inter-Plan Medicare Advantage Program.

Standard 8 - Participation in Master Business Associate Agreement

Controlled Affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

Amended as of November 15, 2007

EXHIBIT B

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENTS
APPLICABLE TO REGIONAL MEDICARE ADVANTAGE PPO PRODUCTS**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

An amount equal to its pro rata share of each Controlling Plan dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on regional MAPPO products and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by each Controlling Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

Amended as of June 14, 2007

Exhibit 1C

BLUE CROSS
CONTROLLED AFFILIATE LICENSE AGREEMENT
APPLICABLE TO REGIONAL MEDICARE PART D PRESCRIPTION DRUG PLAN PRODUCTS
(Adopted by Member Plans at their November 21, 2014 meeting)

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as _____ ("Controlling Plans"), each of which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE CROSS and BLUE CROSS Design service marks;

WHEREAS, under the Medicare Modernization Act, companies may apply to and be awarded a contract by the Centers for Medicare and Medicaid Services ("CMS") to offer Medicare Part D Prescription Drug Plan products in geographic regions designated by CMS (hereafter "regional PDP products").

WHEREAS, some of the CMS-designated regions include the Service Areas, or portions thereof, of more than one Plan.

WHEREAS, the Controlling Plans and Controlled Affiliate desire that the latter be entitled to use the BLUE CROSS and BLUE CROSS Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE CROSS in a trade name ("Licensed Name") to offer regional PDP products in a region that includes the Service Areas, or portions thereof, of more than one Controlling Plan;

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with the sale, marketing and administration of regional PDP products and related services.

This grant of rights is non-exclusive and is limited to the following states: _____ (the "Region"). Controlled Affiliate may use the Licensed

Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Region under any name or mark except business conducted in the Service Area of a Controlling Plan provided that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks and Name in connection with health care plans and related services in the Service Area of such Controlling Plan; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by the Controlling Plans or by BCBSA) a report or reports to the Controlling Plans and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that the Controlling Plans and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Cross License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

(3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:

- (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
- (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
- (c) to exercise control over the policy and operations of the Controlled Affiliate; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

3. SERVICE MARK USE

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within the Region may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Region the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name in connection with the sale, marketing and administration of regional PDP products and related services.

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of any Controlling Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENT

Controlled Affiliate shall promptly notify the Controlling Plans and the Controlling Plans shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require the Controlling Plans or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to the Controlling Plans and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate and the Controlling Plans hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to Controlled Affiliate's rendering of services under the Licensed Marks and Name.

7. LICENSE TERM

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) any one of the Controlling Plans ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Cross License Agreement any one of the Controlling Plans ceases to be authorized to use the Licensed Names and Marks in the Region.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Controlling Plans or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Controlling Plans advising of the specific matters at issue and granting the Controlling Plans an opportunity to be heard and to present their response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this

Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or
(4) failure to comply with any of the applicable requirements of Standards 2, 3, 4, or 5 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(E); or (6) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans (including the Controlling Plans), any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Controlling Plans shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between or among BCBSA, any of the Controlling Plans and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

(1) Controlled Affiliate shall no longer comply with item 2(E) above;

(2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(E)(3)(vii) and (viii) of this Agreement.

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name, except to the extent that it continues to be authorized to use the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers to whom it provides products or services under the Licensed Marks pursuant to this Agreement that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(B) hereof, upon termination of this Agreement the provisions of Paragraph 7(G) shall not apply and the following provisions shall apply, except that, in the event that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks in the Service Area of a Controlling Plan and termination of this Agreement is due to a partial termination of such Controlling Plan's license pursuant to Paragraph 15(a)(x)(ii) of the Blue Cross License Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the Region and the geographic area for which the Controlling Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for payment to BCBSA of an amount equal to \$25 multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any Plan other than a Controlling Plan is permitted by BCBSA to use marks or names licensed by BCBSA in a geographic area in the Region, the payment for Licensed Enrollees in such

geographic area shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans in such geographic area and the denominator of which is the total number of Licensed Enrollees in such geographic area. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Controlling Plans or any other Licensed Controlled Affiliates of the Controlling Plans to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this subparagraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans (including the Controlling Plans) or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Controlling Plans or their other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.K. and any costs associated with reestablishing the terminated Controlling Plan's Service Area or the Region, including any payments made by BCBSA to a Plan or Plans (including the other Controlling Plans), or their Licensed Controlled Affiliates, for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to audit the books and records of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans to verify compliance with this paragraph 7.H.

(5) As to a breach of 7.H.(1), (2), (3) or (4), the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless a Controlling Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of such Controlling Plan's license agreement upon the required 6 month written notice.

J. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

K. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

8. DISPUTE RESOLUTION

The parties agree that any disputes between or among them or between or among any of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Cross and Blue Cross Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of each Controlling Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

9. LICENSE FEE

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit B.

10. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between the Controlling Plans and Controlled Affiliate or between either and BCBSA.

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with

0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

16. HEADINGS

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

EXHIBIT A

**CONTROLLED AFFILIATE LICENSE STANDARDS
APPLICABLE TO REGIONAL MEDICARE
PART D PRESCRIPTION DRUG PLAN PRODUCTS
November 2014**

PREAMBLE

The standards for licensing Controlled Affiliates for Medicare Part D Prescription Drug Plan Products are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote. Each Controlling Plan is required to use a standard Controlled Affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Controlled Affiliate maintains compliance with the license standards.

Standard 1 - Organization and Governance

A Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

- (1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;
- (2) Each Controlling Plan is authorized pursuant to a separate Blue Cross License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and
- (3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:
 - (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
 - (b) prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
 - (c) exercise control over the policy and operations of the Controlled Affiliate; and

EXHIBIT A (continued)

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

Standard 2 - Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 3 - State Licensure/Certification

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

EXHIBIT A (continued)

Standard 4 - Certain Disclosures

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of:

- a. the structure of the Blue Cross and Blue Shield System; and
- b. the independent nature of every licensee.

Standard 5 - Reports and Records for Controlled Affiliates

A Controlled Affiliate and/or its Controlling Plans shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

Standard 6 - Best Efforts

During each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Cross Marks.

Standard 7 - Participation in Master Business Associate Agreement

Controlled Affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

EXHIBIT B

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENTS
APPLICABLE TO REGIONAL MEDICARE PART D PRESCRIPTION DRUG PLAN PRODUCTS**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

An amount equal to its pro rata share of each Controlling Plan dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on regional PDP products and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by each Controlling Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

Amended as of June 14, 2007

EXHIBIT 2

Membership Standards

Page 1 of 5

Preamble

The Membership Standards apply to all organizations seeking to become or to continue as Regular Members of the Blue Cross and Blue Shield Association. Any organization seeking to become a Regular Member must be found to be in substantial compliance with all Membership Standards at the time membership is granted and the organization must be found to be in substantial compliance with all Membership Standards for a period of two (2) years preceding the date of its application. If Membership is sought by an entity which controls or is controlled by one or more Plans, such compliance shall be determined on the basis of compliance by such Plan or Plans.

The Regular Member Plans shall have authority to interpret these Standards.

A Regular Member Plan that operates as a "Shell Holding Company" is defined as an entity that assumes no underwriting risk and has less than 1% of the consolidated enterprise assets (excludes investments in subsidiaries) and less than 5% of the consolidated enterprise net general and administrative expenses.

A Regular Member Plan that operates as a "Hybrid Holding Company" is defined as an entity that assumes no underwriting risk and has either more than 1% of the consolidated enterprise assets (excludes investments in subsidiaries) or more than 5% of the consolidated enterprise net general and administrative expenses.

StandardA Plan shall maintain a governing Board, which shall control the Plan and ensure that the Plan follows appropriate practices of corporate governance. A Plan's Board shall not be controlled by any special interest group, shall make an annual determination that a majority of its directors are independent, and shall act in the best interest of its Corporation and its customers. The Board shall be composed of a majority of persons other than providers of health care services, who shall be known as public members. A public member shall not be an employee of or have a financial interest in a health care provider, nor be a member of a profession which provides health care services.

Amended as of March 15, 2007

EXHIBIT 2

Membership Standards

Page 2 of 5

StandardA Plan shall furnish to the Association on a timely and accurate basis reports and records relating to compliance with
2: these Standards and the License Agreements between the Association and the Plans. Such reports and records are the following:

- A. BCBSA Membership Information Request;
 - B. Biennial trade name and service mark usage material, including disclosure material under Standard 7;
 - C. Changes in the governance of the Plan, including changes in a Plan's Charter, Articles of Incorporation, or Bylaws, changes in a Plan's Board composition, or changes in the identity of the Plan's Principal Officers;
 - D. Quarterly Financial Report, Semi-annual "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC, Annual Budget, Annual Certified Audit Report, Insurance Department Examination Report, Annual Statement filed with State Insurance Department (with all attachments), Plan, Subsidiary and Affiliate Report; and
- Plans that are a Shell Holding Company as defined in the Preamble hereto are required to furnish only a calendar year-end "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC.

Amended as of November 17, 2011

EXHIBIT 2

Membership Standards

Page 3 of 5

E. Quarterly Enrollment Report, Quarterly Member Touchpoint Measures Index (MTM) through 12/31/2011, and Semi-annual MTM Index starting 1/1/2012 and thereafter.

•For purposes of MTM reporting only, a Plan shall file a separate MTM report for each Geographic Market.

Standard A Plan shall be operated in a manner that provides reasonable financial assurance that it can fulfill its contractual obligations to its customers.

Standard 4:A Plan shall be operated in a manner responsive to customer needs and requirements.

StandardA Plan shall effectively and efficiently participate in each national program as from time to time may be adopted by the Member Plans for the purposes of providing portability of membership between the Plans and ease of claims processing for customers receiving benefits outside of the Plan's Service Area.

Such programs are applicable to Blue Cross and Blue Shield Plans, and include:

- A. Inter-Plan Teleprocessing System (ITS);
- B. BlueCard Program;
- C. National Account Programs;
- D. Business Associate Agreement for Blue Cross and Blue Shield Licensees, effective April 14, 2003; and
- E. Inter-Plan Medicare Advantage Program.

Amended as of November 21, 2014

EXHIBIT 2

Membership Standards

Page 4 of 5

StandardIn addition to requirements under the national programs listed in Standard 5: Participation in National Programs, a Plan
6: shall take such action as required to ensure its financial performance in programs and contracts of an inter-Plan nature or where the Association is a party.

StandardA Plan shall make adequate disclosure in contracting with third parties and in disseminating public statements of (i) the
7: structure of the Blue Cross and Blue Shield System, (ii) the independent nature of every Plan, and (iii) the Plan's financial condition.

StandardA Plan shall cooperate with the Association's Board of Directors and its Brand Enhancement & Protection Committee in
8: the administration of the Plan Performance Response Process and in addressing Plan performance problems identified thereunder.

StandardA Plan shall obtain a rating of its financial strength from an independent rating agency approved by the Association's
9: Board of Directors for such purpose.

StandardNotwithstanding any other provision in this License Agreement, during each year, a Plan and its Controlled Affiliate(s)
10: engaged in providing licensable services (excluding Life Insurance and Charitable Foundation Services) shall use their best efforts to promote and build the value of the Blue Cross Marks.

StandardNeither a Plan nor any Larger Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled
11: Affiliate thereof to obtain control of the Plan or Larger Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services.

Amended as of June 16, 2005

EXHIBIT 2

Membership Standards

Page 5 of 5

StandardNo provider network, or portion thereof, shall be rented or otherwise made available to a National Competitor if the
12: Licensed Marks or Names are used in any way with such network.

A provider network may be rented or otherwise made available, provided there is no
use of the Licensed Marks or Names with respect to the network being rented.

Amended as of March 18, 2004

EXHIBIT 3

GUIDELINES WITH RESPECT TO USE OF LICENSED NAME AND MARKS IN CONNECTION WITH NATIONAL ACCOUNTS

Page 1 of 3

1. The strength of the Blue Cross/Blue Cross National Accounts mechanism, and the continued provision of cost effective, quality health care benefits to National Accounts, are predicated on locally managed provider networks coordinated on a national scale in a manner consistent with effective service to National Account customers and consistent with the preservation of the integrity of the Blue Cross/Blue Shield system and the Licensed Marks. These guidelines shall be interpreted in keeping with such ends.
2. A National Account is an entity with employee and/or retiree locations in more than one Plan's Service Area. Unless otherwise agreed, a National Account is deemed located in the Service Area in which the corporate headquarters of the National Account is located. A local plant, office or division headquarters of an entity may be deemed a separate National Account when that local plant, office or division headquarters 1) has employee locations in more than one Service Area, and 2) has independent health benefit decision-making authority for the employees working at such local plant, office or division headquarters and for employees working at other locations outside the Service Area. In such a case, the local plant, office or division headquarters is a National Account that is deemed located in the Service Area in which such local plant, office or division headquarters is located. The Control Plan of a National Account is the Plan in whose Service Area the National Account is located. A participating ("Par") Plan is a Plan in whose Service Area the National Account has employee and/or retiree locations, but in which the National Account is not located. In the event that a National Account parent company consolidates health benefit-decision making for itself and its wholly-owned subsidiary companies, the parent company and the subsidiary companies shall be considered one National Account. The Control Plan for such a National Account shall be the Plan in whose Service Area the parent company headquarters is located.
3. The National Account Guidelines enunciated herein below shall be applicable only with respect to the business of new National Accounts acquired after January 1, 1991.
4. Control Plans shall utilize National Account identification cards complying with then currently effective BCBSA graphic standards in connection with all National Accounts business to facilitate administration thereof, to minimize subscriber and provider confusion, and to reflect a commitment to cooperation among Plans.

Amended as of June 12, 2003

EXHIBIT 3

Page 2 of 3

5. Disputes among Plans and/or BCBSA as to the interpretation or implementation of these Guidelines or as to other National Accounts issues shall be submitted to mediation and mandatory dispute resolution as provided in the License Agreement. For two years from the effective date of the License Agreement, however, such disputes shall be subject to mediation only, with the results of such mediation to be collected and reported in order to establish more definitive operating parameters for National Accounts business and to serve as ground rules for future binding dispute resolution.

6. The Control Plan may use the BlueCard Program (as defined by IPPC) to deliver benefits to employees and non-Medicare eligible retirees in a Participating Plan's service area if an alternative arrangement with the Participating Plan cannot be negotiated. The Participating Plan's minimum servicing requirement for those employees and non-Medicare retirees in its service area is to deliver benefits using the BlueCard Program. Account delivery is subject to the policies, provisions and procedures of the BlueCard Program.

7. For provider payments in a Participating Plan's area (on non-BlueCard claims), payment to the provider may be made by the Participating Plan or the Control Plan at the Participating Plan's option. If the Participating Plan elects to pay the provider, it may not withhold payment of a claim verified by the Control Plan or its designated processor, and payment must be in conformity with service criteria established by the Board of Directors of BCBSA (or an authorized committee thereof) to assure prompt payment, good service and minimum confusion with providers and subscribers. The Control Plan, at the Participating Plan's request, will also assure that measures are taken to protect the confidentiality of the data pertaining to provider reimbursement levels and profiles.

Amended as of June 14, 1996

EXHIBIT 3

Page 3 of 3

8. The Control Plan, in its financial agreements with a National Account, is expected to reasonably reflect the aggregate amount of differentials passed along to the Control Plan by all Participating Plans in a National Account.
9. Other than in contracting with health care providers or soliciting such contracts in areas contiguous to a Plan's Service Area in order to serve its subscribers or those of its licensed Controlled Affiliate residing or working in its Service Area, a Control Plan may not use the Licensed Marks and/or Name, as a tag line or otherwise, to negotiate directly with providers outside its Service Area.

Amended as of March 13, 2003

EXHIBIT 4

GOVERNMENT PROGRAMS AND CERTAIN OTHER USES

Page 1 of 14

1. A Plan and its licensed Controlled Affiliate may use the Licensed Marks and Name in bidding on and executing a contract to serve a Government Program, and in thereafter communicating with the Government concerning the Program. With respect, however, to such contracts entered into after the 1st day of January, 1991, the Licensed Marks and Name will not be used in communications or transactions with beneficiaries or providers in the Government Program located outside a Plan's Service Area, unless the Plan can demonstrate to the satisfaction of BCBSA's governing body that such a restriction on use of the Licensed Marks and Name will jeopardize its ability to procure the contract for the Government Program. As to both existing and future contracts for Government Programs, Plans will discontinue use of the Licensed Marks and Name as to beneficiaries and Providers outside their Service Area as expeditiously as circumstances reasonably permit. Effective January 1, 1995, except as provided in the first sentence above, all use by a Plan of the Licensed Marks and Name in Government Programs outside of the Plan's Service Area shall be discontinued. Incidental communications outside a Plan's Service Area with resident or former resident beneficiaries of the Plan, and other categories of necessary incidental communications approved by BCBSA, are not prohibited. For purposes of this Paragraph 1, the term "Government Programs" shall mean Medicare Part A, Medicare Part B and other non-risk government programs.

2. In connection with activity otherwise in furtherance of the License Agreement, a Plan and its Controlled Affiliates that are licensed to use the Licensed Marks and Name in its Service Area pursuant to the Controlled Affiliate License Agreements authorized in clauses a) through c) of Paragraph 2 of the Plan's License Agreement with BCBSA may use the Licensed Marks and Name outside the Plan's Service Area in the following circumstances which are deemed legitimate and necessary and not likely to cause consumer confusion:

2.1 Common Business Communications

- a. sending letterhead, envelopes, and similar items solely for administrative purposes (e.g., not for purposes of marketing, advertising, promoting, selling or soliciting the sale of health care plans and related services);
- b. distributing business cards other than in marketing and selling;
- c. advertising in publications or electronic media solely to persons for employment;

Amended as of June 19, 2014

EXHIBIT 4

Page 2 of 14

2.2 Marketing Spillover

a. advertising in print, electronic or other media which serve, as a substantial market, the Service Area of the Plan or licensed Controlled Affiliate, provided that no Plan or Controlled Affiliate may advertise outside its Service Area on the national broadcast and cable networks and that advertisements in national print media are limited to the smallest regional edition encompassing the Service Area;

b. advertising by direct mail where the addressee's zip code plus 4 includes, at least in part, the Plan's Service Area or that of a licensed Controlled Affiliate;

2.3 Provider Contracting

a. contracting with health care providers or soliciting such contracts in areas contiguous to the Plan's Service Area in order to serve its subscribers or those of such licensed Controlled Affiliates residing or working in its service area;

b. issuing a small sign containing the legal name or trade name of the Plan or such licensed Controlled Affiliates for display by a provider to identify the latter as a participating provider of the Plan or Controlled Affiliate;

c. negotiating rates with a health care provider for services to a specific member, provided that all of the following conditions are met:

(1) the health care provider does not have a contract, applicable to the services rendered or to be rendered, with the Licensee (or any of the Licensees in the case of overlapping Service Areas) in whose Service Area the health care provider is located; and

(2) the Plan or Controlled Affiliate reasonably determines that the member did/does not have a reasonable opportunity to access a participating provider whose contract applies to the services rendered or to be rendered; and

(3) at least one of the following circumstances exists:

Amended as of June 19, 2014

EXHIBIT 4

Page 3 of 14

- (i) the member received emergency services and the Plan or Controlled Affiliate knows or reasonably anticipates that the charges on the claim will meet or exceed \$5,000; or
 - (ii) a provider, in consultation pre- or post- treatment with the Plan or Controlled Affiliate, makes/made a treatment recommendation or referral to a non-par provider or to a par provider whose contract does not apply to the services to be rendered; or
 - (iii) the member inadvertently accessed a non-par provider or non-contracted services in the course of receiving services from a par provider (e.g., the member sees a non-par consulting specialist in a participating hospital); and
 - (4) the Licensee (and in the case of overlapping Service Areas, all of the Licensees) in whose Service Area the health care provider is located consent(s) in advance.
- d. contracting with a pharmacy management organization ("Pharmacy Intermediary") to gain access to a national or regional pharmacy network to provide self-administered prescription drugs to deliver a pharmacy benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Pharmacy Intermediary may not use the Licensed Marks or Name in contracting with the pharmacy providers in such network;

Amended as of June 19, 2014

EXHIBIT 4

Page 4 of 14

- e. contracting with the corporate owner of a national or regional retail pharmacy chain to gain access to the pharmacies in the chain to provide self-administered prescription drugs to deliver a pharmacy benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided that (1) the Plan and the Controlled Affiliate may not contract directly with pharmacists or pharmacy stores outside the Plan's Service Area, and (2) neither the Plan's or the Controlled Affiliate's name nor the Licensed Marks or Name may be posted or otherwise displayed at or by any pharmacy store outside the Plan's Service Area;
 - f. contracting with a dental management organization ("Dental Intermediary") to gain access to a national or regional dental network to deliver a routine dental benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Dental Intermediary may not use the Licensed Marks or Name in contracting with the dental providers in such network;
 - g. contracting with a vision management organization ("Vision Intermediary") to gain access to a national or regional vision network to deliver a routine vision benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Vision Intermediary may not use the Licensed Marks or Name in contracting with the vision providers in such network;
 - h. contracting with an independent clinical laboratory for analysis and clinical assessment of specimens that are collected within the Plan's Service Area;
 - i. contracting with a durable medical equipment or home medical equipment company for durable medical equipment and supplies and home medical equipment and supplies that are shipped to a location within the Plan's Service Area;
 - j. contracting with a specialty pharmaceutical company for non-routine biological therapeutics that are ordered by a health care professional located within the Plan's Service Area;
-

EXHIBIT 4

Page 5 of 14

- k. contracting with a company that operates provider sites in the Plan's Service Area, provided that the contract is solely for services rendered at a site (e.g., hospital, mobile van) that is within the Plan's Service Area;
 - l. contracting with a company that makes health care professionals available in the Plan's Service Area (e.g., traveling home health nurse), provided that the contract is solely for services rendered by health care professionals who are located within the Plan's Service Area.
- 2.4 Services to National Accounts
- a. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee (as those terms are defined in the Inter-Plan Programs Policies and Provisions ("IP Policies")) to offer Blue-branded Health Coverage to the National Account, offering Blue-branded Health and Wellness Programs to all members of the National Account, including members who have not enrolled in the Blue-branded Health Coverage ("non-Blue Health Coverage members"), provided that:
 - (i) the Plan and/or licensed Controlled Affiliate has no contact or interaction with providers outside of the Plan's Service Area regarding such non-Blue Health Coverage members, except as specifically provided in the IP Policies; and
 - (ii) if in accordance with IP Policies another Licensee is soliciting or servicing under the Brands a local plant, office or division of the account that is outside of the Plan's Service Area, the Plan and/or licensed Controlled Affiliate may not offer Blue-branded Health and Wellness Programs to any employees working at such local plant, office or division without the consent of such other Licensee; and
 - (iii) if the Plan and/or licensed Controlled Affiliate provides an information card to the non-Blue Health Coverage members, the card may not display the Symbols in the masthead, must contain a prominent disclosure conveying that it is not a health insurance card, and otherwise must be designed so that it is dissimilar to a Blue member identification card.

Amended as of June 19, 2014

EXHIBIT 4

Page 6 of 14

For purposes of this subparagraph a, the following definitions apply:

“Health and Wellness Program” shall mean a program that includes at least one of the following elements or a related element:

- Health Risk Assessment and/or Preventive Screenings
- Exercise and Fitness Programs
- Health and Wellness Events (e.g., attendance at a health fair, a 5K walk)
- Nutrition and Weight Management
- Health Education (e.g., smoking cessation classes)
- Prenatal and Parenting Education
- Disease or Chronic Condition Management

The above listing is intended to represent examples of the types of programs that may be offered, and other programs, including those offered through different media such as the internet or telephonically, may also be deemed Health and Wellness programs.

“Health Coverage” shall mean providing or administering medical, surgical, hospital, major medical, or catastrophic coverage, or any HMO, PPO, POS or other managed care plan for the foregoing services.

Amended as of June 19, 2014

EXHIBIT 4

Page 7 of 14

2.4 Services to National Accounts (continued)

- b. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee to offer Blue-branded Health Coverage to the National Account, performing the Eligibility and Enrollment functions of HR administration for all benefit plans offered by the National Account to its members, including benefit plans that are not underwritten or administered by the Plan, provided that:
 - (i) in performing such functions, the Plan and/or licensed Controlled Affiliate does not use the Brands in any communications with health care providers outside of the Plan's Service Area, and otherwise limits its use of the Brands outside of the Service Area to communications with the account's members, the other benefit plan providers with which the account has contracted and other reasonably necessary communications to perform such functions; and
 - (ii) if in accordance with IP Policies another Licensee is soliciting or servicing under the Brands a local plant, office or division of the account that is outside of the Plan's Service Area, the Plan and/or licensed Controlled Affiliate may not perform Eligibility and Enrollment functions for employees working at such local plant, office or division without the consent of such other Licensee;

For purposes of this subparagraph b, the following definitions apply:

"Health Coverage" has the meaning set forth in subparagraph 2.4.a.

Amended as of June 19, 2014

EXHIBIT 4

Page 8 of 14

“Eligibility” means services that manage the account’s eligibility data and determine or process determinations relating to eligibility for benefit plans offered by the account to its employees, including such services as:

- monitoring and auditing data to ensure that only entitled individuals are enrolled in each such benefit plan;
- review of eligibility documentation (e.g. marriage licenses, birth certificates, student status verification letters, employment records);
- identification of key member segments such as over-age dependents, part-time employees, employees reaching certain milestones (e.g. Medicare-eligible, retirees);
- termination of coverage for those individuals found to be ineligible for coverage under a benefit plan, and, if applicable, generation of a COBRA event; and
- management of “hour-banking” for union environments in which union members can bank hours to remain eligible for benefits.

“Enrollment” means services that enroll eligible individuals and their spouses/dependents or terminate or change their enrollment in the account’s benefit plans on an ongoing basis and during open enrollment periods, including such services as:

- the coordination of each step in open enrollment process from project planning and system set-up to the generation of confirmation statements;
- ongoing enrollment support for new hires and changes due to life events and work status adjustments;
- evidence of insurability (EOI) administration for life and disability coverage;
- transmission of eligibility/enrollment information to the account’s benefit plan providers;
- review and reconciliation of error reports received from the account’s benefit plan providers; and
- transmission of information to the account’s payroll system (e.g., benefit deductions, employee demographic data).

Amended as of November 18, 2010

EXHIBIT 4

Page 9 of 14

2.5 Knowledge Sharing

- a. submitting scholarly articles authored or co-authored by the Plan or Controlled Affiliate or its respective employees for publication in peer-reviewed journals;
- b. permitting an internal representative of the Plan or Controlled Affiliate (e.g., officer, employee) to speak or present at a conference or symposium for which the event sponsor will issue communications that will identify the Plan's or Controlled Affiliate's representative as a participant, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;

2.6 Other Uses

- a. entering into a license agreement between and among BCBSA, the Plan and a debit card issuer located outside the Plan's Service Area, and entering into a corresponding operating agreement or agreements, in order to offer a debit card bearing the Licensed Marks and Name to eligible persons as defined by the aforementioned license agreement;
- b. appearing in communications issued by an independent third party to recognize outstanding performance of the Plan or Controlled Affiliate or a member of the Plan's or Controlled Affiliate's senior management as part of an established program of the third party for which the Plan has provided information to be considered for the recognition, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;
- c. to identify itself as being a joint sponsor of an event, program or activity along with other Plans or such Plans' licensed Controlled Affiliates, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;
- d. hosting meetings or events in Washington, D.C. related to policy and business issues in the Plan's Service Area, or hosting events in conjunction with the assemblies or conventions of national political parties, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;

Amended as of June 19, 2014

EXHIBIT 4

Page 10 of 14

- e. permitting an affiliate that is not licensed to use the Licensed Marks to identify its corporate relationship with the Plan, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time.
3. In connection with activity otherwise in furtherance of the License Agreement, a Controlled Affiliate that is licensed to use the Licensed Marks and Name pursuant to a Controlled Affiliate License Agreement authorized in clauses d) or e) of Paragraph 2 of the Plan's License Agreement with BCBSA may use the Licensed Marks and Name outside the Region (as that term is defined in such respective Controlled Affiliate License Agreements) in the following circumstances which are deemed legitimate and necessary and not likely to cause consumer confusion:
- a. sending letterhead, envelopes, and similar items solely for administrative purposes (e.g., not for purposes of marketing, advertising, promoting, selling or soliciting the sale of health care plans and related services);
 - b. distributing business cards other than in marketing and selling;
 - c. contracting with health care providers or soliciting such contracts in areas contiguous to the Region in order to serve its subscribers residing in the Region, provided that the Controlled Affiliate may not use the names of any of its Controlling Plans in connection with such contracting unless the provider is located in a geographic area that is also contiguous to such Controlling Plan's Service Area;
 - d. issuing a small sign containing the legal name or trade name of the Controlled Affiliate for display by a provider to identify the latter as a participating provider of the Controlled Affiliate, provided that the Controlled Affiliate may not use the names of any of its Controlling Plans on such signs unless the provider is located in a geographic area that is also contiguous to such Controlling Plan's Service Area;
 - e. advertising in publications or electronic media solely to persons for employment;

Amended as of June 19, 2014

EXHIBIT 4

Page 11 of 14

f. advertising in print, electronic or other media which serve, as a substantial market, the Region, provided that the Controlled Affiliate may not advertise outside its Region on the national broadcast and cable networks and that advertisements in national print media are limited to the smallest regional edition encompassing the Region, and provided further that any such advertising by the Controlled Affiliate may not reference the name of any of its Controlling Plans unless the respective Controlling Plan is authorized under paragraph 2 of this Exhibit 4 to advertise in such media;

g. advertising by direct mail where the addressee's zip code plus 4 includes, at least in part, the Region, provided that such advertising by the Controlled Affiliate may not reference the name of any of its Controlling Plans unless the respective Controlling Plan is authorized under paragraph 2 of this Exhibit 4 to send direct mail to such zip code plus 4.

h. [Intentionally left blank, pending review by the Inter-Plan Programs Committee of the applicability of the case management rule to such Controlled Affiliates.]

i. contracting with a pharmacy management organization ("Pharmacy Intermediary") to gain access to a national or regional pharmacy network to provide self-administered prescription drugs to deliver a pharmacy benefit for the Controlled Affiliate's regional Medicare Advantage PPO or regional Medicare Part D Prescription Drug members enrolled under the Licensed Marks pursuant to such respective Controlled Affiliate License Agreements, provided, however, that the Pharmacy Intermediary may not use the Licensed Marks or Name in contracting with the pharmacy providers in such network;

j. contracting with the corporate owner of a national or regional retail pharmacy chain to gain access to the pharmacies in the chain to provide self-administered prescription drugs to deliver a pharmacy benefit to the Controlled Affiliate's regional Medicare Advantage PPO or regional Medicare Part D Prescription Drug members enrolled under the Licensed Marks pursuant to such respective

EXHIBIT 4

Page 12 of 14

Controlled Affiliate License Agreements, provided that (1) the Controlled Affiliate may not contract directly with pharmacists or pharmacy stores outside the Region, and (2) neither the Controlled Affiliate's name nor the Licensed Marks or Name may be posted or otherwise displayed at or by any pharmacy store outside the Region;

k. contracting with a dental management organization ("Dental Intermediary") to gain access to a national or regional dental network to deliver a routine dental benefit for the Controlled Affiliate's regional Medicare Advantage PPO members enrolled under the Licensed Marks pursuant to such Controlled Affiliate License Agreement, provided, however, that the Dental Intermediary may not use the Licensed Marks or Name in contracting with the dental providers in such network;

l. contracting with a vision management organization ("Vision Intermediary") to gain access to a national or regional vision network to deliver a routine vision benefit for the Controlled Affiliate's regional Medicare Advantage members enrolled under the Licensed Marks pursuant to such Controlled Affiliate License Agreement, provided, however, that the Vision Intermediary may not use the Licensed Marks or Name in contracting with the vision providers in such network;

m. contracting with an independent clinical laboratory for analysis and clinical assessment of specimens that are collected within the Controlled Affiliate's Region;

n. contracting with a durable medical equipment or home medical equipment company for durable medical equipment and supplies and home medical equipment and supplies that are shipped to a location within the Controlled Affiliate's Region;

o. contracting with a specialty pharmaceutical company for non-routine biological therapeutics that are ordered by a health care professional located within the Region;

EXHIBIT 4

Page 13 of 14

- p. contracting with a company that operates provider sites in the Region, provided that the contract is solely for services rendered at a site (e.g., hospital, mobile van) that is within the Region;
 - q. contracting with a company that makes health care professionals available in the Region (e.g., traveling home health nurse), provided that the contract is solely for services rendered by health care professionals who are located within the Region.
4. BCBSA shall retain the right to use the Licensed Marks in conjunction with the Federal Employee Program and with any other national offering made to federal employees pursuant to the Federal Employees Health Benefits Program (FEHBP), including the right to license such use to its vendors, but only in the following manner.
- a. the Licensed Marks may only be used by BCBSA with the term "Federal Employee Program", "Federal", "FEP", or similar language identifying the program as a benefit program for federal employees;
 - b. the Licensed Marks may not be used by BCBSA with the name(s) of a specific Plan or Plans and;
 - c. any use by BCBSA in conjunction with a new national FEHBP program proposed after the enactment of this amendment will require the approval of the BCBSA Board of Directors.

Amended as of March 16, 2006

EXHIBIT 4

Page 14 of 14

5. Where required by applicable state or local law or regulation, a Plan or its licensed Controlled Affiliate may submit documents that contain the Brands to, and file forms that contain the Brands with, state or local regulators in a state not included in its Service Area, provided that it gives reasonable advance notice to the local Plan of its intent to submit such documents or file such forms. Notwithstanding, in no event may a Plan or its licensed Controlled Affiliate use the Brands to register, or to obtain or maintain a license, a certificate of authority, or an equivalent document authorizing it to act as a risk-bearing entity or third party administrator in a state not included in its Service Area. If the local Plan advises BCBSA that it believes its License Agreement has been or would be violated by any submission or filing, BCBSA shall determine whether such submission or filing is required by state or local law or regulation and violates the License Agreement, subject to the Plan's or licensed Controlled Affiliate's rights to obtain an independent review of such determination under Paragraph 9(a) and Exhibit 5 of its License Agreement or Paragraph 8 of the Controlled Affiliate License. For purposes of this paragraph, "local Plan" is defined as each Plan whose Service Area includes all or part of the state in which the foregoing applicable state or local law or regulation has been enacted.

Amended as of November 18, 2010

EXHIBIT 5

Page 1 of 23

MEDIATION AND MANDATORY DISPUTE RESOLUTION (MMDR) RULES

The Blue Cross and Blue Shield Plans ("Plans") and the Blue Cross Blue Shield Association ("BCBSA") recognize and acknowledge that the Blue Cross and Blue Shield system is a unique nonprofit and for-profit system offering cost effective health care financing and services. The Plans and BCBSA desire to utilize Mediation and Mandatory Dispute Resolution ("MMDR") to avoid expensive and time-consuming litigation that may otherwise occur in the federal and state judicial systems. Even MMDR should be viewed, however, as methods of last resort, all other procedures for dispute resolution having failed. Except as otherwise provided in the License Agreements, the Plans, their Controlled Affiliates and BCBSA agree to submit all disputes to MMDR pursuant to these Rules and in lieu of litigation.

1. Initiation of Proceedings

A. Pre-MMDR Efforts

Before filing a Complaint to invoke the MMDR process, the CEO of a complaining party, or his/her designated representative, shall undertake good faith efforts with the other side(s) to try to resolve any dispute.

B. Complaint

To commence a proceeding, the complaining party (or parties) shall provide by certified mail, return receipt requested, a written Complaint to the BCBSA Corporate Secretary (which shall also constitute service on BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) named therein. The Complaint shall contain:

- i. identification of the complaining party (or parties) requesting the proceeding;
- ii. identification of the respondent(s);
- iii. identification of any other persons or entities who are interested in a resolution of the dispute;
- iv. a full statement describing the nature of the dispute;
- v. identification of all of the issues that are being submitted for resolution;

Amended as of November 21, 1996

EXHIBIT 5

Page 2 of 23

- vi. the remedy sought;
- vii. a statement as to whether the complaining party (or parties) elect(s) first to pursue Mediation;
- viii. any request, if applicable, that the matter be handled on an expedited basis and the reasons therefor; and
- ix. a statement signed by the CEO of the complaining party affirming that the CEO has undertaken efforts, or has directed efforts to be undertaken, to resolve the dispute before resorting to the MMDR process.

The complaining party (or parties) shall file and serve with the Complaint copies of all documents which the party (or parties) intend(s) to offer at the Arbitration Hearing and a statement identifying the witnesses the party (or parties) intend(s) to present at the Hearing, along with a summary of each witness' expected testimony.

C. Answer

Within twenty (20) days after receipt of the Complaint, each respondent shall serve on BCBSA and on the complaining party (or parties);

- i. a full Answer to the aforesaid Complaint;
- ii. a statement of any Counterclaims against the complaining party (or parties), providing with respect thereto the information specified in Paragraph 1.B., above;
- iii. a statement as to whether the respondent elects to first pursue Mediation; and
- iv. any request, if applicable, that the matter be handled on an expedited basis and the reasons therefor.

The respondent(s) shall file and serve with the Answer or by the date of the Initial Conference set forth in Paragraph 3.C., below, copies of all documents which the respondent(s) intend(s) to offer at the Arbitration Hearing and a statement identifying the witnesses the party (or parties) intend(s) to present at the Hearing, along with a summary of each witness' expected testimony.

Amended as of September 20, 2007

EXHIBIT 5

Page 3 of 23

D. Reply To Counterclaim

Within ten (10) days after receipt of any Counterclaim, the complaining party (or parties) shall serve on BCBSA and on the responding party (or parties), a Reply to the Counterclaim. Such Reply must provide the same information required by Paragraph 1.C., above.

2. Mediation

To facilitate the mediation of disputes between or among BCBSA, the Plans and/or their Controlled Affiliates, the BCBSA Board has provided for Mediation under these Rules. Mediation may be pursued in lieu of or in an effort to obviate the Mandatory Dispute Resolution process, and all parties are strongly urged, but not required, to exhaust the mediation procedure provided for herein. In the event any party refuses to proceed with Mediation, the parties shall proceed immediately to Mandatory Dispute Resolution, as provided in Section 3.

A. Selection of Mediators

If all parties agree to pursue Mediation, they shall promptly attempt to agree upon: (i) the number of mediators desired, not to exceed three mediators; and (ii) the selection of experienced mediator(s) from an independent entity to mediate all disputes set forth in the Complaint and Answer (and Counterclaim and Reply, if any). In the event the parties are unable to agree upon the selection or number of mediators, both within five (5) days of the service of the Answer or Reply to Counterclaim, whichever is later, the BCBSA Corporate Secretary shall immediately refer the matter to a nationally recognized professional ADR organization (such as CPR or JAMS) for mediation by a single mediator to be selected by the ADR organization.

B. Binding Decision

Before the Mediation Hearing described below, the BCBSA Corporate Secretary shall contact the parties to determine whether they wish to be bound by any recommendation of the selected mediator(s) for resolution of the disputes. If all wish to be bound, the Corporate Secretary will send appropriate documentation to them for their signatures before the Mediation Hearing begins.

Amended as of September 20, 2007

EXHIBIT 5

Page 4 of 23

C. Mediation Procedure

The Mediator(s) shall apply the mediation procedures and processes provided for herein (not the rules of the ADR organization with which they are affiliated) and shall promptly advise the parties of a scheduled Mediation Hearing date. Unless a party requests an expedited procedure, or unless all parties to the proceeding agree to one or more extensions of time, the Mediation Hearing set forth below shall be completed within forty (40) days of BCBSA's receipt of the Complaint. The selected mediator(s), unless the parties otherwise agree, shall adhere to the following procedure:

- i. Each party must be represented by its CEO or other representative who has been delegated full authority to resolve the dispute. However, parties may send additional representatives as they see fit.
- ii. Each party will be given one-half hour to present its case, beginning with the complaining party (or parties), followed by the other party or parties. The parties are free to structure their presentations as they see fit, using oral statements or direct examination of witnesses. However, neither cross-examination nor questioning of opposing representatives will be permitted. At the close of each presentation, the selected mediator(s) will be given an opportunity to ask questions of the presenters and witnesses. All parties must be present throughout the Mediation Hearing. The selected mediator(s) may extend the time allowed for each party's presentation at the Mediation Hearing. The selected mediator(s) may meet in executive session, outside the presence of the parties, or may meet with the parties separately, to discuss the controversy.
- iii. After the close of the presentations, the parties will attempt to negotiate a settlement of the dispute. If the parties desire, the selected mediator(s), or any one or more of the selected mediators, will sit in on the negotiations.

Amended as of September 20, 2007

EXHIBIT 5

Page 5 of 23

- iv. After the close of the presentations, the selected mediator(s) may meet privately to agree upon a recommendation for resolution of the dispute which would be submitted to the parties for their consideration and approval. If the parties have previously agreed to be bound by the results of this procedure, this recommendation shall be binding upon the parties.
- v. The purpose of the Mediation Hearing is to assist the parties to settle their grievances short of mandatory dispute resolution. As a result, the Mediation Hearing has been designed to be as informal as possible. Rules of evidence shall not apply. There will be no transcript of the proceedings, and no party may make a tape recording of the Mediation Hearing.
- vi. In order to facilitate a free and open discussion, the Mediation proceeding shall remain confidential. A "Stipulation to Confidentiality" which prohibits future use of settlement offers, all position papers or other statements furnished to the selected mediator(s), and decisions or recommendations in any Mediation proceeding shall be executed by each party.
- vii. Upon request of the selected mediator(s), or one of the parties, BCBSA staff may also submit documentation at any time during the proceedings.

D. Notice of Termination of Mediation

If the Mediation cannot be completed within the prescribed or agreed time period due to the lack of cooperation of any party, as determined by the selected mediator(s), or if the Mediation does not result in a final resolution of all disputes at the Mediation Hearing or within ten (10) days after the Mediation Hearing, any party or any one of the selected mediators shall so notify the BCBSA Corporate Secretary, who shall promptly issue a Notice of Termination of Mediation to all parties, to the selected mediator(s), and to the MDR Administrator. Such notice shall serve to bring the Mediation to an end and to initiate Mandatory Dispute Resolution. Upon agreement of all parties and the mediator(s), the Mediation process may continue at the same time the MDR process is invoked. In such case, the Notice of Termination of Mediation described above serves to initiate the MDR proceeding, but does not terminate mediation proceedings, which may proceed simultaneous with the MDR proceeding.

Amended as of September 20, 2007

EXHIBIT 5

Page 6 of 23

3. Mandatory Dispute Resolution (MDR)

If any party elects not to first pursue Mediation, or if a Notice of Termination of Mediation is issued as set forth in Paragraph 2.D., above, then the unresolved disputes set forth in any Complaint and Answer (and Counterclaim and Reply, if any) shall be subject to mandatory binding arbitration (herein referred to as "MDR").

A. MDR Administrator

The Administrator for purposes of Mandatory Arbitration shall be an independent nationally recognized entity such as CPR or JAMS, specializing in alternative dispute resolution. In the event the parties pursued Mediation with CPR, JAMS or a similar organization, that organization also shall serve as the MDR Administrator, unless all parties notify the BCBSA Corporate Secretary in writing within two (2) days of receiving the Notice of Termination of Mediation that they wish to pursue MDR with another nationally recognized organization serving as MDR Administrator.

In the event the parties (i) did not pursue Mediation, (ii) pursued mediation with a Mediator not affiliated with an ADR organization that offers a panel of arbitrators, or (iii) all parties that pursued Mediation notified the BCBSA Corporate Secretary that they wish to have an MDR Administrator that is different from the organization with which their mediator was affiliated, they shall promptly attempt to agree on a nationally recognized ADR entity that supplies a panel of arbitrators. If they reach such agreement within five (5) days of the Notice of Termination of Mediation or receipt of the Answer or Reply to Counterclaim (whichever is later), the parties shall promptly inform the BCBSA Corporate Secretary of their agreed upon ADR organization. In the event the parties are unable to reach agreement on an MDR Administrator within that timeframe, the BCBSA Corporate Secretary shall immediately refer the matter to CPR, JAMS or a similar organization for MDR.

Any person who served as a Mediator shall not serve as an arbitrator for the same or similar dispute for purposes of MDR.

B. Rules for MDR

The rules controlling all aspects of MDR shall be exclusively those provided for herein. The rules promulgated or otherwise used by the MDR Administrator organization shall not apply.

Amended as of September 20, 2007

EXHIBIT 5

Page 7 of 23

C. Initial Conference

Within seven (7) days after a Notice of Termination has issued or the matter has otherwise been referred to an MDR Administrator, or within five (5) days after the time for filing and serving the Answer or Reply to any Counterclaim (whichever is later) if the parties elect first not to mediate, the parties shall confer with the Administrator to discuss selecting a dispute resolution panel ("the Panel"). This conference (the "Initial Conference") may be by telephone. The parties are encouraged to agree to the composition of the Panel and to present that agreement to the Administrator at the Initial Conference. If the parties do not agree on the composition of the Panel by the time of the Initial Conference, or by any extension thereof agreed to by all parties and the Administrator, then the Panel Selection Process set forth in subparagraph D, below, shall be followed.

D. Panel Selection Process

The Administrator shall designate, prior to the Initial Conference, at least seven potential arbitrators. Each party shall be permitted to strike any designee for cause and the Administrator shall determine the sufficiency thereof in its sole discretion. The Administrator will designate a replacement for any designee so stricken. Each party shall then be permitted one peremptory strike from the list of designees. The Administrator shall set the dates for exercising all strikes, which shall be set to encourage the prompt selection of arbitrators.

After the parties exercise any designee strikes for cause and their peremptory strike against any designee of their choice, the parties shall each rank the remaining panel members in order of preference and provide the Administrator, without serving on any other party, their ranked list. The Administrator shall not disclose any party's ranked list to members of the panel or to other parties.

From the remaining designees, and after considering opportunities to maximize, so far as possible, the collectively stated arbitrator preferences provided by the parties on their ranked lists, the Administrator shall select a three member Panel. The Panel Selection Process shall be completed no later than ten (10) days after the Initial Conference.

Each Arbitrator shall be compensated at his or her normal hourly rate or, in the absence of an established rate, at a reasonable hourly rate to be promptly fixed by the Administrator for all time spent in connection with the proceedings and shall be reimbursed for any travel and other reasonable expenses.

Amended as of September 20, 2007

EXHIBIT 5

Page 8 of 23

E. Duties Of The Arbitrators

The Panel shall promptly designate a Presiding Arbitrator for the purposes reflected below, but shall retain the power to review and modify any ruling or other action of said Presiding Arbitrator. Each Arbitrator shall be an independent Arbitrator, shall be governed by the Code of Ethics for Arbitrators in Commercial Disputes and shall at or prior to the commencement of any Arbitration Hearing take an oath to that effect. Each Arbitrator shall promptly disclose in writing to the Panel and to the parties any circumstances, whenever arising, that might cause doubt as to such Arbitrator's compliance, or ability to comply, with said Code of Ethics, and, absent resignation by such Arbitrator, the remaining Arbitrators shall determine in their sole discretion whether the circumstances so disclosed constitute grounds for disqualification and for replacement. With respect to such circumstances arising or coming to the attention of a party after an Arbitrator's selection, a party may likewise request the Arbitrator's resignation or a determination as to disqualification by the remaining Arbitrators. With respect to a sole Arbitrator, the determination as to disqualification shall be made by the Administrator.

There shall be no ex parte communication between the parties or their counsel and any member of the Panel.

F. Panel's Jurisdiction And Authority

The Panel's jurisdiction and authority shall extend to all disputes between or among the Plans, their Controlled Affiliates, and/or BCBSA, except for those disputes excepted from these MMDR procedures as set forth in the License Agreements.

With the exception of punitive or treble damages, the Panel shall have full authority to award the relief it deems appropriate to resolve the parties' disputes, including monetary awards and injunctions, mandatory or prohibitory. The Panel has no authority to award punitive or treble damages except that the Panel may allocate or assess responsibility for punitive or treble damages assessed by another tribunal. Subject to the above limitations, the Panel may, by way of example, but not of limitation:

Amended as of September 20, 2007

EXHIBIT 5

Page 9 of 23

- i. interpret or construe the meaning of any terms, phrase or provision in any license between BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.
- ii. determine whether BCBSA, a Plan or a Controlled Affiliate has violated the terms or conditions of any license between the BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.
- iii. decide challenges as to its own jurisdiction.
- iv. issue such orders for interim relief as it deems appropriate pending Hearing and Award in any Arbitration.

It is understood that the Panel is expected to resolve issues based on governing principles of law, preserving to the maximum extent legally possible the continued integrity of the Licensed Marks and the BLUE CROSS/BLUE SHIELD system. The Panel shall apply federal law to all issues which, if asserted in the United States District Court, would give rise to federal question jurisdiction, 28 U.S.C. § 1331. The Panel shall apply Illinois law to all issues involving interpretation, performance or construction of any License Agreement or Controlled Affiliate License Agreement unless the agreement otherwise provides. As to other issues, the Panel shall choose the applicable law based on conflicts of law principles of the State of Illinois.

G. Administrative Conference

Within five (5) days of the Panel being selected, the Presiding Arbitrator shall confer with the parties and the other members of the Panel and shall schedule, in writing, a conference in which the parties and the Panel shall participate (the "Administrative Conference"). The Administrative Conference shall take place no later than fifteen (15) days after the Panel is selected. At the Administrative Conference the parties and the Panel shall discuss the scheduling of the Arbitration Hearing and any other matter appropriate to be considered, including but not limited to: any written discovery in the form of requests for production of documents or requests to admit facts; the identity of any witness whose deposition a party may desire and a showing of exceptional good cause for the taking of any such deposition; the desirability of bifurcation or other separation of the issues; the need for and the type of record of conferences and hearings, including the need for transcripts; the need for expert witnesses and

Amended as of September 20, 2007

EXHIBIT 5

Page 10 of 23

how expert testimony should be presented; the appropriateness of motions to dismiss and/or for full or partial summary judgment; consideration of stipulations; the desirability of presenting any direct testimony in writing; and the necessity for any on-site inspection by the Panel. If the parties agree, the Administrative Conference may be by telephone.

H. Discovery

- i. ***Requests for Production of Documents:*** All requests for the production of documents must be served no later than five (5) days after the date of the Initial Conference. Within twenty (20) days after receipt of a request for production of documents, a party shall (a) serve responses and objections to the request, (b) produce all responsive, non-privileged documents to the requesting party, and (c) to the extent any responsive documents are withheld on the grounds of attorney-client privilege or work product, produce a log identifying such documents in the manner specified in Fed. R. Civ. P. 26(b)(5). If, after reviewing a privilege log, the requesting party believes attorney-client privilege or work product protection was improperly claimed by the producing party with respect to any document, the requesting party may ask the Presiding Arbitrator to conduct an in-camera inspection of the same. With respect to documentary and other discovery produced in any MDR proceeding by BCBSA, the fact that a party's CEO or other senior officers may serve on the BCBSA Board of Directors, BCBSA Board Committees or other BCBSA work groups, task forces and the like, shall not be a basis for defeating an otherwise valid claim of attorney-client privilege or work product protection over such documentary or other discovery materials by BCBSA.
- ii. ***Requests for Admissions:*** Requests for Admissions may be served up to twenty-one (21) days prior to the discovery cut-off set by the Presiding Arbitrator. A party served with Requests For Admissions must respond within twenty (20) days of receipt of said request. The good faith use of and response to Requests for Admissions is encouraged, and the Panel shall have full discretion, with reference to the Federal Rules of Civil Procedure, in awarding appropriate sanctions with respect to abuse of the procedure.

Amended as of September 20, 2007

EXHIBIT 5

Page 11 of 23

- iii. **Depositions:** As a general rule, the parties will not be permitted to take party or non-party deposition testimony for discovery purposes. The Presiding Arbitrator, in his or her sole discretion, shall have the authority to permit a party to take such deposition testimony upon a showing of exceptional good cause. The parties will be permitted to take de bene esse deposition testimony to the fullest extent permitted by law of any witness who cannot be compelled to testify at the Arbitration Hearing. No deposition, for discovery purposes or otherwise, shall exceed three (3) hours, excluding objections and colloquy of counsel. Depositions may be recorded in any manner recognized by the Federal Rules of Civil Procedure and the parties shall specify in each notice of deposition or request for permission to take deposition testimony the manner in which such deposition shall be recorded.
- iv. **Expert witness(es):** If a party intends to present the testimony of an expert witness during the oral hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2) (B) ten (10) days prior to the discovery cut-off set by the Presiding Arbitrator. If a party intends to present the testimony of a rebuttal expert witness during the Arbitration Hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)(B) within twenty (20) days after the date on which the written statement of the expert witness whose testimony is to be rebutted was produced.
- v. **Discovery cut-off:** The Presiding Arbitrator shall determine the date on which the discovery period will end, but the discovery period shall not exceed thirty (30) days from the date of the Administrative Conference without the agreement of all parties.

Amended as of September 20, 2007

EXHIBIT 5

Page 12 of 23

- vi. ***Additional discovery:*** Any additional discovery will be at the discretion of the Presiding Arbitrator.
- vii. ***Discovery Disputes:*** Any discovery disputes shall be raised by motion to the Presiding Arbitrator, who is authorized to resolve all such disputes, and whose resolution will be binding on the parties unless modified by the Arbitration Panel. Prior to raising any discovery dispute with the Presiding Arbitrator, the parties shall meet and confer, telephonically or in person, in an attempt to resolve or narrow the dispute. If a party refuses to comply with a decision resolving a discovery dispute, the Panel, in keeping with Fed. R. Civ. P. 37, may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for resolution adversely to that party.
- viii. ***Extensions:*** The time for responding to discovery requests may be extended by the Presiding Arbitrator for good and sufficient cause shown. Any request for such an extension shall be made in writing.

I. Panel Suggested Settlement/Mediation

At any point during the proceedings, the Panel at the request of any party or on its own initiative, may suggest that the parties explore settlement and that they do so at or before the conclusion of the Arbitration Hearing, and the Panel shall give such assistance in settlement negotiations as the parties may request and the Panel may deem appropriate. Alternatively, the Panel may direct the parties to endeavor to mediate their disputes as provided above, or to explore a mini-trial proceeding, or to have an independent party render a neutral evaluation of the parties' respective positions. The Panel shall enter such sanctions as it deems appropriate with respect to any party failing to pursue in good faith such Mediation or other alternate dispute resolution methods.

Amended as of September 20, 2007

EXHIBIT 5

Page 13 of 23

J. Subpoenas on Third Parties

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq.*, and subject to Paragraph 3.G(iii) above, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan or any officer, employee or director of a third party Blue Plan, to compel deposition testimony or the production of documents, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena.

K. Arbitration Hearing

An Arbitration Hearing will be held within thirty (30) days after the Administrative Conference if no discovery is taken, or within thirty (30) days after the close of discovery, unless all parties and the Panel agree to extend the Arbitration Hearing date, or unless the parties agree in writing to waive the Arbitration Hearing. The parties may mutually agree on the location of the Arbitration Hearing. If the parties fail to agree, the Arbitration Hearing shall be held in Chicago, Illinois, or at such other location determined by the Presiding Arbitrator to be most convenient to the participants. The Panel will determine the date(s) and time(s) of the Arbitration Hearing(s) after consultation with all parties and shall provide reasonable notice thereof to all parties or their representatives.

L. Arbitration Hearing Memoranda

Twenty (20) days prior to the Arbitration Hearing, each party shall submit to the other party (or parties) and to the Panel an Arbitration Hearing Memorandum which sets forth the applicable law and any argument as to any relevant issue. The Arbitration Hearing Memorandum will supplement, and not repeat, the allegations, information and documents contained in or with the Complaint, Answer, Counterclaim and Reply, if any. Ten (10) days prior to the Arbitration Hearing, each party shall submit to each other party a list of all expert and fact witnesses (but not including rebuttal fact witness) that such party intends to have testify at the Arbitration Hearing and a brief summary of the testimony each such witness is expected to give. In addition, no later than five (5) days prior to the Arbitration, each party may submit to each other party and to the Panel a Response Arbitration Hearing Memorandum which sets forth any response to another party's Arbitration Hearing Memorandum.

Amended as of September 20, 2007

EXHIBIT 5

Page 14 of 23

M. Notice For Testimony

Ten (10) days prior to the Arbitration Hearing, any party may serve a Notice on any other party (or parties) requesting the attendance at the Arbitration Hearing of any officer, employee or director of the other party (or parties) for the purpose of providing noncumulative testimony. If a party fails to produce one of its officers, employees or directors whose noncumulative testimony during the Arbitration Hearing is reasonably requested by an adverse party, the Panel may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for mandatory dispute resolution adversely to that party; provided, however, that a party may refuse to produce a director to testify if, within two (2) days of receiving a notice requesting the attendance of such director at the Arbitration Hearing, the party agrees to make the director available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. This Rule may not be used for the purpose of burdening or harassing any party, and the Presiding Arbitrator may impose such orders as are appropriate so as to prevent or remedy any such burden or harassment.

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq.*, twenty (20) days or more prior to the Arbitration Hearing, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan, BCBSA or any officer, employee or director of a third party Blue Plan or BCBSA for the purpose of providing noncumulative testimony at the Arbitration Hearing, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena; provided however, that a director of a third party Blue Plan or BCBSA may refuse to testify if, within two (2) days of receiving a subpoena requesting the attendance of such director at the Arbitration Hearing, the director agrees to make him/herself available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. Each Blue Plan agrees to waive, on its own behalf and on behalf of its directors and officers, any objection it otherwise might have to any such subpoena based on service, venue or extraterritoriality.

Amended as of September 20, 2007

EXHIBIT 5

Page 15 of 23

N. Arbitration Hearing Procedures

- i. **Attendance at Arbitration Hearing:** Any person having a direct interest in the proceeding is entitled to attend the Arbitration Hearing. The Presiding Arbitrator shall otherwise have the power to require the exclusion of any witness, other than a party or other essential person, during the testimony of any other witness. It shall be discretionary with the Presiding Arbitrator to determine the propriety of the attendance of any other person.
- ii. **Confidentiality:** The Panel and all parties shall maintain the privacy of the Arbitration Proceeding. The parties and the Panel shall treat the Arbitration Hearing and any discovery or other proceedings or events related thereto, including any award resulting therefrom, as confidential except as otherwise necessary in connection with a judicial challenge to or enforcement of an award or unless otherwise required by law.
- iii. **Stenographic Record:** Any party, or if the parties do not object, the Panel, may request that a stenographic or other record be made of any Arbitration Hearing or portion thereof. The costs of the recording and/or of preparing the transcript shall be borne by the requesting party and by any party who receives a copy thereof. If the Panel requests a recording and/or a transcript, the costs thereof shall be borne equally by the parties.
- iv. **Oaths:** The Panel may require witnesses to testify under oath or affirmation administered by any duly qualified person and, if requested by any party, shall do so.
- v. **Order of Arbitration Hearing:** An Arbitration Hearing shall be opened by the recording of the date, time, and place of the Arbitration Hearing, and the presence of the Panel, the parties, and their representatives, if any. The Panel may, at the beginning of the Arbitration Hearing, ask for statements clarifying the issues involved.

Amended as of September 20, 2007

EXHIBIT 5

Page 16 of 23

Unless otherwise agreed, the complaining party (or parties) shall then present evidence to support their claim(s). The respondent(s) shall then present evidence supporting their defenses and Counterclaims, if any. The complaining party (or parties) shall then present evidence supporting defenses to the Counterclaims, if any, and rebuttal.

Witnesses for each party shall submit to questions by adverse parties and/or the Panel.

The Panel has the discretion to vary these procedures, but shall afford a full and equal opportunity to all parties for the presentation of any material and relevant evidence.

- vi. **Evidence:** The parties may offer such evidence as is relevant and material to the dispute and shall produce such evidence as the Panel may deem necessary to an understanding and resolution of the dispute. Unless good cause is shown, as determined by the Panel or agreed to by all other parties, no party shall be permitted to offer evidence at the Arbitration Hearing which was not disclosed prior to the Arbitration Hearing by that party. The Panel may receive and consider the evidence of witnesses by affidavit upon such terms as the Panel deems appropriate.

The Panel shall be the judge of the relevance and materiality of the evidence offered, and conformity to legal rules of evidence, other than enforcement of the attorney-client privilege and the work product protection, shall not be necessary. The Federal Rules of Evidence shall be considered by the Panel in conducting the Arbitration Hearing but those rules shall not be controlling. All evidence shall be taken in the presence of the Panel and all of the parties, except where any party is in default or has waived the right to be present.

Settlement offers by any party in connection with Mediation or MDR proceedings, decisions or recommendations of the selected mediators, and a party's position papers or statements furnished to the selected mediators shall not be admissible evidence or considered by the Panel without the consent of all parties.

EXHIBIT 5

Page 17 of 23

vii. **Closing of Arbitration Hearing:** The Presiding Arbitrator shall specifically inquire of all parties whether they have any further proofs to offer or witnesses to be heard. Upon receiving negative replies or if he or she is satisfied that the record is complete, the Presiding Arbitrator shall declare the Arbitration Hearing closed with an appropriate notation made on the record. Subject to being reopened as provided below, the time within which the Panel is required to make the award shall commence to run, in the absence of contrary agreement by the parties, upon the closing of the Arbitration Hearing.

With respect to complex disputes, the Panel may, in its sole discretion, defer the closing of the Arbitration Hearing for a period of up to thirty (30) days after the presentation of proofs in order to permit the parties to submit post-hearing briefs and argument, as the Panel deems appropriate, prior to making an award.

For good cause, the Arbitration Hearing may be reopened for up to thirty (30) days on the Panel's initiative, or upon application of a party, at any time before the award is made

O. Awards

An Award must be in writing and shall be made promptly by the Panel and, unless otherwise agreed by the parties or specified by law, no later than thirty (30) days from the date of closing the Arbitration Hearing. If all parties so request, the Award shall contain findings of fact and conclusions of law. The Award, and all other rulings and determinations by the Panel, may be by a majority vote.

Parties shall accept as legal delivery of the Award the placing of the Award or a true copy thereof in the mail addressed to a party or its representative at its last known address or personal service of the Award on a party or its representative.

Awards are binding only on the parties to the Arbitration and are not binding on any non-parties to the Arbitration and may not be used or cited as precedent in any other proceeding.

Amended as of September 20, 2007

EXHIBIT 5

Page 18 of 23

After the expiration of twenty (20) days from initial delivery, the Award (with corrections, if any) shall be final and binding on the parties, and the parties shall undertake to carry out the Award without delay.

Proceedings to confirm, modify or vacate an Award shall be conducted in conformity with and controlled by the Federal Arbitration Act. 9 U.S.C. § 1, *et seq.*

P. Return of Documents

Within sixty (60) days after the Award and the conclusion of any judicial proceedings with respect thereto, each party and the Panel shall return any documents produced by any other party, including all copies thereof. If a party receives a discovery request in any other proceeding which would require it to produce any documents produced to it by any other party in a proceeding hereunder, it shall not produce such documents without first notifying the producing party and giving said party reasonable time to respond, if appropriate, to the discovery request.

4. Miscellaneous

A. Expedited Procedures

Any party to a Mediation may direct a request for an expedited Mediation Hearing to the Chairman of the Mediation Committee, to the selected Mediators, and to all other parties at any time. The Chairman of the Mediation Committee, or at his or her direction, the then selected Mediators, shall grant any request which is supported by good and sufficient reasons. If such a request is granted, the Mediation shall be completed within as short a period as practicable, as determined by the Chairman of the Mediation Committee or, at his or her direction, the then selected Mediators.

Any party to an Arbitration may direct a request for expedited proceedings to the Administrator, to the Panel, and to all other parties at any time. The Administrator, or the Presiding Arbitrator if the Panel has been selected, shall grant any such request which is supported by good and sufficient reasons. If such a request is granted, the Arbitration shall be completed within as short a time as practicable, as determined by the Administrator and/or the Presiding Arbitrator.

Amended as of September 20, 2007

EXHIBIT 5

Page 19 of 23

B. Temporary or Preliminary Injunctive Relief

Any party may seek temporary or preliminary injunctive relief with the filing of a Complaint or at any time thereafter. If such relief is sought prior to the time that an Arbitration Panel has been selected, then the Administrator shall select a single Arbitrator who is a lawyer who has no interest in the subject matter of the dispute, and no connection to any of the parties, to hear and determine the request for temporary or preliminary injunction. If such relief is sought after the time that an Arbitration Panel has been selected, then the Arbitration Panel will hear and determine the request. The request for temporary or preliminary injunctive relief will be determined with reference to the temporary or preliminary injunction standards set forth in Fed. R. Civ. P. 65.

C. Defaults and Proceedings in the Absence of a Party

Whenever a party fails to comply with the MDR Rules in a manner deemed material by the Panel, the Panel shall fix a reasonable time for compliance and, if the party does not comply within said period, the Panel may enter an Order of default or afford such other relief as it deems appropriate. Arbitration may proceed in the event of a default or in the absence of any party who, after due notice, fails to be present or fails to obtain an extension. An Award shall not be made solely on the default or absence of a party, but the Panel shall require the party who is present to submit such evidence as the Panel may require for the making of findings, determinations, conclusions, and Awards.

D. Notice

Each party shall be deemed to have consented that any papers, notices, or process necessary or proper for the initiation or continuation of a proceeding under these rules or for any court action in connection therewith may be served on a party by mail addressed to the party or its representative at its last known address or by personal service, in or outside the state where the MDR proceeding is to be held.

The Corporate Secretary and the parties may also use facsimile transmission, telex, telegram, or other written forms of electronic communication to give the notices required by these rules.

EXHIBIT 5

Page 20 of 23

E. Expenses

The expenses of witnesses shall be paid by the party causing or requesting the appearance of such witnesses. All expenses of the MDR proceeding, including compensation, required travel and other reasonable expenses of the Panel, and the cost of any proof produced at the direct request of the Panel, shall be borne equally by the parties and shall be paid periodically on a timely basis, unless they agree otherwise or unless the Panel in the Award assesses such expenses, or any part thereof against any party (or parties). In exceptional cases, the Panel may award reasonable attorneys' fees as an item of expense, and the Panel shall promptly determine the amount of such fees based on affidavits or such other proofs as the Panel deems sufficient.

F. Disqualification or Disability of A Panel Member

In the event that any Arbitrator of a Panel with more than one Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the remaining Panel member(s):

- i. shall designate a replacement, subject to the right of any party to challenge such replacement for cause.
- ii. shall decide the extent to which previously held hearings shall be repeated.

If the remaining Panel members consider the proceedings to have progressed to a stage as to make replacement impracticable, the parties may agree, as an alternative to the recommencement of the Mandatory Dispute Resolution process, to resolution of the dispute by the remaining Panel members.

In the event that a single Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the Administrator shall appoint a successor, subject to the right of any party to challenge such successor for cause, and the successor shall decide the extent to which previously held proceedings shall be repeated.

EXHIBIT 5

Page 21 of 23

G. Extensions of Time

Subject to the provisions of Paragraph 3.H.(viii.), any time limit set forth in these Rules may be extended upon agreement of the parties and approval of: (1) the Mediator if the proceeding is then in Mediation; (2) the Administrator if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (3) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected.

H. Intervention

The Plans, their Controlled Affiliates, and BCBSA, to the extent subject to MMDR pursuant to their License Agreements, shall have the right to move to intervene in any pending Arbitration. A written motion for intervention shall be made to: (1) the Administrator, if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (2) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected. The written motion for intervention shall be delivered to the BCBSA Corporate Secretary (which shall also constitute service on the BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) which are parties to the proceeding. Any party to the proceeding can submit written objections to the motion to intervene. The motion for intervention shall be granted upon good cause shown. Intervention also may be allowed by stipulation of the parties to the Arbitration proceeding. Intervention shall be allowed upon such terms as the Arbitration Panel decides.

I. BCBSA Assistance in Resolution of Disputes

The resources and personnel of the BCBSA may be requested by any member Plan at any time to try to resolve disputes with another Plan.

J. Neutral Evaluation

The parties can voluntarily agree at any time to have an independent party render a neutral evaluation of the parties' respective positions.

Amended as of September 20, 2007

EXHIBIT 5

Page 22 of 23

K. Recovery of Attorney Fees and Expenses

i. Motions to Compel

Notwithstanding any other provisions of these Rules, any Party subject to the License Agreements (for purposes of this Section K and all of its sub-sections only hereinafter referred to collectively and individually as a "Party") that initiates a court action or administrative proceeding solely to compel adherence to these Rules shall not be determined to have violated these Rules by initiating such action or proceeding.

ii. Recovery of Fees, Expenses and Costs

The Arbitration Panel may, in its sole discretion, award a Party its reasonable attorneys' fees, expenses and costs associated with a filing to compel adherence to these Rules and/or reasonable attorneys' fees, expenses and costs incurred in responding to an action filed in violation of these Rules; provided, however, that neither fees, expenses, nor costs shall be awarded by the Arbitration Panel if the Party from which the award is sought can demonstrate to the Arbitration panel, in its sole discretion, that it did not violate these Rules or that it had reasonable grounds for believing that its action did not violate these Rules.

iii. Requests for Reimbursement

For purposes of this Section K, any Party may request reimbursement of fees, expenses and/or costs by submitting said request in writing to the Arbitration Panel at any time before an award is delivered pursuant Paragraph to 3.O above with a copy to the Party from which reimbursement is sought, explaining why it is entitled to such reimbursement. The Party from which reimbursement is sought shall have twenty (20) days to submit a response to such request to the Arbitration Panel with a copy to the Party seeking reimbursement.

Amended as of September 20, 2007

EXHIBIT 5

Page 23 of 23

L. Calculation of Time and Deadlines

In computing any period of time prescribed or allowed under these rules, the day of the act or event from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, in which event the period runs until the end of the next day which is not one of the aforementioned days. When the period of time prescribed is less than six (6) days, intermediate Saturdays, Sundays and legal holidays shall be excluded in the computation. As used in this rule, "legal holiday" includes New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day and any other day appointed as a holiday by the President or the Congress of the United States.

Amended as of September 20, 2007

Exhibit 10.14

BLUE SHIELD LICENSE AGREEMENT

(Includes revisions, if any, adopted by Member Plans through their November 21, 2014 meeting)

This agreement by and between Blue Cross and Blue Shield Association ("BCBSA") and The Blue Shield Plan, known as _____ (the "Plan").

Preamble

WHEREAS, the Plan and/or its predecessor(s) in interest (collectively the "Plan") had the right to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") for health care plans in its service area, which was essentially local in nature;

WHEREAS, the Plan was desirous of assuring nationwide protection of the Licensed Marks, maintaining uniform quality controls among Plans, facilitating the provision of cost effective health care services to the public and otherwise benefiting the public;

WHEREAS, to better attain such ends, the Plan and the predecessor of BCBSA executed the Agreement(s) Relating to the Collective Service Mark "Blue Shield"; and

WHEREAS, BCBSA and the Plan desire to supercede said Agreement(s) to reflect their current practices and to assure the continued integrity of the Licensed Marks and of the BLUE SHIELD system;

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

Agreement

1. BCBSA hereby grants to the Plan, upon the terms and conditions of this License Agreement ("Agreement" or "Primary License Agreement", the right to use BLUE SHIELD in its trade and/or corporate name (the "Licensed Name"), and the right to use the Licensed Marks, in the sale, marketing and administration of health care plans and related services in the Service Area set forth and defined in paragraph 5 below. As used herein, health care plans and related services shall include acting as a nonprofit health care plan, a for-profit health care plan, or mutual health insurer operating on a not-for-profit or for-profit basis, under state law; financing access to health care services; when working with a bank that holds the relevant license to use the Licensed Name and Marks, offering: (i) tax-favored savings accounts for medical expenses and means for accessing such accounts, such as debit cards or checks, that are provided solely to support access to such tax-favored savings accounts, all pursuant to such license, or (ii) prepaid rewards cards that are provided for completion of a wellness program, all pursuant to such license; providing health care management and administration; administering, but not underwriting, non-health portions of Worker's Compensation insurance; delivering health care services, except hospital services (as defined in the Guidelines to Membership Standards Applicable to Regular Members); and performing the Eligibility and Enrollment functions of HR administration for all benefit plans offered by a group account to its members, including benefit plans not provided by the Plan, provided that the Plan has contracted to provide Health Coverage under the Licensed Marks to the account (as the terms "Health Coverage," "Eligibility" and "Enrollment" are defined in Exhibit 4, Paragraph 2.t.).

2. The Plan may use the Licensed Marks and Name in connection with the offering of: i) health care plans and related services in the Service Area through Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1 hereto (the "Controlled Affiliate License Agreement"); and ii) insurance coverages offered by life insurers under the applicable law in the Service Area, other than those which the Plan may offer in its own name, provided through Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1A hereto (the "Controlled Affiliate License Agreement Applicable to Life Insurance Companies") or the Agreement attached as Exhibit 1A1 hereto (the "Controlled Affiliate Trademark License Agreement for Life and Disability Insurance Products") and further provided that the offering of such services does not and will not dilute or tarnish the unique value of the Licensed Marks and Name; and iii) administration and underwriting of Workers' Compensation Insurance Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1 hereto (the "Controlled Affiliate License."); and iv) regional Medicare Advantage PPO Products in cooperation with one or more other Plans through jointly-held Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1B hereto (the "Controlled Affiliate License Agreement Applicable to Regional Medicare Advantage PPO Products"); and v) regional Medicare Part D Prescription Drug Plan products in cooperation with one or more other Plans through jointly-held Controlled Affiliates, provided that each such Controlled

Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1C hereto (the "Controlled Affiliate License Agreement Applicable to Regional Medicare Part D Prescription Drug Plan Products"). As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner that it is subject to the bona fide control of a Plan or Plans and, if the entity meets the standards of Paragraph 2a.B but not Paragraph 2a.A, the entity, its owners, and persons authority to select or appoint members or board members, other than a Plan or Plans, have received written approval of BCBSA. Absent written approval by BCBSA of an alternative method of control, bona fide control shall have the meaning set forth in Paragraphs 2a. and 2b.

Amended as of September 19, 2014

2a. With respect to the Controlled Affiliate Licenses authorized in clauses i) through iii) of Paragraph 2, bona fide control shall mean that a Plan (the "Sponsoring Plan") authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to this Primary License Agreement with BCBSA must have:

A. The legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof; (b) to exercise control over the policy and operations of the Controlled Affiliate; (c) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur. In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate; or

B. The legal authority directly or indirectly through wholly-owned subsidiaries (a) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; (c) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan. Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by the Sponsoring Plan before the Controlled Affiliate can:

1. Change its legal and/or trade name;
2. Change the geographic area in which it operates;
3. Change any of the types of businesses in which it engages;
4. Create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business;
5. Sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced;
6. Make any loans or advances except in the ordinary course of business;

Amended as of September 19, 2014

7. Enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners of the Controlled Affiliate or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate);

8. Conduct any business other than under the Licensed Marks and Name;

9. Take any action that the Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks or Names.

In addition, the Sponsoring Plan directly or indirectly through wholly owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate; or

- C. With respect to a Controlled Affiliate that is 100% controlled by Plans including the Sponsoring Plan and which offers solely Medicaid products and services, the legal authority together with such other Plans (a) to select all members of the Controlled Affiliate's governing body; (b) to prevent any change in the articles of incorporation, bylaws, or other establishing or governing documents of the Controlled Affiliate; (c) to exercise control over the policy and operations of the Controlled Affiliate. In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such 100% control and ownership by Plans shall be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute the "Addendum to Controlled Affiliate License" attached as Exhibit B to Exhibit 1 attached hereto.

2b. With respect to the Controlled Affiliate License Agreements authorized in clauses iv) and v) of Paragraph 2, bona fide control shall mean that the Controlled Affiliate is organized and operated in such a manner that it meets the following requirements:

- A. The Controlled Affiliate is owned or controlled by two or more Plans authorized to use the Licensed Marks pursuant to this License Agreement with BCBSA (for purposes of this subparagraph A. through subparagraph C., the "Controlling Plans"); and

Amended as of September 19, 2014

-2a-

- B. Each Controlling Plan is authorized pursuant to this Agreement to use the Licensed Marks in a geographic area in the Region (as that term is defined in such Controlled Affiliate License Agreements) and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and
- C. The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur; and (c) to exercise control over the policy and operations of the Controlled Affiliate. Notwithstanding anything to the contrary in (a) through (c) of this subparagraph E., the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:
1. Change its legal and/or trade names;
 2. Change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
 3. Change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
 4. Take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

-2b-

Amended as of September 19, 2014
(The next page is page 3)

3. With respect to a Controlled Affiliate that is not licensed to use the Licensed Marks and Name, the Plan may, in communications that contain the Licensed Marks or Name, indicate its corporate relationship to the Affiliate and permit such Affiliate to indicate its corporate relationship to the Plan, solely in the circumstances, style and manner specified by BCBSA from time-to-time in regulations of general application consistent with the avoidance of confusion or mistake or the dilution or tarnishment of the Licensed Marks and Name. No rights are hereby created in any Controlled Affiliate to use the Licensed Marks or Name in its own name or otherwise.

4. The Plan recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Plan further recognizes that its actions within its Service Area may affect the value of the Licensed Marks and Name nationwide. The Plan agrees (a) to maintain in good standing its membership in BCBSA; (b) promptly to pay its dues to BCBSA, said dues to represent the royalties for this License Agreement; (c) materially to comply with all applicable laws; (d) to comply with the Membership Standards Applicable to Regular Members of BCBSA, a current copy of which is attached as Exhibit 2 hereto; and (e) reasonably to permit BCBSA, upon a written, good faith request and during reasonable business hours, to inspect the Plan's books and records necessary to ascertain compliance herewith. As to other Plans and third parties, BCBSA shall maintain the confidentiality of all documents and information furnished by the Plan pursuant hereto, or pursuant to the Membership Standards, and clearly designated by the Plan as containing proprietary information of the Plan.

5. The rights hereby granted are exclusive to the Plan within the geographical area(s) served by the Plan on June 30, 1972, and/or as to which the Plan has been granted a subsequent license, which is hereby defined as the "Service Area," except that BCBSA reserves the right to use the Licensed Marks in said Service Area, and except to the extent that said Service Area may overlap areas served by one or more other licensed Blue Shield Plans as of said date or subsequent license, as to which overlapping areas the rights hereby granted are nonexclusive as to such other Plan or Plans only.

Amended as of June 19, 2014

6. Except as expressly provided by BCBSA with respect to National Accounts, Government Programs and certain other necessary and collateral uses, the current rules and regulations governing which are attached as Exhibit 3 and Exhibit 4 hereto, and are contained in other documents referenced herein, or as expressly provided herein, the Plan may not use the Licensed Marks and Name outside the Service Area or in connection with other goods and services, nor may the Plan use the Licensed Marks or Name in a manner which is intended to transfer in the Service Area the goodwill associated therewith to another mark or name. Nothing herein shall be construed to prevent the Plan from engaging in lawful activity anywhere under other marks and names not confusingly similar to the Licensed Marks and Name, provided that engaging in such activity does and will not dilute or tarnish the unique value of the Licensed Marks and Name. In addition to any and all remedies available hereunder, BCBSA may impose monetary fines on the Plan for the Plan's use of the Licensed Marks and Names outside the Service Area, and provided that the procedure used in imposing a fine is consistent with procedures specifically prescribed by BCBSA from time to time in regulations of general application. In the case of regional Medicare Advantage PPO and regional Medicare Part D Prescription Drug Plan products offered by consenting and participating Plans in a region that includes the Service Areas, or portions thereof, of more than one Plan, such fine may be imposed jointly on the consenting and participating Plans for use of the Licensed Marks and Name in any geographic area of the region in which a Plan having exclusive rights to the Licensed Marks and Name does not consent to and participate in such offering, provided that the basis for imposition of such fine is consistent with rules specifically prescribed by BCBSA from time to time in regulations of general application.

7. The Plan agrees that it will display the Licensed Marks and Name only in such form, style and manner as shall be specifically prescribed by BCBSA from time-to-time in regulations of general application in order to prevent impairment of the distinctiveness of the Licensed Marks and Name and the goodwill pertaining thereto. The Plan shall cause to appear on all materials on or in connection with which the Licensed Marks or Name are used such legends, markings and notices as BCBSA may reasonably request in order to give appropriate notice of service mark or other proprietary rights therein or pertaining thereto.

8. BCBSA agrees that: (a) it will not grant any other license effective during the term of this License Agreement for the use of the Licensed Marks or Name which is inconsistent with the rights granted to the Plan hereunder; and (b) it will not itself use the Licensed Marks in derogation of the rights of the Plan or in a manner to deprive the Plan of the full benefits of this License Agreement, provided that BCBSA shall have the right to use the Licensed Marks in conjunction with any national offering under the Federal Employees Health Benefits Program in the manner set forth in Exhibit 4, Paragraph 4 (including subparagraphs) to this License Agreement. The Plan agrees that it will not attack the title of BCBSA in and to the Licensed Marks or Name or attack the validity of the Licensed Marks or of this License Agreement. The Plan further agrees that all use by it of the Licensed Marks and Name or any similar mark or name shall inure to the benefit of BCBSA, and the Plan shall cooperate with BCBSA in effectuating the assignment to BCBSA of any service mark or trademark registrations of the Licensed Marks or any similar mark or name held by the Plan or a Controlled Affiliate of the Plan, all or any portion of which registration consists of the Licensed Marks.

Amended as of November 16, 2006

-3a-

9. (a). Should the Plan fail to comply with the provisions of paragraphs 2-4, 6, 7 and/or 12, and not cure such failure within thirty (30) days of receiving written notice thereof (or commence curing such failure within such thirty day period and continue diligent efforts to complete the curing of such failure if such curing cannot reasonably be completed within such thirty day period), BCBSA shall have the right to issue a notice that the Plan is in a state of noncompliance. Except as to the termination of a Plan's License Agreement or the merger of two or more Plans, disputes as to noncompliance, and all other disputes between or among BCBSA, the Plan, other Plans and/or Controlled Affiliates, shall be submitted promptly to mediation and mandatory dispute resolution pursuant to the rules and regulations of BCBSA, a current copy of which is attached as Exhibit 5 hereto, and shall be timely presented and resolved. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. If a state of noncompliance as aforesaid is undisputed by the Plan or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the License Agreement. Except, however, as provided in paragraphs 9(d)(iii), 15(a)(i)-(viii), and 15(a)(x) below, no Plan's license to use the Licensed Marks and Name may be finally terminated for any reason without the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans.

(b). Notwithstanding any other provision of this License Agreement, a Plan's license to use the Licensed Marks and Name may be forthwith terminated by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to Member Plans for: (i) failure to comply with any minimum capital or liquidity requirement under the Membership Standard on Financial Responsibility; or (ii) impending financial insolvency; or (iii) the pendency of any action instituted against the Plan seeking its dissolution or liquidation or its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property of business, unless this License Agreement has been earlier terminated under paragraph 15(a); or (iv) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans and/or the Licensed Marks.

Amended as of March 16, 2006

-4-

(c). To the extent not otherwise provided therein, neither: (i) the Membership Standards Applicable to Regular Members of BCBSA; nor (ii) the rules and regulations governing Government Programs and certain other uses; nor (iii) the rules and regulations governing mediation and mandatory dispute resolution, may be amended unless and until each such amendment is first adopted by the affirmative vote of three-fourths of the Plans and of three-fourths of the total then current weighted vote of all the Plans. The rules and regulations governing National Accounts and other national programs required by the Membership Standards Applicable to Regular Members of BCBSA (Exhibit 2) are contained, in addition to those set forth in Exhibit 3, in the following documents, as amended from time to time: (1) the Inter-Plan Programs Policies and Provisions; (2) Inter-Plan Medicare Advantage Program Policies and Provisions. The voting requirements specified in rules and regulations governing such national programs may not be amended unless and until each such amendment is first adopted by the affirmative vote of three-fourths of the Plans and of three-fourths of the total then current weighted vote of all the Plans.

Amended as of November 21, 2014

-4a-

(d). The Plan may operate as a for-profit company on the following conditions:

(i) The Plan shall discharge all responsibilities which it has to the Association and to other Plans by virtue of this Agreement and the Plan's membership in BCBSA.

(ii) The Plan shall not use the licensed Marks and Name, or any derivative thereof, as part of its legal name or any symbol used to identify the Plan in any securities market. The Plan shall use the licensed Marks and Name as part of its trade name within its service area for the sale, marketing and administration of health care and related services in the service area.

(iii) The Plan's license to use the Licensed Marks and Name shall automatically terminate effective: (a) thirty days after the Plan knows, or there is an SEC filing indicating that, any Institutional Investor, has become the Beneficial Owner of securities representing 10% or more of the voting power of the Plan ("Excess Institutional Voter"), unless such Excess Institutional Voter shall cease to be an Excess Institutional Voter prior to such automatic termination becoming effective; (b) thirty days after the Plan knows, or there is an SEC filing indicating that, any Noninstitutional Investor has become the Beneficial Owner of securities representing 5% or more of the voting power of the Plan ("Excess Noninstitutional Voter") unless such Excess Noninstitutional Voter shall cease to be an Excess Noninstitutional Voter prior to such automatic termination becoming effective; (c) thirty days after the Plan knows, or there is an SEC filing indicating that, any Person has become the Beneficial Owner of 20% or more of the Plan's then outstanding common stock or other equity securities which (either by themselves or in combination) represent an ownership interest of 20% or more pursuant to determinations made under paragraph 9(d)(iv) below ("Excess Owner"), unless such Excess Owner shall cease to be an Excess Owner prior to such automatic termination becoming effective; (d) ten business days after individuals who at the time the Plan went public constituted the Board of Directors of the Plan (together with any new directors whose election to the Board was approved by a vote of 2/3 of the directors then still in office who were directors at the time the Plan went public or whose election or nomination was previously so approved) (the "Continuing Directors") cease for any reason to constitute a majority of the Board of Directors; or (e) ten business days after the Plan consolidates with or merges with or into any person or conveys, assigns, transfers or sells all or substantially all of its assets to any person other than a merger in which the Plan is the surviving entity and immediately after which merger, no person is an Excess Institutional Voter, an Excess Noninstitutional Voter or an Excess Owner: provided that, if requested by the affected Plan in a writing received by BCBSA prior to such automatic termination becoming effective, the provisions of this paragraph 9(d)(iii) may be waived, in whole or in part,

Amended as of September 17, 1997

upon the affirmative vote of a majority of the disinterested Plans and a majority of the total then current weighted vote of the disinterested Plans. Any waiver so granted may be conditioned upon such additional requirements (including but not limited to imposing new and independent grounds for termination of this License) as shall be approved by the affirmative vote of a majority of the disinterested Plans and a majority of the total then current weighted vote of the disinterested Plans. If a timely waiver request is received, no automatic termination shall become effective until the later of: (1) the conclusion of the applicable time period specified in paragraphs 9(d)(iii)(a)-(d) above, or (2) the conclusion of the first Member Plan meeting after receipt of such a waiver request.

In the event that the Plan's license to use the Licensed Marks and Name is terminated pursuant to this Paragraph 9(d)(iii), the license may be reinstated in BCBSA's sole discretion if, within 30 days of the date of such termination, the Plan demonstrates that the Person referred to in clause (a), (b) or (c) of the preceding paragraph is no longer an Excess Institutional Voter, an Excess Noninstitutional Voter or an Excess Owner.

(iv) The Plan shall not issue any class or series of security other than (i) shares of common stock having identical terms or options or derivatives of such common stock, (ii) non-voting, non-convertible debt securities or (iii) such other securities as the Plan may approve, provided that BCBSA receives notice at least thirty days prior to the issuance of such securities, including a description of the terms for such securities, and BCBSA shall have the authority to determine how such other securities will be counted in determining whether any Person is an Excess Institutional Voter, Excess Noninstitutional Voter or an Excess Owner.

(v) For purposes of paragraph 9(d)(iii), the following definitions shall apply:

(a) "Affiliate" and "Associate" shall have the respective meanings ascribed to such terms in Rule 12b-2 of the General Rules and Regulations under the Securities Exchange Act of 1934, as amended and in effect on November 17, 1993 (the "Exchange Act").

(b) A Person shall be deemed the "Beneficial Owner" of and shall be deemed to "beneficially own" any securities:

(i) which such Person or any of such Person's Affiliates or Associates beneficially owns, directly or indirectly;

Amended as of September 17, 1997

(ii) which such Person or any of such Person's Affiliates or Associates has (A) the right to acquire (whether such right is exercisable immediately or only after the passage of time) pursuant to any agreement, arrangement or understanding, or upon the exercise of conversion rights, exchange rights, warrants or options, or otherwise; or (B) the right to vote pursuant to any agreement, arrangement or understanding; provided, however, that a Person shall not be deemed the Beneficial Owner of, or to beneficially own, any security if the agreement, arrangement or understanding to vote such security (1) arises solely from a revocable proxy or consent given to such Person in response to a public proxy or consent solicitation made pursuant to, and in accordance with, the applicable rules and regulations promulgated under the Exchange Act and (2) is not also then reportable on Schedule 13D under the Exchange Act (or any comparable or successor report); or

(iii) which are beneficially owned, directly or indirectly, by any other Person (or any Affiliate or Associate thereof) with which such Person (or any of such Person's Affiliates or Associates) has any agreement, arrangement or understanding (other than customary agreements with and between underwriters and selling group members with respect to a bona fide public offering of securities) relating to the acquisition, holding, voting (except to the extent contemplated by the proviso to (b)(ii)(B) above) or disposing of any securities of the Plan.

Notwithstanding anything in this definition of Beneficial Ownership to the contrary, the phrase "then outstanding," when used with reference to a Person's Beneficial Ownership of securities of the Plan, shall mean the number of such securities then issued and outstanding together with the number of such securities not then actually issued and outstanding which such Person would be deemed to own beneficially hereunder.

(c) A Person shall be deemed an "Institutional Investor" if (but only if) such Person (i) is an entity or group identified in the SEC's Rule 13d-1(b)(1)(ii) as constituted on June 1, 1997, and (ii) every filing made by such Person with the SEC under Regulation 13D-G (or any successor Regulation) with respect to such Person's Beneficial Ownership of Plan securities shall have contained a certification identical to the one required by item 10 of SEC Schedule 13G as constituted on June 1, 1997.

(d) "Noninstitutional Investor" means any Person who is not an Institutional Investor.

(e) "Person" shall mean any individual, firm, partnership, corporation, trust, association, joint venture or other entity, and shall include any successor (by merger or otherwise) of such entity.

Amended as of September 17, 1997

-5b-

(The next page is page 6)

10. This License Agreement shall remain in effect: (a) until terminated as provided herein; or (b) until this and all such other License Agreements are terminated by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans; (c) until terminated by the Plan upon eighteen (18) months written notice to BCBSA or upon a shorter notice period approved by BCBSA in writing at its sole discretion.

11. Except as otherwise provided in paragraph 15 below or by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans, or unless this and all such other License Agreements are simultaneously terminated by force of law, the termination of this License Agreement for any reason whatsoever shall cause the reversion to BCBSA of all rights in and to the Licensed Marks and Name, and the Plan agrees that it will promptly discontinue all use of the Licensed Marks and Name, will not use them thereafter, and will promptly, upon written notice from BCBSA, change its corporate name so as to eliminate the Licensed Name therefrom.

12. The license hereby granted to Plan to use the Licensed Marks and Name is and shall be personal to the Plan so licensed and shall not be assignable by any act of the Plan, directly or indirectly, without the written consent of BCBSA. Said license shall not be assignable by operation of law, nor shall Plan mortgage or part with possession or control of this license or any right hereunder, and the Plan shall have no right to grant any sublicense to use the Licensed Marks and Name.

13. BCBSA shall maintain appropriate service mark registrations of the Licensed Marks and BCBSA shall take such lawful steps and proceedings as may be necessary or proper to prevent use of the Licensed Marks by any person who is not authorized to use the same. Any actions or proceedings undertaken by BCBSA under the provisions of this paragraph shall be at BCBSA's sole cost and expense. BCBSA shall have the sole right to determine whether or not any legal action shall be taken on account of unauthorized use of the Licensed Marks, such right not to be unreasonably exercised. The Plan shall report any unlawful usage of the Licensed Marks to BCBSA in writing and agrees, free of charge, to cooperate fully with BCBSA's program of enforcing and protecting the service mark rights, trade name rights and other rights in the Licensed Marks.

14. The Plan hereby agrees to save, defend, indemnify and hold BCBSA and any other Plan(s) harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of the activities of the Plan or of any hospital, medical group, clinic or other provider of health services that is owned or controlled directly or indirectly by Plan. BCBSA hereby agrees to save, defend, indemnify and hold the Plan and any other Plan(s) harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise exclusively and directly as a result of the activities of BCBSA.

Amended as of June 21, 2012

15. (a). This Agreement shall automatically terminate upon the occurrence of any of the following events: (i) a voluntary petition shall be filed by the Plan or by BCBSA seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against the Plan or BCBSA seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by the Plan or BCBSA or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Plan or BCBSA respectively, or (iii) an order for relief is entered against the Plan or BCBSA in any case under the bankruptcy laws of the United States, or the Plan or BCBSA is adjudged bankrupt or insolvent (as that term is defined in the Uniform Commercial Code as enacted in the state of Illinois) by any court of competent jurisdiction, or (iv) the Plan or BCBSA makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of the Plan or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by the Plan or BCBSA seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against the Plan or BCBSA seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by the Plan or BCBSA or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Plan or BCBSA respectively, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of the Plan's or BCBSA's property or business is appointed, or the Plan or BCBSA is ordered dissolved or liquidated, or (ix) the Plan shall fail to pay its dues and shall not cure such failure within thirty (30) days of receiving written notice thereof, or (x) if, due to regulatory action, the Plan together with any applicable Controlled Affiliate becomes unable to do business using the Names and Marks in any State or portion thereof included in its Service Area, provided that: (i) automatic termination shall not occur prior to the exhaustion by any such Plan of its rights to appeal or challenge such regulatory action; and (ii) in the event the Plan is licensed to do business using the Names and Marks in multiple States or portions of States, the termination of its License Agreement shall be solely limited to the State(s) or portions thereof in which the regulatory action applies. By not appealing or challenging such regulatory action within the time prescribed by law or regulation, and in any event no later than 120 days after such action is taken, a Plan shall be deemed to have exhausted its rights to appeal or challenge, and automatic termination shall proceed.

Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Plan's or BCBSA's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 15(a)(vii) and (viii) of this Agreement.

Amended as of September 14, 2004

-7a-

(b). BCBSA, or the Plans (as provided and in addition to the rights conferred in Paragraph 10(b) above), may terminate this Agreement immediately upon written notice upon the occurrence of either of the following events: (a) the Plan or BCBSA becomes insolvent (as that term is defined in the Uniform Commercial Code enacted in the state of Illinois), or (b) any final judgment against the Plan or BCBSA remains unsatisfied or unbonded of record for a period of sixty (60) days or longer.

(c). If this License Agreement is terminated as to BCBSA for any reason stated in subparagraphs 15(a) and (b) above, the ownership of the Licensed Marks shall revert to each of the Plans.

(d). Upon termination of this License Agreement or any Controlled Affiliate License Agreement of a Larger Controlled Affiliate, as defined in Exhibit 1 to this License Agreement, the following conditions shall apply, except that, in the event of a partial termination of this Agreement pursuant to Paragraph 15 (a)(x)(ii) of this Agreement, the notices, national account listing, payment and audit right listed below shall be applicable solely with respect to the geographic area for which the Plan's license to use the Licensed Names and Marks is terminated:

(i) The terminated entity shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the terminated entity or its Controlled Affiliates under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA, subject to any conflicting state law and state regulatory requirements. This notice shall be mailed within 15 days after termination or, if termination is pursuant to paragraph 10(d) of this Agreement, within 15 days after the written notice to BCBSA described in paragraph 10(d).

(ii) The terminated entity shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the terminated entity is involved (in a Control, Participating or Servicing capacity), identifying the national account and the terminated entity's role therein. For those accounts where the terminated entity is the Control Plan, the Plan must also indicate the Participating and Servicing Plans in the national account syndicate.

Amended as of June 16, 2005

-8-

(iii) Unless the cause of termination is an event stated in paragraph 15(a) or (b) above respecting BCBSA, the Plan and its Licensed Controlled Affiliates shall be jointly liable for payment to BCBSA of an amount equal to the Re-Establishment Fee (described below) multiplied by the number of Licensed Enrollees of the terminated entity and its Licensed Controlled Affiliates; provided that if any other Plan is permitted by BCBSA to use marks or names licensed by BCBSA in the Service Area established by this Agreement, the Re-Establishment Fee shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the terminated entity and its Licensed Controlled Affiliates and the denominator of which is the total number of Licensed Enrollees in the Service Area. The Re-Establishment Fee shall be indexed to a base fee of \$80. The Re-Establishment Fee through December 31, 2005 shall be \$80. The Re-Establishment Fee for calendar years after December 31, 2005 shall be adjusted on January 1 of each calendar year up to and including January 1, 2010 and shall be the base fee multiplied by 100% plus the cumulative percentage increase or decrease in the Plans' gross administrative expense (standard BCBSA definition) per Licensed Enrollee since December 31, 2004. The adjustment shall end on January 1, 2011, at which time the Re-Establishment Fee shall be fixed at the then-current amount and no longer automatically adjusted. For example, if the Plans' gross administrative expense per Licensed Enrollee was \$278.60, \$285.00 and \$290.00 for calendar year end 2004, 2005 and 2006, respectively, the January 1, 2007 Re-Establishment Fee would be \$83.27 (100% of the base fee plus \$1.84 for calendar year 2005 and \$1.43 for calendar year 2006). Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (a) the end of the last fiscal year of the terminated entity which ended prior to termination or (b) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph (d)(iii) shall be due only

Amended as of June 16, 2005

-8a-

to the extent that, in BCBSA's opinion, it does not cause the net worth of the Plan to fall below 100% of the Health Risk-Based Capital formula or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this sub paragraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans), measured as of the date of termination and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plan or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. At least 50% of the Re-Establishment Fee shall be awarded to the Plan (or Plans) that receive the new license(s) for the service area(s) at issue; provided, however, that such award shall not become due or payable until all disputes, if any, regarding the amount of and BCBSA's right to such Re-Establishment Fee have been finally resolved; and provided further that the award shall be based on the final amount actually received by BCBSA. The Board of Directors shall adopt a resolution which it may amend from time to time that shall govern BCBSA's use of its portion of the award. In the event that the terminated entity's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Plan (and/or its Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph only to the extent that such payments exceed the amounts due to BCBSA pursuant to subparagraph 15(d)(vi) and any costs associated with reestablishing the Service Area, including any payments made by BCBSA to a Plan or Plans (or their Licensed Controlled Affiliates) for purposes of replacing the terminated entity.

- (iv) The terminated entity shall comply with all financial settlement procedures set forth in BCBSA's License Termination Contingency Plan, as amended from time

Amended as of June 16, 2005

-8b-

to time and shall work diligently and in good faith with BCBSA, any Alternative Control Licensee or Replacement Licensee and any existing or potential new account for Blue-branded products and services to minimize the disruption of termination, and honor, to the fullest extent possible, the desire of accounts to continue to receive or obtain Blue-branded products and services through a new Licensee ("Transition"). Such diligence and good faith on the part of the terminated entity shall include, but not be limited to: (a) working cooperatively with BCBSA to protect the Names and Marks from potential harm; (b) cooperating with BCBSA's use of the Names and Marks in the terminated entity's former service area during the termination and Transition; (c) transmitting, upon the request of an existing Blue account or of BCBSA with consent and on behalf of an existing Blue account, all member and account-data relating to the Federal Employee Program to BCBSA, and all member and account data relating to other programs to an Alternative Control Licensee or Replacement Licensee; (d) working with BCBSA and the Alternative Control or Replacement Licensee with respect to potential new Blue accounts headquartered in the terminated entity's former service area; (e) continuing to service Blue accounts during the Transition; (f) continuing to comply with National Programs, Federal Employee Program and NASCO policies and procedures and all voluntary BCBSA programs, policies and performance standards, such as Away From Home Care, including being responsible for payment of all penalties for non-compliance duly levied in conformity with the License Agreements, Membership Standards, or the Federal Employee Program agreements, that may arise during the Transition; (g) maintaining and providing access to its provider networks, as defined by Federal Employee Program agreements and National Account Program Policies and Provisions, and Inter-Plan Programs Policies and Provisions, and making those networks and discounts available to members and providers who participate in National Programs and the Federal Employee Program during the Transition; (h) maintaining its technical connections and processing capabilities during the Transition; and (i) working diligently to conclude all financial settlements and account reconciliations as negotiated in the termination transition agreement.

Amended as of November 16, 2006

-8c-

(v) Notwithstanding any other provision in this Agreement, BCBSA shall have the right, with the approval of its Board of Directors, to assess additional fines against the terminated entity during the Transition in the event it fails to maintain and provide access to provider networks as defined by Federal Employee Program agreements, National Account Program Policies and Provisions, and Inter-Plans Programs Policies and Provisions, and/or pass on applicable discounts. Such fines shall be in addition to any other assessments, fees or liquidated damages payable herein, or under existing policies and programs and shall be imposed to make whole BCBSA and/or the Plans. Terminated entity shall pay any such fines to BCBSA no later than 30 days after they are approved by the Board of Directors.

(vi) BCBSA shall have the right to examine and audit and/or hire at terminated entity's expense a third-party auditor to examine and audit the books and records of the terminated entity and its Licensed Controlled Affiliates to verify compliance with the terms and requirements of this paragraph 15(d).

(vii) Subsequent to termination of this Agreement, the terminated entity and its affiliates, agents, and employees shall have an ongoing and continuing obligation to protect all BCBSA and Blue Licensee data that was acquired or accessed during the period this Agreement was in force, including but not limited to all confidential processes, pricing, provider, discount and other strategic and competitively sensitive information ("Blue Information") from disclosure, and shall not, either alone or with another entity, disclose such Blue Information or use it in any manner to compete without the express written permission of BCBSA.

(viii) As to a breach of 15 (d) (i), (ii), (iii), (iv), (vi), or (vii) the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 15 (d) (i), (ii), (iv), (vi), or (vii) by the Plan, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

Amended as of November 16, 2006

-8d-

(ix) In the event that the terminated entity's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Plan and its Licensed Controlled Affiliates shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

(e). BCBSA shall be entitled to enjoin the Plan or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this License Agreement unless the License Agreement has been terminated pursuant to paragraph 10 (d) of this Agreement upon the required six (6) month written notice.

(f). BCBSA acknowledges that it is not the owner of assets of the Plan.

Amended as of June 16, 2005

-8e-

16. This Agreement supersedes any and all other agreements between the parties with respect to the subject matter herein, and contains all of the covenants and agreements of the parties as to the licensing of the Licensed Marks and Name. This Agreement may be amended only by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

17. If any provision or any part of any provision of this Agreement is judicially declared unlawful, each and every other provision, or any part of any provision, shall continue in full force and effect notwithstanding such judicial declaration.

18. No waiver by BCBSA or the Plan of any breach or default in performance on the part of BCBSA or the Plan or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

19a. All notices provided for hereunder shall be in writing and shall be sent in duplicate by regular mail to BCBSA or the Plan at the address currently published for each by BCBSA and shall be marked respectively to the attention of the President and, if any, the General Counsel, of BCBSA or the Plan.

Amended as of November 20, 1997

-8f-

19b. Except as provided in paragraphs 9(b), 9(d)(iii), 15(a), and 15(b) above, this Agreement may be terminated for a breach only upon at least 30 days' written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to the Member Plans.

19c. For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

-8g-

Amended as of June 16, 2005

(The next page is page 9)

20. Nothing herein contained shall be construed to constitute the parties hereto as partners or joint venturers, or either as the agent of the other, and Plan shall have no right to bind or obligate BCBSA in any way, nor shall it represent that it has any right to do so. BCBSA shall have no liability to third parties with respect to any aspect of the business, activities, operations, products, or services of the Plan.

21. This Agreement shall be governed, construed and interpreted in accordance with the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

EXHIBIT 1

**BLUE SHIELD
CONTROLLED AFFILIATE LICENSE AGREEMENT
(Includes revisions adopted by Member Plans through their November 21, 2014 meeting)**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Shield Plan, known as _____ ("Plan" or "Sponsoring Plan"), which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, Plan and Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name");

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with: (i) health care plans and related services, as defined in BCBSA's License Agreement with Plan, and administering the non-health portion of workers' compensation insurance, and (ii) underwriting the indemnity portion of workers' compensation insurance, provided that Controlled Affiliate's total premium revenue comprises less than 15 percent of the Sponsoring Plan's net subscription revenue.

This grant of rights is non-exclusive and is limited to the Service Area served by the Plan. Controlled Affiliate may use the Licensed Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Service Area under any name or mark; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

Amended as of September 19, 2014

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by Plan or by BCBSA) a report or reports to Plan and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that Plan and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that the Sponsoring Plan has:

(1) The legal authority directly or indirectly through wholly-owned subsidiaries:

(a) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; and

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan does not concur; and

(c) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by the Sponsoring Plan before the Controlled Affiliate can:

(i) change its legal and/or trade names;

(ii) change the geographic area in which it operates;

(iii) change any of the type(s) of businesses in which it engages;

Amended as of September 19, 2014

- (iv) create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business;
- (v) sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced;
- (vi) make any loans or advances except in the ordinary course of business;
- (vii) enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate);
- (viii) conduct any business other than under the Licensed Marks and Name;
- (ix) take any action that Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Sponsoring Plans directly or indirectly through wholly owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate.

Or

- (2) The legal authority directly or indirectly through wholly-owned subsidiaries;
- (a) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof and to:
 - (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; and
 - (c) to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate.

Or

- (3) With respect to a Controlled Affiliate that is 100% controlled by Plans including the Sponsoring Plan and which offers solely Medicaid products and services, the legal authority together with such other Plans:

Amended as of September 19, 2014

- (a) to select all members of the Controlled Affiliate's governing body; and
- (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate; and
- (c) to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such control and ownership by Plans must be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute the Addendum to Controlled Affiliate License attached hereto as Exhibit B.

3. SERVICE MARK USE

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within its Service Area may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Service Area the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. If Controlled Affiliate meets the standards of 2E(1) but not 2E(2) above and any of Controlled Affiliate's advertising or promotional material is reasonably determined by BCBSA and/or the Plan to be in contravention of rules and regulations governing the use of the Licensed Marks and Name, Controlled Affiliate shall for ninety (90) days thereafter obtain prior approval from BCBSA of advertising and promotional efforts using the Licensed Marks and Name, approval or disapproval thereof to be forthcoming within five (5) business days of receipt of same by BCBSA or its designee. In all advertising and promotional efforts, Controlled Affiliate shall observe the Service Area limitations applicable to Plan.

E. Notwithstanding any other provision in the Plan's License Agreement with BCBSA or in this Agreement, Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name.

Amended as of September 19, 2014

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENT

Controlled Affiliate shall promptly notify Plan and Plan shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require Plan or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to Plan and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate and Plan hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to: (i) Controlled Affiliate's rendering of services under the Licensed Marks and Name; or (ii) the activities of any hospital, medical group, clinic or other provider of health services that is owned or controlled directly or indirectly by Plan or Controlled Affiliate.

7. LICENSE TERM

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) the Plan ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Cross License Agreement the Plan ceases to be authorized to use the Licensed Names and Marks in the geographic area served by the Controlled Affiliate provided, however, that if the Controlled Affiliate is serving more than one State or portions thereof, the termination of this Agreement shall be limited to the State(s) or portions thereof in which the Plan's license to use the Licensed Marks and Names is terminated. By not appealing or challenging such regulatory action within the time prescribed by law or regulation, and in any event no later than 120 days after such action is taken, a Plan shall be deemed to have exhausted its rights to appeal or challenge, and automatic termination shall proceed.

Amended as of June 21, 2012

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Plan or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or (4) for a Smaller Controlled Affiliate (as defined in Exhibit A), failure to comply with any of the applicable requirements of Standards 2, 3, 4, 5 or 7 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(e); or (6) failure by a Controlled Affiliate that meets the standards of 2E(1) but not 2E(2) above to obtain BCBSA's written consent to a change in the identity of any owner, in the extent of ownership, or in the identity of any person or entity with the authority to select or appoint members or board members, provided that as to publicly traded Controlled Affiliates this provision shall apply only if the change affects a person or entity that owns at least 5% of the Controlled Affiliate's stock before or after the change; or (7) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans, any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Plan shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between BCBSA, the Plan and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

- (1) Controlled Affiliate shall no longer comply with item 2(E) above;
- (2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or
- (3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(e)(3)(vii) and (viii) of this Agreement.

Amended as of March 18, 2004

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(b) hereof, or in the event the Controlled Affiliate is a Larger Controlled Affiliate (as defined in Exhibit A), upon termination of this Agreement, the provisions of Paragraph 7.G. shall not apply and the following provisions shall apply, except that, in the event of a partial termination of this Agreement pursuant to Paragraph 7(B)(ii) of this Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the geographic area for which the Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA, subject to any conflicting state law and state regulatory requirements. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan shall be jointly liable for payment to BCBSA of an amount equal to the Re-Establishment Fee (described below) multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any other Plan is permitted by BCBSA to use marks or names licensed by BCBSA in the Service Area established by this Agreement, the Re-Establishment Fee shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates and the denominator of which is the total number of Licensed Enrollees in the Service Area.

Amended as of June 16, 2005

The Re-Establishment Fee shall be indexed to a base fee of \$80. The Re-Establishment Fee through December 31, 2005 shall be \$80. The Re-Establishment Fee for calendar years after December 31, 2005 shall be adjusted on January 1 of each calendar year up to and including January 1, 2010 and shall be the base fee multiplied by 100% plus the cumulative percentage increase or decrease in the Plans' gross administrative expense (standard BCBSA definition) per Licensed Enrollee since December 31, 2004. The adjustment shall end on January 1, 2011, at which time the Re-Establishment Fee shall be fixed at the then-current amount and no longer automatically adjusted. For example, if the Plans' gross administrative expense per Licensed Enrollee was \$278.60, \$285.00 and \$290.00 for calendar year end 2004, 2005 and 2006, respectively, the January 1, 2007 Re-Establishment Fee would be \$83.27 (100% of base fee plus \$1.84 for calendar year 2005 and \$1.43 for calendar year 2006. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Plan or any other Licensed Controlled Affiliates of the Plan to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this sub paragraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. At least 50% of the Re-Establishment Fee shall be awarded to the Plan (or Plans) that receive the new license(s) for the service area(s) at issue; provided, however, that such award shall not become due or payable until all disputes, if any, regarding the amount of and BCBSA's right to such Re-Establishment Fee have been finally resolved; and provided further that the award shall be based on the final amount actually received by BCBSA. The Board of Directors shall adopt a resolution which it may amend from time to time that shall govern BCBSA's use of its portion of the award. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Plan or its other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.M. and any cost associated with reestablishing the Service Area, including any payments made by BCBSA to a Plan or Plans (or their Licensed Controlled Affiliates) for purposes of replacing the Controlled Affiliate.

Amended as June 16, 2005

(4) BCBSA shall have the right to examine and audit and/or hire at terminated entity's expense a third party auditor to examine and audit the books and records of the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan to verify compliance with this paragraph 7.H.

(5) Subsequent to termination of this Agreement, the terminated entity and its affiliates, agents, and employees shall have an ongoing and continuing obligation to protect all BCBSA and Blue Licensee data that was acquired or accessed during the period this Agreement was in force, including but not limited to all confidential processes, pricing, provider, discount and other strategic and competitively sensitive information ("Blue Information") from disclosure, and shall not, either alone or with another entity, disclose such Blue Information or use it in any manner to compete without the express written permission of BCBSA.

(6) As to a breach of 7.H.(1), (2), (3), (4) or (5) the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. This Agreement shall remain in effect until terminated by the Controlled Affiliate or the Plan upon not less than eighteen (18) months written notice to the Association or upon a shorter notice period approved by BCBSA in writing at its sole discretion, or until terminated as otherwise provided herein. The Plan's right to terminate without cause upon such notice is unfettered and may be exercised in the Plan's sole discretion.

J. In the event the Controlled Affiliate is a Smaller Controlled Affiliate (as defined in Exhibit A), the Controlled Affiliate agrees to be jointly liable for the amount described in H.3. and M. hereof upon termination of the BCBSA license agreement of any Larger Controlled Affiliate of the Plan.

K. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless the Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of the Plan's license agreement upon the required 6 month written notice.

L. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

M. In the event that the Plan has more than 50 percent voting control of the Controlled Affiliate under Paragraph 2(E)(2) above and is a Larger Controlled Affiliate (as defined in Exhibit A), then the vote called for in Paragraphs 7(C) and 7(D) above shall require the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans.

Amended September 19, 2014

N. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

8. DISPUTE RESOLUTION

The parties agree that any disputes between them or between or among either of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Shield and Blue Shield Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

9. LICENSE FEE

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit C.

10. JOINT VENTURE

Nothing contained in the Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between Plan and Controlled Affiliate or between either and BCBSA.

Amended as of September 19, 2014

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

Amended as of June 16, 2005

THIS PAGE IS INTENTIONALLY BLANK.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

16. HEADINGS

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

EXHIBIT A

CONTROLLED AFFILIATE LICENSE STANDARDS

November 2014

PREAMBLE

For purposes of definition:

A "smaller Controlled Affiliate:" (1) comprises less than fifteen percent (15%) of Sponsoring Plan's and its licensed Controlled Affiliates' total member enrollment (as reported on the BCBSA Quarterly Enrollment Report, excluding rider and freestanding coverage, and treating an entity seeking licensure as licensed);* or (2) underwrites the indemnity portion of workers' compensation insurance and has total premium revenue less than 15 percent of the Sponsoring Plan's net subscription revenue.

A "larger Controlled Affiliate" comprises fifteen percent (15%) or more of Sponsoring Plan's and its licensed Controlled Affiliates' total member enrollment (as reported on the BCBSA Quarterly Enrollment Report, excluding rider and freestanding coverage, and treating an entity seeking licensure as licensed.)*

Changes in Controlled Affiliate status:

If **any** Controlled Affiliate's status changes regarding: its Plan ownership level, its risk acceptance or direct delivery of medical care, the Controlled Affiliate shall notify BCBSA within thirty (30) days of such occurrence in writing and come into compliance with the applicable standards within six (6) months.

If a smaller Controlled Affiliate's health and workers' compensation administration business reaches or surpasses fifteen percent (15%) of the total member enrollment of the Sponsoring Plan and licensed Controlled Affiliates, the Controlled Affiliate shall:

Amended as of September 19, 2014

EXHIBIT A (continued)

1. Within thirty (30) days, notify BCBSA of this fact in writing, including evidence that the Controlled Affiliate meets the minimum liquidity and capital (BCBSA "Health Risk-Based Capital (HRBC)" as defined by the NAIC and state-established minimum reserve) requirements of the larger Controlled Affiliate Financial Responsibility standard; and
2. Within six (6) months after reaching or surpassing the fifteen percent (15%) threshold, demonstrate compliance with all license requirements for a larger Controlled Affiliate.

If a Controlled Affiliate that underwrites the indemnity portion of workers' compensation insurance receives a change in rating or proposed change in rating, the Controlled Affiliate shall notify BCBSA within 30 days of notification by the external rating agency.

*For purposes of this calculation,

The numerator equals:

Applicant Controlled Affiliate's member enrollment, as defined in BCBSA's Quarterly Enrollment Report (excluding rider and freestanding coverage).

The denominator equals:

Numerator PLUS Sponsoring Plan and all other licensed Controlled Affiliates' member enrollment, as reported in BCBSA's Quarterly Enrollment Report (excluding rider and freestanding coverage).

Amended as of September 19, 2014

EXHIBIT A (continued)

STANDARDS FOR LICENSED CONTROLLED AFFILIATES

Each licensed controlled affiliate shall be subject to certain standards as determined below:

1. What percent of the licensed controlled affiliate is controlled by the Sponsoring Plan and other Plans?

More than 50% by Sponsoring Plan ↓ Standard 1A, 4	50% by Sponsoring Plan ↓ Standard 1B, 4	100% Plan control but less than 50% Sponsoring Plan Control and its offers solely Medicaid products and services ↓ Standard 1(C)
---	---	--

IN ADDITION,

2. Is risk being assumed?

	Yes ↓		No ↓	
Controlled Affiliate underwrites any indemnity portion of workers' compensation insurance ↓ Standards 7A-7E, 11	Controlled Affiliate comprises < 15% of total member enrollment of Sponsoring Plan and its licensed affiliates, and does not underwrite the indemnity portion of workers' compensation insurance ↓ Standard 2 (Guidelines 1.1,1.2) and Standard 11	Controlled Affiliate comprises ≥ 15% of total member enrollment of Sponsoring Plan and its licensed affiliates, and does not underwrite the indemnity portion of workers' compensation insurance ↓ Standard 6H	Controlled Affiliate comprises < 15% of total member enrollment of Sponsoring Plan and its licensed affiliates ↓ Standard 2 (Guidelines 1.1,1.3) and Standard 11	Controlled Affiliate comprises ≥ 15% of total member enrollment of Sponsoring Plan and its licensed affiliates ↓ Standard 6H

IN ADDITION,

3. Is medical care being directly provided?

Yes ↓ Standard 3A	No ↓ Standard 3B
-------------------------	------------------------

IN ADDITION,

4. If the controlled affiliate has health or workers' compensation administration business, does such business comprise 15% or more of the total member enrollment of Plan and its licensed controlled affiliates?

Yes ↓ Standards 6A-6J	Controlled Affiliate is not a former primary licensee and is not subject to Standard 1(C) ↓ Standards 5,8,9B,10,11	Controlled Affiliate is a former primary licensee ↓ Standards 5,8,9A,10,11	No ↓ Controlled Affiliate is not a former primary licensee and is subject to Standard 1(C) ↓ Standards 5,8,9B,11
-----------------------------	--	--	--

EXHIBIT A (continued)

Standard 1 - Organization and Governance

1A.) The Standard for more than 50% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA, Sponsoring Plan"), has the legal authority, directly or indirectly through wholly-owned subsidiaries: 1) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof; and 2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; and 3) to exercise control over the policy and operations of the Controlled Affiliate. In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate.

1B.) The Standard for 50% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA, (the "Sponsoring Plan"), has the legal authority, directly or indirectly through wholly-owned subsidiaries:

- 1) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; and
- 2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; and
- 3) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan.

Amended September 19, 2014

EXHIBIT A (continued)

Notwithstanding anything to the contrary in 1) through 3) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by the Sponsoring Plan before the Controlled Affiliate can:

- o change the geographic area in which it operates
- o change its legal and/or trade names
- o change any of the types of businesses in which it engages
- o create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business
- o sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced
- o make any loans or advances except in the ordinary course of business
- o enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate)
- o conduct any business other than under the Licensed Marks and Name
- o take any action that the Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate.

1C.) The Standard for 100% Plan control but less than 50% Sponsoring Plan Control:

A Controlled Affiliate shall be organized and operated in such a manner that (i) it offers solely Medicaid products and services; and (ii) a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA (the "Sponsoring Plan,") has the legal authority together with Other Plans:

Amended September 19, 2014

- 1) to select all members of the Controlled Affiliate's governing body; and
- 2)to prevent any change in the articles of incorporation, bylaws, or other establishing or governing documents of the Controlled Affiliate; and
- 3)to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such 100% control and ownership by Plans shall be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute the Addendum to Controlled Affiliate License.

Amended September 19, 2014

EXHIBIT A (continued)

Standard 2 - Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers. If a risk-assuming Controlled Affiliate ceases operations for any reason, Blue Cross and/or Blue Cross Plan coverage will be offered to all Controlled Affiliate subscribers without exclusions, limitations or conditions based on health status. If a nonrisk-assuming Controlled Affiliate ceases operations for any reason, Sponsoring Plan will provide for services to its customers.

The requirements of the preceding two sentences shall apply to all lines of business unless a line of business is specially exempted from the requirement(s) by the BCBSA Board of Directors.

Standard 3 - State Licensure/Certification

3A.)The Standard for a Controlled Affiliate that employs, owns or contracts on a substantially exclusive basis for medical services is:

A Controlled Affiliate shall maintain unimpaired licensure or certification for its medical care providers to operate under applicable state laws.

3B.)The Standard for a Controlled Affiliate that does not employ, own or contract on a substantially exclusive basis for medical services is:

A Controlled Affiliate shall maintain unimpaired licensure or certification to operate under applicable state laws.

Standard 4 - Certain Disclosures

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of 1) the structure of the Blue Cross and Blue Shield System; and 2) the independent nature of every licensee; and 3) the Controlled Affiliate's financial condition.

Amended as of September 19, 2014

EXHIBIT A (continued)

Standard 5 - Reports and Records for Certain Smaller Controlled Affiliates

For a smaller Controlled Affiliate that does not underwrite the indemnity portion of workers' compensation insurance, the Standard is:

A Controlled Affiliate and/or its Sponsoring licensed Plan shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

Standard 6 - Other Standards for Larger Controlled Affiliates

Standards 6(A) - (I) that follow apply to larger Controlled Affiliates.

Standard 6(A): Board of Directors

A Controlled Affiliate Governing Board shall act in the interest of its Corporation in providing cost-effective health care services to its customers. A Controlled Affiliate shall maintain a governing Board, which shall control the Controlled Affiliate, composed of a majority of persons other than providers of health care services, who shall be known as public members. A public member shall not be an employee of or have a financial interest in a health care provider, nor be a member of a profession which provides health care services.

Standard 6(B): Responsiveness to Customers

A Controlled Affiliate shall be operated in a manner responsive to customer needs and requirements.

Standard 6(C): Participation in National Programs

A Controlled Affiliate shall effectively and efficiently participate in each national program as from time to time may be adopted by the Member Plans for the purposes of providing portability of membership between the licensees and ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's Service Area.

Amended as of September 19, 2014

EXHIBIT A (continued)

Such programs are applicable to licensees, and include:

1. BlueCard Program;
2. Inter-Plan Teleprocessing System (ITS);
3. National Account Programs;
4. Business Associate Agreement for Blue Cross and Blue Shield Licensees, effective April 14, 2003; and
5. Inter-Plan Medicare Advantage Program.

Standard 6(D): Financial Performance Requirements

In addition to requirements under the national programs listed in Standard 6C: Participation in National Programs, a Controlled Affiliate shall take such action as required to ensure its financial performance in programs and contracts of an inter-licensee nature or where BCBSA is a party.

Standard 6(E): Cooperation with Plan Performance Response Process

A Controlled Affiliate shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Plan Performance Response Process and in addressing Controlled Affiliate performance problems identified thereunder.

Standard 6(F): Independent Financial Rating

A Controlled Affiliate shall obtain a rating of its financial strength from an independent rating agency approved by BCBSA's Board of Directors for such purpose.

Standard 6(G): Local and National Best Efforts

Notwithstanding any other provision in the Plan's License Agreement with BCBSA or in this License Agreement, during each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Shield Mark.

Standard 6(H): Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Amended as of November 21, 2014

EXHIBIT A (continued)

Standard 6(I): Reports and Records

A Controlled Affiliate shall furnish to BCBSA on a timely and accurate basis reports and records relating to compliance with these Standards and the License Agreements between BCBSA and Controlled Affiliate. Such reports and records are the following:

- A) BCBSA Controlled Affiliate Licensure Information Request; and
- B) Biennial trade name and service mark usage material, including disclosure material; and
- C) Changes in the ownership and governance of the Controlled Affiliate, including changes in its charter, articles of incorporation, or bylaws, changes in a Controlled Affiliate's Board composition, or changes in the identity of the Controlled Affiliate's Principal Officers, and changes in risk acceptance, contract growth, or direct delivery of medical care; and
- D) Semi-annual "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC, Annual Certified Audit Report, Insurance Department Examination Report, Annual Statement filed with State Insurance Department (with all attachments), and

Amended as of November 17, 2011

EXHIBIT A (continued)

Standard 6(J): Control by Unlicensed Entities Prohibited

No Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled Affiliate thereof to obtain control of the Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services.

Standard 7 - Other Standards for Risk-Assuming Workers' Compensation Controlled Affiliates

Standards 7(A) - (E) that follow apply to Controlled Affiliates that underwrite the indemnity portion of workers' compensation insurance.

Standard 7 (A): Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 7(B): Reports and Records

A Controlled Affiliate shall furnish, on a timely and accurate basis, reports and records relating to compliance with these Standards and the License Agreements between BCBSA and the Controlled Affiliate. Such reports and records are the following:

- A. BCBSA Controlled Affiliate Licensure Information Request; and
- B. Biennial trade name and service mark usage materials, including disclosure materials; and
- C. Annual Certified Audit Report, Annual Statement as filed with the State Insurance Department (with all attachments), Annual NAIC's Risk-Based Capital Worksheets for Property and Casualty Insurers; and
- D. Quarterly Estimated Risk-Based Capital for Property and Casualty Insurers, Insurance Department Examination Report; and

Amended as of November 17, 2011

EXHIBIT A (continued)

- E. Notification of all changes and proposed changes to independent ratings within 30 days of receipt and submission of a copy of all rating reports; and
- F. Changes in the ownership and governance of the Controlled Affiliate including changes in its charter, articles of incorporation, or bylaws, changes in a Controlled Affiliate's Board composition, Plan control, state license status, operating area, the Controlled Affiliate's Principal Officers or direct delivery of medical care.

Standard 7(C): Loss Prevention

A Controlled Affiliate shall apply loss prevention protocol to both new and existing business.

Standard 7(D): Claims Administration

A Controlled Affiliate shall maintain an effective claims administration process that includes all the necessary functions to assure prompt and proper resolution of medical and indemnity claims.

Standard 7(E): Disability and Provider Management

A Controlled Affiliate shall arrange for the provision of appropriate and necessary medical and rehabilitative services to facilitate early intervention by medical professionals and timely and appropriate return to work.

Amended as of November 16, 2000

EXHIBIT A (continued)

Standard 8 - Cooperation with Controlled Affiliate License Performance Response Process Protocol

A Controlled Affiliate and its Sponsoring Plan shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Controlled Affiliate License Performance Response Process Protocol (ALPRPP) and in addressing Controlled Affiliate compliance problems identified thereunder.

Standard 9(A) - Participation in National Programs by Smaller Controlled Affiliates that were former Primary Licensees

A smaller controlled affiliate that formerly was a Primary Licensee shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's service area and be subject to certain relevant financial and reporting requirements.

A. National program requirements include:

- BlueCard Program;
- Inter-Plan Teleprocessing System (ITS);
- National Account Programs.

B. Financial Requirements include:

- Standard 6(D): Financial Performance Requirements and Standard 6(H): Financial Responsibility; or
- A financial guarantee covering the Controlled Affiliate's Inter-Plan Programs obligations in a form, and from a guarantor, acceptable to BCBSA.

Amended as of November 21, 2014

EXHIBIT A (continued)

Standard 9(A) - Participation in National Programs by Smaller Controlled Affiliates that were former Primary Licensees

C. Reporting requirements include:

- The Semi-annual Health Risk-Based Capital (HRBC) Report.

Amended as of June 13, 2002

Exhibit A (continued)

Standard 9(B) - Participation in National Programs by Smaller Controlled Affiliates

A smaller controlled affiliate shall participate in national programs in accordance with BlueCard and other relevant Policies and Provisions shall effectively and efficiently participate in national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the controlled affiliate's service area and be subject to certain relevant financial and reporting requirements.

A. National program requirements include:

- BlueCard Program;
- Inter-Plan Teleprocessing System (ITS);
- National Account Programs.

B. Financial Requirements include:

- Standard 6(D): Financial Performance Requirements and Standard 6(H): Financial Responsibility; or
- A financial guarantee covering the Controlled Affiliate's Inter-Plan Programs obligations in a form, and from a guarantor, acceptable to BCBSA.

Amended as of June 20, 2013

EXHIBIT A (continued)

Standard 10 - Participation in Inter-Plan Medicare Advantage Program

A smaller controlled affiliate for which this standard applies pursuant to the Preamble section of Exhibit A of the Controlled Affiliate License Agreement shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the controlled affiliate's service area.

National program requirements include:

- A. Inter-Plan Medicare Advantage Program.

Standard 11: Participation in Master Business Associate Agreement by Smaller Controlled Affiliate Licensees

Effective April 14, 2003, all smaller controlled affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

Amended as of September 19, 2014

EXHIBIT B

ADDENDUM TO CONTROLLED AFFILIATE LICENSE TO BE EXECUTED BY CONTROLLED AFFILIATES LICENSED UNDER CONTROLLED AFFILIATE LICENSE STANDARD 1C.

ADDENDUM TO CONTROLLED AFFILIATE LICENSE

This Addendum is made to that certain Blue Cross Controlled Affiliate License Agreement executed by and among Blue Cross and Blue Shield Association ("Licensor"), _____ ("Controlled Affiliate Licensee") and _____ ("Sponsoring Plan") dated the ____ day of _____, _____ ("Agreement"). The parties to this Addendum are Licensor, Controlled Affiliate Licensee, Sponsoring Plan, and the undersigned other Plans ("Other Plans"). This Addendum is made and shall be deemed effective as of the date of the Agreement.

WHEREAS, the Sponsoring Plan asserts that it can serve the Medicaid market in its Service Area more efficiently and with less risk though a Medicaid enterprise jointly owned and controlled with other Plans than through a wholly owned and controlled Medicaid enterprise;

WHEREAS, in such circumstance Controlled Affiliate License Standard 1C. permits the licensing of a Controlled Affiliate that is less than 50% owned and controlled by the Sponsoring Plan but which is 100% owned and controlled by Plans including the Sponsoring Plan, subject to certain conditions;

WHEREAS, one such condition is that the Sponsoring Plan and all such other owning and controlling Plans enter into this Addendum.;

NOW THEREFORE, for good and valuable consideration, including the promises and covenants set forth herein, the parties agree as follows:

1. The Sponsoring Plan shall participate operationally in Controlled Affiliate's business that is conducted under the Licensed Marks. The parties understand that participation may take many forms, one of which should be providing a network of providers in the Service Area of the Controlled Affiliate for the Medicaid services being offered under the Agreement and being involved in network development and provider relations.
2. Each of the Other Plans agrees that (i) it will cooperate fully with the Sponsoring Plan and BCBSA as needed to enable Sponsoring Plan and Controlled Affiliate Licensee to meet their obligations to Licensor under the Agreement and all associated rules and regulations of Licensor, including the Brand Regulations, (ii) it will not take any action, either individually or jointly with any of the Other Plans, that would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement, and (iii) it will not fail

to take any action, either individually or jointly with any of the Other Plans, where such failure would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement.

3. Each of the Other Plans acknowledges that it has reviewed the Agreement and understands that Sponsoring Plan has the right to terminate the Agreement without cause upon notice as provided in Paragraph 7 of the Agreement, and that such right is unfettered and may be exercised by Sponsoring Plan in its sole discretion.

WHEREFORE, by signing below the parties agree to be bound to the terms stated herein.

EXHIBIT C
ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENT

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

FOR RISK PRODUCTS:

For Controlled Affiliates not underwriting the indemnity portion of workers' compensation insurance:

An amount equal to its pro rata share of Sponsoring Plan's dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on health care plans and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by Sponsoring Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

For Controlled Affiliates underwriting the indemnity portion of workers' compensation insurance:

An amount equal to 0.35 percent of the gross revenue per annum of Controlled Affiliate arising from products using the marks; plus, an annual fee of \$5,000 per license for a Controlled Affiliate subject to Standard 7.

Amended as of September, 19, 2014

EXHIBIT C (continued)

FOR NONRISK PRODUCTS:

For third-party administrative business, an amount equal to its pro rata share of Sponsoring Plan's dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on health care plans and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by Sponsoring Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

For non-third party administrative business (e.g., case management, provider networks, etc.), an amount equal to 0.24 percent of the gross revenue per annum of Controlled Affiliate arising from products using the marks; plus:

- 1) An annual fee of \$5,000 per license for a Controlled Affiliate subject to Standard 6 D.
- 2) An annual fee of \$2,000 per license for all other Controlled Affiliates.

The foregoing shall be reduced by one-half where both a BLUE CROSS® and BLUE SHIELD® License are issued to the same Controlled Affiliate. In the event that any license period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Amended as of September 19, 2014

EXHIBIT 1A

**CONTROLLED AFFILIATE LICENSE AGREEMENT
APPLICABLE TO LIFE INSURANCE COMPANIES
(Includes revisions adopted by Member Plans through their November 21, 2014 meeting)**

This agreement by and among Blue Cross and Blue Shield Association ("BCBSA")
_____("Controlled Affiliate"), a Controlled Affiliate of the Blue Shield Plan(s), known as
_____("Plan").

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, the Plan and the Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name");

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to the Controlled Affiliate the exclusive right to use the licensed Marks and Names in connection with and only in connection with those life insurance and related services authorized by applicable state law, other than health care plans and related services (as defined in the Plan's License Agreements with BCBSA) which services are not separately licensed to Controlled Affiliate by BCBSA, in the Service Area served by the Plan, except that BCBSA reserves the right to use the Licensed Marks and Name in said Service Area, and except to the extent that said Service Area may overlap the area or areas served by one or more other licensed Blue Shield Plans as of the date of this License as to which overlapping areas the rights hereby granted are non-exclusive as to such other Plan or Plans and their respective Licensed Controlled Affiliates only. Controlled Affiliate cannot use the Licensed Marks or Name outside the Service Area or in its legal or trade name; provided, however, that if and only for so long as Controlled Affiliate also holds a Blue Shield Affiliate License Agreement applicable to health care plans and related services, Controlled Affiliate may use the Licensed Marks and Name in its legal and trade name according to the terms of such license agreement.

Amended as of June 12, 2003

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in relation to the sale, marketing and rendering of authorized products and further agrees to be bound by the conditions regarding quality control shown in Exhibit A as it may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees that Plan and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by Plan or by BCBSA) a report to Plan and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of Exhibit A.

D. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner that it is subject to the bona fide control of a Plan or Plans. Absent written approval by BCBSA of an alternative method of control, bona fide control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Controlled Affiliate's governing body having not less than 51% voting control thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Plan or Plans shall own at least 51% of any for-profit Controlled Affiliate. If the Controlled Affiliate is a mutual company, the Plan or its designee(s) shall have and maintain, in lieu of the requirements of items (a) and (c) above, proxies representing 51% of the votes at any meeting of the policyholders and shall demonstrate that there is no reason to believe this such proxies shall be revoked by sufficient policyholders to reduce such percentage below 51%.

3. SERVICE MARK USE

Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks, and shall comply with such rules (applicable to all Controlled Affiliates licensed to use the Marks) relative to service mark use, as are issued from time-to-time by BCBSA. If there is any public reference to the affiliation between the Plan and the Controlled Affiliate, all of the Controlled Affiliate's licensed services in the Service Area of the Plan shall be rendered under the Licensed Marks. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks by Controlled Affiliate shall inure to the benefit of BCBSA.

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the option of Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENTS

Controlled Affiliate shall promptly notify Plan and BCBSA of any suspected acts of infringement, unfair competition or passing off which may occur in relation to the Licensed Marks. Controlled Affiliate shall not be entitled to require Plan or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to Plan and BCBSA, free of charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate hereby agrees to save, defend, indemnify and hold Plan and BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of Controlled Affiliate's rendering of health care services under the Licensed Marks.

7. LICENSE TERM

The license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods upon evidence satisfactory to the Plan and BCBSA that Controlled Affiliate meets the then applicable quality control standards, unless one of the parties hereto notifies the other party of the termination hereof at least sixty (60) days prior to expiration of any license period.

This Agreement may be terminated by the Plan or by BCBSA for cause at any time provided that Controlled Affiliate has been given a reasonable opportunity to cure and shall not effect such a cure within thirty (30) days of receiving written notice of the intent to terminate (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period). By way of example and not for purposes of limitation, Controlled Affiliate's failure to abide by the quality control provisions of Paragraph 2, above, shall be considered a proper ground for cancellation of this Agreement.

This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

- A. Controlled Affiliate shall no longer comply with Standard No. 1 (Organization and Governance) of Exhibit A or, following an opportunity to cure, with the remaining quality control provisions of Exhibit A, as it may be amended from time-to-time; or
- B. Plan ceases to be authorized to use the Licensed Marks; or
- C. Appropriate dues for Controlled Affiliate pursuant to item 8 hereof, which are the royalties for this License Agreement are more than sixty (60) days in arrears to BCBSA.

Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks including any use in its trade name.

In the event of any disagreement between Plan and BCBSA as to whether grounds exist for termination or as to any other term or condition hereof, the decision of BCBSA shall control, subject to provisions for mediation or mandatory dispute resolution in effect between the parties.

Upon termination of this Agreement, Licensed Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of the Blue Cross and Blue Shield Association and provide instruction on how the customer can contact the Blue Cross and Blue Shield Association or a designated licensee to obtain further information on securing coverage. The written notification required by this paragraph shall be in writing and in a form approved by the Association. The Association shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

8. DUES

Controlled Affiliate will pay to BCBSA a fee for this license in accordance with the following formula:

▲ An annual fee of five thousand dollars (\$5,000) per license, plus

▲ .05% of gross revenue per year from branded group products, plus

▲ .5% of gross revenue per year from branded individual products plus

▲ .14% of gross revenue per year from branded individual annuity products.

The foregoing percentages shall be reduced by one-half where both a BLUE CROSS® and BLUE SHIELD® license are issued to the same entity. In the event that any License period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Plan will promptly and timely transmit to BCBSA all dues owed by Controlled Affiliate as determined by the above formula and if Plan shall fail to do so, Controlled Affiliate shall pay such dues directly.

Amended as of November 20, 1997

9. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between Plan and Controlled Affiliate or between either and BCBSA.

9A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

10. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

Amended as of June 16, 2005

-4c-

(The next page is page 5)

11. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by a writing executed by all parties.

12. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such finding shall in no way effect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

13. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of the Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

EXHIBIT A
CONTROLLED AFFILIATE LICENSE STANDARDS
LIFE INSURANCE COMPANIES
Page 1 of 2

PREAMBLE

The standards for licensing Life Insurance Companies (Life and Health Insurance companies, as defined by state statute) are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote of all Plans. Each Licensed Plan is required to use a standard controlled affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Life Insurance Company maintains compliance with the license standards.

An organization meeting the following standards shall be eligible for a license to use the Licensed Marks within the service area of its sponsoring Licensed Plan to the extent and the manner authorized under the Controlled Affiliate License applicable to Life Insurance Companies and the principal license to the Plan.

Standard 1 - Organization and Governance

The LIC shall be organized and operated in such a manner that it is controlled by a licensed Plan or Plans which have, directly or indirectly: 1) not less than 51% of the voting control of the LIC; and 2) the legal ability to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the LIC with which it does not concur; and 3) operational control of the LIC.

If the LIC is a mutual company, the Plan or its designee(s) shall have and maintain, in lieu of the requirements of items 1 and 2 above, proxies representing at least 51% of the votes at any policyholder meeting and shall demonstrate that there is no reason to believe such proxies shall be revoked by sufficient policyholders to reduce such percentage below 51%.

Standard 2 - State Licensure

The LIC must maintain unimpaired licensure or certificate of authority to operate under applicable state laws as a life and health insurance company in each state in which the LIC does business.

Standard 3 - Records and Examination

The LIC and its sponsoring licensed Plan(s) shall maintain and furnish, on a timely and accurate basis, such records and reports regarding the LIC as may be required in order to establish compliance with the license agreement.

EXHIBIT A
CONTROLLED AFFILIATE LICENSE STANDARDS
LIFE INSURANCE COMPANIES
Page 2 of 2

LIC and its sponsoring licensed Plan(s) shall permit BCBSA to examine the affairs of the LIC and shall agree that BCBSA's board may submit a written report to the chief executive officer(s) and the board(s) of directors of the sponsoring Plan(s).

Standard 4 - Mediation

The LIC and its sponsoring Plan(s) shall agree to use the then-current BCBSA mediation and mandatory dispute resolution processes, in lieu of a legal action between or among another licensed controlled affiliate, a licensed Plan or BCBSA.

Standard 5 - Financial Responsibility

The LIC shall maintain adequate financial resources to protect its customers and meet its business obligations.

Standard 6 - Cooperation with Affiliate License Performance Response Process Protocol

The LIC and its Sponsoring Plan(s) shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Affiliate License Performance Response Process Protocol (ALPRPP) and in addressing LIC compliance problems identified thereunder.

**CONTROLLED AFFILIATE
TRADEMARK LICENSE AGREEMENT
FOR LIFE AND DISABILITY INSURANCE PRODUCTS**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____, ("Life and Disability Controlled Affiliate") which is a company offering life and disability insurance products owned and controlled by _____, _____, _____ (individually, "Sponsoring Plan" and when referred to collectively, "Sponsoring Plans").

Whereas, BCBSA is the owner of the BLUE CROSS and BLUE SHIELD word and design service marks and any derivatives thereof ("Licensed Marks");

Whereas, each Sponsoring Plan is licensed separately by BCBSA to use one or more of the Licensed Marks in a particular Service Area;

Whereas, the Sponsoring Plans and the Life and Disability Controlled Affiliate desire that the latter be entitled to use the appropriate Licensed Marks in connection with life and disability insurance products in some or all of such Sponsoring Plans' Service Areas and in the Service Areas of other Regular Member Plans, as defined in the BCBSA By-laws, ("Blue Plans") consistent with the terms of this Agreement.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

A. Subject to the terms and conditions of this Agreement, BCBSA hereby grants to the Life and Disability Controlled Affiliate the limited right to use the Licensed Marks in connection with and only in connection with the following life and disability insurance products authorized by state law: (1) Group: Term Life, Long Term Disability, Whole Life, Benefit Life, Universal Life; (2) Individual: Term Life, Whole Life, Dependent Life, Spouse Life; (3) Other: Disability Income, Short Term Disability, Long Term Disability, Income Replacement; and (4) such other life and disability products approved by BCBSA in writing ("Licensed Products") in the Service Areas served by the Sponsoring Plans or in the Service Area or Areas of one or more other licensed Blue Plans, provided that such Blue Plans have consented to such use as authorized by this Agreement. Life and Disability Controlled Affiliate may not use the Licensed Marks in its legal or trade name.

B. Notwithstanding that the license granted to Life and Disability Controlled Affiliate is a license to use all of the Licensed Marks, Life and Disability Controlled Affiliate may only use those of the Licensed Marks in the Service Area of a Sponsoring Plan or other consenting Blue Plan as described below that such Plan is authorized to use as a Blue Plan pursuant to its separate license agreements with BCBSA.

C. Life and Disability Controlled Affiliate may use the Licensed Marks in the Service Areas of Sponsoring Plans or in the Service Area of a Blue Plan that is not a signatory to this Agreement only after such Sponsoring Plan(s) or non-signatory Blue Plan consents to such use by executing a written consent in substantially the same form as the Consent Agreement attached as Exhibit B.

D. The following provisions apply with respect to Consent Agreements once such agreements have been fully and properly executed:

(1) All sales, marketing and advertising materials developed by and proposed for use by Life and Disability Controlled Affiliate in the Service Area of Sponsoring Plan or consenting Blue Plan (hereinafter, such consenting Sponsoring Plan or consenting Blue Plan collectively referred to "Consenting Plan(s)") must clearly identify the Consenting Plan (for example, a statement on such materials that reads "This product is offered with the cooperation of Blue Cross and/or Blue Shield of [Geography]");

(2) To the extent the Consenting Plan has separate divisions or other Affiliates that use the Licensed Marks in distinct geographic areas within its Service Area, consent obtained under this Agreement may be limited to one or more of such specific geographic areas as specified by the Consenting Plan in its signed Consent Agreement. For purposes of this entire Agreement, all references to the Service Area of a Sponsoring Plan, Blue Plan or Consenting Plan may include the entire Service Area or a distinct geographic area within such Service Area as specified in this Section 1 D (2);

(3) Where BCBSA has licensed two or more Blue Plans to use the same Licensed Marks in the same Service Area, in addition to the requirements set forth in Section D (1) above, the sales, marketing and advertising materials referenced in such section above must be communicated to the Consenting Plan's existing and prospective accounts through or with the approval of such Consenting Plan, and the personnel of such Consenting Plan must actively participate in all sales and marketing activities conducted by Life and Disability Controlled Affiliate in the same Service Area, including participating in meetings (whether in-person or via telephone, video or internet conference) with both existing and prospective accounts of the Consenting Plan;

(4) Life and Disability Controlled Affiliate shall be entitled to use in a Service Area only those Licensed Marks that the Consenting Plan has been granted by BCBSA the license to use under its Blue Plan license agreements (for example, if a Consenting Plan is licensed to use only the Blue Cross Marks in its Service Area, the materials used by Life and Disability Controlled Affiliate in that Service Area may only contain or reference the Blue Cross Marks and not the Blue Shield Marks).

(5) If a Consent Agreement is terminated, Life and Disability Controlled Affiliate shall, unless BCBSA and the Consenting Plan agree in their sole discretion to a phase out in writing, immediately (i) cease all use of the Licensed Marks, including in connection with any and all sales and marketing of the Licensed Products in the Service Area where consent has been terminated, and (ii) notify its customers that it is no longer a licensee and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in form approved by BCBSA.

2. QUALITY CONTROL

A. Life and Disability Controlled Affiliate agrees to use the Licensed Marks only in relation to the sale, marketing and administration of the Licensed Products and further agrees to be bound by the conditions regarding quality control shown in Exhibit A and the Guidelines to Administer the Standards for Trademark License Agreement for Life and Disability Insurance Products attached thereto.

B. Life and Disability Controlled Affiliate agrees that BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Life and Disability Controlled Affiliate's rendering of service and use of the Licensed Marks.

C. Life and Disability Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by BCBSA) a report to BCBSA demonstrating Life and Disability Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of Exhibit A.

D. As used herein, a Life and Disability Controlled Affiliate is defined as: An entity organized and operated in such a manner that it is 100% owned and controlled by Sponsoring Plans. Absent written approval by BCBSA of an alternative method of control, control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Life and Disability Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to exercise operational control with respect to the governance

thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Sponsoring Plan or Plans shall own at least 100% of any for profit Life and Disability Controlled Affiliate.

3. SERVICE MARK USE

Life and Disability Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and shall ensure all uses of the Licensed Marks comply with the BCBSA Brand Regulations, as amended by BCBSA from time to time. Life and Disability Controlled Affiliate recognizes and agrees that all use of the Licensed Marks by Life and Disability Controlled Affiliate shall inure to the benefit of BCBSA.

4. SUBLICENSING AND ASSIGNMENT

The license hereby granted to Life and Disability Controlled Affiliate to use the Licensed Marks is and shall be personal to Life and Disability Controlled Affiliate and shall not be assignable by any act of the Life and Disability Controlled Affiliate, directly or indirectly, without the written consent of BCBSA. Said license shall not be assignable by operation of law, nor shall Life and Disability Controlled Affiliate mortgage or part with possession or control of this license or any right hereunder, and the Life and Disability Controlled Affiliate shall have no right to grant any sublicense to use the Licensed Marks.

5. INFRINGEMENTS

Life and Disability Controlled Affiliate shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off which may occur in relation to the Licensed Marks. Life and Disability Controlled Affiliate shall not be entitled to require BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Life and Disability Controlled Affiliate agrees to render to BCBSA, free of charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks by BCBSA. BCBSA shall have sole control of the defense and resolution of any claim of infringement brought or threatened by others.

6. LIABILITY INDEMNIFICATION

Life and Disability Controlled Affiliate hereby agrees to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of Life and Disability Controlled Affiliate's conduct.

7. LICENSE TERM

A. The license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods, unless either BCBSA or Life and Disability Controlled Affiliate notifies the other party in writing of the termination hereof at least sixty (60) days prior to expiration of any license period.

B. This Agreement may be terminated by BCBSA for cause at any time provided that Life and Disability Controlled Affiliate has been given a reasonable opportunity to cure and shall not effect such a cure within thirty (30) days of receiving written notice of the intent to terminate (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period). By way of example and not for purposes of limitation, Life and Disability Controlled Affiliate's failure to abide by the conditions regarding use of the Licensed Marks set forth in Section 1 of this Agreement or the quality control provisions of Section 2 (other than with respect to Section 2 D which is subject to immediate termination as stated in Section 7 C (1) below) shall be considered proper grounds for termination of this Agreement.

C. This Agreement and all of Life and Disability Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

(1) Life and Disability Controlled Affiliate shall no longer comply with Section 2 D (or Standard No. 1 (Organization and Governance) of Exhibit A); or

(2) Any Sponsoring Plan ceases to be authorized to use the Licensed Marks; or

(3) Appropriate fees for Life and Disability Controlled Affiliate pursuant to Section 8 of this Agreement are more than sixty (60) days in arrears to BCBSA.

Upon termination of this Agreement for cause or otherwise, Life and Disability Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks.

In the event of any disagreement between Life and Disability Controlled Affiliate and BCBSA as to whether grounds exist for termination or as to any other term or condition hereof, the decision of BCBSA shall control, subject to provisions for mediation or mandatory dispute resolution in effect between the parties.

Upon termination of this Agreement, Licensed Life and Disability Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of BCBSA and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

8. ROYALTIES

Life and Disability Controlled Affiliate will pay to BCBSA a fee for this license in accordance with the following formula:

- An annual fee of five thousand dollars (\$5,000) per license, plus
- .05% of gross revenue per year from group products sold under the Licensed Marks, plus
- .5% of gross revenue per year from individual products sold under the Licensed Marks

In the event that any license period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Life and Disability Controlled Affiliate will promptly and timely transmit to BCBSA all fees owed by Life and Disability Controlled Affiliate as determined by the above formula.

9. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between any Sponsoring Plan and Life and Disability Controlled Affiliate or between among them and/or BCBSA.

10. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the

Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by: (a) a writing signed by all parties; or (b) a writing approved by the affirmative vote of three-fourths of the Blue Plans and three-fourths of the total then current weighted vote of all the Blue Plans as officially recorded by the BCBSA Corporate Secretary. Upon such adoption by the Blue Plans, this Agreement and all other Trademark License Agreements for Life and Disability Insurance Products then in effect shall simultaneously be amended.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such finding shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of the Life and Disability Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

EXHIBIT A

LICENSE STANDARDS APPLICABLE TO TRADEMARK LICENSE AGREEMENT FOR LIFE AND DISABILITY INSURANCE PRODUCTS

Page 1 of 2

Standard 1 - Organization and Governance

Any Life and Disability Controlled Affiliate licensed under the Trademark License Agreement for Life and Disability Insurance Products ("licensee") shall be organized and operated in such a manner that it is an entity organized and operated in such a manner that it is 100% owned and controlled by Sponsoring Plans. Absent written approval by BCBSA of an alternative method of control, control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Life and Disability Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Sponsoring Plan or Plans shall own at least 100% of any for profit Life and Disability Controlled Affiliate.

Standard 2 - State Licensure

The licensee must maintain unimpaired licensure or certificate of authority to operate under applicable state laws as a life company in each state in which the licensee does business.

Standard 3 - Records and Examination

The licensee shall maintain and furnish, on a timely and accurate basis, such records and reports regarding the licensee as may be required in order to establish compliance with the Agreement. The licensee shall permit BCBSA to examine the affairs of the licensee and shall agree that BCBSA's board may submit a written report to the chief executive officer(s) and the board(s) of directors of the Sponsoring Plan(s).

Standard 4 - Mediation

The licensee, its Sponsoring Plan(s) and all consenting Blue Plans shall agree to use the then-current BCBSA mediation and mandatory dispute resolution processes, in lieu of a legal action between or among another licensed Life and Disability Controlled Affiliate, a Sponsoring Plan and or consenting Blue Plan or BCBSA.

EXHIBIT A
LICENSE STANDARDS APPLICABLE TO TRADEMARK LICENSE
AGREEMENT FOR LIFE AND DISABILITY INSURANCE PRODUCTS
Page 2 of 2

Standard 5 - Financial Responsibility

The licensee shall maintain adequate financial resources to protect its customers and meet its business obligations.

Standard 6 - Cooperation with BCBSA Governance

The licensee shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of and in addressing licensee compliance problems that may be identified in connection with the operation or administration of the Trademark License Agreement for Life and Disability Insurance Products.

EXHIBIT B

CONSENT AGREEMENT

This Consent Agreement is made and entered into by and among the undersigned Blue Plan, and _____ ("Life and Disability Controlled Affiliate"), and the Blue Cross and Blue Shield Association ("BCBSA") and shall be deemed effective on _____ ("Effective Date").

Whereas, BCBSA owns the Blue Cross and Blue Shield word and design service marks and any derivative mark thereof (the "Brands");

Whereas, the undersigned Blue Plan is licensed to use one or more of the Brands within a specific geographic area ("Service Area");

Whereas Life and Disability Controlled Affiliate is licensed by BCBSA to use one or more of the Brands to offer life and disability insurance products ("Products") as defined and authorized in the Trademark License Agreement for Life and Disability Insurance Products ("Life and Disability License Agreement");

Whereas neither the Blue Plan nor its affiliates offer the Products under any of the Brands in such Blue Plan's Service Area or portion thereof where Blue Plan has consented to sale of the Products by Life and Disability Controlled Affiliate; and

Whereas BCBSA and the undersigned Blue Plan desire to consent to Life and Disability Controlled Affiliate's use of the Brands in Blue Plan's Service Area consistent with the terms of the Life and Disability License Agreement and this Consent Agreement.

Now, therefore, in consideration of the obligations and conditions stated in this Agreement, Blue Plan, Life and Disability Controlled Affiliate and BCBSA agree as follows:

1. Life and Disability Controlled Affiliate may market, sell, administer and underwrite the Products in Blue Plan's Service Area under the Brands licensed to Blue Plan in such Service Area subject to the terms of this Consent Agreement, the Life and Disability License Agreement and Blue Plan's license agreement(s) with BCBSA. Life and Disability Controlled Affiliate's rights under the Brands to offer the Products under the Brands are limited to offering the Products only under the Brand(s) licensed to the consenting Blue Plan.
2. Life and Disability Controlled Affiliate shall work with the undersigned Blue Plan to develop a written sales and marketing agreement that identifies the relationship between it and Blue Plan for the sales,

marketing and customer service for the Products. The term of the sales and marketing agreement shall be the same as the term of this Consent Agreement.

3. All sales, marketing and advertising materials developed by and proposed for use by Life and Disability Controlled Affiliate in a consenting Blue Plan's Service Area must clearly identify the consenting Blue Plan (for example, a statement on such materials that reads "This product is offered with the cooperation of Blue Cross and/or Blue Shield of [Geography]");
4. Life and Disability Controlled Affiliate may use the Brands to sell the Products in the following Service Area or portion thereof as designated by Blue Plan:

5. If two or more Blue Plans to use the same Licensed Marks in the same Service Area, Life and Disability Controlled Affiliate shall work with the consenting Blue Plan in the following manner: (a) the sales, marketing and advertising materials must be communicated to the consenting Blue Plan's existing and prospective accounts through or with the approval of such Blue Plan, and (b) the personnel of such Blue Plan must actively participate in all sales and marketing activities conducted by Life and Disability Controlled Affiliate in the same Service Area, including participating in meetings (whether in-person or via telephone, video or internet conference) with both existing and prospective accounts of the consenting Blue Plan;
6. Life and Disability Controlled Affiliate shall be entitled to use in a Service Area only those Licensed Marks that the consenting Blue Plan has been granted by BCBSA the license to use under its license agreement (for example, if a consenting Blue Plan is licensed to use only the Blue Cross Marks in its Service Area, the materials used by Life and Disability Controlled Affiliate in that Service Area may only contain or reference the Blue Cross Marks and not the Blue Shield Marks).
7. If this Consent Agreement is terminated, Life and Disability Controlled Affiliate shall, unless each BCBSA and the Blue Plan agree in their sole discretion to a phase out in writing, immediately (i) cease all use of the Licensed Marks, including in connection with any and all sales and marketing of the Licensed Products in the Service Area where consent has been terminated, and (ii) notify its customers that it is no longer a licensee of BCBSA and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in form approved by BCBSA.

8. The term of this Consent Agreement shall be one year from the Effective Date. Unless either Blue Plan or Life and Disability Controlled Affiliate provides the other party with written notice of its desire not to renew this Consent Agreement at least 60 days prior to expiration of the term or any extended term or unless terminated as provided in Paragraph 9 below, this Consent Agreement shall automatically renew for subsequent one year periods.
9. This Consent Agreement may be terminated as follows:
 - A. Upon mutual written consent of Life and Disability Controlled Affiliate and Blue Plan;
 - B. By Blue Plan or Life and Disability Controlled Affiliate upon 60 days advance written notice to the non-terminating party and BCBSA; or
 - C. By Blue Plan immediately if Life and Disability Controlled Affiliate does not comply with this Consent Agreement or the sales protocol agreement.
10. This Consent Agreement shall automatically terminate if Blue Plan's primary licensee agreement terminates for any reason or if the Life and Disability License Agreement terminates for any reason.

Exhibit 1B
BLUE SHIELD
CONTROLLED AFFILIATE LICENSE AGREEMENT
APPLICABLE TO REGIONAL MEDICARE ADVANTAGE PPO PRODUCTS
(Adopted by Member Plans at their November 21, 2014)

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as _____ ("Controlling Plans"), each of which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, under the Medicare Modernization Act, companies may apply to and be awarded a contract by the Centers for Medicare and Medicaid Services ("CMS") to offer Medicare Advantage PPO products in geographic regions designated by CMS (hereafter "regional MAPPO products").

WHEREAS, some of the CMS-designated regions include the Service Areas, or portions thereof, of more than one Plan.

WHEREAS, the Controlling Plans and Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name") to offer regional MAPPO products in a region that includes the Service Areas, or portions thereof, of more than one Controlling Plan;

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with the sale, marketing and administration of regional MAPPO products and related services.

This grant of rights is non-exclusive and is limited to the following states: _____ (the "Region"). Controlled Affiliate may use the Licensed

Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Region under any name or mark except business conducted in the Service Area of a Controlling Plan provided that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks and Name in connection with health care plans and related services in the Service Area of such Controlling Plan; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by the Controlling Plans or by BCBSA) a report or reports to the Controlling Plans and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that the Controlling Plans and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

(3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:

- (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
- (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
- (c) to exercise control over the policy and operations of the Controlled Affiliate; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

3. SERVICE MARK USE

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within the Region may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Region the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name in connection with the sale, marketing and administration of regional MAPPO products and related services.

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of any Controlling Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENT

Controlled Affiliate shall promptly notify the Controlling Plans and the Controlling Plans shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require the Controlling Plans or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to the Controlling Plans and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate and the Controlling Plans hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to Controlled Affiliate's rendering of services under the Licensed Marks and Name.

7. LICENSE TERM

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) any one of the Controlling Plans ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Shield License Agreement any one of the Controlling Plans ceases to be authorized to use the Licensed Names and Marks in the Region.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Controlling Plans or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Controlling Plans advising of the specific matters at issue and granting the Controlling Plans an opportunity to be heard and to present their response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or (4) failure to comply with any of the applicable requirements of Standards 2, 3, 4, or 5 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking

appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(E); or (6) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans (including the Controlling Plans), any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Controlling Plans shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between or among BCBSA, any of the Controlling Plans and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

- (1) Controlled Affiliate shall no longer comply with item 2(E) above;
- (2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(E)(3)(vii) and (viii) of this Agreement.

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name, except to the extent that it continues to be authorized to use the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers to whom it provides products or services under the Licensed Marks pursuant to this Agreement that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(B) hereof, upon termination of this Agreement the provisions of Paragraph 7(G) shall not apply and the following provisions shall apply, except that, in the event that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks in the Service Area of a Controlling Plan and termination of this Agreement is due to a partial termination of such Controlling Plan's license pursuant to Paragraph 15(a)(x)(ii) of the Blue Shield License Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the Region and the geographic area for which the Controlling Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for payment to BCBSA of an amount equal to \$25 multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any Plan other than a Controlling Plan is permitted by BCBSA to use marks or names licensed by BCBSA in a geographic area in the Region, the payment for Licensed Enrollees in such

geographic area shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans in such geographic area and the denominator of which is the total number of Licensed Enrollees in such geographic area. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Controlling Plans or any other Licensed Controlled Affiliates of the Controlling Plans to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this subparagraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans (including the Controlling Plans) or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Controlling Plans or their other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.K. and any costs associated with reestablishing the terminated Controlling Plan's Service Area or the Region, including any payments made by BCBSA to a Plan or Plans (including the other Controlling Plans), or their Licensed Controlled Affiliates, for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to audit the books and records of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans to verify compliance with this paragraph 7.H.

(5) As to a breach of 7.H.(1), (2), (3) or (4), the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless a Controlling Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of such Controlling Plan's license agreement upon the required 6 month written notice.

J. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

K. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

8. DISPUTE RESOLUTION

The parties agree that any disputes between or among them or between or among any of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Shield and Blue Shield Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of each Controlling Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

9. LICENSE FEE

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit B.

10. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between the Controlling Plans and Controlled Affiliate or between either and BCBSA.

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with

0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

16. HEADINGS

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

EXHIBIT A

**CONTROLLED AFFILIATE LICENSE STANDARDS
APPLICABLE TO REGIONAL MEDICARE
ADVANTAGE PPO PRODUCTS
November 2014**

PREAMBLE

The standards for licensing Controlled Affiliates for Medicare Advantage PPO Products are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote. Each Controlling Plan is required to use a standard Controlled Affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Controlled Affiliate maintains compliance with the license standards.

Standard 1 - Organization and Governance

A Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

- (1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;
- (2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and
- (3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:
 - (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
 - (b) prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
 - (c) exercise control over the policy and operations of the Controlled Affiliate; and

EXHIBIT A (continued)

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

Standard 2 - Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 3 - State Licensure/Certification

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

EXHIBIT A (continued)

Standard 4 - Certain Disclosures

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of:

- a. the structure of the Blue Cross and Blue Shield System; and
- b. the independent nature of every licensee.

Standard 5 - Reports and Records for Controlled Affiliates

A Controlled Affiliate and/or its Controlling Plans shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

Standard 6 - Best Efforts

During each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Shield Marks.

Standard 7 - Participation in Certain National Programs

A Controlled Affiliate shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's service area.

National program requirements include:

- a. Inter-Plan Teleprocessing System (ITS); and
- b. Inter-Plan Medicare Advantage Program.

Standard 8 - Participation in Master Business Associate Agreement

Controlled Affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

Amended as of November 15, 2007

EXHIBIT B

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENTS
APPLICABLE TO REGIONAL MEDICARE ADVANTAGE PPO PRODUCTS**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

An amount equal to its pro rata share of each Controlling Plan dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on regional MAPPO products and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by each Controlling Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

Amended as of June 14, 2007

Exhibit 1C

BLUE SHIELD
CONTROLLED AFFILIATE LICENSE AGREEMENT
APPLICABLE TO REGIONAL MEDICARE PART D PRESCRIPTION DRUG PLAN PRODUCTS
(Adopted by Member Plans at their November 21, 2014)

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as _____ ("Controlling Plans"), each of which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, under the Medicare Modernization Act, companies may apply to and be awarded a contract by the Centers for Medicare and Medicaid Services ("CMS") to offer Medicare Part D Prescription Drug Plan products in geographic regions designated by CMS (hereafter "regional PDP products").

WHEREAS, some of the CMS-designated regions include the Service Areas, or portions thereof, of more than one Plan.

WHEREAS, the Controlling Plans and Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name") to offer regional PDP products in a region that includes the Service Areas, or portions thereof, of more than one Controlling Plan;

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. GRANT OF LICENSE

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with the sale, marketing and administration of regional PDP products and related services.

This grant of rights is non-exclusive and is limited to the following states: _____ (the "Region"). Controlled Affiliate may use the Licensed

Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Region under any name or mark except business conducted in the Service Area of a Controlling Plan provided that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks and Name in connection with health care plans and related services in the Service Area of such Controlling Plan; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

2. QUALITY CONTROL

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by the Controlling Plans or by BCBSA) a report or reports to the Controlling Plans and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that the Controlling Plans and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

- (3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:
- (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
 - (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
 - (c) to exercise control over the policy and operations of the Controlled Affiliate; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

3. SERVICE MARK USE

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within the Region may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Region the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name in connection with the sale, marketing and administration of regional PDP products and related services.

4. SUBLICENSING AND ASSIGNMENT

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of any Controlling Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

5. INFRINGEMENT

Controlled Affiliate shall promptly notify the Controlling Plans and the Controlling Plans shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require the Controlling Plans or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to the Controlling Plans and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

6. LIABILITY INDEMNIFICATION

Controlled Affiliate and the Controlling Plans hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to Controlled Affiliate's rendering of services under the Licensed Marks and Name.

7. LICENSE TERM

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) any one of the Controlling Plans ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Shield License Agreement any one of the Controlling Plans ceases to be authorized to use the Licensed Names and Marks in the Region.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Controlling Plans or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Controlling Plans advising of the specific matters at issue and granting the Controlling Plans an opportunity to be heard and to present their response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this

Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or (4) failure to comply with any of the applicable requirements of Standards 2, 3, 4, or 5 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(E); or (6) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans (including the Controlling Plans), any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Controlling Plans shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between or among BCBSA, any of the Controlling Plans and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

- (1) Controlled Affiliate shall no longer comply with item 2(E) above;
- (2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(E)(3)(vii) and (viii) of this Agreement.

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name, except to the extent that it continues to be authorized to use the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers to whom it provides products or services under the Licensed Marks pursuant to this Agreement that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(B) hereof, upon termination of this Agreement the provisions of Paragraph 7(G) shall not apply and the following provisions shall apply, except that, in the event that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks in the Service Area of a Controlling Plan and termination of this Agreement is due to a partial termination of such Controlling Plan's license pursuant to Paragraph 15(a)(x)(ii) of the Blue Shield License Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the Region and the geographic area for which the Controlling Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for payment to BCBSA of an amount equal to \$25 multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any Plan other than a Controlling Plan is permitted by BCBSA to use marks or names licensed by BCBSA in a geographic area in the Region, the payment for Licensed Enrollees in such

geographic area shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans in such geographic area and the denominator of which is the total number of Licensed Enrollees in such geographic area. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Controlling Plans or any other Licensed Controlled Affiliates of the Controlling Plans to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this subparagraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans (including the Controlling Plans) or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Controlling Plans or their other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.K. and any costs associated with reestablishing the terminated Controlling Plan's Service Area or the Region, including any payments made by BCBSA to a Plan or Plans (including the other Controlling Plans), or their Licensed Controlled Affiliates, for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to audit the books and records of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans to verify compliance with this paragraph 7.H.

(5) As to a breach of 7.H.(1), (2), (3) or (4), the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless a Controlling Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of such Controlling Plan's license agreement upon the required 6 month written notice.

J. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

K. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

8. DISPUTE RESOLUTION

The parties agree that any disputes between or among them or between or among any of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Shield and Blue Shield Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of each Controlling Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

9. LICENSE FEE

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit B.

10. JOINT VENTURE

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between the Controlling Plans and Controlled Affiliate or between either and BCBSA.

11. NOTICES AND CORRESPONDENCE

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

12. COMPLETE AGREEMENT

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

13. SEVERABILITY

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

14. NONWAIVER

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

14A. VOTING

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with

0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-nine (39) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

15. GOVERNING LAW

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

16. HEADINGS

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

EXHIBIT A

**CONTROLLED AFFILIATE LICENSE STANDARDS
APPLICABLE TO REGIONAL MEDICARE
PART D PRESCRIPTION DRUG PLAN PRODUCTS
November 2014**

PREAMBLE

The standards for licensing Controlled Affiliates for Medicare Part D Prescription Drug Plan Products are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote. Each Controlling Plan is required to use a standard Controlled Affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Controlled Affiliate maintains compliance with the license standards.

Standard 1 - Organization and Governance

A Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

- (1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;
- (2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and
- (3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:
 - (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;
 - (b) prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;
 - (c) exercise control over the policy and operations of the Controlled Affiliate; and

EXHIBIT A (continued)

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

- (i) change its legal and/or trade names;
- (ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);
- (iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

Standard 2 - Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 3 - State Licensure/Certification

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

EXHIBIT A (continued)

Standard 4 - Certain Disclosures

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of:

- a. the structure of the Blue Cross and Blue Shield System; and
- b. the independent nature of every licensee.

Standard 5 - Reports and Records for Controlled Affiliates

A Controlled Affiliate and/or its Controlling Plans shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

Standard 6 - Best Efforts

During each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Shield Marks.

Standard 7 - Participation in Master Business Associate Agreement

Controlled Affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

EXHIBIT B

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENTS
APPLICABLE TO REGIONAL MEDICARE PART D PRESCRIPTION DRUG PLAN PRODUCTS**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

An amount equal to its pro rata share of each Controlling Plan dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on regional PDP products and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by each Controlling Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

Amended as of June 14, 2007

EXHIBIT 2

Membership Standards

Page 1 of 5

Preamble

The Membership Standards apply to all organizations seeking to become or to continue as Regular Members of the Blue Cross and Blue Shield Association. Any organization seeking to become a Regular Member must be found to be in substantial compliance with all Membership Standards at the time membership is granted and the organization must be found to be in substantial compliance with all Membership Standards for a period of two (2) years preceding the date of its application. If Membership is sought by an entity which controls or is controlled by one or more Plans, such compliance shall be determined on the basis of compliance by such Plan or Plans.

The Regular Member Plans shall have authority to interpret these Standards.

A Regular Member Plan that operates as a "Shell Holding Company" is defined as an entity that assumes no underwriting risk and has less than 1% of the consolidated enterprise assets (excludes investments in subsidiaries) and less than 5% of the consolidated enterprise net general and administrative expenses.

A Regular Member Plan that operates as a "Hybrid Holding Company" is defined as an entity that assumes no underwriting risk and has either more than 1% of the consolidated enterprise assets (excludes investments in subsidiaries) or more than 5% of the consolidated enterprise net general and administrative expenses.

StandardA Plan shall maintain a governing Board, which shall control the Plan and ensure that the Plan follows appropriate practices of corporate governance. A Plan's Board shall not be controlled by any special interest group, shall make an annual determination that a majority of its directors are independent, and shall act in the best interest of its Corporation and its customers. The Board shall be composed of a majority of persons other than providers of health care services, who shall be known as public members. A public member shall not be an employee of or have a financial interest in a health care provider, nor be a member of a profession which provides health care services.

Amended as of March 15, 2007

EXHIBIT 2

Membership Standards

Page 2 of 5

StandardA Plan shall furnish to the Association on a timely and accurate basis reports and records relating to compliance with these Standards and the License Agreements between the Association and the Plans. Such reports and records are the following:

- A. BCBSA Membership Information Request;
 - B. Biennial trade name and service mark usage material, including disclosure material under Standard 7;
 - C. Changes in the governance of the Plan, including changes in a Plan's Charter, Articles of Incorporation, or Bylaws, changes in a Plan's Board composition, or changes in the identity of the Plan's Principal Officers;
 - D. Quarterly Financial Report, Semi-annual "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC, Annual Budget, Annual Certified Audit Report, Insurance Department Examination Report, Annual Statement filed with State Insurance Department (with all attachments), Plan, Subsidiary and Affiliate Report; and
- Plans that are a Shell Holding Company as defined in the Preamble hereto are required to furnish only a calendar year-end "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC.

Amended as of November 17, 2011

EXHIBIT 2

Membership Standards

Page 3 of 5

E. Quarterly Enrollment Report, Quarterly Member Touchpoint Measures Index (MTM) through 12/31/2011, and Semi-annual MTM Index starting 1/1/2012 and thereafter.

•For purposes of MTM reporting only, a Plan shall file a separate MTM report for each Geographic Market.

Standard A Plan shall be operated in a manner that provides reasonable financial assurance that it can fulfill its contractual obligations to its customers.

Standard 4:A Plan shall be operated in a manner responsive to customer needs and requirements.

StandardA Plan shall effectively and efficiently participate in each national program as from time to time may be adopted by the Member Plans for the purposes of providing portability of membership between the Plans and ease of claims processing for customers receiving benefits outside of the Plan's Service Area.

Such programs are applicable to Blue Cross and Blue Shield Plans, and include:

- A. Inter-Plan Teleprocessing System (ITS);
- B. BlueCard Program;
- C. National Account Programs;
- D. Business Associate Agreement for Blue Cross and Blue Shield Licensees, effective April 14, 2003; and
- E. Inter-Plan Medicare Advantage Program.

Amended as of November 21, 2014

EXHIBIT 2

Membership Standards

Page 4 of 5

StandardIn addition to requirements under the national programs listed in Standard 5: Participation in National Programs, a Plan
6: shall take such action as required to ensure its financial performance in programs and contracts of an inter-Plan nature or where the Association is a party.

StandardA Plan shall make adequate disclosure in contracting with third parties and in disseminating public statements of (i) the
7: structure of the Blue Cross and Blue Shield System, (ii) the independent nature of every Plan, and (iii) the Plan's financial condition.

StandardA Plan shall cooperate with the Association's Board of Directors and its Brand Enhancement & Protection Committee in
8: the administration of the Plan Performance Response Process and in addressing Plan performance problems identified thereunder.

StandardA Plan shall obtain a rating of its financial strength from an independent rating agency approved by the Association's
9: Board of Directors for such purpose.

StandardNotwithstanding any other provision in this License Agreement, during each year, a Plan and its Controlled Affiliate(s)
10: engaged in providing licensable services (excluding Life Insurance and Charitable Foundation Services) shall use their best efforts to promote and build the value of the Blue Shield Marks.

StandardNeither a Plan nor any Larger Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled
11: Affiliate thereof to obtain control of the Plan or Larger Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services.

Amended as of June 16, 2005

EXHIBIT 2

Membership Standards

Page 5 of 5

StandardNo provider network, or portion thereof, shall be rented or otherwise made available to a National Competitor if the
12: Licensed Marks or Names are used in any way with such network.

A provider network may be rented or otherwise made available, provided there is no
use of the Licensed Marks or Names with respect to the network being rented.

Amended as of March 18, 2004

EXHIBIT 3

**GUIDELINES WITH RESPECT TO USE OF
LICENSED NAME AND MARKS IN CONNECTION WITH NATIONAL ACCOUNTS**

Page 1 of 3

1. The strength of the Blue Cross/Blue Shield National Accounts mechanism, and the continued provision of cost effective, quality health care benefits to National Accounts, are predicated on locally managed provider networks coordinated on a national scale in a manner consistent with effective service to National Account customers and consistent with the preservation of the integrity of the Blue Cross/Blue Shield system and the Licensed Marks. These guidelines shall be interpreted in keeping with such ends.
2. A National Account is an entity with employee and/or retiree locations in more than one Plan's Service Area. Unless otherwise agreed, a National Account is deemed located in the Service Area in which the corporate headquarters of the National Account is located. A local plant, office or division headquarters of an entity may be deemed a separate National Account when that local plant, office or division headquarters 1) has employee locations in more than one Service Area, and 2) has independent health benefit decision-making authority for the employees working at such local plant, office or division headquarters and for employees working at other locations outside the Service Area. In such a case, the local plant, office or division headquarters is a National Account that is deemed located in the Service Area in which such local plant, office or division headquarters is located. The Control Plan of a National Account is the Plan in whose Service Area the National Account is located. A participating ("Par") Plan is a Plan in whose Service Area the National Account has employee and/or retiree locations, but in which the National Account is not located. In the event that a National Account parent company consolidates health benefit-decision making for itself and its wholly-owned subsidiary companies, the parent company and the subsidiary companies shall be considered one National Account. The Control Plan for such a National Account shall be the Plan in whose Service Area the parent company headquarters is located.
3. The National Account Guidelines enunciated herein below shall be applicable only with respect to the business of new National Accounts acquired after January 1, 1991.
4. Control Plans shall utilize National Account identification cards complying with then currently effective BCBSA graphic standards in connection with all National Accounts business to facilitate administration thereof, to minimize subscriber and provider confusion, and to reflect a commitment to cooperation among Plans.

Amended as of June 12, 2003

Exhibit 3

Page 2 of 3

5. Disputes among Plans and/or BCBSA as to the interpretation or implementation of these Guidelines or as to other National Accounts issues shall be submitted to mediation and mandatory dispute resolution as provided in the License Agreement. For two years from the effective date of the License Agreement, however, such disputes shall be subject to mediation only, with the results of such mediation to be collected and reported in order to establish more definitive operating parameters for National Accounts business and to serve as ground rules for future binding dispute resolution.

6. The Control Plan may use the BlueCard Program (as defined by IPPC) to deliver benefits to employees and non-Medicare eligible retirees in a Participating Plan's service area if an alternative arrangement with the Participating Plan cannot be negotiated. The Participating Plan's minimum servicing requirement for those employees and non-Medicare retirees in its service area is to deliver benefits using the BlueCard Program. Account delivery is subject to the policies, provisions and procedures of the BlueCard Program.

7. For provider payments in a Participating Plan's area (on non-BlueCard claims), payment to the provider may be made by the Participating Plan or the Control Plan at the Participating Plan's option. If the Participating Plan elects to pay the provider, it may not withhold payment of a claim verified by the Control Plan or its designated processor, and payment must be in conformity with service criteria established by the Board of Directors of BCBSA (or an authorized committee thereof) to assure prompt payment, good service and minimum confusion with providers and subscribers. The Control Plan, at the Participating Plan's request, will also assure that measures are taken to protect the confidentiality of the data pertaining to provider reimbursement levels and profiles.

Amended as of June 14, 1996

Exhibit 3

Page 3 of 3

8. The Control Plan, in its financial agreements with a National Account, is expected to reasonably reflect the aggregate amount of differentials passed along to the Control Plan by all Participating Plans in a National Account.
9. Other than in contracting with health care providers or soliciting such contracts in areas contiguous to a Plan's Service Area in order to serve its subscribers or those of its licensed Controlled Affiliate residing or working in its Service Area, a Control Plan may not use the Licensed Marks and/or Name, as a tag line or otherwise, to negotiate directly with providers outside its Service Area.

Amended as of March 13, 2003

EXHIBIT 4

GOVERNMENT PROGRAMS AND CERTAIN OTHER USES

Page 1 of 14

1. A Plan and its licensed Controlled Affiliate may use the Licensed Marks and Name in bidding on and executing a contract to serve a Government Program, and in thereafter communicating with the Government concerning the Program. With respect, however, to such contracts entered into after the 1st day of January, 1991, the Licensed Marks and Name will not be used in communications or transactions with beneficiaries or providers in the Government Program located outside a Plan's Service Area, unless the Plan can demonstrate to the satisfaction of BCBSA's governing body that such a restriction on use of the Licensed Marks and Name will jeopardize its ability to procure the contract for the Government Program. As to both existing and future contracts for Government Programs, Plans will discontinue use of the Licensed Marks and Name as to beneficiaries and Providers outside their Service Area as expeditiously as circumstances reasonably permit. Effective January 1, 1995, except as provided in the first sentence above, all use by a Plan of the Licensed Marks and Name in Government Programs outside of the Plan's Service Area shall be discontinued. Incidental communications outside a Plan's Service Area with resident or former resident beneficiaries of the Plan, and other categories of necessary incidental communications approved by BCBSA, are not prohibited. For purposes of this Paragraph 1, the term "Government Programs" shall mean Medicare Part A, Medicare Part B and other non-risk government programs.
2. In connection with activity otherwise in furtherance of the License Agreement, a Plan and its Controlled Affiliates that are licensed to use the Licensed Marks and Name in its Service Area pursuant to the Controlled Affiliate License Agreements authorized in clauses a) through c) of Paragraph 2 of the Plan's License Agreement with BCBSA may use the Licensed Marks and Name outside the Plan's Service Area in the following circumstances which are deemed legitimate and necessary and not likely to cause consumer confusion:
 - 2.1 Common Business Communications
 - a. sending letterhead, envelopes, and similar items solely for administrative purposes (e.g., not for purposes of marketing, advertising, promoting, selling or soliciting the sale of health care plans and related services);
 - b. distributing business cards other than in marketing and selling;
 - c. advertising in publications or electronic media solely to persons for employment;

Amended as of June 19, 2014

EXHIBIT 4

Page 2 of 14

2.2 Marketing Spillover

a. advertising in print, electronic or other media which serve, as a substantial market, the Service Area of the Plan or licensed Controlled Affiliate, provided that no Plan or Controlled Affiliate may advertise outside its Service Area on the national broadcast and cable networks and that advertisements in national print media are limited to the smallest regional edition encompassing the Service Area;

b. advertising by direct mail where the addressee's zip code plus 4 includes, at least in part, the Plan's Service Area or that of a licensed Controlled Affiliate;

2.3 Provider Contracting

a. contracting with health care providers or soliciting such contracts in areas contiguous to the Plan's Service Area in order to serve its subscribers or those of such licensed Controlled Affiliates residing or working in its service area;

b. issuing a small sign containing the legal name or trade name of the Plan or such licensed Controlled Affiliates for display by a provider to identify the latter as a participating provider of the Plan or Controlled Affiliate;

c. negotiating rates with a health care provider for services to a specific member, provided that all of the following conditions are met:

(1) the health care provider does not have a contract, applicable to the services rendered or to be rendered, with the Licensee (or any of the Licensees in the case of overlapping Service Areas) in whose Service Area the health care provider is located; and

(2) the Plan or Controlled Affiliate reasonably determines that the member did/does not have a reasonable opportunity to access a participating provider whose contract applies to the services rendered or to be rendered; and

(3) at least one of the following circumstances exists:

Amended as of June 19, 2014

EXHIBIT 4

Page 3 of 14

- (i) the member received emergency services and the Plan or Controlled Affiliate knows or reasonably anticipates that the charges on the claim will meet or exceed \$5,000; or
 - (ii) a provider, in consultation pre- or post- treatment with the Plan or Controlled Affiliate, makes/made a treatment recommendation or referral to a non-par provider or to a par provider whose contract does not apply to the services to be rendered; or
 - (iii) the member inadvertently accessed a non-par provider or non-contracted services in the course of receiving services from a par provider (e.g., the member sees a non-par consulting specialist in a participating hospital); and
 - (4) the Licensee (and in the case of overlapping Service Areas, all of the Licensees) in whose Service Area the health care provider is located consent(s) in advance.
- d. contracting with a pharmacy management organization ("Pharmacy Intermediary") to gain access to a national or regional pharmacy network to provide self-administered prescription drugs to deliver a pharmacy benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Pharmacy Intermediary may not use the Licensed Marks or Name in contracting with the pharmacy providers in such network;

Amended as of June 19, 2014

EXHIBIT 4

Page 4 of 14

- e. contracting with the corporate owner of a national or regional retail pharmacy chain to gain access to the pharmacies in the chain to provide self-administered prescription drugs to deliver a pharmacy benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided that (1) the Plan and the Controlled Affiliate may not contract directly with pharmacists or pharmacy stores outside the Plan's Service Area, and (2) neither the Plan's or the Controlled Affiliate's name nor the Licensed Marks or Name may be posted or otherwise displayed at or by any pharmacy store outside the Plan's Service Area;
 - f. contracting with a dental management organization ("Dental Intermediary") to gain access to a national or regional dental network to deliver a routine dental benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Dental Intermediary may not use the Licensed Marks or Name in contracting with the dental providers in such network;
 - g. contracting with a vision management organization ("Vision Intermediary") to gain access to a national or regional vision network to deliver a routine vision benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Vision Intermediary may not use the Licensed Marks or Name in contracting with the vision providers in such network;
 - h. contracting with an independent clinical laboratory for analysis and clinical assessment of specimens that are collected within the Plan's Service Area;
 - i. contracting with a durable medical equipment or home medical equipment company for durable medical equipment and supplies and home medical equipment and supplies that are shipped to a location within the Plan's Service Area;
 - j. contracting with a specialty pharmaceutical company for non-routine biological therapeutics that are ordered by a health care professional located within the Plan's Service Area;
-

EXHIBIT 4

Page 5 of 14

- k. contracting with a company that operates provider sites in the Plan's Service Area, provided that the contract is solely for services rendered at a site (e.g., hospital, mobile van) that is within the Plan's Service Area;
 - l. contracting with a company that makes health care professionals available in the Plan's Service Area (e.g., traveling home health nurse), provided that the contract is solely for services rendered by health care professionals who are located within the Plan's Service Area.
- 2.4 Services to National Accounts
- a. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee (as those terms are defined in the Inter-Plan Programs Policies and Provisions ("IP Policies")) to offer Blue-branded Health Coverage to the National Account, offering Blue-branded Health and Wellness Programs to all members of the National Account, including members who have not enrolled in the Blue-branded Health Coverage ("non-Blue Health Coverage members"), provided that:
 - (i) the Plan and/or licensed Controlled Affiliate has no contact or interaction with providers outside of the Plan's Service Area regarding such non-Blue Health Coverage members, except as specifically provided in the IP Policies; and
 - (ii) if in accordance with IP Policies another Licensee is soliciting or servicing under the Brands a local plant, office or division of the account that is outside of the Plan's Service Area, the Plan and/or licensed Controlled Affiliate may not offer Blue-branded Health and Wellness Programs to any employees working at such local plant, office or division without the consent of such other Licensee; and
 - (iii) if the Plan and/or licensed Controlled Affiliate provides an information card to the non-Blue Health Coverage members, the card may not display the Symbols in the masthead, must contain a prominent disclosure conveying that it is not a health insurance card, and otherwise must be designed so that it is dissimilar to a Blue member identification card.

Amended as of June 19, 2014

EXHIBIT 4

Page 6 of 14

For purposes of this subparagraph a, the following definitions apply:

“Health and Wellness Program” shall mean a program that includes at least one of the following elements or a related element:

- Health Risk Assessment and/or Preventive Screenings
- Exercise and Fitness Programs
- Health and Wellness Events (e.g., attendance at a health fair, a 5K walk)
- Nutrition and Weight Management
- Health Education (e.g., smoking cessation classes)
- Prenatal and Parenting Education
- Disease or Chronic Condition Management

The above listing is intended to represent examples of the types of programs that may be offered, and other programs, including those offered through different media such as the internet or telephonically, may also be deemed Health and Wellness programs.

“Health Coverage” shall mean providing or administering medical, surgical, hospital, major medical, or catastrophic coverage, or any HMO, PPO, POS or other managed care plan for the foregoing services.

Amended as of June 19, 2014

EXHIBIT 4

Page 7 of 14

2.4 Services to National Accounts (continued)

- b. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee to offer Blue-branded Health Coverage to the National Account, performing the Eligibility and Enrollment functions of HR administration for all benefit plans offered by the National Account to its members, including benefit plans that are not underwritten or administered by the Plan, provided that:
 - (i) in performing such functions, the Plan and/or licensed Controlled Affiliate does not use the Brands in any communications with health care providers outside of the Plan's Service Area, and otherwise limits its use of the Brands outside of the Service Area to communications with the account's members, the other benefit plan providers with which the account has contracted and other reasonably necessary communications to perform such functions; and
 - (ii) if in accordance with IP Policies another Licensee is soliciting or servicing under the Brands a local plant, office or division of the account that is outside of the Plan's Service Area, the Plan and/or licensed Controlled Affiliate may not perform Eligibility and Enrollment functions for employees working at such local plant, office or division without the consent of such other Licensee;

For purposes of this subparagraph b, the following definitions apply:

"Health Coverage" has the meaning set forth in subparagraph 2.4.a.

Amended as of June 19, 2014

EXHIBIT 4

Page 8 of 14

“Eligibility” means services that manage the account’s eligibility data and determine or process determinations relating to eligibility for benefit plans offered by the account to its employees, including such services as:

- monitoring and auditing data to ensure that only entitled individuals are enrolled in each such benefit plan;
- review of eligibility documentation (e.g. marriage licenses, birth certificates, student status verification letters, employment records);
- identification of key member segments such as over-age dependents, part-time employees, employees reaching certain milestones (e.g. Medicare-eligible, retirees);
- termination of coverage for those individuals found to be ineligible for coverage under a benefit plan, and, if applicable, generation of a COBRA event; and
- management of “hour-banking” for union environments in which union members can bank hours to remain eligible for benefits.

“Enrollment” means services that enroll eligible individuals and their spouses/dependents or terminate or change their enrollment in the account’s benefit plans on an ongoing basis and during open enrollment periods, including such services as:

- the coordination of each step in open enrollment process from project planning and system set-up to the generation of confirmation statements;
- ongoing enrollment support for new hires and changes due to life events and work status adjustments;
- evidence of insurability (EOI) administration for life and disability coverage;
- transmission of eligibility/enrollment information to the account’s benefit plan providers;
- review and reconciliation of error reports received from the account’s benefit plan providers; and
- transmission of information to the account’s payroll system (e.g., benefit deductions, employee demographic data).

Amended as of November 18, 2010

EXHIBIT 4

Page 9 of 14

2.5 Knowledge Sharing

- a. submitting scholarly articles authored or co-authored by the Plan or Controlled Affiliate or its respective employees for publication in peer-reviewed journals;
- b. permitting an internal representative of the Plan or Controlled Affiliate (e.g., officer, employee) to speak or present at a conference or symposium for which the event sponsor will issue communications that will identify the Plan's or Controlled Affiliate's representative as a participant, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;

2.6 Other Uses

- a. entering into a license agreement between and among BCBSA, the Plan and a debit card issuer located outside the Plan's Service Area, and entering into a corresponding operating agreement or agreements, in order to offer a debit card bearing the Licensed Marks and Name to eligible persons as defined by the aforementioned license agreement;
- b. appearing in communications issued by an independent third party to recognize outstanding performance of the Plan or Controlled Affiliate or a member of the Plan's or Controlled Affiliate's senior management as part of an established program of the third party for which the Plan has provided information to be considered for the recognition, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;
- c. to identify itself as being a joint sponsor of an event, program or activity along with other Plans or such Plans' licensed Controlled Affiliates, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;
- d. hosting meetings or events in Washington, D.C. related to policy and business issues in the Plan's Service Area, or hosting events in conjunction with the assemblies or conventions of national political parties, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;

Amended as of June 19, 2014

EXHIBIT 4

Page 10 of 14

- e. permitting an affiliate that is not licensed to use the Licensed Marks to identify its corporate relationship with the Plan, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time.

3. In connection with activity otherwise in furtherance of the License Agreement, a Controlled Affiliate that is licensed to use the Licensed Marks and Name pursuant to a Controlled Affiliate License Agreement authorized in clauses d) or e) of Paragraph 2 of the Plan's License Agreement with BCBSA may use the Licensed Marks and Name outside the Region (as that term is defined in such respective Controlled Affiliate License Agreements) in the following circumstances which are deemed legitimate and necessary and not likely to cause consumer confusion:

- a. sending letterhead, envelopes, and similar items solely for administrative purposes (e.g., not for purposes of marketing, advertising, promoting, selling or soliciting the sale of health care plans and related services);
- b. distributing business cards other than in marketing and selling;
- c. contracting with health care providers or soliciting such contracts in areas contiguous to the Region in order to serve its subscribers residing in the Region, provided that the Controlled Affiliate may not use the names of any of its Controlling Plans in connection with such contracting unless the provider is located in a geographic area that is also contiguous to such Controlling Plan's Service Area;
- d. issuing a small sign containing the legal name or trade name of the Controlled Affiliate for display by a provider to identify the latter as a participating provider of the Controlled Affiliate, provided that the Controlled Affiliate may not use the names of any of its Controlling Plans on such signs unless the provider is located in a geographic area that is also contiguous to such Controlling Plan's Service Area;
- e. advertising in publications or electronic media solely to persons for employment;

Amended as of June 19, 2014

EXHIBIT 4

Page 11 of 14

- f. advertising in print, electronic or other media which serve, as a substantial market, the Region, provided that the Controlled Affiliate may not advertise outside its Region on the national broadcast and cable networks and that advertisements in national print media are limited to the smallest regional edition encompassing the Region, and provided further that any such advertising by the Controlled Affiliate may not reference the name of any of its Controlling Plans unless the respective Controlling Plan is authorized under paragraph 2 of this Exhibit 4 to advertise in such media;
- g. advertising by direct mail where the addressee's zip code plus 4 includes, at least in part, the Region, provided that such advertising by the Controlled Affiliate may not reference the name of any of its Controlling Plans unless the respective Controlling Plan is authorized under paragraph 2 of this Exhibit 4 to send direct mail to such zip code plus 4.
- h. [Intentionally left blank, pending review by the Inter-Plan Programs Committee of the applicability of the case management rule to such Controlled Affiliates.]
- i. contracting with a pharmacy management organization ("Pharmacy Intermediary") to gain access to a national or regional pharmacy network to provide self-administered prescription drugs to deliver a pharmacy benefit for the Controlled Affiliate's regional Medicare Advantage PPO or regional Medicare Part D Prescription Drug members enrolled under the Licensed Marks pursuant to such respective Controlled Affiliate License Agreements, provided, however, that the Pharmacy Intermediary may not use the Licensed Marks or Name in contracting with the pharmacy providers in such network;
- j. contracting with the corporate owner of a national or regional retail pharmacy chain to gain access to the pharmacies in the chain to provide self-administered prescription drugs to deliver a pharmacy benefit to the Controlled Affiliate's regional Medicare Advantage PPO
or regional Medicare Part D Prescription Drug members enrolled under the Licensed Marks pursuant to such respective
-

EXHIBIT 4

Page 12 of 14

Controlled Affiliate License Agreements, provided that (1) the Controlled Affiliate may not contract directly with pharmacists or pharmacy stores outside the Region, and (2) neither the Controlled Affiliate's name nor the Licensed Marks or Name may be posted or otherwise displayed at or by any pharmacy store outside the Region;

k. contracting with a dental management organization ("Dental Intermediary") to gain access to a national or regional dental network to deliver a routine dental benefit for the Controlled Affiliate's regional Medicare Advantage PPO members enrolled under the Licensed Marks pursuant to such Controlled Affiliate License Agreement, provided, however, that the Dental Intermediary may not use the Licensed Marks or Name in contracting with the dental providers in such network;

l. contracting with a vision management organization ("Vision Intermediary") to gain access to a national or regional vision network to deliver a routine vision benefit for the Controlled Affiliate's regional Medicare Advantage members enrolled under the Licensed Marks pursuant to such Controlled Affiliate License Agreement, provided, however, that the Vision Intermediary may not use the Licensed Marks or Name in contracting with the vision providers in such network;

m. contracting with an independent clinical laboratory for analysis and clinical assessment of specimens that are collected within the Controlled Affiliate's Region;

n. contracting with a durable medical equipment or home medical equipment company for durable medical equipment and supplies and home medical equipment and supplies that are shipped to a location within the Controlled Affiliate's Region;

o. contracting with a specialty pharmaceutical company for non-routine biological therapeutics that are ordered by a health care professional located within the Region;

EXHIBIT 4

Page 13 of 14

- p. contracting with a company that operates provider sites in the Region, provided that the contract is solely for services rendered at a site (e.g., hospital, mobile van) that is within the Region;
 - q. contracting with a company that makes health care professionals available in the Region (e.g., traveling home health nurse), provided that the contract is solely for services rendered by health care professionals who are located within the Region.
4. BCBSA shall retain the right to use the Licensed Marks in conjunction with the Federal Employee Program and with any other national offering made to federal employees pursuant to the Federal Employees Health Benefits Program (FEHBP), including the right to license such use to its vendors, but only in the following manner.
- a. the Licensed Marks may only be used by BCBSA with the term "Federal Employee Program", "Federal", "FEP", or similar language identifying the program as a benefit program for federal employees;
 - b. the Licensed Marks may not be used by BCBSA with the name(s) of a specific Plan or Plans and;
 - c. any use by BCBSA in conjunction with a new national FEHBP program proposed after the enactment of this amendment will require the approval of the BCBSA Board of Directors.

Amended as of March 16, 2006

EXHIBIT 4

Page 14 of 14

5. Where required by applicable state or local law or regulation, a Plan or its licensed Controlled Affiliate may submit documents that contain the Brands to, and file forms that contain the Brands with, state or local regulators in a state not included in its Service Area, provided that it gives reasonable advance notice to the local Plan of its intent to submit such documents or file such forms. Notwithstanding, in no event may a Plan or its licensed Controlled Affiliate use the Brands to register, or to obtain or maintain a license, a certificate of authority, or an equivalent document authorizing it to act as a risk-bearing entity or third party administrator in a state not included in its Service Area. If the local Plan advises BCBSA that it believes its License Agreement has been or would be violated by any submission or filing, BCBSA shall determine whether such submission or filing is required by state or local law or regulation and violates the License Agreement, subject to the Plan's or licensed Controlled Affiliate's rights to obtain an independent review of such determination under Paragraph 9(a) and Exhibit 5 of its License Agreement or Paragraph 8 of the Controlled Affiliate License. For purposes of this paragraph, "local Plan" is defined as each Plan whose Service Area includes all or part of the state in which the foregoing applicable state or local law or regulation has been enacted.

Amended as of November 18, 2010

EXHIBIT 5

Page 1 of 23

MEDIATION AND MANDATORY DISPUTE RESOLUTION (MMDR) RULES

The Blue Cross and Blue Shield Plans ("Plans") and the Blue Cross Blue Shield Association ("BCBSA") recognize and acknowledge that the Blue Cross and Blue Shield system is a unique nonprofit and for-profit system offering cost effective health care financing and services. The Plans and BCBSA desire to utilize Mediation and Mandatory Dispute Resolution ("MMDR") to avoid expensive and time-consuming litigation that may otherwise occur in the federal and state judicial systems. Even MMDR should be viewed, however, as methods of last resort, all other procedures for dispute resolution having failed. Except as otherwise provided in the License Agreements, the Plans, their Controlled Affiliates and BCBSA agree to submit all disputes to MMDR pursuant to these Rules and in lieu of litigation.

1. Initiation of Proceedings

A. Pre-MMDR Efforts

Before filing a Complaint to invoke the MMDR process, the CEO of a complaining party, or his/her designated representative, shall undertake good faith efforts with the other side(s) to try to resolve any dispute.

B. Complaint

To commence a proceeding, the complaining party (or parties) shall provide by certified mail, return receipt requested, a written Complaint to the BCBSA Corporate Secretary (which shall also constitute service on BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) named therein. The Complaint shall contain:

- i. identification of the complaining party (or parties) requesting the proceeding;
- ii. identification of the respondent(s);
- iii. identification of any other persons or entities who are interested in a resolution of the dispute;
- iv. a full statement describing the nature of the dispute;
- v. identification of all of the issues that are being submitted for resolution;

Amended as of November 21, 1996

EXHIBIT 5

Page 2 of 23

- vi. the remedy sought;
- vii. a statement as to whether the complaining party (or parties) elect(s) first to pursue Mediation;
- viii. any request, if applicable, that the matter be handled on an expedited basis and the reasons therefor; and
- ix. a statement signed by the CEO of the complaining party affirming that the CEO has undertaken efforts, or has directed efforts to be undertaken, to resolve the dispute before resorting to the MMDR process.

The complaining party (or parties) shall file and serve with the Complaint copies of all documents which the party (or parties) intend(s) to offer at the Arbitration Hearing and a statement identifying the witnesses the party (or parties) intend(s) to present at the Hearing, along with a summary of each witness' expected testimony.

C. Answer

Within twenty (20) days after receipt of the Complaint, each respondent shall serve on BCBSA and on the complaining party (or parties):

- i. a full Answer to the aforesaid Complaint;
- ii. a statement of any Counterclaims against the complaining party (or parties), providing with respect thereto the information specified in Paragraph 1.B., above;
- iii. a statement as to whether the respondent elects to first pursue Mediation; and
- iv. any request, if applicable, that the matter be handled on an expedited basis and the reasons therefor.

The respondent(s) shall file and serve with the Answer or by the date of the Initial Conference set forth in Paragraph 3.C., below, copies of all documents which the respondent(s) intend(s) to offer at the Arbitration Hearing and a statement identifying the witnesses the party (or parties) intend(s) to present at the Hearing, along with a summary of each witness' expected testimony.

Amended as of September 20, 2007

EXHIBIT 5

Page 3 of 23

D. Reply To Counterclaim

Within ten (10) days after receipt of any Counterclaim, the complaining party (or parties) shall serve on BCBSA and on the responding party (or parties) a Reply to the Counterclaim. Such Reply must provide the same information required by Paragraph 1.C., above.

2. Mediation

To facilitate the mediation of disputes between or among BCBSA, the Plans and/or their Controlled Affiliates, the BCBSA Board has provided for Mediation under these Rules. Mediation may be pursued in lieu of or in an effort to obviate the Mandatory Dispute Resolution process, and all parties are strongly urged, but not required, to exhaust the mediation procedure provided for herein. In the event any party refuses to proceed with Mediation, the parties shall proceed immediately to Mandatory Dispute Resolution, as provided in Section 3.

A. Selection of Mediators

If all parties agree to pursue Mediation, they shall promptly attempt to agree upon: (i) the number of mediators desired, not to exceed three mediators; and (ii) the selection of experienced mediator(s) from an independent entity to mediate all disputes set forth in the Complaint and Answer (and Counterclaim and Reply, if any). In the event the parties are unable to agree upon the selection or number of mediators, both within five (5) days of the service of the Answer or Reply to Counterclaim, whichever is later, the BCBSA Corporate Secretary shall immediately refer the matter to a nationally recognized professional ADR organization (such as CPR or JAMS) for mediation by a single mediator to be selected by the ADR organization.

B. Binding Decision

Before the Mediation Hearing described below, the BCBSA Corporate Secretary shall contact the parties to determine whether they wish to be bound by any recommendation of the selected mediator(s) for resolution of the disputes. If all wish to be bound, the Corporate Secretary will send appropriate documentation to them for their signatures before the Mediation Hearing begins.

Amended as of September 20, 2007

EXHIBIT 5

Page 4 of 23

C. Mediation Procedure

The Mediator(s) shall apply the mediation procedures and processes provided for herein (not the rules of the ADR organization with which they are affiliated) and shall promptly advise the parties of a scheduled Mediation Hearing date. Unless a party requests an expedited procedure, or unless all parties to the proceeding agree to one or more extensions of time, the Mediation Hearing set forth below shall be completed within forty (40) days of BCBSA's receipt of the Complaint. The selected mediator(s), unless the parties otherwise agree, shall adhere to the following procedure:

- i. Each party must be represented by its CEO or other representative who has been delegated full authority to resolve the dispute. However, parties may send additional representatives as they see fit.
- ii. Each party will be given one-half hour to present its case, beginning with the complaining party (or parties), followed by the other party or parties. The parties are free to structure their presentations as they see fit, using oral statements or direct examination of witnesses. However, neither cross-examination nor questioning of opposing representatives will be permitted. At the close of each presentation, the selected mediator(s) will be given an opportunity to ask questions of the presenters and witnesses. All parties must be present throughout the Mediation Hearing. The selected mediator(s) may extend the time allowed for each party's presentation at the Mediation Hearing. The selected mediator(s) may meet in executive session, outside the presence of the parties, or may meet with the parties separately, to discuss the controversy.
- iii. After the close of the presentations, the parties will attempt to negotiate a settlement of the dispute. If the parties desire, the selected mediators, or any one or more of the selected mediator(s), will sit in on the negotiations.

Amended as of September 20, 2007

EXHIBIT 5

Page 5 of 23

- iv. After the close of the presentations, the selected mediator(s) may meet privately to agree upon a recommendation for resolution of the dispute which would be submitted to the parties for their consideration and approval. If the parties have previously agreed to be bound by the results of this procedure, this recommendation shall be binding upon the parties.
- v. The purpose of the Mediation Hearing is to assist the parties to settle their grievances short of mandatory dispute resolution. As a result, the Mediation Hearing has been designed to be as informal as possible. Rules of evidence shall not apply. There will be no transcript of the proceedings, and no party may make a tape recording of the Mediation Hearing.
- vi. In order to facilitate a free and open discussion, the Mediation proceeding shall remain confidential. A "Stipulation to Confidentiality" which prohibits future use of settlement offers, all position papers or other statements furnished to the selected mediator(s), and decisions or recommendations in any Mediation proceeding shall be executed by each party.
- vii. Upon request of the selected mediator(s), or one of the parties, BCBSA staff may also submit documentation at any time during the proceedings.

D. Notice of Termination of Mediation

If the Mediation cannot be completed within the prescribed or agreed time period due to the lack of cooperation of any party, as determined by the selected mediator(s), or if the Mediation does not result in a final resolution of all disputes at the Mediation Hearing or within ten (10) days after the Mediation Hearing, any party or any one of the selected mediator(s) shall so notify the BCBSA Corporate Secretary, who shall promptly issue a Notice of Termination of Mediation to all parties, to the selected mediator(s), and to the MDR Administrator. Such notice shall serve to bring the Mediation to an end and to initiate Mandatory Dispute Resolution. Upon agreement of all parties and the mediator(s), the Mediation process may continue at the same time the MDR process is invoked. In such case, the Notice of Termination of Mediation described above serves to initiate the MDR proceeding, but does not terminate mediation proceedings, which may proceed simultaneous with the MDR proceeding.

Amended as of September 20, 2007

EXHIBIT 5

Page 6 of 23

3. Mandatory Dispute Resolution (MDR)

If any party elects not to first pursue Mediation, or if a Notice of Termination of Mediation is issued as set forth in Paragraph 2.D., above, then the unresolved disputes set forth in any Complaint and Answer (and Counterclaim and Reply, if any) shall be subject to mandatory binding arbitration (herein referred to as "MDR").

A. MDR Administrator

The Administrator for purposes of Mandatory Arbitration shall be an independent nationally recognized entity such as CPR or JAMS, specializing in alternative dispute resolution. In the event the parties pursued Mediation with CPR, JAMS or a similar organization, that organization also shall serve as the MDR Administrator, unless all parties notify the BCBSA Corporate Secretary in writing within two (2) days of receiving the Notice of Termination of Mediation that they wish to pursue MDR with another nationally recognized organization serving as MDR Administrator.

In the event the parties (i) did not pursue Mediation, (ii) pursued mediation with a Mediator not affiliated with an ADR organization that offers a panel of arbitrators, or (iii) all parties that pursued Mediation notified the BCBSA Corporate Secretary that they wish to have an MDR Administrator that is different from the organization with which their mediator was affiliated, they shall promptly attempt to agree on a nationally recognized ADR entity that supplies a panel of arbitrators. If they reach such agreement within five (5) days of the Notice of Termination of Mediation or receipt of the Answer or Reply to Counterclaim (whichever is later), the parties shall promptly inform the BCBSA Corporate Secretary of their agreed upon ADR organization. In the event the parties are unable to reach agreement on an MDR Administrator within that timeframe, the BCBSA Corporate Secretary shall immediately refer the matter to CPR, JAMS or a similar organization for MDR.

Any person who served as a Mediator shall not serve as an arbitrator for the same or similar dispute for purposes of MDR.

B. Rules for MDR

The rules controlling all aspects of MDR shall be exclusively those provided for herein. The rules promulgated or otherwise used by the MDR Administrator organization shall not apply.

Amended as of September 20, 2007

EXHIBIT 5

Page 7 of 23

C. Initial Conference

Within seven (7) days after a Notice of Termination has issued, or the matter has otherwise been referred to an MDR Administrator, or within five (5) days after the time for filing and serving the Answer or Reply to any Counterclaim (whichever is later) if the parties elect first not to mediate, the parties shall confer with the Administrator to discuss selecting a dispute resolution panel ("the Panel"). This conference (the "Initial Conference") may be by telephone. The parties are encouraged to agree to the composition of the Panel and to present that agreement to the Administrator at the Initial Conference. If the parties do not agree on the composition of the Panel by the time of the Initial Conference, or by any extension thereof agreed to by all parties and the Administrator, then the Panel Selection Process set forth in subparagraph D, below, shall be followed.

D. Panel Selection Process

The Administrator shall designate, prior to the Initial Conference, at least seven potential arbitrators. Each party shall be permitted to strike any designee for cause and the Administrator shall determine the sufficiency thereof in its sole discretion. The Administrator will designate a replacement for any designee so stricken. Each party shall then be permitted one peremptory strike from the list of designees. The Administrator shall set the dates for exercising all strikes, which shall be set to encourage the prompt selection of arbitrators.

After the parties exercise any designee strikes for cause and their peremptory strike against any designee of their choice, the parties shall each rank the remaining panel members in order of preference and provide the Administrator, without serving on any other party, their ranked list. The Administrator shall not disclose any party's ranked list to members of the panel or to other parties.

From the remaining designees, and after considering opportunities to maximize, so far as possible, the collectively stated arbitrator preferences provided by the parties on their ranked lists, the Administrator shall select a three member Panel. The Panel Selection Process shall be completed no later than ten (10) days after the Initial Conference.

Each Arbitrator shall be compensated at his or her normal hourly rate or, in the absence of an established rate, at a reasonable hourly rate to be promptly fixed by the Administrator for all time spent in connection with the proceedings and shall be reimbursed for any travel and other reasonable expenses.

Amended as of September 20, 2007

EXHIBIT 5

Page 8 of 23

E. Duties Of The Arbitrators

The Panel shall promptly designate a Presiding Arbitrator for the purposes reflected below, but shall retain the power to review and modify any ruling or other action of said Presiding Arbitrator. Each Arbitrator shall be an independent Arbitrator, shall be governed by the Code of Ethics for Arbitrators in Commercial Disputes, and shall at or prior to the commencement of any Arbitration Hearing take an oath to that effect. Each Arbitrator shall promptly disclose in writing to the Panel and to the parties any circumstances, whenever arising, that might cause doubt as to such Arbitrator's compliance, or ability to comply, with said Code of Ethics, and, absent resignation by such Arbitrator, the remaining Arbitrators shall determine in their sole discretion whether the circumstances so disclosed constitute grounds for disqualification and for replacement. With respect to such circumstances arising or coming to the attention of a party after an Arbitrator's selection, a party may likewise request the Arbitrator's resignation or a determination as to disqualification by the remaining Arbitrators. With respect to a sole Arbitrator, the determination as to disqualification shall be made by the Administrator.

There shall be no ex parte communication between the parties or their counsel and any member of the Panel.

F. Panel's Jurisdiction And Authority

The Panel's jurisdiction and authority shall extend to all disputes between or among the Plans, their Controlled Affiliates, and/or BCBSA, except for those disputes excepted from these MMDR procedures as set forth in the License Agreements.

With the exception of punitive or treble damages, the Panel shall have full authority to award the relief it deems appropriate to resolve the parties' disputes, including monetary awards and injunctions, mandatory or prohibitory. The Panel has no authority to award punitive or treble damages except that the Panel may allocate or assess responsibility for punitive or treble damages assessed by another tribunal. Subject to the above limitations, the Panel may, by way of example, but not of limitation:

Amended as of September 20, 2007

EXHIBIT 5

Page 9 of 23

- i. interpret or construe the meaning of any terms, phrase or provision in any license between BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.
- ii. determine whether BCBSA, a Plan or a Controlled Affiliate has violated the terms or conditions of any license between the BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.
- iii. decide challenges as to its own jurisdiction.
- iv. issue such orders for interim relief as it deems appropriate pending Hearing and Award in any Arbitration.

It is understood that the Panel is expected to resolve issues based on governing principles of law, preserving to the maximum extent legally possible the continued integrity of the Licensed Marks and the BLUE CROSS/BLUE SHIELD system. The Panel shall apply federal law to all issues which, if asserted in the United States District Court, would give rise to federal question jurisdiction, 28 U.S.C. § 1331. The Panel shall apply Illinois law to all issues involving interpretation, performance or construction of any License Agreement or Controlled Affiliate License Agreement unless the agreement otherwise provides. As to other issues, the Panel shall choose the applicable law based on conflicts of law principles of the State of Illinois.

G. Administrative Conference

Within five (5) days of the Panel being selected, the Presiding Arbitrator shall confer with the parties and the other members of the Panel and shall schedule, in writing, a conference in which the parties and the Panel shall participate (the "Administrative Conference"). The Administrative Conference shall take place no later than fifteen (15) days after the Panel is selected. At the Administrative Conference the parties and the Panel shall discuss the scheduling of the Arbitration Hearing and any other matter appropriate to be considered, including but not limited to: any written discovery in the form of requests for production of documents or requests to admit facts; the identity of any witness whose deposition a party may desire and a showing of exceptional good cause for the taking

Amended as of September 20, 2007

EXHIBIT 5

Page 10 of 23

of any such deposition; the desirability of bifurcation or other separation of the issues; the need for and the type of record of conferences and hearings, including the need for transcripts; the need for expert witnesses and how expert testimony should be presented; the appropriateness of motions to dismiss and/or for full or partial summary judgment; consideration of stipulations; the desirability of presenting any direct testimony in writing; and the necessity for any on-site inspection by the Panel. If the parties agree, the Administrative Conference may be by telephone.

H. Discovery

- i. ***Requests for Production of Documents:*** All requests for the production of documents must be served no later than five (5) days after the date of the Initial Conference. Within twenty (20) days after receipt of a request for production of documents, a party shall (a) serve responses and objections to the request, (b) produce all responsive, non-privileged documents to the requesting party, and (c) to the extent any responsive documents are withheld on the grounds of attorney-client privilege or work product, produce a log identifying such documents in the manner specified in Fed. R. Civ. P. 26(b)(5). If, after reviewing a privilege log, the requesting party believes attorney-client privilege or work product protection was improperly claimed by the producing party with respect to any document, the requesting party may ask the Presiding Arbitrator to conduct an in-camera inspection of the same. With respect to documentary and other discovery produced in any MDR proceeding by BCBSA, the fact that a party's CEO or other senior officers may serve on the BCBSA Board of Directors, BCBSA Board Committees or other BCBSA work groups, task forces and the like, shall not be a basis for defeating an otherwise valid claim of attorney-client privilege or work product protection over such documentary or other discovery materials by BCBSA.
- ii. ***Requests for Admissions:*** Requests for Admissions may be served up to twenty-one (21) days prior to the discovery cut-off set by the Presiding Arbitrator. A party served with Requests For Admissions must respond within twenty (20) days of receipt of said request. The good faith use of and response to Requests for Admissions is encouraged, and the Panel shall have full discretion, with reference to the Federal Rules of Civil Procedure, in awarding appropriate sanctions with respect to abuse of the procedure.

Amended as of September 20, 2007

EXHIBIT 5

Page 11 of 23

- iii. **Depositions:** As a general rule, the parties will not be permitted to take party or non-party deposition testimony for discovery purposes. The Presiding Arbitrator, in his or her sole discretion, shall have the authority to permit a party to take such deposition testimony upon a showing of exceptional good cause. The parties will be permitted to take de bene esse deposition testimony to the fullest extent permitted by law of any witness who cannot be compelled to testify at the Arbitration Hearing. No deposition, for discovery purposes or otherwise, shall exceed three (3) hours, excluding objections and colloquy of counsel. Depositions may be recorded in any manner recognized by the Federal Rules of Civil Procedure and the parties shall specify in each notice of deposition or request for permission to take deposition testimony the manner in which such deposition shall be recorded.
- iv. **Expert witness(es):** If a party intends to present the testimony of an expert witness during the oral hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)(B) ten (10) days prior to the discovery cut-off set by the Presiding Arbitrator. If a party intends to present the testimony of a rebuttal expert witness during the Arbitration Hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)(B) within twenty (20) days after the date on which the written statement of the expert witness whose testimony is to be rebutted was produced.
- v. **Discovery cut-off:** The Presiding Arbitrator shall determine the date on which the discovery period will end, but the discovery period shall not exceed thirty (30) days from the date of the Administrative Conference without the agreement of all parties.

Amended as of September 20, 2007

EXHIBIT 5

Page 12 of 23

vi. ***Additional discovery:*** Any additional discovery will be at the discretion of the Presiding Arbitrator.

vii. ***Discovery Disputes:*** Any discovery disputes shall be raised by motion to the Presiding Arbitrator, who is authorized to resolve all such disputes, and whose resolution will be binding on the parties unless modified by the Arbitration Panel. Prior to raising any discovery dispute with the Presiding Arbitrator, the parties shall meet and confer, telephonically or in person, in an attempt to resolve or narrow the dispute. If a party refuses to comply with a decision resolving a discovery dispute, the Panel, in keeping with Fed. R. Civ. P. 37, may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for resolution adversely to that party.

viii. ***Extensions:*** The time for responding to discovery requests may be extended by the Presiding Arbitrator for good and sufficient cause shown. Any request for such an extension shall be made in writing.

I. Panel Suggested Settlement/Mediation

At any point during the proceedings, the Panel at the request of any party or on its own initiative, may suggest that the parties explore settlement and that they do so at or before the conclusion of the Arbitration Hearing, and the Panel shall give such assistance in settlement negotiations as the parties may request and the Panel may deem appropriate. Alternatively, the Panel may direct the parties to endeavor to mediate their disputes as provided above, or to explore a mini-trial proceeding, or to have an independent party render a neutral evaluation of the parties' respective positions. The Panel shall enter such sanctions as it deems appropriate with respect to any party failing to pursue in good faith such Mediation or other alternate dispute resolution methods.

Amended as of September 20, 2007

EXHIBIT 5

Page 13 of 23

J. Subpoenas on Third Parties

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq.*, and subject to Paragraph 3.G(iii) above, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan or any officer, employee or director of a third party Blue Plan, to compel deposition testimony or the production of documents, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena.

K. Arbitration Hearing

An Arbitration Hearing will be held within thirty (30) days after the Administrative Conference if no discovery is taken, or within thirty (30) days after the close of discovery, unless all parties and the Panel agree to extend the Arbitration Hearing date, or unless the parties agree in writing to waive the Arbitration Hearing. The parties may mutually agree on the location of the Arbitration Hearing. If the parties fail to agree, the Arbitration Hearing shall be held in Chicago, Illinois, or at such other location determined by the Presiding Arbitrator to be most convenient to the participants. The Panel will determine the date(s) and time(s) of the Arbitration Hearing(s) after consultation with all parties and shall provide reasonable notice thereof to all parties or their representatives.

L. Arbitration Hearing Memoranda

Twenty (20) days prior to the Arbitration Hearing, each party shall submit to the other party (or parties) and to the Panel an Arbitration Hearing Memorandum which sets forth the applicable law and any argument as to any relevant issue. The Arbitration Hearing Memorandum will supplement, and not repeat, the allegations, information and documents contained in or with the Complaint, Answer, Counterclaim and Reply, if any. Ten (10) days prior to the Arbitration Hearing, each party shall submit to each other party a list of all expert and fact witnesses (but not including rebuttal fact witness) that such party intends to have testify at the Arbitration Hearing and a brief summary of the testimony each such witness is expected to give. In addition, no later than five (5) days prior to the Arbitration, each party may submit to each other party and to the Panel a Response Arbitration Hearing Memorandum which sets forth any response to another party's Arbitration Hearing Memorandum.

Amended as of September 20, 2007

EXHIBIT 5

Page 14 of 23

M. Notice For Testimony

Ten (10) days prior to the Arbitration Hearing, any party may serve a Notice on any other party (or parties) requesting the attendance at the Arbitration Hearing of any officer, employee or director of the other party (or parties) for the purpose of providing noncumulative testimony. If a party fails to produce one of its officers, employees or directors whose noncumulative testimony during the Arbitration Hearing is reasonably requested by an adverse party, the Panel may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for mandatory dispute resolution adversely to that party; provided, however, that a party may refuse to produce a director to testify if, within two (2) days of receiving a notice requesting the attendance of such director at the Arbitration Hearing, the party agrees to make the director available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. This Rule may not be used for the purpose of burdening or harassing any party, and the Presiding Arbitrator may impose such orders as are appropriate so as to prevent or remedy any such burden or harassment.

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq.*, twenty (20) days or more prior to the Arbitration Hearing, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan, BCBSA or any officer, employee or director of a third party Blue Plan or BCBSA for the purpose of providing noncumulative testimony at the Arbitration Hearing, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena; provided however, that a director of a third party Blue Plan or BCBSA may refuse to testify if, within two (2) days of receiving a subpoena requesting the attendance of such director at the Arbitration Hearing, the director agrees to make him/herself available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. Each Blue Plan agrees to waive, on its own behalf and on behalf of its directors and officers, any objection it otherwise might have to any such subpoena based on service, venue or extraterritoriality.

Amended as of September 20, 2007

EXHIBIT 5

Page 15 of 23

N. Arbitration Hearing Procedures

- i. **Attendance at Arbitration Hearing:** Any person having a direct interest in the proceeding is entitled to attend the Arbitration Hearing. The Presiding Arbitrator shall otherwise have the power to require the exclusion of any witness, other than a party or other essential person, during the testimony of any other witness. It shall be discretionary with the Presiding Arbitrator to determine the propriety of the attendance of any other person.
- ii. **Confidentiality:** The Panel and all parties shall maintain the privacy of the Arbitration Proceeding. The parties and the Panel shall treat the Arbitration Hearing and any discovery or other proceedings or events related thereto, including any award resulting therefrom, as confidential except as otherwise necessary in connection with a judicial challenge to or enforcement of an award or unless otherwise required by law.
- iii. **Stenographic Record:** Any party, or if the parties do not object, the Panel, may request that a stenographic or other record be made of any Arbitration Hearing or portion thereof. The costs of the recording and/or of preparing the transcript shall be borne by the requesting party and by any party who receives a copy thereof. If the Panel requests a recording and/or a transcript, the costs thereof shall be borne equally by the parties.
- iv. **Oaths:** The Panel may require witnesses to testify under oath or affirmation administered by any duly qualified person and, if requested by any party, shall do so.
- v. **Order of Arbitration Hearing:** An Arbitration Hearing shall be opened by the recording of the date, time, and place of the Arbitration Hearing, and the presence of the Panel, the parties, and their representatives, if any. The Panel may, at the beginning of the Arbitration Hearing, ask for statements clarifying the issues involved.

Amended as of September 20, 2007

EXHIBIT 5

Page 16 of 23

Unless otherwise agreed, the complaining party (or parties) shall then present evidence to support their claim(s). The respondent(s) shall then present evidence supporting their defenses and Counterclaims, if any. The complaining party (or parties) shall then present evidence supporting defenses to the Counterclaims, if any, and rebuttal.

Witnesses for each party shall submit to questions by adverse parties and/or the Panel.

The Panel has the discretion to vary these procedures, but shall afford a full and equal opportunity to all parties for the presentation of any material and relevant evidence.

vi. **Evidence:** The parties may offer such evidence as is relevant and material to the dispute and shall produce such evidence as the Panel may deem necessary to an understanding and resolution of the dispute. Unless good cause is shown, as determined by the Panel or agreed to by all other parties, no party shall be permitted to offer evidence at the Arbitration Hearing which was not disclosed prior to the Arbitration Hearing by that party. The Panel may receive and consider the evidence of witnesses by affidavit upon such terms as the Panel deems appropriate.

The Panel shall be the judge of the relevance and materiality of the evidence offered, and conformity to legal rules of evidence, other than enforcement of the attorney-client privilege and the work product protection, shall not be necessary. The Federal Rules of Evidence shall be considered by the Panel in conducting the Arbitration Hearing but those rules shall not be controlling. All evidence shall be taken in the presence of the Panel and all of the parties, except where any party is in default or has waived the right to be present.

Settlement offers by any party in connection with Mediation or MDR proceedings, decisions or recommendations of the selected mediators, and a party's position papers or statements furnished to the selected mediators shall not be admissible evidence or considered by the Panel without the consent of all parties.

EXHIBIT 5

Page 17 of 23

- vii. ***Closing of Arbitration Hearing:*** The Presiding Arbitrator shall specifically inquire of all parties whether they have any further proofs to offer or witnesses to be heard. Upon receiving negative replies or if he or she is satisfied that the record is complete, the Presiding Arbitrator shall declare the Arbitration Hearing closed with an appropriate notation made on the record. Subject to being reopened as provided below, the time within which the Panel is required to make the award shall commence to run, in the absence of contrary agreement by the parties, upon the closing of the Arbitration Hearing.

With respect to complex disputes, the Panel may, in its sole discretion, defer the closing of the Arbitration Hearing for a period of up to thirty (30) days after the presentation of proofs in order to permit the parties to submit post-hearing briefs and argument, as the Panel deems appropriate, prior to making an award.

For good cause, the Arbitration Hearing may be reopened for up to thirty (30) days on the Panel's initiative, or upon application of a party, at any time before the award is made

O. Awards

An Award must be in writing and shall be made promptly by the Panel and, unless otherwise agreed by the parties or specified by law, no later than thirty (30) days from the date of closing the Arbitration Hearing. If all parties so request, the Award shall contain findings of fact and conclusions of law. The Award, and all other rulings and determinations by the Panel, may be by a majority vote.

Parties shall accept as legal delivery of the Award the placing of the Award or a true copy thereof in the mail addressed to a party or its representative at its last known address or personal service of the Award on a party or its representative.

Awards are binding only on the parties to the Arbitration and are not binding on any non-parties to the Arbitration and may not be used or cited as precedent in any other proceeding.

Amended as of September 20, 2007

EXHIBIT 5

Page 18 of 23

After the expiration of twenty (20) days from initial delivery, the Award (with corrections, if any) shall be final and binding on the parties, and the parties shall undertake to carry out the Award without delay.

Proceedings to confirm, modify or vacate an Award shall be conducted in conformity with and controlled by the Federal Arbitration Act. 9 U.S.C. § 1, *et seq.*

P. Return of Documents

Within sixty (60) days after the Award and the conclusion of any judicial proceedings with respect thereto, each party and the Panel shall return any documents produced by any other party, including all copies thereof. If a party receives a discovery request in any other proceeding which would require it to produce any documents produced to it by any other party in a proceeding hereunder, it shall not produce such documents without first notifying the producing party and giving said party reasonable time to respond, if appropriate, to the discovery request.

4. Miscellaneous

A. Expedited Procedures

Any party to a Mediation may direct a request for an expedited Mediation Hearing to the Chairman of the Mediation Committee, to the selected Mediators, and to all other parties at any time. The Chairman of the Mediation Committee, or at his or her direction, the then selected Mediators, shall grant any request which is supported by good and sufficient reasons. If such a request is granted, the Mediation shall be completed within as short a period as practicable, as determined by the Chairman of the Mediation Committee or, at his or her direction, the then selected Mediators.

Any party to an Arbitration may direct a request for expedited proceedings to the Administrator, to the Panel, and to all other parties at any time. The Administrator, or the Presiding Arbitrator if the Panel has been selected, shall grant any such request which is supported by good and sufficient reasons. If such a request is granted, the Arbitration shall be completed within as short a time as practicable, as determined by the Administrator and/or the Presiding Arbitrator.

EXHIBIT 5

Page 19 of 23

B. Temporary or Preliminary Injunctive Relief

Any party may seek temporary or preliminary injunctive relief with the filing of a Complaint or at any time thereafter. If such relief is sought prior to the time that an Arbitration Panel has been selected, then the Administrator shall select a single Arbitrator who is a lawyer who has no interest in the subject matter of the dispute, and no connection to any of the parties, to hear and determine the request for temporary or preliminary injunction. If such relief is sought after the time that an Arbitration Panel has been selected, then the Arbitration Panel will hear and determine the request. The request for temporary or preliminary injunctive relief will be determined with reference to the temporary or preliminary injunction standards set forth in Fed. R. Civ. P. 65.

C. Defaults and Proceedings in the Absence of a Party

Whenever a party fails to comply with the MDR Rules in a manner deemed material by the Panel, the Panel shall fix a reasonable time for compliance and, if the party does not comply within said period, the Panel may enter an Order of default or afford such other relief as it deems appropriate. Arbitration may proceed in the event of a default or in the absence of any party who, after due notice, fails to be present or fails to obtain an extension. An Award shall not be made solely on the default or absence of a party, but the Panel shall require the party who is present to submit such evidence as the Panel may require for the making of findings, determinations, conclusions, and Awards.

D. Notice

Each party shall be deemed to have consented that any papers, notices, or process necessary or proper for the initiation or continuation of a proceeding under these rules or for any court action in connection therewith may be served on a party by mail addressed to the party or its representative at its last known address or by personal service, in or outside the state where the MDR proceeding is to be held.

The Corporate Secretary and the parties may also use facsimile transmission, telex, telegram, or other written forms of electronic communication to give the notices required by these rules.

EXHIBIT 5

Page 20 of 23

E. Expenses

The expenses of witnesses shall be paid by the party causing or requesting the appearance of such witnesses. All expenses of the MDR proceeding, including compensation, required travel and other reasonable expenses of the Panel, and the cost of any proof produced at the direct request of the Panel, shall be borne equally by the parties and shall be paid periodically on a timely basis, unless they agree otherwise or unless the Panel in the Award assesses such expenses, or any part thereof against any party (or parties). In exceptional cases, the Panel may award reasonable attorneys' fees as an item of expense, and the Panel shall promptly determine the amount of such fees based on affidavits or such other proofs as the Panel deems sufficient.

F. Disqualification or Disability of A Panel Member

In the event that any Arbitrator of a Panel with more than one Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the remaining Panel member(s):

- i. shall designate a replacement, subject to the right of any party to challenge such replacement for cause.
- ii. shall decide the extent to which previously held hearings shall be repeated.

If the remaining Panel members consider the proceedings to have progressed to a stage as to make replacement impracticable, the parties may agree, as an alternative to the recommencement of the Mandatory Dispute Resolution process, to resolution of the dispute by the remaining Panel members.

In the event that a single Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the Administrator shall appoint a successor, subject to the right of any party to challenge such successor for cause, and the successor shall decide the extent to which previously held proceedings shall be repeated.

EXHIBIT 5

Page 21 of 23

G. Extensions of Time

Subject to the provisions of Paragraph 3.H.(viii), any time limit set forth in these Rules may be extended upon agreement of the parties and approval of: (1) the Mediator if the proceeding is then in Mediation; (2) the Administrator if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (3) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected.

H. Intervention

The Plans, their Controlled Affiliates, and BCBSA, to the extent subject to MMDR pursuant to their License Agreements, shall have the right to move to intervene in any pending Arbitration. A written motion for intervention shall be made to: (1) the Administrator, if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (2) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected. The written motion for intervention shall be delivered to the BCBSA Corporate Secretary (which shall also constitute service on the BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) which are parties to the proceeding. Any party to the proceeding can submit written objections to the motion to intervene. The motion for intervention shall be granted upon good cause shown. Intervention also may be allowed by stipulation of the parties to the Arbitration proceeding. Intervention shall be allowed upon such terms as the Arbitration Panel decides.

I. BCBSA Assistance In Resolution of Disputes

The resources and personnel of the BCBSA may be requested by any member Plan at any time to try to resolve disputes with another Plan.

J. Neutral Evaluation

The parties can voluntarily agree at any time to have an independent party render a neutral evaluation of the parties' respective positions.

Amended as of September 20, 2007

EXHIBIT 5

Page 22 of 23

K. Recovery of Attorney Fees and Expenses

i. Motions to Compel

Notwithstanding any other provisions of these Rules, any Party subject to the License Agreements (for purposes of this Section K and all of its sub-sections only hereinafter referred to collectively and individually as a "Party") that initiates a court action or administrative proceeding solely to compel adherence to these Rules shall not be determined to have violated these Rules by initiating such action or proceeding.

ii. Recovery of Fees, Expenses and Costs

The Arbitration Panel may, in its sole discretion, award a Party its reasonable attorneys' fees, expenses and costs associated with a filing to compel adherence to these Rules and/or reasonable attorneys' fees, expenses and costs incurred in responding to an action filed in violation of these Rules; provided, however, that neither fees, expenses, nor costs shall be awarded by the Arbitration Panel if the Party from which the award is sought can demonstrate to the Arbitration panel, in its sole discretion, that it did not violate these Rules or that it had reasonable grounds for believing that its action did not violate these Rules.

iii. Requests for Reimbursement

For purposes of this Section K, any Party may request reimbursement of fees, expenses and/or costs by submitting said request in writing to the Arbitration Panel at any time before an award is delivered pursuant to Paragraph 3.O above, with a copy to the Party from which reimbursement is sought, explaining why it is entitled to such reimbursement. The Party from which reimbursement is sought shall have twenty (20) days to submit a response to such request to the Arbitration Panel with a copy to the Party seeking reimbursement.

Amended as of September 20, 2007

EXHIBIT 5

Page 23 of 23

L. Calculation of Time and Deadlines

In computing any period of time prescribed or allowed under these rules, the day of the act or event from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, in which event the period runs until the end of the next day which is not one of the aforementioned days. When the period of time prescribed is less than six (6) days, intermediate Saturdays, Sundays and legal holidays shall be excluded in the computation. As used in this rule, "legal holiday" includes New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day and any other day appointed as a holiday by the President or the Congress of the United States.

- Form S-3 No. 333-200749 pertaining to the Anthem, Inc. automatic shelf registration

of our report dated February 24, 2015, with respect to the consolidated financial statements and schedule of Anthem, Inc., and the effectiveness of internal control over financial reporting of Anthem, Inc., included in its Annual Report (Form 10-K) for the year ended December 31, 2014.

/S/ ERNST & YOUNG LLP
Indianapolis, Indiana
February 24, 2015

Exhibit 31.1

**CERTIFICATION PURSUANT TO
RULE 13a-14(a) AND RULE 15d-14(a) OF THE EXCHANGE ACT RULES,
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Joseph R. Swedish, certify that:

1. I have reviewed this report on Form 10-K of Anthem, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: February 24, 2015

/s/ JOSEPH R. SWEDISH

Chief Executive Officer

Exhibit 31.2

**CERTIFICATION PURSUANT TO
RULE 13a-14(a) AND RULE 15d-14(a) OF THE EXCHANGE ACT RULES,
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Wayne S. DeVeydt, certify that:

1. I have reviewed this report on Form 10-K of Anthem, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: February 24, 2015

/s/ WAYNE S. DEVEYDT

Executive Vice President and
Chief Financial Officer

Exhibit 32.1

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of Anthem, Inc. (the "Company") on Form 10-K for the period ended December 31, 2014 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Joseph R. Swedish, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

/s/ JOSEPH R. SWEDISH

Section C.4 - Surplus Account

Simply Healthcare Plans Inc., Better Health Inc., AMERIGROUP Florida, Inc. as of June 30, 2017 had a consolidated capital and surplus of \$264.6 million. The below chart projects a surplus requirement between \$67 and \$74 million over that three year projection period. At this time the Consolidated Simply Healthcare Plans, Inc. would be able to absorb the required increase with the excess currently on its balance sheet.

In the event the subsidiary can not meet the requirement the parent, Anthem, Inc., will fund the surplus amounts. As of June 30, 2017 the parent had \$4,521.2 million of cash and cash equivalents as stated in the 10-Q filed with the SEC. This balance is available for general corporate use to include investment in our business

Section C.4 - Insolvency Protection Account

Simply Healthcare Plans Inc., Better Health Inc., AMERIGROUP Florida, Inc. currently have Insolvency protection accounts established for their Medicaid contracts. Those accounts are valued at over \$53.2 million as of August 31, 2017.

We have estimated below that those accounts will need to be increased by \$14.5 million in the first 12 months of the contract.

In the event the subsidiary can not meet the requirement the parent, Anthem, Inc., will fund the surplus amounts. As of June 30, 2017 the parent had \$4,561.2 million of cash and cash equivalents as stated in the 10-Q filed with the SEC. EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

RESPONDENT NAME: Simply Healthcare Plans, Inc. D/B/A Clear Health Alliance

A. RESPONDENT BACKGROUND / EXPERIENCE

SRC# 1 – Managed Care Experience (Statewide):

The respondent, including respondent's parent, affiliate(s) and subsidiary(ies), shall provide a list of all current and/or recent (within five (5) years of the issue date of this solicitation (since July 14, 2012) contracts for managed care services (e.g. medical care, integrated medical and behavioral health services, transportation services and/or long-term services and support).

The respondent shall provide the following information for each identified contract:

- a. The Medicaid population served (such as TANF, ABD, dual eligible);
- b. The name and address of the client;
- c. The name of the contract;
- d. The specific start and end dates of the contract;
- e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services;
- f. The use of administrative and/or delegated subcontractor(s) and their scope of work;
- g. The annual contract amount (payment to the respondent) and annual claims payment amount;
- h. The scheduled and actual completion dates for contract implementation;
- i. The barriers encountered that hindered implementation (if applicable) and the resolutions;
- j. Accomplishments and achievements;
- k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid); and
- l. Whether the contract was capitated, FFS or other payment method.

In addition, the respondent shall describe its experience in delivering managed care services (e.g. medical care, integrated medical and behavioral health services, transportation services and/or long-term services and support), to Medicaid populations similar to the target population (such as TANF, ABD, dual eligible) identified in this solicitation.

For this SRC, the respondent may include experience provided by subcontractors for which the respondent was contractually responsible, if the respondent plans to use those same subcontractors for the SMMC program.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. Recognizing our unique opportunity to create a single, superior health plan that draws upon the combined strengths and 32 cumulative years of Florida Medicaid experience of our three managed care plans, we merged legacy Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup) into a single company that will operate as a comprehensive plan, across all regions. References to "Simply" throughout this response refer to

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

the newly merged organization, which is inclusive of the experience, results, and outcomes of all three of its legacy organizations. References to Clear Health are meant to highlight the targeted approaches and strategies, specific to our Specialty Plan offering, that we are bringing to bear for individuals with HIV/AIDS, based on our deep experience with this population. Clear Health will leverage all the capabilities of the combined Simply, while being laser-focused on its mission to bring the best possible care to our specialty plan members.

Our consolidated Florida health plan will continue under the consummate leadership of Ms. Lourdes Rivas, President and CEO. During her tenure at Clear Health, she has provided strong and visionary direction in a time of growth and change. She successfully focused the organization on priority initiatives: building a strong customer-centric focus, leading the development of Clear Health's strategic plan, and making sure that organizational goals are executed and target metrics achieved. She has been ably assisted by a combined management team with decades of collective experience that will continue to bring maturity, stability, and innovation to the health plan.

The integration of the strengths and capabilities of the three companies elevates our performance across all areas of operations and in the delivery of services to our enrollees (members), providers, and AHCA. As an organization we currently serve more than 630,000 members across Florida in Medicaid, Florida Healthy Kids (FHK), and Medicare Advantage programs, with a local high-touch, person-centered model, including more than 9,300 members in our HIV/AIDS specialty plan through Clear Health. We deliver managed care services in medical care, integrated medical and behavioral health services, dental, vision, pharmacy, long-term care, and transportation services to Florida Medicaid TANF, ABD, dual eligible, and Medicare populations.

Summaries of our three legacy organizations highlight the strengths each brings to the newly consolidated organization.

Legacy Simply, including D/B/A Clear Health Alliance

Simply has grown with the State as a proven performer demonstrated through several measures, including increased membership, improved satisfaction, and HEDIS scores to name a few. Since its inception in 2010, the health plan has doubled both its membership and its staffing as it expanded its MMA, specialty services, and Medicare Advantage footprint. We're extremely pleased that even as our membership expanded, member satisfaction remains high. According to 2017 CAHPS® data, we exceeded the 90th percentile in 16 measures for adults and the 75th percentile in seven measures for children, including "Rating of Health Plan" and "Rating of Health Care." In addition, Simply is currently a 4.5 star Medicare plan in Florida.

Simply also operates as a specialty plan for Medicaid recipients living with HIV/AIDS under the D/B/A Clear Health Alliance (Clear Health). In nearly all regions of the state, we provide managed care services to TANF, SSI and dual eligible populations with a diagnosis of HIV/AIDS. In our five years serving HIV/AIDS members, Clear Health has become a national model in providing managed medical assistance to individuals with a diagnosis of HIV/AIDS. We currently serve more than 9,300 members across Florida, and we are the largest HIV/AIDS specialty plan in the state and the nation. The consolidated organization will continue to do business as Clear Health for this population.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In developing our HIV/AIDS specialty plan, we have tapped into the expertise of leaders in policy, research, care, and public education. Clear Health worked closely with the University of Miami, a renowned center of excellence in HIV/AIDS care and research. The University helped develop protocols for quality, compliance, and care, and provided an introduction to former NBA basketball star, Earvin “Magic” Johnson, who was so impressed by our commitment to not only the HIV/AIDS members, but also to the TANF, ABD, and dual eligible populations, that he became a plan spokesperson and an active participant in setting strategic direction for the program. Magic chairs Clear Health’s Strategic Advisory Group, which makes recommendations regarding improvements to quality, operations, and community partnerships in conjunction with our Member Advisory Committee and the broader HIV/AIDS community and research experts. He recently served as keynote speaker at the 17th Annual Center for AIDS Research Scientific Symposium. The symposium was sponsored by the University of Miami and organized by Dr. Margaret Fischl, a Clear Health provider and nationally renowned AIDS researcher. Through his direct input, leadership, and the efforts of the Magic Johnson Foundation, Magic has provided invaluable insight and an entrée to minority populations and communities that have historically been difficult to reach. Moreover, in his role as plan ambassador and community advocate, Magic visits with students in local schools, pastors in local churches, network providers, and our associates. In May of this year, he met with Florida lawmakers in Tallahassee, expressing support for our innovative efforts to serve Medicaid and Medicare members.

Legacy Better Health

Better Health initiated its partnership with the State through participation in a 2006 pilot reform project in Region 10. Better Health became the only Provider Service Network (PSN) to show achieved savings under reform and also became one of the largest PSNs in Broward County. Better Health accomplished this while also demonstrating improved outcomes. In addition, Better Health remaining committed to serving members in the county throughout the term of the Contract.

In 2012, Better Health, as a Managing Entity, brought education and managed care principles to MediPass providers in 31 rural counties serving Florida’s TANF, ABD, and dual eligible populations. We accomplished this through an administrative service agreement with AHCA providing enhanced case management services, utilization management, and prior authorization in counties with fewer than two managed care plans. Through this program, Better Health identified, recommended, and implemented cost saving initiatives in the MediPass program.

Legacy AMERIGROUP Florida (Amerigroup)

Amerigroup entered the Florida market through the acquisition of Physicians Healthcare Plans Inc. in 2003, and continues to be a trusted partner to AHCA and other State agencies serving Florida’s Medicaid, MMA, LTC and Florida Healthy Kids programs. It was one of the first health plans to implement and subsequently expand the Department of Elder Affairs’ (DOEA) Nursing Home Diversion Program, a predecessor to the current LTC program.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Amerigroup holds a commendable accreditation through NCQA and has among the highest HEDIS and CAHPS results in the state. Our consolidated health plan will build upon this exemplary performance. The Amerigroup philosophy has always been to support members across the full spectrum of physical health, behavioral health, and social needs, even if they are not the ultimate payer for services today. We will carry this philosophy forward with our combined organization.

Combining the Best of Three Plans

We are excited about the recent merger of these three high-performing managed care companies and the vast potential in consolidating the collective experience, expertise, and resources of these three companies as we move forward under the Simply brand. We seized this opportunity to carefully and methodically identify the best practices of each of our legacy organizations, seamlessly integrating programs and processes under a single leadership team. This thoughtful approach to combining our organizational strengths and resources resulted in a stronger and more effective organization serving the needs of our Florida members. We are confident this unification will bring many benefits including: financial and system efficiencies, best practices in integrated care delivery, and broad reach into the communities we serve. Ultimately, our aim is to continue to work and strengthen our partnership with AHCA, stakeholders, Florida communities, providers, subcontractors, and many others to further improve quality of life for our Florida Medicaid members while containing cost, improving health outcomes, and enhancing the patient experience.

Experience Delivering Managed Care throughout the Nation

We will continue to benefit from the national presence, best practices, and depth of experience across Medicaid and other state-sponsored programs through our ultimate parent company, Anthem, Inc. and its affiliates. Together with our affiliates, we serve approximately 6.5 million members in state-sponsored programs across 19 states and the District of Columbia. These affiliate health plans have coordinated acute, behavioral, and long term services and supports benefits for Medicaid and other state-sponsored health programs for more than 26 years.

Furthermore, Anthem has been a pioneer and innovator in providing integrated care solutions to individuals with specialized care and service needs, including those who are dually eligible for Medicare and Medicaid as well as frail adult populations residing in nursing facilities and in the community; members with intellectual or developmental disabilities; children in foster care; medically frail children; and members with serious mental illness and substance use disorders. Beyond this extensive state-sponsored program experience across all product lines, the Anthem family of health plans serves the healthcare needs of over 40 million Americans.

1. EXPERIENCE PROVIDING INTEGRATED MEDICAL AND BEHAVIORAL HEALTH SERVICES

Our organization has been providing integrated physical and behavioral health care in Florida since 2003. We integrate care because we have seen first-hand the impact that mental health and substance use conditions have on our members' physical health and their related ability to engage in the services and supports needed to meet their holistic needs. A unique tool that we utilize in connecting the dots between physical and behavioral health is our Case Management System. This tool is available to medical and behavioral health providers and Case Managers. It

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

provides access to near real-time member health information to maximize and facilitate care coordination and integrated care. We have received many compliments from providers, praising the uniqueness and innovation of this tool. As a result, we do not separate acute and primary care services from mental health, substance use disorder, and social services and supports.

For the last 14 years, we have coordinated the delivery of fully integrated physical and behavioral (mental health and substance use disorders) across all areas of our health plan, including case management, utilization management, information systems/health information technology, claims/encounter data, predictive modeling, and quality management functions. In addition, we use evidence-based practices from nationally-recognized organizations, such as the American Society of Addiction Medicine (ASAM) and the Substance Abuse and Mental Health Services Administration (SAMHSA).

Through our current contracts, including SMMC, FHK, and Medicare Advantage, we coordinate integrated physical and behavioral health care to more than 630,000 TANF, ABD, LTC, dual eligible, and Medicare members across 10 Florida regions, including more than 9,300 members in our HIV/AIDS specialty plan. Our model accounts for the differing needs of individuals based on risk: Low to Moderate, High Risk, and Highest Risk. Since 2010, Beacon Health Options has served as our behavioral health managed care subcontractor, supporting our care management process to offer seamless, holistic, and integrated care to our members.

We recognize that the care and treatment of individuals with HIV/AIDS is multi-dimensional and to be successful it is critical to partner inside and outside the health care community. We foster affiliations with community-based organizations with aligned goals for education, improved access to care and health outcomes, and reduction of HIV transmission, and we are committed to removing barriers to service. For example, we recently partnered with county health departments to improve adherence to preventive dental care among members less than 21 years of age. A mobile dental clinic will be used to improve access to these dental services.

As the needs of our members evolved, we adjusted our HIV/AIDS specialty care. For instance, we increased our nursing capacity as we continue to serve more and more members who are frail and aging, as well as individuals with associated co-morbidities and complex polypharmacy needs. Today, more than half of the current staff is comprised of nurses.

Further, our provider engagement model facilitates the delivery of high quality integrated care by delivering provider data solutions and performance reporting, high-touch face-to-face provider education and outreach. Our entire organization is involved with the providers on a daily basis to ensure their success and the best care for our members. This includes Clinical, Quality, Pharmacy, Customer Service, and our Management team. This type of comprehensive and integrated support helps providers to meet and exceed quality and performance targets, measure performance, and implement targeted interventions. We use a suite of data- and information-sharing tools to help providers understand and improve their performance. These tools include profile reports, which compare a provider's performance to peers and/or established benchmarks, as well as integrated data solutions, member dashboards, and provider scorecards that support our value-based purchasing (VBP) models and help providers improve performance and manage care more effectively.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Lastly, we benefit from our working relationship with our affiliates through our ultimate parent company, Anthem, Inc. Together with these affiliates, we coordinate the delivery of integrated physical and behavioral health care to more than 5.6 million members in 19 markets. This care includes mental health, physical, pharmacy, and social services for more than 302,000 members with SMI conditions in 13 states, and substance use disorder services for more than 492,000 members in 19 states. Anthem is an industry leader supporting fully integrated physical and behavioral health care, and we continuously share best practices and lessons learned with Anthem and our affiliates to optimize our integrated care delivery model and services.

Notable accomplishments:

Our Clear Health member health outcomes demonstrate our effectiveness in building a care model that is reflective of our commitment to developing comprehensive, specialized care for individuals with HIV/AIDS:

- In 2014, we initiated an innovative CD4 program focused on improving medication regimen compliance for members with low CD4 counts. Of the 716 members tracked since program inception, 250 are actively in monitoring and intervention, and 178 have stabilized or improved.
- HEDIS measures continue to improve for our members. For the Comprehensive Diabetes Care (CDC) measure, we observed a 12.7% increase in HbA1c testing from 2016 to 2017, a 9% increase in diabetes retinal eye exams, and a 9.5% increase in medical attention for neuropathy. For the same time period, Clear Health fostered a 10.7% improvement in the Controlling Blood Pressure (CBP) measure, a 5.3% increase in Cervical Cancer Screening (CCS), and a 13.5% increase in Annual Dental Visits (ADV).
- Through an outreach partnership with Beacon Health Options, our behavioral health subcontractor, we increased behavioral health utilization among members. This resulted in reduced substance use disorder-related hospital admissions from approximately 14.0 admits per 1,000 members in January 2015 to less than 5.0 admits per 1,000 members in December 2016. We have also improved in the HEDIS measures related to follow-up visits 7 and 30 days after mental illness hospitalizations.

Similarly, we have achieved successful outcomes for members enrolled in our other programs:

- In HEDIS® 2017, Simply achieved 92.7 percent on the measure of Cardiovascular Monitoring for People with Cardiovascular Disease and Schizophrenia – exceeding the prior year's 90th percentile benchmark. Simply also surpassed the 90th percentile for Diabetes Monitoring for People with Diabetes and Schizophrenia. These measures demonstrate the extent to which people with behavioral health needs are being effectively managed for other chronic health conditions we know to be especially damaging in the population.
- Our Rising Star program focuses on continuity of care for members with serious physical and/or mental illness conditions through consistent collaboration and communication with providers who are already engaged with them. Through this provider, member, and payer collaboration, each member is assigned to a home hospital, home psychiatrist, and Case Manager to assure continuity of care. Program results demonstrate that caring for members at the same facility with the same providers promotes improved health, recovery, and more appropriate use of evidence-based practices and social supports. In the short amount of time this program has been in

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

existence, we have already observed significant impact and expect continued results. For instance, in the first six months of the program, there has been a decrease of 24.5 percent of inpatient hospital spend.

- Our Internal Behavioral Health field-based Case Managers (CARES team) reside in the communities they serve, facilitating in-person interactions with members and neighborhood referrals to community-based services. Our primary focus is to engage all members in regular treatment as soon as possible with their PCP, as well as a primary behavioral health provider. This may include accompanying the member to the PCP visit. The CARES team often focuses on communication and coordination between providers to assure high quality integrated care for the member.

- Utilization Management and Case Management staff are trained to identify and refer members with co-occurring disorders to the appropriate treatment providers in the community including residential and detox services for pregnant women and outpatient substance use disorder and mental health services for all members. In addition, Case Management staff are required to complete a nine-module online training entitled, "Co-Occurring Disorders: A Training Series" developed by the University of South Florida and the Florida Department of Children and Families.

2. SUBCONTRACTORS' EXPERIENCE IN COORDINATING OR PROVIDING SERVICES TO MEDICAID RECIPIENTS

Clear Health views subcontractors as valued partners in delivering the highest quality services to enrollees (members), providers, and the Agency. Through a comprehensive vetting process, we select top-level qualified subcontractors who can best serve our members. Our subcontractors represent an extension of our plan. We build trusted, collaborative, accountable, and long-standing relationships with our subcontractors to coordinate the seamless delivery of services to our Florida members that meet or exceed AHCA requirements.

We monitor subcontractors to assure they meet or exceed Contract requirements as if we were performing the function ourselves. Our Subcontractor Oversight Program leverages a dedicated local health plan team supported by national subcontractor management resources. We will continue to maintain full responsibility for the services subcontractors deliver to our members. Our dedicated Florida-based Vendor Delegation Oversight Group (VDOG) oversees and monitors subcontractor performance. Led by Judi Peterson, our Staff Vice President of Operations and System Solutions, VDOG includes four full-time dedicated staff.

The VDOG team makes sure that all subcontractor agreements include detailed requirements and service level agreements (SLAs), set clear expectations of how we measure performance and the boundaries of what is acceptable, and specify the consequences for non-compliance. Our program enables us to continuously oversee and monitor subcontractor performance through daily collaboration, regular monitoring, and formalized auditing processes. The VDOG team has support from executive leadership and departments across our organization, including Provider Relations, Member Services, Compliance, Regulatory, Operations, Utilization Management, and Medical Management.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Throughout the life of our Contract, Clear Health will retain sole responsibility for fulfilling SMMC Contract requirements and remain fully accountable for our subcontractors' performance. We will continue to oversee, monitor, supervise, and enforce Contract compliance, as well as promote frequent, open, and effective communication that emphasizes delivery of quality services to members.

Provided below is information about our current subcontractors, each of whom we vetted, have successfully partnered with for multiple years, and we intend to subcontract in the new Florida SMMC ITN.

Provision of Covered Services

Subcontractor: Audiology Distribution, LLC, D/B/A HearUSA, Inc. (HearUSA)

Service type: Audiology and hearing services

Experience serving Medicaid recipients: HearUSA has been administering Medicaid benefits for over 25 years. Today, it manages over 100 Medicaid plans in 11 states, covering in excess of 5 million lives. The company has significant experience and over two decades of institutional knowledge that it uses for benefit management, utilization, reporting, compliance, credentialing, and network development. HearUSA complies with state-specific Medicaid regulations and customizes benefit and implementation to meet the plan requirements. HearUSA is URAC accredited and HITRUST certified. HearUSA has experience with various types of Medicaid lines of business, including TANF, SSI and dual eligible populations.

Subcontractor: Beacon Health Options (Beacon) (previously known as PsychCare)

Service type: Behavioral health services

Experience serving Medicaid recipients: Beacon has been providing behavioral health managed care services for over 20 years. Simply has collaborated with Beacon since 2010, serving the complex behavioral health care needs of Florida Medicaid members, including TANF, ABD, IDD, seriously and persistently mentally ill (SPMI); children with severe emotional disturbance (SED), children in foster care, those struggling with substance use disorders; the chronically homeless; HIV/AIDS Special Needs Plans (SNPs); Programs for All Inclusive Care for the Elderly (PACE), and dual eligibles. Beacon manages behavioral health services as a subcontractor to 15 health plans, including Medicare, Medicaid, and CHIP programs in Florida. Currently, Beacon serves more than 14 million Medicaid managed care lives, including more than 900,000 ABD and SSI members nationwide.

Subcontractor: Chiro Alliance Corporation (CAC)

Service type: Chiropractic services

Experience serving Medicaid recipients: CAC has 7 years' experience serving Medicaid members and currently subcontracts across all of our Medicaid contracts. CAC contracts with 4 other MMA plans in Florida and provides chiropractic services to approximately 295,000 Medicare members in Florida and 583,000 Medicaid members nationwide.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Subcontractor: DentaQuest of Florida, Inc. (DentaQuest)

Service type: Dental services

Experience serving Medicaid recipients: DentaQuest has been a mainstay in Florida's Medicaid system for the past 20 years. DentaQuest administers dental benefits on behalf of 2.1 million Floridians, including 1.3 million Medicaid recipients. Nationally, DentaQuest is the largest and most experienced Medicaid and CHIP dental benefits administrator, serving 20 million members across 30 states on behalf of nine state agencies and more than 100 health plans. We currently contracts with DentaQuest for our MMA and LTC services. DentaQuest's operational platform is designed to serve both Medicare and Medicaid populations, including TANF, CHIP, ABD, foster care, ACA, and LTC.

Subcontractor: Express Scripts, Inc. (ESI)

Service type: Pharmacy services

Experience serving Medicaid recipients: ESI has administered managed Medicaid and income-based health programs since 1995, serving various populations including but not limited to CHIP, TANF, ABD, SNP, IDD, foster care, and dual eligibles. As of September 2017, ESI manages over 7.5 million Medicaid enrollees across 24 states through 36 health plans including those eligible for TANF, SSI or who are dually eligible for Medicaid and Medicare. ESI currently contracts across all of our Medicaid plans.

Subcontractor: DentaQuest of Florida, Inc. D/B/A EyeQuest (EyeQuest)

Service type: Vision services

Experience serving Medicaid recipients: EyeQuest's operational platform is designed to serve the Medicaid populations, including TANF, CHIP, ABD, foster care, ACA, and LTC. EyeQuest currently serves 22 million Medicaid recipients, including 1.6 million in Medicaid vision. We currently contract with EyeQuest for MMA and LTC services in multiple regions for a population of approximately 345,000 members.

Subcontractor: Health Network One, Inc. (HN1)

Service type: Therapy services (dermatology, occupational, physical, and speech)

Experience serving Medicaid recipients: Since 2006, HN1 has provided services to Medicaid enrollees through various contracts with its health plan clients. Under these health plan contracts, HN1 has been delegating Claims, Utilization Management, Provider Contracting, and Provider Relations and Credentialing. Its Utilization Management and Credentialing services are NCQA certified. HN1 has 11 years of experience working with Medicaid plans servicing TANF, SSI and Dual populations. As of July 2017, HN1 and its affiliated companies are servicing 1.9 million Medicaid lives throughout Florida, Georgia, and New Jersey. HN1 currently contracts with five MMA plans in Florida, including ours.

Subcontractor: LogistiCare Solutions, LLC (LogistiCare)

Service type: Non-emergency transportation (NET) services

Experience serving Medicaid recipients: LogistiCare has more than 21 years of experience providing NET services for Medicaid and Medicare programs for managed care organizations and state governments. LogistiCare provides Medicaid services in 39 states and the District of Columbia and offers services to TANF, SSI, LTC, and Dual Eligible populations. Currently, Logisticare serves more than 250 customized NET programs and manages more than 69 million trips each year for 27 million members. In Florida, LogistiCare contracts with five MMA and four LTC plans, including ours.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Subcontractor: MCT Express, Inc. (MCT Express)

Service type: NET services

Experience serving Medicaid recipients: MCT Express is a locally-owned transportation management company in Miami-Dade County which has been providing high quality NET services since 1995. They have extensive experience in providing transportation services to the medically fragile, disabled and elderly populations enrolled in Medicaid and Medicare Advantage organizations and healthcare facilities. MCT Express currently contracts with us for our MMA and Medicare Advantage plans, serving a membership of more than 160,000 in Regions 10 and 11.

Subcontractor: Ride2MD, Inc. (Ride2MD)

Service type: NET services

Experience serving Medicaid recipients: Ride2MD has been providing innovative Uber-like NET services to Florida Medicaid members since early 2016, which includes TANF, SSI, LTC, and Dual Eligible populations. The company is contracted with multiple MMA plans to provide ambulatory, wheelchair and stretcher services through a contracted, statewide network of transport companies. The management team of Ride2MD has combined over 30 years of Florida Medicaid experience. The founder of Ride2MD has significant experience on the payer side of Medicaid and managed NET brokers and transport providers across the state for over 200,000 Florida MMA and Specialty plan members. The compliance, network contracting, and credentialing team leadership has worked in Medicaid transportation for at least 15 years.

Administrative and/or Support Models

Subcontractor: AIM Specialty Health (AIM)

Service type: Utilization management, including radiology

Experience: AIM Specialty Health is a specialty benefits management company, focusing on tests and treatments in radiology, cardiology, medical and radiation oncology, specialty drugs, sleep medicine, musculoskeletal and pain management, and genetic testing. Founded in 1989, AIM works with 50 health plans supporting their diverse membership of more than 45 million lives, including 4.4 million Medicaid members. In Florida, AIM has 3 years of experience in providing radiology utilization management to our organization.

Subcontractor: Anthem, Inc. (Anthem)

Service type: Administrative/support services (for example, utilization management)

Experience serving Medicaid recipients: Anthem is a leading health benefits company in the United States. Through a broad portfolio of integrated healthcare plans and related services, Anthem delivers leading health benefit solutions to approximately 40 million medical members, including more than 6.5 million members in publicly-funded programs in 19 states and the District of Columbia. Anthem offers administrative and technical assistance to its affiliates, including assistance with claims processing, reporting, prevention of fraud, waste, and abuse, quality management, and utilization management.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 2 – Florida Experience (Regional):

The respondent shall provide documentation of the extent to which it has experience operating as a Florida Medicaid health plan in the region in which it plans to provide services or in any other region in the State of Florida. If applicable, the respondent shall provide the Agency Contract number and the regions of operation to show it has experience providing managed care services and/or LTC services in Florida. The respondent shall provide documentation of any Medicare Advantage Plan contracts for counties in the State of Florida.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Simply Healthcare Plans, Inc. (Simply) currently serves more than 630,000 members across the state in Medicaid, Florida Healthy Kids, and Medicare Advantage programs, with a local, high-touch, person-centered model including more than 9,300 Clear Health members. Eligible populations include ABD, TANF, Medikids, and Long-Term Care members. In addition, we serve foster children, medically complex children in the community and residing in nursing facilities, and statewide inpatient psychiatric program members. Services include integrated physical and behavioral health, dental, vision, long-term care, pharmacy, and non-emergency transportation.

For the SMMC ITN, Simply is proposing to establish a Comprehensive Plan (MMA and LTC) and Specialty Plan (HIV/AIDS) in all 11 Florida regions. Simply currently has a presence in every region except Region 4, which demonstrates our experience serving densely-populated urban areas and lesser-populated rural areas in the state. In all regions we serve, we coordinate the delivery of high-quality, integrated, person-centered, and culturally competent health care, with a focus on producing the Institute for Healthcare Improvement's Triple Aim of better health outcomes and improved member satisfaction at reduced per capita cost.

Provided below is information regarding our existing SMMC and Medicare Advantage contracts.

1. EXISTING SMMC CONTRACT(S) IN REGION 1

Simply, D/B/A Clear Health Alliance (Clear Health) has an SMMC Specialty contract (FP030) in Region 1 to provide managed medical assistance to individuals living with HIV/AIDS. The current contract term is February 8, 2014 through December 31, 2018. Within this contract, we coordinate member access to physical health, behavioral health, dental, vision, pharmacy, and transportation services.

We do not currently have an MMA or LTC contract in this region, but plan to offer MMA and LTC services as part of a Comprehensive Plan in all Florida regions, including Region 1, through this ITN.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

2. EXISTING SMMC CONTRACT(S) IN OTHER FLORIDA REGIONS

Simply coordinates care for Floridians through its MMA, LTC, Florida Healthy Kids, and HIV/AIDS Specialty plan (Clear Health) contracts in multiple regions throughout Florida. Outside Region 1, we have the following SMMC contracts:

Region 2: Specialty HIV/AIDS (FP030)
Region 3: Specialty HIV/AIDS (FP030)
Region 5: MMA (FP021), Specialty HIV/AIDS (FP030)
Region 6: MMA (FP013 and FP021), Specialty HIV/AIDS (FP030)
Region 7: MMA (FP021), Specialty HIV/AIDS (FP030)
Region 8: Specialty HIV/AIDS (FP030)
Region 9: Specialty HIV/AIDS (FP030)
Region 10: MMA (FP013), LTC (FP021), Specialty HIV/AIDS (FP030)
Region 11: MMA (FP018), MMA/LTC (FP021), Specialty HIV/AIDS (FP030)

3. EXISTING MEDICARE ADVANTAGE PLAN CONTRACT IN REGION 1

Simply does not currently operate a Medicare Advantage Plan in Region 1. However, we do operate Medicare Advantage Plans (Contract H5471) in Regions 5, 6, 7, 10, and 11, serving more than 40,000 members. Additionally, Simply has been approved by CMS to expand to Region 3 and Region 9 effective January 2018.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

For the Managed Care Plan that is proposing to provide services under this solicitation, whether the respondent has:

- An existing SMMC Contract in that region;
- An existing SMMC Contract in another region in the State of Florida; or
- A Medicare Advantage Plan contract in that region.

Score: This section is worth a maximum of 30 raw points as outlined below.

1. 20 points if the respondent already has an SMMC Contract in the region that it plans to provide services (MMA, LTC and/or Specialty).
2. 10 points if the respondent has an SMMC Contract in other regions in the State.
3. 5 additional points will be awarded if the respondent has a comprehensive (MMA & LTC) SMMC Contract in the region that it plans to provide Medicaid services.
4. 5 additional points will be awarded if the plan has a Medicare Advantage Plan in the region that it plans to provide services.
5. 0 points will be awarded if the plan does not have an SMMC Contract in Florida or a Medicare Advantage Plan contract in the region.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 3 – Statutorily Required Florida Presence (Statewide):

The respondent shall provide information regarding whether each operational function, as defined in Section 409.966(3)(c)3, Florida Statutes, will be based in the State of Florida, and the extent to which operational functions will be conducted by staff in-house or through contracted arrangements, located in the State of Florida. This includes:

- a. Specifying the location of where the respondent's corporate headquarters will be located (as defined by Section 409.966(3)(c)3, Florida Statutes);
- b. Indicating whether the respondent is a subsidiary of, or a joint venture with, any other entity whose principal office will not be located in the State of Florida; and
- c. Identifying the number of full-time staff, by operational function (as defined in Section 409.966(3)(c)3, Florida Statutes), that will be located in the State of Florida and out of state.

Note: Pursuant to Section 409.966(3)(c)6., Florida Statutes, response to this submission requirement will be considered for negotiations.

Response:

As a local, community-based health plan, we proudly remain fully and solely responsible for meeting our obligation to fulfill Contract requirements. All members of Clear Health's leadership team are located in Florida, fully own the program, and make sure decisions regarding service delivery and administration are made locally – and are consistent with State goals. Additionally, responsibility for all performance and administrative functions ultimately resides with our local health plan.

1. LOCATION OF RESPONDENT'S CORPORATE HEADQUARTERS

Clear Health has always been located in Florida and is fully dedicated to serving Floridians. Our corporate headquarters is located at:

9250 West Flagler Street, Suite 600
Miami, FL 33174

To best serve members in our service locations throughout Florida, we also have offices in the following locations:

4200 West Cypress Street, Suite 900
Tampa, FL 33607

Royal Palm 1
1000 South Pine Island Road, Suite 900
Plantation, FL 33324

Simply D/B/A Clear Health is a subsidiary of our ultimate parent company, Anthem, Inc., whose corporate office is located at 120 Monument Circle, Indianapolis, IN 46204.

2. OPERATIONS FUNCTIONS TO BE PERFORMED IN FLORIDA

Clear Health attests that all the major specialty health plan operation functions listed in the ITN will be performed by Clear Health employees based in Florida. These functions are listed below and include full-time employee (FTE) counts for each function.

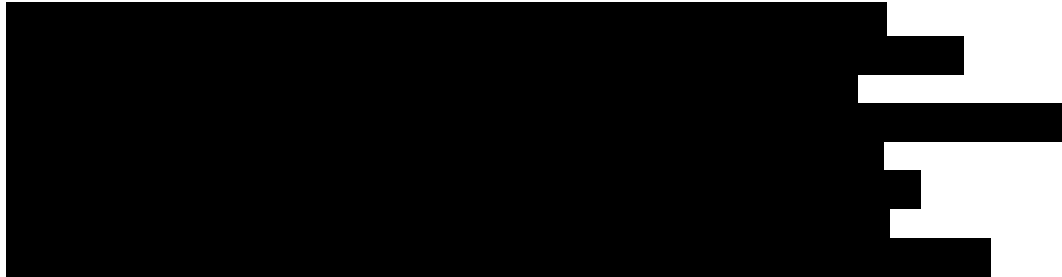

A large rectangular area of the document is completely redacted with a solid black box, obscuring the table content.A large rectangular area of the document is completely redacted with a solid black box, obscuring the table content.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. Whether the respondent's corporate headquarters will be located in Florida (it is not a subsidiary of or a joint venture with any other entity whose principal office will be located outside of Florida).
2. The extent to which operational functions (claims processing, enrollee/member services, provider relations, utilization and prior authorization, case management, disease management and quality functions, and finance and administration) will be performed in the State of Florida.

Score: This section is worth a maximum of 15 raw points. Each of the above components is worth a maximum of 5 points each as described below. 5 additional points will be awarded if respondent meets Items 1(a) and 2(a) below.

For Item 1:

- (a) 5 points for corporate headquarters in Florida and no parent or joint venture organization outside Florida;
- (b) 0 points if no relevant corporate headquarters in Florida.

For Item 2:

- (a) 5 points if all functions will be performed in Florida;
- (b) 4 points for 6-7 functions to be performed in Florida;
- (c) 3 points for 4-5 functions to be performed in Florida;
- (d) 2 points for 2-3 functions to be performed in Florida;
- (e) 1 point for 1 function to be performed in Florida;
- (f) 0 points for no functions to be performed in Florida;
- (g) 0 points if only community outreach, medical director and State administrative functions will be performed in Florida.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

This page is intentionally left blank

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 4 – Contract Performance (Statewide):

The respondent shall state whether, in the past five (5) years (since July 14, 2012), it has voluntarily terminated all or part of a managed care contract under which it provided health care services as the insurer; has had such a contract partially or fully terminated before the contract end date (with or without cause); has withdrawn from a contracted service area; or has requested a reduction of enrollment levels. If so, describe the contract; the month and year of the contract action; the reason(s) for the termination, withdrawal, or enrollment level reduction; the parties involved; and provide the name, address and telephone number of the client/other party. If the Contract was terminated based on the respondent's performance, describe any corrective action taken to prevent any future occurrence of the problem leading to the termination. Include information for the respondent as well as the respondent's affiliates and subsidiaries and its parent organization and that organizations' affiliates and subsidiaries.

Response:

For more than 14 years, Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health) has been one of the most successful local health plans in Florida and has continually adapted, tailoring solutions to assist the Florida Agency for Health Care Administration (AHCA) to meet its goals of improving the lives of Floridians by providing quality, cost-effective, and accessible health care solutions and programs. Our service to AHCA and to Florida communities precedes Medicaid reform in Florida, and we are thriving in the post-Medicaid reform era, now serving more than 630,000 members. In addition, Simply's ultimate parent organization, Anthem, Inc., is one of the nation's leading health benefits companies and has coordinated Medicaid and state-sponsored plan benefits for low-income populations for more than 26 years.

Together with Simply, our affiliate health plans, currently serve more than 6.5 million individuals across 19 states and the District of Columbia. Within each of these contracts, Simply and our affiliate health plans have been highly reliable and accountable sources of managed health care for a variety of populations. We have never had all or part of a managed care contract partially or fully terminated, as attested to below. We remain committed to a partnership with AHCA in serving Medicaid members throughout the state of Florida.

1. ENROLLMENT LEVEL REDUCTIONS OR VOLUNTARILY TERMINATION OF ALL OR PART OF A CONTRACT

Clear Health has not requested enrollment level reductions or voluntarily terminated all or part of a contract in the last five years. Additionally, neither our ultimate parent company, Anthem, Inc., nor our affiliate health plans administering Medicaid and other state-sponsored contracts, have requested enrollment level reductions or voluntarily terminated all or part of a contract in the last five years.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

2. TERMINATIONS DUE TO PERFORMANCE

Clear Health has not had a managed care contract terminated or not renewed by a state client for any reason, including performance, within the past five years. Additionally, within the past five years, none of the other managed care subsidiaries of our ultimate parent company, Anthem, Inc., nor our affiliated health plans administering Medicaid and other state-sponsored contracts, have had a state-sponsored health program contract terminated or not renewed for non-performance or poor performance.

3. TERMINATIONS FOR PERFORMANCE ISSUES RELATED TO PATIENT CARE

Clear Health has not had a managed care contract terminated or not renewed by a state client within the past five years for any reason, including the provision of patient care. Additionally, within the past five years, none of the other managed care subsidiaries of our ultimate parent, Anthem, Inc., nor our affiliate health plans administering Medicaid and other state-sponsored contracts, has had a state-sponsored health program contract terminated or not renewed for non-performance or poor performance for any reason, including the provision of patient care.

4. TERMINATIONS FOR PERFORMANCE ISSUES RELATED TO PROVIDER NETWORK MANAGEMENT, CLAIMS PROCESSING OR SOLVENCY CONCERNS.

Clear Health has not had a managed care contract terminated or not renewed by a state client within the past five years related to provider network management, claims processing, or solvency concerns. Additionally, none of the other managed care subsidiaries of our ultimate parent, Anthem, Inc., nor our affiliate health plans administering Medicaid and other state-sponsored contracts, has had a state-sponsored health program contract terminated or not renewed for non-performance or poor performance for any reason, including those related to provider network management, claims processing, or solvency concerns, within the past five years.

As requested by the Agency in its response to Vendors' questions – Question No. 431 - we provide additional information Anthem, Inc.'s commercial contracts:

Anthem, Inc.'s subsidiaries have more than 31 million medical members representing a 28 percent market share of the commercially insured population. Unlike contracts for state-sponsored business, commercial contracts typically have a one- or two-year contract term, and as is typical in the commercial market, these do not generally "terminate" outside of the normal course of such contract term. Rather, contracts generally continue through the defined end dates, and certain purchasers simply choose not to renew for subsequent terms, or enter into new contracts. As noted in our response, neither Simply nor any of our affiliates have had a state-sponsored contract terminated.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent or parent or subsidiary or affiliates have requested enrollment level reductions or voluntarily terminated all or part of a contract.
2. The extent to which the respondent or parent or subsidiary or affiliates has had contract(s) terminated due to performance.
3. The extent to which the respondent or parent or subsidiary or affiliates had terminations for performance issues related to patient care rather than administrative concerns (e.g., reporting timeliness).
4. The extent to which the respondent or parent or subsidiary or affiliates had terminations for performance issues related to provider network management, claims processing or solvency concerns.

Score: This section is worth a maximum of 20 raw points with each of the above components being worth a maximum of 5 points each as described below.

For Item 1:

- (a) 5 points for no voluntary termination of all or part of a contract, no requests for enrollment level reduction and no service area withdrawals;
- (b) 0 points for any voluntary terminations, requests for enrollment level reductions, or service area withdrawals.

For Item 2:

- (a) 5 points for no involuntary terminations;
- (b) 0 points for any involuntary termination based on performance.

For Item 3:

- (a) 5 points for no contract terminations related to patient care;
- (b) 0 points if termination related to patient care.

For Item 4:

- (a) 5 points for no contract terminations related to provider network management, claims processing or solvency concerns;
- (b) 0 points if termination related to performance issues related to provider network management, claims processing or solvency concerns.

GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

B. Agency Goals

SRC# 5 – Disease Management (DM) Program (Statewide):

The respondent shall describe its proposed approach to implementation of specific disease management programs and how they will be used to advance the Agency's goals as stated in **Attachment A**, Instructions and Special Conditions, **Section A.**, Overview, **Sub-Section 15.**, Program Objectives and Goals, of this solicitation. The respondent's description shall include:

- a. A description of each proposed disease management program;
- b. A description of the algorithm used to identify and stratify eligible enrollees by severity and risk level;
- c. A description of the evidence-based guidelines utilized in the approach;
- d. A description of how disease management programs are integrated with case management/care coordination programs; and
- e. A description of performance metrics used to evaluate the efficacy of the disease management program, including cost-savings, increase in treatment adherence, and measurement of the impact on potentially preventable events, including relevant experience to provide support for the use of the specific performance metrics.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health has been providing comprehensive disease management (DM) and case management services to Florida Medicaid managed care enrollees (members) living with HIV/AIDS and other co-morbidities since February 2012. Our comprehensive, evidence-based approach has been built based upon the Ryan White program and Medicare Special Needs Plan (SNP) model of care. It reduces acute episodes that may result in potentially preventable admissions, readmissions, and emergency department (ED) visits and improves quality of life for our members.

Clear Health was the first Managed Care Plan in Florida to exclusively serve the HIV/AIDS population, and we are the largest HIV/AIDS specialty plan in the state and in the nation. Our HIV/AIDS DM and Case Management program is very different than more traditional DM approaches. It is shaped by our extensive experience and expertise serving members with HIV/AIDS, and is delivered with heart by our dedicated team who knows the disease both professionally and personally. Our program aims to touch every member and is the foundation of our model of care. It:

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Offers integrated case management and DM services to all our members to address the unique care coordination, access, and other challenges faced by persons living with HIV/AIDS
- Provides early identification, assessment, care planning, and education based on assessment of the member's health risks and other chronic conditions, review of progress towards goals, and outcome reviews
- Uses clinicians, with support of social workers as needed, to deliver HIV disease education, provide treatment adherence support, coordinate services and transportation, collaborate with local HIV/AIDS resources and community-based organizations, and monitor the member's condition according to evidence-based guidelines in partnership with the member's PCP (typically an infectious disease specialist) and HIV/AIDS specialists
- Has a dedicated Medical Director who has specific expertise treating our specialty population
- Collaboratively engages with Medical Directors in specialties such as behavioral health (BH), oncology, endocrinology and geriatrics through our parent company, Anthem
- Seamlessly integrates HIV/AIDS DM and case management with DM for other co-morbidities using our seven NCQA accredited DM programs and five additional DM programs designed to address common conditions in our membership

Due to our unique model and status as a HIV/AIDS specialty plan, this narrative outlines our overall HIV/AIDS DM and case management approach first. A description of our other DM programs, including the programs referenced in the ITN (cancer (oncology), diabetes, asthma, hypertension, BH, and substance abuse (substance use)), follows our HIV/AIDS DM and Case Management program description. Except for pregnancy and active cancer treatment, HIV/AIDS is the highest priority condition on our disease hierarchy, but we also holistically address other co-morbidities through a combination of NCQA-accredited and "home grown" DM programs tailored to the special needs of our membership.

1. INNOVATIVE AND EVIDENCE-BASED APPROACH FOR HIV/AIDS

Clear Health offers HIV/AIDS DM and case management services to all our members resulting in a higher rate of participation. Our comprehensive approach focuses on the whole health of the member and addresses common co-morbidities such as hypertension, substance use and mental health conditions. We assign every member participating in our HIV/AIDS DM and Case Management program a Case Manager (Managed Care Coordinator) knowledgeable in medical, BH, and social support service needs of persons living with HIV/AIDS. Many of our Managed Care Coordinators have dedicated their careers to improving the health of people living with HIV/AIDS, and all are very familiar with available local resources and the specialty providers who most frequently serve our members. In assigning members to a Managed Care Coordinator, we consider many factors including member preference as it relates to language (for example, English, Spanish, Creole), gender preference, age, cultural factors, and sexual orientation.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

**** RESULTS & SUCCESSES:** Our Managed Care Coordinators Receive High Marks from Members

In 2016, 93.83 percent of members reported they are always treated with respect and 97.52 percent of members reported they “agree” or “somewhat” agree that we answer all their questions.

We make monthly HIV/AIDS focused trainings, including those through the AIDS Education and Training Centers (AETC) available to our Managed Care Coordinators so they can network with available community resources and maintain up-to-date knowledge of the disease and best practices to treat the disease and support our members.

The program provides each member that consents to participate or opts-in with integrated DM and case management services, HIV disease education, treatment adherence support, coordination of transportation, and coordination of services for primary and specialty care. We assign members to HIV-experienced PCPs and refer them to HIV/AIDS trained and experienced specialists in our accessible network. Children and adolescents with HIV/AIDS are similarly assigned and referred to the appropriate qualified providers for care and treatment.

Our Managed Care Coordinators work with local HIV/AIDS service organizations such as Ryan White agencies and similar agencies or other community-based organizations that can assist members with non-Medicaid covered services such as food banks, legal or housing assistance, support groups/psychosocial counseling, clinical trials, and substance abuse-related programs designed to address the issues and concerns of persons living with HIV disease.

Management of our members’ comorbid conditions has become an increasingly important part of our HIV/AIDS DM and Case Management program. Our membership is aging as treatments have improved and more members are living longer with chronic conditions like hypertension. To better serve this evolving membership, we continue to expand our clinical team to fully address our members’ complex medical needs, BH conditions, and polypharmacy issues.

Managed Care Coordinators monitor our members’ conditions in close partnership with our providers. They monitor laboratory tests and results, utilization of services (for example, urgent care, ED, and hospital admissions and readmissions), and appropriate use of medication. They review pharmacy reports to monitor patient use of antiretroviral/antibiotic/antifungal drugs and other agents. Managed Care Coordinators communicate with members, their providers, and HIV/AIDS community agency case managers (if applicable) by phone, mail, and in-person. Members also have access to a 24-hour Nurse help line to consult with a clinician on potential non-emergency needs at any time.

**EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)**

We measure the effectiveness of our HIV/AIDS DM and Case Management program using the following measures:

- Members identified with low CD4 count (< 200) that increase their CD4 count to > 200 within 12 months
- Members adhering to Highly Active Antiretroviral Therapy (HAART)
- Members who successfully meet their goals
- High member satisfaction with DM
- Members who accept referral for BH assessment and treatment who are identified for potential depression or other BH needs, but are not currently receiving treatment
- Members who are identified as smokers and would like assistance in quitting who accept referral to a Smoking Cessation program

As previously stated, our HIV/AIDS DM and Case Management program addresses co-morbidities that are secondary but integral to the successful management of HIV, including but not limited to diabetes, cardiovascular disease, and hypertension. Plans of care address co-morbidities according to member goals and objectives as needed. We follow standard clinical guidelines for each disease process, and special considerations for people diagnosed with HIV/AIDS, as appropriate. These programs are described in further detail below.

1.1. Innovative and Evidence-Based Approach for Managing Comorbid Conditions

Clear Health manages our members comorbid conditions by addressing gaps in care and coordination of service needs, improving member understanding of the disease process, and promoting self-management and member engagement. In addition to HIV/AIDS DM and case management, we offer 12 DM programs to address medical comorbid and behavioral health conditions. Seven of these programs are accredited by the NCQA, and all of the programs are seamlessly integrated in our HIV/AIDS DM approach. They are proactive and member-centered, and notable because of their persistent focus on closing gaps in care.

We realize our members must make significant changes to their lifestyles and daily living behaviors to successfully manage their comorbid chronic conditions. We drive positive outcomes by encouraging member education and self-care through motivational interviewing and as part of a holistic model that supports all of a member's behavioral, social, and physical health care needs. We engage the member, family, caregivers, providers, and others involved in the member's care

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

to provide individualized services and interventions tailored to the member. We also leverage the analytic capabilities of our Case Management System to identify gaps in care and use this information to contact members and providers to encourage receipt of needed services.

Our DM programs address the comorbid conditions listed below. Conditions identified with an asterisk (*) represent our DM programs that are accredited by the NCQA.

- Alzheimer's/dementia
- Asthma*
- Bipolar Disorder (BH)
- Cancer (Active and Post-active Oncology and End of Life)
- Chronic obstructive pulmonary disease (COPD)*
- Congestive heart failure*
- Coronary artery disease*
- Diabetes*
- Hypertension
- Major depressive disorder* (BH)
- Schizophrenia* (BH)
- Substance use

All our DM programs, including HIV/AIDS DM and case management, support member behavioral, social, and physical healthcare needs by providing individualized services for members. This is accomplished through the use of comprehensive health assessments, disease stratification, and the development of tailored member interventions while working collaboratively with the member and provider. Our member-centric approach focuses on providing the tools and educational support necessary for members to effectively manage their health care needs.

All our DM programs, including HIV/AIDS DM and case management, include the following components:

- Well-defined disease algorithm
- Comprehensive population identification processes, supported by our proprietary risk stratification model
- Identification of gaps in care and outreach to address missed care opportunities in a timely fashion
- Evidence-based practice guidelines that are continuously reviewed and updated
- Collaborative practice models to include both the member's PCP and other providers
- Member self-management education, including prevention, behavior modification, and compliance
- Process and outcomes measurement, evaluation, and management

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our DM programs, including HIV/AIDS DM and case management, are designed to:

- Identify members meeting the enrollment criteria for specific DM programs with stratification by severity and risk level
- Enhance engagement in DM programs
- Educate members about our DM programs
- Address comorbid conditions and consider the whole health of the member
- Improve the understanding of disease processes, including education based on member assessment of health risks and chronic conditions
- Address symptom management
- Address emotional issues of the caregiver as applicable
- Address behavioral management issues
- Medication Management and review to prevent adverse effect or interactions from contraindicated medications
- Reinforce evidence-based practice guidelines to promote members' informed decision-making
- Promote self-management through personalized member intervention
- Identification of, and linkage to, available community support services
- Improve member quality of life
- Address gaps in care and interface with member's PCP/specialist for care plan feedback and as needed for coordination of care
- Collaborate to develop member-centered goals and interventions so each member receives an individualized plan of care updated at least annually or sooner based on changes in member condition(s) or needs
- Support relationships between members and their providers and effective communication with providers
- Increase provider awareness of DM programs
- Reduce acute episodes requiring hospital admission, readmission, or ED visits
- Continuously assess the program with analysis for process improvement and member satisfaction

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

According to the U.S. Department of Health and Human Services, Office of Disease Prevention and Health Promotion, health literacy is a critical component to effectively managing chronic conditions. “Choosing a healthy lifestyle, knowing how to seek medical care, and taking advantage of preventive measures require that people understand and use health information. The ability to obtain, process, and understand health information needed to make informed health decisions is known as health literacy.”

Our Managed Care Coordinators prioritize and address opportunities to improve health literacy. Through individualized planning, education, and goal setting, Managed Care Coordinators help fill knowledge deficits and enhance the member’s understanding regarding HIV/AIDS, CD4 and viral load, medical comorbidities and behavioral health conditions, complications, and the importance of preventive services, and meeting plan of care goals.

When we identify a comorbid condition, the member receives educational mailings which include general information about the member’s condition(s), tips for managing it, and how to avoid triggers or complications. Tobacco use is especially harmful for individuals living with HIV/AIDS and increases the risk of diseases such as lung cancer or even death. Because a sizable percentage of our members smoke (35 percent), we provide helpful resources and materials to help them quit. Our Managed Care Coordinators use these cessation tools as supplemental tools to reinforce the coaching they provide. They also refer members to our Quit Smoking and Using Tobacco Healthy Behaviors program.

Please see Table 5-1 in Attachment SRC# 5-1: DM Educational Materials for an inventory of our member outreach and educational materials. We developed these materials paying careful attention to reading level, clarity, simplicity, and cultural sensitivity to improve member understanding and health literacy. We update and add to these materials as dictated by advances in science, best practices, and available community resources.

When we send members educational materials and other communications by mail, we pay attention to maintaining confidentiality regarding our member’s condition. Our mailings use an alternative logo to protect the member’s privacy. The alternative logo does not include our full name or signature red ribbon, which many people associate with HIV/AIDS.

Members are prioritized for additional clinical outreach by Managed Care Coordinators according to risk levels. Our risk stratification approach is described in further detail below, and is based on our unique algorithm and inputs from a comprehensive health assessment, an HIV/AIDS Health Risk Assessment, and other information.

Our comprehensive health assessments capture a broad range of domains and information to determine member needs, interventions available to members, and how interventions should be targeted to members. The comprehensive health assessments identify:

- Condition-specific indicators, including compliance with HIV regimen and follow up care
- Preventive care activities
- Health behaviors (such as nutrition, physical activity, negative effects of tobacco, drug, or alcohol use)

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Medical co-morbidities
- BH co-morbidities
- Depression screening
- Substance use and abuse
- Social, economic, self-care needs, ability, and desire to adhere to an available medical treatment plan
- Special needs (for example, hearing and vision impairment, language, cognitive defects, and physical limitations)
- Psychosocial needs:
 - Beliefs and concerns about the condition and treatment
 - Perceived barriers to meeting treatment requirements
 - Access, transportation, and barriers to obtaining treatment
 - Cultural, religious, and ethnic beliefs
 - Caregiver/family support
 - Social determinants of health

Comprehensive health assessments and disease stratification drive interventions which are then outlined in the member's plan of care. In the development of member interventions, the Managed Care Coordinator prioritizes special considerations for persons living with HIV/AIDS and addresses:

- Gaps in care
- BH needs
- Psychosocial needs
- Caregiver/family support needs
- Need for caregiver/family consent
- Housing needs/homelessness

Member interventions may include but are not limited to:

- Consultation with BH staff for BH needs, substance use disorder, or positive depression screening
- Assistance to obtain needed care (e.g., DME items such as walkers, wheelchairs, testing strips)
- Alternative forms of member materials to include TTDY, Braille, recorded materials, reading levels and other languages
- Social support systems when caregiver/family support is not available or is limited (such as community resources, including Ryan White funded programs)
- Encouraging family participation in education and plan of care goals

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our comprehensive health assessments use branch logic to promote discussion and engage members in developing their plan of care. Managed Care Coordinators listen closely to members and identify patterns to determine how well the member understands their condition and makes decisions, discern their motivation, and facilitate a focus on solutions to reach the member's goals. When complete, the plan of care reflects the member's strengths and preferences. The Managed Care Coordinator assesses any member ambivalence and readiness for individual change, as well as barriers to achieving goals, before establishing interventions included in the plan of care.

A member's risk level determines the frequency of follow-up with our Managed Care Coordinators. Members with the highest needs are contacted more frequently than stable members who have resolved their gaps in care and have a self-care plan in place. However, we use these as guidelines only. The member can always request additional support or follow-up and our Managed Care Coordinators typically exceed the recommended frequency of contact based on the member's needs and unique situation. Assigned Managed Care Coordinators are available during business hours, Monday through Friday. When the Managed Care Coordinator is unavailable, the member can talk to a designated back-up Managed Care Coordinator for assistance. Additionally, members have access to an emergency back-up Managed Care Coordinator through an after-hours telephone line.

Through their Managed Care Coordinator, members have access to the full array of expertise within our organizational structure. Managed Care Coordinators collaborate with other team members, including BH Managed Care Coordinators and Medical Directors, through a variety of outlets to assure the member is receiving the best care possible. For example, Managed Care Coordinators may prepare and present their member's case at peer rounds for validation of the plan of care and to obtain suggestions to better manage the member. Rounds provide an opportunity to consult with Clear Health physicians, pharmacists, BH clinicians, nurses, social workers, and other members of the multi-disciplinary team (MDT) regarding medical management, medications, and suggested modifications to the plan of care. The team discusses innovative approaches to engage the member to commit to a plan of care and to set realistic goals. It also identifies community services and agencies that provide needed assistance or specific services.

1.a. Oncology DM

We encourage members to stay up-to-date on screenings such as mammograms and colonoscopies to increase the likelihood of early cancer detection and treatment. We also use programs such as our Quit Smoking and Using Tobacco Healthy Behaviors program to encourage behavioral change and reduce the incidence of modifiable risk factors.

Clear Health built our Oncology and End of Life Program using a comprehensive approach that begins with prevention and, for members with cancer, follows members through treatment to compassionate end-of-life support as needed. Our approach includes the following tiers:

- Active Engagement: We provide DM and case management for high-risk members in active cancer treatment.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

- **Post Active Engagement and Survivorship:** We provide information for follow up care and survivorship support to assist members through the post-treatment phase of their illness. This support helps members adjust to physical and emotional changes they may be experiencing, as well as anxiety about potential recurrence of the disease.
- **End of Life Support:** For our members with a terminal cancer diagnosis, we help coordinate services, and provide decision support for members and their families as they transition to hospice or palliative care.

Our DM programs are based on the hierarchy of disease. Cancer is the highest on the disease hierarchy, followed by HIV. This means that we place members in active cancer treatment in the Oncology and End of Life DM program, but we also holistically manage their HIV/AIDS condition and any other comorbidities. Of the members enrolled in our Oncology and End of Life DM program in 2016, 98.9 percent were actively engaged and working with a Managed Care Coordinator for goal setting and care planning.

Our Oncology and End of Life DM program provides members receiving active cancer treatment or post-active treatment case management and DM services from a local Managed Care Coordinator. An individualized plan of care is developed with the member and focuses on adherence to treatment plans, including medication management, monitoring symptoms, identifying when to seek medical attention, and identifying transportation support for PCP and specialty visits. Our Managed Care Coordinators encourage members to maintain a care journal, and monitor emotional side effects of the disease in both the member and any identified caregiver(s).

**** INNOVATION: Leveraging the American Cancer Society's Extensive Resources**

Our Managed Care Coordinators leverage the resources and community supports available locally and nationally, including online support groups and resources through the American Cancer Society Clinician's Portal. We help members through special access to the American Cancer Society's web portal, which connects members to many valuable resources such as lodging, breast cancer support, personal health manager, support groups, cleaning services and help with appearance-related side effects. **

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

As needed for members in the late stages of cancer, Managed Care Coordinators also coordinate palliative and supportive care as part of their interactions with the member. If there are behavioral management issues or a positive depression screening, the Managed Care Coordinator refers the member to our BH Managed Care Coordinators who perform an additional assessment and, if indicated, connect the member to BH resources and supports in our provider network or in the member's community.

In addition to our standard DM program evaluation measures (for example, ED utilization, inpatient admissions, medication adherence), we measure the effectiveness of our Oncology and End of Life DM program in improving cancer management with the following measures:

- Members who successfully meet their goals
- Members in active treatment linked to the American Cancer Society
- High member satisfaction with DM
- Members who accept referral for BH assessment and treatment who are identified for potential depression or other BH needs, but are not currently receiving treatment
- Members who are identified as smokers and would like assistance in quitting who accept referral to a Smoking Cessation program

1.b. Diabetes DM

Diabetes is the sixth most frequent reason for outpatient visits for Clear Health members age 20 to 64 and the third for members age 65 and older.

1.d. Hypertension DM

Hypertension is the number one comorbidity for Clear Health members. Although there is no evidence that HIV infection causes hypertension, HIV is associated with a higher incidence of hypertension. Our DM program for hypertension delivers targeted coaching and education about the disease, helps members understand food labels, and emphasizes the impact of healthy eating on their disease. Managed Care Coordinators assure members obtain a blood pressure monitor through their OTC benefits and encourage them to maintain a log of readings. They also emphasize the role tobacco use plays in worsening the member's condition, and [REDACTED]

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

[REDACTED]

We measure the effectiveness of our Hypertension DM program with the following measures:

- Controlling blood pressure
- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage

**** REAL STORY: Care Coordination and Disease Management Give Member Renewed Hope and Improved Health**

Reggie was diagnosed with HIV 10 years ago, and also has hypertension and hepatitis C. He was out of care for a long time after moving from Clearwater to Ocala. At age 62, Reggie was living in extreme poverty and isolation, often not eating for days. With no money for transportation, he was not getting care from a physician or taking his medications consistently for any of his conditions when he became our member.

When Lara, our Managed Care Coordinator, asked if he'd like to participate in our case management and hypertension disease management programs, Reggie was receptive. After talking with him, she realized his needs went beyond health care, and she arranged transportation for him to a local foodbank where he received food that same day for the month. She also paired him with a PCP and infectious disease specialist of his choosing close to his home and arranged for transportation to his appointments.

Reggie is continuing to take his medications and follow up with his doctors. He even took Lara up on her offer to participate in a smoking cessation program. She continues to monitor him – watching for signs of issues with his hypertension and viral load – and encourages him to live a healthy lifestyle. His tone of voice has changed markedly from worried to full of hope as he told Lara that, after many years, he had reconnected with his sister, Delores, who brings him food. Reggie calls Lara to ask questions sometimes, and the smile in his voice when he says a soft, "thank you," makes her smile too. ******

1.e. Mental Health (BH) DM

Many of our members have co-occurring BH conditions, and 34 percent have been diagnosed with severe mental illness (SMI). Integration of physical and BH health services is at the core of our BH DM program. We recently added many clinical and non-clinical Managed Care Coordinators with BH and substance use disorder training and experience to more holistically and effectively serve our population with highly complex physical and BH needs. We also use our Member Advisory Committee (MAC) meetings to identify unique barriers for HIV/AIDS members trying to access BH services so that we may better address those barriers.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Clear Health is working to increase rates of BH screenings by PCPs. The presence of several BH and substance use diagnoses are known to be common among people living with HIV/AIDS. The relative frequency of these diagnoses in Florida appears lower than has been found in published studies, suggesting that members with BH and substance use conditions may not be getting screened and diagnosed, or are not being diagnosed accurately, and therefore are not being referred for services that could improve their quality of life and enhance the effectiveness of medical treatment. Our interventions focus on provider education regarding accurate coding and the DM and BH Case Management programs we offer, member education regarding the importance of discussing BH concerns with a provider, and system improvements to enhance internal reporting.

We measure the effectiveness of our Major Depressive Disorder DM program by monitoring the following measures:

- Antidepressant medication management (acute and continuation phase)
- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage

**** RESULTS & SUCCESSES:** Clear Health Improves Antidepressant Medication Management
Our 2017 HEDIS score for anti-depressant medication management is 54.5 percent, which is above the 50th NCQA percentile and represents a five percent increase from 2016. ******

1.e.2. Schizophrenia DM (BH)

We measure the effectiveness of our Schizophrenia DM program with the following measures:

- Antipsychotic medication adherence
- Diabetes screening for people with schizophrenia
- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage

**** RESULTS & SUCCESSES:** High Screening Rates for Diabetes
Members with schizophrenia are at an increased risk of diabetes, therefore screening and monitoring is very important to provide appropriate care. Our 2017 HEDIS rate for the Diabetes Screening for People with Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medication measure was 98.11, which is above the 90th percentile. ******

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

1.e.3. Bipolar Disorder DM (BH)

We measure the effectiveness of our Bipolar DM program with the following measures:

- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage

1.f. Substance Use and Abuse DM

Addiction is a preventable chronic, relapsing, treatable brain disease, for which we promote person-centered, evidence-based, integrated approaches to DM. We engage members with the goal of reducing harm, improving quality of life, and, ideally, helping members abstain from their addiction. We use motivational interviewing techniques informed by the evidence-based Stages of Change model to improve and maintain member engagement. We also involve family members and significant others in the member's plan of care, if the member agrees, to improve odds of sustaining recovery.

When a member with substance use concerns exhibits readiness to change his or her behaviors, the Managed Care Coordinator works closely with the BH Managed Care Coordinator, who identifies and refers the member to treatment services, including the Ryan White program for inpatient substance use treatment, guides the member through the process, and connects them with additional supports and services. To complement evidence-based substance use disorder treatment, the Managed Care Coordinator may also refer the member to a 12-step program or other peer mutual support group.

We measure the effectiveness of our substance use disorder DM program with the following measures:

- Initiation and engagement of alcohol and other drug dependence treatment
- ED utilization
- Inpatient admissions

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage by monitoring the initiation and engagement of alcohol and other drug dependence treatment measures

**** RESULTS & SUCCESSES:** Clear Health Engages Members in Alcohol Dependence Treatment

Our 2017 HEDIS score for Initiation and Engagement of Alcohol or Other Drug (AOD) Dependence Treatment: Initiation of AOD treatment is 43 percent, which exceeds the 50th NCQA percentile. ******

1.1. Other DM Programs

In addition to the DM programs outlined above, Clear Health offers DM programs for Alzheimer's/dementia; chronic heart failure; COPD; and coronary artery disease.

1.1.2. Alzheimer's/Dementia DM

Our members are at risk of experiencing a decline in mental processes, thinking, and cognitive functions as they age and/or their CD4 count falls. Additionally, the number of individuals living with Alzheimer's disease in Florida is growing, and nearly 12 percent of the population have been diagnosed with the disease. As our membership ages, we are also seeing more members with this disease. Alzheimer's and dementia patients can require 24-hour care, especially in later stages of the disease.

Our DM program for Alzheimer's/dementia supports members living with Alzheimer's and similar conditions and their caregivers. Managed Care Coordinators outreach to caregivers and deliver a clinical assessment of the caregiver's knowledge, ability, and willingness to support our member. The caregivers receive education and targeted coaching about caregiving, advance directives, home safety, and preventing falls. The Managed Care Coordinator may refer the caregiver to external resources such as Alzheimer's Association support groups, Florida Alzheimer's Disease Initiative (ADI), and online peer support programs.

We measure the effectiveness of our Alzheimer's/Dementia DM program with the following measures:

- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

1.1.3. Congestive Heart Failure DM

We measure the effectiveness of our congestive heart failure DM program with the following measures:

- Persistence of beta-blocker treatment after a heart attack
- Annual monitoring for patients on persistent medications – ACE or ARB
- Assessing tobacco use: total identified and participating
- Influenza vaccination
- Pneumococcal vaccination
- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, ability to self-report, and member's perceived ability to self-manage

**** RESULTS & SUCCESSES:** Clear Health Performs in 95th Percentile for Annual Monitoring of Patients on ACE/ARB Medications

Our 2017 HEDIS score for Annual Monitoring for Patients on Persistent Medications – ACE or ARB is 98.4 percent, which is in the 95th NCQA percentile. ******

1.1.4. COPD DM

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

We measure the effectiveness of our COPD DM program with the following measures:

- Pharmacotherapy management of COPD exacerbation: corticosteroid within 14 days
 - Pharmacotherapy management of COPD exacerbation: bronchodilator within 30 days
 - Assessing tobacco use: total identified and participating
- 
- 

- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, and the member's perceived ability to self-manage

1.1.5. Coronary Artery Disease DM

We measure the effectiveness of our coronary artery disease DM program with the following measures:

- Persistence of beta-blocker treatment after a heart attack
- Annual monitoring for patients on persistent medications – ACE or ARB
- Assessing tobacco use: total identified and participating
- Influenza vaccination
- Pneumococcal vaccination

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- ED utilization
- Inpatient admissions
- Member adherence measures including medication adherence, plan of care adherence, ability to self-report, and the member's perceived ability to self-manage

1.2. Evidenced-based Programming

Each of our DM programs incorporate evidence-based clinical guidelines to dictate, guide, and design our case management approach to each DM program.

Our integrated DM programs support the practitioner-patient relationship and emphasize self-care to prevent condition exacerbation and complications using evidence-based clinical practice guidelines and member empowerment strategies intended to improve overall health. Our DM Clinical Guidelines are tools that help practitioners make decisions about appropriate health care for HIV/AIDS and managing co-occurring conditions.

Our HIV/AIDS DM and Case Management program is based on the following evidence-based guidelines: HIV/AIDS: U.S. Department of Health and Human Services (DHHS); Guidelines for the Use of Antiretroviral Agents in HIV-1-Infected Adults and Adolescents; and the Primary Care Guidelines for the Management of Persons Infected with Human Immunodeficiency Virus published by the Florida AIDS Education and Training Center (AETC).

Our other DM programs are founded on the following evidence-based guidelines:

- Cancer: National Comprehensive Cancer Network (NCCN); American Society of Clinical Oncology (ASCO); American Cancer Society (ACS); National Cancer Institute at the National Institutes of Health (NCI)
- Diabetes: Standards of Medical Care in Diabetes – 2017 (American Diabetes Association)
- Asthma: EPR 3: Guidelines of Asthma. July 2007; EP Report 3: Guidelines for the Diagnosis and Management of Asthma (NHLBI)
- Hypertension: The Fourth Report on the Diagnosis, Evaluation, and Treatment of High Blood Pressure in Children and Adolescents, U.S. Department of Health and Human Services National Institutes of Health National Heart, Lung, and Blood Institute; the Eighth Report of the Joint National Committee on Prevention, Detection, Evaluation, and Treatment of High Blood Pressure (JNC 8) (Report from the Panel Members Appointed to the Eighth Joint National Committee (JNC 8), Journal of the American Medical Association
- Behavioral Health (major depressive disorder, schizophrenia, bipolar disorder): Treatment of Patients with Major Depressive Disorder amended by the following Guideline Watch, October 2010 (American Psychiatric Association); Depression – The NICE Guideline on the Treatment and Management of Depression in Adults, 2010 (National Collaborating Centre for Mental Health, commissioned by the National Institute for Health and Clinical Excellence; Practice Parameter for the Assessment and Treatment of Children and Adolescents with Depressive Disorders, June 2007 (American Academy of Child and Adolescent Psychiatry); Women's Health Care Physicians

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

– November 2015 (ACOG); Treatment of Anxiety Disorders (NIMH); Medication Assisted Treatment (SAMHSA); Screening and Behavioral Counseling Interventions in Primary Care to Reduce Alcohol Misuse (USPSTF); Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition (AHRQ); Screening for Depression (USPSTF); American Psychiatric Association: Treatment of Patients with Schizophrenia Second Edition, 2010; Practice Guideline for Treatment of Patients with Bipolar Disorder in Adults, as amended by the Guideline Watch from the American Psychiatric Association (APA), November 2005

- Substance use: Committee Opinion No. 633: Alcohol Abuse and Other Substance Use Disorders: Ethical Issues in Obstetric and Gynecologic Practice: July 2015 (ACOG) Guidelines for the Identification and Management of Substance Use and Substance Use Disorders in Pregnancy, World Health Organization (2014); CDC Guideline for Prescribing Opioids for Chronic Pain — United States, 2016, Centers for Disease Control and Prevention

- Alzheimer's/dementia: New Diagnostic Criteria and Guidelines for Alzheimer's Disease (Alzheimer's Association); Guideline Watch (October 2014): Practice Guideline for the Treatment of Patients with Alzheimer's Disease and Other Dementias

- Congestive heart failure: A Report of the American College of Cardiology Foundation/Heart Association Task Force on Practice Guidelines: 2013 ACCF/AHA Guideline for the Management of Heart Failure

- COPD: Global Initiative for Chronic Obstructive Lung Disease (GOLD): Global Strategy for the Diagnosis, Management, and Prevention of Chronic Obstructive Pulmonary Disease, Updated 2016

- Coronary artery disease: A Guideline From the American Heart Association and American College of Cardiology Foundation (AHA/ACCF): AHA / ACCF Secondary Prevention and Risk Reduction Therapy for Patients With Coronary and Other Atherosclerotic Vascular Disease: 2011 Update; A Scientific Statement From the American Heart Association Council for High Blood Pressure Research and the Councils on Clinical Cardiology and Epidemiology and Prevention; A Guideline from the American Heart Association (AHA): Treatment of Hypertension in the Prevention and Management of Ischemic Heart Disease

- Hypertension: A Scientific Statement From the American Heart Association Council for High Blood Pressure Research and the Councils on Clinical Cardiology and Epidemiology and Prevention A Guideline From the American Heart Association (AHA): Treatment of Hypertension in the Prevention and Management of Ischemic Heart Disease; A Guideline From the American Heart Association: Effectiveness-Based Guidelines for the Prevention of Cardiovascular Disease in Women, 2011 Update; A Guideline from the American Heart Association and American College of Cardiology Foundation (AHA/ACCF): AHA / ACCF Secondary Prevention and Risk Reduction Therapy for Patients With Coronary and Other Atherosclerotic Vascular Disease: 2011 Update

Our clinical guidelines are maintained and reviewed by our Office of Medical Policy and Technology Assessment (OMPTA) to ensure our programs are always operating using the most current evidence base. Two dedicated workgroups, one for medical guidelines and one for BH guidelines, review, comment and offer recommendations for adoption, rejection, or revision of a guideline. These interdisciplinary workgroups are called the Clinical Practice and Preventive Health Guidelines (CPG/PHG) Workgroup and the Behavioral Health National Council Advisory

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Subcommittee (BH-NCAC). They include Medical Directors, DM program owners, Clinical Program Development Managers, participating providers, and Clinical and Operations staff.

Our process includes the systematic review of new scientific evidence at least annually for all our DM clinical practice guidelines. We also review our guidelines more frequently when national guidelines change or when substantively new scientific information is published. We begin with a literature search using the National Library of Medicine's PubMed service or other similar service. If there is research indicating a guideline is no longer current, the research is sent to the CPG/PHG Committee or BH-NCAC Subcommittee for review and feedback. Their recommendations are presented to our Quality Improvement Committee (QIC) for review and formal approval.

We develop all staff training materials and program content, for both members and providers, according to our adopted DM clinical practice guidelines, professional clinical and technical literature, governmental research sources, and the recommendations of professional societies and relevant foundations. Separately, our DM Clinical Advisory Group (CAG), composed of providers and DM staff, meets at least quarterly to review member and provider materials for accuracy of clinical content. They also review and carefully consider relevant recommendations made by members, providers, and staff to update program content.

2. OUR DM APPROACH ADVANCES AGENCY GOALS

Our comprehensive DM programs are designed to identify, educate, and coach members to take greater responsibility for their health, wellness, and quality of life. We empower them to adopt improved self-management skills that increase participation in primary and preventive care, enhance health outcomes, and reduce potentially preventable admissions, readmissions, and ED visits.

Specifically, our DM programs directly support many of the Agency's key goals:

- Agency Goal #1: Reducing potentially preventable inpatient and outpatient hospital events, and unnecessary ancillary services

Clear Health has the second lowest rate of potentially preventable hospital admissions (PPAs) in the state, a remarkable achievement given the complex population we serve. Our integrated HIV/AIDS DM and case management approach, as well as our gaps in care focus supports the delivery and receipt of primary and preventive care services and reduces preventable hospitalizations. We define gaps in care as missed care opportunities (for example, annual preventive screenings, routine labs, and medication adherence) for chronic conditions. Managed Care Coordinators use our integrated information systems, like our Case Management System, to easily identify the number of gaps a member has, outreach to the member's provider, and create plans of care to address the gaps related to a member's condition. They also emphasize the importance of preventive care and establishing or maintaining a close relationship with the member's PCP. Our holistic focus on providing comprehensive education and support to give members the tools to self-manage their chronic condition, identifying risk factors and helping members address those risks, and counseling members about when they need to see their provider. We also equip members with knowledge and support to reduce the likelihood of a potentially preventable admission or an ED visit.

- Agency Goal #2: Improving birth outcomes.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We recognize our HIV/AIDS specialty population has an additional need for pre- and post-natal care to avoid HIV transmission to the baby. We refer all pregnant members to our OB Managed Care Coordinator who manages and follows all pre- and post-natal care identified as high risk, up to three months following delivery. We always encourage pregnant members who smoke to participate in our evidence-based tobacco cessation program designed specifically for pregnant members. One of the primary focuses of the Clear Health OB Case Management program is the prevention of HIV/AIDS transmission to the baby by ensuring adherence to HIV/AIDS medication therapy. In addition, the Managed Care Coordinator ensures that the member is treated by an OB with specialization or experience in the treatment of HIV/AIDS. At the time of writing this response, no vertical transmissions from mother to baby have been reported.

3. DM ALGORITHM AND RISK STRATIFICATION APPROACH

3.1. Identification of Members and Comprehensive Health Assessment

All Clear Health members are eligible for DM and case management through our HIV/AIDS DM and Case Management program. Our goal is to intervene early, before members have a potentially preventable hospital admission, readmission, or ED visit or progress to an advanced disease state. We make multiple attempts to contact new members and aim to complete a comprehensive assessment within 30 days of enrollment. We also include an comprehensive health assessment in our new member enrollment packages. As part of the initial health risk assessment, we ask whether the member would like to receive HIV/AIDS DM and case management support. For unresponsive members, we make at least six attempts to contact them over a 90-day period.

We capture comprehensive health assessment results in our Case Management System. This system uses proprietary algorithms to score and stratify members into one of three risk categories based on the comprehensive health risk assessment and our more tailored HIV/AIDS Health Risk Assessment. The risk categories are low, moderate, and high and consider risk factors such as disease severity, co-morbid conditions, socioeconomic factors, medication use and compliance, and utilization patterns. The Managed Care Coordinator may adjust the overall risk level based on additional assessments, communication with the provider, or other information.

Our robust processes and systems integrate information from multiple sources, including claims and encounter data, comprehensive health assessments, and referral information from both internal and external sources, to identify comorbid conditions, modify risk levels, and drive additional outreach and engagement efforts for members who did not indicate a desire to enroll in our HIV/AIDS DM and Case Management program but would benefit from the program. These important sources include but are not limited to:

- New member welcome call screening
- Member self-referral, family members, and caregivers
- Customer Care Representatives and Nurse help line representatives
- Participating providers
- External community-based organizations serving individuals living with HIV/AIDS
- UM team

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Integrated clinical rounds
- Lab reports (for example, low CD4 count)
- Hospital discharge reports
- ED High Utilization Report (monthly)

3.2. Risk Stratification

Our risk stratification algorithm and predictive modeling tools use demographics, clinical data, and historical physical and BH claims data to predict future outcomes, determine the frequency of contact with our Managed Care Coordinators, and identify and refer members with co-occurring conditions to other DM programs. The tools include:

- Our Chronic Illness Intensity Index (CI3), which identifies members who are very ill and those with the most complex health conditions needing intensive case management. The model incorporates specific diagnoses that our team of medical and BH specialists consider clinically impactable and, therefore, particularly amenable to DM and/or case management. It identifies members who have the greatest disease burden and are most likely to benefit from intervention.
- Our Likelihood of Inpatient Admission (LIPA) index, which prioritizes members for outreach by predicting the probability of inpatient services. By evaluating data on the use of hospital services, diagnoses, and demographics, the LIPA model determines a member's probability of a medical/surgical or BH admission within the next 60 days.
- Emergency Room TRIAGE: Predicts likelihood of low-level ED utilization
- STORK: Assesses for a poor pregnancy outcome or NICU admission based on results of our OB High Risk Screener
- Readmission Risk: Recalculates based on the inpatient daily census report to determine the likelihood of readmission
BH health issues that may result in a first-time admission
- Pharmacy: Identifies indicators of over-utilization and possible substance use disorder

Figure 5-1 in Attachment SRC# 5-2: DM Predictive Modeling Tools illustrates our comprehensive suite of predictive modeling tools.

Our predictive model integrates and continuously reviews member eligibility data, claims, number of potential chronic disease care gaps by disease band (CDCG indicator), and encounter information to predict future risk. This monthly process considers claims information, including diagnosis, prescriptions, prior costs, gaps in care, and prior utilization. It also considers individual demographics sourced from member eligibility information to determine individual risk. The process assigns members a clinical profile that indicates their individual levels of risk and risk ranking, physical and behavioral conditions, gaps in care, co-morbidities, and both past and prospective utilization patterns. In this way, we can prioritize member contacts based on clinical risk ranking.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

The comprehensive health assessments identify member needs across a continuum of services and supports. The process includes the use of our comprehensive health assessments to identify and confirm both physical and BH conditions and other-comorbidities, identify additional health concerns (such as cognitive impairments and physical limitations), screen members for substance use and smoking status, evaluate risky behaviors, and assesses both psychosocial and environmental needs, including family, caregiver, and natural supports.

Data collected through the comprehensive health assessments is documented in our Case Management System. It is then automatically channeled through a standardized stratification algorithm to calculate an additional risk ranking used to determine both the intensity and frequency of interventions and care planning tailored to individual member needs. The same information is summarized and communicated to the member's health care team (including PCPs and specialists).

We recognize that our members' needs may frequently fluctuate across the spectrum of services and supports needed to prevent deterioration of their functioning, manage difficult or painful symptoms, preserve their emotional and physical well-being, and avoid potentially preventable hospital admissions, readmissions, and ED visits. We generate risk profiles monthly for each member, and use our Managed Care Coordinators' sound clinical judgement to identify changes in status to swiftly meet a member's changing needs. To help Managed Care Coordinators assess changes, we offer an abbreviated version of the comprehensive health assessments at each follow-up discussion with the member. New information is used to update the member's stratification and risk ranking.

Updated risk profiles contain information on the member's future utilization patterns using our LIPA and Emergency Room Triage predictive models, which identify impending need for hospital or emergency services. Managed Care Coordinators use this vital information to proactively meet additional member needs and work timely to deliver an appropriate plan of care including condition-specific interventions to ensure members receive the right care, at the right time, with the right support.

3.3. Interventions by Stratification and Risk Level

Members are prioritized for clinical outreach by Managed Care Coordinators according to risk levels. These risk levels are described below.

- **Low Risk.** Members stratified as low risk are typically members whose condition is stable, have few co-morbidities, a stable support system, and access to needed care. Example interventions include educational materials to help the member manage his or her disease, referral to community-based resources, follow up contact every 90 days, monitoring of labs and compliance, case management as needed, and onsite and telephonic case management supports, if admitted to the hospital.

- **Medium Risk.** Members stratified as medium risk are most frequently members who need assistance managing their condition(s) and/or accessing care. Managed Care Coordinators contact these members as frequently as needed based on the member's plan of care, but no less than every 60 days. Example interventions include those provided to low risk members as well as:

- Monitoring adherence to treatment guidelines

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Education regarding co-morbid conditions and lifestyle issues
- Helping the member monitor and manage symptoms, including CD4 counts
- Developing interventions that provide emotional support to caregivers
- Behavioral management
- Medication management and review
- Conducting a Member Cultural Assessment to identify and address cultural and sensory barriers to managing the member's disease
- Coordination of PCP and specialty appointments, arranging transportation, and other assistance as needed to help ensure the member receives necessary care
- High Risk. Members stratified as high risk are typically members who have HIV symptoms, an AIDS diagnosis, and/or multiple co-morbidities. Managed Care Coordinators deliver the same interventions as provided to medium risk members, but contact the member at least every 30 days until the member's plan of care goals are met.

4. INTEGRATION OF DM IN OUR CASE MANAGEMENT PROGRAMS

Clear Health understands that health outcomes improve dramatically when care is fully integrated. We have a single program that provides both HIV/AIDS DM and case management, and all members have access to a Managed Care Coordinator knowledgeable in medical, BH, and social support service needs of persons living with HIV/AIDS. With additional resources and infrastructure support from our legacy plans, we offer person-centered case management, DM for co-occurring conditions, and UM in house across all physical health, BH, pharmacy, and social support needs.

Managed Care Coordinators develop a plan of care in collaboration with the member and, based on the member's preference, also include the member's caregiver, legal guardian, and provider. The Managed Care Coordinator develops the plan of care according to the member's risk stratification for all members participating in our HIV/AIDS DM and Case Management program. The plan of care is updated at least annually and used to:

- Identify and address co-morbidities
- Identify and address risk factors to prevent further medical deterioration and complications
- Document the member's ability to adhere to their treatment regimen
- Monitor and document progress toward meeting the member's individualized goals
- Document medication management to avoid duplication of therapies and avoid adverse effects or interactions with contraindicated medications

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Communicate with the member's PCP and community agencies, such as Ryan White agencies, if applicable

Our Managed Care Coordinators help members schedule PCP and specialist visits and arrange for transportation. They also outreach to the member after discharge from a hospital, urgent care facility, or ED to coordinate needed follow-up care.

Our Case Management System facilitates integration of DM into our case management functions. Member utilization data, such as claims history, authorizations, lab results, immunization records, and DM and case management data, are available in an organized format with tools for Managed Care Coordinators and providers to identify and manage member needs. The system collects, organizes, and presents information enabling management and coordination of member care. It also consolidates clinical data from various sources into a single record to deliver a holistic picture of each member's utilization, plan of care, and gaps in care. The system integrates seamlessly with our Core Operations System and is the system of record for DM and case management information.

4.1. Behavioral Health Referrals

If, during a comprehensive health assessment or through other contact, the Managed Care Coordinator identifies a member as needing further BH assessment, the Managed Care Coordinator engages a BH Managed Care Coordinator. The BH Managed Care Coordinator determines whether the BH needs are specialized or basic in nature. If more specialized BH interventions are needed, such as therapeutic services, psychotherapy, substance use treatment, or detoxification, the BH Managed Care Coordinator will co-manage the member to ensure those needs are met.

If at any time the BH need is deemed a crisis (defined as, but not limited to verbalization of suicidal and/or homicidal thoughts or plans, concerns for member safety, altered thought processes, and/or member's ability to make decisions), the Managed Care Coordinator will warm transfer the member the BH service line and identify a BH Managed Care Coordinator to get involved in the member's case immediately.

4.2. OB Case Management Referrals

When a Clear Health member becomes pregnant, the Managed Care Coordinator refers the member to an OB Managed Care Coordinator who assumes the primary role during the pregnancy and up to three months post-partum. The OB Managed Care Coordinator is specially trained on HIV and pregnancy, and becomes the link with the obstetrician and follows the member to monitor all pre- and post-natal care.

Today, if a woman takes HIV medicines as prescribed throughout pregnancy, labor, and delivery, and provides HIV medicines to her baby for four to six weeks, the risk of transmitting HIV can be one percent or less. Our OB Managed Care Coordinators reinforce the importance of antiretroviral drugs to prevent vertical transmission to the fetus. They also monitor the use of antiretroviral drugs and intervene as necessary to help make sure HIV medicines are taken as prescribed to reduce the risk of transmitting HIV to the baby.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

In developing the plan of care, the OB Managed Care Coordinator also identifies co-morbidities and their condition-specific risks early on and provides education to help the member self-manage her condition. This is particularly important for pregnant women with diabetes or substance use disorders, and the OB Managed Care Coordinator emphasizes risks to the infant as well as the mother if risky behaviors or unhealthy lifestyles are not changed.

**** RESULTS & SUCCESSES: OB Managed Care Coordinators Positively Impact Care**

In 2016, 82.9 percent of our high-risk pregnant members enrolled in our OB Case Management program. This significantly exceeded our goal of 70 percent. Other remarkable outcomes include 81.35 percent of engaged high-risk members meeting their plan of care goals and 57.14 percent completing the recommended post-partum visit (representing a 40 percent increase from 2015).

5. COMPONENTS OF OUR DM PROGRAMS

All plans of care for members in our HIV/AIDS DM and Case Management program address coordination of services, symptom management, medication support, emotional support, behavior change, and coordination with providers. However, the plans of care are individualized with distinct types of interventions and intensity of services based on the member's risk level and personal goals, and as indicated in evidence-based clinical guidelines.

5.a. Symptom Management

Empowering members to self-manage their condition is a key component of all our DM programs, and our Managed Care Coordinators encourage members to actively participate in establishing and reaching their plan of care goals. They use motivational interviewing and other techniques and education to help the member overcome real and perceived barriers and adhere to treatment regimens. Managed Care Coordinators also provide education to help members understand their symptoms, and when to seek medical attention.

For persons living with HIV/AIDS, viral suppression is key to staying healthy and reducing the risk of transmission to others. Our Managed Care Coordinators emphasize education regarding the meaning of CD4 count and viral load, with the goal of increasing immune function and decreasing viral activity. They also encourage members to learn how to manage their HIV disease by attending community education events, accessing reliable HIV/AIDS online resources, and our own, Agency-approved educational materials.

Importantly, our DM programs also identify missed care opportunities and work with providers to fill gaps in care. We communicate care opportunities impacting a member's condition, such as failure to fill a medication, missed screenings, and out of range test results, with the provider in a timely manner. These reminders facilitate provider outreach to the member to improve management of the member's condition.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

self-management practices for chronic diseases and providing education about preventive care and personal wellness, such as tobacco cessation and nutrition.

5.b. Medication Support

Our Managed Care Coordinator works with our pharmacy team to carefully review medications the member is currently taking, including supplements and other over-the-counter drugs, to avoid adverse effects, duplication and underutilization of HIV medications that may lead to resistance, interactions from contra-indicated medications, and other polypharmacy issues. They conduct these reviews regularly to determine compliance and appropriateness of the treatment regimen. If there are concerns, the Managed Care Coordinator will work with the member and the member's PCP to resolve. He or she will help schedule an appointment with the PCP, if necessary, or resolve other barriers to medication adherence. The Managed Care Coordinator also uses pharmacy reports to monitor patient use of antiviral, antibiotic, and antifungal agents.

**** RESULTS & SUCCESSES.** Significant Improvements in HAART Adherence
Clear Health recently implemented a program that monitors all members with a low CD4 count and establishes an action plan to help improve member compliance with prescribed medications. Weekly meetings are held to discuss these members with our Medical Director and interventions to improve compliance. This focus on HIV medication adherence improved our Highly Active Retrovirus Treatment (HAART) rates by 64 percent from 2015 to 2016 (from 57.33 percent in 2015 to 93.85 percent in 2016). **

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Clear Health Alliance recognizes that a new HIV/AIDS diagnosis can lead to crisis and be perceived as devastating to their future ability to live a full and active life. We recognize that while persons with HIV/AIDS are likely to continue to thrive with proper treatment, the initial impact of the diagnosis and fear of associated stigma can become a barrier to engaging in care. To overcome this barrier, Clear Health Alliance will contract with additional trained Peer Educators, including from former PAC Waiver entities, who are role models for positive living with the disease and can conduct face-to-face outreach at any location where the member feels safe. They also conduct follow-up calls to provide emotional support. This has been invaluable to altering member perspective and setting those who are newly/recently diagnosed on the right path. In addition, all Managed Care Coordinators are skilled in discussing member concerns regarding stigmas associated with the disease and emotional issues associated for all members. The Managed Care Coordinator assesses needs and works closely with our behavioral health providers to refer for care or added community supports.

[REDACTED]

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5.d. Behavior Change

As part of our screening and assessment process, we identify lifestyle issues that may impact the member's ability to manage their condition. These issues include smoking, exercise, diet, alcohol use, home environment, medication adherence issues, and other potential risk factors. The Managed Care Coordinator educates the member about the impact of their lifestyle choices on their condition, and through motivational interviewing and other techniques encourages the member to modify their behaviors in order to improve their health and reduce risk of HIV transmission. They also refer the member to appropriate internal and external resources, such as obtaining condoms through the OTC program and smoking cessation programs.

Clear Health's Healthy Behaviors programs reinforce this education by offering members incentives to make healthy lifestyle choices and modify risky behaviors that contribute to poor health outcomes. By limiting risk factors that make it harder to manage a chronic condition, we decrease the likelihood of potentially preventable ED visits or inpatient admissions.

In our Healthy Behaviors programs, members earn points for healthy behaviors like quitting smoking for a period of three months or receiving a 30-day sobriety chip from Alcoholics Anonymous or Narcotics Anonymous. They can use the points to redeem a range of health-related gifts, such as cooking essentials, foot spas, and scales.

We have the following Healthy Behaviors programs:

- Alcohol and Drug Abuse Healthy Behaviors program
- Maternity Healthy Behaviors program
- Quit Smoking and Using Tobacco Healthy Behaviors program
- Weight Management Healthy Behaviors program
- Well Child Visits Healthy Behaviors program

5.e. Communication with Providers, Including PCPs/Specialists

In our experience, most HIV/AIDS specialists are comfortable with a community-based approach to member care and welcome communication with our Managed Care Coordinators. We send a copy of the plan of care for all members who are at moderate or high risk. We ask for the provider's review and feedback, and we adjust the plan of care based on feedback received. We accompany the plan of care with a letter of introduction explaining the member's participation in our HIV/AIDS DM and Case Management program and the provider's responsibility in the care planning process. We also include the evidence-based guidelines associated with the member's conditions.

Our Managed Care Coordinators collaborate with a member's healthcare team and discuss interventions that may improve a member's health outcomes. They also encourage members to work with their providers to meet their plan of care goals, and add the discussed intervention to the member's plan of care, as appropriate, to make sure the member receives the right supports and services.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We engage all treating providers, as appropriate, throughout the process by:

- Providing regular status updates regarding the member's stratification level, changes in health status, hospitalizations, and contact frequency
- Assisting with scheduling appointments or arranging transportation
- Identifying gaps in care or other issues that may worsen a condition or trigger a potentially preventable admission, readmission, or ED visit, such as tests out of range, medications not refilled, significant fall risks, and potential adverse medication interactions
- Addressing provider questions about the member's care
- Sharing provider collaboration and communication details
- Reinforcing evidence-based guidelines

**** RESULTS & SUCCESSES: Providers Recognize the Value of Our DM Programs**

Helping members self-manage their conditions in partnership with providers distinguishes our DM approach from other Medicaid Managed Care Plans. Most providers (96 percent) perceive our DM programs as having a positive impact on member health status and 89 percent of providers confirm quality of life improves for our members after enrolling in our DM program. Importantly, 90 percent of providers would recommend our DM program to others and rate our DM program as "better" than programs offered by other Medicaid Managed Care Plans. **

We capture our members' information in a secure, centralized Case Management System to support timely access to the most appropriate services for the member's conditions and prevent duplication. Through the Case Management System's provider-facing tools, providers who have members attributed to them can see the member record using our provider portal, giving them simple, easy-to-access data and information to assist in engaging the member in their health and well-being. They see the full picture including the plan of care and assessment information, enhancing their ability to reduce duplication and improve quality of care.

We make the most of our contacts with providers by telephone, and also regularly deliver updated information by mail or fax to the provider.

We educate our providers on reciprocal sharing of information, as well as other important components of our DM programs during our initial, ongoing, ad hoc, and annual trainings. Information includes:

- Provider rights
- Services provided by our DM programs, and benefit to members
- How to enroll a member in the program and use its services
- Provider access to our provider-facing Case Management System tools
- Reciprocal referral and sharing of information policies and procedures
- Managed Care Coordinator contact information, including phone number, address, and email
- How to provide feedback or communicate complaints

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

When the member's healthcare team consists of several types of providers, such as PCPs, medical and BH specialists, and social workers, Managed Care Coordinators can facilitate information sharing across the entire health care team to make sure services are synchronized, unduplicated, and consistently delivered. Our Case Management System, as well as the claims system and data warehouse, helps Managed Care Coordinators identify treating providers.

6. METHODOLOGY FOR EVALUATING OUR DM PROGRAMS

Clear Health evaluates our DM programs as part of our continuous quality improvement (QI) process. Formal evaluations occur annually, and we report results to our UM Committee and our QIC for recommendations and approvals. The evaluation includes measures from the following sources:

- Process and outcome measures
- Clinical outcomes
- Health services utilization outcomes, including pharmacy utilization, inpatient admissions, ED visits, and physician visits
- Member self-reported adherence to treatment plan
- Staff performance appraisals
- Staff productivity measures
- Member satisfaction surveys

Our clinical outcomes measures:

- Capture a relevant process or outcome
- Are population-based
- Are measured with quantitative methodologies
- Have a benchmark or performance goal
- Have data and methodology that are valid for the process or outcome measured
- Have results analyzed in comparison with the benchmark or goal

To promote continuous quality improvement, we identify at least two clinical quality measures for improvement as part of our annual evaluation, implement interventions to improve performance, and measure the effectiveness of interventions to improve each measure. We also target at least five member satisfaction survey questions for performance improvement to help us maintain the highest level of member satisfaction.

Collaborating with providers to improve member outcomes is very important to us, so we solicit written feedback and comments from providers on DM program content strengths and areas for improvement. Annually, a minimum of one program experience measure is targeted for improvement, at least one intervention is implemented, and the effectiveness of the intervention is measured.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

6.1. Methodology and Outcomes

Clear Health measures the effectiveness of our DM programs with quantitative information that captures processes and outcomes for which we have established benchmarks. Each program has its own performance measures and goals, many of them HEDIS measures, as identified in the program descriptions above. Additionally, most programs evaluate the following standard measures to determine their effectiveness in encouraging healthy behaviors, improving self-management, and influencing appropriate utilization of services:

- ED utilization
- Inpatient admissions
- Assessing tobacco use: total identified and participating
- Influenza vaccination: total identified and participating
- Pneumococcal vaccination: total identified and participating
- Medication adherence
- Plan of care adherence
- Member's perceived ability to self-manage health condition
- Members who successfully meet their goals and complete the program
- High member satisfaction with DM

6.2. Reducing Potentially Preventable Events (PPEs)

Evaluating PPEs such as ED utilization and inpatient admissions is a key step in measuring the success of our DM programs. Our holistic approach helped us achieve the second lowest rate of potentially preventable hospital admissions in the state. This is a remarkable achievement given our medically complex population.

Targeted interventions, performance improvement projects, and our investments in additional clinical staff are also resulting in quality improvements likely to reduce the risk of PPEs.

- Our DM programs focus on closing gaps in care has improved many HIV quality measures that indicate better management of the condition and reduce the likelihood of unnecessary ED visits or inpatient admissions and readmissions:
 - Increased Highly Active Anti-Retroviral Treatment (HAART) by 64 percent, from 57.33 percent in 2015 to 93.85 percent in 2016

— Reduced HIV-Related Medical Visits – 0 Visits (reverse measure) by 49 percent, from 21.22 percent in 2015 to 10.87 percent in 2016

— Increased HIV-Related Medical Visits – 2 or More Visits by 17 percent, from 64.43 percent in 2015 to 75.19 percent in 2016

- We reduced our All Cause 30-Day Hospital Readmission rate by 2.6 percent, from 31 percent in 2015 to 28.40 percent in 2016

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

6.3. Evaluating New DM Opportunities

In addition to evaluating our existing DM programs, Clear Health conducts frequent and ongoing prospecting activities to identify additional conditions that are prevalent in our membership (especially as the proportion of older individuals increases), are chronic in nature, and are impacted by lifestyle issues such as tobacco use, lack of physical activity, poor hygiene, and poor eating habits. We review and analyze available data about our member population, including daily census reports, open authorizations, member demographics, including diagnoses, BH, pharmacy, and dental utilization reports, and case management enrollment. Based on these evaluations, and Agency priorities, we continue to consider adding new conditions for targeted health education and DM.

For example, we recently initiated a rare disease program. This program, called Accordant, is an adjunctive, telephonic rare disease program designed to help members find the additional answers and support they need to manage their unique health care needs and maximize their overall health status. It targets members with specific conditions such as sickle cell disease, epilepsy, rheumatoid arthritis, multiple sclerosis, and cystic fibrosis, among others. A Nurse Managed Care Coordinator (RN) who specializes in rare conditions provides a health risk assessment to identify risk factors, gaps in care, knowledge deficits, and self-management skills to develop a personalized plan of care. The Nurse Managed Care Coordinator provides ongoing support and education to prevent complications and optimize medication management, co-morbidity support, and psychosocial support.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent proposes an innovative and evidence-based approach to disease management for the following conditions:
 - (a) Cancer (Section 409.966, Florida Statutes);
 - (b) Diabetes (Section 409.966, Florida Statutes);
 - (c) Asthma;
 - (d) Hypertension;
 - (e) Mental health; and
 - (f) Substance abuse.
2. The adequacy of the respondent's description of how its respective disease management programs will be incorporated into its overall approach to advance the Agency's goals.
3. The extent to which the respondent's algorithm and risk stratification approach is well defined and describes the data sources that will be utilized.
4. The adequacy of the respondent's description of how its disease management programs will be integrated into case management/care coordination programs.
5. The extent to which the respondent's disease management programs include the following components:
 - (a) Symptom management;
 - (b) Medication support;
 - (c) Emotional support;
 - (d) Behavior change; and
 - (e) Communication with providers, including the PCP/specialists.
6. The extent to which the respondent has described a methodology for evaluating the impact of the disease management programs and provided results/data based on previous experience that supports the reduction of potentially preventable events.

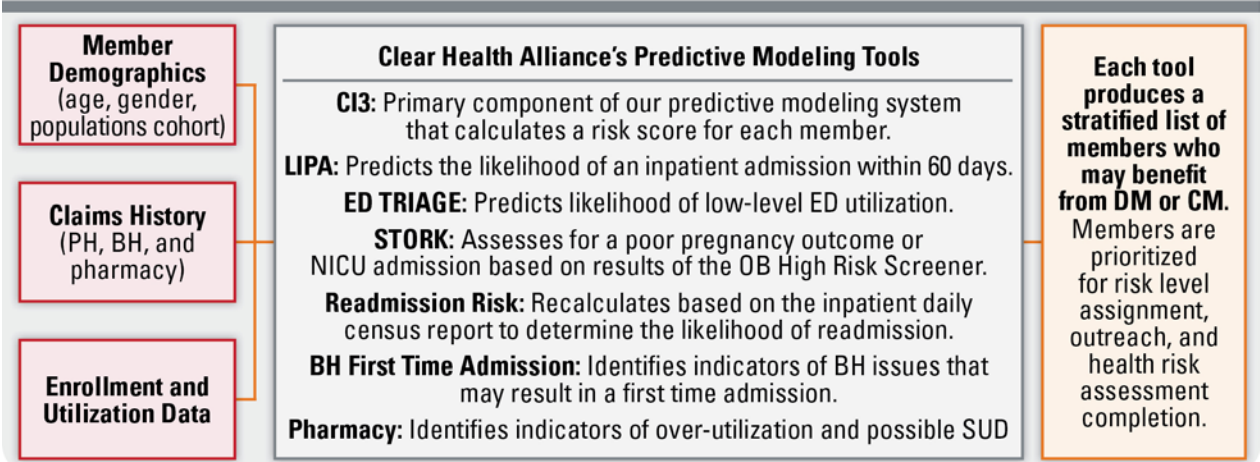

Score: This section is worth a maximum of 75 raw points with each component being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 6 – HEDIS Measures (Statewide):

The respondent shall describe its experience in achieving quality standards with populations similar to the target population described in this solicitation. The respondent shall include, in table format, the target population (TANF, ABD, dual eligible), the respondent's results for the HEDIS measures specified below for each of the last two (2) years (CY 2015/ HEDIS 2016 and CY 2016/ HEDIS 2017) for the respondent's three (3) largest Medicaid Contracts (measured by number of enrollees). If the respondent does not have HEDIS results for at least three (3) Medicaid Contracts, the respondent shall provide commercial HEDIS measures for the respondent's largest Contracts. If the Respondent has Florida Medicaid HEDIS results, it shall include the Florida Medicaid experience as one (1) of three (3) states for the last two (2) years.

The respondent shall provide the data requested in **Exhibit A-4-a-1**, General Performance Measurement Tool to provide results for the following HEDIS measures:

- Adults' Access to Preventive/Ambulatory Health Services (Total);
- Child and Adolescent Access to PCPs (all 4 age bands reported as separate rates);
- Medication Management for People with Asthma (75% - Total);
- Controlling High Blood Pressure;
- Comprehensive Diabetes Care – HbA1c Control (<8%);
- Follow-up after Hospitalization for Mental Illness (7 day);
- Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (Initiation – Total);
- Antidepressant Medication Management – Acute Phase; and
- Adherence to Antipsychotic Medications for Individuals with Schizophrenia

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Based on the ITN requirements for SRC 6 and SRC 7, we have submitted HEDIS data for the Simply legacy plan in Florida with the largest Medicaid membership (Amerigroup). Additionally, Amerigroup's membership is more comparable to that of the population from which the Medicaid 50th percentile is derived than the HEDIS results for Clear Health. Because of its specialized nature, Clear Health is not one of Simply's largest three contracts by membership. In addition, we are reporting results for our two largest affiliate Medicaid contracts based upon the number of Medicaid members served by each contract. These two contracts are in New York and Texas.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1. EXPERIENCE ACHIEVING QUALITY STANDARDS

Simply and our affiliate health plans currently serve more than 6.5 million beneficiaries of state-sponsored health plans in 20 markets. We collect and report HEDIS® and state performance measures in each of these states. Since we began operations in Florida over 14 years ago, Simply has collected and reported HEDIS® and state performance measures, and today we collect and report all required measures to the National Committee for Quality Assurance (NCQA and Agency for Health Care Administration (Agency). Simply is further sharpening our focus on quality by bringing together the best practices and innovative solutions of three Florida health plans that have recently merged to become one entity. Our Chief Medical Officer and our Quality Management leadership spearhead our Quality Management program, bringing more than 40 years of combined experience in performance improvement programs and HEDIS® reporting. As a result of our experience, we continue to achieve high marks for performance, as demonstrated in our HEDIS® 2016 and 2017 scores described below and in Attachment SRC# 6-1: Exhibit A-4-a-1.

**** RESULTS & SUCCESSES:** In HEDIS® 2016 Simply's legacy plan, Amerigroup, was the only plan that scored above the statewide average for all components of each Quality of Care Indicator developed by the Agency for the Medicaid Health Plan Report Card (Report Card). Quality of Care Indicators are a set of measures that are used to report the performance of health plans. Data for these measures came from HEDIS® and were designed for use by Medicaid consumers. The Report Card includes six Quality of Care Indicators: Living with Illness, Keeping Adults Healthy, Keeping Kids Healthy, Mental Health Care, Pregnancy-related Care, and Children's Dental Care. ******

Health plan ratings, shown as stars, are assigned to each health plan for each indicator based on the plan's score for the indicator. Plans are assigned between one and five stars, based on the health plans ratings for the associated measure. The designation of stars is denoted below:

- 5 stars – Best: at or above 50 percent of all Medicaid health plans' scores
- 4 stars – Good: better than at least 40 percent of all Medicaid health plans' scores
- 3 stars – Fair: better than at least 25 percent of all Medicaid health plans' scores
- 2 stars – Poor: better than at least 10 percent of all Medicaid health plans' scores
- 1 star – Very Poor: worse than 90 percent of all Medicaid health plans' scores

In HEDIS® 2016, Simply, through our legacy plan, Amerigroup, was awarded:

- 5 out of 5 stars in all five components of the Living with Illness Quality Indicator (better than any other health plan)
- 5 out of 5 stars in four of five components in the Keeping Adults Healthy Quality Indicator (only one other health plan earned as many as 5 stars)
- 5 out of 5 stars in seven out of 11 components in the Keeping Kids Healthy Quality Indicator (only two other health plans earned as many as 5 stars)
- 5 out of 5 stars in two of four components in the Mental Health Care Quality Indicator (only two other health plans earned more than 5 stars)

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- 5 out of 5 stars in all three components of the Pregnancy-related Care Quality Indicator (only one other health plan earned as many as 5 stars)

1.1. Florida Experience Achieving Quality Standards

As stated above, and in accordance with the directions provided in this question, we selected the legacy plan with the largest enrollment (Amerigroup) to represent our Florida experience. In the HEDIS® 2016 submission, we led the state of Florida at the NCQA Quality Compass 90th percentile for Child Immunizations Status (CIS - Combo 3); Comprehensive Diabetes Care (CDC - Medical Attention for Nephropathy), and Annual Monitoring for Patients on Persistent Medication (MPM - Combined). In addition, for HEDIS® 2016, we were the first in the state of Florida for the following measures: Cervical Cancer Screening (CCS), Childhood Immunization Status (CIS – Combo 3), Comprehensive Diabetes Care (CDC – HbA1c testing rate), Controlling High Blood Pressure (CBP), Prenatal Care Frequency (PCF - 81 percent or higher), and Well Child Visits 15 months of age (W15 – 6 visits). Simply's legacy plan, Amerigroup, exceeded the Medicaid National Mean for eight of the 12 measures in this submission requirement for both HEDIS® 2016 and 2017.

Adults' Access to Preventive/Ambulatory Health Services (Total) rates of 78.17 percent for HEDIS® 2016 and 74.84 percent for HEDIS® 2017 scoring.

Child and Adolescent Access to PCPs – 12 - 24 Month Age Band rates of 96.82 percent for HEDIS® 2016 and 95.97 percent for 2017, scoring above the 50th percentile each measurement period and above the Medicaid National Mean in HEDIS® 2016 and 2017. When compared to other health plans in Florida, we performed as well as or better than all other Standard MMA plans on this measure in HEDIS® 2016.

Child and Adolescent Access to PCPs - 25 months – 6 Years Age Band rate of 91.04 percent for HEDIS® 2016, scoring above the 75th percentile and above the Medicaid National Mean. When compared to other health plans in Florida, we performed as well as or better than all other Standard MMA plans on this measure in HEDIS® 2016. For HEDIS® 2017, we reported a rate of 90.69 percent, scoring above the 60th percentile and above the Medicaid National Mean and state goal.

Child and Adolescent Access to PCPs - 7 to 11 Years Age Band rates of 90.65 percent for HEDIS® 2016 and 91.16 percent for HEDIS® 2017, scoring above the Medicaid National Mean and above the 50th percentile in HEDIS® 2016 and 2017. Compared to other health plans, we performed as well as or better than all but one other Standard MMA health plan in HEDIS® 2016.

Child and Adolescent Access to PCPs - 12 to 19 Years Age Band rates between HEDIS® 2016 and 2017 demonstrated improvement year-over-year of .22 percentage points (88.29 percent for 2016). For HEDIS® 2017, we reported a rate of 88.51 percent, scoring above the Medicaid National Mean and Florida Mean. Compared to other health plans, we performed as well as or better than all other Standard MMA health plans for HEDIS® 2016.

Medication Management for People with Asthma (75 percent - Total) rates improved in this measure (2.31 percentage points) from HEDIS® 2016 to 2017, as we reported a rate of 20.62 percent for HEDIS® 2016 and 22.93 percent for HEDIS® 2017.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Controlling High Blood Pressure rates of 67.41 percent for HEDIS® 2016 and 66.23 percent for HEDIS® 2017 exceeded the 75th percentile in each reporting year. Additionally, we performed better than all other health plans (Standard and Specialty MMA) by a range of 7 – 34 percentage points in HEDIS® 2016.

Comprehensive Diabetes Care – HbA1c Control (<8 percent) rates of 49.07 percent for HEDIS® 2016 and 51.04 percent for HEDIS® 2017, which demonstrates improvement year-over-year of 1.97 percentage points and achievement above the HEDIS® 50th percentile for HEDIS® 2016 and 2017, and above the Medicaid Nation Mean and Florida Mean for each measurement period.

Follow-up after Hospitalization for Mental Illness (7 day) rates of 46.37 percent for HEDIS® 2016 and 46.88 percent for HEDIS® 2017 exceeded the Medicaid National Mean and the 50th percentile in both reporting years. Compared to other health plans reporting HEDIS® 2016, we performed better than all but one other Standard MMA health plan.

Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (Initiation – Total) rates for both reporting years exceeded the Florida Mean (39.96 percent for HEDIS® 2016 and 38.79 percent for HEDIS® 2017), and exceeded the 50th percentile for HEDIS® 2016.

Antidepressant Medication Management – Acute Phase rates of 53.65 percent for HEDIS® 2016 and 50.99 percent for HEDIS® 2017 exceeding the 50th percentile for HEDIS® 2016.

Adherence to Antipsychotic Medications for Individuals with Schizophrenia rates of 62.36 percent for HEDIS® 2016 and 63.28 percent for HEDIS® 2017, a year-over-year improvement of .92 percentage points, scored above the Medicaid National Mean and above the 50th percentile in HEDIS® 2016 and 2017.

1.2. New York Experience Achieving Quality Standards

One of our affiliate's Medicaid contracts with New York began in January 2005 and currently serves 380,224 members. The most recent contract was executed in March 2014 and extends through February 2019. The current contract covers the TANF, ABD, and Medicaid expansion populations. For measurement year 2016, New York met 20 out of 41 state-specified targets and earned more than \$16 million in performance-based incentives.

Adults' Access to Preventive/Ambulatory Health Services (Total) rates increased slightly between HEDIS® 2016 and HEDIS® 2017 (84.67 percent and 85.07 percent) exceeding the 50th percentile in for HEDIS® 2016 and 60th percentile for HEDIS® 2017.

Child and Adolescent Access to PCPs - 12-24 Month Age Band rates of 95.20 percent for HEDIS® 2016 and 96.80 percent for HEDIS® 2017 exceeded the Medicaid National Mean for both reporting years and exceeded the 60th percentile for HEDIS® 2017.

Child and Adolescent Access to PCPs - 25 months – 6 Years Age Band rate of 95.32 percent for HEDIS® 2016 exceeded the 90th percentile and scored above the Medicaid National Mean. In HEDIS® 2017, our NY affiliate reported a rate of 95.62 percent, scoring above the 90th percentile.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Child and Adolescent Access to PCPs - 7 to 11 Years Age Band rates of 97.75 percent for HEDIS® 2016 and 97.87 percent for HEDIS® 2017 scoring more than 7 percentage points above the Medicaid National Mean in HEDIS® 2016 and above the 90th percentile in both reporting years.

Child and Adolescent Access to PCPs - 12 to 19 Years Age Band rates of 95.81 percent for HEDIS® 2016 and 96.12 percent for HEDIS® 2017 exceeding the 90th percentile in both reporting years.

Medication Management for People with Asthma (75 percent - Total) rates of 30.43 percent for HEDIS® 2016 and 29.14 percent for HEDIS® 2017.

Controlling High Blood Pressure rates of 62.06 percent for HEDIS® 2016 and 56.10 percent for HEDIS® 2017 exceeded the 60th percentile for HEDIS® 2016.

Comprehensive Diabetes Care – HbA1c Control (<8 percent) rates of 54.41 percent for HEDIS® 2016 and 55.79 percent for HEDIS® 2017, which demonstrates improvement year-over-year of 1.38 percent and achievement above the HEDIS® 75th percentile for both reporting years.

Follow-up after Hospitalization for Mental Illness (7 day) rates of 56.06 percent for HEDIS® 2016 and 58.18 percent for HEDIS® 2017, which represents a year-over-year improvement of 2.12 percentage points and results above the 75th percentile in each reporting year.

Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (Initiation – Total) rates of 41.39 percent for HEDIS® 2016 and 43.16 percent for HEDIS® 2017, which represents a year-over-year improvement of 1.77 percentage points and results above the 60th percentile for HEDIS® 2016 and above the 50th percentile for HEDIS® 2017.

Antidepressant Medication Management – Acute Phase rates of 52.83 percent for HEDIS® 2016 and 48.38 percent for HEDIS® 2017 scoring slightly below the 50th percentile for HEDIS® 2016.

Adherence to Antipsychotic Medications for Individuals with Schizophrenia rates for both HEDIS® 2016 and 2017 exceeded the National Medicaid Mean and HEDIS® 50th percentile in both reporting years (62.68 percent for HEDIS® 2016 and 60.78 percent for HEDIS® 2017).

1.3. Texas Experience Achieving Quality Standards

One of our affiliate's contracts for the Texas Medicaid program began in September 2011 and extends through August 2018, serving 646,398 members. The initial Medicaid contract with Texas was executed in 1996. The current contract covers the TANF, CHIP and ABD populations. Texas Medicaid reports by product within the contract and has currently suspended their quality-related withhold program due to necessary methodological changes. The State of Texas aspires to the Medicaid 75th percentile as the goal for comparison of Texas rates.

Adults' Access to Preventive/Ambulatory Health Services (Total) rates of 84.02 percent for HEDIS® 2016 and 83.83 percent for HEDIS® 2017 scoring above the Medicaid National Mean both reporting periods, above the 50th percentile for HEDIS® 2016 and above the 60th percentile for HEDIS® 2017.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Child and Adolescent Access to PCPs - 12-24 Month Age Band rates of 97.19 percent for HEDIS® 2016 and 96.84 percent for HEDIS® 2017 exceeded the Medicaid National Mean and the 60th percentile in each measurement period.

Child and Adolescent Access to PCPs - 25 months – 6 Years Age Band rates for HEDIS® 2016 and 2017 exceeded the 60th percentile in both reporting years. (90.95 percent and 90.13 percent)

Child and Adolescent Access to PCPs - 7 to 11 Years Age Band rates of 94.49 percent for HEDIS® 2016 and 94.13 percent for HEDIS® 2017 exceeded the 75th percentile in both reporting periods.

Child and Adolescent Access to PCPs - 12 to 19 Years Age Band rates for HEDIS® 2016 and 2017 (93.23 percent and 93.11 percent) exceeded the Medicaid National Mean and the 75th percentile in both reporting years.

Medication Management for People with Asthma (75 percent - Total) rate for HEDIS® 2016 was 23.78 percent and for HEDIS® 2017 was 23.14 percent.

Controlling High Blood Pressure rates were 56.88 percent for HEDIS® 2016 and 56.54 percent for HEDIS® 2017.

Comprehensive Diabetes Care – HbA1c Control (<8 percent) rates of 46.17 percent for HEDIS® 2016 and 46.53 percent for HEDIS® 2017, which demonstrates improvement year-over-year of .36 percentage points and exceeded the Medicaid National Mean for HEDIS® 2016.

Follow-up after Hospitalization for Mental Illness (7 day) – Texas Medicaid program reported a significant year-over-year improvement of 6.65 percentage points between HEDIS® 2016 and 2017 (45.11 percent).

Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (Initiation – Total) reported an improvement year-over-year of 2.90 percentage points between HEDIS® 2016 and 2017.

Antidepressant Medication Management Acute Phase rate of 65.71 percent for HEDIS® 2016 exceeded the 75th percentile for HEDIS® 2016 and was just below the 50th percentile for HEDIS® 2017 (51.47 percent).

Adherence to Antipsychotic Medications for Individuals with Schizophrenia rate of 64.42 percent for HEDIS® 2016 exceeded the 60th percentile. (58.39 percent for HEDIS® 2017).

2. THE EXTENT THE RESPONDENT EXCEEDED THE NATIONAL MEAN AND APPLICABLE REGIONAL MEAN FOR EACH QUALITY MEASURE

See Exhibit A-4-a-1 in Attachment SRC# 6-1 General Performance Measurement Tool. This General Performance Measurement Tool shows our calendar year 2015 and 2016 rates for each of the 12 HEDIS® measures requested in this solicitation.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent of experience (e.g., number of Contracts, enrollees or years) in achieving quality standards with similar target populations, for the HEDIS performance measures included in this submission requirement.
2. The extent to which the respondent exceeded the national mean and applicable regional mean for each quality measure reported and showed improvement from the first year to the second year reported.

Score: This section is worth a maximum of 160 raw points with component 1 worth a maximum of 10 points and component 2 worth a maximum of 150 points as described below:

Exhibit A-4-a-1, General Performance Measurement Tool, provides for seventy-two (72) opportunities for a respondent to report prior experience in meeting quality standards (twelve (12) measure rates, three (3) states each, two (2) years each).

For each of the measure rates, a total of 10 points is available per state reported (for a total of 360 points available). The respondent will be awarded 2 points if their reported plan rate exceeded the national Medicaid mean and 2 points if their reported plan rate exceeded the applicable regional Medicaid mean, for each available year, for each available state. The respondent will be awarded an additional 2 points for each measure rate where the second year's rate is an improvement over the first year's rate, for each available state.

An aggregate score will be calculated and respondents will receive a final score of 0 through 150 corresponding to the number and percentage of points received out of the total available points. For example, if a respondent receives 100% of the available 360 points, the final score will be 150 points (100%). If a respondent receives 324 (90%) of the available 360 points, the final score will be 135 points (90%). If a respondent receives 36 (10%) of the available 360 points, the final score will be 15 points (10%).

GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a-1
SRC# 6 - GENERAL PERFORMANCE MEASUREMENT TOOL (10-2-2017)

INSTRUCTIONS:

Respondents should submit calendar year 2015/HEDIS 2016 and calendar year 2016/HEDIS 2017 performance measure data for the selected HEDIS measures for the respondent's three (3) largest Medicaid contracts (measured by number of enrollees).

If the respondent does not have HEDIS results for at least (3) three Medicaid Contracts, the respondent shall provide commercial HEDIS measures for the respondent's largest Contracts. If the respondent has Florida Medicaid HEDIS results, it shall include the Florida Medicaid experience as one of three (3) states for the last two (2) years.

The performance measures that respondents are required to report on can be found on the Performance Measure Group A tab.

Use the drop-down box to select the state for which you are reporting and enter the performance measure rates (to the hundredths place, or XX.XX) for that state's Medicaid population for the appropriate calendar year.

GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 7 – HEDIS Measures (Statewide):

In addition to providing HEDIS measure data, describe any instances of failure to meet HEDIS or Contract-required quality standards for the measures listed below and actions taken to improve performance. Describe actions taken to improve quality performance when HEDIS or Contract-required standards were met, but improvement was desirable.

- Adults' Access to Preventive/Ambulatory Health Services (Total);
- Child and Adolescent Access to PCPs (all 4 age bands reported as separate rates);
- Medication Management for People with Asthma (75% - Total);
- Controlling High Blood Pressure;
- Comprehensive Diabetes Care – HbA1c Control (<8%);
- Follow-up after Hospitalization for Mental Illness (7 day);
- Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (Initiation – Total);
- Antidepressant Medication Management – Acute Phase; and
- Adherence to Antipsychotic Medications for Individuals with Schizophrenia.

Response:

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the described experience demonstrates the ability to improve quality in a meaningful way and to successfully remediate all failures for the HEDIS performance measures included in this submission requirement.
2. The extent to which the described experience demonstrates the ability to improve quality in a meaningful way even when HEDIS or Contract-required standards were met, but improvement was desirable, for the HEDIS performance measures included in this submission requirement.

Score: This section is worth a maximum of 10 raw points with each component worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

SRC# 8 – Vignette (Statewide):

The respondent shall review the below case vignette, which describes potential Florida Medicaid recipients. Note: The vignette included below is fictional.

Robert, a 50-year-old man, was diagnosed with chronic obstructive pulmonary disease (COPD) five (5) years ago. His symptoms have been worsening recently, and he has presented at the emergency department three (3) times during the past thirty (30) days. Robert previously smoked twenty-five (25) cigarettes per day for thirty (30) years, but cut down to ten (10) cigarettes per day after his first COPD exacerbation two (2) years ago. He has attempted to quit smoking on several occasions without any success. Robert is prescribed several regular medications for his COPD, as well as for hypertension and hypercholesterolemia. He is pre-diabetic and obese with a BMI of 35. His last appointment with his specialist was ten (10) months ago. Robert has difficulty taking his medications regularly, as he is sometimes unable to get his prescriptions in his rural community and he lacks transportation. After his last visit to the emergency department, Robert was prescribed oxygen treatments and a new medication; however, he has not filled these orders. Robert lives with his 15-year old son and is a single parent. Robert and his son have been on Medicaid for the last four (4) years since he lost his job. Robert has been a member of the plan since December 2016.

The respondent shall describe its approach to coordinating care for an enrollee with Robert's profile, including a detailed description and workflow demonstrating notable points in the system where the respondent's processes are implemented:

- a. New Enrollee Identification;
- b. Health Risk Assessment;
- c. Care Coordination/Case Management;
- d. Service Planning;
- e. Discharge/Transition Planning;
- f. Disease Management;
- g. Utilization Management; and
- h. Grievance and Appeals.

Where applicable, the respondent should include specific experiences the respondent has had in addressing these same needs in Florida or other states.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan. Clear Health's integrated care model supports delivery of seamless, whole-person care across the continuum to decrease fragmentation and achieve the best outcomes for members, like Robert, who have complex conditions. In the response below, we describe Robert's story and how we address his physical, behavioral, and social support needs, and then outline our activities in meeting each of the Evaluation Criteria. By coordinating care across the continuum – between providers, case management, pharmacy, behavioral health, subcontractor management, and medical utilization oversight – and by using all available tools and data points, we identify and comprehensively address our members' health care needs.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

**** Meeting Robert's Needs Through Clear Health's Comprehensive Case Management ****

Following Robert's latest emergency department (ED) visit, he is assigned a Clear Health Case Manager (Managed Care Coordinator), Maria. Maria is a registered nurse who has experience working with individuals experiencing cardiac and pulmonary conditions, in addition to HIV disease, which Robert is also living with. Maria reviews Robert's personal health record to understand his current situation. In her review, Maria notes Robert's original assessment shows a history of COPD, HIV, hypertension, and tobacco use, but also compliance with his current treatment plan, his PCP, and his progress toward his treatment goals. She also notes that Robert was referred to Clear Health's Case Management and Healthy Behaviors program (for smoking cessation support). While Robert has declined case management in the past, he has expressed interest in the program to help him quit smoking. Maria also sees that over the course of Robert's last three ED admissions, several attempts were made by our Managed Care Coordinators to reach him, including outreach to his PCP who is an HIV experienced provider, but were unsuccessful. His phone had been disconnected and his email returned as "user not found." On his last ED visit, Robert indicated he no longer had a phone and provided the ED with his new residential and email addresses, which were then updated in Clear Health's Case Management System and shared with his HIV provider.

After thoroughly reviewing his record, Maria uses the updated email information to reach out to Robert, introduce herself, and to ask for a face-to-face visit at a time and place that works for Robert. She explains in the email that, as his Managed Care Coordinator, she's here to help him understand his benefits and the services available that can help him. Within a day, Robert responds and agrees to meet Maria two days later at his home.

During the comprehensive assessment, Maria talks to Robert about his medical history and how he is feeling now. In her review of Robert's record, she noted several additional risk factors, including that Robert isn't taking his medications and has not seen a specialist in more than 10 months as well as his need for a prescription for oxygen (while still an active smoker). Robert may also be at risk for things like heart disease, deep vein thrombosis, stroke, peripheral vascular disease, renal disease, opportunistic infections due to his HIV, and nicotine dependence. Together, they talk about his conditions as well as his challenges with smoking and his recent attempts to quit. Maria listens to Robert talk about his experiences, and she congratulates him on his accomplishments of cutting back on smoking and encourages him to continue.

He tells Maria how unpleasant the recent ED visits have been, and Maria assures him she understands and they can work together to identify ways to prevent these occurrences and to find alternatives for when he is not feeling well. Maria learns the reason Robert has presented so often in the ED is that it is the closest health facility to where he lives and he doesn't have a car or means of transportation to go anywhere else. Maria explains to Robert about his benefits and tells him she will help him arrange transportation and an appointment with his PCP. Maria also gives Robert information on some of the nearest urgent care clinics, emphasizing when they are appropriate to use and that they often have shorter wait times and are easier to access. Maria also tells Robert about our 24/7 Nurse help line and our LiveHealth Online. She shows him how to access LiveHealth Online (using her iPad), so Robert can see how he can quickly access medical advice for any questions he may have about medications or his conditions. Maria also reminds Robert that she is also available to help him.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Maria also facilitates access to an uninterrupted supply of medications for Robert, which will improve medication adherence through coordination of his mail order pharmacy benefit. Since Robert does not have a phone at the time of the visit, Maria contacts the pharmacy to set up a 30 day mail order supply of current medications after a review by our in-house pharmacist for contraindications.

Maria and Robert also talk about his situation at home and Robert's desire to have a more stable environment for his son, a Simply (not Clear Health) member who has not received the recommended well child visits and screenings. Maria makes sure to listen carefully and support Robert, who reveals that he has not disclosed his HIV status to his son. Given his challenges, financial constraints, and the burden of his current physical health conditions; Maria also thinks Robert may be at risk for depression and sets up a referral for Robert to see a therapist. She also inquires about any additional family support that may be in the area.

Robert agrees to develop a plan of care to help him follow his discharge plans, fill his prescriptions, and get properly linked with a specialist. Maria explains the plan of care development to Robert and that other individuals may be able to contribute to this plan. She asks Robert if he'd like to identify participants for his personal multi-disciplinary team and Robert agrees that he would like his PCP to participate. Robert chooses not to include his son at this time due to concerns about his HIV disease, but understands that he may change his mind at any time, if and when he chooses to disclose his status. Maria shares information regarding the local AIDS services in the area where he may attend support groups and where specialized counselors may assist Robert in disclosing his HIV status to his son and other members of his family.

At the end of the visit, Maria explains the various options available to Robert and confirms that email is his preferred method of communication. Maria walks through the next steps with Robert, including explaining his plan of care development and identifying potential meeting times for his MDT to meet. She asks Robert if it is ok if she reaches out to Robert's current providers, and he agrees. Maria makes sure that Robert has her contact information (both email and phone) and the number for Clear Health's 24/7 call center, so that Robert can reach someone at any time.

Following the assessment, Maria reaches out to Robert's PCP, introduces herself, and explains that she is working with Robert to develop his personalized plan of care. She reviews Robert's assessment results and personal health record to ask his PCP for recommendations regarding services and care to help Robert attain his identified goals.

After this call and using all available information, Maria contacts Robert again five days later, as agreed, to review his finalized personalized plan of care. She also helps him schedule a PCP appointment and says she will review his prescriptions and treatment plan with him after his visit, so she can help him closely monitor things like his body mass index (BMI) and risk for diabetes. Maria also helps Robert create a list of questions to bring with him to his PCP appointment about his long-term care and conditions. Although the HIV disclosure concern is important, Maria and

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Robert agree to focus on the immediate health concerns regarding his recent COPD exacerbations.

During the call, Robert reviews and approves his care plan, and Maria prepares to initiate case management, including service and health interventions associated with Robert's identified goals and milestones. Maria makes sure all services are authorized and updated in the Clear Health Case Management System within 14 days. She also follows up with Robert by telephone during the 14 days to see that his services are initiated according to his approved plan of care.

Maria, who lives in Robert's area, continues to contact him by phone at least monthly after the initial 14 days. She also offers to meet him quarterly face-to-face or more often if requested. During these monthly visits, Maria and Robert review his plan of care and see that all services are being received. She also reviews his care goals and any barriers or challenges he encounters. She reviews his claims to verify that he attends his physician visits as well as his report of medication fills and determines whether he has any unaddressed needs or additional risks to be incorporated into his current plan of care. Throughout this process, Robert and Maria work together to track his progress towards his identified goals.

1.a. IDENTIFY MEMBERS WHO NEED CARE COORDINATION

In addition to member self-referral, Clear Health uses a multi-modal approach to identify members who have complex conditions, need care coordination, and who may benefit from interventions. Through initial screeners, the comprehensive health assessment, provider referrals, our Utilization Management (UM) team, and predictive modeling; we identify members, no matter where they live, who may benefit from any of our clinical programs – including our Case Management and Disease Management programs. In addition, our predictive modeling tool, the Chronic Illness Intensity Index (CI3) helps us proactively monitor and mine utilization data to identify members with high rates of utilization who may be at risk for ED, inpatient, medication adherence issues, and other key health factors. Among our suite of predictive modeling tools, we will identify members who need more intensive support, such as when a member has three ER visits within a 60-day period. Our subscription to the Emergency Notification System which provides real time notification when members present in the hospital, including ED visits, is also a valuable tool in the rapid identification and referral of at risk members.

In Robert's case, he was enrolled in our plan and, following his initial screener and original assessment, was referred to our Case Management program to address his complex conditions and our Healthy Behaviors program for smoking cessation. His recent ED visits, as well as non-compliance with medication adherence/refills and equipment, triggers a referral through our CI3 for more intensive outreach and care coordination efforts.

1.b. THE ASSESSMENT PROCESS, DATA/INFORMATION UTILIZED AND TIMEFRAMES

During the first 30 days of enrollment, the member receives a Welcome Packet that includes an HRA form. Welcome calls are also made to the member during this period which includes discussion of the HRA form, the opportunity to complete the form on the phone or mail it back to the plan.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Once referred to case management – either through the CI3 score, member or provider request, or Member Services referral – the Managed Care Coordinator reviews all of the member's information available and makes the initial member contact attempt within 72 hours. During the first 14 days of the referral, at least three contact attempts must be made and a "please contact us" letter is issued to ensure members, like Robert, are actively engaged in case management.

During first contact, the Managed Care Coordinator completes the comprehensive assessment. If a member is unable to complete the assessment, our Managed Care Coordinator schedules one at the member's earliest convenience, but not to exceed 14 days from the initial contact.

Clear Health uses a variety of information to assess the member's total health care needs (physical, behavioral, functional, cognitive, social, and occupation). Using structured tools, Managed Care Coordinators conduct an in-depth clinical assessment to gather information, including:

- General health
- ED use and hospitalizations
- Medications
- Health care utilization
- Functional capacity
- Preventive care history

Our comprehensive health assessment comprises more than 20 potential clinical areas that help Managed Care Coordinators, like Maria, identify potential risk factors and areas of need. It also includes specialized assessment modules for each member's specific conditions (including physical, behavioral, functional, social, and psychological health) using branching logic.

Prior to meeting with Robert to complete the comprehensive assessment, Maria follows the department's checklist to ensure a comprehensive review of all of Robert's records in Clear Health's Case Management System, including his personal health historical data from several domains and sources, such as utilization, claims, authorization, and case management data regarding:

- Physical health
- Pharmacy
- Behavioral health
- ED
- Hospital admissions
- Event notification service (ENS)
- Outpatient services
- Ancillary services

Information from our Case Management System is reviewed with Robert during the comprehensive assessment process and used to formulate his plan of care. For example, Maria cross references the medications listed in the Case Management system with Robert's medications in the home to determine any adherence issues or gaps. The plan of care is finalized within 5 business days of Robert's assessment.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.c. RISK STRATIFICATION PROTOCOL

Clear Health uses our proprietary Chronic Illness Intensity Index (CI3) for risk stratification. Its predictive modeling algorithms show the relative risk ranking of members regarding their likelihood to consume significant medical service resources in the future. These members often have complex medical issues, high service utilization, intensive health care needs, and higher inpatient (IP) and/or ED usage. All clinical data is entered into a reporting system, where it is synthesized to identify and stratify members by severity and risk level. Once stratified, our Clinical team accesses the information to identify opportunities for outreach, education, enhanced access, and care coordination to identify members with co-morbid medical or mental health and substance use disorders, assess their conditions, and implement interventions. Utilization and chronic condition data are claims-driven and based on the prior 12-month history.

As stated above, at the time of his initial enrollment with Clear Health in December 2016, Robert was identified as moderate risk (Level 2). He was verified to be under a treatment plan with his PCP for his chronic conditions and referred to our Case Management program; however, his recent ED utilization and claims history (medication plan adherence) resulted in raising his risk level to Level 3 (high risk) in our CI3 report, prompting assignment for more targeted outreach by our case management team. Maria continues to monitor Robert's care and service needs, progress to goals, PCP and ED usage, to identify any changes in his risk stratification or care plan. Given Robert's recent use of ED services, Maria communicates with our in-house Pharmacist, who reviews Robert's current medications (to verify appropriateness and make sure there are no contraindications) and flags any items for his PCP to review.

1.d. IDENTIFYING SERVICE NEEDS AND MAKING REFERRALS

Clear Health's guiding principle is and will continue to be person-centered care and service planning across the member's system of care, optimizing but never duplicating services. Our Managed Care Coordinators coordinate personalized care and service supports across the full continuum of care to address the member's needs holistically (across physical health, behavioral health, and social supports).

Clear Health's process for identification of service needs occurs during the development of the plan of care. In this process, Maria reviews with Robert the findings from the assessments and information gathered through our systems. This information is used to develop the plan of care, which includes problems, interventions, short- and long-term goals, timeframes, and anticipated outcomes. Maria asks Robert to identify his preferred providers for the services and care included in his plan of care. He includes his PCP as a member of his MDT for inclusion in this review.

During the assessment process, Maria also asks Robert about any community agencies or supports he is currently using, including Ryan White HIV service agencies, community/mail-order pharmacies, home health, durable medical equipment (DME), and transportation options. She asks if he's involved in or interested in participating in community programs, such as exercise, parenting, and peer support (tobacco cessation and HIV), among other options. She incorporates all current covered and non-covered services and supports identified during the assessment, as well as any new covered or non-covered services Robert would like to include. Maria helps identify provider or community agency options for services that Robert can select. Within five days of the initial visit and using the data collected during the assessment, Maria works with Robert to review

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

and finalize the person-centered plan of care. Following approval, Maria initiates the tasks identified in the plan of care.

Given Robert's recent medical challenges as well as the other potential risks to his physical and behavioral health, his comprehensive plan of care includes the following service needs and referrals:

- Case Management/Care Coordination — To address member's needs, improve adherence to the treatment plan, remove barriers to care and reduce health risks. Maria will provide these functions that reinforce progress toward Robert's goals and facilitate communication between the member, providers, and health plan.
- Coordination of PCP/Specialist Appointments — As part of the case management/care coordination services, Maria helps Robert set and attend appointments to make sure he is receiving timely, ongoing health checks. She also reviews his prescriptions and treatment plan with him after these visits. This helps promote better compliance with medications, management of his COPD and hypertension, and monitoring of his BMI and pre-diabetes, in addition to ensuring that Robert remains adherent to his HIV treatment regimen. Maria helps him create a list of questions for his PCP regarding his long-term care and will provide coordination of any specialist appointments as identified by his PCP. During contact with Robert's PCP to schedule his first visit, Maria asks the PCP to review Robert's personal health record for additional potential COPD medication needs (for example, bronchodilator and systemic corticosteroid within required HEDIS timeframes post ED visit). In addition, Maria asks Robert if she can assist in coordinating his son's care and he agrees to have her help refer his son to a Simply Case Manager for assistance with scheduling a well-visit and transportation at this time.

Maria will follow up with Robert after the PCP or any specialist visit on the importance of coordinating the pulmonologist oxygen orders with his PCP for review as his PCP serves an important role in seeing there are no safety conflicts with medications and treatment plans, particularly with his co-morbidities.

- HIV/AIDS Services — Maria refers Robert to an area Ryan White-funded agency that provides specialized programs using peer-led support groups and referrals to resources specifically designed for persons living with HIV/AIDS such as housing programs, legal aid, and food programs that he may qualify for.

- Transportation — To address the challenges Robert has experienced getting to his and his son's health care appointments, Maria helps Robert access transportation services. These services can be requested by either the member, plan, or providers through Clear Health's delegated transportation subcontractor. Maria informs Robert about this benefit and provides the number to call and arrange transportation once he receives a phone. Until that occurs, Maria lets him know she will coordinate transportation for appointments. Maria calls Robert's PCP during the visit to schedule his first appointment.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

- Mail Order Pharmacy — As his Managed Care Coordinator, Maria facilitates access to an uninterrupted supply of medications for Robert, which will improve medication adherence through coordination of his mail order pharmacy benefit. Since Robert does not have a phone at the time of the visit, Maria contacts the pharmacy to set up a 30 day mail order supply of current medications. Maria will also track and assure delivery of medications and check-in regularly with Robert to monitor his medication adherence. Given Robert's recent use of ED services, Maria communicates with our in-house Pharmacist, who reviews Robert's current medications to verify appropriateness and make sure there are no contraindications. The Pharmacist also reviews and flags any items for Robert's PCP to review.
- Behavioral Health Services — Maria explains the behavioral health services available to help address Robert's feelings of anxiety and depression and provide supportive training such as parenting classes. Robert is also interested in exploring the idea of disclosure of his HIV status to his son which he has been reluctant to do so in the past. Maria explains to Robert his options, such as in-person visits and how to access telemedicine, if Robert prefers. Robert likes the telemedicine option given the rural setting where he lives and the other appointments he has. Maria refers Robert directly by fax to an appropriate behavioral health provider. Maria is aware that anxiety and COPD can often create a cycle of breathlessness, which can create panic and make individuals feel more anxious (making it harder to breathe). This creates a breathlessness cycle, making it difficult for an individual to distinguish the symptoms of anxiety from the symptoms of COPD. While having some anxiety when diagnosed with a chronic disease can be helpful, as it prompts the individual to follow treatment, paying more attention to symptoms can impact quality of life. Maria makes sure to indicate in her referral the impact on co-morbidities to be addressed.

- Education — Robert's recent ED visits, which he identifies as an unpleasant experience, identify an opportunity to identify alternatives for his care needs. Maria educates Robert on the benefit of visiting his PCP and remaining current with preventive screenings, medications, and monitoring of his conditions, as well as the option to use Urgent Care/Minute Clinics rather than EDs because they often have shorter wait times and are easier to access for care. Maria also provides Robert with a list of nearby urgent care clinics and guidance on arranging transportation services, if needed. For specific health conditions, Robert agrees to receive educational materials by mail on COPD, hypertension, and hypercholesterolemia but declines those for HIV until he is able to disclose his status to his son. Maria will review what was learned during the next scheduled contact and reinforce key points during subsequent calls.
- Provision of Nurse help line and LiveHealth Online Contact Information for Care Concerns — Maria introduces Robert to available telephone and web-based technologies he can use from home to seek medical advice. She highlights the use of the 24/7 Nurse help line, which can provide Robert with quick access to medical advice for questions related to medications or prescribed interventions. Through Clear Health, Robert also has access to LiveHealth Online,

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

which provides tele-access to physicians able to access his personal health records, if he has questions about a health care concern or needs assistance.

- Safely Administer Oxygen (O2) — Maria assists Robert in coordinating his prescription for and delivery of O2 for his COPD. Working with his PCP, Maria also identifies pulmonary and cardiology specialists for Robert to consider for his ongoing COPD needs. Maria also educates Robert and his son on the dangers of smoking while on O2 to reduce the likelihood of injury or damage to the home.
- Clear Health Smoking Cessation program – To support one of his identified goals, Maria asks Robert about his experience with the Clear Health Smoking Cessation program. Robert admits that when he lost phone contact, he also became stressed and was ignoring emails and letters. Robert now feels he will have all the tools necessary to re-engage in the program. He states his motivation has increased since his recent health scares and trips to the ED. Robert is again referred to the Clear Health Smoking Cessation program and receives educational support and information on local support groups, as well as access to smoking cessation medications to help overcome his nicotine dependency. Robert adds questions related to prescribed medication for smoking cessation for his upcoming PCP visit. Robert desires to fully stop his use of nicotine to best meet his goals and health outcomes.

[REDACTED]

[REDACTED]

[REDACTED]

- Over-the-counter (OTC) benefits - Maria discusses with Robert available OTC benefits and his need to maintain a blood pressure log to prevent further complications. He agrees to use his OTC benefit to obtain a blood pressure monitor as an important first step. Robert wants to order this on his own as soon as his phone arrives.

In keeping with his care plan, Maria will provide Robert with ongoing education and support emphasizing the importance of regular doctor follow-ups for continuity of care to prevent unnecessary hospital admissions and ED visits.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

1.e. INTERVENTIONS AND STRATEGIES FOR PLAN OF CARE COMPLIANCE

Through regular, monthly contact (or more frequently as gaps are needed or as identified by Robert), our Managed Care Coordinators reach out to members and review their progress towards the goals they've identified. The Managed Care Coordinator utilizes the member's personal health record which is updated daily with utilization and claims and identification of upcoming preventive screenings or changes in risk stratification, to remain current with the member's utilization and care gaps.

Maria works with Robert to track his continued progress towards his goals and implementation of the interventions described in the preceding section as well as to address any new barriers or challenges within the plan of care. Through regular contact and monitoring to quickly identify gaps in services or ED utilization, Maria remains current with Robert's compliance to the path he has chosen with his care plan. As an effective Managed Care Coordinator, Maria relies on the training and tools she receives as part of Clear Health's case management department to facilitate compliance with the plan of care including how to utilize:

- Motivational Interviewing techniques as a method and strategy to assist individuals to move through the change process in a positive and affirming way
- Techniques for positive reinforcement and facilitating change visualization
- Clinical training for in-depth understanding of prevalent diseases, co-morbidities, and co-occurring disorders

[REDACTED]

Maria relies on the expertise and support of the multi-disciplinary team, which monitors Robert's health and progress through his plan of care. Through continued communication and coordinated support from Maria, his PCP, and specialists; Robert will have the support he needs to successfully achieve his health goals.

The following represent examples of actions Maria may take to help facilitate Robert's successful attainment of his health goals.

During the assessment and care planning processes, Maria shares the Clear Health Healthy Behaviors program options with Robert. Offered alongside the Clear Health Case Management program, it provides Robert with additional incentives and education about his chronic condition self-management, promoting his personal responsibility, and helping him better understand his conditions and risk factors. Robert is a heavy smoker (10 cigarettes a day), so Maria congratulates him on reducing his cigarette usage and asks if he would like additional resources to help him.

[REDACTED]

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

1.f. DISCHARGE AND AFTERCARE PLANNING PROTOCOLS

Discharge planning begins upon notification of an acute inpatient, observation status, rehabilitation or skilled nursing facility admission. Early identification and planning of the member's transition of care is essential in providing quality discharge needs and in making sure that the member is discharged to the appropriate level of care to prevent readmissions and unscheduled transition of care. Clear Health's Transition of Care team works with the member, Clear Health Concurrent Review Nurses, attending physician, hospital staff, and all ancillary service providers to complete all discharge needs for members and identifies any ongoing care needs to coordinate with the designated Managed Care Coordinator.

In the Spring of 2017, Robert's health declined and he was treated in the ED on May 4th, 9th, and 20th. Per Clear Health's processes, each of these visits was captured in our Event Notification System, which triggers an alert to the member's PCP to facilitate follow-up care. In Robert's case neither the PCP nor the plan was able to contact Robert due to a disconnected phone number. Since there was no valid phone number for Robert, a letter was sent to Robert's address with information about our services and to request that he contact us.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

The Managed Care Coordinator contacted the hospital the day after Robert's second visit to the ED to secure correct current contact information. The information from the ED was the same as the information in Clear Health's system; thus, the Managed Care Coordinator requested that it be noted in the ED's system that Robert is a Clear Health member and that his contact information is inactive. The Managed Care Coordinator reaches out to the PCP to also notify that the phone number is still inactive and request notification if Robert contacts them. A second letter is sent to Robert's address with information about Clear Health's Care Coordination services and requesting him to contact us.

Robert's third admission was on May 20, 2017. Upon identification of Robert's third visit in 30 days to the ED, the facility reviewed his record and noted that Robert is a Clear Health member and that his phone number was inactive. Robert indicated that he no longer has a phone number and can best be contacted through a new email address. This information was then updated in the ENS system, notifying us and PCP of the change.

To highlight our discharge and aftercare planning protocols, the following represents an example of our Transition of Care (TOC) program processes, if Robert is admitted to a facility for his COPD.

During his stay, a concurrent review nurse identifies him as a Clear Health member and accesses his personal health record to retrieve pertinent clinical history. Through that review, the nurse determines that Maria is Robert's Managed Care Coordinator, and reaches out to advise her of the admission. Throughout his stay in the facility, Robert's care and service needs are addressed by the concurrent review nurse. Clear Health's Transition of Care team engages members who are not already in case management to provide post discharge management; however, Maria is able to follow discharge protocols and work with the Concurrent Review team as part of the holistic case management she is providing.

Through the transition protocols that follow the Coleman Model, Robert's plan of care is updated and he will receive a discharge assessment, personal health record, medication discrepancy review, post-discharge meals, PCP and specialist follow-up visit coordination, and 7, 14, 21, and 30-day calls to ensure Robert is appropriately following the prescribed care, encourage and assist as needed. Based on daily processes, the PCP is notified by the health plan of admission and discharge. Robert may also receive another home visit if his discharge assessment, length of stay and other factors indicate high-risk for readmission. Maria also conducts a new comprehensive assessment to identify any new care and service needs. Since Robert's admission is related to his COPD, Maria will see that Robert has his prescriptions for inhalation therapy, including nebulizer if appropriate, oral corticosteroids, and all other medications. She also instructs Robert on medication administration as well as potential side-effects while emphasizing the importance of compliance with prophylactic medications. If a visit is indicated, Maria will re-evaluate Robert's home environment for the presence of environmental irritants that could cause his exacerbations and discuss ways to reduce exposure and avoid potential triggers.

Once a member achieves 30 days without readmission, the goal to prevent readmission is "met" and the Managed Care Coordinator resumes working with the member on remaining updated goals and interventions.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.g. COORDINATION WITH OTHER INSURERS, PROVIDERS, AND COMMUNITY PARTNERS FOR NON-COVERED SERVICES

Through our care planning processes, we identify and address our members' care and service needs across the full continuum of care (physical health, behavioral health, functional, and psychosocial). We recognize that members sometimes have needs that may not be met through our existing provider network or may not be a covered service. To help these members remain in the community, we engage all existing community resources to provide solutions. Because Managed Care Coordinators know the local area, they access community supports and actively engage community-based organizations, advocacy groups, faith-based organizations, and other community resources to develop creative solutions for services that are not a covered benefit.

Through the assessment and care planning processes, Maria discusses how community resources such as the Aging and Disability Resource Center and the Social Security Administration, in addition to the local Ryan White funded agency, may support Robert's needs. She helps him find applications and prepare questions to these agencies so that Robert can inquire about disability benefits and Medicare. Given Robert's situation, he may also be eligible to receive disability benefits. Maria works with Robert to coordinate with other insurers and apply for Medicare and/or any other coverage for which he may be eligible. As Robert's Managed Care Coordinator, Maria's role includes identifying providers and coordinating across them to make sure Robert receives integrated care (to include PCP, pharmacy, transportations, multi-disciplinary team meetings, and making sure information sharing takes place). For example, if Robert had FFS Medicare primary, then Medicare would cover all of Robert's medical needs. However, since transportation is not a covered benefit, Clear Health Medicaid would provide those services and coordinate this benefit to ensure access to his Medicare-covered medical benefits.

1.h. PROVIDER CAPACITY ASSESSMENT

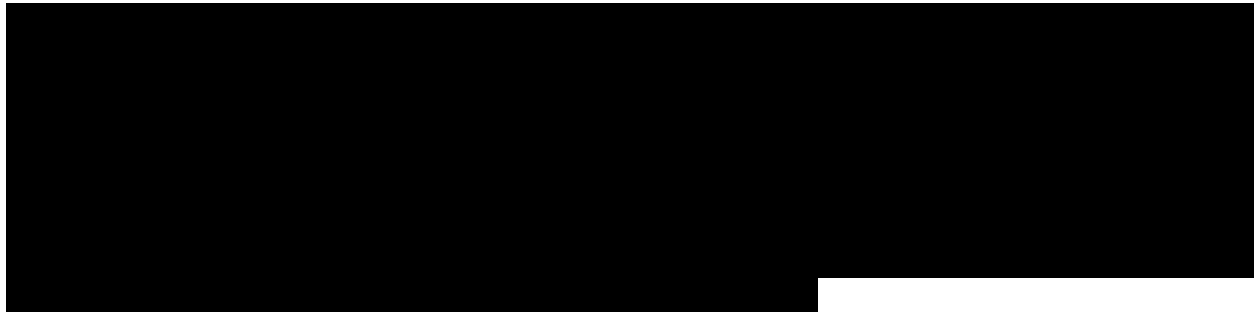

Clear Health's Provider Relations team continuously monitors our provider network to make sure that all contracted providers in the plan are credentialed accordingly and have the capacity to serve our members. Upon making a referral for service, the Clear Health case management team communicates the member's needs with service providers they have identified to see that they are able to meet his needs and have available appointments. All referrals include the member's detailed symptoms and behaviors at the time of referral to facilitate the best pairing. Our expansive provider network includes providers that have enhanced training to meet the needs of the Specialty population such as those with HIV. Our network also includes providers that are diverse and meet different cultural and linguistic needs as well.

Our network assessment process is designed around continued review and improvement. In addition to the regular reporting and monitoring by the Provider Relations team, part of Maria's training and protocol is to report any gaps or network barriers experienced to our Provider Gap Committee. This process allows us to immediately incorporate feedback from our front line staff into the assessment process.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

1.i. STRATEGIES THAT PROMOTE MEMBER SELF-MANAGEMENT AND TREATMENT ADHERENCE

As part of developing the person-centered plan of care, our Managed Care Coordinators include health education to improve upon a member's health literacy, build member advocacy and self-management skills, and to encourage treatment adherence. For example, members like Robert (who have several co-morbid conditions), receive self-care education using evidence-based guidelines, including coaching by the Managed Care Coordinator as well as printed materials and access to online resources.

Maria addresses Robert's overall feeling of health using motivational interviewing to assess how his COPD impacts his daily living activities (including cooking, cleaning, activities with his son) and determine how much he wants to change these circumstances and address his limitations. Maria also provides verbal education on COPD and smoking and identifies educational materials that might be helpful to Robert, while reinforcing his progress to-date on reducing the number of cigarettes smoked daily and discussing barriers he feels prevent him from stopping completely. To assist Robert in his work to reduce or quit smoking, Maria reiterates how smoking impacts COPD and shortness of breath and the dangers of smoking near his oxygen machine. She continues to discuss Robert's use of the Healthy Behaviors Smoking Cessation program, and helps him identify other methods he might use to stop smoking, including nicotine patches, reducing the number of cigarettes per week, and/or oral medications such as Chantix. Maria asks Robert to describe barriers he perceives that hinder his ability to completely quit smoking and continues to provide positive reinforcement and celebrate the work he has accomplished to-date.

Maria's monitoring and follow-up are provided until care plan goals are met and the member has demonstrated the knowledge and appropriate use of resources to continue to successfully self-manage in collaboration with his PCP/specialist.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.j. APPLICATION OF UTILIZATION MANAGEMENT PROTOCOLS

Clear Health's comprehensive Utilization Management (UM) program includes well-defined protocols for UM activities that are tailored to meet the needs of our members. We promote the delivery of care and services in a culturally competent manner within the context of members' cultural beliefs, behaviors, practices, disabilities, and language preferences. We use the guidelines and protocols to provide a framework for decision-making that also considers social determinants, geographic location such as rural versus urban, and how those circumstances may impact access to care.

Our fully integrated UM program is compliant with NCQA standards and includes defined protocols for the following components:

- UM program structure and responsibilities
- UM staff qualifications and training
- Medical Necessity Criteria and Level of Care Guidelines including selection, approval, adoption, and resulting implementation
- Medical Necessity Review procedures (prospective, concurrent, and retrospective)
- Integrated Care Rounds
- Service authorization, adverse determination, and appeals procedures
- Transition planning and coordination (initial and continued stay)
- New technology assessment
- Integrated pharmacy management
- Quality committee structure and responsibilities
- Quality oversight and improvement activities

Many of the services for Robert require a Utilization Management review to receive authorization. An authorization requirement will be needed for Robert's Oxygen (O2). Through the assessment process, Maria discovers that Robert has a prescription for new COPD medication, but has never filled it. Maria reaches out to the PCP and shares information from the discharge plan to obtain a new prescription for Robert. The PCP expresses concern about the amount of O2 and instead, refers Robert's case to a pulmonologist to review the discharge plans. Maria coordinates this and arranges transportation for Robert to attend an appointment with the pulmonologist, who examines Robert and writes a new prescription for DME and medication.

Robert also requires authorization for DME depending on the requests made by the PCP. Decisions on authorizations are typically made within seven days, but an expedited authorization may be filed and a decision rendered within two days. The decision is based on Anthem's clinical criteria hierarchy. The State Medicaid Coverage Policies are used to confirm medical necessity.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Maria monitors these authorizations and sees they are completed in a timely fashion and that the O2 has been delivered.

If, at any time, Robert is dissatisfied with any of the services or supports being provided, he may initiate a complaint/grievance by calling the Member Services line or sending a fax/letter directly to the health plan. For example, if Robert is dissatisfied with a denied prescription, the Clear Health Member Services team completes initial research to see if any medication claims have been denied for Robert and to determine the reason (such as the prescription is too early to fill or authorization is required). The Member Services team escalates Robert's complaint to the Grievance team on the next business day if they are unable to resolve the issue. A Grievance Coordinator sends an acknowledgment letter to Robert and contacts him to provide regular updates of the process. The Grievance Coordinator partners with the Pharmacy team until Robert's grievance is resolved. Once the issue with filling the medications is resolved, a resolution letter is sent to Robert within 30 days to confirm the outcome of the grievance.

1.k. STRATEGIES TO INTEGRATE MEMBER INFORMATION ACROSS THE PLAN AND SUBCONTRACTORS

Robert's information is integrated across our data platform, and we have data exchange processes to assure that each delegate has the needed information, balancing compliance with HIPAA regulations with sharing the necessary information to provide care. All delegates receive enrollment files and other pertinent medical data relevant to their delegated functions. For example, we regularly share with our pharmacy benefits manager member diagnosis data to allow them to auto adjudicate authorizations. Further, the PCP, has access through the provider portal to the utilization and case management history for the member. In addition, each member has a personal health record, which is accessible by all Clear Health staff engaged in care and service coordination for that member.

We can also identify missed prescription fills through reporting. Maria is able to view Robert's medication history as part of her routine case management activities. She sees that Robert is not filling his medications and works with him to resolve any barriers. In Robert's case, his lack of transportation was the challenge, and Maria arranges for Robert to receive his prescriptions by mail to resolve this, and we will assist Robert with refill assistance as needed.

2. WORKFLOW

As illustrated in our workflow, provided as Attachment SRC# 8-1: Workflow, Clear Health meets all State-required timeframes across the care planning process.

3. INNOVATIVE AND EVIDENCE-BASED PROCESSES TO ENHANCE COMMUNICATION AMONG SERVICE PROVIDERS AND SUBCONTRACTORS

Clear Health supports providing access to actionable medical and behavioral health information to our multidisciplinary teams through our Case Management System. We support a shared plan of care approach where clinicians work together, through access to a member's physical and behavioral health assessments, service authorizations and other clinical data, claims history, and gaps in care, to support coordination of all members' care and service needs. The system includes an online dashboard emphasizing utilization of wellness and emergency services that is available to all providers. Providers can send us secure referrals and information by email or fax. They can

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

also send a provider-to-provider secure email (if their system permits) or transfer information among providers in a secure manner. We make sure that participating providers have the appropriate signed consents in place to coordinate care.

Maria uses Clear Health's Case Management System to track Robert's plan of care and his and his family's engagement in services. The system is used to view Robert's history, diagnoses, pharmacy, and emergency services. The information helps inform ongoing activities to support him in his recovery.

4. SUPPORTING CARE DELIVERY IN THE MOST APPROPRIATE AND COST-EFFECTIVE SETTING AND AVOIDS UNNECESSARY OR ED USE

Our program uses industry best practices, such as screening in health care settings and schools, motivational interviewing and engaging Peer Support Specialists, to supplement traditional clinician outreach. Our Managed Care Coordinators work to address the health status, health literacy, and engagement of members through targeted interventions and case management, education, self-management principles, and harm reduction. We engage providers, community partners, and others (such as Peer Supports) to make sure members have frequent in-person contact. During conversations with members, we determine their readiness to change, encourage them to identify strengths and needs from their own perspective, and participate in the development of their plan of care. This evidence-based and person-centered engagement methodology enhances the probability that members will develop self-directed plans of care with achievable goals. Our fully integrated program takes every aspect of a member's life into account. We work with members to address social determinants of health and support needs, such as housing, employment, commitment to preventive care, and needs in other life domains that can compromise sustained recovery.

To support care delivery in the most appropriate and cost-effective setting and to avoid unnecessary ED admissions, Maria provided case management and care coordination services, including helping Robert schedule and arrange a visit to his PCP to help keep him healthy (and coordinating transportation services since that was a challenge contributing to his frequent ED visits). She reviewed his medications with him and also worked hard to get his oxygen order processed and all prescribed medications in place to help him avoid frequent pharmacy trips, and she coordinated mail order medications to assist in overcoming this barrier to medication adherence. Maria took the time to explain the services available to him to help him avoid another ED visit, including how to contact her, how to reach our 24/7 Nurse help line, and how to access nearby urgent care clinics, if needed.

5. EXPERIENCE SERVING ENROLLEES WITH COMPLEX MEDICAL NEEDS AND IMPROVING HEALTH OUTCOMES.

To proactively identify members with complex needs, we use a predictive modeling system that synthesizes member demographic and claims data, such as diagnoses, pharmacy, hospitalizations, ED encounters, and expenditures, to predict future outcomes. This enables us to identify and prioritize outreach to members with mental health, substance use disorder (SUD), and other chronic health conditions, including those with the greatest need for ongoing services and the likelihood to be admitted to the hospital in the near future. Using this information, we will identify a designated Managed Care Coordinator who is matched to the member's primary needs, physical health, behavioral health or long-term services and supports, based on training and

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

licensure and is located in their geographical area whenever possible. All of our staff has received extensive cross-training to provide for the member's needs, with access to the full Clinical Support team in Clear Health, with expertise in pediatrics, adolescents, infectious disease, nutritional, disease management, and physical, long-term care and behavioral health needs.

Robert is representative of members we see every day. As a health plan, we are very proud of the health outcomes we are able to help our members achieve. This is evidenced by our success in having the best results for potentially avoidable admissions among all Florida specialty health plans, as measured and reported by the Agency.

6. COORDINATED HEALTH CARE INTERVENTIONS DESIGNED TO ACHIEVE COST SAVINGS

Our members in case management frequently identify as having two or more conditions. In fact, throughout our health plan, 62% identify as having three or more. Achieving cost savings while optimizing health outcomes requires a member-centric, integrated approach. Our members work closely with qualified and trained Case Managers (Managed Care Coordinators) to make sure they are receiving the most appropriate level of care. Our model has proven successful. In a 2016 case study, we found that after receiving case management services for at least 90 days, members used health resources more efficiently and required less emergent care, thus reducing costs while improving outcomes. One such outcome was significantly greater: reduction in avoidable emergency room visits and inpatient admissions. Overall, members demonstrated a 39% reduction in non-emergent ED visits.

Our integrated, strengths-based, member-centered Case Management program considers the specialized needs of our members who have complex needs, including their physical, behavioral health (mental health and substance use disorder), pharmacy, and social and community support needs. We offer tailored complex Case Management programs for members with unique, complex, chronic, and co-occurring needs who require higher levels of interventions. Our integrated approach provides access, responsiveness, and effectiveness in the system of care by supporting the following:

- 1) Identification of members with potential or current specialized or complex health care needs through early screening, comprehensive assessments, and predictive analytics
- 2) Risk stratification for each member based on a multi-faceted consideration of information
- 3) Placement of members into Case or Disease Management programs based on needs assessment
- 4) Development of an integrated plan of care that addresses physical, behavioral health/substance use disorder, pharmacy, social, and home- and community-based needs for members as they transition across all settings and incorporates both covered Medicaid benefits and services as well as those not covered by Medicaid that would benefit the member
- 5) Reciprocal referrals and information sharing with PCPs/specialists and community-based Ryan White providers with HIV expertise

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- 6) Formation of multi-disciplinary treatment team for members in complex case management as needed to support them and provide consistency and continuity of contact with their familiar support system, as well as the expertise of a broader team of specialists as their needs evolve
- 7) Care Coordination support to improve member access to needed services, including scheduling appointments, arranging transportation, conducting appointment reminder calls, following up to verify service initiation and member progress, and making appropriate service adjustments and incorporating those into the plan of care
- 8) Ongoing evaluation of our Case Management program, including reviewing, tracking, monitoring, adjusting, and analyzing for outcomes, quality metrics, and improvement
- 9) Emphasis on disease prevention, chronic condition management, and increasing member engagement with recommended treatment protocols
- 10) Establishment of community-based relationships
- 11) Member education to enhance understanding of health care conditions and prescribed treatment
- 12) Encouragement for members to develop their capacity to self-direct their care
- 13) Collaboration with other State and community entities to ensure truly integrated care and prevent duplication of service
- 14) Co-management of physical and behavioral health issues

7. INNOVATIVE AND EVIDENCE-BASED STRATEGIES TO INTEGRATE INFORMATION ACROSS ALL SYSTEMS/PROCESSES INTO ITS WORKFLOWS

Our care coordination/case management workflows use a variety of innovative, evidence-based strategies to integrate information across all processes and systems, beginning with our members' real-time personal health record. Through our advanced Case Management System, each member's personal health record contains updated utilization and claims history along with any "red flags" to alert our staff about upcoming or overdue preventive health screenings. All of our health plan staff who interact with the member have access to this system, so they can offer seamless, integrated assistance in coordinating care and making sure the members' needs are addressed (such as scheduling appointments or arranging transportation). Our system also allows individuals who are part of care management or care coordination to enter tasks, send letters, or connect directly with members based on the information in the personal health record.

As part of our medical necessity reviews, our Case Management System incorporates Clear Health's evidence-based criteria and level of care guidelines and enables our Clinical and Utilization Management staff to document medical necessity reviews of pre-authorization requests. UM Reviewers can easily access critical information and use it to make the most appropriate level of care determinations. The system captures the exact criteria used in a clinical decision, the date and time of the review, and the updated information in the member's personal health record systematically so that all information stays up-to-date to promote integrated care. Our Case Management System is also connected to our calendar system so that our Managed

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Care Coordinators can easily schedule screenings, assessments, and follow-up meetings with the MDT.

Another key part of our clinical workflows is our comprehensive assessment. These assessments include innovative branching logic, which guides our Managed Care Coordinators into areas for deeper details or to conduct additional assessments, such as high-level behavioral health screening (which might trigger an additional behavioral health assessment) or co-morbid chronic conditions that will trigger additional disease-specific assessments. All of this information is retained in our Case Management System, allowing Managed Care Coordinators to fully address a member's total health care needs.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The adequacy of the respondent's approach in addressing the following:
 - a. Identification processes for enrollees with complex health conditions or who are in need of care coordination;
 - b. Description of the sources of data/information that would be utilized in the assessment process, including timeframes for completion;
 - c. Application of the respondent's case management risk stratification protocol;
 - d. Identification of service needs (covered and non-covered) and a description for service referral processes;
 - e. Description of the interventions and strategies that would be used to facilitate compliance with the plan of care, including use of incentives, healthy behavior programs, etc.;
 - f. Application of discharge and aftercare planning protocols that facilitate a successful transition;
 - g. Application of coordination protocols utilized with other insurers (when applicable), primary care providers, specialists, other services providers, and community partners particularly when referrals are needed for non-covered services;
 - h. Description of the assessment of provider capacity to meet the specific needs of enrollees;
 - i. Identification of strategies that promote enrollee self-management and treatment adherence;
 - j. Application of utilization management protocols (i.e., identification of the criteria that will be utilized, processes to ensure continuity of care, etc.); and
 - k. Application of strategies to integrate enrollee information across the plan and various subcontractors when the respondent has delegated functions.
2. The extent to which the respondent's workflows/narrative descriptions include timeframes for completion of each step in the care planning process.
3. The extent to which the respondent demonstrates innovative and evidence-based processes that it has in place to enhance communication among all service providers and subcontractors (for delegated functions).
4. The extent to which the respondent describes an approach that supports care delivery in the most appropriate and cost-effective setting and avoids unnecessary institutionalization (i.e., hospital or nursing facility care) or emergency department use.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

5. The extent to which the respondent demonstrates experience in providing services to enrollees with complex medical needs and provides evidence of strategies utilized that resulted in improved health outcomes.
6. The extent to which the respondent demonstrates a system of coordinated health care interventions designed to achieve cost savings through the organized and timely delivery of high quality services.
7. The extent to which the respondent describes innovative and evidence-based strategies to integrate information across all systems/processes into its workflows.

Score: This section is worth a maximum of 85 raw points with each of the above components being worth a maximum of 5 points each.

Table 8-1. Workflow

Day	Description
December 2016	Enrollment: Robert is enrolled in our plan and receives an initial assessment and screening via phone.
	Case Management: Robert is stratified as moderate risk (level 2) and referred to Clear Health's Case Management and Healthy Behavior program for smoking cessation support. Robert declines case management, but enrolls in the Healthy Behavior Tobacco Cessation program.
May 4, 2017	Care Coordination/Case Management Robert receives care from the Emergency Department (ED) on May 4, 2017. The Care Coordination team member attempts to reach Robert, but his phone is disconnected and the second attempt, an e-mail, is returned "user is not found." A letter is sent to Robert's address with information about Clear Health's case management services and requesting him to contact the Care Coordination team. Auto notification is sent to the primary care provider (PCP), due to the event notification system update received.
May 9, 2017	Care Coordination/Case Management Robert receives care from the ED a second time on May 9, 2017. Our Care Coordination team contacts the hospital ED the next day to secure correct current contact information. The phone number provided by the ED is the same one in the Clear Health system, and is still out of service. Clear Health asks that the ED update Robert's record with notes indicating that his phone number is inactive and that he is a Clear Health member. The Care Coordination staff reaches out to the last identified PCP, who also has the same disconnected phone number. A letter is sent to Robert's address with information about Clear Health's case management services and requesting him to contact the Care Coordination team. Robert's case is referred to Clear Health case management. Auto notification is sent to the PCP, due to the event notification system update received by the plan.
Day 2 – following third ED visit	Care Coordination/Case Management: Robert enters the ED a third time on May 20, 2017. Upon identification of Robert's third visit in 30 days to the ED, the facility reviews his record and notes that his phone number has been flagged as unreachable. Robert indicates that he no longer has a phone number and provides the ED with his address and new email address. The following day, the Care Coordination team receives Robert's updated email and address information, and forwards this to Case Management. Maria, a Clear Health Managed Care Coordinator, reviews the CI3 score, which has been upgraded to High Risk. She reaches out to Robert via email and requests a face-to-face visit, in the place of his choice, to review his benefits and services in order to help him navigate his health concerns. Robert agrees via email to meet the next day, in his home.
Day 4	Care Coordination/Case Management: Maria meets Robert in his home. She assures he has received the oxygen and prescriptions ordered by the hospital and had an opportunity to ask the respiratory therapist all of his questions. She reviews the case management process and obtains his approval to complete a comprehensive health assessment and develop a personalized plan of care to address his health concerns. Maria talks to Robert at length, reviewing his conditions and challenges as well as his strengths (Maria congratulates him on his recent decrease in tobacco use). They discuss his living situation, his son, and what Robert wants to achieve, identifying his goals and desired health outcomes. Together, they develop Robert's plan of care to include the services needed in order to help Robert obtain his goals. Robert identifies providers who he would like to be included in the plan of care review. Throughout the care planning process, Maria asks Robert about his concerns for his son's health needs. She works with Robert to address this in his plan of care, identifying how to link his son to the preventive services and coordinates a wellness visit for the son. Maria also arranges PCP visits for Robert and his son and assists Robert with setting up mail order prescriptions for maintenance medications he has not refilled.
Day 5	Care Coordination/Case Management Maria finalizes any pending referrals from yesterday's visit with the Robert. She orders health education materials regarding COPD, hypertension, and hypercholesterolemia for Robert and confirms transportation for him and his son to his upcoming PCP appointments. She also submits Robert's plan of care to his PCP for review and feedback, and mails a copy to Robert. Maria refers Robert to an area Ryan White-funded agency that provides specialized programs via peer-led support groups and referrals to resources specifically designed for persons living with HIV/AIDS – such as housing programs, legal aid, food programs that he may qualify for, and the area Ryan White program. Maria orders a Lifeline smart phone for Robert. She also requests in-house pharmacist review of medications for any potential contraindications. She submits referrals submitted to behavioral health, indicating Robert's preference for telemedicine, nutritionist,

Day	Description
	smoking cessation enrollment, Healthy Behavior enrollment.

Day	Description
Day 9	Care Coordination: Maria coordinates with Utilization Management staff to make sure that Robert has the appropriate existing authorizations and referrals in place. Followed up with Robert to ensure he and his son attended their PCP appointments. Robert advises he has been referred to a pulmonologist and Maria educates Robert on transportation services to facilitate existing specialist appointment.
Day 15	Care Coordination/Case Management: Maria follows up with Robert to assure he received his health education materials and phone, and adds the phone number to his personal health care record. Maria reviews the education materials with Robert to assure understanding and verifies he has ordered a blood pressure monitor through the OTC program and is set to maintain the blood pressure log discussed during the home visit.
Ongoing	Ongoing Care Coordination: Maria will reach out to Robert to assess progress towards the goals identified. She will follow up to assure he has met with his nutritionist and is participating in his telemedicine behavioral health program. She will use Robert's personal health record, along with the Clear Health Case Management System, to monitor his utilization and care. She will review his plan of care, progress toward goals, and his satisfaction with the services as well as continue to identify barriers to his achievement of his goals. Maria confirms the next scheduled call will be in 30 days.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 11 – Online Provider Directory (Statewide):

The respondent shall describe the provider search function for the online provider directory, including submission of:

- a. A description outlining the transparency and accessibility of the online provider directory, including the parameters upon which enrollees may search. Include whether or not the online provider directory is mobile friendly.
- b. Screen shots for each mouse click required from the start of the respondent's home page to actual search results for a provider, using durable medical equipment providers and zip code as the search elements.
- c. A list of performance indicators the respondent will include for each provider type listed in its provider directory.
- d. A description of the respondent's process for verification of provider information in the online provider directory, including delegated subcontractor provider information, and the method(s) the respondent uses to ensure the weekly network file submission to the Agency is accurate.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Clear Health brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health understands the importance of making information for our enrollees (members) easy to find, easy to use, and helpful. We strive to make all information available through our member portal accessible and meaningful for all our members. Find a Doctor, Clear Health's online provider directory and provider search function is accessible, comprehensive, transparent, up-to-date, mobile-friendly, and easy-to-use. We recognize that our Clear Health members have specialized needs that are best met by physicians who have experience in treating patient with HIV disease. While we actively provide education and support for all of our providers so that they can effectively serve our Clear Health members, we also recruit primary care providers (PCPs) and specialists who have additional training in treating HIV/AIDS to join our network. Providers with this specialized HIV/AIDS training are designated with a red ribbon beside their name in the provider directory, informing members of the provider's additional specialized HIV/AIDS care and treatment competency. This "Red Ribbon" program is nationally recognized and is a testament to our patient-centered model of service and support.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1. NAVIGATING OUR ONLINE PROVIDER DIRECTORY SEARCH FUNCTION

Transparent, Easy to Access, and Mobile-friendly

We transparently present all Find a Doctor descriptions, directions, search options, and other information in a clear, easy to understand manner using language at a fourth-grade reading level or below. We assure that all potential and current members can access Find a Doctor on the internet, in English or Spanish, using any web browser and any internet accessible device — a computer, tablet, smartphone, or other device. We do not require users to have an account or a login and password to access the tool.

Find a Doctor Search Function

Members, potential members, providers, and the public can use Find a Doctor to search for Clear Health providers in Florida who best meet their needs based on user-selected search criteria options. Users can tailor a search for a provider in the following criteria categories:

- Distance from user, (optional – default is 15 miles) based on the user's address, city and state, zip code, or county and state – from one to 100 miles away
- Provider type – (required) users can select certain types of providers such as specialists, PCPs, hospitals and facilities, behavioral health and substance abuse, long-term care, dental, vision, pharmacy, audiology/hearing, durable medical equipment (DME), home health care, laboratory and therapy services.
- Specialties and services (optional) – users may select one or multiple clinical specialties or provider service types that vary for each provider type or users may select “all”
- Provider Name – (optional) individual practitioner names and practice and/or facility names. Note – users sometimes search solely by provider name. Members and prospective members are often looking for a particular provider and know only a portion of a provider's name. Our tool is flexible and allows users to type a portion of a provider's name, for example, searching for “Peter” would return a list of providers who have Peter as any part of their first, last, or facility name
- Accepting new patients

The results page lists all Clear Health network providers who meet the user-selected search criteria with the provider name, address, county location, phone number, website URLs if available, and the following additional information for each provider:

- Distance from user-identified location with link to map displaying provider address and the option to receive directions to the provider's location
- Specialty or service detail
- Indicator if provider is board certified
- Indicator if location is wheelchair accessible

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Indicator if provider completed cultural competency training
- NCQA logo if the provider is NCQA-certified
- 24-hour access (pharmacies)
- Flu vaccine (pharmacies)
- Hospital and Facility Services (for DME and home health supplies)

While still on the results summary page, users can narrow results by filtering using the following additional search criteria categories (categories vary by provider type):

- PCMH, Diabetes Recognition Program, Patient-Centered Specialty Practice, and Heart/Stroke Recognition Program Certification
- Accreditation
- Board certification
- Languages spoken (both by provider or a skilled medical interpreter at the office)
- Group affiliations
- Hospital affiliations
- Provider ethnicity
- Provider gender
- Red ribbon designation

Users can repeatedly refine search results without ever leaving the search results page and can access previously viewed search result pages. Users also have the option of comparing on one page information on up to three providers of the same specialty or service.

A click on an individual provider name provides a full page of all provider information listed above and additional information including hours of operation and additional addresses as applicable, provider gender, languages spoken, provider licensing information, age groups served, and additional details on board certification including a link to the “Is Your Doctor Certified” website.

Users have the option to use their search results to create a personal provider directory, which they can save as a PDF and print or email to themselves. The online and PDF version of the directory will include the required statement that some providers may choose not to perform certain services based on religious or moral beliefs.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2. ACCESSING PROVIDER DIRECTORY SEARCH RESULTS

Please see Attachment SRC# 11-1: Online Provider Directory, which includes functionality, layout, and navigation of each screen shot users will see in performing a custom provider search for a DME provider with our redesigned website (Figures 11-1 through 11-3 in the Attachment), pending state approval. Figures 11-4 through 11-7 shows what users see in our current website, beginning with the health plan website home page and ending with the search results summary page. Including search results screens, there are four screens under legacy Amerigroup's current functionality to facilitate access. We are improving the design to needing just three screens to facilitate access that will be completed in 2018.

It currently takes a user four mouse clicks to go from the legacy Amerigroup Florida website home page to the search results summary page. We use the legacy Amerigroup example here because the new Clear Health provider search tool will be based on the same tool legacy Amerigroup uses today as we bring the best of each plan legacy plan into one plan. The four mouse clicks do not include clicks associated with selecting search criteria within a single page. Beginning at www.myamerigroup.com/fl, users click on the following:

- Click 1 – “Find a Doctor” on the home page
- Click 2 – “Provider Search Tool” on the drop-down menu that appears
- Click 3 – “Search” in the orange box on the Find a Doctor page
- Click 4 – “Search” after selecting search criteria options in the search form page

In addition to online searches, members can also access a searchable PDF version of the online provider directory with just one click.

3. PERFORMANCE INDICATORS IN THE PROVIDER DIRECTORY

We have a strong commitment to providing comprehensive provider performance information in the Find a Doctor tool to assist members in making an informed choice about the providers they choose to use. To this end, we provide the following performance and quality indicators, as applicable to individual providers and provider types.

- A “Red Ribbon” indicator for each PCP who specializes or has additional training to treat persons with HIV/AIDS
- NCQA labels for providers who have one of four NCQA accreditations or distinctions (Patient-Centered Medical Home, Diabetes Recognition Program, Patient-Centered Specialty Practice, and Heart/Stroke Recognition Program)
- Recognition by one of the organizations for Patient-Centered Medical Home accreditations (National Committee for Quality Assurance Level 2, Accreditation Association for Ambulatory Health care, The Joint Commission, or Utilization Review Accreditation Commission)
- The specialties in which the provider is board accredited and a link to the “Is Your Doctor Certified” website that provides additional information on the provider including education and whether the provider is participating in maintenance of certification requirements

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Indicator that members recommend the provider (indicated by the count of “checked boxes” received from individual members)

4. MONITORING ACCURACY OF THE ONLINE PROVIDER DIRECTORY INFORMATION

We employ multiple strategies to monitor the accuracy of the provider data contained in Find a Doctor. As explained below, we assure that provider data, including data on providers with our delegated subcontractors, is consistent in all methods by which members and others access provider data by using our Management Information System (MIS) system as the source of truth for all provider data. We update MIS data each business day. In addition, our Provider Data Quality unit runs a data quality check of Find a Doctor data each week. This check includes 104 edits to identify illogical data and typing errors. These checks look for four main categories of data in the system:

Our Address checks look for items such as:

- Post Office Boxes in the service address
- Keying and spacing errors
- Missing or invalid office hours, phone, fax numbers
- Duplicate addresses
- Zip code validation
- Incomplete addresses
- Service/specialty code validation

Our Network checks look for items such as:

- Missing age limitations
- Market effective dates
- Incomplete out of network set
- Provider auto assignment
- Mismatch network rows
- Overlapping network spans
- Sanctioned providers

Our Provider checks look for items such as:

- NPI missing/invalid
- Taxonomy missing/invalid
- Tax ID missing/invalid
- Missing facility type
- Hospital affiliations
- Name spacing details
- Degree missing/mismatch/invalid
- Pay to information missing
- Duplicate providers
- Practitioner with missing specialty
- Overlapping date spans

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our Registration checks look for items such as:

- Medicaid ID invalid
- License missing/invalid/expired
- Active credentialing status
- Active network rows
- Missing registration IDs

Provider Data Management reports the results of this check in our weekly quality plan dashboard. Unit staff review each dashboard report to identify and undertake actions required to resolve errors. These reports are reviewed and worked weekly to make sure the data is accurate prior to our directory file submission extract schedules. We assure the integrity of data from external sources by only using verifiable data. The MIS database also includes information on providers from networks developed and maintained by our vision, dental, audiology/hearing, chiropractic, therapy, dermatology, pharmacy, and behavioral health delegated subcontractors. If a member selects transportation, they will be prompted to contact the appropriate transportation subcontractor contingent upon location. Our Vendor Delegation Oversight Group works closely with our external partners to make sure the data we receive meet our standards and is submitted within the appropriate timelines. This team also runs a series of provider data validation checks on the inbound file to ensure the quality of the data prior to loading it into our systems.

Provider information can change frequently. We make every effort to reach out to providers to make sure provider directory information is current and make it easy for providers to report by phone, email, fax, mail, and online changes such as new addresses, new contact information, revised office hours, and changes in status regarding accepting new patients. Through our Provider Relations staff, the provider handbook, provider newsletters, other provider mailings, and the provider website, we frequently remind providers to notify us when any of their provider directory information changes. Provider Relations staff also educate the network on submitting changes using the online provider resource tool on our provider website. Provider Relations staff conduct multiple outreach activities and review demographic and participation information with providers during regularly scheduled face-to-face visits to obtain updated provider information for the provider directory and other purposes. They meet in-person with providers and conduct provider information checks by phone and email.

Often new provider information comes to health plan staff in other departments, including Claims Processing, Credentialing, Provider help line, and Mailroom staff. Clear Health encourages members, providers, and employees to identify and report incorrect or outdated provider directory information. In addition to internal quality checks, Provider Data Management accepts data change requests from a variety of sources, including the following:

- Florida Provider Relations employees through day-to-day interactions with providers or regular data quality checks
- Case Managers (Managed Care Coordinators) who identify incorrect provider services while coordinating care
- Customer Care Representatives who identify incorrect provider data while assisting members with appointments, locating a provider, contacting a provider, or any other day-to-day interactions

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Self-service tools on our provider portal, enabling providers to update demographics and practice information
- Provider calls to our Provider help line
- Member calls to our Member Services line to report provider data problems

We have a single process for staff throughout the plan to submit provider network information changes to our Provider Data Management Team for input into MIS, the repository for provider information that feeds the online provider search function, online PDF directory, and claims processing systems. We continue to research and consider process improvement opportunities to provide up-to-date provider information throughout our system. For example, we currently assure that staff input provider changes into MIS so that the new information is available to all our provider directory, claims, and other systems within 30 days of receiving the change.

5. PERFORMING ONLINE PROVIDER DIRECTORY UPDATES AND COMMUNICATING WITH THE AGENCY

Each business day the online provider directory, Find a Doctor, and the provider network verification file that we send to AHCA is updated to reflect all provider information changes in our MIS. Find a Doctor features a date stamp at the bottom of the page to let users know when the last update occurred. To make accurate and frequently updated provider network information available to all, no matter how they access the information, we assure data that is consistent from one method to the other by using our MIS as the source of truth for all provider data. We maintain a schedule of frequently updated data contained in each version to mirror MIS data in a manner compliant with all contract requirements in the ITN. The following is a summary of each method by which we make provider network information available and the frequency with which we update data in each.

- Online searchable provider database used by the Find a Doctor tool – updated each business day with a one business day lag between when we enter a provider information change into MIS and when it appears in the online searchable database
- Provider Network Verification (PNV) file sent to AHCA weekly – current as of the day prior to being sent
- Online PDF of the provider directory – updated monthly; current as of the day prior to producing the printable PDF. In lieu of printing and mailing hard copies of the provider directory, we will choose to direct members and others requesting the provider directory document to read the PDF version online. We will also inform them how they can print the PDF version of the directory if they choose

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent of the respondent's search functions for the respondent's online directory and ease of access for enrollees' navigation of the online provider directory, including whether or not the online directory is mobile friendly.
2. The extent to which the number of clicks it takes recipients to access the search results, as indicated by the screen shots provided, is less than five (5).
3. The extent and relevance of the performance indicators available in the respondent's provider directory for each provider type listed.
4. The extent of the respondent's efforts to ensure information in the respondent's online provider directory is accurate, including type and frequency of monitoring activities, and delegated subcontractor provider information. Include the frequency of outreach efforts to remediate incorrect provider demographic information and accepting new patient status.
5. The extent to which the respondent's online provider directory updates are performed daily and the extent to which the updates are communicated to the Agency as required to ensure the information the respondent displays on its website align with the Agency's information.

Score: This section is worth a maximum of 25 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 12 – Enrollee Grievance and Appeal System (Statewide):

The respondent shall provide a flowchart and written description of how the respondent will execute its enrollee grievance and appeal system, including identifying, tracking and analysis of enrollee complaints, grievances, appeals and Medicaid fair hearing data. The respondent shall include in the description detail regarding how data resulting from the grievance and appeal system are used to improve the operational performance of the respondent.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations — including our process for handling complaints, grievances, and appeals. Clear Health has been 100 percent compliant with Agency for Health Care Administration's (AHCA) grievance and appeal turnaround time requirements in 2017 to date. Evidenced by our current success, we will continue to meet and strive to exceed Contract requirements throughout the term of our agreement with the State.

Clear Health's structure makes it easy for enrollees (members) to submit a complaint, grievance, or appeal. Strong grievance and appeal processes are critical to protecting the rights and health of members and to improving our program operations and oversight of providers and subcontractors. At Clear Health, we respect the rights of members to make inquiries, file complaints and grievances, appeal health plan decisions, and request Medicaid Fair Hearings in their language of preference and with accommodations for challenges they may face. We take steps to confirm members know of their rights and have any help they need to exercise these rights. We currently comply with grievance and appeal requirements and substantially exceed the AHCA standards for timely resolution of grievances.

We believe that it is essential to continuously listen to feedback from our members, network providers, and other stakeholders and then to incorporate that feedback in our quality improvement efforts. Members and providers are an important source of information regarding our performance. We believe so strongly in obtaining this feedback that we meet our members face-to-face, on a quarterly or more frequent basis, through Member Advisory Committees. Our Quality Management program includes quality feedback activities based on grievance and appeal data to improve the services we provide. Our annual Quality Management Program Evaluation includes an analysis of grievance and appeal data to drive continuous quality improvement.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1. EXTENT TO WHICH RESPONDENT'S GRIEVANCE AND APPEAL SYSTEM FLOWCHART REFLECTS EASE OF ACCESS

We make it easy for members to contact us with a complaint, grievance, or appeal. Attachment SRC# 12-1: Enrollee Grievance and Appeal System provides flow chart depictions of our member complaint and grievance process.

Members, member representatives, or providers on behalf of the member can initiate a complaint, grievance, or appeal, with us by phone, in person, mail, email, and fax. Providers can also submit appeals on behalf of members online. We provide training for our new employees during initial onboarding and on an ongoing basis to make sure all employees understand policy and process updates. All staff and subcontractors who interact with members are provided extensive training on:

- Member rights
- Benefit coverage
- State contractual requirements
- How to accept a complaint, grievance, and appeal
- How to assist members in completing the grievance and appeal process
- How to assist members in completing forms and following procedures throughout the process
- Documentation of grievances and appeals
- How to process a grievance or appeal

Our Customer Care Representatives are typically the first to receive and assist members with the complaint and grievance process. Our Customer Care Representatives speak English, Spanish, and Haitian Creole. Eighty-five percent of our front-line Customer Care Representatives are bilingual in English and Spanish. In addition, 90 percent of the Customer Care management team is bilingual. All employees quickly initiate telephone interpreter services in any other language, as needed, by means of our language translation line, which operates 24/7. Members with hearing or speech challenges reach us through our TTY line and we arrange sign language interpreters as needed for in-person meetings, which include services in a provider's office or at any place of the member's choosing.

We can also receive grievances or appeals requests outside of Member Services, for example from Case Management. As Managed Care Coordinators interact with members, they may identify an issue that will need to be resolved through the grievance and appeal process. In those instances, the Managed Care Coordinator is empowered to initiate the request on the member's behalf. As an additional resource for our members, at their request we provide members and their authorized representatives with medical records and other documentation pertaining to their case at no cost. This allows members and their authorized representatives the opportunity to examine their documents.

We inform members about our grievance and appeal processes and their right to be treated with respect, to receive information about available treatment and provider options, to receive prompt responses to their questions and requests, to participate in their health care decisions, to have impartial access to services without discrimination, and many other rights. Some of our methods for sharing grievance and appeal information with members include the new member welcome packet, welcome calls and other health plan outreach from staff, our member website, notice of adverse benefit determination letters, and grievance and appeal letters.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Another method we use for sharing grievance and appeal information with members is through attending Member Advisory Committee meetings in partnership with Clear Health's Quality team. We conduct Member Advisory Committee (MAC) meetings designed to provide an opportunity to address members' needs and concerns, offer education, and elicit feedback regarding access to and quality of, care. We also realize that members often attend Member Advisory Committee meetings if they have concerns. Our Florida Director of Grievance and Appeals attends many of these meetings to educate members about their grievance and appeal rights in addition to the process for submitting a request. Often our employees are able to take action to resolve a member complaint on the spot. We provide an example of a grievance we obtained through the Member Advisory Committee below.

**** SPOTLIGHT ON: Reaching Out to Educate Members About the Grievance and Appeals Process**

Member Advisory Committee meetings is one way our Grievance and Appeals team educates members about the process and answers their questions. While at one meeting held in St. Petersburg, our Director of Grievances and Appeals met a member who expressed dissatisfaction with her PCP. Our Director gathered all of the necessary information and assigned the case to a Grievance Coordinator for resolution on the same day of the meeting. Following our practice of one-day resolution, the assigned Coordinator contacted the member that afternoon and listened to the member's concerns. Based on the conversation, the Coordinator assisted the member in identifying a new PCP. The member was pleased with the new PCP assignment and outcome of the complaint resolution.

Of note, during the Member Advisory Committee the member was educated about her rights and responsibilities, which include the right to submit a complaint or a grievance. This is part of the standard agenda of each Member Advisory Committee meeting. Our Grievance Coordinator reinforced this information in their conversation. She acknowledged that she was aware of her rights and plans to exercise them in the future. In addition, our Grievance Coordinator provided the member with information about the nearest urgent care clinic and the toll-free number for our Nurse help line. ******

Our Member Complaint and Grievance Process

Figure 12-1 in Attachment SRC# 12-1 Enrollee Grievance and Appeal System provides a flow chart depiction of our Member Complaint and Grievance Process. We also provide examples of our process through real member stories and spotlight examples throughout this SRC response. These real stories and spotlights highlight our approach through actual situations we have encountered.

Our Florida-based call center receives member complaints through the avenues we described in the section above about any aspect of their coverage including benefits; health plan, provider, or subcontractor customer service; quality of care; privacy concerns; and any other concern. Customer Care Representatives receive comprehensive training on how to properly handle member inquiries and complaints and to provide first call resolution whenever possible. Representatives work in an open and collaborative environment with convenient access to our knowledge repository, as well as Operations Experts and management who can assist them in providing real-time member assistance and complaint resolution. Representatives follow

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

escalation procedures to contact other departments or delegated subcontractors to resolve issues.

We closely monitor complaints. Twice each business day, an analyst aggregates member call and complaint data and collaborates with management to ensure timely resolution or escalation of complaints. We also have systems in place to record conversations. Managers review complaint dispositions by reviewing recordings, and can audit “live” calls if needed. They provide immediate coaching and feedback to Customer Care Representatives to resolve complaints effectively, and assign any unresolved complaints to the Medicaid Resolution team for further investigation, follow-up, and resolution.

The Medicaid Resolution team focuses on resolving complex member situations that require numerous outbound calls, extensive follow-up, and cooperation with multiple parties. The team closely manages case inventory and productivity to resolve complaints within one business day of receipt. Team members transfer complaints that we do not resolve to the Grievance and Appeal department the next business day.

We enter all complaints not resolved by Customer Care Representatives into our Grievance and Appeal system within 24 hours of receipt, at which time they become formal grievances. Those that are about adverse benefit determinations become formal appeals. Upon receipt of a formal complaint, the system automatically generates an acknowledgement letter within three days of receipt, which we mail to the member.

If AHCA notifies us that a member with a grievance has a good cause plan change, we will process those grievances as expedited requests in accordance with Contract requirements. We understand that if we do not meet the Agency’s prescribed timeframe in these cases, approval of the member’s request is automatic. We resolve all other grievances expeditiously, considering the member’s health condition. In compliance with NCQA standards, our standard for reviewing and resolving grievances and sending members written notices of results is 30 days from the day we received the grievance, which is much shorter than the 90-day Contract requirement. In cases where a member requests an extension or we document that an extension for additional information is in the member’s interest, we may extend the resolution timeframe by 14 days.

We understand that grievances may be clinical or non-clinical in nature; therefore, our Florida-based Grievances and Appeals team is composed of both clinical and non-clinical staff. Additionally, we collaborate with our Case Management department to assist with grievance resolution using their expertise in areas such as case management, community resources, and behavioral health concerns.

Our Member Appeal Process

Figure 12-2 in Attachment SRC# 12-1 Enrollee Grievance and Appeal System provides a flow chart depiction of our Member Appeal Process; Figure 12-3 Attachment SRC# 12-1 provides a flow chart depiction of our Member Expedited Appeal Process.

Members, providers, or authorized representatives acting on behalf of members may submit an appeal or a request for review of an adverse benefit determination through the avenues we described in the section above. Once the appeal is entered into our grievance and appeal system, the request is reviewed to ensure appropriate classification. When in the member’s best interest

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

or if the standard timeframe resolution could jeopardize the member's life or health, the appeals staff will upgrade the request to an expedited appeal. After classification, we send an acknowledgement letter to the member within three days, exceeding the five-day contractual requirement. One of our clinical staff completes a review using medical necessity criteria that is appropriate to the request. If we need additional information from the member, our clinical staff member performs outreach to obtain it. The appeal may include a review by our Medical Director (as long as he or she was not involved in the original adverse decision) or an external specialist as the appeal requires. Once resolved, our clinical staff member assures an appeal resolution letter is sent to the member and closes the case.

Our standard for reviewing and resolving appeals and sending members written notices of disposition is 30 days. Clear Health is successfully meeting this standard in 2017 to date. When a member requests an extension or we document that an extension for additional information is in the member's interest, we may add an additional 14 days to the resolution timeframe. If we initiated the extension, we will notify the member by telephone the same day of this extension and give written notice within two calendar days.

Our expedited appeals process allows for resolution as quickly as the member's condition requires and no longer than 72 hours, when a member's life, health, or ability to attain, maintain, or regain maximum functioning would be in jeopardy with the standard appeal resolution timeframe of 30 days. We do not take punitive action against providers who request or support requests for expedited appeal resolution; in fact, we educate the provider regarding appropriate classification as evidenced by our provider orientation and manual. Only our clinical staff can downgrade requests for expedited appeal. The clinician reviews all available clinical information to make the determination, considering the member's unique circumstances. If we downgrade a request for expedited appeal resolution or if a member requests an extension on an expedited appeal, we transfer the appeal to the standard resolution timeframe of 30 days. We notify the member by phone on the day we downgrade the request and mail a written notice to the member within two calendar days.

When we have resolved an appeal, we send members the written notice of appeal resolution within two calendar days of our decision. We also verbally notify members of expedited appeal outcomes before the end of the day we resolve the appeal.

If a member requests a continuation of benefits during the appeals process, one of our clinical staff will review the request to ensure that it meets Contractual criteria for continuation. We notify the member by letter of our decision on continuation of benefits and inform them they may be liable for the costs of continued benefits during the appeal process if our decision is upheld.

Clear Health is 100 percent compliant with appeal resolution timeliness in 2017 to date; and during accreditation file reviews no deficiencies were found with our appeal process. We are committed to sustaining our compliance with timeliness standards, and we strive toward continuous improvement. To this end, we have studied our processes and implemented changes as described in our response under heading number 3 below.

**** SPOTLIGHT ON: Departments Working Together Result in Satisfied Member**

When Marco came to our Miami office to inquire about the status of his appeal, he spoke with Grievance and Appeals Specialist, Ana, who explained the appeal was in process. Ana also explained that the original denial was because he did not meet medical necessity criteria for a

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

heavy-duty power scooter, specifically, weighing 300 pounds or more. Marco told Ana about his volunteer work with retired and disabled veterans and explained how difficult it is with an unreliable power wheelchair. Understanding Marco's situation and his frustration, she invited a Member Services Manager, Joseph, to join the conversation. Joseph thanked Marco for his service to our country, empathized with his struggles, and volunteered to personally follow up on his appeal.

Joseph worked with Provider Relations to obtain a new letter of medical necessity from the provider for a different power scooter model that would meet Marco's needs and was medically appropriate. With the letter in hand, Joseph walked it to the Medical Director who reviewed the case and approved the medically appropriate power scooter, which was delivered to Marco the following week. **

Our Medicaid Fair Hearing Process

Figure 12-4 in Attachment SRC# 12-1 Enrollee Grievance and Appeal System provides a flow chart depiction of our Medicaid Fair Hearing Process.

A member who is not satisfied with the resolution of their appeal may request a Medicaid Fair Hearing. They may also request a Medicaid Fair Hearing if they believe we failed to meet notice and resolution timeliness requirements. Members may request a hearing within 120 calendar days of receipt of our appeal resolution notice. The member, the authorized representative, any member witnesses, and our Grievance and Appeal Representative attend each hearing with AHCA Hearing Unit staff. Our Medical Director (for medical necessity decisions) or a member's Managed Care Coordinator may also attend hearings related to complex cases. Our Grievance and Appeal Representative will bring evidentiary materials, such as an examining physician's report, and may bring witnesses.

Within two business days of receiving the initial request for hearing, we send the AHCA Hearing Unit the notice of adverse benefit determination and the notice of appeal resolution related to the case. We prepare an evidence packet, which we submit, to the AHCA Hearing Unit within ten business days of receiving notice of a hearing, in accordance with AHCA pre-hearing instructions. This packet includes all related documents, a statement of matters or the denial letter, and any medical records or other documentation related to the appeal and to our appeal resolution. We share Medicaid Fair Hearing communications with AHCA through AHCA's portal, and by mail to the member and the member's representative. In the future, to make sure that members promptly receive evidence packets, we will use secure email with the member's permission in addition to mailing the information, assuring protection of protected health information (PHI).

The primary method of attending a fair hearing is by phone, but if a member does not have access to a phone, we provide transportation for members and their authorized representatives to the nearest designated call-in center as Contractually required with arrangements for certified interpreter or translation services if needed. If we receive a member request for continuation of their benefits during the hearing process within 10 days of the appeal resolution notice, we continue their benefits. In these cases, benefits will continue until AHCA makes a hearing decision or the member withdraws their request for a hearing. We advise members that they may be responsible for the cost of the benefits if their appeal is unsuccessful. When the final order is received from AHCA, our Grievance Coordinator updates the authorization within 24 hours of the receipt and will notify the subcontractors if necessary.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2. TIMELINESS FOR ACKNOWLEDGING AND RESPONDING TO COMPLAINTS, GRIEVANCES, AND APPEALS

We closely monitor complaints. Twice each business day, an analyst aggregates member call and complaint data and collaborates with management to ensure timely resolution of complaints. This allows us to make sure we are resolving complaints in less than 24 hours or are escalating according to the grievance process.

Understanding the requirement is to send the acknowledgement letter within five business days, Clear Health's internal benchmark is to send the acknowledgement letter within three business days. Each acknowledgement letter includes the date we received the grievance or appeal, contact information for the Grievance and Appeals Representative, instructions for accessing translation services, and a description of member rights including non-discrimination rights. For expedited appeals, we communicate acknowledgement of receipt of their request to the member by phone within 24 hours.

We resolve grievances in compliance with the NCQA standard of 30 days from receipt, which is more stringent than the 90-day Contract requirement. Standard appeals are resolved within an average of 20 days. Expedited appeals are resolved within an average of 48 hours.

If our appeal determination is favorable or partially favorable, we begin the service or authorization on the same day of the decision. If we receive a Medicaid Fair Hearing determination that is favorable or partially favorable, we will begin the service or authorization on the same day as the receipt of the Medicaid Fair Hearing determination. Our process is more stringent than the Contractual 72 hours.

We typically send grievance and appeal resolution notices to members within 24 hours of the decision.

The notice for a grievance resolution includes the following information:

- The results of the grievance
- The date completed
- Grievance staff contact information
- A description of member rights including non-discrimination rights

The notice for an appeal resolution includes the following elements:

- The results of the appeal resolution process and the date completed
- A unique identifying number corresponding to the number on the notice of adverse benefit determination that is the subject of the appeal
- For dispositions that are not entirely in the member's favor
 - Information about the AHCA Subscriber Assistance Program review process, including how to initiate a review, that the member must request a review within one year of receiving a Disposition Notice, that a review is only for appeals that have not initiated or completed the Medicaid Fair Hearing process, and contact information for the program (address, toll free phone number, and secondary phone number)

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

— Information describing the Medicaid Fair Hearing process, their right to request a Medicaid Fair Hearing, their right to request benefits while the hearing is pending, how to request continued benefits, and contact information (address, toll free phone number, fax number, and email address) for AHCA's Medicaid Hearing Unit

We have reports and monitoring strategies to be sure we meet our internal benchmarks and exceed all Contractual timeliness standards. As an additional market investment, we are changing our grievance platform to achieve additional integration, ease of use, and improved functionality. The new grievance platform, scheduled to begin operation in October 2018, will offer the following increased efficiencies:

- Automatically routing clinical grievances and quality of care concerns to our Medical Director
- More detailed classification and reporting of grievance topics
- Built-in system reporting and work lists for individual grievance staff
- Dedicated business and IT support staff for grievance platform

The appeals process is currently using new platform and all of the above-mentioned features apply for appeals.

3. USING COMPLAINT, GRIEVANCE, APPEAL, AND MEDICAID FAIR HEARING DATA FOR ANALYSIS AND PRIORITIZATION OF CORRECTIVE ACTION AND IMPROVEMENTS

We categorize, track, trend, and aggregate all data related to complaints, grievances, appeals, and Medicaid Fair Hearings including the type of issue and other details such as resolution status and timeframes for completing process steps. We review the AHCA member Complaints, Grievances, and Appeal Report for monthly submission to the State and to our Quality Management Committee (QMC).

The Clear Health QMC reviews data related to grievances, appeals, complaints, and Medicaid Fair Hearing volumes by topic type, region, outcome, and timeliness of grievance and appeal resolutions. After reviewing grievance and appeal data, the QMC creates plans to address areas of concern and to improve the member experience through process and system improvements; feedback to providers and delegated vendors; staff, provider, or vendor training; and provider or vendor corrective action plans. The QMC reports the results of grievance and appeal data review and planned priorities for actions to address concerns and improve the member experience to our Board of Directors.

Through web-based training tools such as HIPAA and security trainings, our employees are educated to understand the importance of protecting member's protected health information. For complaints, grievance and appeal, and fair hearing data submitted to the QMC, the data is aggregated and excludes any protected health information. Additionally, Clear Health makes sure that we are meeting all HIPAA requirements including encrypting data at rest.

As described throughout this SRC response, actionable strategies that result from our grievance and appeal tracking process include provider, vendor, and internal plan strategies to improve the delivery of care to our members. We have similarly implemented strategies to improve the grievance and appeal process. For example, we implemented the following strategies in 2016:

- Completed Process Improvements for Appeals Turnaround Time Compliance

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Daily monitoring of work lists for Grievance and Appeal Nurses and our Medical Director to provide frequent notifications about pending cases approaching maximum timeliness standards
- Grievance and Appeal staff training to increase use of appropriate timeliness extensions when permitted by federal and State policy
- Addition of new Grievance and Appeal employees to address increased volume and support meeting timeliness standards
- Scheduling of a Grievance and Appeal Nurse on weekends to assure timely responses to expedited appeal requests
- Review of any appeals that come close to exceeding turnaround time requirements to determine the root cause
- Completed Process Improvements for Medicaid Fair Hearings
 - Weekly Medicaid Fair Hearing team meetings to prepare for hearings scheduled for the upcoming week
 - Improved scheduling practices to ensure necessary plan and vendor Medicaid Fair Hearing participants attend all hearing meetings
 - Addition of a new Grievance and Appeal Auditor who audits each evidence packet prior to AHCA submission to ensure timely, complete, and accurate submissions
 - Consistent and comprehensive use of an internal Medicaid Fair Hearing database in addition to the AHCA portal to provide backup in monitoring of Medicaid Fair Hearing activities

4. CORRECTIVE ACTION PLANS AND QUALITY CONTROLS TO MONITOR AND IMPROVE COMPLAINT, GRIEVANCE, AND APPEAL PROCESSES

Clear Health's Compliance, Subcontractor Oversight Program, and Special Investigation Unit (SIU) use corrective action plans as a method to escalate and track issues of non-compliance with our Contractual requirements that may be identified through our complaint, grievance and appeal processes.

Network Providers

Clear Health has policies and procedures for imposing provider sanctions, restrictions, suspensions, or terminations. Our Provider Relations Department typically terminates providers for non-compliance with Contractual responsibilities. These types of administrative terminations do not involve Compliance.

Clear Health's SIU uses corrective action plans (CAPS) with network providers, when necessary, due to findings of investigations or audits. We use CAPs as a tool to educate providers. For example, when we identify and validate billing irregularities, we use CAPs as a tool to correct their billing or documentation practices. SIU investigators issue CAPs with the notification of overpayment letters. The CAP outlines the specific findings from the audit while providing education and a need for the provider to adhere to the local/federal policies and our

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

reimbursement policies as a condition of eligibility to remain in the network. The CAP process includes implementation of prepayment review for claims identified in CAP. Clear Health's SIU frequently collaborates with providers on revising an acceptable CAP that both parties agree upon. The SIU requests the providers sign and return the CAP within 30 days of receipt. The SIU cannot enforce the providers to agree and sign to acknowledge the SIU findings, however the SIU representative does document the case notes and all communication with the providers. Investigators from our SIU monitor the providers billing and adherence to the CAP.

An example of a provider CAP that we implemented to improve member fall events at a facility is provided below.

**** SPOTLIGHT ON: Implementing a Provider Corrective Action Plan Improves Facility Fall Risk Protocols**

We received a grievance to be investigated as a potential quality of care concern regarding a member who had fallen during ambulation therapy. Following our policies and procedures, we discussed the case in our weekly staffing conference under the leadership of the Quality Management Medical Director. We sent the provider an inquiry letter requesting the facility's fall protocols and the corrective action developed to prevent events like this from happening in the future.

The provider's response described the facility's risk management protocols that applied to falls and included a description of the event. As per their report, the member missed the wheelchair as he was attempting to sit. The therapist present at the time attempted to assist him; however, attempts were unsuccessful and the fall could not be prevented.

The corrective action plan included re-education of the entire therapy department. All staff was re-educated on fall prevention techniques and body language, which included their ability to respond to non-verbal cues. Patients were also educated on fall prevention skills such as feeling for the chair or the bed before attempting to sit. The case was assigned a Severity Level 2, meaning that although there was a quality issue identified, this did not impact the care outcome. Quality Management will continue monitoring this facility tracking and trending all fall events. **

Subcontractors

Our Florida-based Vendor Delegation Oversight Group (VDOG) team with support from national subcontractor oversight resources work hand-in-hand with our subcontractors and monitor their compliance with Contractual requirements. If we determine a subcontractor has an issue or risk due to non-compliance or an increase in volume of complaints, grievances or appeals, our VDOG notifies the subcontractor and provides them with details about each area that requires improvement. The issue is reported to the Florida Medicaid Compliance Committee for tracking purposes, and monthly updates are provided. In addition, our Compliance department tracks the issue using our Risk and Issue Tracking tool. If the subcontractor is unable to resolve the issue promptly, Clear Health's VDOG requires the subcontractor to provide a formal CAP with a deadline for submission, inclusion of root cause analysis, and actions and timeframes for completion. Clear Health's VDOG reviews the CAP, may propose changes, and sets a deadline for a revised CAP. Clear Health's Compliance department is part of the review of the CAP. Once we approve a CAP, we monitor provider or subcontractor compliance with the CAP and achievement of milestones by due dates specified in the CAP. We set controls by engaging in weekly (or every other week), or monthly (or as set forth in the CAP) meetings with the

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

subcontractor, depending upon the severity of the issue. Our Compliance department also participates in the monthly VDOG meetings in which the CAP is addressed with the subcontractor. During the meetings, we review the action plan to monitor the progress for each action item. We discuss accomplishments as well as areas of concern, including any risks of not meeting a deadline.

If after 90 days it becomes apparent that CAP implementation is not addressing areas of concern as expected, the VDOG will alert our Compliance department and executive leadership. Our Compliance department also makes monthly updates in the Risk and Issue Tracking tool. The VDOG representative, Compliance department representative and executive leadership will determine the risk of the subcontractor's ongoing non-compliance. Depending upon the severity, our legal and national Compliance departments may also be involved. If the subcontractor is unable to resolve the issue or comply with Contract provisions, the VDOG will invoke the subcontractor contingency plan, which addresses de-delegation of subcontracted functions and subcontractor/provider contract termination.

5. TRACKING AND RESOLVING ALL COMPLAINTS

When we receive complaints from AHCA, the process of tracking and resolving these complaints is the same as mentioned earlier. The only difference is for complaints received through AHCA's Complaint Hub, when our Regulatory team participates in the process at initial receipt and resolution finalization. Our Regulatory department enters the complaint into our database of AHCA-submitted complaints, grievances, and appeals, which triggers an automated email to our Grievance and Appeals department with a description of the issue and the priority level of the complaint. With this email, our Grievance and Appeals department initiate the grievance process as described above by entering the complaint in the grievance and appeal system. Throughout the process, our Grievance and Appeals department contacts our Regulatory department with updates on the case, as required by AHCA. We also have weekly meetings to discuss open AHCA complaints and any possible risks to timely resolution.

For subcontractors, Clear Health believes that maintaining complete visibility into the volume and topics of member grievances and appeals is a critical component of subcontractor oversight, which is why we do not delegate grievances or appeals processes to any subcontractors. Our Florida-based team oversees the entire process (intake, investigation, and resolution), working closely with our subcontractors. We instruct subcontractors to forward any member complaints that are unresolved to Clear Health for grievance processing. As part of subcontractor oversight, we record and resolve all member grievances and appeals, including for services provided by our subcontractors, such as pharmacy, dental, vision, and transportation. We assume responsibility for all member grievances and appeals because we hold ourselves accountable to our members for all aspects of our plan and we believe that member concerns provide us with valuable insight into subcontractor performance.

6. TRACKING GRIEVANCE AND APPEAL SYSTEM DATA TO ACHIEVE OPERATIONAL IMPROVEMENTS

Combining the leadership, resources, and capabilities of our three proven legacy health plans in Florida allows us to bring together best practices to assure effective processes. This is true for our grievance and appeal process. We have a strong commitment to continuously looking for opportunities to improve our grievance and appeal processes. This is evident in the efficiencies

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

our grievance and appeal system platform brings, and in the improved processes for timely appeals and complete and timely Medicaid Fair Hearing evidence packets we describe above. We also have a strong commitment to using grievance and appeal data to identify opportunities to improve processes throughout our plan.

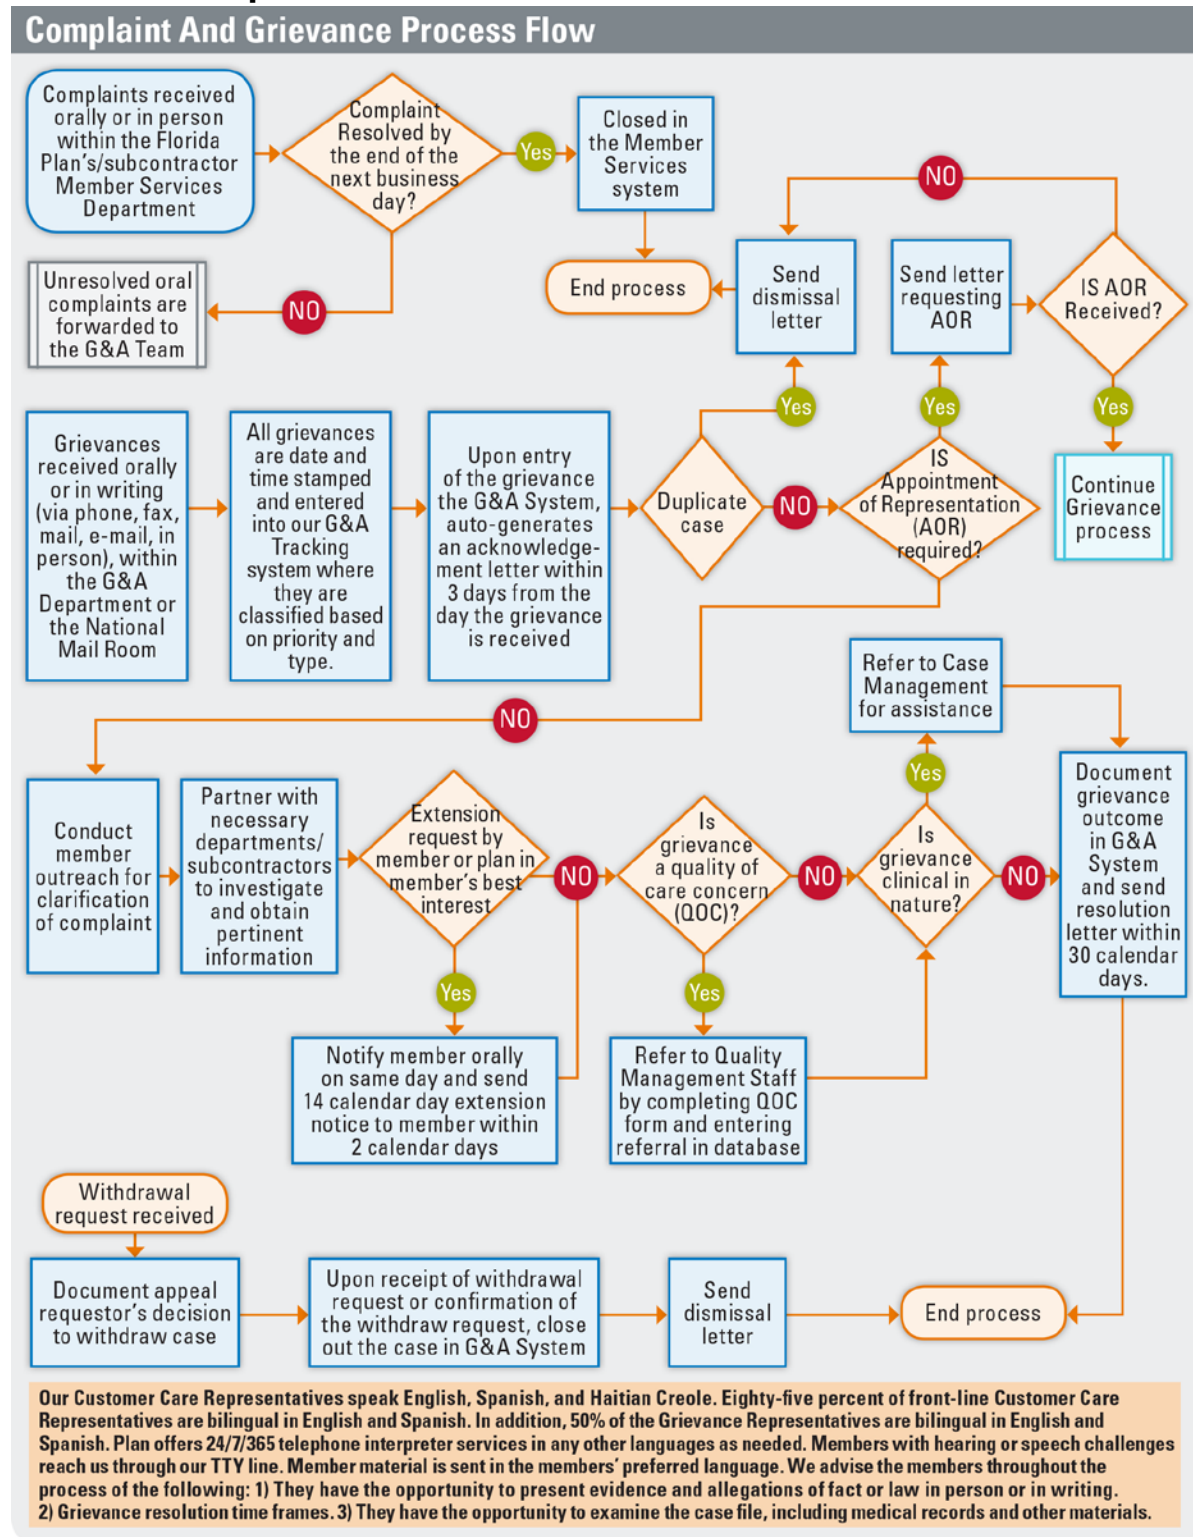

As described above, we use grievance and appeal data to identify areas in which we can work with providers, vendors, and our employees to improve performance. For example, we track complaints, grievances, and appeals to identify any policies and procedures that are not administered correctly. Once we identify an issue, we promptly provide training and resources to the appropriate providers, vendors, and plan employees to prevent future errors. Finally, our Quality Management Committee structure enforces accountability for continuous improvement. Our local leadership chairs this committee and promotes consistent reporting, transparency, and operational enhancements that will benefit members.

Evaluation Criteria:

1. The extent to which the respondent's grievance and appeal system flowchart reflects ease of access for individuals with complaints, grievances and appeals, including ease of access for persons with disabilities or who speak other languages.
2. The extent to which the respondent's timelines for acknowledging and responding to complaints, grievances and appeals are less than those specified in federal and State requirements.
3. The extent to which the respondent's complaint, grievance and appeal and Medicaid Fair Hearing data are aggregated so that results are actionable, protect enrollee privacy and are reviewed by the appropriate staff or committee for analysis and prioritization of corrective action and/or improvement initiatives.
4. The extent to which the respondent's complaint, grievance and appeal process imposes deadlines on completion of corrective action plans implemented as a result of verified complaints, grievances or appeals and have set quality controls in place to review outcomes.
5. The extent to which the respondent is able to ensure all complaints (including those submitted to the respondent by the Agency or respondent's subcontractors) are tracked and resolved as part of the respondent's established complaint, grievance and appeal process.
6. The extent to which the respondent's grievance and appeal system data resulted in operational improvements of the respondent.

Score: This section is worth a maximum of 30 raw points with each of the above components being worth a maximum of 5 points each.

Figure 12-1. Enrollee Grievance and Appeal System

Figure 12-3. Enrollee Grievance and Appeal System

Member Expedited Appeal Process

Expedited Appeal Process Flow

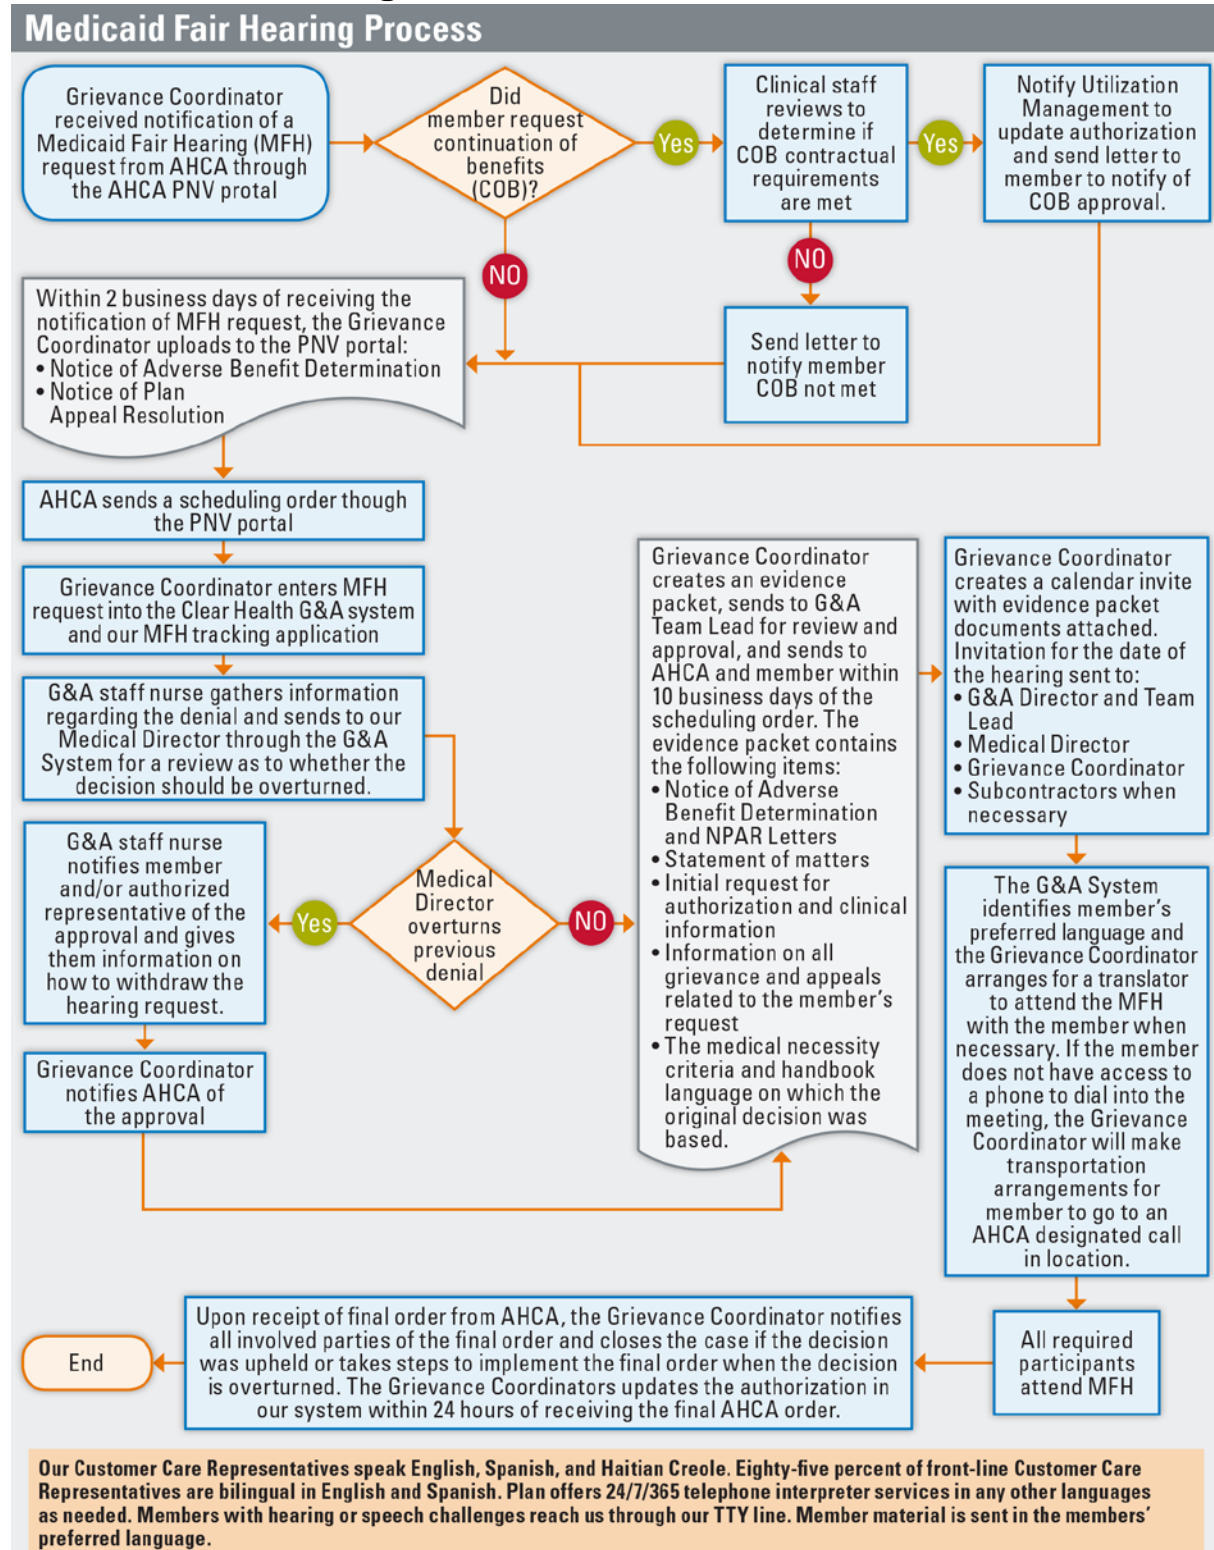

Our Customer Care Representatives speak English, Spanish, and Haitian Creole. Eighty-five percent of front-line Customer Care Representatives are bilingual in English and Spanish. Plan offers 24/7/365 telephone interpreter services in any other languages as needed. Members with hearing or speech challenges reach us through our TTY line. Member material is sent in the members' preferred language. We advise the members throughout the process of the following: 1) They have the opportunity to present evidence and allegations of fact or law in person or in writing. 2) Appeals resolution time frames. 3) They have the opportunity to examine the case file, including medical records and other materials.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

SRC# 13 – Social Media (Statewide):

The respondent shall describe its approach for engaging enrollees by using innovative communication methods and technologically advanced resources, including, but not limited to the use of social media, texting and smartphone application platforms.

Response:

Technology is changing the way people interact with the world around them, and health care is right at the heart of this phenomenon. For example, just two years ago, less than a third of our national membership (29 percent) used a mobile device to access our website. By contrast, our most recent data indicates that this has grown to nearly half (45 percent). Digitization – defined as the use of new technologies to create new experiences that transform health care – creates unprecedented opportunity to improve health literacy, health outcomes, and relationships between members and their providers. At Clear Health, we understand that technology can enhance everything from the patient experience at a provider's office, to improved health literacy, to supporting desired health outcomes, to addressing social determinants of health. We have invested, and continue to invest, significant resources in a pipeline of innovations that will help continue to shape the way our members interact with us. Keeping pace with the technology is one way that we will leverage advancements to improve the health of our Florida enrollees (members). Clear Health is supported by the resources of our parent company, Anthem, Inc., and every solution used to support our membership is handpicked, customized to be relevant to Floridians, and supports AHCA goals.

The innovations underway will roll out prior to and during the term of the upcoming contract, and will add to the many digital tools we already make available to our members. When taken in total, we think of these solutions as enhancing the member "journey," a concept that emerges from our use of the Agile methodology for developing innovations. Agile is a proven framework that focuses on the constant evolution of our technical and functional solutions. By executing in short, targeted, and iterative cycles – "sprints" – we maintain a high degree of focus on the rapid delivery of value to our members.

Our digital innovations all address one or more of the following "journeys" or needs from the member point of view:

- Help me with my everyday health
- Help me navigate the health care system and talk with my providers about my goals
- Answer my questions and solve my issues
- Help me understand how my choices affect my health
- Provide me with tools to understand and maintain my eligibility
- Help me find community resources that I need
- Help me stay connected to my health care when natural disasters strike

We use innovative communication strategies and advanced technology to engage members and promote health. While we will maintain and continue to improve upon our award-winning member website in this contract, we have moved well beyond this basic platform to a host of other state-of-the-art initiatives described below. We continue to innovate by employing a variety of technology strategies to assist our members in understanding their personal healthcare needs. Social media and similar innovations can help make members healthier by targeting health

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

literacy. We use secure communication channels, to protect patient privacy and facilitate information sharing, medication adherence, and help the member engage with their health care community.

Because innovation is a core value of our company, our national organization has created the Innovation Studio to keep us laser-focused on helping our members reap the benefits of the technological changes evolving around us. The Innovation Studio is a multidisciplinary team of experts responsible for working to generate, accelerate, and incubate innovative solutions. Their task is to find and evaluate ideas from all of our affiliate health plans and each of Anthem's more than 53,000 employees. In Florida, we will use the Innovation Studio to test new ideas and strategies that improve person-centered care and engagement, advance quality of care, and lower total cost of care. We use the Innovation Studio's capabilities to vet and evaluate new ideas and processes, prior to implementation with our membership or providers. In support of AHCA's goals, our member-centered and provider-led innovations emphasize collaboration, value-based objectives, and shared rewards. The Innovation Studio is the embodiment of our core value of "First we listen, then we act."

One example of the Innovation Studio in action is the development of a Person Centered Engagement Tool, scheduled to go live as a pilot in Kansas in November 2018. This tool is an application that uses an innovative web-based digital platform designed to help build trusting relationships between members, their circle of support, and their service coordinators through bi-directional information sharing. Members can create a personal profile, see information about themselves, make corrections, and share information about what is important to them and for them by answering open-ended questions. Members use person-centered narratives that reflect capabilities, strengths, preferences, health, and supportive service needs as well as goals and aspirations. This technology will enhance member engagement and self-determination, and simplify communication among the circle of support. Through this technology, members can use various devices to share information in real time to improve the discovery and assessment processes across life domains (medical, behavioral, social, environmental, functional, and social determinants of health).

Innovation is in our DNA as a company. We have established a new division, the Diversified Business Group, to extend our innovation beyond insurance products. We are not just an insurer that adopts solutions available in the marketplace – we are creating new solutions designed to support the best outcomes for our Medicaid members. To advance our capability, our ultimate parent company, Anthem Inc., has entered into an agreement for the custom development of a 352,000 square foot building in the heart of Atlanta, which is already home to the Innovation Studio. The 21-story state-of-the-art structure will be a hub for some 3,000 multidisciplinary IT professionals dedicated to creating new capabilities that will help enhance the member experience, improve quality of care, and lower costs. Construction is set to begin in January of 2018.

When developing innovations, we do not let traditional organizational silos limit us. For example, the mobile technology and voice portal teams are working together on an artificial intelligence (AI) pilot that will provide a chat-based option for members to get answers in real time from an AI engine. This AI is far more sophisticated than existing solutions our members may be familiar with, such as Google Assistant or Siri, and will allow members to ask questions in a natural language and receive answers that make sense. The chatbot will be capable of reading the

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

emotional content of a user's response, thus escalating to a human operator in the event that the member grows upset or impatient.

In addition to establishing the Innovation Studio, we are engaged in an initiative designed to build the next generation workforce to keep our innovations ahead of the curve. We work with colleges to update their curricula to make sure that graduates are up to date and can support our forward-facing environment. Technology, or in health care's case, the frameworks for building mobile health care applications, are evolving faster than at any time in our history. As part of this initiative, we take new graduates and enroll them in 12-person boot camps. We provide mentors and establish checkpoints on their progress before they join our workforce in cohorts to incubate innovation throughout the organization. As part of the boot camp and integration process, the participants survey what works and what does not work with members, to evaluate our innovations to make sure they are meaningful and effective, and adapt them as necessary.

Below we outline the innovations under development and provide detail on the many solutions in use today by our membership.

1. OUR TECHNOLOGY INVESTMENTS IMPROVE HEALTH LITERACY AND PROMOTE IMPROVED HEALTH OUTCOMES

Increased health literacy and improved health outcomes are inseparable. Only 12 percent of adults have proficient health literacy, according to the National Assessment of Adult Literacy. In other words, nearly nine out of ten adults may lack the skills needed to manage their health and prevent disease. Fourteen percent of adults (30 million people) have below basic health literacy. These adults were more likely to report their health as poor (42 percent) and are more likely to lack health insurance (28 percent) than adults with proficient health literacy according to the Office of Disease Prevention and Health Promotion. Health literacy increases when members are empowered with knowledge about their conditions and what it takes to keep them healthy in a whole-person context. In addition, health literacy helps a member communicate with their providers so they can develop a shared approach to desired health outcomes. Outcomes improve when members stay connected with their providers and have tools to make changes that improve their health. Technology can support both of these. First, we use technology to empower members with information about their health care in accessible, engaging formats. Next, we use technology to create a three-way partnership between member, provider, and health plan so that members can meet their health care goals while we play a supportive role.

We use innovative communication strategies and advanced technology to engage members and promote health. We have moved well beyond the standard member website to a host of other state-of-the-art initiatives described below. We continue to innovate by employing a variety of technology strategies to assist our members in understanding their personal health care needs and to encourage their active participation in improving health literacy and achieving improved health outcomes. Members will always have the ability to opt out of these tools.

**EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)**

• CommonGround (secure portion of member portal). This is a comprehensive suite of tools specifically designed for our members with behavioral health needs. Support tools include worksheets/checklists, videos of first-person accounts on recovery and wellness, and other materials grouped into learning tracks on a particular topic. Sample topics include Managing Anxiety and Improving Concentration. Materials emphasize patient-centered care, patient empowerment with respect to treatment, and shared decision-making.

• My Advocate (multi-modal technology – currently leveraged in Clear Health for pregnancy, Asthma and Diabetes). This program provides condition-specific proactive, culturally appropriate outreach and education through a multi-faceted technology tool. It does not replace our high touch case and disease management approach, but instead serves as a supplementary tool to extend our health education reach. The goal of the expanded outreach is to identify members who have emerging risk factors, to facilitate connections between them and our Case Managers (Managed Care Coordinators), and improve member outcomes. My Advocate communicates with members through interactive voice response calls, texts, and smart phone application messages integrated with our Case Management System. Outreach begins with a risk screening call and continues with multiple contacts depending upon the member's condition. Responses to questions posed during outreach activities can generate alerts to Care Coordinators. Members also have access to the My Advocate website with additional information and a chat feature.

My Advocate takes condition education and breaks the information down into small pieces over a series of calls. The system presents bite-sized pieces of information to the member during the call and then the member can respond to specific questions. An example for the Clear Health population with complications, such as diabetes, would be a summary of HbA1c and why it is important in diabetes management, followed by a series of questions such as "have you had an HbA1c test in the last year" and "can you tell me your result". The member responses to the questions can create alerts in our real-time dashboard for live outreach.

This bidirectional exchange of information allows us to establish member engagement, provide valuable information and intervene with a live touch in a timely manner where needed. We tailor the alerts to provide the member with the correct level of service ranging from non-clinical outreach to the Managed Care Coordinator contact. Our goal is to provide members with information that is critical to the management of their condition. This will improve health outcomes and promote health literacy.

• My Wellness Guide (web-based and mobile app). Clear Health will offer My Wellness Guide to our members, a solution that our affiliate health plans in Maryland, Washington, and Nevada have been piloting since late 2016. Initial results are positive and member engagement rates for this tool have surpassed benchmark standards to date. As of our September 2017 update on the three-state pilot, members have viewed more than 50,000 pages. Fifty-nine percent are in at least one action plan, which is 23 percent above the standard. Members spend an average of eight minutes per session on the site, or 60 percent above the standard. In all, 628 action plans have been started, 431 members are participating in action plans, and more than 868 habits were completed and 20 habits mastered.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

My Wellness Guide is a one-stop lifestyle, health, and wellness engagement platform that augments our ongoing efforts to support and encourage our members to take charge of their health. My Wellness Guide uses a combination of industry-standard health information, custom campaigns and challenges, health tracker integration, health dashboard and user activity and input to deliver personalized experiences and tools that promote healthy behaviors. It is accessible online, by Apple and Android mobile applications, and on the Internet.

My Wellness Guide aggregates data about personal activities like exercise, sleep, and eating, from a variety of inputs, including a user's activity tracker (e.g. Fitbit, Jawbone, etc.), smartphone, or other applications. Our pilot data indicate that anywhere from a quarter to a third of our membership (25 percent to 33 percent) already have wearables or compatible cell phone apps that collect this data, e.g., AppleHealth in iPhones. Users can also manually enter information. The platform analyzes this data and delivers actionable insights, like how sleep affected eating on a particular day. The insights help the user to be more aware of their habits. Going a step beyond awareness, My Wellness Guide offers several tools to help members use health information to form and maintain healthy habits. The following list of features demonstrates improved member engagement and information understanding for better outcomes:

- User or My Wellness Guide developed plans to meet member wellness goals
 - Tips and reminders to help members stay on track with their action plans
 - Challenges that members participate in featuring social competitions, points and badges, progress tracking, and reminders. Members can also opt for private health challenges that offer the same resources.
 - Timely information delivered to members at specific times of the day based on user activity. Users get targeted information related to their goals and actions, not general information that can be overwhelming and impersonal.
 - A dashboard that provides members with quick updates to see how close they are to meeting their goals. The dashboard presents information relevant to the user's goal, for example, calories consumed or calories burned for someone who wants to lose weight, or steps taken for someone who wants to be more active.
 - Health Information through Harvard Health Publications (HHP) which licenses its peer-reviewed clinical health information to My Wellness Guide, providing users with easily understandable content on a wide variety of topics. HHP is the media and publishing division of the Harvard Medical School of Harvard University. HHP draws on the expertise of Harvard Medical School's 11,000+ physicians, researchers, and other faculty members to deliver peer-reviewed clinical health information.
- Personal Health Record (web-based application). Our health plan advocates the deployment of a Personal Health Record (PHR) to help members better engage in their health care. Prior to the start of the new Contract, we will deploy a PHR from WebMD Health Services (WebMD) for our Florida members. WebMD's PHR will serve as a repository of member health information, integrating our health plan clinical data (claims, pharmacy, and lab results) with data the member adds. WebMD's PHR will support members' involvement in driving their own health care. It will provide the necessary personalized content for improved benefit, treatment, and provider decisions. The PHR is a repository for self-reported and imported medical information from

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

multiple sources. It can receive imports of medical and behavioral health claims, lab results, and medications. In addition, WebMD offers a health assessment and trackers that members can complete to gain additional insight to manage their overall health.

The following list demonstrates improved member engagement and information understanding for better outcomes. The PHR intuitively:

- Translates clinical data into easy-to-understand terms
- Checks medication interactions
- Checks allergic reactions
- Reminds about overdue tests
- Adds to the central profile for message and content targeting

Members can print the WebMD PHR and can allow provider access through a publicly accessible website and unique ID number and PIN that the member controls. Providers use a specially designed PHR Viewer, which delivers the data in the most useful format and context. Members can also export their health information and send it to their providers if desired. This will allow the PHR to become a secure, portable platform that helps members facilitate data exchange to make sure their PHR contains essential health data across the continuum of care—for example, if a member changes insurers or moves to a different state.

- Facebook – We are in the process of developing the Clear Health Alliance Facebook page in accordance with practices of our affiliate plans. The purpose will be to engage with members and potential members through educational health-related content and supportive community events. We have found this to be an effective way to get general information out to members. We frequently post messages, including images, articles, and short videos. We respond to all comments and direct messages within 24 hours. We track a wide range of performance metrics such as likes, shares, comments, followers, impressions, and timing of posts. We have goals for numbers of followers in 2018 and engagement and reach rates per month. Some of our best performing posts involved topics such as real stories about member successes, health information posts related to allergies and diabetes, information, and pictures from health plan sponsored community events. We plan to expand our Facebook content to include more real stories about role models living with HIV/AIDS and overcoming its stigma, like our spokesperson Earvin “Magic” Johnson. We will also include more videos, use of hashtags, a link to the Facebook page on our member website, and more community events promotion.

- MyHealthTeams (web-based application). Our innovative MyHealthTeams program provides members with HIV/AIDS, Alzheimer’s disease, obesity, diabetes, depression, and heart disease the opportunity to engage with other people who have the same chronic condition in a safe online environment. In chat rooms, which the MyHealthTeams Site Administrator closely monitors to assure member safety, members can learn more about their chronic condition through safe connections with others dealing with the same condition. Often when members receive a chronic condition diagnosis they are confused and feel alone. They want to learn more about what the diagnosis means and connect with others who have been through what they are experiencing. By providing members with a network of peers, members connect and learn from each other, ask questions, gain additional information about their condition, get referrals and share practical tips.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Online and Mobile Transportation Scheduling (mobile app)– members can contact our transportation subcontractors online and by using downloadable mobile applications to schedule, revise, or cancel rides to covered services. For many members, transportation is an important part of accessing care. This is an important technological intervention that allows members to self-manage their care and make informed choices.

Mobile Pharmacy Application (web-based and mobile app):

Members can connect to our pharmacy benefit manager's mobile pharmacy application online and by downloading a mobile application that helps members to understand their medications and risk factors and seek answers to questions about issues like side effects through a wide range of features to facilitate the management of prescriptions anywhere, anytime. The following list of features demonstrates improved member engagement and information understanding for better outcomes:

- My Rx Choices checks for potential drug interactions against the member's prescription history. For members with chronic or complex conditions who may be seeing multiple physicians, this functionality prevents errors in prescribing that could harm a member.
- Pharmacy Care Alerts. Pharmacy Care Alerts provide members with the opportunity to review personalized alerts to ensure they are following their treatment plan as described by their doctor. The application displays alerts for adherence, omission, and compliance reasons and encourages members to take informed, immediate action to address any items.
- Medicine Cabinet. This feature automatically synchronizes with the member's current prescription drug history. This feature provides members with the ability to track all their prescription medication-dosing regimens, while allowing the member or caregiver to create alerts on their phone to remind them when it is time to take their medication throughout the day. Medicine cabinet also notifies members when they are running low on their medications. The application sends these alerts to members when our records indicate the remaining medication level reaches intervals of 15, 10, five and zero days. In addition, members can self-report over-the-counter medications, vitamins, and supplements for which they can set reminders and alerts, and receive notifications if there is a possible health risk with these items and their medications.
- Drug Information. Members can search detailed drug information by medication name, condition, or drug category, and see potential side effects, drug interactions, and more.
- Locate a Pharmacy. Members can search for the nearest in-network retail pharmacies by their current location or by entering an address or ZIP code. The application displays closest available pharmacies in a list and map view. Members can view pharmacy contact information and get directions.

Texting Programs:

The Wellpass Health Program provides two avenues for engagement and improvement of health outcomes and health literacy.

The Wellpass Health Program is a series of pre-defined health messaging programs delivered to members through a combination of text and secure messaging. Wellpass focuses on preventive

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

health through Txt4health. In 2016, more than 27,000 members received at least one Txt4health message, and more than 39,000 messages were received from users, showing a strong patient engagement rate with the tool.

Along with texting, Wellpass provides an online platform as well as condition-specific smartphone applications that members can access should they choose to. We will provide reward cards via mail, phone, and online where members will be able to select their desired reward card by reviewing options on a link provided by the vendor. Once vendor contracts are in place, we will revise all programs and member/provider materials to reflect new vendor processes.

Website and Related Tools:

Our new innovations emerge from our long history of being at the forefront of using technology to connect with our members, beginning with our website. As explained below, the website is both a powerful tool to help members understand how to get the most from their benefits, and a gateway to a suite of tools to improve health literacy and health outcomes. Visits to the legacy Amerigroup website for the 12-month period ending July 31, 2017 averaged more than 16,000 per month. Active users, those who logged in to the secure portion of the website at least once in a 365-day period, average 16,000 per month.

Upon agency approval our website will feature content specifically targeted toward individuals with HIV/AIDS, including a video with Magic Johnson based on the theme “The Fight Isn’t Over.” The website currently offers suggestions on HIV/AIDS-related mobile apps for our members. Some examples are:

- AIDSinfo, created by the U.S. Department of Health and Human Services, with definitions of all the terminology related to HIV/AIDS in English and Spanish.
- The Body, which includes the latest news about ongoing research of interest to individuals with HIV/AIDS and related illnesses.
- Care4today, which allows users to input all their medications with dosage and timing information. Then the app reminds the individual when to take a specific dose.

The website also serves as a gateway to a number of features designed to support health literacy and health outcomes, as outlined in the bullets below:

- Community Resource Link. As an expanded benefit, we provide members and their families access to an easy-to-use resource that helps members identify and locate local, community-based programs, benefits, and services that help members and their families and caregivers in building increased personal responsibility and self-management.
- Online Well-being Program. Another innovative expanded benefit provides members with an online community promoting health and wellness through instruction, games, goal setting, and monitoring. This behavioral health-focused tool has an online community feature that helps instill a strong sense that consumers are not alone in becoming and staying emotionally and physically well.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Health A to Z. Members have access to Health A to Z, powered by the Healthwise® KnowledgeBase, through our member website and in the mobile app. Health A to Z includes a variety of tools such as a symptom checker, condition lookup, a heart attack risk quiz, and a body mass index calculator. Pregnant members have access to useful tips, interactive tools, pregnancy and childbirth-related applications, and helpful resources.
- Linking members to Useful Applications. We maintain a curated suite of mobile applications on our website to support health, well-being, and self-care for chronic conditions such as diabetes, asthma, and hypertension. Many of these applications also provide a fun, interactive venue for members to learn about their conditions, alerting them to symptoms for which they should seek help.
- ID Cards. Members can log in to the secure website to request that we mail them a new Clear Health ID card (ID card says CHA in lieu of Clear Health to protect member privacy). Pending state approval, members will also have the option of logging in to download and print a copy of their ID card themselves, or using the mobile app to access a digital version they can show, email, or Fax (similar to an electronic airline boarding pass).
- Member Materials – Through the website, members have immediate access to educational materials and self-service functions including the following:
 - Clear Health contact information
 - Ability to update personal information
 - Ability to select preferred methods for receiving plan communications
 - Eligibility information
 - Primary Care Provider (PCP) information and ability to change PCPs
 - Online provider directory
 - Member handbook
 - How to submit complaints and appeals
 - Safety and privacy information
 - Preferred drug lists
 - Care coordination information
 - Behavioral, social, and physical health information
 - Health- and condition- specific materials
- Find a Doctor Tool. As required by AHCA, our searchable online provider directory helps members to select a PCP or other provider based on their preferences such as office hours and languages spoken. A unique Clear Health directory feature is the Red Ribbon designation for providers. Red ribbon providers are Board Certified infectious disease specialties that cater to the HIV/AIDS population. This allows members to be able to identify specialists PCPs for HIV/AIDS.
- Clear Health's Healthy Behaviors Program - members can get online access to our Healthy Behaviors program, which promotes personal responsibility by encouraging and rewarding healthy behaviors and age- and gender- appropriate preventive care. Coupled with our extensive Health Promotion, Case Management, and Disease Management programs, Healthy Behaviors encourages members to collaborate with us and with their PCP to build their health literacy and self-care skills, and improve their health and productivity, while reducing the risk of poor long-term health outcomes. Members can access the Healthy Behaviors Program through a Managed Care Coordinator or PCP referral, or independently, by requesting to enroll in the program after receiving program information in the mail, through a conversation with Member Services, or by

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

accessing program information on the member website. The member website includes information about the five established Healthy Behaviors programs, program specific educational materials, and the required forms, which members sign and submit to us to indicate their commitment to participating in the program.

2. COLLECTING DATA THAT SUPPORTS THE EFFICACY OF THE PROPOSED APPROACH IN ACHIEVING THE INTENDED GOALS AND HEALTH OUTCOMES FOR THE TARGET POPULATION

A companion to the principle of “First we listen, then we act” is the imperative to “listen” to the data. We continue to improve our development and use of new tools by understanding how people interact and use new technology and information.

We capture usage data, solicit feedback from members using the tools, identify what is being used the most and the least, and synthesize all of this information when developing future enhancements. We continually measure health literacy through the evaluation of our health promotion programs and initiatives by developing and implementing a Florida-specific health education plan and evaluating its impact on member and provider engagement and satisfaction through the evaluation of EPSDT, HEDIS®, and CAHPS® scores. Our Consumer Advisory Council in Florida solicits guidance and recommendations on the effectiveness of our efforts, identifies additional member health education needs, and recommends additional health education programs.

For the tools in use today in Florida and other markets, data show that the tools keep members connected, which increases the opportunity for our plan and providers to increase health literacy and improve outcomes.

For the innovations in our pipeline for Florida (and recently implemented tools), we have definitive data collection and analysis plans. Whenever we develop or modify a tool, one of the first questions we ask is “How will we know it is having the intended effect?” This is how we make sure we set our systems up to collect, and more importantly, analyze and use, the data that will answer that question.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Some examples of the data that we will collect for new tools are as follows:

Text messaging/instant messaging: How many members have phones that allow text messages; how many members opt in; does text messaging reduce the need for multiple attempts to reach the member; did utilization of inpatient, emergency room, or other services decline?

Web-based and mobile tools: How often do members visit websites; how often do they download recommend mobile apps; from what types of devices do they visit the sites; how often do they click through to available libraries vs. just staying on the landing page?

In addition, we will track tangible results associated with our tools, such as points our members earn after enrolling in a Healthy Behaviors program supported by the online tools. We also monitor member engagement and satisfaction, as well as health outcomes, through routine quality measurement.

3. OUR SOCIAL MEDIA, TEXTING, AND SMARTPHONE APPLICATIONS ARE MOBILE FRIENDLY AND AVAILABLE ON ALL OPERATING SYSTEMS AND INTEROPERABLE WITH OTHER TECHNOLOGIES CURRENTLY USED BY THE MEDICAID POPULATION

We meet our members where they are, and that includes in the world of technology. We continually update, modify, and improve our digital communication tools to be available and accessible no matter what platform they are using. We also are deploying innovations that support members who experience barriers to accessing information in a digital format, such as our groundbreaking interactive video brochure.

When members reach out to us, they often start with our member website, and nearly half the time they access our website using smartphone and mobile technology, including the smartphones available through the Lifeline program. It is important to recognize that for many members, a handheld device may be their only connection to the Internet. Therefore, making our solutions compatible with mobile technology is an imperative, not just “icing on the cake.” The member website is the primary place members can go to better understand their coverage, learn how to access services, and obtain information to improve their health. Since our website is the first and often the most frequent source of information to members, maintaining an engaging and helpful website is essential. We have leveraged the expertise and experience of our national team, which develops award-winning websites for our affiliate plans, to apply website best practices. For this contract, we will combine the website features of our legacy plans on a new platform for a redesigned Clear member website that will feature responsive design, which displays the website in the optimal way regardless of the user’s device. In addition, pending state approval, members will be able to access popular features of the member website by means of a downloadable application for mobile devices (iOS and Android).

Our digital experts achieve interoperability to provide easy access to our websites and Internet-based tools regardless of the device they are using (smartphone, tablet, or computer) or the speed of their Internet connection by using up-to-date, secure, and modern coding technology and practices. When developing apps, we use the React Native framework, so that apps work seamlessly across different platforms without the appearance that they were converted. This facilitates a more user-friendly experience. The migration of our websites and tools to a new platform, which will occur with the website redesign in 2018, affords us the latest available features and technology in content management. Through responsive design, our website will respond to

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

the users' behavior and environment based on screen size, platform, and orientation, enhancing our support of mobile device use by our members. We avoid techniques or tools that require significant memory or disk resources or special intervention on the user side to install plug-ins or additional software. Since we know our users visit our sites from a variety of devices with different technologies, our websites are cross-browser tested to confirm proper display and functionality. Digital Solutions codes and tests for the latest versions of Google Chrome, Firefox, and Safari, as well as compatibility with Internet Explorer 9 and later. In addition, our Medicaid mobile app is Android and iOS compatible.

One example of our technology being interoperable with tools our members are already using is My Wellness Guide, explained above. Many of our members already use activity trackers (e.g., Fitbit, Jawbone, etc.). My Wellness Guide uses information from these trackers or from member smartphones. Users without such devices can also choose to manually enter information. The platform analyzes this data and delivers actionable insights, such as how activity level affects calories burned. The insights help the user to be more aware of their habits. Going a step beyond awareness, My Wellness Guide offers several tools to help members use health information to form and maintain healthy habits.

Video Brochure

We also understand that not all members have internet access or a smartphone or tablet, and we believe technology can be useful in reaching beyond internet access. We are piloting an innovative approach to engage hard to reach members in Virginia, and will bring it to Florida if we find it successful. This new outreach approach makes use of an interactive, video-based brochure that will leverage an unconventional social media format to engage members who are candidates for complex care management. Upon opening the brochure, an approachable, easy-to-understand animated video will launch automatically and provide members with information about their available benefits and services. This includes benefits such as transportation and community-based resources such as food and housing that can help them in times of need and an overview of how Case Managers can help members with personalized contact information to reach the member's assigned Case Manager. We will pilot this new approach for members aged 20-40 who have been nonresponsive to more traditional outreach mechanisms and will track the number of members who engage with their Case Managers, as well as any uptick in claims activity to evaluate additional implementation and expansion of this approach.

4. PROVIDING ROUTINE PERFORMANCE DATA TO SUPPORT ENROLLEE USAGE TRENDS

The digital revolution brings unprecedented opportunities to leverage utilization data to improve existing tools, develop new tools, and even to gather data on member concerns by tracking the inquiries and questions related to both health conditions and their experience with the plan and providers. The innovative tools in our pipeline are being designed to make the best use of this data in the interest of improving health and outcomes for our members and contributing to the drive for quality that permeates every interaction at every level of our work with members and providers.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

As a part of our commitment to data driven performance and outcomes, we have a dedicated team that gathers, analyzes, and trends performance data related to our overall member engagement goals and to each engagement strategy. We gather qualitative and quantitative data related to member engagement with our website, our Facebook page, My Wellness Guide, My Health Teams, our subcontractor's pharmacy application, email, texting, and all other strategies. We identify trends that affect how we communicate with members. For example, we are seeing steady growth in members' use of mobile technology to access health plan information. Our most recent data about how members access our website indicates that nearly half – 45 percent – use a mobile device. This is a significant change compared to two years ago, when less than a third (29 percent) used a mobile device. In addition to the ongoing monitoring that takes place in our national information technology department, for this contract we will hire a dedicated staff person in Florida to monitor the Facebook page and other social media interfaces, and to make sure that the specific needs of Florida members are reflected in the innovation pipeline.

Through enhanced reporting and ad hoc reports, we analyze engagement data and comparable data related to health literacy and health outcomes to identify engagement methods that appear to affect our progress in achieving health outcome goals. We plan to implement a strategy of our affiliate plans to track and trend a variety of measures to determine the impact of member engagement initiatives related to health literacy. For example, they monitor: 1) change in the rate of ER use to gauge understanding of how to access primary care for non-emergent needs; 2) the ability to increase HEDIS® rates for measures because of initiatives implemented; and 3) related measures of member experience, such as communication, using an annual survey. Based on the results of these and similar measures, they continue to refine our efforts to help members be better health care consumers. We will leverage our affiliates' experience to monitor change and improvement in HEDIS® measures for our Florida members.

In addition, the vendor for the My Wellness Guide program has offered even more assistance on interpreting data and helping to drive engagement. They will share information and results collected by the My Wellness Guide tools as well as plans for improvement of outreach and adoption and will present this information to the Health Plan and, if so desired, the state every six months.

We are encouraged by the results of our technological innovations to date, and excited about the potential for even greater member engagement, improved health literacy, and better outcomes that are promised by the innovations in our pipeline, especially for the HIV/AIDS population.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent described how these technology investments will be used to improve health literacy and promote improved health outcomes.
2. The extent to which the respondent provides data that supports the efficacy of the proposed approach in achieving the intended goals/health outcomes (e.g., increase in appointment compliance) for the target population.
3. The extent to which the respondent describes how social media, texting and smartphone app(s) will be mobile friendly and made available on all operating systems (iOS, Android, Windows, etc.) and interoperable with other technologies currently used by the Medicaid population (e.g., Lifeline).
4. The extent to which the respondent is able to provide routine performance data to support enrollee usage trends.

Score: This section is worth a maximum of 20 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 14 – CAHPS Results (Statewide):

The Respondent (including respondents' parent, affiliate(s), or subsidiary(ies)) shall include in table format, the target population (TANF, ABD, dual eligible) and the respondent's results for the Consumer Assessment of Healthcare Providers and Systems (CAHPS) items/composites specified below for the 2017 survey for its adult and child populations for the respondent's three (3) largest Medicaid Contracts (as measured by number of enrollees). If the Respondent does not have Medicaid CAHPS results for at least three (3) states, the respondent shall provide commercial CAHPS results for the respondent's largest Contracts. If the Respondent has Florida Medicaid CAHPS results, it shall include the Florida Medicaid experience as one (1) of three (3) states reported. Respondents shall provide the data requested in **Exhibit A-4-a-4**, Standard CAHPS Measurement Tool, to provide results for the following CAHPS items/composites:

- a. Health Plan Rating;
- b. Health Care Rating;
- c. Getting Needed Care (composite);
- d. Getting Care Quickly (composite); and
- e. Getting Help for Customer Service (composite).

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Quality is fundamental to everything we do, and Clear Health is committed to listening to our enrollees (members) and incorporating their feedback into improvement activities to support better outcomes and a more positive member experience. We gather information from members through a variety of means including our Member Advisory Committee and Health Education Committee, community events, member grievances and appeals, and member satisfaction surveys.

Clear Health systematically analyzes outcomes data, including member satisfaction data, to identify opportunities to better serve our members. The annual CAHPS® Health Plan survey is a critical tool we use to understand the member perspective relating to interactions with the health care system and the services we provide. It is a national standard for measuring and reporting member experience, and helps us target areas for improvement.

1. CAHPS® SCORES DEMONSTRATE FOCUS ON IMPROVING THE MEMBER EXPERIENCE

Attachment SRC# 14-1: Exhibit A-4-a-4 — Standard CAHPS® Measurement Tool provides the results of our 2017 survey for selected measures. We are providing the results of one of our legacy organizations, Amerigroup, because it is our largest contract in Florida. Our results as Clear Health are even stronger. In 2017, Clear Health exceeded the 90th percentile in 14 measures for adults, including "Rating of Health Plan" and "Rating of Health Care".

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Attachment SRC# 14-1: Exhibit A-4-a-4 — Standard CAHPS® Measurement Tool also includes the results of our affiliated health plans in New York and Texas. Health plans in these states represent the largest Medicaid contracts of all our affiliated health plans.

Amerigroup's CAHPS® scores include TANF, ABD, and dual eligible populations. Our affiliated health plan in New York's scores include TANF, ABD, and Medicaid expansion populations. Our affiliated health plan in Texas's scores include TANF, CHIP, and ABD populations.

As Attachment SRC# 14-1 indicates, our legacy health plan, Amerigroup, exceeds the national mean in three out of the five adult measures reported, and two out of the five child measures reported. Our affiliated health plans in New York and Texas demonstrate similar performance in many of the reported measures.

If Clear Health was included in Attachment SRC# 14-1, the scores would exceed the national mean in all five adult measures reported:

- Health Plan Rating – 79.68 percent (above 2016's 75th percentile)
- Health Care Rating – 81.77 percent (above 2016's 90th percentile)
- Getting Needed Care (composite) – 84.15 percent (above 2016's 75th percentile)
- Getting Care Quickly (composite) – 87.33 percent (above 2016's 90th percentile)
- Getting Help for Customer Service (composite) – 90.58 percent (above 2016's 75th percentile)

1.1. Focus on CAHPS® and Other Member Satisfaction Data Improves Member Experience

Clear Health uses the CAHPS® survey to assess member experience in Florida, helping us listen first and then develop targeted improvement plans. We use an Agency-approved, NCQA-certified vendor to administer the Health Plan survey annually. This vendor follows current HEDIS® protocols and Agency-specific requirements, including alternate survey specifications, applicable supplemental item sets, and Agency-defined survey items. Our vendor employs both a mail and telephone survey process with multiple reminders to maximize response rates.

In accordance with Contract requirements, we submit results of our CAHPS® survey to the Agency each year. If there are any deficiencies identified by the Agency, we will develop an action plan to address them. Since we started conducting CAHPS® surveys in 2015, the Agency has not identified any deficiencies; however, our Member Satisfaction Workgroup meets to proactively create action plans for any measure falling below the NCQA's Quality Compass 50th percentile. Past action plans have resulted in the development of tips for members to improve communications with providers, reformatting our provider directory to make it easier to locate urgent care facilities as well as providers offering evening and weekend hours, and working with Primary Care Providers (PCPs) to identify and outreach to specialists who are difficult to schedule appointments with to improve access for our members.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We incorporate CAHPS® results into our Quality Management (QM) program, and regularly use the results to enhance member touchpoints. Our QM team is responsible for obtaining member satisfaction data and implementing necessary improvements. Once identified, any CAHPS® related or other member satisfaction improvement activities will be incorporated into our annual QM work plan, assigned staff, and monitored to completion. Typically, a cross-departmental team supports the project providing a range of functional expertise.

Quality is fundamental to everything we do, and we are always looking for innovative ways to capture data to evaluate our performance on a continuous basis. For example, we ask our Member Services line callers to rate their satisfaction, and administer an automated follow up survey to a random sample of callers, with the goal of identifying new opportunities to streamline processes and enhance the member experience. We adopted this best practice from one of our legacy organizations, Amerigroup, to provide additional attention to all facets of our interactions with members. By continuously compiling member satisfaction data, we can proactively identify and address opportunities for improvement before waiting for the release of annual CAHPS® data.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent exceeded the national Medicaid mean for each CAHPS survey item/component reported.

Score: This section is worth a maximum of 20 raw points as described below.

Exhibit A-4-a-4, Standard CAHPS Measurement Tool, provides for thirty (30) opportunities for a respondent to report prior experience in providing desirable experiences with health care (five (5) measures, three (3) states each, adult population for each, and child population for each). For each of the five (5) measures, a total of six (6) points are available.

The respondent will be awarded 1 point if their reported plan rate exceeded the national Medicaid mean, for each available state, for adults and for children, respectively. An aggregate score will be calculated and respondents will receive a final score of 0 through 20 corresponding to the number and percentage of points received out of the total available points. For example, if a respondent receives 100% of the available 30 points, the final score will be 20 points (100%). If a respondent receives 27 (90%) of the available 30 points, the final score will be 18 points (90%). If a respondent receives 3 (10%) of the available 30 points, the final score will be 2 points (10%).

EXHIBIT A-4-a-4
SRC#14 - STANDARD CAHPS MEASUREMENT TOOL

INSTRUCTIONS:

Respondents should provide results for the Consumer Assessment of Healthcare Providers and Systems (CAHPS) items/composites specified below for the 2017 survey for its adult and child populations for the respondent's three (3) largest Medicaid contracts (as measured by number of enrollees).

If the respondent does not have Medicaid CAHPS results for at least three (3) states, the respondent shall provide commercial CAHPS results for the respondent's largest Contracts. If the respondent has Florida Medicaid CAHPS results, it shall include the Florida Medicaid experience as one (1) of three (3) states reported.

The CAHPS items/composites that the respondent is required to report on are located in the CAHPS Results tab.

Use the drop-down box to select the state for which you are reporting and enter the CAHPS results (to the hundredths place, or XX.XX) for that state's Medicaid population for the 2017 survey.

EXHIBIT A-4-a-4

GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

D. PROVIDER EXPERIENCE

SRC# 15 – Provider Engagement Model (Statewide):

The respondent shall describe in detail its provider engagement model. The respondent shall include the following elements in its description, at a minimum:

- a. The respondent's staff that play a role in provider engagement;
- b. The presence of local provider field representatives and their role;
- c. The mechanism to track interactions with providers (electronic, physical and telephonic);
- d. How the respondent collects and analyzes utilization data and provider feedback, including complaints received, to identify specific training needs;
- e. The metrics used to measure the overall satisfaction of network providers with the respondent; and
- f. The approach and frequency of provider training on respondent and Agency requirements.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

As Florida's largest HIV/AIDS specialty plan, Clear Health has extensive experience and qualifications in contracting and servicing networks designed to meet the special needs of this population. We recognize that to develop and maintain a high quality network to serve the HIV/AIDS Medicaid population, our company must have the respect and trust of the community. We know from experience that an integrated, high-touch provider engagement model is one of the most important contributing factors to our success. Everyone at Clear Health is responsible for interacting with providers in a way that drives superior results and outcomes. All areas within our organization (such as executive leadership, member services, utilization management, case management, pharmacy, claims, quality management, HEDIS®, and medical economics) work with providers to make sure they have the information, tools, and ongoing support necessary to achieve the best outcomes for our members and reduce providers' administrative burden. Across Florida, we support providers with timely communications, effective and informative one-on-one training, user-friendly technical assistance, actionable data and analytical support, and proactive issue resolution to foster continuous improvement and high-quality care.

1. PLAN LEADERSHIP INVOLVEMENT IN PROVIDER ENGAGEMENT

Clear Health's leadership team is fully engaged with network providers. Our leadership team has a combined 105 years of experience serving the Florida Medicaid community. Our collaborative provider engagement model transforms health care delivery, creates an integrated system of care, and drives improved access and health outcomes for our enrollees (members). We understand that local collaboration and engagement is essential to meet the challenges of improving health care for low-income and underserved individuals.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our leadership team drives our provider engagement approach and sets the tone for the rest of the organization. Our local and innovative approach, focused on supporting providers' growth capabilities and capacity to optimize member outcomes, allows us to leverage our local presence to develop and refine strategies that address our members' needs.

We spend a significant amount of time and resources building and maintaining a high performing network driven by our understanding that a network of high quality providers is key to improved member outcomes, positive member experience, and appropriate utilization of services. We have designed our engagement model to move providers along the value-based continuum, providing support to advance them through the array of value based services.

Our approach to provider engagement has changed the dynamics of traditional provider/health plan relationships by developing lasting provider partnerships. Leadership seeks out provider feedback and responds rapidly to improve both our network and internal processes. We support our high-performing network with value-based payment agreements that tie in both risk and rewards to performance. Our provider engagement model supports increased high quality scores, improved member outcomes, and solid consistent performance.

We have developed a provider recruitment strategy and message of inclusivity and collaboration and actively provided education and support for the providers who serve our population. Clear Health has built an extensive HIV/AIDS Medicaid network in Florida, establishing close relationships with PCPs, specialists, county health departments, federally qualified health centers (FQHCs), rural health clinics (RHC), and teaching institutions. We have been able to induce PCPs and specialists in infectious disease, cardiology, dermatology, rheumatology, gastroenterology, and endocrinology who have experience in treating patients with HIV disease to become Medicaid providers and contract with us.

We provide an enhanced level of support to our red ribbon providers. These are providers with specialized HIV/AIDS training designated by including a red ribbon beside their name in our provider directory, informing members of the provider's additional specialized HIV/AIDS care and treatment competency. Our red ribbon program is nationally recognized and is a testament to our patient-centered model of service and support.

Our regionally based Provider Network Managers live and work in their local communities and have developed strong relationships with providers in each region. Our local and innovative approach, focused on supporting providers' growth capabilities and capacity to optimize member outcomes allows us to leverage our local presence to develop and refine strategies that address our members' needs. Our Provider Network Managers have extensive experience and expertise meeting the needs of providers servicing members with HIV/AIDS due to our experience across Florida. Our Provider Network Managers in Regions 1,2,3,8, and 9 focus solely on meeting the needs of Clear Health providers.

Our Provider Network Managers are in the community meeting face-to-face with providers. They collaborate with our Pharmacy and Care Management teams and make joint visits to providers. We support providers with actionable data (gaps in care reporting, HEDIS® care alerts, pharmacy utilization, lab results, and more to help identify and address barriers to accessing care and services) they can use immediately to make sure members are getting the right care, at the right time, and in the right place. This provider engagement model supports increased high quality scores, improved member outcomes, and solid performance.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Members of the leadership team are fully engaged with network providers, as described below.

President and Chief Executive Officer

Lourdes T. Rivas, Simply's President and Chief Executive Officer, drives our overall network development and provider engagement approach, instilling in the organization the understanding that our ability to serve our members well is contingent on development and maintenance of a stable, satisfied, high-functioning provider network. She establishes community outreach; oversees coordination of mutual projects with physicians, hospital administrations, and other health care administrators; and maintains relationships with potential network providers. Ms. Rivas is involved in major negotiations with larger groups, finalizing capitation, establishing risk parameters, and setting overall contract requirements. She approves all subcontractor negotiations and meets with Provider Relations leadership to discuss subcontractor services, specific contract terms, compliance standards, and performance metrics.

Chief Medical Officer

Vincent Pantone, MD, Simply's Chief Medical Officer (CMO) leads Simply's Medical Advisory Committee. Network providers participate on this committee, support medical policy and guideline approval, and also help to identify issues and opportunities to improve plan performance and ease of use for members and providers. He participates in Joint Operating Committees (JOCs) that involve larger groups, educating them about the different support teams in our Utilization Management department (case management, disease management, concurrent review, and precertification).

Dr. Pantone provides one-on-one collaboration with any provider managing a challenging member. He works to assure that we align plan case management efforts and benefit deployment to mitigate challenges in member management and case management. He also visits providers in the field, offering guidance on referral patterns, medication management, proper place of service, and utilization management techniques. Dr. Pantone supports the Medical Management staff in delivering timely and consistent responses to members and providers, and identifies and develops opportunities for innovation to increase both quality and effectiveness. He also leads the credentialing process, assuring fair assessments of providers and also making sure only high-quality providers join the network.

Regional Vice President, Provider Solutions

Efrain Duarte, Regional Vice President of Provider Solutions, serves as a mentor for the provider practice guiding them to improve member access to care, improve quality of care, and focus on the proper utilization of resources. Mr. Duarte is a medical school graduate, giving him a unique understanding of medical practice and how to best meet provider needs. As a former Director of our Medical Economics department, he regularly provides support to our providers regarding trends on prescription management, utilization management practices, and data analysis and use. He is involved in all large group negotiations and implementation processes. Mr. Duarte approves all vendor, PCP, and Specialty contracts. He is responsible for the proper implementation of all contracts and visits providers on a regular basis.

President Medicare East Region

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Tomas Orozco, President Medicare East Region, leads our Medicare team and has been instrumental in implementing our network sculpting strategy for Medicaid. Mr. Orozco brings more than 25 years of leadership experience in provider relations. Mr. Duarte and Mr. Orozco collaborate across Medicaid and Medicare to make sure that each line of business uses the best possible provider network. This collaboration has resulted in several Medicare providers who have invested heavily in their infrastructure opening their practices to Medicaid

Staff Vice President of Pharmacy

Dr. Alex Borges, Simply's Staff Vice President of Pharmacy, designed and currently manages our Pharmacy Provider Engagement program. Its goal is to provide an effective means to deliver important clinical information to our network prescribers, with the primary intention of facilitating sound clinical decision-making that translates into the delivery of the highest quality medical care. Under the leadership of Dr. Borges, the program provides an interactive clinical detailing platform, leveraging four clinical pharmacists who meet regularly with network physicians one-on-one to educate, inform, review medication prescribing patterns, and communicate best clinical practice guidelines. This clinician-based delivery model provides network providers with real-time utilization metrics, comparative performance measures, educational materials, and additional critical information in a format that promotes quality based and medically appropriate clinical decision-making. The use of clinician-based detailing has proven most effective in communicating Simply's message to providers.

Chief Operating Officer

Suzanna B. Roberts, Simply's COO, participates in new provider meetings to coordinate loading the fee schedule, claims payment testing, as well as coordination with our Provider Services line, audit and recovery, Technology Services, and other departments. She listens to providers and assists in developing creative ways to help reduce their administrative burden. Ms. Roberts is involved with large groups and subcontractors when there are payment issues or for coordination of large credentialing files. She also participates in hospital JOCs.

Chief Financial Officer

Holly Prince, Simply's Regional Vice President of Finance, works with financial and operational leadership to resolve issues and provide guidance on financial issues. She supports the market by meeting regularly with providers to discuss opportunities for improvement. She helps identify high-risk members to support providers by engaging case or disease management as needed. Ms. Prince oversees the local Medical Economics department that prepares reconciliations and reports for providers in our value-based purchasing (VBP) programs (both standard monthly reports and ad hoc reports as needed). Medical Economics also prepares and monitors reports on potentially preventable events and provider-level encounter dashboard reports that support interventions.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Quality Management Director

Lila Labarces, Simply's Quality Management Director, works with providers to assure satisfaction with the quality management process. Ms. Labarces personally trains providers in their offices and is readily available to help them by email or phone. She developed tools to help providers better meet outcomes, including the Early and Period Screening, Diagnosis and Treatment (EPSDT) Coding tool and HEDIS® descriptions and coding tool. She makes sure that both the HEDIS® and medical record review processes are organized to reduce providers' administrative burden. She actively participates in the medical record review process, quality of care concerns, and risk management activities. Ms. Labarces actively participates in the Medical Advisory and Peer Review committees.

2. INCORPORATING LOCAL PROVIDER REPRESENTATIVES INTO THE MODEL

2.1. Florida Provider Relations Team

In addition to Efrain Duarte, our Provider Relations leadership team includes six directors with a combined 120 years of experience. We assign Directors who live in the regions and they provide leadership at the local level. They engage providers, listen to their feedback, and work with our Provider Relations team to implement changes that improve our network. They oversee orientation, ongoing training, and quality performance improvement initiatives. They also serve as a resource to providers when they encounter challenges. Directors monitor the training of and provide ongoing support to Provider Network Managers to make sure they are offering accurate, actionable data and information.

Our Regional Vice President of Provider Solutions and Provider Relations Directors engage with providers on a regular basis utilizing JOCs, face-to-face visits to provider offices, phone, email, and webinars to deliver an open access model. The Provider Relations leadership team also participates in monthly meetings with hospitals and large groups to discuss quality and performance metrics. Our Provider Network Manager serves as a coordinator between us and the provider, managing meetings and education with different departments such as Quality, Pharmacy, HEDIS®, Case Management, and other provider support teams. Additionally, regional Provider Relations team leadership is directly involved in the training and education of each Provider Network Manager.

Under the new Contract, our Provider Relations department will increase to 68 employees as we anticipate adding an additional seven Provider Network Managers to our team. To allow for increased contact with and support for our providers, we are adding seven Network Provider Managers to our team who will be distributed throughout the state, providing more accessibility to Clear Health. Our proposed ratio of Provider Network Managers for the new Contract will be 1:157.

Florida-based Provider Relations staffing under the new Contract will include:

- One Vice President
- Six Directors
- Forty-five Provider Network Managers (an addition of seven)
- One Provider Relations Manager
- One Project Manager

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Four Network Management Representatives
- One Data Analyst
- One HEDIS® Lead
- Two Hospital Representatives
- Five Business Development Leads
- One Administrative Assistant

We recently created a new role to focus on identifying and working with providers new to managed care. Business Development Leads are located regionally throughout Florida. Complementing the work performed by our Provider Network Managers, Business Development Leads listen and respond to the specific needs of providers new to managed care, providing targeted training, and expediting issue resolution. They also work with more experienced providers, introducing them to our value-based purchasing (VBP) programs. In addition, they introduce the opportunity of adding Medicaid to providers with Medicare portfolios and support them through the onboarding process. One unique group of people that are also part of the provider network team are Clear Health's OB Practice Consultants who supplement the work of the Provider Network Managers related to OB/GYN collaboration and performance and provide support to providers in improving prenatal care and birth outcomes. We advocate for healthy deliveries through provider and stakeholder collaborations, innovative payment models, and performance-based incentives. Provider education and collaboration efforts are enhanced by OB Practice Consultants, Registered Nurses who meet regularly with provider partners to build and maintain a coordinated approach to caring for women before, during, and after pregnancy. We will continue to enhance our program, with a focus on safe deliveries, Neonatal Intensive Care Unit (NICU) support, social determinants of health, and using member engagement technologies.

We maintain four offices across Florida to support our regionally based Provider Relations team. Provider Network Managers are locally based, meeting face-to-face with providers to build trust and open communication while promoting collaborative relationships. They have a deep knowledge of their local communities and providers there. During face-to-face visits, Provider Network Managers support PCPs with actionable information about the care their patients are receiving, including information related to pharmacy, quality, HEDIS®, inpatient admissions, specialty utilization, medication alternatives, and interactions. Our ongoing partnership with network providers results in high quality scores, improved member outcomes, and solid health plan performance.

We will continue to maintain regionally based Provider Relations teams exclusively dedicated to Medicaid and Medicare Provider Relations functions. These functions include establishing and maintaining effective communications with existing and potential network providers to improve quality and cost effectiveness of care; and conducting ongoing provider education, training, and outreach aimed at improving providers' ability to increase quality of life and health outcomes for members. Provider Network Managers serve all lines of business, providing them with a uniquely broad view of the Florida health care landscape.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

**** TESTIMONIAL: Dr. Camejo Primary Care**

I just wanted to take a moment to express gratitude to your organization for your well-developed insurance plan on behalf of Dr. Camejo Primary Care. My office staff has had no problems with ease of access to customer service and/or resolution of any issues that may arise with eligibility and benefits or referrals and authorizations. It has been a pleasure working with Simply on all levels. We will continue to recommend Simply and hope to continue our business relationship for more years to come. — Jennifer Denni, Office Manager, Dr. Camejo Primary Care ******

2.2. Provider Network Managers

Across Florida, Provider Network Managers collaborate with network providers and support them with timely communications, effective and informative one-on-one training, user-friendly technical assistance, actionable data, and proactive issue resolution to foster continuous improvement and high-quality care. Our regionally based Provider Network Managers are located in communities throughout the state. They know their communities and have strong relationship with local providers.

Each Provider Network Manager has assigned providers that they meet with monthly to share information and provide support and technical assistance. Provider Network Managers serve all lines of business, providing them with a uniquely broad view of the Florida health care landscape.

Provider Network Managers offer targeted support to providers regardless of how comfortable they are with managed care. They work alongside those who are rendering care for our members, committed to the ongoing success of our network providers. They also work to contract any specialists not in our network that a PCP recommends or has member referral patterns.

Provider Network Managers understand their providers' challenges and offer ongoing support to help them improve the effectiveness and efficiencies of their practices. By analyzing quality metrics, utilization trends, and reports of missed care opportunities, Provider Network Managers help providers implement case management and create action plans. Action plans help improve cost, quality, performance, and their patient's experience, while encouraging them to adopt practice management strategies that have proven effective for top-performing peers. They collaborate with providers to analyze quality metrics and reports for care opportunities and help design, develop, and implement community learning forums.

Each Provider Network Manager has assigned providers that they meet with monthly to share information. Provider Network Managers conduct an average 16-24 visits per week, during which they provide quality and performance metrics. Our Provider Network Managers receive ongoing training from our internal subject matter experts in Finance, Claims, Quality Management, Utilization Management, Case Management, and other areas assuring they are well-informed resources for providers.

We adapt our approach to meet the unique needs of each provider, regardless of where they are on the care management continuum. In addition to providers having online access to actionable data, Provider Network Managers hand deliver reports and review data during monthly visits. This is one way we assure that all providers not only have the data they need but they also understand how to use it to improve member outcomes. Provider Network Managers provide ongoing support to providers, work to add them into a VBP program, with the goal to maximize their overall performance.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2.2.1. Facilitating Integration Efforts

Many of our members have behavioral health (BH) co-morbidities in addition to HIV/AIDS and other medical conditions. Thirty-one percent of Clear Health members have a diagnosed mental illness, with mood disorders, anxiety, dissociative and other nonpsychotic mental disorders, and schizophrenia and other psychotic disorders accounting for the majority of diagnoses. In addition, 37 percent of members have an addiction disorder, including smoking and alcohol. Approximately seven percent of our members have personal histories of substance use disorder (SUD). Given this high burden of mental illness and the known impacts of co-morbid physical health (PH) and BH conditions on the cost of care and the outcomes, we prioritize effective integration of BH and primary care for our members. We work hard to assure proactive information sharing across settings.

Clear Health has long supported state integration efforts using a system of care approach that integrates PH, BH, and substance use treatment, pharmacy benefits and social supports. Our goal is to support the delivery of more individualized, person-centered care to achieve better health outcomes.

We focus on opportunities to integrate PH, BH, and pharmacy service provision across the system of care by increasing acute care provider knowledge of health-related topics. Topics include depression and substance abuse screening and increasing BH provider knowledge of health-related topics such as co-occurring PH conditions and preventive screenings.

Our Provider Network Managers partner with our Case Managers (Managed Care Coordinators) to enhance integrated care for our high-risk members by filling the traditional information void – we proactively communicate with and engage primary care, medical specialty, obstetrics, BH providers, home and community based service providers as well as all types of inpatient facilities, to promote our member's care and goals. Provider Network Managers often reach out to Managed Care Coordinators, BH, Quality, Medical Economics and other areas to accompany them on monthly provider visits. Our integrated team approach is responsive to our providers needs while focusing on improved member outcomes. We partner with providers to innovative and build incentive programs that reward providers for improvements integration of BH and PH at the practice level.

2.3. Provider Services Line

In addition to our regionally based Provider Relations teams, we support our providers through our Provider Services line. It is available toll-free for questions, concerns, and assistance with billing issues, covered services, pharmacy support, and other inquiries. Customer Care Representatives are available to assist providers Monday through Friday from 8 a.m. to 7 p.m. They answer questions, provide information and guidance, and serve as a resource and support to ongoing provider training initiatives. Providers can reach us 24/7 for prior authorization requests.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Customer Care Representatives can also help providers register and access information on our secure provider portal. Providers can call the toll-free line, access our provider portal, or speak with our clinical team 24/7 to verify eligibility for members with urgent or emergent conditions and request authorizations. Year to date 2017 (as of August) our Provider Services line answered more than 222,700 calls with an abandonment rate of less than one percent and an average speed of answer of 20.5 seconds.

Our integrated desktop technology provides rapid access to information and displays all data related to member benefits, assigned PCP, service utilization and claims history, enrollment, authorizations, and other health insurance coverage. The Provider Services line also communicates with the provider's assigned Provider Network Manager if there is an urgent need that requires follow-up. Provider Relations maintains a SharePoint site that serves as an organization-wide communication vehicle. We log and track each inquiry to assure an appropriate response to each request. Requests are trended and identified issues inform ongoing training activities and improvement initiatives.

2.4. Clear Health's Comprehensive Network Management Strategy

Our network management strategy, with a focus on reducing administrative burden and allowing providers more time to take care of our members, includes the following:

- Assistance for providers at the point of care by offering actionable information using a variety of delivery methods to help manage members' care. Actionable information includes alerting providers to care gaps through online clinical alerts; providing periodic gaps in care reports for their assigned members (report frequency is monthly; providers in a VBP program have online access 24/7 to updated information); and providing access to our provider-facing Case Management System that displays HEDIS® care alerts, prescriptions, lab results, and more to help identify and address barriers to accessing care and services.
- Practices to simplify and minimize administrative burden, including technology solutions such as online claims and prior authorization submission. For example, our quick authorization form enables referrals to a specialist without requiring an authorization. It also enables the specialist to provide care in a timely manner in the lowest cost setting without any additional administrative work. In addition, our web portal features an online tool that provides guidance on which CPT codes require authorization.
- Ongoing collaboration with providers to improve member outcomes. Because we are committed to incorporating our providers in on-going improvement efforts, our network providers serve on a variety of committees that craft policies that improve the efficient delivery of care to our members. We support and empower providers in our network with access to timely data, ongoing education, and access to referrals to a robust network of facilities and specialists. Continued growth of our VBP programs promotes collaboration with providers and enhances member quality outcomes. This proven model assures ongoing provider communication and collaboration.
- Technical assistance to help providers succeed, such as proactively contacting providers if we identify possible submission errors through ongoing claims review. We provide face-to-face and telephonic technical assistance to providers so they can get the help they need where they need it.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Proactive education delivered by a team of professionals focused on Medicaid that addresses the specific needs of providers.
- Sound reimbursement practices and innovative incentive programs that reward providers for improvements in quality measures, leading to improved outcomes and integration of BH and PH at the practice level. We focus our programs on improving quality of care while supporting providers as they deliver the most cost-effective care. Our programs such as the MMA Physician Incentive Program (MPIP) and other value-based payment programs deliver enhanced payments to providers who achieve better outcomes based on recognized criteria from NCQA and medical guidelines. We believe that delivering high-quality care and increasing member access to primary care services should drive value to providers.
- Educating PCPs on identifying members with BH needs, including our Primary Care Integrated Screening, Identification, Treatment, and Evaluation (PC-INSITE) program and Screening, Brief Intervention, and Referral to Treatment (SBIRT).

We will continue working to improve member outcomes through a combination of focused face-to-face provider interventions and innovative technology solutions. While we will continue to comply with time and distance requirements, our contracting strategy is to deliver a network that supports PCPs and provides our members with options when seeking specialty care. Our Provider Network Managers target continued growth of our specialty network in every region resulting in our exceeding requirements in most regions where provider specialists are available.

3. TRACKING INTERACTIONS WITH PROVIDERS TO PRODUCE MEANINGFUL DATA TO ADDRESS BOTH CLINICAL AND ADMINISTRATIVE PROBLEM AREAS

Our Provider Relations team uses a field visit form to note any issues or requests providers bring up during face-to-face office visits, documenting clinical and administrative problem areas. We enter information about each provider visit into Salesforce, where we track this information and use it to inform our provider engagement strategy and network development plan. We maintain information about each provider in our network in our internal provider database, Salesforce.

The Salesforce database maintains administrative information, identifies and tracks staff field visits and engagement as well as clinical issues, remediation activities, follow-up activities scheduled, and outcomes. Our Provider Relations staff document and track all activity, including quality of care concerns, in Salesforce to trend occurrences and use in re-credentialing activities. Salesforce contains current and historic data per provider and provider type. Management pulls reports monthly or as frequently as needed to monitor field visit activity and the quality of our management of the network. This allows us to identify and respond to trends in a timely manner. In addition, the Gap committee analyzes this information and uses it to inform ongoing network development plan. We analyze trends in letters of agreement (LOAs) and single case agreements at Quality Management Committee meetings and, with the input of Utilization Management and other departments, new contracting targets are developed.

Clear Health uses data from multiple sources to continuously improve our support for our members and our providers. Our Quality Management (QM) department collects, analyzes, and monitors data from member satisfaction surveys, provider satisfaction surveys, timely access (including after-hours) surveys, and member and provider complaints. We share results with Provider Relations, Member Services, and other departments as needed through a formal

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

committee process. The QM team presents results its analysis to the QM committee to assure all departments are aware of opportunities for improvement and are engaged in the development of action plans to address them. Action plans vary widely, based on the nature of the identified issue. An action plan may include addressing internal workflow processes or it might indicate a need for network-wide provider training. We immediately route any feedback about access to our Provider Relations department for investigation and follow-up.

QM works closely with Provider Relations in the investigation of potential quality of care concerns. Provider Relations is informed of any issues identified including bedside manner exhibited by the provider or staff, recurrence of complaints, or the need for further education. Provider Relations and Quality Management also collaborate in obtaining medical records from providers when necessary.

We have a history of soliciting and incorporating provider feedback into our operations. For example, providers requested that our Care Management team provide them with access to more information about their patients. In response, PCPs are now provided a copy of all member plans of care (PCPs only receive BH or SUD information if the member has signed a release) and are asked to provide feedback or acknowledgement as part of a team approach to member care, referred to as our multi-disciplinary team (MDT) approach.

We regularly meet with large provider groups in MDT meetings to review difficult cases, and providers are welcome to request an MDT meeting when they want to collaborate in member care improvement strategies. Our provider satisfaction survey includes questions related to our Case Management and Disease Management (DM) departments. We also gather feedback from providers during the Joint Operating Committee (JOC), which includes the group, the Provider Network Manager, and Health Plan leadership.

**** TESTIMONIAL: Florida Family Primary Care Center Praises Working Relationship**
Florida Family Primary Care Center has a great working relationship with Simply Healthcare. We share the common goal of providing excellent care to our members/patients. And we work together well in this endeavor. We are all busy and don't often take the time to offer recognition. So we just wanted to take a moment to let you know that we appreciate our relationship with Simply Healthcare, and to thank your team for your ongoing support. — Emilio J. Monte, Chief Financial Officer, Florida Family Primary Care Center, LLC ******

3.1. Provider Pharmacy Engagement Program

Our Provider Pharmacy Engagement program uses data to support performance improvement. The program is part of our Integrated Pharmacy Services Model. Clinical Pharmacy detailing complements utilization reviews and involves a focused educational exercise to encourage and assist providers in making medically appropriate and cost-effective clinical decisions. Specialized clinical pharmacists engage providers in a one-on-one.

The goal of this program is to provide an effective means of delivering important clinical information to our network prescribers, and facilitating sound clinical decision making that will translate into the delivery of the highest quality medical care. The Pharmacy Provider Engagement Program provides an interactive clinical detailing platform that includes a dedicated clinical pharmacist who meets regularly with network physicians at their offices or via web conference. Meetings are conducted on a "one-on-one" basis, to educate, inform, review

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

medication prescribing patterns, and communicate best clinical practice guidelines. They provide real-time utilization metrics, comparative performance measures, and educational materials focusing on cost-effectiveness and quality.

We understand that providers face multiple challenges including:

- Increasing complexity of drug lists and networks making it difficult to understand pharmacy benefits
- Difficulty understanding the cost of prescriptions and the availability of lower-cost alternatives
- Multiple insurers, multiple provider interfaces, and portals
- Barriers to filling a prescription, such as narrow networks and prior authorization requirements
- Coordination among other prescribers and specialists (who is prescribing what), making it difficult to understand pharmacy benefits

The Provider Pharmacy Engagement program helps providers mitigate the challenges described above with real-time member utilization data and actionable interventions. The program assists providers in selecting medically appropriate and cost-effective medications. We provide meaningful and actionable interventions by identifying brand to generic conversions opportunities; formulation optimization opportunities; member polypharmacy issues; high-risk medication utilization; and instances of non-adherence or therapeutic duplication. Our program also benefits providers by closing the physician drug pricing knowledge gap (Daraprim, Hep C); educating them on market drug pricing; offering therapeutic class comparisons; providing insight to full member medication history and prescriptions written by other prescribers; providing timely reporting and utilization data to providers on the front-line; and offsetting the persuasive marketing strategies of pharmaceutical manufacturers.

The Provider Pharmacy Engagement program involves extensive data analysis as well as face-to-face meetings between our clinical pharmacists and providers within our network. The program has been responsible for a combined 75 percent reduction in the incidence of polypharmacy over the past two years in two cohorts which have been consistently monitored for incidence of polypharmacy.

The Provider Pharmacy Engagement program includes analysis of monthly claims to identify outliers and intervention for non-responders, and the selection of therapeutic areas of concern; development of group and one-on-one educational materials for the therapeutic area of concern; on a monthly or quarterly basis, a health plan clinical pharmacist meets one-on-one with identified network providers; presenting report analysis, educational materials, and a list of targeted interventions; providing member medication history and metric performance reviews; analyzing data to report anticipated quality improvements and cost savings as a result of intervention activity; and recording follow-up items.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

The Provider Pharmacy Engagement program provides a suite of standard reports to providers including full member panel utilization; monthly drug spend; polypharmacy; high-risk adherence medications; and cost-effective therapeutic alternatives. Ad hoc reports are available as needed and may include medication cost guides, high-cost member profiles, prior authorization metrics, high-cost therapeutic areas, and specialist prescribers.

4. USING DATA FROM PROVIDER INTERACTIONS TO IDENTIFY TRAINING NEEDS

We view every interaction with a provider as an opportunity to obtain feedback on our performance as a health plan and to gather insights that can help us continue to improve our processes. Providers' input is particularly valuable in helping us identify additional training opportunities that we should offer providers within our network and in helping us identify additions and/or changes needed in our internal training for Provider Relations and provider help line staff.

4.1. Tracking Interactions

Provider Network Managers use Salesforce to track provider visits and interactions. At the end of each visit, we offer providers an opportunity to take a brief survey where they can provide feedback on how well we met their needs. The survey is real-time and is completed via Salesforce. Survey results are shared with the Provider Relations leadership team and used to identify training needs and inform process improvements.

For example, based on provider feedback we heard that information was not being consistently delivered. We have expanded our training opportunities and provide monthly training options for all Provider Relations employees covering a variety of topics including systems, data analysis and interpretation, and various processes and procedures. Provider input is particularly valuable in helping us identify additions and/or changes needed in our internal training for Provider Network Managers and provider help line employees.

Provider Relations leadership is directly involved in the education and training of new Provider Network Managers and monitors their performance once assigned to a market. Experienced Provider Network Managers have the opportunity to receive refresher training during onboarding sessions conducted for employees or via self-paced web-based trainings.

4.2. Onboarding Provider Relations Employees

Training of Provider Relations employees begins well before an individual has contact with a provider. It is important that our Provider Network Managers and other Provider Relations employees have the skills and information necessary to assist our network providers. Clear Health provides all Provider Relations employees with a comprehensive onboarding experience.

Our onboarding program consists of five days of classroom training followed by two weeks of shadowing an experienced employee. The objective of our Provider Relations Onboarding Training program is to provide a foundation of tools, resources, and knowledge to support effective collaboration with providers in our network, keeping focus on the company's values of being accountable, caring, easy to do business with, innovative, and trustworthy. This broad training includes in-depth review of systems, policy and procedures, and regulatory requirements including:

- A day in the life of Provider Relations – tips and strategy

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Cultural competency and sensitivity training
- Specialty specific onboarding
- An introduction to National Provider Relations (NPR) and continuing education offerings
- Credentialing
- Salesforce
- Detailed regional Florida provider community overview
- Provider visit and site assessment requirements
- Comprehensive training in cultural competency, HEDIS®, value based purchasing (VBP) programs, claims payment system, credentialing, reporting including frequent ED usage, inpatient census, financial outcomes, pharmacy generic versus brand name drugs, contract requirements, network adequacy, and fraud, waste, and abuse (FWA).

Education of Provider Network Managers does not end with onboarding. Representatives continue to use information and training resources within the Resource Center Continuing Education curriculum, specific training conducted by Clear Health, additional standalone trainings, job shadowing, and mentorship opportunities.

Provider Customer Care Representatives are trained across all business lines to be a one-stop service to assist providers with services, eligibility, or claims. Beginning with new hire training, we educate Representatives on our member-centered approach to care, best practices, and strategies for engaging callers. Throughout their employment, we provide continuous training, coaching, and supervision that support employees' consistent application of these principles when serving providers in our network. We conduct training in controlled environments with supervision and coaching, followed by evaluation. Our training curriculum covers a variety of topics, including thorough Florida-specific training, enabling them to assist providers with needed information rapidly.

5. USING METRICS TO PRODUCE ACTIONABLE DATA FOR MEASURING PROVIDER SATISFACTION

Our Provider Network Managers will continue to be in the field offering ongoing support to providers, helping them improve the effectiveness and efficiency of their practices. For example, they will analyze quality metrics and reports for care opportunities; help providers implement care coordination. They also create action plans to help improve cost, quality, and the member experience; refer provider to our Clear Health Training Academy for VBP training; and help design, develop, and implement community learning forums.

**** REAL STORY: Sharing Strategies to Improve Provider Performance**

A Provider Network Manager reached out to an assigned provider who presented with low quality and performance metrics. The Provider Network Manager met with the provider monthly to review and track trends for HEDIS® care gaps and performance outliers. Through the ongoing support and consistent access the provider had with the Provider Network Manager, the group was able

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

to drive significant change in their overall performance, moving them on target for quality and performance goals. The Provider Network Manager offered some strategies to help improve performance. These included assuring that all members are aware of extended office hours; establishing each new member so they are familiar with the office; and making sure that all members that come in for a sick visit are given the after-hours service phone number and a list of urgent care facilities near each of the offices. Other strategies included ensuring that the provider's specialist referral patterns are engaged with the PCP's practice in sharing data. The PNM also coordinated visits with a clinical pharmacist to review all pharmacy utilization reports. The group is working with Clear Health now to enter into a VBP agreement. **

5.1. Provider Reports and Data Sharing

Our provider engagement model supports provider data solutions and performance reporting, ongoing provider outreach, and focused support to help providers meet quality and performance targets, measure performance, and implement interventions. We use a suite of data- and information-sharing tools to help providers understand their performance and implement interventions. These tools include both profile reports, which compare a provider's performance to peers and/or established benchmarks, as well as integrated data solutions, member dashboards, and provider scorecards that support our VBP models and help providers improve performance and manage care more effectively.

5.1.1. Reports Provided to all PCPs

We provide actionable performance and utilization data to all PCPs monthly via Financial Recovery Group (FRG) and our secure web portal and FTP site. Examples of the types of data and reporting available to providers on this website include:

- Daily reports such as daily census and daily utilization data
- Financial summary reports such as funding and expense (by month and consolidated), member by PCP, report card summary by PCP
- Facility Utilization reports such as bed days ED admissions, admission frequency, and readmissions data
- Claims reports such as institutional claims detail list, outpatient and ED claim detail list, professional claims detail, including specialty trends
- Member care and engagement opportunity reporting
- Membership reports such as member list summary, member by diagnosis
- Pharmacy detail reports such as prescription detail by member, prescription detail by prescribing physician, prescription detail by script, polypharmacy, and prescription detail by member
- Specialty reports such as claims detail by service provider (facility and non-facility)

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

In addition, each Provider Network Manager is responsible for reviewing monthly reports for their assigned PCPs. They compare current results to the previous month and review the results with the PCP during their monthly visit. These reports include:

- Member Opportunity report – PCPs are encouraged to call the members who participate or have potential to participate in Case Management to be seen in the office at least once a month.
- HEDIS® and Child Health Check-Up (CHCUP) care gaps
- ED Frequency report – PCPs are reminded: to assure members are established within the first 30 days of being assigned; to assure members are aware of extended office hours and know which urgent care facilities are nearby; of the importance of PCPs accommodating sick members into their daily schedules
- PCP summary report – Provider Network Managers use this report to review utilization trends with PCPs

5.1.2. Providers in Shared Savings / Shared Risk Arrangements (non-PQIP)

In addition to the data and reports described above which are available to all providers, providers contracted in our shared savings/ shared risk VBP programs have access FRG, our secure portal via Availity, and/or our secure File Transfer Protocol (FTP) site, where they can pull a variety of reports to meet their data needs. These sites are updated daily and monthly and includes the following data available to providers:

- Monthly capitation report with member detail in excel format
- Daily inpatient census report with member detail in excel format
- Daily roster of membership assigned to PCPs
- Cumulative financial summary of group which includes stop loss and IBNR
- Cumulative report detailing all capitation paid to vendors and PCPs
- Cumulative report detailing all claims paid on behalf of members assigned to the PCPs
- Cumulative report detailing all revenue and major expenses of members assigned to the PCPs
- Cumulative financial summary of PCP which includes stop loss and IBNR

In addition, Provider Network Managers also review the monthly reports for their assigned PCPs contracted in one of our VBP programs:

- PCP Member Medication Detail Report - includes all medications filled by the plan for members assigned to each PCP
- Current Prescription for Adherence Medications Report - provides the name of the medication that needs to be filled for medication adherence compliance
- Medicaid Provider Dashboard (HEDIS® Gap Report) – HEDIS® gap data for members including the compliance score per measure for the provider

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

5.1.3. Providers Enrolled in PQIP

PCMS is a web-based population management application that is available to providers who participate in our PQIP program. PCMS uses alerts, icons, hover-overs, drop-downs, and drill-through functionality to help providers identify actionable, member-specific information that supports their population health management efforts, including member outreach and engagement activities that may affect a provider's performance.

Providers can use PCMS filters to stratify their member populations by key conditions, risk factors, gaps in care, visit history, ED utilization, inpatient admissions, and readmissions. PCMS reports include:

- Attributed Members - identifies the members for whom a practice is responsible for providing primary care (active members) and coordinating care with other providers to make sure member needs are met
- Inactive Members - includes a list of members who are no longer attributed to the selected provider group (members will appear on this report if their attribution ended within the past 12 months)
- Care Opportunities - indicates how many members assigned to the provider have a potential care opportunity within the HEDIS®-like quality measures captured in PCMS (updated monthly based on claims data)
- Care Opportunities By Provider - displays the provider's list of members who have care opportunities
- ED Visits – displays a list of members attributed to the organization who have been to the ED during the past year
- Inpatient Admissions - Includes the list of members who have had at least one inpatient stay during the past 12 months as well as the date of the most recent inpatient stay (based on claims and is updated daily)
- Pharmacy By Therapeutic Class – provides detailed information about drugs dispensed through a retail or mail-order pharmacy for providers' attributed members (providers can use this information to identify opportunities to manage pharmacy-related costs for their assigned members)
- Pharmacy By Provider - displays information regarding the prescriptions written for the provider's assigned member panel, broken down by provider name

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Pharmacy By Member - List of the provider's assigned members who have filled at least one prescription during the previous 12 rolling months (for each member listed, the provider can see the total number of prescriptions as well as the total cost associated with the member's pharmacy claims)
- Pharmacy By Scripts - detailed information about each prescription filled during the past 12 months for all assigned members currently in the provider's panel
- Longitudinal Member Record - within PCMS, providers can launch the longitudinal member record to view additional details about the member (includes data such as claims, utilization, and pharmacy)

5.2. Provider Satisfaction Survey

Clear Health is committed to developing and maintaining a quality improvement program to achieve and sustain measurable improvements in performance for services provided to members and in our relationship with network providers. In addition to the satisfaction survey we ask providers to complete after each face-to-face visit with a Provider Network Manager, we conduct an annual Medicaid Provider Satisfaction Survey. The goals of the annual survey include measuring how well we are meeting providers' expectations as well as assuring compliance with AHCA requirements and the accreditation standards of Clear Health's accrediting body, NCQA.

The survey process includes carrying out an objective and systematic review of activities and systems that assess quality of care and service that meets or exceeds all acceptable prevailing standards. We evaluate provider satisfaction with our communications, services, and procedures and then use the results as part of our continuous quality improvement efforts. The survey assesses provider satisfaction with training and education, communications, provider enrollment, complaints resolution, claims processing and reimbursement, and utilization management processes. Survey information helps us better understand our provider network: its needs, challenges, and opportunities for member-focused, cost-saving innovations.

Simply and our D/B/A Clear Health are focusing on quality by bringing together the best practices and innovative solutions of three Florida health plans that have recently merged to become one entity. We are proud of our provider satisfaction survey scores. Provider satisfaction scores were reported separately for each of the legacy plans comprising the new unified Simply; we are presenting the legacy Simply scores as an example of our Florida provider satisfaction scores. For legacy Simply in 2016, overall satisfaction with the health plan was 100 percent, with 100 percent of respondents stating they would definitely or probably recommend the health plan to other provider offices. Simply received satisfaction ratings of 85 percent or higher in 26 out of 29 items. The following areas received the highest satisfaction ratings:

- The majority of respondents (99 percent) expressed satisfaction with the quality of Simply's health education and wellness promotion services for members
- Simply's credentialing process received a satisfaction score of 99 percent
- The information provided in the provider handbook, as well as communication provided via letters and faxes from Simply, received a composite score of 95 percent. The highest scoring item was the provider handbook with a 98 percent satisfaction rating

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- The authorization and appeals processes received a composite score of 95 percent. Respondents were satisfied with the various avenues for requesting an authorization, the timeliness of the process, and the clarity of the review decisions
- The claims area received a composite score of 95 percent. This score included four components: claims processing accuracy, timeliness, helpfulness of staff when resolving a claims issue, and claims review or appeal
- Provider Relations received a score of 94 percent. This score included satisfaction with the response time and provider education conducted by this area

The annual Provider Satisfaction Survey helps us identify training needs. The survey asks providers what information they would like from Clear Health. This information includes Disease Management programs, HEDIS® measures, participation in a quality incentive program, innovative programs providers can implement, providing after-hours care, electronic claims processing, and any other issue they specify. Provider Relations receives feedback from the survey and uses the information to address provider specific areas of opportunity, including provider satisfaction, overall performance, which will result in improving the provider engagement with Clear Health.

5.2.1. Opportunities for Improvement

We develop strategies to improve any survey item that does not score above 85 percent. The Gap Committee meets to further analyze the results of the survey and then brainstorms ways to improve provider satisfaction. Their goal is to develop long- and short-term interventions to enhance provider satisfaction with us. Measures that fell below 85 percent and corresponding mitigation strategies include:

- The time it took to resolve a complaint (any type). Two telephone areas (authorizations/pre-certification and claims) receive the most complaints from providers. These two units are not part of the Claims or Health Services departments that process the respective claims or authorizations.

Interventions: In 2015, Clear Health introduced streamlined systems and processes for handling disputes and delivering quicker turnaround times for resolutions. In addition, we deployed a management system to assure appropriate timeliness and resolution of disputes. This system provides daily aging reports discussed with the team each morning to manage the appropriate allocation of resources. In February 2016, we added two employees trained to work exclusively on claim related provider disputes, one of the most common disputes from providers. Additionally, Provider Relations employees received greater access to other departmental processes/systems contributing to quicker complaint-resolution turnaround time.

Evaluating Effectiveness: The Complaint and Appeals unit reviews daily aging reports to comply with all regulatory timeframes. We present this information to the GAP Committee quarterly.

- The knowledge of the Provider Customer Care Representatives. Provider Customer Care Representatives had limited access to other departmental processes and systems. This resulted in an inability to provide first contact resolution. Instead, staff had to escalate the concern internally via email or phone and then call the provider office once receiving the response from the other area.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Interventions: We monitor our Provider Customer Care Representatives on a monthly basis to make sure that callers receive accurate information. The Call Monitoring and Quality Review program consists of monthly monitoring of every Provider Customer Care Representative. The Quality Analyst randomly chooses five pre-recorded calls, for objectivity. The departmental benchmark is 95 percent, with coaching and disciplinary action as needed. We complete an evaluation form that includes the evaluation of soft and hard skills within the following components: call opening, provider issue identification, provider verification, resolution, effectiveness, documentation, and call closing. We track and trend results monthly at the individual, team, and unit levels.

Provider Customer Care Representatives also received greater access to other departmental processes/systems contributing to first call resolution. For example, Representatives received access to finance files allowing them to see offsets occurring throughout the providers' claims. Additionally, the management team received access to certain fax folders to enhance access to incoming authorization requests. They also gained access to the audit and recovery system in order to access outgoing communications to providers regarding financial audits.

Evaluating Effectiveness. We conduct monthly audits of all Provider Customer Care Representatives to make sure they are courteous and provide accurate information. We present audit results to the GAP Committee.

- The number of specialists available for referrals. PCP offices encounter push back from specialists that are in network who state they do not take the plan. Possible reasons for this include provider staff not being educated on the plans they accept and turnover of knowledgeable provider employees.

Interventions: When onboarding a new PCP office, the Provider Network Manager asks which specialists the office usually uses for referrals. If the specialists are not participating, we will try to contract with the providers. Additionally, Provider Network Managers work with PCP offices to identify the specialists with whom they were having the most problems scheduling appointments. We contact those specialists and re-educated them on their contractual obligations.

Evaluating Effectiveness: The Gap Committee will review the results of the annual Provider Satisfaction Survey, as well as quarterly reviews of Quest Analytics geographic analysis reports and maps. We conduct an annual review of specialist appointment access and present the results to the Quality Management Committee.

6. PROVIDER TRAINING

6.1. Our Approach to Provider Education and Outreach

Comprehensive, face-to-face education and outreach help providers in our network take good care of our members. Our role as an active partner in the provider community gives us valuable insight into what works and what matters. Our education and outreach efforts are provider-focused with the goal of delivering information needed to enable providers to engage members, improve member outcomes, and simplify practice management. We are proud that AHCA acknowledged our training program and we will continue to make training available to all providers regarding the requirements of the Statewide Medicaid Managed Care (SMMC) Contracts, including contract amendments and special needs of members.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We understand the importance of collaborating with and supporting AHCA to make sure we are reinforcing areas of critical importance for providers serving members. Our training programs including a thorough overview of AHCA requirements. For example, all providers participate in orientation within 30 days of joining our network. Our comprehensive orientation includes an overall of topics to providers including service coverage guidelines, service authorization requirements, billing procedures, claims processing, payment timeframes, and our dispute resolution process and timeframes. We include a complete description of our provider orientation program later in this response.

We will continue to coordinate and support AHCA-sponsored outreach activities, as requested, and our regionally based teams will continue to work with our network providers to assure successful completion. We are pleased that AHCA recognized our onboarding process as a best practice. In 2016, legacy Simply received a satisfaction rating of 95 percent when providers were asked to rate the training and education provided to their office staff concerning our processes and requirements.

Frequent, ongoing provider education, delivered through multiple channels, promotes enhanced quality of services and improved member outcomes. As their local contact, providers will know we are available to them when they have questions or need additional education. For a period of at least 12 months following implementation of the Contract, we will conduct monthly education and training for the top five specific provider types identified through our monitoring and QI processes, and claims submission and payment processes, which will include an explanation of common claims submission errors and how to avoid those errors. This period may be extended as determined necessary by us or the Agency.

Our comprehensive provider education and outreach strategy helps make sure providers have the information necessary to provide high quality care to our members and includes:

- Clear Health Training Academy. Our Training Academy (described in detail later in this response) is a powerful vehicle that fosters a robust, consistent, compliant, and comprehensive approach and provides a multitude of expert-developed, customized trainings, accommodating various formats, media, and schedules while offering providers the opportunity to earn CMEs and CEUs, allowing the provider to achieve a Red Ribbon status at no cost. Frequency: Ongoing, available on demand.
- Provider Onboarding. We initiate new provider education when a provider has joined our network. We meet individual providers in their offices and provider groups in private facility settings and use group presentations at a convenient location when several providers join our network within a short time frame. Frequency: Ongoing, within 30 days of new providers joining our network.
- Provider Handbook. A comprehensive resource that informs providers of our program guidelines and requirements and assists them in caring for members. We review the handbook with network providers during orientation. Frequency: Providers have 24/7 access via our provider website.
- Provider Portal. A critical tool to enhance provider communication, deliver actionable information, and streamline plan administration. It features tools that promote convenience and transparency by allowing authorization submission and viewing claim status. Frequency: 24/7.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Ongoing Training and Workshops. We hold ongoing educational sessions for providers several times a year. Provider Network Managers meet one-on-one with PCPs and hospitals quarterly. Existing providers can also request and receive one-on-one focused education. Frequency: Ongoing as needed or requested.
- Provider Bulletins. We use bulletins to communicate program updates, new AHCA initiated programs or updates, policy clarifications and updates, updates to our provider handbook, or to reinforce current policy and procedure. We also utilize bulletins to distribute guidelines and medical policy. Frequency: Ongoing, posted to our provider portal as needed.
- Network e-Updates. Includes important information and topical updates for network providers. Network e-Updates have included information on a variety of topics such as ICD-10, claims submission process, pharmacy, BH, chiropractic code set, and the prior authorization process. Frequency: Quarterly.
- Blast Faxes. Helps assure providers in our network have access to important program updates and promotes our educational events. Frequency: Ongoing as needed.
- Webinars, Online Videos, and Seminars. Webinars enable providers to participate in educational events from the comfort of their offices. Sample topics include access to care, EPSDT, Individuals with Disabilities Education Act (IDEA), telemedicine, contracting, credentialing, prior authorization, utilization management, BH, integrated care, and claims processes. Frequency: Monthly.
- Provider Newsletter. Our provider newsletter offers relevant and helpful information. We post the newsletter to our provider website and alert providers by fax blast that a newsletter is available. Frequency: Every other month.

6.1. Clear Health Training Academy

Our Training Academy offers a truly comprehensive approach to all AHCA-required and Clear Health-offered trainings for providers and staff. Our internal learning and development team regularly assesses the effectiveness of our training to assure it meets the needs of providers, staff, and members.

Our Training Academy incorporates multi-modality delivery training venues (in-person, online courses, tailored webinars, written materials) and mechanisms to track, monitor, alert, and report compliance and completion. Through the Training Academy's robust features, we are able to offer required, population-specific, and culturally competent training. We offer specific "intentional trainings" for targeted providers who support specific populations to promote recognized practices of excellence. We update our training programs to assure they remain relevant, meet audience needs, and comply with AHCA requirements.

Our provider education plan includes initial, annual, and ongoing training that begins prior to contracting and supports continuity of care and seamless transition. Our training materials support the full range of PH, BH, and LTC benefits using a person-centered planning process.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our Training Academy's robust features offer required, regionally identified, population-specific, and culturally competent trainings. We offer ongoing training sessions to network providers several times per year, and as needed. These sessions give providers program and regulation updates, information on industry and care trends, new ways to improve member outcomes, recommendations for reducing administrative burdens, information, and steps that can affect performance, and enhancements to our Florida services and programs.

Our Provider Relations staff supports individual and on-site training sessions whenever a provider requests or when we identify a need. Options include group presentations, webinars, and training at the provider's location. Trainings are specific to provider type and we tailor them to meet the needs of local providers.

We encourage providers to engage in our "intentional training" programs. These targeted training programs encompass four key strategies: 1) integrated care training based on a library of offerings for specific providers 2) targeted training libraries and content related to vulnerable subpopulations and population-driven health needs 3) training to support value-based care, and practices of excellence recognition programs that reward providers for their additional knowledge and capabilities related to quality-based management of specific conditions, and 4) training related to specific contract requirements, HEDIS® measures, and NCQA requirements. Many of these trainings offer providers the opportunity to earn CME or CEU credits.

6.2. New Provider Onboarding

Newly contracted providers complete initial onboarding within 30 days of becoming active. We require all providers to attend an initial orientation session to make sure they understand the managed care program and our policies and procedures. We conduct ongoing training with providers to share best practices, communicate new and updated policies and procedures, and reinforce education. During 2016, more than 1,300 providers completed onboarding.

We offer formal group training for all providers using various modes and venues to maximize participation. We offer multiple dates at convenient times and locations for each training session and serve food to encourage attendance. We take attendance at every training session and track individual provider participation. When a provider does not attend scheduled training sessions, our Provider Network Managers contact the provider and re-schedule training, including the option of a one-on-one or webinar session.

At initial training, we distribute copies of our provider handbook and member benefit collateral. Updates and distribution of the provider handbook comply with requirements. We focus on scope of service requirements for numerous topics including service coverage guidelines, service authorization requirements, billing procedures, claims processing payment timeframes, and dispute resolution process and timeframes. We present instructions on how to use our provider portal and website, which contain key provider education information. We also offer a question-and-answer session where providers and employees can address specific questions. When providers do not attend scheduled training, we follow up with them to reschedule.

We provide training to all new providers within 30 calendar days of placing the provider on active status. Under the new Contract, we recognize that both new and existing network providers will require training on new program features. In addition to individualized training for providers in their offices, we will offer regional orientation sessions for providers no later than 30 days before the

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

first enrollment date in each region. The orientation session includes components of our typical provider training session, described below, as well as highlighting for existing providers any differences under the new Contract, such as additional covered services and expanded benefits. We provide orientation sessions in-person in at least one central location within the region and will be available via webinar for those who cannot attend in person.

Our standard training for all newly active providers, facilities and their staff addresses the requirements of the contract, interaction with us regarding claims and authorizations, and special needs of members. Specific topics (including corresponding requirements in scope of service requirements) include:

- An overview of the SMMC program
- Overview of AHCA priorities
- Service coverage guidelines
- Service authorization requirements
- Billing procedures
- Claims processing payment timeframes
- Dispute resolution process and timeframes
- MAXIMUS and the Agency's third party claims resolution process
- Provider handbook
- Member access standards
- The use of evidence based guidelines and Clinical Practice Guidelines
- Preventive health care guidelines
- Medical necessity criteria
- Overview of EPSDT, the periodicity schedule, compliance requirements
- Advance directives
- Fraud, waste, and abuse policies and procedures and Compliance Plan
- Quality Management program and plan
- Cultural competency and interpreter services
- Reporting requirements, including communicable disease reporting requirements
- Privacy and confidentiality of Protected Health Information
- Mental illness and alcohol and drug abuse protocols and resources
- Meeting the needs of members
- Important Clear Health contact information
- The role of the Provider Network Manager
- Provider portal and available resources
- How to check eligibility (through our secure provider portal and automated phone system)
- Utilization management and how to obtain prior authorization
- Member rights and responsibilities
- Provider roles and responsibilities
- VBP models
- Provider Satisfaction Survey
- Member Satisfaction Survey
- Health education programs such as disease management including population health
- The importance of encounter data
- High-level discussion on HEDIS®

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Training for OB/GYNs includes the information above as well as training on the following topics:

- Notification of pregnancy
- Presumptive eligibility information
- Taking Care of Baby and Me
- Alere — Coverage of home care for members with high-risk pregnancies
- 24-hour Nurse Advice Line — our Nurse help line

We conduct an initial in-person training session at the provider's location and via web conference within 30 calendar days of placing a newly contracted provider, or provider group, on active status. We conduct training via web meeting at the provider's request. Provider resource materials, including an orientation binder, formal agreement, CD, provider handbook, and quick reference guides are provided to the office. Once an orientation visit is completed, providers have the opportunity to respond to a survey in real time via Salesforce technology. The survey evaluates the Provider Network Manager and advises us of any additional training needed in general or in particular subjects. We analyze and trend responses to establish if general training sessions are needed, if educational materials need to be developed as additional resources to providers, or if Provider Network Managers require additional training.

For hospitals, we provide a comprehensive orientation session that includes policies, procedures, and formal agreements to communicate between our Care Management team and the hospital. We also conduct monthly Joint Operating Committee meetings with hospitals to provide further education and work through any operational issues.

Following the initial orientation session and individualized trainings sessions for new providers, we offer monthly training sessions that cover claims submission and payment processes for at least the first 12 months of the Contract. These sessions include explanations of common submission errors and how to avoid errors in the future. If we determine there is a need to continue training based upon high claims errors or frequent provider questions through our provider help line, we continue the trainings beyond 12 months. We also continue trainings at the request of the Agency.

Provider Network Managers provide individualized training to providers at each of their on-site visits. These trainings target provider-specific issues that have been identified either by the provider or by one of our internal departments, such as utilization management or quality management. Examples of training topics include clean claim submissions, over or under-utilization, HEDIS® scores, or referral criteria into case management and disease management programs.

6.2.1. Training for Red Ribbon Providers

Our Provider Relations team focuses on educating the providers on our benefits, services, and policies and procedures to make sure the provider and his/her staff understand how to gain access to care for their patients and provide continuity of care. The provider handbook includes the requirements for providing care in accordance with the most recent clinical practice guidelines for HIV/AIDS treatment.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

The handbook also states that the provider must follow the Guidelines for the Use of Antiretroviral Agents in HIV-1 Infected Adults and Adolescents developed by the HHS Panel on Antiretroviral Guidelines for Adults and Adolescents' policies and procedures on referral for services offered by the plan and outside of the plan. CMEs are provided to red ribbon providers upon the completion of select courses.

Referral guidelines for BH and substance abuse services are also included. Beacon Health Options, our BH subcontractor, has most FQHCs and community mental health centers (CMHCs) in-network. These providers are experienced in working with people living with HIV/AIDS.

We offer and encourage all providers to attend sensitivity training on how to work effectively with people living with HIV/AIDS. All provider handbook information is available to providers on the Clear Health website. We also offer a provider portal on the site, which the provider can use to access member eligibility, claim status, referrals, and authorizations.

We refer providers that require and/or request additional training on HIV/AIDS to our partner, the AIDS Education and Training Centers (AETC), which conduct targeted, multidisciplinary education and training programs for health care providers treating persons living with HIV/AIDS. We partner with Dr. Jeffrey Beal, Principal Investigator and Clinical Director for the Florida/Caribbean AIDS Education and Training Center, to provide direction and education to providers identified in the communities we serve who need or who would like to improve their HIV/AIDS treatment expertise.

Provider Network Managers engage frequently with our provider network to make sure providers are continuing to meet the needs of enrollees by providing access to care that meets our general quality standards and those necessary to provide specialty services to our enrollees with HIV/AIDS. We collect and analyze performance measurement data regarding the services provided to our enrollees to implement enrollee and provider interventions in order to exceed benchmark quality performance.

Using provider profiles, we are able to identify providers who are outliers on metrics such as adult immunizations, annual PCP visits, the percentage of enrollees prescribed antiretroviral therapy, hospitalizations and emergency department visits. We also monitor the clinical status of every enrollee, including viral load and CD4 count, indicators that treatment is effective.

If patterns of service utilization or concerns about individual enrollees emerge, our Provider Network Managers, Case Management team, Medical Director, or Pharmacy team member reach out to the provider to provide additional education. The entire Clear Health team is available to support providers, with technical assistance, consultation, and by coordinating ancillary services and referrals for timely access to services.

6.3. Frequent and Ongoing Training for Network Providers

We use a robust approach to training. We provide targeted outreach when there are significant changes to program requirements. We also conduct sessions when we have new information that will improve member outcomes, reduce the administrative burden for providers, or affect performance goals.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We conduct continuing training that reinforces areas covered in initial training and provides specialized training on identified topics. Topics include sensitivity and cultural competency, updates providers on changes in program policies or procedures, referrals to Case/Disease Management programs, and supports compliance with program standards and Contract requirements. Our continuing education includes in-person visits and monthly webinars and provides targeted training on tools to manage and transform providers' practices and improve outcomes for our members. Infectious Disease specialists typically do not provide primary care services. Clear Health has engaged these providers in a primary care role. We put special emphasis on training in areas of primary care services such as HEDIS®, utilization management, referrals, Case and Disease Management, and all other tools available to our primary care network.

Existing providers can request and receive one-on-one education on topics of interest, and our Provider Network Managers tailor presentations to suit their needs. We also organize sessions when we have new information that will improve member outcomes, reduce administrative burden for providers, and affect performance goals. We will provide targeted education whenever there are significant changes to AHCA program requirements. In addition, Provider Network Managers conduct education session for new office staff at existing network providers. We identify additional opportunities for training through our provider help line, Salesforce surveys, grievance and appeals filings, feedback from the Gap and Quality Management Committees, and member outreach.

We also use provider bulletins, newsletters, conference calls, emails, fax blasts, and our provider portal for continuing education and training for our provider network.

We take care of providers in our network so they can take care of our members. We conduct webinar training sessions at times that are most convenient for providers — early morning, lunch, and after business hours. Webinars and video-based training have proven to be effective means of communication and training. We make video-based training available on our provider portal, utilizing a highly scalable, secure video hosting platform. We are excited to give providers the opportunity to participate in training at their convenience by providing the ability for self-paced viewing, allowing for greater comprehension. We deliver high-quality video on demand to any device or destination, including a PC, mobile phone, tablet, or Mac.

6.4. PCP Training on Behavioral Health Disorders

We recognize that PCPs provide a significant proportion of mental health treatment in Florida and across the country and that they are best positioned to identify BH conditions early on. We provide comprehensive training for PCPs on screening, treating, and referring members with BH disorders.

Additionally, we recognize that BH and PH conditions are interdependent and we recognize the value of integrating care across all conditions. We provide BH providers within our network training on integration with PH providers. We offer monthly training meetings, webinars, and personalized help to make sure providers have the necessary information and tools to deliver care appropriately. We support our education and training programs with consistent and frequent outreach through our provider policy and procedures manual, newsletters, portal, and provider help line. Our Clear Health Training Academy comprises a truly comprehensive training approach for PCP in integration, value base payment, and screening for BH and substance use disorders.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

PCP training and online resources are designed to educate providers on when and how to screen members for BH disorders, and the process for making referrals to a BH specialist. We also provide information on responding to members with co-occurring mental health and substance use disorders, the importance of addressing both concurrently, and collaborating with all providers involved in caring for members. In addition, we offer providers continuing medical education sessions that focus on identifying and coordinating PH and BH needs.

We use multiple strategies to educate PCPs on identifying members with BH needs and how to connect members to services and supports. Our strategies for educating PCPs to identify members with BH needs. For example, SBIRT is a comprehensive, integrated approach to screening, the delivery of brief interventions, and referral for treatment for individuals who meet criteria for a SUD. We work closely with PCPs to share evidence-based practices, such as screening tools, that enable them to assess their members' needs and provide targeted treatment or referrals. Clear Health is also contracted with FQHCs throughout the state, that have an integrated model of BH services within their clinics.

6.5. Cultural Competency Training for Providers

We know that many health care professionals are committed to providing culturally competent care but lack the awareness, knowledge, or skills to do so. Through our provider training, we furnish information that providers and their staff can use to remove cultural barriers. We work hard to make sure that our providers are not only culturally sensitive, but also reflect the culture and languages of our members.

All providers receive cultural competency training during initial onboarding, educational outreach from Provider Network Managers, and annually through refresher training.

Training materials are available in our provider handbook and online. Topics include:

- The importance of understanding cultural differences and increasing cultural competency awareness
- Our expectations for our providers and their staffs, including the mandate that they continually expand their cultural competency knowledge and skills
- A review of the 15 national CLAS standards with a link to the U.S. Health and Human Services website for more information
- Assessment tools for providers and their staffs to improve their cultural competency
- Examples of best practices
- A link offering providers no-cost medical education credits from Georgetown University for further study of cultural competency topics

Our Clear Health Training Academy comprises a truly comprehensive training approach for providers and their staffs. We offer specific "intentional trainings" for targeted providers who support specific populations as needed to promote recognized practices of excellence.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We identify languages spoken by our providers during their application, credentialing, and re-credentialing processes. A review of provider language data, as reported by providers, indicates that 100 percent of the providers speak English. For all providers, 63 percent speak Spanish, and seven percent speak Creole. Our provider directory contains information on the languages spoken by providers in addition to English. The provider directory is available online on the member web portal and in writing upon request.

We expect our providers, as well as subcontractors who have direct contact with our membership, to demonstrate cultural awareness and appropriate skills, such as the ability to understand members' values, beliefs, and cultures. Our network strategy and performance measures incorporate NCQA standards – most notably: “The organization assesses the cultural, ethnic, racial, and linguistic needs of its members and adjusts the availability of practitioners within its network, if necessary.”

It is essential that all stakeholders recognize and thoroughly understand the role that age, culture, ability, socioeconomic status, and ethnicity play in our members' lives to make sure that all receive equitable and effective health care at the right time and right place. Consequently, we are committed to credentialed providers and subcontractors who understand and appreciate the socioeconomic and cultural challenges that our members face, as well as their medical needs.

We have seen how the quality of the patient-provider interaction profoundly affects members' ability to communicate with their providers and follow recommended treatments. In response, our members' languages, customs, and cultural beliefs are front and center when we develop our provider and subcontractors networks. We train our providers and subcontractors in the delivery of culturally appropriate services for our members, their families, and communities.

6.6. Our Provider Portal

We maintain a comprehensive, secure, provider portal that maximizes usability and administrative simplicity. It offers a variety of tools and resources, including an online copy of our provider handbook along with a variety of training and education resources from the latest provider communications to toolkits (such as our EPSDT Toolkit), all designed to make providers' jobs easier. We showcase basic information and tools such as our provider handbook, prior authorization procedures, formularies, and reimbursement policies, and use the portal to deliver information to providers, including announcements, alerts, and forms. The latest forms and training materials are always available on the provider portal. We have staff available to support provider queries about portal information, ranging from our Provider Network Managers staff who can help find data to Customer Care Representatives who can help providers register and access information.

Our portal simplifies practice management, enables users to navigate easily to the information they need, and support provision of excellent care to members. The site also simplifies practice management by giving providers the ability to review billing and claims payment information. They are able to access important billing news and administrative updates, claims submission and status, prior authorization requirements and request status. Our web technology offers the following benefits:

- Providers can use a single sign-on process instead of logging in to multiple payer systems

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Providers can submit claims, determine member eligibility, view claims status, and access payment information for multiple payers in one place

6.7. Supporting Providers New to or Hesitant about Managed Care

We use a high-touch approach for all new providers and then adjust the intensity of interaction based on their comfort level. Providers new to and hesitant about managed care continue with high-touch until they are comfortable navigating within the system.

To best serve these providers, we solicit their concerns about managed care. Depending on the nature of their concerns, we tailor our interactions to meet their needs. We explain to the providers why managed care delivers better-coordinated, higher quality, and more cost-effective care to all members. We also assist providers in informing them on how to apply for state Medicaid numbers.

We provide a variety of tools and reports that have been used and updated through the year and have proven to be valuable to our providers. We explain the benefits of being in a managed system and use various tools and strategies to explain the benefits of participating in the SMMC program.

Provider Network Managers support providers throughout the credentialing process, tailoring their approach to each individual provider type and circumstance. We also schedule webinars for providers to explain the credentialing and contracting processes. All new providers are assigned a regionally based Business Development Lead (in addition to their assigned Provider Network Manager) available to them to walk them through all processes and answer questions related to the program, credentialing, billing, and reimbursement.

Evaluating the Effectiveness of Provider Education. We embrace a multifaceted approach to evaluating the effectiveness of our provider education strategies. We design our education and communication programs to comply with AHCA's requirements, and we monitor adherence through our robust quality management and compliance infrastructure. Some of the ways we monitor effectiveness are our annual provider satisfaction survey and post-training surveys. We incorporate data from these sources into our communication strategy to optimize effectiveness.

Provider Satisfaction Survey. We administer an annual survey to evaluate provider satisfaction with our communications, services, and procedures and then use the results as part of our continuous quality improvement efforts. The survey assesses provider satisfaction with training and education, communications, provider enrollment, complaints resolution, claims processing and reimbursement, and utilization management processes. Survey information helps us better understand our provider network — its needs, challenges, and opportunities for member-focused, cost-saving innovations.

Post-training/Post-visit Surveys. Our Provider Network Managers conduct post-visit audits of provider office visits to determine whether on-site training has met objectives. We incorporate this feedback to improve the provider education program and the performance of our team.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which plan leadership are involved in provider engagement.
2. The extent to which local provider field representatives are incorporated into the model, including the ratio of local provider representatives to providers.
3. The extent to which the method the respondent uses to track interactions with providers is capable of producing meaningful data the respondent will use to address both clinical and administrative problem areas.
4. The extent to which the method the respondent uses to track interactions with providers addresses potential provider field representative training needs.
5. The extent to which the metrics used produce actionable data for measuring provider satisfaction, increasing provider performance, improving the provider engagement model, and identifying areas of improvement for provider related communications or written materials.
6. The extent to which the training includes service coverage guidelines, service authorization requirements, billing procedures, claims processing, payment timeframes, and respondent's dispute resolution process and timeframes, including corresponding requirements in scope of services.

Score: This section is worth a maximum of 30 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 16 – Dispute Resolution (Statewide):

The respondent shall describe in detail its provider dispute resolution process.

Note: Pursuant to Section 409.966(3)(c)6., Florida Statutes, response to this submission requirement will be considered for negotiations.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Strong provider relationships is our focus and critical to our success. We listen to the concerns of our providers, respond to them in a courteous, professional manner, and make every effort to resolve issues through a well-defined and documented process that supports them every step of the way. By developing a consultative relationship with providers, Provider Relations staff become a trusted resource to them and the first people providers contact if they have a complaint.

We facilitate this by our high-touch model, where we communicate with providers on a regular basis to present information based on monthly claims statistics to help them navigate claims, disputes, and other processes, and whenever possible, resolve concerns before they become formal disputes. If a dispute indicates a provider may need guidance, we assign a Provider Network Manager to meet with him or her and discuss the disputed claims, our processes, and other concerns. Our dispute resolution staff works to promote provider satisfaction by reviewing and investigating all issues in a fair, unbiased, and comprehensive manner.

Understanding and resolving provider concerns gives us important feedback and the opportunity to improve performance. By analyzing data on provider disputes, we learn what causes dissatisfaction, identify its root cause, and address root causes with process and system changes to improve our performance and provider satisfaction. We compile provider dispute data with data on complaints from enrollees (members), subcontractors, AHCA, and third parties to make sure we get a complete picture of our performance and areas where we can improve.

In the following evaluation criteria responses, we delineate the process our leadership team follows to monitor our processes promoting complete, appropriate, and timely resolution of disputes, including those AHCA sends to us; and timely provider payments resulting from a dispute. For claims disputes, we go beyond contract requirements to provide a three-level dispute resolution process that includes level one reconsiderations, level two appeals, and the Agency's claims dispute process with MAXIMUS as level three. We also describe below our processes for tracking and trending complaint resolutions to identify and implement improvement strategies, responding promptly to complaints from AHCA, compiling complaints from all sources, and participating in the AHCA claims dispute resolution process.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

**** RESULTS & SUCCESSES:** In 2016, our legacy Amerigroup Florida plan processed 5.3 million claims with 95.5 percent successfully resolved on initial adjudication. Of those claims received as a level one reconsideration, we resolved 88 percent without moving to level two appeal process. ******

1. IDENTIFYING CLAIMS RELATED DISPUTE TRENDS AND INITIATING PROCESS IMPROVEMENTS AND SYSTEM ENHANCEMENTS

Our Process for Identifying Dispute Trends and Initiating Improvements

We use trend analysis of level one reconsiderations and level two appeals data to identify root causes of inappropriate denials or underpayments. Once we identify the root cause, we review all correlated claims to identify issues that span multiple providers and provider types and select additional claims that are potentially eligible for reprocessing. The result of the analysis enables us to initiate process improvement activities and system enhancements. We have found root causes and mitigated them — for instance, claims processing configurations that affected automated processing, external clearinghouse data issues, manual processing errors, unclear standard operating procedures, or provider training needs.

We categorize, track, trend, and aggregate all provider dispute data, including type of issue and other details such as resolution status, and time frames for completing process steps. We process and review the AHCA Provider Complaints report for monthly submission to the State and to our Quality Management Committee (QMC).

Our QMC reviews data related to provider dispute volumes by topic, region, outcome, and timeliness of resolutions. After reviewing data, the QMC identifies action plans to address areas of concern and improve the provider experience through process and system improvements. The QMC reports the results of provider dispute data through the annual evaluation that we present to our Board of Directors.

**** SPOTLIGHT:** Our tracking and trending revealed a high volume of disputes for a particular provider type, lab pathology. While we researched the issue and until we implemented a permanent solution, we adjusted related claims every two weeks to be sure provider payments were accurate and on time. We identified the root cause as a system configuration anomaly affecting claim payment accuracy and resulting in the increased volume of denial disputes. The Reconsideration and Appeal team partnered with the Configuration department to update the logic in the claims payment system. Since this system update, our trending and monitoring reports have shown no recurring disputes correlating to this issue. ******

2. OVERSIGHT TO ENSURE APPROPRIATE DISPUTE DETERMINATIONS, TIMELY PAYMENTS, AND CLAIMS DISPUTES RESOLVED WITHIN REQUIRED TIMEFRAMES

Our provider claims dispute processes (Figure 16-1. Dispute Resolution in Attachment SRC# 16-1: Flow Chart) promote prompt and appropriate resolution and prompt payments required by resolution decisions. Two pieces of data indicate the appropriateness of our decisions: providers appeal approximately one-half of one percent of claims; and we resolve 88 percent of disputes as level one reconsiderations. This is further supported by the fact that, to date, MAXIMUS has not accepted a Medicaid appeal for any of our plans. When we overturn a previous claims decision, we re-adjudicate claims and have historically sent provider payments within 15 days.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We will continue to optimize this process. For claims disputes, we go beyond contract requirements to provide a three-level dispute resolution process that includes level one reconsiderations, level two appeals, and the Agency's claims dispute process with MAXIMUS as level three. (Figure 16-2. Dispute Resolution in Attachment SRC# 16-2: Flow Chart)

Providers may submit claims disputes within 90 days of claim determination. Disputes may involve claims denials, timely filing denials, late payment, underpayment, lost or incomplete electronic or mailed forms or other information, requests for additional information related to services provided, and decisions related to retrospective claims reviews. Reconsideration Specialists from our Reconsideration and Appeals team process level one reconsiderations. We have three business days from date of receipt of the dispute to send the provider a letter acknowledging receipt of the complaint with the expected resolution time frame.

We provide a written notification of the dispute status to the Agency and the provider every 15 days until we reach a resolution. We will resolve all level one reconsiderations within 30 days of receipt and send written notice of the disposition and its basis to the provider within three business days. If the dispute requires additional time to review, the plan will submit a written request to the Agency within three business days of its receipt. When the resolution for a level one reconsideration upholds our initial action, our resolution notice explains how the provider can request a level two appeal. Providers may submit a request for a level two appeal within 30 calendar days of receiving an upheld level one reconsideration resolution notice. The level two appeal process follows the level one reconsideration process, executed by senior claims appeal staff.

When a level two appeal resolution upholds our level one reconsideration decision, our resolution notice offers information about level three, the Agency's claims dispute resolution program with MAXIMUS. The letter explains how to file a level three written claims dispute resolution program request with AHCA.

Providers may submit non-claim disputes within 45 days of the date of the occurrence. Disputes may involve service authorizations, contracting, credentialing, plan staff, and member discharge requests. We send a letter to the provider within three business days to acknowledge that we received the complaint and provide the expected resolution time frame. We provide a written notification of the dispute status every 15 days to the provider until we reach a resolution. We resolve all disputes within 90 days of receipt and send written notice of our decision and its basis to the provider within three business days of resolution.

The Florida Resolution leadership team monitors the provider dispute process. The oversight process includes supervising staff, monitoring inventory reports, and monitoring policies and procedures to promote accurate and on-time resolutions and provider payments. Leadership performs sample file reviews each month to identify opportunities to improve the quality and timeliness of provider dispute resolutions and payments through coaching, re-training, or revised procedures.

In addition to the monitoring oversight described above, the Leadership team conducts the specific tasks listed below:

- Monitors data related to the number and percentage of level one reconsiderations that come back as level two appeals

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Reviews the numbers and individual circumstances of overturned decisions during level two appeals; unless we received additional information after the level one determination, these cases may indicate inappropriately denied level one reconsideration determinations or an inadequately explained decision to uphold
- Investigates outlier cases, such as those that take the longest to resolve
- Monitors the top 10 topics addressed in provider disputes

3. TIMELY RESPONSE TO AGENCY REQUESTS RELATED TO COMPLAINT RESOLUTION

We encourage our providers to contact us at any time with questions and complaints. Although we give them multiple options for submitting disputes to us, they sometimes go directly to the Agency with complaints. When this happens, the Agency forwards the dispute to our Regulatory team through the Agency's complaint hub, and we promptly and thoroughly resolve the disputes. Upon receipt of a complaint from the Agency, Regulatory team staff quickly enters the complaint into our grievance and appeal system, which triggers an automated email to the Resolution team describing the issue and the high priority of the complaint. Team staff promptly initiates the provider dispute resolution process as described above.

Our Regulatory team participates in each step of the process from initial receipt through final resolution. With resolution of a dispute that we received from the Agency, Resolution team staff provides the Regulatory team with a detailed resolution summary that they promptly submit to the Agency through its complaint hub. The time frame for complaint resolution is based on the priority status assigned to it by the Agency. Our goal is to exceed Agency expectations for time frame resolution of all complaints they send us.

4. INTEGRATING ALL COMPLAINTS, REGARDLESS OF COMPLAINT REFERRAL SOURCE

We compile, in the grievance and appeal system, detailed individual case and aggregated volume data, performance metrics, and descriptive and summary data on all disputes we receive from providers, members, subcontractors, AHCA, and other third parties. This includes data on complaints, grievances, reconsiderations, and appeals. We track and trend this data and include it in monthly reports to our QMC for analysis, identification of concerns, and implementation of strategies for process and system improvements.

5. PARTICIPATING IN THE AGENCY'S CLAIMS DISPUTE RESOLUTION PROGRAM

When we uphold prior decisions on level two appeals, we send a resolution notice advising providers that they may further appeal our decision through the Agency's claims dispute resolution program with MAXIMUS, its resolution organization. To date, none of our Medicaid claims have gone through the MAXIMUS process. If a provider submits one of our claims to MAXIMUS, we are ready to participate in this process and will comply with all State requirements, including those in Sections 641.3155 and 408.7057 Florida Statutes. We fully understand the Agency's process for managing, addressing, and resolving provider claims disputes and MAXIMUS' role. We will consider all Agency decisions binding on our health plan.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We will notify providers of the MAXIMUS process available to them after they have exhausted all opportunities to appeal with us through level one reconsideration and level two appeal processes. We inform providers of the MAXIMUS process in reconsideration and appeal resolution letters, in our provider handbook, through our Provider Relations team, on the provider portal, and also direct them to further information on the Agency's website.

5.a. Responding to Requests from the State Contracted Independent Dispute Resolution Organization

We participate in the Agency's process as the third level of our provider dispute process. Senior staff from our resolution team will perform all health plan activities related to the Agency's process under the oversight of our Medicaid Operations Manager, who will be MAXIMUS' contact regarding these disputes. Senior staff will participate in any evidentiary hearings, including presenting information and examining witnesses.

Upon notification from a contracted or non-contracted provider that they have filed a dispute against us with MAXIMUS, we will enter this as a level three Agency appeal in our grievance and appeal system. This system will contain information and key dates related to the level three Agency appeal, including all information related to prior appeals and the disputed claim.

When we receive a request from MAXIMUS for documentation, we will immediately gather all requested and other relevant information regarding the claim and prior appeal activities. We will organize this information into a case file with a table of contents, a sequence of events summary, and numbered tabs for each item. Within 15 days of receiving the request, we will send the case file to MAXIMUS in the format it specifies and by the method it prefers, hard copy or electronic. We will promptly respond to any follow-up requests from MAXIMUS.

5.b. Analyzing Arbitrated Cases for Identification of Process Improvements and System Enhancements

As with all provider disputes, if we receive one, we will closely track and monitor the circumstances of the claims related to each level three Agency appeal to identify process and system improvements related to end-to-end claims processing, other operational areas, and our provider dispute process. Our QMC will consider each level three Agency appeal individually, including trends that indicate areas for improvement, and will implement strategies for improvement.

5.c. Prompt Payment of Final Orders Issued by the Agency

Decisions by the Agency through the claims dispute resolution process are binding. When it overturns a decision, we will reprocess the claims in the time frame directed by the Agency and MAXIMUS in their resolution letter and pay the provider, with interest as required, typically within 15 days and no longer than 35 days. We will also promptly pay the State's costs for conducting this process, as required.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent's process identifies claims related dispute trends and initiates process improvement activities/system enhancements.
2. The extent to which the respondent's process includes oversight to ensure appropriate plan dispute determinations are made, timely payments are made, and claims disputes resolved within required timeframes.
3. The extent to which the respondent's process incorporates timely response to Agency requests related to complaint resolution in accordance with the scope of services.
4. The extent to which the respondent integrates all complaints, regardless of the complaint referral source (e.g., Agency, third party).
5. The extent to which the respondent's resolution process includes the respondent's participation in the Agency's claims dispute resolution program authorized in Section 408.7057, Florida Statutes, as well as includes the following:

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

- (a) Responding to requests for information from the State contracted independent dispute resolution organization;
- (b) A global process for analysis of arbitrated cases for possible identification of process improvement/system enhancements; and
- (c) Prompt payment of final orders issued by the Agency related to claims arbitration case determinations.

Score: This section is worth a maximum of 35 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 17 – Claims Processing and Payment Process (Statewide):

In a manner suitable for the provider community, the respondent shall submit key components of its claims processing and payment process, addressing both paper and electronic claims submissions for both participating and non-participating providers.

The response shall include detailed information on the metrics to be employed by the vendor to track timeliness and accuracy of claims adjudication and payment for claims submitted by participating providers and how these metrics will be used by line level and management staff to improve processes and provide for rapid cycle improvement.

The response shall also include a detailed description of how the respondent will make data and metrics regarding claims and payment available to the Agency and will ensure that network providers have access to real-time and trend data regarding claims processing and payment by the respondent and all applicable proposed subcontractors.

Note: Pursuant to Section 409.966(3)(c)6., Florida Statutes, response to this submission requirement will be considered for negotiations.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations. As an experienced and trusted partner to the Agency for Health Care Administration (AHCA) for over 14 years, we recognize the critical value that accurate claims and encounter data bring to effective management of clinical and health care services information — and the systems, processes, and staffing necessary to maintain high standards.

Optimal claims and payment processing is achieved not only with robust and highly functioning systems, but must also be supported by strong operational leadership and a fully engaged provider community. To that end, Clear Health has built locally based Provider Relations teams that provide training, technical support, and billing assistance to providers at their location. This hands-on approach builds trust and open communication — changing the dynamics of traditional provider/health plan relationships through the development of lasting and collaborative provider partnerships.

Clear Health's Management Information System (MIS) is already configured to support Florida SMMC operations and is compliant with Agency claims processing requirements. We have established electronic data interchange (EDI) connectivity with the Agency and with our providers, offering free access to electronic billing via our partnership with Availity. We process Florida claims in our Core Operations System (COS), which is seamlessly integrated with other components of our MIS. Since 2014, we have processed almost 20 million Florida claims, and we continue to process claims in accordance with Florida and federal statutes and regulations.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We have reviewed our system configuration based on any new requirements of the SMMC program and agree to modify as necessary to support ongoing timely and accurate claims processing for both electronic and paper claim submission, adjudication, and payment according to Agency requirements. During implementation, our Florida-based Claims Operations team will work with our Implementation team to capture all claims-related requirements on the work plan, including benefits configuration, the Agency's fee schedule, timely provider filing, timely provider payment, and claims reports. Rigorous testing will confirm our claims processing system's full compliance with Florida SMMC requirements prior to Program effective date.

After Contract implementation, additional processes will support continued compliance with Agency requirements. When a regulatory change impacts claims processing, our dedicated Regulatory Oversight Manager will alert all potentially impacted business owners, and a team will review the change, develop an action plan, and finalize a testing strategy. For changes that may affect processed claims, such as a fee schedule change, implementation will include identification and re-processing of affected claims.

1. CLAIMS PROCESSING AND PAYMENT

Ensuring our providers are paid timely and accurately is a key component of providing patient centered care and care coordination to our enrollees (members). Clear Health maintains a claims payment lifecycle that is closely monitored at multiple levels within the organization to support timely and accurate payment. Our Florida Operations team, supported by our national Claims department, uses several operational reports to monitor daily claims processing, notifying providers of reasons for claims denials and answering any questions they may have. Timely review of denial rates and trends along with prompt root cause analysis minimizes the occurrence of inappropriate claim denials and any undue administrative burden on our providers.

Clear Health processes claims in our COS, which is fully integrated with our enrollment and provider systems. We have been processing Medicaid, CHIP, Medicare, and cross-over claims for more than 14 years.

Our claims system leverages effective technology and employees who specialize in Medicaid to consistently deliver prompt and accurate claims payment. Clear Health's claim operations incorporates innovations, best practices, and lessons learned from our affiliates and delivers efficiency and quality to our Florida SMMC claims processing. Our claims system supports medical and behavioral health operations and enables us to achieve the following:

- Compliance with federal and Agency requirements
- Provider satisfaction through prompt claims payment and focused attention to inquiries
- The highest degree of claims adjudication accuracy
- Submission of complete, accurate, and timely reports and encounter data to the Agency
- Performance and scalability to support current volume and future growth

Clear Health processes and pays claims in compliance with federal and State requirements set forth in 42 CFR 447.45 and 447.46 and Chapter 641, F.S., with the most stringent requirement prevailing. Clear Health's claims processing system is currently configured to meet State, federal, and Agency claims processing rules as specified in the ITN and Contract and in accordance with state implementation guidance, including the following:

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

For electronic claims:

- Provide electronic acknowledgement of the receipt of claims to the electronic source within 24 hours after the beginning of the next business day following receipt of the claim
- Pay or deny/contest within 10 business days of receipt of nursing facility (NF) and hospice clean claims
- Pay or deny within 15 days after receipt of a non-NF or non-hospice claim

For non-electronic claims:

- Provide acknowledgement of the receipt of claims to the provider or designee or provide electronic access to the status of the submitted claim within 15 days after the receipt of the claim
- Pay or deny within 20 days of receipt of a clean claim
- Pay or deny within 120 days after the receipt of all claims (failure to pay or deny the claim within 140 days after the receipt of the claim creates an uncontestable obligation to pay the claim per Chapter 641.3155(3) (F.S.))

Additionally, Clear Health currently complies and will continue to comply with the following standards regarding timely processing for all providers:

- Pay 50 percent of all clean claims submitted within seven calendar days
- Pay 70 percent of all clean claims submitted within 10 calendar days
- Pay 90 percent of all clean claims submitted within 20 calendar days

Established processes confirm that our claims processing system remains compliant with federal regulations and the State-specific requirements for each of our affiliates. Internal experts monitor federal claims regulations to assess the potential impact on our systems and processes. They will create action plans, as necessary, to implement changes in accordance with federal regulations.

For example, for inpatient hospital stays, the Plan counts inpatient days based on the lesser of the actual number of covered days in the inpatient hospital stay and the average length of stay for the relevant All Patient Refined Diagnosis Related Group (APR-DRG or DRG). If a member has not yet met the 45-day hospital inpatient limit per the State's fiscal year for non-pregnant adults, at the start of a new hospital admission, the entire new stay must be covered by Clear Health in which the member was enrolled on the date of admission. This requirement applies even if the actual or average length of stay for the DRG puts the member over the inpatient limit. There is no proration of inpatient days.

1.1. Clear Health's Claim Processing System

Clear Health requires the submission of complete and accurate claims and encounter data for every service delivered to a member within six months after the date of service or discharge. We accept paper and electronic claims to offer providers maximum flexibility, and adjudicate claims nightly to deliver prompt turnaround.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Claims formats are industry-standard and HIPAA-compliant. Regardless of entry source (paper or electronic) or provider type (network or out-of-network), all claims pass through the same edits and adjudication processes.

Our claims processing system — from claims intake through payment — includes controls that validate and account for all claims submitted. We maintain an image of each electronic claim in our document management system, and real-time access to images facilitates adjudication and research tasks. We quickly capture and adjudicate claims with minimum manual intervention by combining our core claims transaction platform with electronic document imaging, a workflow management system, and electronic claims solutions. This leads to faster, more accurate claims turnaround and provider payment.

Clear Health accepts electronic claims and utilizes electronic transactions, notices, documents, forms, and payments to the greatest extent possible. We encourage and support providers to submit claims electronically because it facilitates accurate, timely, and efficient processing, and we currently receive over 85 percent of claims electronically. Recognizing that providers' technology environments and needs vary, we accept electronic claims from the following:

- Three nationally recognized EDI clearinghouses: Change Healthcare (formerly known as Emdeon), Availity, and Smart Data Solutions
- Our secure provider portal (submission of an ASC X12 837 file or entered using direct data entry to the provided claim form)

Clear Health delivers all of its electronic claims submission methods, including clearinghouses, at *no cost* to providers.

1.2. Processing Electronic and Paper Claims

The clearinghouses perform HIPAA-compliant editing and submit 837 files daily to Clear Health. We have an automated process to upload 837 files into the COS for processing. The claims system assigns each claim a unique internal control number to track its progress from initial entry into our system to final adjudication. We maintain an image of each electronic claim in our document management system, and real-time access to images facilitates adjudication and research tasks. The claims process applies HIPAA compliance and initial business rule edits to electronic and paper claims prior to adjudication. We reject claims that fail edits (prior to loading into our adjudication system) and notify the provider of the reason via the ANSI 999 Functional Acknowledgement and ANSI 277 Unsolicited Notification. Rejection notification for claims that were submitted on paper will be provided via letter.

For claims we receive on paper, throughout each day, Document Services batches, scans, and exports the files for data entry throughout each production day. After we perform quality checks, we create 837 claims data files for processing into our claims system. On average, this cycle occurs within 48 hours of receipt, helping us process clean claims in a timely manner.

There are daily exception reports to monitor the loading of claim batches into the COS. Claims are processed daily through a mass adjudication process via an automated job once the claims upload into the COS is completed.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We currently acknowledge claims receipt according to the Agency's requirements. Claims submitted electronically receive an electronic receipt within 24 hours after the start of the next business day; receipts for paper claims are available through our secure provider website within 15 days of receipt.

Claims that pass EDI edits are loaded to the adjudication system and subject to a series of processes which:

- Apply claims adjudication edits to all claims based on member eligibility, provider status, timely filing, medical necessity, type and quantity of benefits, valid dates of service, pricing, prior authorization, third-party liability, and fraud and abuse detection. Front-end edits are closely aligned with encounter submission requirements to make sure that we have complete and accurate claims data to support the encounters reporting requirements established by the Agency.
- Verify that the provider is not excluded by Medicare or Medicaid. We screen against the federal exclusion databases monthly. If we identify any, we update our MIS and deny those claims.
- Use a series of sophisticated edits to evaluate the claim against processed claims data to identify duplicate claims. We automatically deny claims that are definitively identified as duplicates and pend claims for review when we cannot make a positive determination.
- Apply enhanced clinical and National Correct Coding Initiatives (NCCI) edits to check each claim for codes subject to unbundling or Medically Unlikely Edits for codes on a claim that may be incompatible. We base the criteria on industry standards and internal reimbursement policies.
- Audit claims to validate services across providers, reviewing claim modifiers, provider specialty, and service specific rules regarding frequency.
- Evaluate claims for never-events and provider-preventable and hospital-acquired conditions, reducing or denying payment if indicated.

We process claims that pass automated adjudication edits during the next payment cycle. The system denies claims that fail adjudication edits and notifies the provider of the reason for the denial on the remittance advice (RA). The RA is available both electronically and on paper and identifies the level of payment or denial reason using standard procedures and definitions. The RA also includes instructions on how to file a claims dispute and lists the designated timeframe for doing so.

Our claims processing system uses automated workflows to manage the steps required to auto-adjudicate a claim and maximizes the speed and efficiency of the claims process. A claim moves automatically through the system based on its status at points in the process, minimizing manual work. When manual intervention is required, the workflows automatically route claims to specific work queues and analysts skilled in addressing the specific edit.

We closely monitor the claims process to ensure we are adjudicating and paying claims in a timely manner. There are several checkpoints with service level agreement (SLA) reporting throughout the claims workflow to provide insight into the timeliness of claims processing. On an immediate basis, we receive feedback on EDI claims that have successfully loaded into the COS and can track claim movement from adjudication to payment through reporting and workflow queues.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

**** INNOVATION: Electronic Billing Support for Non-traditional Providers**

Clear Health understands that health care billing can be a challenge for Assisted Living Facilities (ALFs) and other non-traditional providers. As we have built relationships with these providers over the past 14 years, we have listened to their concerns and are working to build a solution that supports ease of billing and timely payment for non-traditional providers such as ALFs, Adult Day Health Care, home modification, and emergency response services. While we currently have a roster billing form for providers to use, we are also building a user-friendly, online claim submission tool where providers will be able to enter required billing details and submit electronically. This billing solution will “remember” previous submission details entered for that tax identification number, thereby streamlining the billing process for providers and will also support billing prior to the first of the month, so that checks can be processed as early as possible each month. **

1.2.1. Claims Payment

Clear Health executes claim payment cycles daily, Monday through Saturday, generating physical checks or initiating Electronic Funds Transfer (EFT) and preparing provider RAs.

Paying providers quickly and efficiently is a priority, and we encourage providers to take advantage of our free EFT program. We give providers several options for receiving RAs:

- View the electronic RA online and print it at their office
- Download a HIPAA-compliant 835 data file to load into their system
- Receive paper RAs by mail

Electronic payments and RAs are available the day of payment, and paper copies (checks or RAs) are mailed within two business days.

1.2.2. Standards for Speed and Accuracy of Processing

Clear Health has a strong track record of consistently meeting and exceeding claims payment timeliness standards. We pay claims accurately and timely and have configured our claims payment system to fully comply with Florida requirements and will make required adjustments to satisfy the Florida SMMC Contract.

Our claims system stores the receipt date for paper and electronic claims and the adjudication date of payment or denial decision, using these dates to monitor and measure timely processing and compliance with State and federal regulations. We also maintain the claims payment and check dates for all processed claims where payment amount is greater than zero.

Since 2014, Simply, (inclusive of Clear Health) has processed almost 20 million claims under our Medicaid Contracts, achieving the following results for clean claims payment:

- 84.8 percent paid within seven days
- 86.7 percent paid within 10 days
- 93.8 percent paid within 20 days

We will continue to improve our performance for claims processing timeframes under the new SMMC Contract.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.2.3. Resolving Pended Claims

When edits trigger during claims processing, the system pends the claim for manual review. The claims workflow system routes pended claims to specific work queues based on claim tiers that reflect the complexity of the claim. The Claims department aligns Claims Analysts with claim complexity tiers so that specialized analysts with experience handling the specific claim type or pend reason review those pended claims. This alignment helps us deliver timely and accurate payment to providers. Analysts follow specific processing instructions based on the pend code applied to the claim and approve or override the edit. The claim then adjudicates.

To facilitate timely resolution, throughout each day Claims Management monitors claims that pend for additional review related to medical necessity, prior authorization, or other reasons. Daily, weekly, monthly, and ad hoc reports list the number of pended claims by aging category so we can quickly react to any fluctuations in claims submission and volumes. By working pended claims in the order of priority, we pay providers efficiently and achieve processing goals.

1.2.4. Claims Denial Criteria/Protocol

Our MIS gives us the flexibility to configure our claims processing system with Florida SMMC Contract rules and Program benefits, including what to do if a claim fails an edit (pend, pay, or deny). During implementation, we will document and execute claim edit configuration changes based on new Florida SMMC requirements. We configure our claims system with an extensive list of denial reason codes, which provides meaningful information regarding the cause for a claim denial. Some of the common reasons for a claim denial include the following:

- Benefit Denials – such as member not eligible on the date of service, service rendered without required authorization, and benefit limit reached
- Provider Contract Denials – such as claim submitted after timely filing limit, duplicate, service not covered under contract, coordination with other health insurance, and invalid Medicaid ID
- Clinical Denials – such as services not supported by documentation, medical records required, procedure not supported by diagnosis, and NCCI edits to promote national correct coding standards and control improper coding that could result in inappropriate payment
- Program Integrity Denials – such as rendering provider under federal or State investigation

1.2.5. Identifying Claims and Claim Lines that Meet Denial Criteria

During the adjudication process, our claims processing system reviews each claim line against a series of business rules and validations in compliance with federal and Florida SMMC requirements. Each claim line passes through all business rules, so a single claim line could receive multiple denial reasons. After all edits have been applied, the system checks the results and sets the claim and claim line status to pay, deny, or pend as appropriate. Individual claim lines may have a deny status but if other claim lines on that claim pass all edits and are marked to pay, the system marks the overall claim to pay. The system automatically adjusts the claim to pay once the denied claim lines are addressed. We list all applicable denial reasons on the RA so that providers have complete information for any corrections that may be indicated.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.3. Processing Claims for Non-participating Providers

We are committed to facilitating access to medically appropriate care for our members and assuring the needs of members are met and covered services are provided, even if we are unable to provide the service through our provider network. In the unlikely event a network provider is unavailable, our procedures foster timely access to non-participating providers so that our members can access the full range of services quickly, regardless of network capacity. When an access issue is identified, our Provider Relations Director assigns a representative to negotiate a case contract or letter of agreement, guaranteeing reimbursement of services to out-of-network providers for as long as we are unable to provide the medically necessary covered services within our network. The case contract or letter of agreement will be used as part of the claims process and the provider will be reimbursed accordingly.

When a claim is received from a non-participating provider, we first check to see if the member is within their continuity of care period, and, if so, the system pends the claim for manual processing. A Claims Analyst works with the Provider Relations team to contact the provider and request documentation to support reimbursement at their prior level, creating a corresponding case contract or letter of agreement to facilitate appropriate claims payment. If the provider does not supply the required documentation, the claim will be processed according to the Medicaid fee schedule.

Most services that are provided by a non-participating provider outside of the member's continuity of care period require an authorization, and the system will automatically check to see if one exists. If an authorization is required and none is found, the claims will deny for missing authorization, and the provider will be notified via the RA.

1.4. Cost Avoidance and Third-party Liability

Clear Health's cost avoidance and third-party liability processes currently comply with all State and federal requirements including those specified in Attachment B, Section D, Third Party Resources in the ITN. Our claims processing system fully supports coordination of benefits (COB) functionality, recognizing Medicaid as the payer of last resort.

We emphasize and prefer prospective cost avoidance versus post-pay recovery whenever possible. To maximize cost avoidance, we:

- Accept other health insurance (OHI) leads from a variety of sources, including members, providers, and an external vendor who analyzes our members against data from more than 150 health insurance organizations
- Dedicate employees to daily review and verification of potential OHI and third-party liability leads

When the claim or the member record indicates alternate insurance, our claims processing system automatically evaluates the claim for COB. During adjudication, the claims processing system compares claim service dates to OHI coverage dates. If dates match, the system pends the claim for analyst review. If the claim is eligible for cost avoidance, the analyst coordinates the claim using COB guidelines.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

If an OHI source is identified and the required Explanation of Benefits is not attached to the claim, we deny the claim pending review by the primary payer and return of an explanation of benefits, provided the claim is not subject to pay-and-chase rules, such as EPSDT, Title IV-D, or pregnancy related services. Claims that are subject to pay-and-chase rules will be paid up front. If the Explanation of Benefits is attached, the system pends the claim for review. For services where Clear Health is determined to be secondary, we pay the claim in accordance with State and federal guidelines.

We also analyze paid claim data to retrospectively identify opportunities for COB or third-party liability recoveries. We provide our recovery vendor with a monthly data file of all processed claims to compare to their data repository to identify the appropriate primary carrier.

When overpayments are identified, we follow documented procedures to recover overpayment. We send written notification to the provider of the overpayment, furnishing supporting documentation. We offer providers the option of refunding the overpayment directly to Clear Health or offsetting future payments by the overpayment amount. We note recovery amounts in the claims record, and when new OHI information is identified, it is incorporated into the member record to facilitate COB for future claims.

1.5. Medicare Crossover Claims

For members with our Medicare Advantage Special Needs Plan (SNP), a provider can submit a single claim that will be automatically processed through Medicare, SNP crossover, and Medicaid, regardless of whether the provider submits the claim under the member's Medicare or Medicaid identification numbers, our claims processing system identifies the member as dual eligible and processes the claim first through Medicare. In our claims processing system, each service line on the claim is:

- (1) First adjudicated against Medicare benefits
- (2) Then adjudicated against crossover/SNP Agreement benefits, picking up service lines not covered under Medicare and any cost-sharing amounts for covered service lines
- (3) Finally adjudicated against Medicaid benefits

For members with third-party Medicare, Clear Health accepts the Coordination of Benefits Agreement (COBA) file that includes Medicare adjudicated claim data and automatically processes crossover claims for all our dual eligible members who are not participating in our Medicare Advantage plan — covering the Medicare deductible or coinsurance amount up to the Medicaid maximum fee, less any amounts paid. We fully adjudicate each crossover claim, enabling the provider to document any unpaid portion of the deductible or coinsurance as a bad debt on the Medicare cost reports.

1.6. Provider Training and Outreach

We educate providers on claims submission and billing using multiple strategies, including orientation and ongoing training via webinars, one-on-one training by Provider Network Managers, email bulletins and blast faxes. We give Florida SMMC providers the option to submit claims through the clearinghouses — Change Healthcare (formerly known as Emdeon), Availity,

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

and Smart Data Solutions — with claim submission at no cost using Availity. Availity is a multi-payer portal that enables claims submission to multiple payers through a single sign-on and offers providers many services that include eligibility and benefit inquiries, claims submission, claims status inquiry, and claims appeal submission.

Educating providers on claims submission is not enough; a true partnership involves us proactively outreaching when we see they need help with claims submission. Our Provider Network Managers meet monthly with our providers to answer questions and provide assistance and training on proper billing practices and how to appeal a claim for a denial or other reason, such as payment amount. Our provider education program covers claims submission during orientation and ongoing outreach. In addition to in-person visits, we use a variety of other methods, including newsletters, bulletins, updates, and training resources available on our provider portal blast faxes with important need-to-know information.

We also reach out to providers when our review of denied claims data indicates a potential problem with proper billing procedures. For example, if a provider has a high number of claims denying because of a missing prior authorization, we educate the provider on the list of services that require prior authorization and the methods they can use to submit the request and monitor approval.

2. USE OF METRICS

Clear Health utilizes various tools and reports that allow management to monitor and measure processing performance, identify problem areas, and review quality. Reports list the number of pended claims by aging category and allow us to quickly react to any fluctuations in claims submission and volumes. By working pended claims in order of receipt, we can pay providers efficiently and achieve processing goals.

- Claims Dashboard — Reports key metrics, including claims received, claims paid, percentage of claims submitted electronically, percentage of claims auto-adjudicated, and percentage of claims paid or denied. Health Plan leadership uses this report to monitor claims trends and highlight any areas of concern.
- Claims Activity and Inventory Report — Comprehensive report of various claims metrics, including claims turnaround time, claim denial rates, and claims count by input method. Health plan and Claims Operations leadership use the reports to monitor performance and trends.
- Work Item Aging by Queue — Reports the volume and age of pended claims volume by work queue. Health plan and claims operation leadership review the report daily to resolve pended claims and identify any outliers quickly. The report highlights claims based on regulatory SLAs to target intervention, as needed.
- Claims Audit Report — Monthly reports of claims audit results for payment and financial accuracy. Health plan and Claims Operations leadership analyze data monthly to monitor trends and identify opportunities for claims process improvement.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2.1. Monitoring Claims Accuracy

Claims adjudication accuracy is vital to our role as stewards of State funds and as true partners to providers, committed to their satisfaction.

We have incorporated several checkpoints throughout the claims workflow process to review claims samples in real time for processing accuracy. These checkpoints include:

- Pre-payment audits of auto-adjudicated claims
- Sampling of Examiner adjudication prior to payment

At each step, claims accuracy is assessed and any issues are identified with the payment amount, the source of the problem (errors with claims data entry, procedural errors, or system issues) is researched for resolution, and the claims are corrected and reprocessed.

We also subject all our Florida SMMC claims to periodic quality audits by our national Claims Quality department to verify timeliness, accuracy, and integrity and to evaluate the financial, payment, and statistical accuracy of our claims processing system. As a result, we have been cited as one of the best financially performing plans in Florida and consistently receive high quality scores.

To measure overall claims accuracy, Claims Quality will conduct an end-to-end audit (from receipt to final disposition) on a random statistically representative sample of Florida SMMC claims each month to verify compliance with all federal, State, internal requirements, and provider contracts. In addition, Claims Quality performs specialized audits across all markets, including the following:

- High-dollar Audits — Daily pre-payment audits of all high-dollar claims with payment amounts over \$30,000, often including denied claims with charges greater than \$75,000
- Individual Focus Audits — Weekly audits on five claims from each claims analyst and daily audits of up to 10 claims during the new-hire training period to confirm processing accuracy
- Focus Audits — Targeted audits on specific claim types, specific scenarios, or surrounding processes to measure performance and remediate claims issues
- Post-implementation Audits — Targeted audits on new contract or program implementations (including our Florida SMMC operations) to help assure accuracy

2.2. Denials Management Program

Clear Health recognizes the vital role timely and accurate claims processing plays in provider satisfaction. We are committed to paying claims timely and accurately, and we manage claim denials and proactively communicate with providers as part of our daily operations. Monitoring and managing claims denials is a crucial part of our duty and commitment to pay provider claims accurately and in compliance with federal, State, and Agency requirements.

Our Florida Operations team operates a denials management program with support from our national Claims department. Together they deliver accurate and timely adjudication, notify providers of the reason for claims denials, and answer and investigate any provider questions.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Through careful review of denial rates and trends and prompt analysis of any unexpected results, we minimize the occurrence of inappropriate claim denials and minimize any undue administrative burden on our providers.

Claims Operations includes daily monitoring of many claims metrics, including denials.

Via our Denials Management program, our Florida Operations team and Claims department regularly review reports (many available on demand), including these four key reports:

- Top 10 Denial Reasons — lists the top denial reasons, including the denial code, reason, and count of denied claims, and also includes the total number of denied claims for any reason
- Top 10 Providers — lists providers with the highest count of denied claims
- Denial Reason Tracking — organized by reason, shows the number and percentage of denials for a variety of time periods, including month by month, year to date cumulative, and comparisons to prior month and year run rates
- Provider Claims Report — run on demand for a specific provider, shows claim counts by status (paid or denied), denial reason, and average claim turnaround times

Clear Health carefully monitors claim reports and metrics, including denials, focusing on trends and variances (up or down). If we see an outlier in the data, we investigate, drilling down into the details, conducting a root cause analysis (if warranted), and promptly rectifying any processing problems. We always strive to identify and fix any inaccurate processing before providers call or appeal claims. If we do encounter a problem, we implement a fix, identify and reprocess affected claims, and alert Provider Relations so that they can inform providers.

2.3. Identifying and Addressing Deficiencies or Contract Variances

Clear Health has historically maintained an average of 98 percent or greater for payment accuracy and closely monitors our performance against Agency standards to confirm our continued compliance. To monitor and maintain our high claims processing timeliness and accuracy standards, our leadership reviews detailed dashboards of key program metrics to track our performance.

Key metrics include average turnaround time for clean claims, percentage paid within seven, 10, 20, and 90 days of receipt, and claims financial and payment accuracy. Regular and focused visibility into claims processing performance helps us identify and address deficiencies early. In addition to monitoring claims timeliness and accuracy metrics, our national support centers have several mechanisms and processes to identify provider or system issues related to claims, and our Florida-based team adds additional opportunities, resources, and touch points.

Internal audits are conducted by the Audit and Recovery department, and results are reviewed with Claims staff monthly to assess any payment or procedure errors found, their individual accuracy scores, and provide training, when needed.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Throughout the organization, our staff may identify issues in the following ways:

- Claims Department Management and Analysts — during claims adjudication and monitoring
- Encounters Team — during preparation of encounter file submissions for the Agency and review and analysis of response files
- Claims Quality Department — during routine and focus audits of Florida SMMC claims and claims from affiliate states (which may indicate system-level issues)
- Provider Services call center and EDI Helpdesk — through tracking and trending call topics
- Clear Health Internal Resolution Unit (IRU) — during review of provider claim disputes
- Provider Data Management — through regular quality audits to validate data integrity

The IRU is a key component of our approach to issue resolution. Clear Health staffs an IRU with highly trained and experienced research analysts focused on researching and resolving complex provider claims disputes and appeals. IRU staff determine whether the claim was paid appropriately based on the configuration of the system, including business rules, provider contract, plan benefits, and federal and State regulations.

When we identify a potential provider- or system-level claims issue, we route the information to the appropriate department (such as provider configuration or front-end claims editing) and track it to resolution. Provider education plays a big part in the resolution process.

3. FACILITATING RAPID CYCLE IMPROVEMENTS

Clear Health's Claims Operations and local management analyze claims reports for issues such as possible provider submission problems, system problems, or other areas of improvement. If, for example, we see a high number of claims pending for a specific reason, we will analyze the claims to determine if there is an appropriate intervention such as provider education, verifying authorization rules, or modifying a system edit. A high volume of claims pending or denying for a specific provider will prompt additional review and often results in proactive outreach to the provider by Provider Network Managers.

Pre-adjudication processing is one of the cornerstones of timely and accurate claims processing. Based on specific business rules and regulatory guidelines, the claims pre-processor uses programmed logic to perform automated, adjudication processes. This process has a direct impact on the improvement of the auto-adjudication rate and accuracy. This is a dynamic and scalable process that is continuously audited and enhanced to meet the demands of changing regulatory requirements as well as business needs.

We monitor claims information daily, including timeliness reports, aging reports, denial reasons, audit results, and provider issues to identify opportunities to fine-tune programs and processes and to improve results. Reports help us ensure that we are not only meeting Agency requirements but also paying claims as quickly and accurately as possible. When we identify an opportunity for improvement, we dedicate resources toward implementing change.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

With the roll-out of the new COBA process in 2017, we received an unusually high volume of claims in the process queues and quickly pulled together a cross-functional team to identify the root cause and deploy a short-term production fix. We created separate COBA work queues and production reports while working on the long-term automated solution which, when implemented, quickly moved the auto-adjudication rate from almost 0 percent to 90 percent with 99 percent accuracy.

Our national quality and process improvement department is dedicated to improving operational performance. They conduct extensive audits to establish performance baselines and provide feedback to operational departments. They combine audit data with other data inputs to identify improvement opportunities to increase efficiency and reduce errors. The local Claims Operations team combines this data with their own root cause analysis to explore system capabilities and improve services that we deliver to our network providers. Cross-functional workgroups meet on a regular basis to analyze data associated with the most prevalent causes of provider dissatisfaction, including claim denials, provider disputes, complaints, grievances, and appeals. The information is used to identify the root cause and implement solutions.

Clear Health actively shares best practices across the enterprise so that all our members and providers can benefit from innovation in any of our markets. For example, provider training materials on claims submission are used throughout the State network to help educate providers on timely and accurate claims submission, as well as upcoming regulatory billing changes.

3.1. Best Practices Generate Results

Routine claim audits help us rapidly address deficiencies or variances and prevent provider complaints and appeals. Our frequent monitoring efforts have also helped to avert claims payment errors caused by incorrect coding practices. During a claim audit, a random sample of claims is selected for review and verification. During one such audit, we identified a billing error for a provider who was submitting claims with the incorrect modifier and receiving payment for multiple services when only one had been provided. As a result, additional monitoring has been added to our claim process, which has helped our Plan and our affiliate health plans avoid claims payment errors due to this issue.

**** RESULTS & SUCCESSES:** Focused review also helps to identify potential fraud, waste, and abuse (FWA) cases for further investigation. Our Finance team partners with Claims Operations and the Special Investigations Unit to identify statistical outliers in billing that may be related to cases of FWA. Here are a few examples of FWA cases that were identified during our regular reviews:

- During one financial review for claims expenditures by service type, it was noted that one provider had significantly higher claims payments for that period than all other providers in that sample. Additional research showed that this was not an isolated incident for this provider, and the case was turned over to our internal investigation unit who determined that the cause was fraudulent billing practices. This provider is no longer part of our network.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- One recent review of billing patterns for NCCI Procedure-to-Procedure (PTP) edits resulted in identifying a provider whose billing patterns stood out from the statistical norm for providers of that type. This provider was billing more than one-third of their claims with a modifier 59 with a total of \$3.5 million paid in a one-year period. As a result, this provider has been terminated and an investigation has been opened by our Special Investigations Unit.
- We also evaluate cost trends and noticed that growth hormones had become a growing cost trend in pharmacy. Further investigation uncovered a physician who had prescribed \$2.6 million of growth hormones to 42 unique members over 2 years. The provider was subsequently terminated, and the case was referred to our Special Investigations Unit for a review of over prescribing. **

4. PROVIDING THE AGENCY WITH ACCESS TO METRICS AND DATA

Clear Health has established claims payment performance metrics, including those for quality, accuracy, and timeliness, and will make documentation of such metrics available for Agency review upon request.

We currently submit an aging claims summary in compliance with the schedule and format specified in the Managed Care Plan Report Guide and will continue to comply with this requirement.

5. PROVIDING NETWORK PROVIDERS WITH ACCESS TO DATA, METRICS, AND TRENDS

As active partners with our providers, Clear Health recognizes that they need actionable information to drive their business performance and we provide them with multiple methods to access claims data and pertinent metrics including the following outward facing tools:

- Our provider portal lets providers quickly and easily check claims status or download a HIPAA-compliant ASC X12N 835 remittance file. By integrating with Availity, our provider portal gives providers access to all of Availity's functionality via single sign-on, including access to check eligibility or download remittance data. The portal also provides a Claim Status Listing tool which allows providers to obtain a list of claims submitted to Clear Health for a specified 30-day period. The listing includes high level submission details including Claim ID and status.
- Our interactive voice response system allows providers 24/7 access to claims status information.
- Our provider help line can also provide claims status and information during regular business hours.

We give providers several options for receiving RAs - view online, download a HIPAA-compliant ASC X12N 835 data file, or receive paper copies by mail. The RA provides detailed status information for each claim including amount paid and multiple denial reason codes, if applicable.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Clear Health employs contemporary business intelligence technology with our Clear Health Analytics tool, creating near real-time data analytics that we share with providers on a consultative basis. The following are some examples of metrics and trends that can be shared with providers:

- Inpatient authorizations per 1000
- Top specialty referrals
- Medical Loss Ratio (MLR) with main cost drivers such as pharmacy, inpatient, outpatient
- Average cost per encounter
- Average cost per member
- Average cost per visit
- Average visits per member
- Hospital equivalence reports for hospital performance comparison

Provider Network Managers meet regularly with their providers to review the information from our data analytics as well as details from the high claims denial trend report. We share this information with providers to give them details on their claims, including average claim turnaround, paid and denied claims (dollars and count), claim counts by denial reason, and claim counts for other metrics, including input, procedure code, and diagnosis code. This practice provides consultative insights into their business.

6. MANAGING SUBCONTRACTOR CLAIMS

Select benefits and services are delegated to Agency-approved subcontractors representing an extension of Clear Health and the services we deliver to our Florida members. We have an established and proven Subcontractor Oversight Program which we have employed and refined over a 14 year history of serving members under Agency programs. Clear Health sets clear expectations with our subcontractors through our local Vendor Delegation Oversight Group (VDOG) supported by national subcontractor management resources. We focus on providing the best service experience for our members, verifying contractual compliance, and enforcing consequences for non-compliance.

Prior to selection, we conduct a pre-delegation audit to verify each subcontractor's ability to provide the services for which they are contracted. During this audit, the subcontractor must provide evidence of the following:

- HIPAA compliance for systems and security
- Systems' capability to timely and accurately produce Plan and State required reports in correct format
- Systems' capability to capture required data reporting elements to support encounter data submission, required claims report for the Agency as indicated in the Medicaid report guides, required ad hoc claims data for submission to the Agency, OIG, and OAG as required, and required performance metrics as required by Clear Health

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our subcontracted vendors with claims delegation are required to comply with the statutory claims processing requirements and the requirements of the SMMC Contract. When there is a conflict in the requirements, the more stringent policy prevails. Subcontractors are held to the service level requirements in the SMMC Contract, including timeframes for electronic and paper claims for the following:

- Claims acknowledgement
- Claims payment
- Notice of claims denial

When Clear Health delegates claims payment, we maintain our responsibility for ensuring the function is conducted in compliance with the SMMC Contract. For this reason, we require the following of all our delegated subcontractors:

- We require our subcontractors to submit all claims data in a condensed time frame to allow for review and consolidation with our submission to the state.
- We require our subcontractors to submit monthly encounter data and claims processing performance metrics that demonstrate the subcontractor's compliance with all Plan, State, and federal requirements.

Details for each subcontractor's claims payment processes are provided in the following subsections. Clear Health has delegated claims processing functions to the following subcontractors:

- Beacon Health Options
- Chiro Alliance Corporation
- DentaQuest of Florida, Inc. (DentaQuest)
- DentaQuest of Florida, Inc. D/B/A EyeQuest (EyeQuest)
- Express Scripts, Inc.
- Health Network One, Inc.
- LogistiCare Solutions, LLC (LogistiCare)

6.1. Beacon Health Options

6.1.1. Claims Processing and Payment

Clear Health's behavioral health subcontractor, Beacon Health Options (Beacon) has been paying behavioral health claims for more than 20 years. Beacon processes 22 million behavioral health claims annually and understands the importance of prompt, accurate claims payment.

Beacon's FlexCare360 MIS supports managed behavioral health programs starting with the eligibility process and continuing through claims adjudication and payment. The system maintains benefit structures, provider reimbursement methods, and adjudication rules for each program and is fully integrated with eligibility (including data collected regarding other coverage), provider fee schedules, benefits, timely filing, and authorization requirements.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Beacon offers web portal capabilities to make administrative requirements more efficient and user-friendly for providers. Through the eServices provider web portal or EDI gateway, providers can upload electronic claims which are then run through the FlexCare360 claims adjudication engine for processing. The eServices and EDI systems are available to providers 24/7. The system supports electronic submission of claim batches in HIPAA-compliant 837P and 837I formats and secure, timely, and accurate payment to providers. When a paper claim is submitted, Beacon will either enter the data directly from the scanned image on the day of receipt, or create an 837 from the paper image submitted to FlexCare360.

6.1.1. Claim Submission

Beacon's FlexCare360 system provides streamlined paper and electronic claim submission for participating and non-participating providers. Regardless of how the claim is submitted, Beacon requires industry standard service codes (revenue codes, CPT codes, HCPCS codes) and ICD-10 diagnosis codes. Claims that are submitted electronically and paper claims that are manually keyed or converted into an electronic format during a scanning process are loaded into the FlexCare360 system and then processed. The system automatically applies edits, including specific benefit requirements for Florida Medicaid claims.

Beacon is committed to helping Florida providers manage their administrative functions more efficiently by making electronic claims submission a viable option for all providers. Beacon accepts HIPAA-compliant 837 formatted files from any provider's software application or third-party vendor. Alternatively, providers without electronic claims software can submit via web-based direct claims submission. The application is easy to use and provides immediate validation results.

6.1.1.1. Electronic Claims

Providers are encouraged to submit all institutional and professional claims electronically. Electronic submission results in fast processing times, high claims approval rates, and fast revenue cycles, while reducing unnecessary administrative time. Electronic claims can be paid in a little as one day. Beacon makes it easy for providers to submit claims electronically, through any of three methods:

- EDI (837 format)
- eServices as primary method or in conjunction with EDI
- Change Healthcare claims clearinghouse

Beacon receives approximately 88 percent of all claims electronically. About 75 percent of Beacon's Florida providers use a clearinghouse, such as Change Healthcare, to submit claims electronically and 25 percent submit 837s directly to Beacon's eServices portal.

6.1.1.2. Paper Claims

While paper submission of claims is not encouraged, providers can submit them manually, using the CMS 1500 or UB-04 claim form. Beginning in Q1 2018, Beacon is consolidating and streamlining paper claims by outsourcing to a preferred vendor, Fidelity Information Services Inc. (FIS). By collaborating with FIS, an industry leading organization headquartered in Jacksonville, Florida, Beacon enhances the consistency, quality, and timeliness of paper claims. FIS will

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

manage the intake of all claims and correspondence received through a variety of channels, including paper mail, email, and faxed documents, as well as images submitted through online member portals. All paper claims will be received and scanned by FIS. FIS generates an 837 and sends it to Beacon's FlexCare360 system for adjudication. This enables Beacon to receive and enter all incoming paper claims via a single, standardized process, improving turnaround time and efficiency.

6.1.2. Use of Metrics

Clear Health has established benchmarks for our behavioral health subcontractor, Beacon, for all delegated areas, including SLAs related to claims payment. These include the following:

- Electronic claims must be paid or denied/contested within 15 calendar days after the receipt. Notification to the provider of a contested claim shall include an itemized list of additional information or documents necessary to process the claim.
- Non-electronic claims must be paid or denied/contested within 20 calendar days after the receipt. Notification to the provider of a contested claim shall include an itemized list of additional information or documents necessary to process the claim.
- 50 percent of all clean claims must be submitted within seven calendar days. 70 percent of all clean claims must be submitted within 10 calendar days. 90 percent of all clean claims must be submitted within 20 calendar days.

These metrics are used to assure that all Beacon staff are aware of the benchmarks and targets. Each Claims Processor is measured for productivity and accuracy. Beacon reviews three to 10 percent statistically random samples of all claims processed after payment and reports these results to Clear Health each month. All claims errors identified are returned to the originating examiner for correction. Each Claims Processor is expected to maintain a 98 percent mechanical accuracy rate and a 99 percent financial accuracy rate.

6.1.3. Facilitating Rapid Cycle Improvements

Clear Health's subcontractor Beacon uses an accountable, data-supported continuous quality improvement (CQI) process to refine and improve claims processing across the organization. Beacon delineates thresholds and benchmarks, identifies responsible parties who are accountable to monitor and promote the change process, implements corrective action plans and monitoring procedures, and acts on the results of those plans. Through data collection, measurement, and analysis, aspects of claims processing that demonstrate opportunities for improvement are identified and prioritized for quality improvement activities.

Beacon's claims processing quality review is an integral part of the claims adjudication process. Beacon has both internal and external audit processes in place. Staff performs daily internal audits on claims using an auditing process that mirrors an external audit. There are multiple levels of audits conducted that focus on the financial outcome of the claim and on policies and workflows used in the adjudication process.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Claims are audited both pre- and post-payment to evaluate the abilities of Claim Processors to consistently meet individual and departmental goals. Each claim audit reviews 41 elements to check mechanical and financial accuracy, such as:

- The correct authorization was used
- The correct provider record is selected for adjudication
- The benefits have been applied correctly
- The correct procedure codes have been entered
- The dates of service match the bill lines on the claim image
- The appropriate fee schedule or rate was applied
- The claim received date meets timeliness provisions
- The diagnosis is valid and payable based on client's benefit structure
- The place and type of service is accurate
- Checking claims history to ensure that the claim is not a duplicate
- Confirming eligibility against the dates of service on the claim
- Determining if coordination of benefits applies
- Confirming the number of units against the claim image

Beacon's claims quality assurance process includes daily internal claims audits, as well as independent external audits. All audited claims are entered into an audit database specifically designed to allow flexible reporting. The results of these audits are used by the entire claims management team to ensure processes and procedures are working effectively. This information is used to continually improve the claims adjudication process and validate the accuracy of business rules contained in Beacon's information system. Claims Supervisors can also run real-time reports at the Claim Processor and client level to ensure claims are processed appropriately, to identify retraining needs, and for performance evaluation purposes. The claims management team meets with the individual Claim Processor monthly to review the audit results for the previous month. Monthly trending of audit errors is also completed to identify problems and implement continuous improvement. Additional trending is completed to identify any outlier providers requiring further review for potential fraud and abuse.

Beginning Q1 2018, Beacon is streamlining quality review functions through an independent audit team. Claims will be audited by Beacon's Corporate Claims Quality Improvement Program. This program is an effective tool in evaluating the abilities of the Claims Processor to achieve the goal of assuring that accurate and efficient application of the appropriate policy and procedures are used. This includes the review of all high dollar claims before payment.

6.1.4. Providing the Agency with Access to Metrics and Data

Beacon submits encounter data and monthly reports with detailed timeliness and accuracy metrics to Clear Health, who then aggregates this information with other claims data to produce all Agency required reports.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

6.1.5. Providing Network Providers with Access to Metrics and Trend Data

Beacon's eServices web provider portal allows authorized administrators and users to view aggregate claims information for their entire provider practice or organization. The Claims Approval with Denial Report displays a table chart and pie charts, showing the number and percentage of claims approved along with claim denials by reason. The report includes an option to calculate totals by member and provides additional details for each denial code when the user moves the cursor over the code in the table. If the provider is contracted with Beacon to serve more than one health plan, results for each health plan are displayed separately. Users can also print this report.

Beacon Managers of Provider Partnerships (MPPs) also work closely with providers across multiple outreach channels to provide assistance and build highly collaborative relationships and drive performance improvement through education and data review. MPPs serve as a hybrid position encompassing clinical, quality, and provider supports as a single point of contact. The MPP serves as a "concierge" for high-volume providers by providing timely resolution of provider concerns, presentation of data identifying provider performance over time, and identification of strategic plans to address performance improvement. Today, Beacon employs four MPPs across Florida (positioned regionally) who are focused on assuring full engagement with 80 of its major network providers throughout the state.

Beacon shares practice level information from the provider profiler quarterly to high-volume practices. Beacon's MPPs typically hold meetings in person. These meetings focus on the interpretation of quality reports and collaborative technical assistance intended to assist practices in reducing variation in practice patterns and improving the quality of care.

Beacon's MPPs share more than 20 metrics with providers, which are benchmarked against like providers in the state. Utilization management metrics for inpatient and higher Levels of Care include readmission rates, the length of stay by the hospital, the length of stay by the attending provider, quality of care and service issues, admissions to each facility, and admissions to lower levels of care, such as step downs.

Beacon also evaluates those outpatient providers with high no-show rates and those providers with members who only attend one post-discharge visit with no follow-up. This information is reviewed facility by facility. For high-volume facilities, this information is shared with the facility by using a blinded comparison to other facilities, with instances of unusual patterns of utilization discussed. Information on members is also tracked, such as high-dollar claims, readmissions, and diagnosis; review of these items allows Beacon to offer intensive case management services when it is needed. For outpatient care, metrics include the length of stay; members seeing multiple providers; providers seeing multiple family members; providers and their rate of admission to higher Levels of Care; and quality of care and quality of service.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

6.2. Chiro Alliance Corporation

6.2.1. Claims Processing and Payment

Clear Health's chiropractic subcontractor, Chiro Alliance Corporation (CAC), accepts provider claims submitted by paper or electronically. All paper claims and correspondence are scanned and stored with the document's received date. CAC auto-adjudicates any claims where additional review is not necessary and engages its third-party administrator, ClaimsXpress, to review and process any claims that are not system adjudicated. CAC processes payments daily, with checks and EFT's generated based upon received date, and payments issued in compliance with regulatory guidelines.

6.2.2. Use of Metrics

Claims Managers review a daily aging report to make sure that issues are addressed and claims are processed according to required timelines. A monthly version of the report tracks and trends the timeliness of claims processing and payment. In 2017, to improve accuracy of claims processing, CAC implemented a daily claims pre-pay audit and conducted monthly audits to verify the quality and accuracy of their claims processing efforts.

6.2.3. Facilitating Rapid Cycle Improvements

CAC uses the daily and monthly metrics to identify issues that need to be addressed and conducts a root cause analysis to determine the changes that are needed. We monitor claims information daily including timeliness reports, aging reports, denial reasons, and provider issues to identify opportunities to improve results. Implementation from identified continuous improvement opportunities is mutually agreed upon with the plan to meet Agency requirements.

6.2.4. Providing the Agency with Access to Metrics and Data

CAC submits encounter data and monthly reports with detailed timeliness and accuracy metrics to Clear Health, who then aggregates this information with other claims data to produce all Agency required reports.

6.2.5. Providing Network Providers with Access to Metrics and Trend Data

CAC has a toll free provider help line that can provide claims status and information.

6.3. DentaQuest

6.3.1. Claims Processing and Payment

Clear Health's dental services subcontractor, DentaQuest, allows providers to submit dental claims using three methods: paper (mail or fax), electronically via electronic data interchange (EDI), or using the DentaQuest web portal. Providers can submit EDI claims using a clearinghouse or as a direct Trading Partner with DentaQuest submitting X12 837D claim files via either a direct SFTP connection or using DentaQuest's Trading Partner Portal (TPP). Providers can also enter claims directly using DentaQuest's web portal.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

DentaQuest's system automatically auto-adjudicates clean claims and authorizations that are submitted electronically and provides claim status determination and payment amounts online the following business day. Once a week, DentaQuest processes payment for claims adjudicated as of 5 p.m. that day, and their customer service agents are able to provide data on these real-time events immediately.

6.3.2. Use of Metrics

DentaQuest tracks claim processing timeliness and accuracy through multiple reporting mechanisms. DentaQuest utilizes a "first-in-first-out" prioritization of claims in queue and reviews age of claims queue reports daily to ensure the system functionality is effectively prioritizing claims in queue. DentaQuest also reviews turnaround time reports at a minimum on a monthly basis, with claims audits performed by the Quality Assurance team to ensure processing accuracy.

6.3.3. Facilitating Rapid Cycle Improvements

DentaQuest uses aging reports and audit results to identify problems and determine root cause. When claims are determined to be processed outside of SLAs, DentaQuest reviews claim processing details to determine root cause and implements an action plan to prevent future occurrences.

6.3.4. Providing the Agency with Access to Metrics and Data

DentaQuest submits encounter data and monthly reports with detailed timeliness and accuracy metrics to Clear Health, who then aggregates this information with other claims data to produce all Agency required reports.

6.3.5. Providing Network Providers with Access to Metrics and Trend Data

DentaQuest provides the following tools to facilitate provider access to metrics and trend data:

- DentaQuest's provider portal lets providers quickly and easily check claims status.
- DentaQuest's interactive voice response system allows providers 24/7/365 access to claims status
- DentaQuest's Provider Services call center can also provide claims status and information during regular business hours.

Currently, they do monthly reporting of claims and payment data. Upon completion of auditing, audit results are entered into DentaQuest's claims auditing system, and field and payment error counts are regularly reviewed to verify the quality of claims and payments processed. Defined error trends are identified and brought to the attention of the Quality Assurance and Claims Payment management staff members.

DentaQuest's Audit Department will compile monthly tracking and trending report, inclusive of claims payment accuracy percentage. These reports are used to identify any salient trends that might need addressing or a Corrective Action Plan. The monthly report details dollar and procedural accuracy rates, overall accuracy rate and claims payment accuracy. Among other

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

attributes, each audited claim in the monthly report will be reviewed for correct claim data entry, proper authorization, member eligibility on the processing date, application of proper benefit limits, non-existing duplicate payment, appropriate denial, correct application of modifier codes, and the proper review of other insurance.

6.4. EyeQuest

Clear Health's vision services subcontractor, EyeQuest, employs a HIPAA-compliant claims processing system designed to meet the processing needs of its vision clients. This flexible, parameter-driven system has an open architecture to accommodate the full spectrum of vision care plan designs and benefit levels as well as multiple line items for each claim.

6.4.1. Claims Processing and Payment

EyeQuest paid more than 99 percent of its claims in the past year within 30 days. Its claims system permits real-time access to utilization data for client reporting and clinical quality improvement and has no clinical processing limitations.

EyeQuest has experience using HIPAA-compliant health information exchanges that are related to delivery of care and payment/processing of claims, including the following:

- Inbound 837 Claims: EyeQuest accepts electronic claims submissions through EDI transactions uploaded to their secure Trading Partner Portal. Files are run through a HIPAA translator and claims are directed into its claim processing system, or, when syntax errors occur, are rejected on the 999 response transaction.
- Outbound 837 Claims: EyeQuest sends Clear Health 837P encounter files with claims paid the previous week.
- 834 Eligibility: EyeQuest processes electronic eligibility data via partial daily files and full monthly update files provided by Clear Health.

6.4.2. Use of Metrics

EyeQuest tracks claim processing timeliness and accuracy through multiple reporting mechanisms. EyeQuest utilizes a "first-in-first-out" prioritization of claims in queue. Additionally, age of claims and queue reports are reviewed daily to verify the system functionality is effectively prioritizing claims in queue. Turnaround time reporting is reviewed at a minimum monthly. Claims are audited by EyeQuest's Quality Assurance team to assure processing accuracy.

6.4.3. Facilitating Rapid Cycle Improvements

EyeQuest uses aging reports and audit results to identify problems and determine root cause. When claims are determined to be processed outside of SLAs, EyeQuest reviews claim processing details to determine root cause and implements an action plan to prevent future occurrences.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

6.4.4. Providing the Agency with Access to Metrics and Data

EyeQuest submits encounter data and monthly reports with detailed timeliness and accuracy metrics to Clear Health, who then aggregates this information with other claims data to produce all Agency required reports.

6.4.5. Providing Network Providers with Access to Metrics and Trend Data

EyeQuest provides the following tools to facilitate provider access to metrics and trend data:

- EyeQuest's provider portal lets providers quickly and easily check claims status.
- EyeQuest's interactive voice response system allows providers 24/7/365 access to claims status
- EyeQuest's Provider Services call center can also provide claims status and information during regular business hours.

Currently, they do monthly reporting of claims and payment data. Upon completion of auditing, audit results are entered into EyeQuest's claims auditing system, and field and payment error counts are regularly reviewed to verify the quality of claims and payments processed. Defined error trends are identified and brought to the attention of the Quality Assurance and Claims Payment management staff members.

EyeQuest's Audit Department will compile monthly tracking and trending report, inclusive of claims payment accuracy percentage. These are the reports that we use in conjunction with the client to identify any salient trends that might need addressing or a Corrective Action Plan. The monthly report to the client details dollar and procedural accuracy rates, overall accuracy rate and claims payment accuracy. Among other attributes, each audited claim in the monthly report will be reviewed for correct claim data entry, proper authorization, member eligibility on the processing date, application of proper benefit limits, non-existing duplicate payment, appropriate denial, correct application of modifier codes, and the proper review of other insurance.

6.5. Express Scripts, Inc.

Our partner, Express Scripts, Inc.'s (ESI's) single, integrated claims processing system provides consistent access to patient information for its retail pharmacy network and for our specialty and home delivery pharmacies.

6.5.1. Claims Processing and Payment

ESI requires 100 percent of the retail pharmacies in its network to submit claims electronically through our system. Of the claims received, 99.9 percent are processed electronically at the point of sale. The system allows participating pharmacies to submit claims to ESI 24/7. ESI claims processing system adjudicates a claim, performing all edits and related functions (including eligibility, patient cost share, accumulators, and drug utilization review), and transmits a response back to the pharmacy, detailing claim acceptance or rejection in less than two seconds.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Electronic claims adjudication includes the steps outlined below:

- For retail prescriptions, the member submits a pharmacy benefit ID card and prescription. Network pharmacies use a switching company or have direct connection to our claims adjudication system. For home delivery prescriptions, the member submits the prescription to the ESI Pharmacy.
- The pharmacist submits the required information to ESI. Depending on FL SMMC's plan design, other fields may be required with claim submission. Our claims adjudication system verifies that the person is eligible for pharmacy benefit coverage and then applies benefit design and concurrent drug utilization review (DUR) edits to the claim.
- ESI's claims adjudication system checks the current prescription against the member's claim history to identify possible clinical concerns. Checks for state or federal-mandated dispensing requirements are also completed. Member claim histories include all claims processed through ESI and may include any claims history records that were integrated into their system from a prior pharmacy benefit manager. Information for each new claim is added to the member's online pharmacy claims history.
- Calculated benefit information is returned to the pharmacist, including information on the applicable copayment, deductible due from the member, and clinical messaging. If the claim rejects, ESI's system provides the pharmacy with the appropriate National Council for Prescription Drug Programs (NCPDP) error code and the rejection reason. This information is available online for review.
- For retail prescriptions, the retail pharmacist collects appropriate payment from the member, as determined by the online message from ESI, and dispenses the drug to the member along with a receipt. For home delivery prescriptions, the payment is deducted from the member's credit card or debit card. If the member has mailed in the payment, they verify the correct payment has been included with the prescription order. The prescription is then mailed to the member along with a receipt.

6.5.1.1. Paper Claims Processing

When necessary, such as when a member uses an out-of-network pharmacy, the pharmacy can submit a direct reimbursement claim form to ESI to get reimbursement.

The paper claim adjudication process begins when claims are received, imaged, and stamped with the date received, sorted, and batched at our claims processing facility. The process concludes with the pharmacy receiving reimbursement.

A step-by-step description of the paper claims adjudication process is detailed below:

- Pharmacy submits paper claims to ESI using the Prescription Drug Reimbursement form.
- The mail room dates, sorts, and prepares claims for the scanning process.
- Claims are scanned and assigned a document control number.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Data entry operators key each claim into ESI's claims processing system.
- The claims processing system verifies the member's eligibility and reviews the claim against all applicable edits.
- If the claim passes all applicable edits, a check and explanation of payment (EOP) are mailed.

6.5.1.2. Claims Pending Process

ESI does not pend retail point-of-service claims — claims are either approved or rejected. The claim is adjudicated subsequent to data entry and is either paid or rejected. If the claim is rejected for missing information, the member can return the rejection notice with the missing information for reconsideration.

6.5.1.3. Claims Data Retention for Medicaid

ESI complies with contractual obligations and all applicable state guidelines and policies relative to claims data retention. They retain all claims data records relating to Medicaid services for the current contract period and up to 10 prior contract periods. If, for any reason, the Medicaid contract is terminated, the claims data will continue to be retained for its applicable retention requirement.

6.5.2. Use of Metrics

ESI uses detailed metrics to track the timeliness and accuracy of the claims processing and payment process. To track claims financial accuracy, ESI uses the following metrics - (i) the dollar value of claims adjudicated and paid accurately by ESI in a contract year, divided by (ii) the total dollar value of claims adjudicated and paid during the measurement period. Claims financial accuracy is defined as the absolute dollar value of any inaccuracy relating to the processing of the claim that resulted in an incorrect charge to the client or the patient. In other words, this measures the dollar value of correctly adjudicated and paid claims over the total dollar value of claims paid during the measurement period. ESI financial accuracy in 2016 was 99.9 percent. Metrics for paper claims financial accuracy include the percentage of claims audited that reimburse the member accurately. In other words, the right member receives the right reimbursement amount at the right address, which is based on an audit conducted by the ESI Quality team. In 2016, the financial accuracy was 97.67 percent.

Claims timeliness is tracked through ESI's integrated claims processing system, which adjudicates mail and retail claims, performing all edits and related functions (including eligibility, patient cost share, accumulators, and drug utilization review), and transmits a response back to the pharmacy, detailing claim acceptance or rejection in less than two seconds. Claims accuracy is defined as any inaccuracy relating to the processing of the claim that resulted in an incorrect charge to the client or the patient. The metrics used to track non-financial accuracy include (i) 100 percent minus the (ii) number of claims with non-financial errors divided by the number of claims audited.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

To support accurate and timely processing of claims, we carefully load and test program information, including eligibility data, benefit parameters, network information, and discount rates. For member-submitted (paper) claims, we employ a dedicated Quality Control team to monitor and report on turnaround time adherence. All metrics reporting, as well as our entire manual claims operations, are subject to annual independent internal audits and Medicare compliance audits. In accordance with CMS requirements, ESI processes member-submitted claims within 14 calendar days.

6.5.3. Facilitating Rapid Cycle Improvements

ESI regularly monitors performance against the metrics described above and has processes in place to rapidly address any shortfalls against those metrics. Leveraging performance testing, ESI proactively identifies bottlenecks in the system, supports performance tuning, determines compliance with performance goals and requirements, and collects performance-related data and metrics. Testing assures response time, throughput, and user satisfaction metrics are met. After test execution, ESI shares detailed analysis and reporting with various internal teams to support operational improvements to facilitate achieving the desired results.

ESI tests applications using simulated workload and records the behavior of the application throughout the test at varying load levels. Post-test status reports may include:

- Number of concurrent users executed
- Average transaction response time under varying load levels
- Average transaction response time over the duration of the test
- Total number of transactions per second
- System resource utilization as available
- Throughput in bytes per second
- Hits per second
- Errors
- Any additional performance indicators, depending on project requirements

ESI thoroughly tests all aspects of Clear Health's pharmacy benefit, validating claims prior to the effective date and after the benefit is built in the system to ensure that benefits and claims adjudicate appropriately and as expected on the effective date. ESI tests targeted scenarios, positive and negative scenarios, and uses risk-based methodology when needed.

6.5.4. Providing the Agency with Access to Metrics and Data

ESI submits encounter data and monthly reports with detailed timeliness and accuracy metrics to Clear Health, who then aggregates this information with other claims data to produce all Agency required reports.

6.5.5. Providing Network Providers with Access to Metrics and Trend Data

ESI provides network providers with online access to individualized and comprehensive performance metrics and trend data. Additionally, ESI generates Pharmacy Scorecards to monitor compliance with retail pharmacy performance standards and to profile pharmacies against their GeoCompetitors. ESI also leverages the scorecards as a means to identify pharmacies that need educational guidance. When indicated by the Pharmacy Scorecards, ESI's Supply Chain

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

leadership meets and collaborates with senior network provider leadership (at either a national or regional level) to develop action plans designed to ensure pharmacy networks perform at the highest levels. Items discussed during these meetings may include:

- Actionable, pharmacy-level metrics to drive performance, including comparisons with geographic or meta-area competitors, average among peer group of pharmacies, and overall network average
- Brand, generic, and multisource brand dispensing rates and generic efficiency rates among GeoCompetitors
- Total claims and total claims growth
- Vaccine claims volume versus total vaccine claims
- Compound volume
- Present type of pharmacy support, such as calls and the online Pharmacist Resource Center

6.6. Health Network One, Inc.

6.6.1. Claims Processing and Payment

Health Network One, Inc. (HN1) utilizes a claims application called GDSClaimsNet (Global Delivery System). GDS is a proprietary system created by HN1's IT department to support the various specialty networks and health plans for which it administers claims. The GDS claims system utilizes custom claims edits specific to specialty network and health plan guidelines. Additionally, it purchases code sets from Optum/Ingenix, which are received and processed quarterly. It also monitors communications from CMS and downloads directly from the CMS website any relevant data updates that are made available. These CMS edits contain items addressing unbundling, NCCI, fee schedules, etc. On an annual basis, the network reviews the covered procedure codes for each specialty network and makes modifications to the list of covered procedure codes based on CMS and Medicaid guidelines. In addition, the Specialty Network, Compliance, and Claims departments review the CMS and Agency provider bulletin notifications that are sent throughout the year. Any necessary modifications are submitted to HN1's IT department for system update.

The GDS system applies a three-step automated process to all claims: (1) pre-processing, (2) adjudication, and (3) pricing. Each step of the claims process interacts with set programmed criteria that validate data and apply business rules. Any item that fails the programmed criteria is flagged for a claims examiner to review. Clear Health sends the delegated membership to the specialty network monthly via FTP file transfer. The HN1 IT department downloads the eligibility files and processes the information into the eligibility module of GDS where it is used by the UM and Claims departments to support daily operations and claims processing.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We send benefit information (copayments, plan codes, covered services) to HN1 where it is reviewed and then forwarded to the IT department to be loaded into the GDS system. As part of the pre-processing and adjudication steps of the claims process, the system validates the member information submitted on the claim against the membership data received from Clear Health and loaded to GDS, confirming eligibility and using benefit plan data to verify covered services and application of any copayments.

The HN1 UM team also enters and creates referrals/authorizations for delegated members and contracted providers in their module under GDS. This module directly interacts with the claims system upon adjudication so that network rules pertaining to the use of referrals and authorizations are incorporated in to the adjudication logic.

The HN1 Specialty Network executes contracts between the providers and the network. These contracts are then keyed in to the GDS Provider Administration module. The Provider Administration module contains provider demographics, ID numbers, and contractual payment terms. During all three steps of the claims process — pre-processing, adjudication, and pricing — the GDS Claims module interacts with the data loaded in GDS Provider Administration. Pre-processing identifies the provider information submitted on the claim and validates that information against what is loaded in GDS Provider Administration; adjudication verifies provider eligibility; pricing calculates claims payment based on the contractual payment term loaded in GDS Provider Administration. Any discrepancy will result in a claims edit to be further reviewed by the claims examiner. The Provider Administration module includes a data element that stores the relationship of the provider to the specialty network. This data element is included in the interaction between the Claims module and the Provider Administration module and allows for business rules/edits to be written by network.

Providers have the ability of sending their claims in one of three different ways:

- Traditional paper CMS 1500 or UB04 claims
- Through a clearinghouse via and 837P or 837I file
- Data entry of their claims directly into the HN1 web-portal

Providers also have the option of one of three payment methodologies:

- Traditional paper check
- EFT (electronic funds transfer)
- Credit card payment

6.6.2. Use of Metrics

HN1's system uses Microsoft SQL Server — all data fields and elements are available to suit a wide array of reporting requirements. As such, it is able to tailor its reporting functions to meet the needs of Clear Health and any client-specific reporting requirements. HN1 currently provides us with a wide variety of proprietary reports that we utilize to monitor HN1 as a delegated subcontractor. However, in addition to any reports we require, HN1 has developed internal reporting that is used as a mechanism for monitoring turnaround times, inventory, and trending. These reports are produced on a routine basis by the management teams to verify that claims are meeting requirements.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

HN1's Claims department has a formal internal individual claims quality program, whereby a random three percent sample of all claims processed is subjected to internal audit. The Specialty Network designees also routinely review claim runs for their associated specialty networks, and the health plans conduct annual audits of their delegation. The combination of these three reviews allows for the accuracy of claims processing to occur.

6.6.3. Facilitating Rapid Cycle Improvements

All reporting that occurs in HN1's claims department is shared throughout the organization. The specialty network designees are included in the distribution of the specific health plan reports. In addition, the internal reporting is reviewed during internal specialty network operations meetings. The health plan committee meetings also promote the review of the metrics for their specific plan and delegation. These reviews and sharing of reporting metrics allows for all parties to work collectively in addressing any need for facilitating rapid cycle improvements.

6.6.4. Providing the Agency with Access to Metrics and Data

HN1 provides claims encounter data to Clear Health on a scheduled basis and in accordance to Agency requirements. We incorporate this data in encounter data and regulatory reports submitted to the Agency.

6.6.5. Providing Network Providers with Access to Metrics and Trend Data

HN1 provides real-time access via its provider web portal to all contracted providers. The HN1 provider web portal is available 24 hours a day, 365 days a year and allows providers to view all of their submitted claims, print an EOP, submit new claims, and request referrals.

6.7. LogistiCare

6.7.1. Claims Processing and Payment

Clear Health's transportation subcontractor, LogistiCare, provides non-emergency transportation coordination and pays claims for transportation services provided to our members. Transportation providers submit driver's logs with their invoices to LogistiCare on a weekly basis. To verify correct billing, LogistiCare's Billing department compares the invoice with the information in the LogistiCAD (LCAD) reservation system. Verification includes the following trip details:

- Member who received service
- Transportation service provider
- Driver information
- Vehicle information
- Drop off time
- Pick up time
- Wait time
- Mileage

Each provider is paid weekly, based on invoice date, by check or EFT in accordance with their contract with LogistiCare.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

6.7.2. Use of Metrics

LogistiCare has several system controls in place to manage the payment process along with additional back-end controls or reports used to manage accuracy or timeliness. The system will process a payment based on the lowest payment between the billed amount from the Provider and the calculated amount in the LCAD system which is generated from the base rate and mileage of the trip's level of service and distance based off Google Maps. This controls the risk of overpayments.

Prior to payment, the Claims team will review all trips that had an override or payment above the calculated system rate to confirm proper approval was obtained to help maintain payment accuracy. Rates being used in LCAD to calculate the trip have been reviewed and signed off by the General Manager of the Operation, Senior Vice President of the Division, and the Chief Administrative Officer of LogistiCare prior to being included in LCAD. This provides control over rate accuracy. On a monthly basis, we also review the timeliness of payments through a Prompt Payment report to validate LogistiCare is meeting the requirements of the contract.

6.7.3. Facilitating Rapid Cycle Improvements

If the details on the Prompt Payment report show that LogistiCare is outside the requirements for timely payment of claims, they perform a root cause analysis and make processes adjustments to bring timeliness into compliance. LogistiCare also runs reports to review trip trend data. If variances are noted, the process is reviewed and adjustments are made to eliminate the issues. Prior to all payment submissions, the Claims Department will review trips for overrides or any trips exceeding a large dollar amount. If there are any discrepancies, Claims will work with Operations to confirm the issue or adjust the process for future periods.

6.7.4. Providing the Agency with Access to Metrics and Data

LogistiCare submits encounter data and monthly reports with detailed timeliness and accuracy metrics to Clear Health, who then aggregates this information with other claims data to produce all Agency required reports.

6.7.5. Providing Network Providers with Access to Metrics and Trend Data

Providers have access to LogistiCare's Transportation Providers' portal where they can check payment status for trips logs that have been submitted. The portal includes details on payment amount and expected payment date. Providers can also call the dedicated customer service number where they request claims status information.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent has described key components of its claims processing and payment process in a format suitable for the public, including a description of the processes for claims submitted both on paper and electronically.
2. The extent to which the respondent has included detailed metrics to be employed by the respondent to track timeliness and accuracy of the claims processing and payment process.
3. The extent to which the respondent has included a detailed description of how metrics from the claims processing and payment process will be used throughout its organization to provide for rapid cycle improvement.
4. The extent to which the respondent has included a detailed description of its process to make data and metrics regarding the claims processing and payment process available to the Agency and that the described process provides sufficient opportunity for the Agency to access this data.
5. The extent to which the respondent has included a detailed description of its process to make data and metrics and trend data regarding claims processing and payment process available to network providers on a real-time basis and that the described process provides sufficient opportunities for network providers to access this data.
6. The extent to which the respondent has included its applicable proposed subcontractors in its response, with each component addressed for each applicable proposed subcontractor.

Score: This section is worth a maximum of 30 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

E. DELIVERY SYSTEM COORDINATION

SRC# 18 – Utilization Management (Statewide):

The respondent shall describe the following related to its utilization management (UM) approach:

- a. A description of the process used to determine whether a service should be prior authorized and that the UM criteria for each service have been evaluated to determine their appropriateness for administering a Medicaid benefit.
- b. A description of how the respondent will ensure consistent application of the review criteria for authorization decisions.
- c. A description of how the respondent will ensure that services are not arbitrarily or inappropriately denied or reduced in amount, duration or scope.
- d. A description of the approach used to determine whether a service will be needed short-term vs. long-term (i.e., maintenance therapy) for an enrollee, specifically highlighting any differences in the respondent's service authorization approach (if any exists) based on the length of time that the service will be needed.
- e. To the extent that a service is needed long-term, a description of the strategies that the respondent utilizes to ensure continuity of care and safeguards that are in place to reduce gaps in authorization.
- f. A description and example of how the respondent will detect, monitor and evaluate under-utilization, over-utilization and inappropriate utilization as well as processes to identify and address opportunities for improvement.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health's utilization management (UM) program is built by focusing on the special needs and considerations of HIV/AIDS patients and facilitates the delivery of the right care, at the right time, in the right place. We design and administer our UM programs by focusing on the goals of improving outcomes for our enrollees (members) and serving as an effective steward of state resources. Our UM team closely collaborates with our members' providers and other departments, including disease management (DM), case management, and pharmacy, to meet our members' social, physical, and behavioral health (BH) care needs in an integrated and holistic way.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our UM program is guided by a written UM Program Description, as well as state-specific and nationally recognized medical policy and clinical guidelines. The program features a local perspective based on more than 14 years of experience serving Florida's Medicaid population. We deeply understand our members' unique needs and the capacity of the local delivery system to care for patients with HIV/AIDS. We deliver UM processes and an overall UM approach dedicated to meeting the health care needs of our special population.

Our UM process and overall UM approach helps the Agency meet its goals related to the provision of medically necessary services in a timely manner and in the most appropriate setting, reducing unnecessary ancillary services and potentially preventable admissions, readmissions, and ED visits. It:

- Leverages national resources, best practices, and data analytics, while maintaining a flexible, local approach to establishing UM criteria and services requiring prior authorization
- Prioritizes and acts on both formal and informal provider input to reduce burdensome or unnecessary prior authorization criteria and remove barriers to care
- Supplements our annual inter-rater reliability (IRR) audits with frequent, comprehensive reviews to assure consistent application of review criteria
- Systematically captures and reports over- and under-utilization data to identify opportunities for improvement and works collaboratively with providers to improve delivery of the right care, in the right place, at the right time
- Generates ad hoc reports to drill down on issues and develop tailored interventions to continuously improve the effectiveness of care
- Handles authorizations for short- and long-term authorizations differently to prevent gaps in the treatment plan
- Is always innovating with new programs, policies, and initiatives, such as our Transitions of Care (TOC) program, weekly outlier process, Highly Active Antiretroviral Therapy (HAART) initiative, and CD4 Project

Clear Health delegates UM for BH services to Beacon Health Options, therapy services to Health Network One, Inc. (HN1), dental services to DentaQuest, optometry/ophthalmology to eyeQuest, radiology and genetic testing to AIM Specialty Health, and audiology/hearing services to HearUSA. These delegates and their delegated functions are extensions of Clear Health and are held to the same rigorous standards as noted above.

1. SERVICES REQUIRING PRIOR AUTHORIZATION

First and foremost, our prior authorization policies and procedures comply with Agency-specific requirements as set forth in Attachment B, Scope of Services, Section VI.G. (and related MMA and Specialty Plan requirements). We are continuously evaluating new opportunities to reduce administrative burdens and eliminate barriers to medically necessary physical and BH services, while at the same time developing systems to avoid the provision of unnecessary or inappropriate care.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.1. Process Used to Determine Services Requiring Prior Authorization

Setting prior authorization policy requires balancing the dual objectives of promoting efficiency and ease of use with making sure our members receive the right care, in the right place, at the right time. At Clear Health, we believe providers have the “boots on the ground” experience and expertise to inform these decisions. Provider input, in combination with our own analysis of utilization trends and Agency guidance, drives our process for determining which services require prior authorization.

We monitor over- and under-utilization reports and prior authorization approval rates to identify opportunities to update our list of services that require prior authorization. These reports support the work of our Precertification Committee, which meets monthly and includes UM, case management, and Medical Directors. The committee reviews prior authorization requirements, trends in approvals and denials of services, and trends in utilization patterns not currently on our list of services that require prior authorization. With this information, the committee discusses opportunities to improve the effectiveness of our UM program and the need for any changes to our services requiring prior authorization.

Clear Health determines whether a service requires prior authorization at the code level instead of the service group level. This process enhances efficiency in the application of our prior authorization criteria, and provides for greater cost-effectiveness in our coverage of services.

We provide covered BH services as outlined in the Contract, and establish prior authorization policy in accordance with the Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA) and all other applicable state, federal, and Contract requirements and will continue to do so.

Our local UM Committee and Medical Advisory Committee (MAC) reviews and approves all changes in services that require prior authorization. Our local MAC currently includes 11 network physicians, including Clear Health network providers and representatives from specialties like internal medicine, infectious diseases, cardiology, otolaryngology, surgery, pulmonology, gerontology, obstetrics and gynecology, BH, and pediatrics.

The MAC is particularly useful in securing provider feedback because it includes providers from the local delivery system and represents the full spectrum of services we provide to our members, including BH services. Through the MAC, we listen first and develop prior authorization policy in partnership with our network providers.

1.2. Data Sources Used to Make Decisions About Prior Authorization Requirements

In addition to the MAC, other data sources inform our prior authorization policies. We review over- and under-utilization trends and prior authorization approval rates to identify when a change in prior authorization policy may be appropriate. We also review national utilization reports when available, such as data published by the Centers for Medicare and Medicaid Services (CMS) and Centers for Disease Control and Prevention (CDC), and changes in nationally recognized medical necessity criteria.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our changes to the therapy services prior authorization policy illustrate our continuous monitoring of utilization data to improve efficiency and effectiveness of care. We recently observed an increase in costs for outpatient therapy performed in hospital settings compared to the same services performed in provider offices and freestanding facilities. We worked with our subcontractor, Health Network One, Inc. (HN1), to identify non-complex diagnoses that could offer safe and equally effective therapy services outside of a hospital setting. We then added therapy evaluations to our list of services requiring prior authorization. This change helps us identify therapy evaluations being requested in a hospital setting, and provides an opportunity to redirect the evaluation to a provider office or freestanding facility. Because most therapy services are performed in the location of the evaluation, we increased utilization of therapy services at lower cost, more appropriate settings, and realized \$150,000 in savings in the first eight months of 2017. Requests for therapy services in the hospital setting dropped by half, and we have successfully redirected 60 percent of the remaining requests for therapy services in the hospital setting to an office setting or freestanding facility without Medical Director review. We continue to approve therapy services in the hospital setting for complex diagnoses that require higher levels of care.

We also pay careful attention to provider input to identify whether a prior authorization requirement is burdensome or unnecessary. We systematically handle provider complaints as part of our Quality Management (QM) program. Quality Management staff track provider complaints by subject area monthly and report trends to plan leadership. To the extent there are negative trends, we develop interventions or identify policy changes to address common provider concerns. For example, we used to require certain lab work to be processed through our capitated laboratory services provider. Providers complained because using this laboratory delayed results that could otherwise be obtained immediately in the provider office setting. We listened to our providers and now cover certain lab work in office settings without prior authorization.

We also react swiftly to individual provider complaints outside of the QM process. For example, a network facility provider recently complained about the volume of services we were denying due to lack of clinical documentation. We researched the issue and discovered that our contract with the facility required a prior authorization response within six hours. Because six hours was insufficient to collect the clinical information needed to make a determination, we met with the facility and obtained agreement to increase the turnaround time to 24 hours. This change significantly decreased the facility's overall denial rate and increased provider satisfaction.

In a different example, a provider complained because we required prior authorization for nebulizers. We removed the clinical review requirement immediately, and now nebulizers and other low-cost DME equipment are auto-approved upon receipt of the request. This process significantly reduces turnaround times (within one day) and reduces the risk of delays in care that could contribute to potentially preventable admissions, readmissions, and ED visits.

We also get regular provider feedback about our prior authorization list and requirements during peer to peer discussions, and pay close attention to trends identified in those communications. Quarterly and annually, we collect provider satisfaction data regarding our UM processes, prior authorizations, and responsiveness. We value this provider feedback, as they are our partners in improving member care, and incorporate results into our QM program. The regular delegation oversight meetings include feedback on the interactions with downstream providers and review of trending complaints including those pertaining to the UM processes.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.3. National Resources Available to Inform Local Decision-Making

Through our ultimate parent company, Anthem, Inc., Clear Health has access to additional UM resources and best practices across the country. Each year our national joint Medical Operations Committee (MOC) performs a review of services requiring prior authorization to determine whether changes would simplify processes for members and providers without compromising care. The MOC also evaluates whether new prior authorization requirements are needed to address changes in provider practice patterns or advancements in medical technologies related to an HIV/AIDS specialty program.

In conducting its annual review, the MOC analyzes specialty plan-specific utilization data such as:

- Top 100 procedures by volume and cost
- Top 50 denied and modified procedures
- Appropriateness reviews of all procedures that require prior authorization
- Procedures associated with specific medical policy or clinical guidelines that warrant review

The MOC's annual recommendations support the work of our local UM Committee and MAC, who take their recommendations into consideration when establishing prior authorization policy.

2. PROCESS USED TO ENSURE APPROPRIATENESS OF UM CRITERIA FOR MEDICAID BENEFITS

Clear Health's process for ensuring the appropriateness of our UM criteria involves two layers of review and approval. The first layer of review occurs at the national level. Anthem, our parent company, adopts and annually updates medical policy and clinical guidelines with input and approval by all affiliated Medicaid health plans. We then review and revise these policies and guidelines at the health plan level, through our local committee structure, which includes practicing, licensed clinicians, to ensure a flexible, local approach designed specifically to accommodate the characteristics of our care delivery system, Agency requirements, and member needs. Both the national and local layers of review involve significant input from the provider community and consider best practices and evolving standards of care for HIV/AIDS populations.

2.1. National Resources Rigorously Review Medical Policy and Clinical Guidelines

Anthem, our ultimate parent company, develops medical policy and clinical guidelines through a process that incorporates evidence-based practices from nationally recognized professional organizations, up-to-date clinical research, and input and approval from external providers in community and academic settings. We believe that scientific evidence is essential to informed decision-making and the process seeks to adopt the best of evidence-based practices and criteria.

The Medical Policy and Technology Assessment Committee (MPTAC) is a national, multidisciplinary group that includes network providers from various specialties, clinical practices, and geographies. Each year, it reviews, updates when appropriate, and approves medical policy and clinical guidelines. When reviewing and updating the medical policy and clinical guidelines, it considers information from sources that include electronic literature searches; independent technology evaluation programs; and materials published by professional associations (e.g., Blue

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Cross Blue Shield Association), technology assessment entities, appropriate government regulatory bodies, and national provider specialty societies.

2.2. Final Medical Policy and Clinical Guidelines Adopted at the Local Level

Clear Health's medical policies and clinical guidelines are based on the national criteria adopted by the MPTAC each year, but undergo a rigorous review process to ensure appropriateness in administering Florida Medicaid benefits for physical and BH services. Our Chief Medical Officer (CMO) oversees the development and review of all medical policies and clinical guidelines, and local providers on our MAC review, provide input, and approve the criteria before use. The MAC brings knowledge and perspective of the local Medicaid delivery system to help us make sure our UM criteria, including levels of care, are appropriate for administering Florida Medicaid benefits and meets the needs of our members, including the special challenges faced by individuals with HIV/AIDS.

In some cases, we must alter our coverage policy to assure its appropriateness for our HIV/AIDS specialty population. For example, women who are HIV-positive should not breastfeed due to the risk of HIV transmission via breastmilk. We updated our coverage policy, and no longer cover breast bumps due to this safety concern.

Similarly, although the Agency encourages Managed Care Plans to reduce cesarean deliveries this goal is not directly transferable to a HIV/AIDS specialty plan and our medical policy and clinical guidelines reflect the evidence-base that cesarean sections are the preferred method of delivery to prevent vertical transmission of HIV from mother to baby. Scheduled cesarean delivery, defined as cesarean delivery performed before the onset of labor and before rupture of membranes, is recommended for prevention of perinatal transmission of HIV in women with HIV RNA levels >1,000 copies/mL near delivery and for women with unknown HIV RNA levels. Our C-section rate is high at 67 percent; however, no vertical transmissions have been reported since our inception.

Our adopted medical policies and clinical guidelines become an essential tool in our provider's toolkit that help to define the most appropriate treatment and setting and assure consistency of care for all our members. In the review of medical policies and clinical guidelines through our MAC, we gather and listen to feedback from our participating providers ensuring that our UM criteria are clinically based but can also take into account member needs and clinical and environmental factors.

2.3. Clear Health's Medical Policy and Clinical Guidelines

Clear Health's current medical policy and clinical guidelines are based on the following national criteria. The criteria include a comprehensive range of level-of-care alternatives that is sensitive to the differing needs of adults, adolescents, and children. When necessary, we have adapted these criteria to strictly follow all requirements established by the Agency for administering covered Medicaid benefits, including State and federal EPSDT standards, and better accommodate our members' needs.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Guidelines specific to caring for HIV/AIDS populations, including the U.S. Department of Health and Human Services, Clinical Guidelines for the Treatment of HIV and the HIV Medicine Association of the Infectious Disease Society of America Primary Care Guidelines for the Management of Persons Infected with HIV: 2013 Update
- InterQual criteria for adults and pediatric members, including inpatient acute care services and inpatient skilled care
- Behavioral health (BH) criteria, developed by our subcontractor Beacon, are based on nationally recognized resources, including but not limited to those publicly disseminated by the American Medical Association (AMA), American Psychiatric Association (APA), American Academy of Child and Adolescent Psychiatry (AACAP), Substance Abuse and Mental Health Services Administration (SAMHSA), the American Society of Addiction Medicine (ASAM), MCG (formerly known as Milliman Care Guidelines), and CMS
- American Imaging Management guidelines, for selected diagnostic imaging services, sleep studies, and genetic testing
- Milliman Care Guidelines, for therapy services
- Guidelines prepared by professional organizations, such as the American Academy of Pediatrics, American Academy of Neurology, American College of Obstetricians and Gynecologists, and other relevant, evidence-based literature or information
- Guidelines and recommendations developed by individual medical and surgical societies, the National Institutes of Health, Institute of Medicine, United States Preventive Health Services Task Force, and CDC

3. APPROACH TO ENSURE THE CONSISTENT APPLICATION OF REVIEW CRITERIA

We assure the consistent application of review criteria through our staff training program, annual inter-rater reliability (IRR) audits, and additional oversight, reporting, and resources from our national Performance Improvement and Enhancement (PIE) program.

3.1. UM Staff Training

Assuring consistent application of UM review criteria begins with our robust training program. Three to four weeks of initial classroom instruction for new UM Nurses include specific training modules for general topics such as:

- Overview of Medicaid and Medicare
- Treating the whole person (physical and BH)
- Legal and ethical issues
- HIPAA
- Review of medical policies and clinical UM guidelines, including making appropriate clinical decisions
- Day in the life of a UM Nurse
- Understanding authorizations

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We supplement these general topics with in-depth, micro-learning exercises for:

- System training
- Inpatient daily census
- Emergent and planned inpatient admissions
- Initial length of stay
- Concurrent reviews
- Authorization time frames
- Discharge planning
- Pharmacy authorizations
- Preparing for rounds

These exercises include skill practice scenarios with check points, quick reference guides, identification of available tools and resources, and error and warning messages to help guide the new employee.

One to two weeks of on-the-job training follow the intense classroom programming. During the on-the-job training, new employees work real cases under the careful guidance of preceptors, managers, and team leads. They are then closely monitored for an additional 90 days to answer questions, clarify processes, identify errors, and use errors as additional teaching opportunities. After the 90-day period, and only after they have demonstrated a thorough understanding of our UM process and procedures, can new employees work independently.

Importantly, we even reinforce our comprehensive training for seasoned staff with refresher courses and ongoing review of unique cases. The UM team meets monthly to review actual scenarios and answer questions like those included in our annual IRR audit. We then discuss the case as a team, answer questions, and make sure everyone understands how we applied the criteria. If the scenario was difficult, or produced lower-than-average scores, we forward the scenario to a Medical Director who will conduct a separate in-service on a similar case in the future, emphasizing the applicable criteria and key information to look for during a review.

3.2. Inter-rater Reliability (IRR) Audits

We conduct annual IRR audits to evaluate our consistency and accuracy in applying UM criteria, and help us assure we are treating members and providers fairly and consistently in our delivery of covered benefits and services.

We require annual IRR testing for all UM reviewers, including Medical Directors, if they have been applying UM criteria for a period of at least 90 days. The process includes hypothetical test cases or a sample of UM determination files, and uses an NCQA-approved auditing method. It helps us assure our UM reviewers:

- Make appropriate decisions based on knowledge of nationally accepted, evidenced-based guidelines, Agency-specified criteria, and our medical policies
- Apply guidelines consistently
- Have the knowledge and resources they need to identify potentially avoidable or inappropriate utilization, including potentially preventable admissions, readmissions, and ED visits

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

The audits identify staff who need additional training, as well as opportunities for new training modules or refreshers that would benefit the entire UM team. We report IRR results to our Quality Management Committee (QMC), which also identify areas for improvement and develop action plans.

**** RESULTS & SUCCESSES: Our UM Team Achieved Full Compliance in 2016**

We have participated in IRR audits in Florida for the last 14 years with excellent results. The results from our most recent IRR audit indicate all our Medical Directors and UM Nurses exceeded the compliance threshold in all the guidelines used, including guidelines for adults and children. Our Medical Directors scored 90 percent, on average, and our UM Nurses scored 93.5 percent, on average. **

If a reviewer falls below our IRR compliance threshold of 90 percent, they must participate in monthly audits with a focus on clinical decision making and appropriate application of the medical policies and clinical guidelines. They remain in this increased audit cycle until they achieve 10 cases with scores above 90 percent.

Leaders also work closely with the individual until their performance improves. We develop an action plan that may include a formal training plan; one-on-one coaching by a local subject matter expert; and additional testing. Any action plan must be completed within 90 days.

3.3. Performance Improvement and Enhancement (PIE) Program

Through Anthem, our ultimate parent company, we have access to the national, multi-faceted Performance Improvement and Enhancement (PIE) program. This new initiative is a best practice and provides additional safeguards to ensure the consistent application of review criteria for authorization decisions. It continuously evaluates our UM program using monthly clinical and non-clinical audits (including call reviews), outcomes reporting, and process validation for compliance with UM policies.

The PIE program includes the following components:

- The Clinical and Non-clinical Auditing Program, which plays an integral role in driving performance improvement by continuously evaluating our staff's UM activities. The program objectively monitors and evaluates the appropriateness and quality of services provided to our members and is designed to make sure our UM processes are applied consistently. Attention is paid to adherence with new or updated processes and criteria, to make sure we catch and intervene with issues in between our annual IRR audits with one-on-one coaching or UM team retraining and the development of additional learning opportunities.
- The Reporting Program within the PIE team directly supports the work of the Clinical Audit program by regularly developing and issuing reports to our directors and managers, senior leadership, clinical leadership, and our National Program Delivery teams and Quality Committees. PIE reports summarize the clinical audit results, identify areas for improvement, and create enterprise trend comparisons that help our UM leadership prioritize necessary trainings or process changes.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Since implementation of the PIE program, we have seen marked improvement in clinical staff adherence to process and UM criteria. These results are reflected in our recent PIE Clinical Audit compliance scores:

- Medical Directors are currently performing at 99.78 percent compliance, with approximately 1.8 percent improvement from 2015
- UM Nurses are currently performing at close to 99 percent compliance, reflecting a three year-over-year improvement trend

3.3. Clear Health Holds Subcontractors to Our Own Strict Standards

We ensure our subcontractors have processes to apply review criteria consistently during pre-delegation activities and our robust annual oversight review. No less than annually, we review the clinical criteria adopted by the subcontractor to validate that it is consistent with Clear Health's criteria. We also review subcontractor changes to review criteria as they occur. For subcontractor oversight audits, we incorporate the subcontractor's review criteria into our annual oversight review process, which includes a review of the process the subcontractor uses to audit and monitor consistency in application of their adopted review criteria.

4. REVIEW PROCESSES TO ENSURE SERVICES ARE NOT ARBITRARILY DENIED OR REDUCED

At Clear Health, there are many ways we make sure services are not arbitrarily denied or reduced. We make medical decisions only after a thorough review of the member's medical records, and base decisions on their individual needs. We never employ automatic limits on a length of stay unless required by the Agency.

Dr. Francisco Hernandez, our Medical Director, is a Florida-licensed endocrinologist and oversees all UM decisions. Other UM team members include physician reviewers in multiple specialties and our team of local, licensed UM Nurses.

Importantly, our medical policies and clinical guidelines provide a rules-based system for screening medical and BH services. They are objective, evidence-based, and include a comprehensive range of level of care alternatives sensitive to the differing needs of adults, adolescents, and children. We match the level-of-care to the member's current condition, considering individual member needs, including needs common in an HIV/AIDS population such as housing needs, the severity of illness, treatment progress, co-morbidities, home environment, episode-specific variables, and the characteristics of the local delivery system. Our overarching goal is to view members in a person-centered manner to make sure they receive the right services at the right time, in the right place.

Our local team of licensed UM Nurses use our Florida-specific coverage policies and clinical guidelines to review service authorization requests. When medical necessity is not clear, or when clinical information needed to make a decision has been requested but not received, the UM Nurse refers the case to a Medical Director for medical necessity review and determination. The Medical Director may request additional documentation and, prior to issuing a denial, may offer an opportunity for peer-to-peer consultation to discuss the case and potential care alternatives. He or she will also offer peer-to-peer consultation after any denial. We take advantage of this

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

educational opportunity to reinforce applicable, evidence-based guidelines and appropriate care settings with the provider, and send the provider a copy of the medical policy or clinical guideline via fax for their future reference.

In reviewing cases for medical necessity, our Medical Directors balance the objective of supporting providers in exercising professional judgement and making informed decisions with the objective of promoting consistent use of evidence-based guidelines that have been established to be the most effective for each member's condition.

As a check to ensure services are not being arbitrarily denied or reduced, we analyze our overall denial rate. We also closely monitor the denial rate of each Medical Director and UM Nurse to look for outliers in clinical decision making. We define outliers as any individual whose denial rate is approaching 10 percent or more. When outliers are identified, we follow up with training or other interventions. Our overall denial rate is currently seven percent.

If we intend to deny a service authorization based on the test, procedure, or other service or benefit being experimental or investigational in nature, we forward the case to the Agency and request a coverage determination in accordance with rule 59G-1.035, FAC.

We never reward our UM staff or subcontractors for issuing denials of coverage, or encouraging decisions that result in under-utilization or create barriers to care and service. Members and treating providers may request a second medical opinion or appeal a denial at any time. We provide information about this process in our member and provider materials. Our Case Managers (Managed Care Coordinators) and Provider Network Managers reinforce information about the appeals process in their interactions with members and providers.

5. REVIEW PROCESSES TO IDENTIFY ABERRANT UTILIZATION PATTERNS

Maximizing the delivery of appropriate medical and BH services and minimizing occurrences of over- and under-utilization is a primary function of our UM program. We identify and address aberrant utilization patterns through a combination of powerful data analytics and focused leadership attention examining trends and implementing effective improvement strategies.

5.1. Utilization Management Data Analytics and Resources

We gather utilization data in our Core Operations System, which contains all provider, member, claims, and authorization data. Additionally, our Data Warehouse, which stores utilization data, including from our subcontractors, is an integrated repository fed directly from our Core Operations System to support data control and consistency. The Data Warehouse maximizes our capacity for data analytics.

A team of local analytics staff is dedicated to reporting utilization daily, compiling both standard and ad hoc reports. They review and monitor utilization data and identify trends. This team is supported by our national Health Care Analytics Department who provides additional resources, assistance with the data warehouse, standardized reporting and analytics, and consultation on drill down requests. They also monitor national trends and provide reports that compare utilization trends across all our affiliated health plans.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Health plan leadership, the UM team, clinical leadership, Quality Management, Provider Relations, Financial Analysts, and the MAC use this data to implement strategies to achieve utilization targets consistent with clinical and quality indicators and to identify potential cases of fraud and abuse.

5.1.1. Our Standardized Utilization Reports Optimize Decision-making

Our analytics teams produce fully integrated over- and under-utilization monitoring reports that include administrative and incurred claims data for both physical and BH services. These reports encompass data on the full spectrum of covered services, but pay special attention to admissions, readmissions, pharmacy, specialty referrals, ED utilization, BH services, preventive services, and ancillary services such as DME and home health. They also capture critical data about preventive care utilization, including well-child and PCP visits, age-appropriate immunizations, mammograms, and blood lead testing.

The following are examples of other reports and tools that help us identify under- and over-utilization of services:

- Regional Outlier Reports include demographic information, admitting hospital, diagnosis, estimated hospital charges, number of days to exceeding the threshold for outlier length of stay, and potential additional charges for each day the member exceeds the outlier threshold. Our Medical Economics team conducts the analysis at a regional level, and these reports support our Interdisciplinary Rounds process.

**** INNOVATION: Multidisciplinary Rounds Target Outliers**

A multi-disciplinary team (MDT) of local health plan staff analyzes hospital admissions nearing or exceeding abnormal lengths of stay for the associated condition. The team includes representatives from our clinical areas, case management, Medical Directors, finance, Provider Network Managers, and Risk Analysts. The team meets weekly and reviews our inpatient census with the task of ensuring our members are getting the right level of care, in the right setting.

For complex or high-cost cases identified in our Regional Outlier Report, the MDT discusses the clinical status of each member, whether other, more medically appropriate care settings are an available option, potential financial liability at the current level of care, and other key information. The team uses this information to develop action plans where a lower level of care may be appropriate. For members identified as good cases for transfer to a lower level of care, the Concurrent Review Manager who is part of the team notifies the Concurrent Review Nurse of the decision. They then work with the attending physician, hospital case management, social services, and the discharge planning team to select the appropriate lower level of care facility. This close coordination supports a smooth, safe return for the member and reduces the risk of readmission or other potentially preventable events. **

- Our Over- and Under-Utilization Monitoring Reports identify potential over- and under-utilization patterns using incurred claims data. The report shows both standard deviation results for the current quarter/YTD as well as year-over-year changes for the following services: Non-ED physician visits; non-ED outpatient diagnostic services (including radiology, lab, etc.); non-ED outpatient therapeutic procedures (including physical therapy, occupational therapy, and speech therapy, home health, outpatient surgery, etc.); and pharmacy prescriptions. We produce and

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

review this report every six months. We use this report to review a provider's utilization compared to his or her peers, year-over-year trends, and member turnover data, if available.

- Our predictive modeling tools help us identify the potential for future under- or over-utilization. Our Chronic Illness Intensity Index (CI3) tool enables us to identify individuals with the highest risk levels and coordinate the services and supports they need to achieve optimal outcomes. With this data, we can provide tailored case management, medication management, and other supports. Other predictive modeling tools include the Likelihood of Inpatient Admission (LIPA), an index that prioritizes members for outreach by predicting the probability of an inpatient admission; Statistical Obstetrical Risk (STORK) Score, for members at an elevated risk for delivering an infant who will require a NICU admission; and BH "First-Time Admitter", which spots members who have not had a BH admission in the past six months, but are likely to have one in the next 60 days.
- Our Gaps in Care Report provides information to providers about attributed members in need of specific services to close HEDIS® gaps, which can reflect potential underutilization of services. Providers use these reports to outreach to our members and encourage the member to receive the needed service. Managed Care Coordinators use the same gaps in care information, which is captured in our Case Management System, to outreach to members and work collaboratively with providers to meet our members' needs.

5.1.2. Analyzing Pharmacy Utilization to Improve Care

Clear Health also captures and analyzes pharmacy data to identify under-and over-utilization, cost, and drug trend drivers. Our review and analysis of pharmacy data supports UM, case management, medication management, clinical programs and initiatives, pharmacy restriction programs, and the identification of potential fraud, waste, and abuse.

Our pharmacy team works closely with our case management team to respond to pharmacy utilization information by developing member-specific interventions, as well as strategies and programs that address population health trends. This may include participation in care planning for members with complex medication needs such as polypharmacy and psychotropic medications, medication reconciliation for members transitioning from higher levels of care, and clinical consultation for PCPs addressing BH needs. This relationship is especially important to the Clear Health program in order to assure proper HIV treatment protocols are followed.

Our retrospective drug utilization review (RDUR) programs analyze pharmacy utilization patterns to identify opportunities for:

- Promoting appropriate prescribing
- Improving member care through medication adherence and safety
- Reducing avoidable use of ED and inpatient services
- Addressing over- and under-utilization
- Reducing the number of unique drug products prescribed per member
- Identifying potential fraud, waste, and abuse

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

The following are examples of our RDUR programs:

- Medication Management Programs. Medication adherence and management is particularly important for individuals living with HIV/AIDS. Our medication management program looks for duplication of HIV medications and under-utilization of HIV medications. In the future, we will also have medication management programs for BH, diabetes, and asthma. These programs help optimize therapeutic outcomes in a safe and cost-effective manner. Through the programs, we communicate with the member, prescribers, and caregivers to close gaps in care, optimize therapies, improve medication adherence, and identify inappropriate or conflicting drug therapies.

**** INNOVATION: HAART Initiative Improves Medication Compliance**

We use special reports run by our pharmacy analytics team to provide anti-retroviral treatment (ART) compliance data to our members' PCPs. The reports identify all the medications the member is taking, as well as prescribing providers. Our Managed Care Coordinators use these reports, as well as medication history in our Case Management System, to assist when prescriptions are rejected at the point of service or require prior authorization, to ensure there are no lapses in medication adherence for our members. When members are in the hospital, Managed Care Coordinators provide UM Nurses critical information regarding the member's ART regimen to prevent lapses in medication adherence during the inpatient stay and after discharge. This program has helped increase our Highly Active Anti-Retroviral Therapy (HAART) rate by 64 percent, from 57.33 percent in 2015 to 93.85 percent in 2016. **

[REDACTED]

[REDACTED]

[REDACTED]

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5.1.3. Ad Hoc Reports Help Us Address Local Needs

Clear Health continuously pulls ad hoc reports to identify opportunities to improve utilization patterns in our provider network. For example, we recently conducted a close examination of all facility providers in our network. For each facility with a higher than average medical loss ratio (MLR), we investigated whether any specific utilization or other trends were driving the higher costs. High MLRs, especially MLRs in excess of 100 percent, can indicate difficulties in stabilizing a member's care. We are working with 10 facilities identified as a result of our analysis to address potential issues or barriers in member care, including whether we need to authorize additional services to better meet member needs.

5.2. Clear Health Mobilizes to Address Potential Cases of Over- and Under-utilization

As described above, we use many reports and tools to identify cases of over- and under-utilization. Once identified, we rely on a variety of programs and approaches to address the issue or individual case.

When patterns of over- or under-utilization present in the aggregate, results are reported to the MAC and QMC. Representatives from our clinical and QM areas work with our Medical Director to discuss intervention strategies to achieve utilization targets consistent with clinical and quality indicators.

5.2.1. Individual Provider Cases of Over- or Under-utilization

When we identify a provider with aberrant utilization patterns, our Medical Director and a Provider Network Manager review the case and, if appropriate, develop an action plan and discuss it with the provider. The action plan begins direct provider engagement in the form of a peer-to-peer discussion with the provider and our Medical Director. They discuss pertinent medical policy and clinical guidelines in the context of case examples where we have concerns about potential overutilization. In this way, we give the provider an opportunity to explain circumstances that may be unique to his or her practice or to the geographical area he or she serves. The provider may submit evidence-based data for our consideration if they disagree with our clinical guidelines.

In cases where we believe application of our current medical policy or clinical guidelines do not require change to address the provider's unique circumstances, we monitor the provider's progress in complying with our UM criteria by reviewing and trending performance over a six-month period, or shorter period if indicated. We use this information, including progress reports, during recredentialing to determine if the provider should remain in our network.

5.2.2. Individual Member Cases of Over- or Under-utilization

Clear Health members are vulnerable to many comorbidities, and we refer members identified as under- or over-utilizing services to our integrated DM and case management program for assessment, care planning, and/or member and provider education and outreach. For members with uncoordinated care patterns, excessive utilization, or suspected patterns of fraud, waste, and abuse, we may also refer them to a program tailored to their specific needs. Examples of such tailored programs include:

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- **CD4 Project.** Our CD4 project addresses members with low CD4 counts (<200 cells/mL) who typically are not fully engaged in their care. A CD4 count is a blood test to determine the strength of the immune system as measured by the presence of a type of white blood cell. A normal range for CD4 cells is between 600 and 1,500, while a CD4 count of <200 cells/mL indicates a severely compromised immune system and a clinical diagnosis of AIDS. In our CD4 project, Managed Care Coordinators must refer members to community-based programs such as Ryan White agencies when appropriate for services not available through the Plan such as support groups, legal and housing resources. We closely track labs, hospitalizations, and referrals to BH Managed Care Coordinators to identify opportunities for improvement and non-compliance patterns. Our Medical Director leads interdisciplinary rounds to discuss each case and develop specific action plans. In addition, a physician with expertise in treating HIV/AIDS populations (and our former Medical Director) lends his expertise in the cases of our most difficult members to engage. Since it began in 2014, our CD4 Project has stabilized or improved outcomes for 42 percent of the members not lost to follow-up (due to disenrollment, death, or inability to contact). Currently, we track approximately 250 members through the CD4 project.
- **Long-Acting Anti-Psychotic Injectables (LAI) program.** This program targets members who are non-adherent to prescribed LAI antipsychotic medications and aims to improve medication compliance, decrease the risk of institutionalization, and reduce potentially preventable readmissions. We assign a BH Managed Care Coordinator to members who have missed a scheduled injection; members who received an LAI during an inpatient BH stay and require their next LAI in the outpatient setting; and members with a prescription for an oral administration form of one of the target medications who missed a recent refill and may benefit from switching to an LAI.
- **Pharmacy Restriction Program.** Clear Health maintains a Pharmacy Restriction Program to identify members who demonstrate patterns of fraud, waste, or abuse resulting in unnecessary ED visits and doctor and pharmacy shopping. If appropriate, we assign the member to a single pharmacy for filling all prescriptions for a period of 12 months. By limiting members identified as potentially misusing or fraudulently obtaining controlled substances, we aim to reduce related ED and physician visits due to doctor shopping. We also refer members with potential substance use issues to a BH Managed Care Coordinator.

6. UM PROTOCOLS FOR SERVICES THAT ARE NEEDED SHORT-TERM VS. LONG-TERM

Although the protocols are the same, Clear Health follows different processes for services that are needed long-term versus short-term. For services needed long-term, we refer the case to a Managed Care Coordinator to provide coordination of all services and eliminate any gaps in care. Most importantly, the referral to a Managed Care Coordinator assures that one individual is responsible for making sure the member's services are received timely and that there are no breaks in care.

For all our members, our UM Nurses coordinate with Managed Care Coordinators and Medical Directors to obtain feedback on long-term authorization requests. Each morning, our UM Nurses receive a list of members in active case management. If the UM nurse identifies a member who may need services authorized long-term, the UM nurse checks to see if the member is in active

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

case management. If the member is on the list, the UM Nurse coordinates with the assigned Managed Care Coordinator to understand what an appropriate service authorization length may be. Or, if the member does not appear on the daily list, the UM Nurse places a referral to case management.

We routinely authorize certain services, like home health services and maintenance services and therapies, for extended periods. In these cases, we approve the service as recommended in the plan of care for up to six months, and in some cases, up to a year, so long as it is medically necessary. Before the initial authorization period expires, our Case Management System notifies the Managed Care Coordinator to reassess the member, update the plan of care, and extend the authorization request as needed. This proactive approach, supported by automatic notifications in our Case Management System, facilitates continuity of care and reduces the risk of unnecessary gaps in the treatment plan.

Although we may authorize certain benefits for up to six months, or even a year, we may require that the supply be delivered in 30- to 60-day installments. We do this to reduce waste, as members may transition to commercial coverage or another Managed Care Plan, pass away, or no longer need the benefit.

When a course of treatment involves an extended period, we ask treating providers to include that information on the initial service authorization request. When the request is approved, we maintain that information in our Case Management System so that the service authorization can be extended for a longer period without filing additional paperwork or a new request. This automatically updates the claims system, and facilitates timely claims payment and eliminates the potential for delays or breaks in care.

7. APPROACH TO ENSURING CONTINUITY OF CARE

Clear Health assures continuity of care for members with special needs, as well as members who transition between various levels of care, different providers, and from enrollment in another plan into Clear Health. As described above, for members with long-term service authorizations in place, our Case Management System provides automatic notifications that trigger outreach and re-assessment by our Managed Care Coordinators to facilitate continuity of care and reduce the risk of unnecessary gaps in the treatment plan.

7.1. Thoughtful Protocol for Members with Specialized Needs

As a specialty plan serving members with HIV/AIDS, all our members have specialized needs. Our members do not need an authorization from their PCP to see a specialist. Additionally, we allow specialists, including Infectious Disease specialists, to be PCPs which is unique to our plan and increases access to care. Currently, we have 121 providers in 188 locations who have submitted specialized HIV/AIDS training attestations to achieve “Red Ribbon” PCP status. Many of these providers are also credentialed under the American Academy of HIV Medicine.

Originally, we found specialists to be somewhat reluctant to become PCPs. But we worked closely with them to bring them onboard in a partnership to better serve our members and their patients. We provide additional training to them on managed care and why it is important to have them as a PCP for populations living with HIV disease.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We developed several policies to make sure we are not a barrier to getting necessary care for members with special needs. To begin with, our UM team works closely with our Managed Care Coordinators and is aware of each member's individualized needs.

We also developed specific protocols to assure continuity of care for particular populations. Examples of our thoughtful approach, developed over the course of 14 years of working with special needs populations in Florida Medicaid, include the following:

- We work closely with Premier Eye to reduce the risk of cytomegalovirus (CMV) disease progression in our members with HIV/AIDS. Members at risk need quick attention by experienced providers to avoid irreversible damage, including blindness. We will coordinate services, and arrange or provide transportation, to make sure our members quickly see these providers.
- We have a relationship with TEAM 1 at Jackson Memorial, a large public hospital in Miami, Florida. The on call Infectious Disease specialists have agreed to see any of our members presenting at the hospital for care. This relationship helps our members receive care from highly trained, HIV-experienced physicians who can improve member outcomes and engage them in all aspects of care.
- We have eliminated service authorization requirements for our members with sickle cell disease. We found that many members would go to the hospital for blood transfusions, through the ED, and end up in observation status. To reduce this potentially preventable hospital admission, we no longer require service authorization for blood transfusions. Our members with sickle cell disease can go straight to an outpatient infusion center to receive necessary care.
- We use HTP Woundcare, to better coordinate care and provide continuity of care for members receiving wound care at home. Upon receiving a request for wound care in the home, HTP Woundcare's certified wound care nurses work directly with the home health agency and the ordering physician to provide a comprehensive treatment plan. They visit the home and oversee progress of the wound on a weekly basis, but do not take over other home health care being provided. They supplement and help coordinate wound care.
- For our youngest members with more complex needs, we approve up to six months of private duty nursing services and therapy services based on their individualized plan of care, to keep the child in the home where they are more likely to maintain a higher level of functioning and quality of care.
- When a member receives fracture care in the ED, and is treated by an out-of-network orthopedist, we cover follow-up care with the out-of-network orthopedist until the fracture heals.
- Members needing anti-psychotic medications in a long-acting injectable form are typically authorized for 12 months.

7.2. Transitions Between Different Levels of Care

We have an inpatient case management team that reviews all members admitted to a hospital and works closely with the hospital discharge planners to assure needed services are in place, including referrals to case and/or disease management. Our UM and case management teams maintain and support open lines of communication and collaboration with hospital staff from the

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

member's admission to the date of discharge. When a member is in the hospital or in any other inpatient acute care setting, our UM Nurses see that the review process incorporates use of established decision criteria to approve appropriate medically necessary care and assign the most appropriate level of care for continued medical treatment.

Our UM Nurses work closely with the hospital physicians, Managed Care Coordinators, discharge planners, other hospital staff, including therapists and nutritionists, as well as the member's PCP and other involved providers to approve and coordinate services during the inpatient stay and as the member is transitioned to the most appropriate level of care (for example, home, acute rehabilitation facility, skilled nursing facility). Our goal is to make sure all needed services are already authorized and in place when the member arrives at his or her new care setting.

UM Nurses refer all members to case management for follow-up, assistance scheduling appointments, and medication reconciliation. Automated letters also notify a member's PCP upon hospital admission and discharge to increase the likelihood of a follow-up appointment. All members identified in our daily hospital discharge report receive a phone call to identify needs and potential referral to case management.

7.2.1. Post-discharge Management (PDM) Program

We understand members are often overwhelmed when hospitalized, when returning home, and/or when there is a sudden increase in the number of people involved in their care. Lack of familiarity with the new caregivers, in addition to the sheer numbers, can be confusing. As a result, our Managed Care Coordinators initiate Post-discharge Management (PDM) activities immediately upon notification or identification of an inpatient admission for physical or BH conditions.

We assign a registered nurse or licensed BH clinician Managed Care Coordinator based on the nature of the member's admission. The Managed Care Coordinator collaborates with facility discharge planners, members, families/caregivers, providers, and UM staff to develop a safe, sustainable discharge plan. As part of the program, the Managed Care Coordinator reaches out (telephonically or face-to-face, depending on member needs) in the first 24- to 72- hours post-discharge, because that time period represents the highest risk for readmission, to make sure follow-up care was received. The Managed Care Coordinator reviews the discharge instructions with the member to make sure the member understands the plan and to confirm that needed services are received. The Managed Care Coordinator addresses any gaps identified.

The Managed Care Coordinator continues to engage the member to verify scheduled services and follow-up appointments are made, assist with arranging transportation, provide reminders, follow up to see that proper services are in place and concerns are addressed, perform medication reconciliation, identify potential issues and educate members/caregivers on how to address complications, and refer the member to our integrated DM and case management program.

7.2.2. Transitions of Care (TOC) Program

Our Transitions of Care (TOC) program, which we recently expanded statewide, improves member transitions out of the hospital by engaging members identified as having a high risk for readmission, their families, and caregivers and better meeting health care needs by providing coordination and continuity of care in the transition home.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We target members for TOC with certain discharge diagnoses, including congestive heart failure (CHF), chronic obstructive pulmonary disease (COPD), and other conditions associated with an elevated risk of readmissions. We also target members with hospital lengths of stay exceeding three days and members with at least one prior hospitalization in the past 12 months.

Managed Care Coordinators conduct home visits to provide a comprehensive health assessment, examine the home environment, and develop a person-centered plan of care with the member, family, and other caregivers using a multi-disciplinary approach. The plan of care addresses the whole person, with an emphasis on self-management, medication reconciliation and management, and closing gaps in care.

The Managed Care Coordinator continues to work with the member and his or her providers as needed over a 30-day period, providing additional support and follow-up through telephonic and in-person outreach and visits. If the Managed Care Coordinator does not believe the member is at elevated risk for readmission, he or she still provides follow-up contact at seven-, 14-, and 30-day intervals post-discharge to verify that the member's condition has not deteriorated, and to refer the member to DM or case management as appropriate.

7.2.3. More Effective Transitions to the Community with Special DME Procedures

Once a discharge is scheduled, our UM Nurse notifies the home health/DME authorization team to expedite review of the service authorization request to ensure services are in place upon the member's return home. We maintain a direct fax line for hospitals to submit discharge orders for home health/DME requests directly to our dedicated home health/DME authorization team, expediting the process, and the team works directly with the hospital's discharge planning team. These requests are prioritized and must be approved no later than 48 hours post-discharge. The average turnaround time is less than one day. We also follow up with the member on the expected delivery date to make sure the member received the services or equipment, and to answer any questions or concerns.

Any authorizations that require same day or next day turnaround are handled by a dedicated nurse who coordinates with the hospital's discharge planning nurse to see that members receive all necessary services.

7.3. Continuity of Care as Members Transition into Our Plan or Between Providers

When new members transition into our plan, we contact the prior Managed Care Plan to obtain and enter into our Case Management System any existing service authorizations and/or plans of care. We honor any service authorizations ordered as part of an ongoing course of treatment, even if the provider is not in our network, for up to 60 days after the date of enrollment. To facilitate claims processing, however, we typically input an authorization into our Case Management System. By doing this, we can reach out to the provider to verify scope and duration of services, and make sure that the provider is not an excluded provider.

In cases where the treating provider is not in our network, and after confirming licensure and lack of sanctions, we enter into a single case agreement paying the rate they received for services rendered to the member before the member's transition to our plan. We may also recruit the provider to join our network as needed to improve access, and guarantee the historical rate for at least 30 days, unless the provider agrees to an alternative arrangement.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We have policies and procedures to address other situations requiring continuity of care. For example, when a treating provider is terminated from our network for any reason other than for cause, we allow members in active treatment to continue care with that provider when medically necessary, through completion of treatment or until the member selects another treating provider, but not longer than six months after termination of the contract.

If a provider is unavailable to deliver previously authorized services in a timely fashion, we work with the member to identify an equally qualified alternative provider in our network, or out of network if needed.

When members transition between providers, we facilitate the sharing of existing treatment plans between the providers and send the new provider the member's plan of care. Our network providers are contractually required to share treatment plans when they are transferring or coordinating care.

8. EXAMPLE OF IDENTIFYING AND ALTERING UNFAVORABLE UTILIZATION PATTERNS

Our Pharmacy Provider Engagement Program provides an excellent example of how Clear Health combines the use of data with our high-touch provider model to change utilization patterns while at the same time resulting in better outcomes for members. The program uses a "clinician- based" delivery model to provide doctors with real-time utilization metrics, comparative performance measures, and educational materials to encourage and assist them in making medically appropriate, quality based clinical decisions. The program employs clinical pharmacists to facilitate a one-on-one, clinician-to-clinician based review of medication prescribing patterns, and helps to educate clinicians on current best medical practices.

One key benefit of this program is that it offsets the marketing strategies of pharmaceutical manufacturers by making providers more aware of the economic and pharmacological features associated with specific drug therapies. Prescribers who are adequately informed can make better therapeutic selections that are both clinically effective and reduce costs.

Our Provider Pharmacy Engagement program is another example of how we use data to support performance improvement. We offer our this program as part of our Integrated Pharmacy Services Model. Clinical Pharmacy detailing complements utilization reviews and involves a focused educational exercise to encourage and assist providers in making medically appropriate and cost-effective clinical decisions.

The main goal of this program is to provide an effective means of delivering important clinical information to our network prescribers, with the primary intention of facilitating sound clinical decision making that will translate into the delivery of the highest quality medical care. The Pharmacy Provider Engagement Program provides an interactive clinical detailing platform which employs the use of four clinical pharmacists that meet regularly with network physicians, on a "one-on-one" basis, to educate, inform, review medication prescribing patterns, and communicate best clinical practice guidelines. They provide real-time utilization metrics, comparative performance measures, and educational materials focusing on cost-effectiveness and quality. Benefits associated with the Pharmacy Provider Engagement Program include the following:

- Timely reporting and utilization data places our network doctors on the "Front-line."

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Identification of brand to generic conversions opportunities, formulation optimization opportunities, trends in the utilization of “High Risk” medications, trends in the instances of non-adherence and instances of therapeutic duplication, assists our network doctors in identifying meaningful and actionable interventions.
- Education on therapeutic drug class comparisons and related market drug pricing provides our network doctors with a means of closing the physician-drug pricing knowledge gap (i.e. Daraprim, Hep C). This promotes appropriate prescribing practices that are cost-effective and it offsets unwarranted, cost inflating prescribing behaviors that result from the persuasive marketing strategies that are employed by pharmaceutical manufacturers. An informed provider who is more cognizant of both the economic and the true relative pharmacological features of specific drug therapies can make better cost effective selections.
- Provided insight to full member medication history, and prescriptions written by other prescribers, gives our network doctors the means to identify member polypharmacy issues in a timely fashion.

Example of Improving Generic Dispensing Rates: Branded Antipsychotic Medications

At the outset of the current SMMC MMA program, Simply quickly became aware that of a significant increase in our SMI population. One of the first data points to emerge based on our daily Rx reporting was a surge in the use of branded atypical antipsychotic medications. Through the Pharmacy Provider Engagement Program the plan was able to collaborate with behavioral network providers and psych specialists to provide pharmacist-based one-on-one education on the comparative therapeutic efficacies associated with specific brand and generic antipsychotic medications in order to promote significant brand to generic treatment conversions which, ultimately, served to optimize the cost effectiveness of antipsychotic medication therapy regimens for plan members. Over 2 years, the plan has seen a 24.6 percent improvement in the generic dispensing rates of antipsychotic medications through provider collaboration efforts focusing on the utilization of generic alternatives.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent describes the process and data sources utilized to determine whether a service should be prior authorized, including reviewing complaints or feedback from providers regarding burdensome or unnecessary prior authorization criteria.
2. The adequacy of the processes used by the respondent to determine whether the utilization management criteria selected are appropriate and consistent with policy requirements for a Medicaid benefit.
3. The adequacy of the respondent's approach to ensure the consistent application of review criteria for authorization decisions (e.g., inter-rater reliability studies, and training for plan staff and network providers).
4. The adequacy of the review processes (data collection and analysis) deployed by the respondent to ensure services are not arbitrarily being denied or reduced.
5. The adequacy of the review processes (data collection and analysis) deployed by the respondent to identify aberrant utilization patterns (under and over utilization).
6. The adequacy of the respondent's approach in differentiating between UM protocols for authorization of services that are needed short-term (e.g., one-time authorization) vs. long-term (ongoing maintenance services/therapies).
7. The adequacy of the respondent's approach at ensuring continuity of care, particularly as it relates to special needs populations.
8. The extent to which the respondent provides a specific example of how its review processes resulted in successful interventions to alter unfavorable utilization patterns in the system.

Score: This section is worth a maximum of 40 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 19 – Utilization Management – Ease of Use (Statewide):

The respondent shall describe the following related to its utilization management systems:

- a. A description of how the respondent will ensure that the UM processes are designed so that service authorization requests are completed efficiently and with minimum administrative burden on network providers and enrollees;
- b. A description of software capabilities that facilitate ease in requesting service authorization and support data exchanges between providers, subcontractors and the respondent (to the extent any UM functions are delegated);
- c. A description of the respondent's experience meeting timeliness standards for service authorization requests;
- d. A description of the approach that the respondent will use to educate enrollees and providers about the process for seeking authorization; and
- e. A detailed workflow of how "special service" requests are processed for enrollees under the age of 21 years. Special services are requests that are made to the plan to exceed the limit on a Medicaid covered service or to cover a medically necessary service that is not listed in the Florida Medicaid handbooks/coverage policy or the associated fee schedule.

Response:

Simply Healthcare Plans, Inc., (Simply) D/B/A Clear Health Alliance (Clear Health) designed and continues to update its Utilization Management (UM) program to improve efficiency, streamline our systems and processes, and provide fully integrated data to support UM decisions and activities. We work closely with our provider network to identify improvement opportunities and facilitate ease of use through education, innovation, and adoption of effective new technologies that save time and administrative costs.

**** RESULTS & SUCCESES: Ease of Use Reflected in High Provider Satisfaction**

Providers indicate high levels of satisfaction with Clear Health's UM process, which we continue to improve based on their feedback. Ninety percent of providers are satisfied or very satisfied with our UM program overall. **

Highlights of our UM program and systems include the following:

- An integrated Case Management System that captures claims history, subcontractor encounter claims data, physical health (PH) and behavioral health (BH) service authorizations, lab results, immunization records, case management data, and disease management (DM) data in a single system with tools for UM staff, Managed Care Coordinators, and providers to identify, manage, and coordinate enrollee (member) needs and enhance member care in real-time

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Innovative features, both current and in the process of being implemented, such as our new provider portal that allows providers to submit service authorization requests and supporting clinical documentation electronically; our SmartPA pharmacy claims system that applies integrated medical and pharmacy data to seamlessly approve service authorizations where diagnoses are required; and our web-based tools which allows providers to easily check service authorization requirements by CPT code
- Ongoing review of our service authorization list to identify services where authorization is no longer effective, such as services we approve nearly 100 percent of the time
- A long history of supporting compliance with timeliness standards for service authorization requests, and quickly returning determinations to members and providers

1. INTEGRATED SYSTEMS SUPPORTS OUR HOLISTIC APPROACH TO CARE

Providers can submit prior authorization requests electronically, by phone, or by fax. Regardless of the method of submission, our system captures the request, the associated medical necessity criteria, and a record of all related communications with providers. It also maintains the final determination, including copies of any notices sent to members and providers. A description of our Case Management System and other key systems that support UM activities is detailed below.

1.1. Interoperable Systems Integrate Information and Support Coordinated Care

Our interoperable systems are built on a managed Medicaid model that reduces redundancies and supports integrated, coordinated care. They include our Core Operations System, data warehouses, supplemental applications, Case Management System, and provider portal.

- **Core Operations System.** Our Core Operations System is the authoritative host, or system of record, for data about members and providers. It collects and tracks data on enrollment, claims, utilization, grievances and appeals, member disenrollment, and other essential functions. Updates occur through the user interface or through application-specific data loads, such as enrollment files received from the Agency. We maintain quality through many interfacing applications that apply rules-based standardization, verification, and validation logic to data elements.
- **Data Warehouses.** Data warehouses support operational processes, analytics, and reporting. They receive data directly from the system of record, including UM subcontractors and other external sources, to promote data quality, control, and consistency. Our data warehouses deliver a comprehensive source of health information about our members and include data for medical, BH, pharmacy, dental, and vision services they receive, as well as lab results and immunizations. Our data warehouses generate member health data included in our Case Management System and supports advanced data analytics, including predictive modeling, to identify members for DM and case management; monitoring of under- and over-utilization; and operational and ad hoc reporting.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- **Case Management System.** Our Case Management System is the system of record for case management activities. It houses member utilization data and clinical information, including claims history, encounter claims data from UM subcontractors, PH and BH service authorizations, lab results, immunization records, case management data, and DM data. With consolidated member clinical data from various sources, it delivers a comprehensive picture of the member's utilization, plan of care, and gaps in care. Our UM, DM, and case management staff use the gaps in care information to work collaboratively with providers and help members get needed services.

The Case Management System captures service authorization data, including requests and determinations, and specifically attaches the data to the member's and provider's records to provide a single source of information.

Clear Health delegates UM for BH services to Beacon Health Options, therapy services to Health Network One, Inc. (HN1), dental services to DentaQuest, optometry/ophthalmology to EyeQuest, radiology and genetic testing to AIM Specialty Health, and audiology/hearing services to HearUSA. Although our UM subcontractors do not have access to our Case Management System, it includes UM subcontractor data such as encounter claims data and BH service authorizations to provide a complete picture of our members' health.

In a provider-facing application, our Case Management System enables providers to view the following services in a user-friendly dashboard:

- Active HEDIS® alerts
- Labs with summary results
- Inpatient treatment, including admission and discharge dates, facility, and primary diagnosis
- Emergency department (ED) utilization, including primary diagnosis
- Pharmacy, including changes in medication
- Service authorizations, such as home health and medical equipment and supplies
- Outpatient primary care and specialist visits, including primary diagnosis
- BH office visits, including primary diagnosis
- Use of preventive care and immunizations

In this way, we share information about members' utilization, service authorizations, case management, including comprehensive health assessments and plan of care, with providers to enhance case management and coordination.

- **Supplemental Applications.** Supplemental applications support all our departments, including UM. A variety of dashboards, business intelligence, analytical reporting, and other applications maximize UM functionality, efficiency, and data analytic capabilities. These flexible applications enhance our ad hoc reporting capabilities and, because of the nature of our integrated systems, help us identify opportunities for improvement and make informed decisions about our UM processes and policies based on comprehensive data.

- **Provider Portal.** A login-only area gives providers a secure, HIPAA-compliant environment where information specific to their needs exists in an integrated, easy-to-use location. Providers can submit prior authorization requests and check status of pending requests through the portal.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.2. Systems Ensure There Are No Delays in Authorizations or Gaps in Care

Our integrated systems, including our Case Management System, seamlessly capture member clinical and other data and link service authorizations to the requesting provider and member ID. Our UM team uses this comprehensive source of information to retrieve information quickly, without asking providers for unnecessary or duplicate information that can result in delays in care. Because our UM team has access to the most comprehensive set of member data in a single application, they process UM decisions more appropriately and efficiently, based on a holistic picture of the member's overall health.

Additionally, our Case Management System houses sophisticated analytic and dashboard capabilities to see that there are no gaps in care or delays in service authorizations. UM staff view pending service authorizations in near real-time, including authorization ID, requesting provider, UM team member assigned to the case, type of service authorization, issue and due dates, and status. A variety of tools and dashboards support UM Managers and other leaders with performance metrics that help prioritize resources, make sure we meet or exceed required turnaround times for prior authorization, and efficiently address member needs.

Our Case Management System also actively supports continuity of care. For example, we routinely authorize certain services, like home health services and maintenance services and therapies, for extended periods. In these cases, we approve the service as recommended in the plan of care for up to six months, and in some cases, up to a year, so long as it is medically necessary. Before the initial authorization period expires, our Case Management System notifies the Managed Care Coordinator to reassess the member, update the plan of care, and extend the authorization request as needed. This proactive approach, supported by automatic notifications in our Case Management System, facilitates continuity of care and reduces the risk of unnecessary treatment disruptions.

Through our Case Management System, any authorized team member can access current information regarding existing or pending service authorizations, thereby reducing potential duplicated efforts, such as multiple requests for the same service for the same member.

2. REDUCING ADMINISTRATIVE BURDENS AND ELIMINATING REDUNDANCIES

Clear Health is responsive to the needs of members and providers, and we continuously assess our systems and incorporate member and provider feedback to make sure our UM program operates as intended, providing the right care, in the right place, at the right time with little administrative burden to providers or barriers to care for members. When a provider indicates that our process is administratively burdensome, we take the feedback seriously and bring it to the attention of the applicable operational areas to discuss whether we can improve our process or tools to make the UM experience more efficient and easy for providers.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

One of the primary ways we reduce administrative burden and barriers to care is by continuously reviewing our service authorization list to identify services where authorization is no longer effective. For example, we look for services we approve nearly 100 percent of the time, or services where service authorization adds little value. When we identify such services, we revise our UM policies to require that providers submit a notification only. This means that the provider must report that the service will be provided, but it will be auto-approved so long as the provider is in our network. In some cases, we may remove the service entirely from our list of those that require authorization. For example, in the previous 12 months, we identified 88 codes that could be removed from service authorization requirements or moved to the notification only process instead.

Additionally, by eliminating the requirement that PCPs authorize services and specialty referrals, we significantly reduce administrative burden and barriers to care.

**** INNOVATION: Provider portal streamlines prior authorization process**

Our innovative, new provider portal enables providers to submit service authorization requests and supporting clinical documentation electronically, without having to pick up a phone or fax documents to us. This minimizes administrative burden, and enables providers to attach clinical documentation at any time after the case is opened. Through the portal, they may also update documentation needed for us to render an appropriate decision. This information is seamlessly integrated into our Case Management System, and used by our UM Nurses and Medical Directors during the review.

The system has many unique capabilities and creates new efficiencies for providers, such as being able to approve or deny a service authorization request for common procedures immediately. Using our medical policy and clinical guidelines, combined with integrated data from our claims system, the system asks providers for the minimum amount of additional information necessary to process the request and deliver a response in real-time. It also links to our claims system and advises providers whether an authorization for a service is required or strongly recommended. When service authorization is not required, the provider can easily print the message for his or her records and future reference. **

In addition to our portal, providers may also submit authorization requests by phone or fax. To save time, and recognizing that many providers work after routine business hours, our system enables them to check on the status of a pending service authorization request through our provider portal or a telephonic voice portal at any time. All service authorization requests, regardless of method of receipt, feed into our Case Management System.

We encourage providers to use our new provider portal to submit service authorization requests in a variety of ways. We promote the portal by emphasizing its efficiencies and other benefits to providers through our routine communications, including IVR messaging, pocket guides, fax cover sheets, provider newsletters, and targeted mailings. We also conduct portal demonstrations for large provider groups, offer online tutorials, and update call scripts to reference the portal and answer any provider questions. As providers learn about the new system and its advantages, we have experienced a steady increase in its use. Electronic service authorization requests more than doubled (to 10 percent of the total) since implementation of the new UM portal; however, fax requests (47 percent) and phone requests (43 percent) remain the primary methods of submission.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2.1. Ease of Use and Enhanced Efficiency for Pharmacy Service Authorizations

For select prescription drugs, we use SmartPA, our point-of-sale pharmacy claims processing system, to process service authorizations more quickly and reduce administrative burden for providers. SmartPA uses intelligent and automated logic to validate that a submitted claim for a drug requiring service authorization meets approved clinical criteria.

Our pharmacy claims system includes diagnosis data from member medical claims. This allows SmartPA to apply integrated medical and pharmacy data to seamlessly approve service authorizations where diagnoses are required. During adjudication, the SmartPA rules evaluate the member's medical claims diagnosis for the presence of a diagnosis code representing a condition that does not need a thorough clinical review to authorize the medication. When the algorithms confirm the diagnosis, SmartPA overrides the need for a service authorization and processes the claim. In this way, SmartPA can eliminate the need for the provider to submit a traditional service authorization request, simplifying and streamlining the process for the prescriber and eliminating delays for the member.

Smart PA improves both the member and provider experience by:

- Assuring appropriate use of medications
- Decreasing wait times and member inconvenience
- Facilitating access to prescriptions and reducing provider administration burden

**** INNOVATION:** Electronic prior authorization for pharmacy will enhance ease of use.

We are in the process of making additional improvements to our pharmacy service authorization process. We are implementing electronic prior authorization (ePA) capabilities, which will provide a new alternative for prescribing providers to initiate and manage service authorization requests for medications. The ePA process will enhance efficiency and ease of use for prescribing providers and foster a smooth member experience. For example, if the necessary information to meet clinical criteria is submitted during the ePA process, an immediate approval decision can be completed and communicated back to the provider.

The new ePA system will increase efficiency and reduce administrative burden because:

- It is faster than submitting requests by phone or by fax, plus there is no paperwork to manage
- It has automatic approval capabilities to further expedite the process and foster an improved member and provider experience
- It is easy to use, building off e-prescribing processes many providers are already familiar with
- It automatically generates approval and denial notices to members and providers in accordance with State and federal requirements ******

3. MEETING TIMELINESS STANDARDS FOR SERVICE AUTHORIZATION REQUESTS

Since 2014, we have processed nearly all standard and expedited service authorization requests within required time frames. Table 19-1 in Attachment SRC# 19-1: Service Authorization Performance illustrates our performance, as well as our low denial rate.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Robust policies and procedures, supported by data analytics and dashboards, help us make sure we are meeting timeliness standards for service authorization requests. We have incorporated these processes into our daily operations. For example, we have separate queues in our Case Management System for service authorization requests identified as urgent or life threatening, and a dedicated team of UM Nurses processes these requests to see that we render decisions quickly. Our internal goal is to process expedited requests in one business day or less, significantly exceeding the Agency's requirement of two days.

We require our UM subcontractors to adopt and follow the same UM policies and procedures we apply internally, including compliance with service authorization turnaround times. We closely monitor the timeliness of UM subcontractors' service authorization turnaround times, member grievances and appeals, and provider complaints through a standardized monthly report. If a UM subcontractor fails to meet a timeliness standard or metric required by the Agency or under our contract, we issue a corrective action plan.

Clear Health initiated a Six Sigma process improvement project in 2016 to enhance our service authorization turnaround times. This initiative aimed to improve the member and provider experience, and several process improvement activities are now underway. These include:

- Training Fax Sorters to separate requests needing clinical review
- Streamlining forms to eliminate duplicate documentation
- Expanding training and system capabilities to help UM Nurses quickly focus on service authorizations in the clinical fax queue, more easily identify the oldest cases in inventory, and eliminate the need for UM Managers to make individual assignments
- Implementing additional UM Nurse quality audits to assure process consistency and identify improvement opportunities
- Automatically approve codes at the UM Coordinator level if no medical policy or UM guidelines are available to determine medical appropriateness, eliminating the need for UM Nurse review and shortening the time to render a decision
- Dedicating three UM Coordinators to make outbound redirection calls, enabling other staff to concentrate on production
- Asking UM Nurses to forward cases with missing clinical documentation to Medical Directors after two prior attempts to retrieve the information from the provider
- Initiating a Tuesday through Saturday work schedule for seven UM Coordinators, providing added weekend coverage and better serving our members and providers
- Establishing more aggressive internal performance standards

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

**** RESULTS & SUCCESSES:** Our already strong UM turnaround times continue to improve. Clear Health's streamlined processes, and comprehensive monitoring of pending service authorization requests helps us consistently meet or exceed the required processing time frames. Our turnaround times have exceeded the 95 percent processed within seven days benchmark for the past several years. In fact, we consistently perform at two days or less for approval decisions, which account for more than 94 percent of all our authorizations. We expect to see additional improvements in 2017 from our newly adopted process improvements. Already the percentage of expedited service authorization requests processed within one day improved from 76.3 percent to 87.6 percent in a three-month period, and the percentage of our standard service authorization requests processed within three days increased from 35.2 percent to 54.5 percent during the same period. ******

At Clear Health, we meet on any case that exceeds the seven-day timeliness standard and review the case to identify root causes for the delay. We quickly act on issues before they become trends by providing additional staff education or implementing necessary process improvements.

4. PROVIDER AND MEMBER EDUCATION AND TRAINING PLAN

Through a robust provider-servicing model, we educate network providers on covered benefits and service authorization requirements. We include comprehensive information about our service authorization process and forms in our provider manual and on the provider portal.

Provider orientation also includes an overview of the process, including services that do not require authorization, time frames for processing authorization requests, our Service Authorization Form, and how to obtain further information. When we revise our service authorization process, clinical criteria, or other UM policies, we update providers through various communications, including mail, the provider portal, and fax blasts. In fact, provider portal updates are typically expedited and posted within 24 hours.

Additional resources include a toll-free UM phone number staffed from 8 a.m. to 7 p.m. We automatically route all provider-initiated UM calls to staff who guide and support the provider through the authorization process. We maintain close, collaborative working relationships with our network providers, and many view us as a clinical resource. We communicate often with providers and facilities, discussing individual cases, helping them navigate Medicaid benefits, asking for additional clinical information, and identifying alternative services that may better address the member's condition. Ninety percent of providers report that they are satisfied or very satisfied with the timeliness of our Medical Director's response to their concerns.

For members, we provide information about the process for seeking authorization in our member materials, including our member handbook and website. This includes information about services requiring prior authorization and the appeals process. Our Customer Care Representatives, Managed Care Coordinators, and UM staff reinforce information about the appeals process in their interactions with members.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5. TRANSPARENT SERVICE AUTHORIZATION PROCESSES

Our provider portal includes our pre-certification look up tool (PLUTO), which enables providers to easily check service authorization requirements by CPT code. PLUTO also informs the provider whether the service authorization request will be reviewed by one of our UM subcontractors, such as Health Network One (HN1), or by our UM team.

In addition to clear information about our service authorization process, providers can also find our medical policies and UM criteria on our website through a user-friendly search feature. They can browse medical policies and UM criteria by category or name, obtain recent updates, and view historical information.

Our member handbook and website include valuable information about referrals and authorizations. The information identifies the difference between referrals and authorizations, how long it may take to process an authorization request, what to expect if we deny an authorization request, how to appeal a denial, what benefits never require a service authorization, and what benefits do require service authorization.

Because of our compliance with the Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA), as it applies to Medicaid MCOs, our authorization requirements for BH services align with the State's fee-for-service program, which further enhances transparency and ease of use for providers.

6. "SPECIAL SERVICE" REQUEST WORKFLOW

The Early and Periodic Screening, Diagnostic and Treatment (EPSDT) benefit is more comprehensive than similar benefits for adults. To make sure that our youngest members receive early detection and care, and to help avert or diagnose and treat conditions as early as possible, Clear Health handles "special service" requests for members under the age of 21 differently than other requests.

Special service requests are those that exceed the limit on Medicaid covered services or request a medically necessary service not covered by Medicaid. For members under the age of 21, Clear Health does not deny services under the EPSDT benefit if they are medically necessary. If the service is covered by Medicaid but exceeds coverage limits — for instance, is listed on the Medicaid fee schedule — our UM Nurse checks for medical necessity. If medical necessity criteria are met, the UM Nurse approves the request. If it does not meet the criteria, or the service is not listed on the Medicaid fee schedule, a Medical Director reviews the case and makes the final determination.

Figure 19-1 in Attachment SRC# 19-2: Special Service Request Workflow illustrates how we process special service requests.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent proposes the use of interoperable systems that will seamlessly integrate information from providers to the respondent and its subcontractors (to the extent any UM functions are delegated) and the extent to which the respondent describes how that information will be used to enhance care coordination services and to ensure there are no delays in authorization or gaps in care.
2. The extent to which the respondent uses strategies to reduce administrative burdens for the provider (e.g., software capabilities) in requesting authorization and its approach is streamlined with little to no redundancies between and across departments which could contribute to delayed service authorizations.
3. The extent to which the respondent has demonstrated experience with meeting timeliness standards for service authorization requests.
4. The adequacy of the respondent's education and training plan providers on the service authorization processes.
5. The extent to which the respondent ensures transparency in service authorization processes (e.g., makes available all utilization management protocols and criteria in an accessible location for service providers).
6. The extent to which the workflow describing the respondent's process for handling "special service" requests is consistent with Early and Periodic Screening, Diagnosis and Treatment (EPSDT) requirements.

Score: This section is worth a maximum of 30 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 20 – Care Coordination (Statewide):

The respondent shall describe its approach for identifying, assessing, and implementing interventions for enrollees that present with the following:

- Complex medical and/or behavioral health needs;
- High service utilization;
- Intensive health care needs; and
- Consistently accessing services at the highest level of care.

The respondent's approach shall include:

- a. A description of the algorithm used to identify and stratify eligible enrollees by severity and risk level;
- b. A description of minimum contact frequencies and contact type for each severity and/or risk level;
- c. A description of the maximum caseloads for each case manager (ratio requirements) and support staff;
- d. A description of evidence-based guidelines utilized in the care coordination approach, including interventions deployed to improve enrollee engagement and improve treatment adherence; and
- e. A description of performance metrics used to evaluate the efficacy of the care coordination, including cost-savings, reduction in the use of higher cost services, etc.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Clear Health brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

The story of Clear Health over the past five years is the story of remarkable innovation, shared learning, and increased integration to respond to the our members' changing needs. Originally designed based on the Ryan White Act/Project AIDS Care (PAC) home- and community-based waiver program, the model evolved to include an enhanced medical component. The Clear Health Case Managers, called Managed Care Coordinators to differentiate from the Ryan White agency case managers with whom we collaborate, brought specialized knowledge of HIV/AIDS disease processes and treatments to our members and responded to their daily needs. While we retain this clinical expertise and responsiveness at the heart of our model of care, the current Clear Health model promotes the comprehensive health and well-being of our members using sophisticated tools, integrated care techniques, and evidence-based care protocols to proactively

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

determine appropriate types and levels of service to meet each member's needs and maximize health and outcomes.

The new Clear Health model of care combines case management and disease management programs built around four key principles that characterize HIV/AIDS care today:

- HIV/AIDS is a chronic disease suitable for self-management and patient education
- HIV/AIDS is a disease that can be managed largely on an outpatient basis, thus avoiding costly inpatient care
- There is a consensus on what constitutes optimal care
- Optimal care can reduce morbidity and costs and improve outcomes

Clear Health is a state-of-the-art Medicaid HIV/AIDS program, incorporating new innovations in provider partnerships, evidence-based practices, and lessons learned working with our members around Florida.

At Clear Health, our population health management approach promotes a multidisciplinary and integrated care continuum to health care delivery, including disease management and case management approaches, to support the distinct needs of each enrolled member at different stages in their lives. As our members age, their needs change, and we change with them. Our model stratifies members based on their health status, identified risks and needs, level of engagement, member priorities, and use of health care resources to match the appropriate intensity of disease management and case management support needed. Members are supported by one Managed Care Coordinator for all needs, with some exceptions as noted below. The case management program in Florida meets all State, federal, contractual, and NCQA requirements.

We offer and encourage all members in our specialty plan to participate in case management services due to the complexity of managing HIV/AIDS disease processes and co-morbid conditions. Members who agree to participate in case management are matched with a Managed Care Coordinator who knows their community and works collaboratively with them to facilitate their care and services. Our in-house case management program is at the heart of how we ensure our members receive the right care at the right place at the right time – every time.

1. RISK STRATIFICATION METHODOLOGIES AND ALGORITHMS

The process for risk stratification and identifying needs begins soon after enrollment with Clear Health. When enrollment is confirmed, our Customer Care Representatives outreach to new members to welcome them to the plan, discuss benefits, and complete an initial health risk screening to begin to understand their urgent and ongoing health care needs. Our Customer Care Representatives speak to the member about the case management program and attempt to schedule a comprehensive assessment. These assessments provide a risk score that incorporates social determinants of health, medical conditions, behavioral concerns, cognitive concerns, emergency room (ER) and hospital utilization history, pharmacy, treatment compliance, and functional areas of concern. Other data sources for risk stratification include enrollment data provided by the Agency for Health Care Administration (AHCA), enrollee demographics, claims

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

history, comprehensive health risk assessment (HRA) results, and referrals from members, family, providers, and internal staff such as Customer Care Representatives, Managed Care Coordinators and Utilization Management employees.

Clear Health Alliance uses robust methods to identify and stratify risk among our members initially and on an ongoing basis and we use the information to proactively identify gaps in care and target interventions. We prioritize information and action in these areas that may indicate high-risk behavior or utilization patterns that are sub-optimal for outcomes:

- Gaps in anti-retroviral treatment, anti-fungal or antibiotic regimens
- Utilization at facilities and of services not aligned with current member treatment plans
- Presence of diagnoses comorbid with HIV/AIDS that require special attention or management strategies (i.e. hepatitis B and C, tuberculosis, diabetes, cardiovascular disease, hypertension).
- Indications of pregnancy that would require additional intervention for anti-retroviral treatment
- Sub-optimal CD4 management
- Social determinants of health, including homelessness and food insecurity, that impact health outcomes
- Co-occurring mental health and substance use disorders
- Inconsistent medication adherence

In concert with our member engagement strategies, our data analytics resources continually mine all available information about diagnoses, past health care utilization, and demographics that will help us identify risks and anticipate the needs of our members.

This data is analyzed by our proprietary predictive modeling software, Chronic Illness Intensity Index (CI3), to produce a risk profile in one of three categories: low risk, moderate or rising risk, and high or urgent risk. We use these categories of risk as the initial basis of case management assignments and follow-up procedures.

In general terms, our stratification methodologies define levels of risk in these ways:

- Low Risk: Members who do not have urgent medical concerns and have no apparent history of inappropriate use of the ER. Members have HIV/AIDS and may have other chronic conditions but the disease(s) are well controlled and members maintain connections with a primary care provider or specialty provider. There are not major gaps in care apparent from the data review. There is no evidence of serious mental illness (SMI) or substance use disorder (SUD) in the history.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- **Medium or Rising Risk:** Members self-identify some medical or behavioral health (BH) concerns or the claims review indicates need for additional support to manage chronic conditions which may be in moderate control. Members may have moderate ER use or recent hospitalizations. Members may have co-morbid medical and BH conditions, including SMI or SUD in remission. Members who cannot be reached and show a claims history indicating chronic conditions may be in this category to initiate follow-up.
- **High or Urgent Risk:** Members indicate or are found to have high needs or urgent issues that require follow-up by specialized, experienced Clear Health Managed Care Coordinators. They may have complex medical histories including multiple chronic conditions in poor control, including BH and medical conditions, or intensive health care needs. Members may tend to access care at the highest levels or have patterns of high utilization of the ER and a history of multiple admissions.

1.1. Members with Complex Medical and Behavioral Health Needs

We search claims and diagnosis information to identify members with significant BH conditions that may impact their overall health status as well as their management of HIV/AIDS and other chronic conditions. We also use additional analytic tools to assess enrollee risk of BH admissions when certain conditions are present, even if there is no history of past psychiatric hospitalizations. Members with complex medical and BH needs are assigned a primary Managed Care Coordinator best matched to their needs and are supported by a BH Managed Care Coordinator. Our Clear Health Managed Care Coordinators meet regularly together and complete monthly rounds supported by both a medical physician and psychiatrist to review cases and ensure that our members receive comprehensive care through difficult circumstances. Members maintain one Managed Care Coordinator as their point of contact to reduce confusion and promote building strong relationships.

1.2. Members with High Utilization

Through predictive analytics, we identify members with high utilization of pharmacy, frequent medical or BH hospitalizations, or emergency department (ED) visits and assign these members a high-risk value. Utilization at these levels may indicate that members are not connected to outpatient providers for routine management of their conditions or may indicate complex co-morbidities or challenges that require close monitoring to prevent negative outcomes. Members with high utilization are placed at the top of the queue for case management outreach after enrollment and remain a priority for Managed Care Coordinators.

1.3. Members with Intensive Health Care Needs

Clear Health has specialized integrated disease and case management programs tailored to meet the intensive needs of members with particular conditions, including members with diabetes, hypertension, asthma, major depressive disorder, heart diseases, coronary obstructive pulmonary disease, schizophrenia, SUD, bipolar disorder, and cancer. We seek to identify members with additional complex needs as early as possible through claims review, initial screening, and referrals. Our case management staff then complete condition-specific assessments with the member to define the level of risk and vulnerabilities in the member's care plan.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.4. Members Consistently Accessing Care at the Highest Level

Our continual data mining and service utilization review processes systematically identify members with over-utilization of health care resources, such as multiple ED visits and inpatient admissions, as well as under-utilization of preventive and wellness services such as routine primary care visits, visits to BH providers, anti-retroviral (ART) medications, and CD4 testing. Managed Care Coordinators work with members with inefficient patterns of accessing care, their families/caregivers, and providers as appropriate to identify the intervention and program that will best meet their needs. Interventions include member education on benefits and services; partnering with network providers to make them aware of gaps in care; and ongoing engagement with our case management staff to assist members with high-risk conditions to access appropriate preventive care and engagement with community resources to assist with housing, job placement, legal assistance, and other important social supports.

Clear Health case management interventions are tailored to meet the needs of the individual member and vary based on intensity of need. Based on their initial assessment results, utilization patterns, and calculated risk scores, we assign members to one of three risk levels and match them to Managed Care Coordinators based on the risk in addition to other factors such as language preferences and region. We will generate risk profiles monthly for each member and use our Managed Care Coordinators' sound clinical judgment to identify changes in status and meet members' changing needs swiftly.

We design Managed Care Coordinator assignments for the Clear Health Plan to balance members with intense care coordination needs with those with less intensive needs in a panel. This allows our Managed Care Coordinators to be flexible in responding to the needs of each of our members in a manner and level of intensity that best meets their needs at any given time. In addition, this balanced panel method allows Clear Health to support case management staff located as close as possible to the communities where our members live, building solid relationships with our members, providers and partners.

2. COMPREHENSIVE DATA SOURCES FOR RESPONSIVE RISK STRATIFICATION

To maximize the effectiveness and responsiveness of our risk stratification process, we include comprehensive data on our members to determine their risks and priorities for case management. These data sources include:

- Demographic/Enrollment Data: provided by AHCA and confirmed by our Welcome Call. Data is used as a part of the predictive analytics model to establish an initial risk score and enrollment information often contains indicators for complex and special needs members.
- Utilization Management data, including authorizations, claims and non-covered services. We monitor data in our utilization management department and flag individuals who have patterns of use or for whom there are claims for non-covered benefits. We also look at the converse -- members who have authorizations or orders but no matching claims for that service. These members are referred to case management to ensure coordination of care and to determine if there is an unmet need or members not fully accessing their health benefits.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Pharmacy claims data: ongoing review of Pharmacy Claims data is used to flag over-utilization of some medications indicating possible SUD, as well as under-utilization indicating lack of adherence.
- Initial Screening. Performed with all new members during the welcome call, an Initial Screening tailored to the needs of the population provides real-time information about the new member's needs. Members who answer these questions affirmatively are referred to case management for follow-up including more comprehensive assessments.
- Comprehensive Health Risk Assessment. All members engaged in case management complete a comprehensive health risk assessment including a specific HIV disease questionnaire with the Managed Care Coordinator that reviews medical and BH history, diagnoses, ongoing issues, and service needs. The Comprehensive HRA is the basis for the care plan.
- Data from providers, including referrals for case management. We work closely with our providers and encourage referrals to case management when providers have an enrollee they are concerned about or who has additional needs. In true partnership to improve health outcomes, our providers and Managed Care Coordinators regularly collaborate to address medical and psychosocial issues of our shared members .
- Input from staff working with members. Managed Care Coordinators working with members identify additional data points and concerns and can escalate or lower risk profile at any time due to changes in status, social needs, or member responses to interventions.

3. USE OF SOPHISTICATED PREDICTIVE MODELING FOR RISK STRATIFICATION

Predictive modeling tools are used monthly to identify changes in risk domain, driving possible changes in case management contact frequency and interventions. We developed our predictive model to compare the complexity of the conditions of all members in our diverse population. This allows us to stratify all members appropriately, thus identifying members with the most complex needs/conditions requiring intensive case management and follow-up.

Our CI3 is the primary component of our proprietary predictive modeling system which synthesizes data to indicate the member's overall illness burden and develop an individualized member risk profile and score. We customize the tool to the HIV/AIDS population, including prioritizing certain high-risk flags, diagnoses, and non-compliance with ART medications, to ensure that the results are helpful to our Managed Care Coordinators in coming up with a comprehensive and responsive care plan with the member.

In addition to the CI3, we use four other predictive modeling tools with this population to generate risk scores among sub-populations to stratify the member's risk level, prioritize outreach and assessment, and determine the scope and level of interventions needed.

- ER TRIAGE. Predicts the likelihood of low-level ER utilization.
- Readmission risk. Recalculates based on the inpatient daily census report to determine the likelihood of readmission.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- BH First Time Admission. Identifies indicators of BH issues that may result in first-time admission.
- Pharmacy. Identifies indicators of over-utilization and possible substance use disorder.

Some of these members may already be thoroughly engaged with our Managed Care Coordinators and there will be limited new information. For some members who are less engaged with Managed Care Coordinators, the process may flag a new acute issue or a pattern in utilization that is actionable through case management. We identify changes in member stratification through review of their past 12 months of claims for which data is available. Additionally, the system considers member historical information, including diagnosis and demographics to predict future outcomes.

All members have a clinical profile generated monthly to track changes in status and meet members' changing needs swiftly. These individualized clinical profiles contain information about each member including: demographics, contact information, CI3 and Likelihood of Inpatient Admission (LIPA) scores, coexisting conditions, utilization data, and recent case management information.

4. FREQUENCY AND INTENSITY OF CARE COORDINATION INTERVENTIONS

Our case management protocols and expectations are tailored to meet the individual needs and goals of our members and the level of risk at their current state of disease progression. We know the needs of our members change and evolve over time, we expect that all our Managed Care Coordinators will connect with each high-risk member enrolled in case management at least once every 30 days. For members with low or medium risk profiles, Managed Care Coordinators will make contact every 60 to 90 days. Depending on case mix of risk profiles, the average caseload for a Managed Care Coordinator is 100 - 130 members although that varies based on member complexity and needs. For members with the more intensive needs, the average case load is between 40 and 80 based on member preference for communication methods (face-to-face or telephonic). In addition, Clear Health has supervisory and support staff who do not carry caseloads but support the work of the Managed Care Coordinators.

Case Management staff are reflective of the population served and are assigned to members based on several factors, including but not limited to, language (English/Spanish/Creole), gender preference (male/female), age, and cultural factors (including sexual orientation). Staff is provided training and continuing education in HIV/AIDS as well as social concerns facing this unique population. In addition, staff attend AIDS Education and Training Center webinar trainings monthly to maintain up-to-date knowledge of HIV/AIDS in addition to enhancing their knowledge of community services. The case management department subscribes to and regularly reviews top HIV treatment resources to remain abreast of new developments in care and treatment issues as well as to educate our enrollees and refer them to reliable sources for information and support.

Case Management interventions with Clear Health members are aimed to support our members in managing their HIV/AIDS diagnosis and achieve best possible health and functionality. As our members have aged, so have the number and complexity of their co-morbidities requiring a more comprehensive approach to case management. Our plans of care address co-morbid conditions and consider the whole health of the member.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

We tailor Clear Health case management interventions to meet the needs of the individual member and vary based on intensity of need and member preferences. Based on their initial risk scores, we will assign members to one of three population health risk levels (low, moderate/rising, and high/urgent) and conduct outreach to those with higher needs. The risk levels build upon one another and define the types of services, supports, and resources for members at each level. We recognize the status of members' physical or BH risks and needs will fluctuate throughout their time enrolled with us. We generate risk profiles monthly for each member and use our Managed Care Coordinators' sound clinical judgment to identify changes in status and meet members' changing needs. Members may request to join the case management program or increase the intensity of our interventions to meet their needs.

Members with low risk will have ongoing access to our Member Services line to request coordination of care and benefits, including transportation, and will receive proactive, tailored communication about self-care, management of chronic conditions (for those in our disease management program) and reminders to complete all recommended preventive services. All members can request to speak to a Managed Care Coordinator at any time by calling our Member Services line or Clear Health Care Coordination queue.

Members with high and urgent risk, who consent to enrolling in case management, are assigned to an experienced, licensed Registered Nurse or Social Worker. We determine assignment by several factors, including whether the member's primary condition of concern is a physical or BH condition; what the member's primary language is; and where the member lives. We work hard to assign members to Managed Care Coordinators who are familiar with resources in the member's local community, including the resources tailored to meet the needs of our specialty population. Many of our Managed Care Coordinators have been with the plan since our inception and bring decades of experience navigating the health care delivery system and community resources on behalf of our members. They bring passion and purpose, as well as strong technical skills, robust protocols, and service templates, to their work. Our Managed Care Coordinators receive integrated physical health and BH case management training through My Learning and co-manage members as needed to offer comprehensive, cohesive support.

The individualized plan of care will be completed in collaboration with the member, legal guardian, or other legally authorized individual based on the member's preferences. The plan includes, but is not limited to, the following based on member assessed need and priorities:

- Identified problems based on discussion with member/caregiver, HRA findings, and additional assessments (as applicable).

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Interventions to mitigate problems, improve self-management and/or decrease health risks including, but not limited to, the following as applicable:
 - Education based on the member assessment of health risks and chronic conditions
 - Monitoring of adherence to treatment regimen
 - Co-morbid conditions and the monitoring of other health related conditions and lifestyle issues
 - Symptom management, including addressing needs such as working with the member on health goals
 - Emotional issues of the caregiver
 - Behavioral management issues of the member
 - Effective communication with providers through care coordination of appointments, primary/specialist care, transportation, and other assistance as needed to facilitate care for member
 - Medication management, including the review of medications that a member is currently taking to avoid adverse effects or interactions from contra-indicated medications
 - Referrals to formal/informal resources, including community based supports such as Ryan White programs for support groups, legal, food and/or housing assistance as needed
- Identified barriers, if any, to care or member participation in goals
- Established and measurable goals/objectives and outcomes, as well as sufficient information, to determine if goals/outcomes are met

Once the care plan is in place, the Managed Care Coordinator works with the member to support them in meeting the individual goals and responding to acute events as needed to promote health. Care plans are updated at least annually or as our members health status changes.

Partnering with our members to improve their health often involves drawing on the unique expertise of more than one Clear Health case management staff person. Thirty-four percent of our members have serious mental illness in addition to HIV. To effectively manage these members, our Managed Care Coordinators may work together to form a multidisciplinary team to engage the member, their caregivers, and the community-based providers in a holistic manner. Clear Health members maintain one main point of contact with a Managed Care Coordinator to reduce confusion, facilitate solid relationships, and streamline communication.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5. INNOVATIVE STRATEGIES FOR ENGAGING HIGHLY RESISTANT AND DIFFICULT TO REACH POPULATIONS

Over the past four years, Clear Health learned important lessons about engaging our members that led directly to improvements in current practice. Many of our members are difficult to engage in traditional ways due to negative past experiences with health plans and healthcare providers; complex medical and BH conditions, including a high prevalence of SUD among our members; transient lifestyles; or other social determinants of health. We meet members where they are – in their homes, community centers, and shelters. We work with community partners and trusted providers to locate and engage members in their health care. We use all tools available to connect with our members initially and offer sustained, person-centered case management support and benefits.

**** REAL STORY: Connecting Hard-to-reach Member to Services and Supports Improves Health and Quality of Life**

Sometimes it helps when you have a history with someone. That's what Shay, our Managed Care Coordinator, thought when she saw Natalie's name on the new member roster. She had been Natalie's case manager under the Ryan White program at The Village in Miami, and knew she had a history of chronic homelessness, substance use, mental health issues, stroke, and criminal justice system involvement, in addition to HIV. She asked to be Natalie's Managed Care Coordinator, and, from her file, learned that Natalie had been intermittently filling medications and attending medical appointments and could not be reached.

As before, Natalie was hard to locate, so Shay referred her to one of our Outreach Care Specialists who located her at a women's shelter. By rekindling this trusted relationship, Shay was able to engage Natalie to take renewed interest in rebuilding her health and strength. She educated Natalie about her benefits, coordinated appointments with a PCP and psychiatrist, connected her to physical therapy, and helped her get approval for a motorized scooter. Natalie also began attending a support group at the clinic where her PCP and community case manager are located. She is taking her HIV and mental health medications more consistently, and is accessing a local food bank to help meet her nutritional needs. Her health and quality of life have improved dramatically, and best of all, Natalie is now living in her own apartment with financial aid from a housing program for persons living with HIV/AIDS. **

5.1. Initial Engagement of Members in Case Management

We use various methods to initially connect with all new members and offer case management support. Our Customer Care Representatives attempt to connect with the member first by phone, including attempts at different times of the day and days of the week, and will send an "unable to contact" letter if phone calls are not successful. The Member Outreach Specialist or Managed Care Coordinator may attempt additional methods of identifying contact information for the member including searching past enrollment files and claims information and leveraging publicly available data sources such as those from the Department of Corrections and Healthy Start. We may also use claims data information to connect with providers who have established

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

relationships with members and can help us make the initial connections. Clear Health also purchases resources from the Homeless Management Information Services (HMIS), a local information technology service that collates information on homeless shelters that are currently or recently provided services to our members who are homeless. We will use the HMIS “client tracker” to identify the whereabouts of high risk members who are homeless.

Our Case Management teams are notified of all inpatient admissions via our daily inpatient census report and by twice-daily notifications from the Emergency Notification System (ENS). This allows our Concurrent Review nurse located at facilities and/or the assigned Managed Care Coordinator to conduct outreach to the member and facility staff prior to the member’s discharge. At this time, our staff engage the member and family/caregiver as appropriate in discharge planning, share information about our plan and the benefits and supports for member needs, update the member’s contact information, conduct the health risk screen, and explain the case management program. If the member agrees, the Managed Care Coordinator makes an appointment for the comprehensive health risk assessment and to initiate support for transition to the next level of care. Our Managed Care Coordinators also share information about the hospitalization with the member’s providers if known, closing the loop and promoting continuity of care throughout our system.

Community based organizations are a key resource in connecting with and gaining the trust of many members. Project AIDS Care (PAC) Waiver organizations, in particular, have experience working with homeless and marginalized populations that are difficult to reach and engage in care. As the PAC Waiver program ends in the 2017, we have agreements to continue to work with several of these organizations to capitalize on their established processes and relationship with our members. For example, the organizations will assist in engaging homeless members, will facilitate housing applications, will support members with housing issues, such as securing housing or shelters. Likewise, the community-based PAC waiver groups will be our “boots on the ground”, in some cases and in some communities, to engage with members in their spaces and to engage them to close gaps in care. The groups can also help our members with maintaining Medicaid eligibility which can be challenging for members who are difficult to reach. We also partner closely with County Health Departments, Ryan White providers and other community-based entities that reach our members.

For members whom we are not able to engage in case management, our Member Outreach Specialists continue to track and monitor their care, filling gaps as needed. The Outreach Specialist will continue to reach out to members and try to engage them more fully in plan offerings.

5.2. Sustained Engagement of Difficult to Reach Members

Our approach to person-centered case management is designed to ensure maximum engagement by all our members throughout their tenure with our plan. Our Managed Care Coordinators engage members in programs using Motivational Interviewing, Recovery and Resiliency, Trauma Informed Care, and Person-Centered Care Planning techniques – evidence-based methods proven to maximize and sustain engagement. With these techniques, the member actively manages their own health care needs and improves their quality of life with the support of our clinical staff.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

We serve the needs of our members using a combination of telephonic and in-home visits for high intensity case management interventions and clinical programs, based on each member's individual assessed needs, preferences, and the experience of our Managed Care Coordinators. We take care to build trusting relationships between Managed Care Coordinators and our members including ensuring that each member has one point of contact and that there is minimal disruption of the relationship.

5.3. Specific strategies to engage challenging populations

Clear Health Managed Care Coordinators use diverse strategies, program models, and programs to meet the needs of target population defined by AHCA and address the individual needs of members.

- **Members with Complex Medical and BH Needs.** We fully integrate management and delivery of acute and primary care, BH, substance use disorder, pharmacy, social services, and supports in all clinical programs. Our Managed Care Coordinators engage interdisciplinary care teams in support of member goals and work closely with members' PCP and BH providers, and community based providers to form a comprehensive plan of care. This alignment begins during the risk stratification process, including integration of physical and mental health questions during the comprehensive assessment and review of medical and BH claims and utilization history to assess risk and gaps in care.
- **Members with High Utilization.** Our Managed Care Coordinators proactively collaborate with members to disrupt the cycle of decompensation that results in re-admissions. We accomplish this goal by leveraging existing relationships between members and Managed Care Coordinators to promote stability while intensifying the level of intervention. Managed Care Coordinators work with members through post-discharge periods to re-establish connections with outpatient providers which can be lost during frequent admissions, coach members on defining root causes of admissions, and recognize red flags and frequent medication reconciliation and follow-up.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- **Members with Intensive Health Care Needs.** Clear Health leverages our close working relationships with community based organizations to assure that members with complex needs receive all needed supports in a coordinated fashion. For example, we collaborate with local Ryan White agencies and PAC waiver entities to support the social support needs of members. We also partner with psychiatric institutions, provider organizations, and ancillary providers to form interdisciplinary care teams to support unique member needs.
- **Members Consistently Accessing Care at the Highest Levels.** We proactively identify high utilization and risk factors for ER or admissions visits among adult and pediatric members and coordination with community-based supports to address barriers. Our case management program, emphasizes re-connecting members with their primary care providers after hospitalizations or acute exacerbations of chronic conditions and addresses the social determinants of health that can negatively impact outcomes. When appropriate, we encourage our members to select one of our Red Ribbon providers -- physicians recognized for their HIV expertise, sensitivity and competence in managing the complex medical and BH co-morbidities that are often present for members with HIV/AIDS and may drive care choices.

6. EVIDENCE BASED INTERVENTIONS THAT ACHIEVE OUTCOMES

Our Case Management program is designed to support our Managed Care Coordinators in reducing fragmentation in the care delivery system; promoting the use of evidence based guidelines in the plan of care process; supporting the navigation of transitions; and including an integrated interdisciplinary approach to assessment, planning, facilitation, and advocacy for enrollee's health needs. We rely on evidence-based standardized clinical practice guidelines (per U.S. Department of Health and Human Services (DHHS) Guidelines for the Use of Antiretroviral Agents in HIV-1-Infected Adults and Adolescents and the Primary Care Guidelines for the Management of Persons Infected with HIV published by the Florida AIDS Education and Training Center (AECT).

Recognizing that members have comorbidities, evidence based guidelines used to enhance the Case Management program and individual care planning process come from nationally recognized organizations, such as, but not limited to, the American Congress of Obstetricians and Gynecologists, United States Department of Health and Human Services (DHHS), National Heart, Lung, and Blood Institute, American Diabetes Association, and the American Heart Association.

Our Managed Care Coordinators carry out activities consistent with the case management process as defined by current Standards of Practice for Case Management (published by the Case Management Society of America). These activities include:

- Case identification/case selection
- Case initiation, including member consent for participation in case management
- Assessment
- Planning
- Monitoring and evaluation
- Case closure

All our Managed Care Coordinators use evidence-based engagement techniques, including motivational interviewing, that are shown to increase enrollee engagement and encourage adherence.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Additional evidence-based processes within our case management approach include:

- Communicating frequently and performing follow-up with members to promote sustained engagement.
- Focusing on care coordination and ensuring that PCPs and other providers are informed about events and changes in members' status, including notification of admissions and changes of status, adherence to medications, sharing the discharge plan, and individualized care plans.
- Performing case rounds. Managed Care Coordinators meet monthly as a multi-disciplinary team supported by the Medical Director, Psychiatrist, Pharmacist, and BH specialists to review cases, determine case management interventions, resolve barriers to engaging members in the care planning process, and achieve care plan goals.
- Managed Care Coordinators have access to other licensed health care professionals for consultation of members' cases whenever needed. These include Clear Health Medical Directors and consultant HIV expert physicians.
- Performing post-discharge case management, including in-person visits to high risk members following the evidence-based Coleman model.

The recent merger between Simply, Amerigroup Florida, Clear Health and Better Health precipitated a helpful review of case management processes and best practices across entities to create a consistent standard operating procedure for the plan. This type of thorough review is rare for existing programs and contributed meaningfully to the value the combined Simply and Clear Health bring to our members and AHCA.

Some of the innovations spread during this review that contribute meaningfully to the care of our members include:

- Introduction of validated predictive models to support risk stratification.
- Expansion of intensive, "feet-on-the-street" Case Management programs for members with complex BH conditions and high utilization (Rising Star and CARES).
- Expansion of pharmacy monitoring programs, including the antidepressant late fill program and the controlled substance utilization monitoring program.

7. EFFICACY OF CARE COORDINATION PROGRAM IN ACHIEVING RESULTS

Clear Health saw dramatic improvements in quality scores over the past year due to recent enhancements in the care model to include additional staffing, coordinated training, and continuous quality improvement plans. Clear Health regularly meets and exceeds performance expectations on metrics most important to members and AHCA in terms of quality, cost avoidance, and member and provider satisfaction. We effectively translate our intimate knowledge of HIV/AIDS disease processes, wide-reaching disease management, and case management supports to improved outcomes.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In May 2016, Clear Health Alliance earned a DecisionHealth Case in Point Platinum Award for payer-based Disease Management and Population Health programs. Recognizing organizations working across the care continuum who developed creative and innovative ways to manage patients with chronic medical conditions, they selected our program for work to best educate and empower individuals, improve adherence and wellness, manage quality of care, and contain health care costs. Our model generated interest by other states who are interested in this innovative Medicaid program.

7.1. Performance in achieving cost savings, cost avoidance and ED diversion

Despite our complex member population, Clear Health continues to perform well (relative to other plans in the state) on potentially preventable admissions, achieving the second lowest rate among plans (and lowest of all specialty plans) in 2016. By partnering closely with members and providers through diverse programs and responsive case management approaches, we are achieving improvements in the cost of care.

- 30-day all-cause re-admissions: 28.4 percent, a statistically significant improvement from the year prior (31 percent)
- Inpatient Psychiatric Admissions / 1000 Member Months: 95 (remaining stable)
- Pharmacy per-member-per-month (PMPM) Costs: Reduced \$100 PMPM since 2014 despite higher proportion of members on appropriate medications, including Highly Active Retrovirus Treatment (HAART)

7.2. Performance on metrics reflecting engagement of our members

Connecting our members to outpatient providers is important for continuity of care, medication management, and stabilization of conditions to prevent re-admission and promote good control of HIV/AIDS and other chronic conditions. We saw gains in several important HEDIS measures indicating improved engagement.

- Members on HAART – 94 percent (64 percent improvement from one year prior)
- Percent of members that had zero medical visits in 12 months – 11 percent (49 percent improvement from one year prior)
- Percent of members that had \geq two HIV-related medical visits in 12 months – 75 percent (17 percent improvement from one year prior)

7.3. Member and Provider Satisfaction with Case Management

Clear Health conducts annual surveys of members and providers to assess satisfaction with plan performance on a variety of important topics, including the core competencies of case management, engaging members and communication across settings. In 2016, results continued to show strong results.

- Percent of providers who reported that Case Management/ Disease Management had a good impact on members disease status: 95 percent

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Member satisfaction with Coordination of Care: 95 percent

**** TESTIMONIAL:** I notified Managed Care Coordinator Dina of our difficulties finding a cardiologist in our patient's area who would take his insurance and also of our patient's difficulties with his keeping appointments due to lack of transportation, inability to read, and organizational skills. She was not only able to find a cardiologist in his area who was willing to work with Clear Health Alliance, but also arranged transportation for him and communicated effectively with him so that he kept his first and subsequent appointments with cardiology who replaced his pacemaker wires which had been unattended for years. - Jennifer Janelle, MD, Fellowship Program Director, Department of Medicine, Division of Infectious Diseases and Global Medicine, University of Florida ******

All told, Clear Health's innovative, integrated, responsive case management programs contribute meaningfully to members' health outcomes and quality of life while reducing the overall cost of care.

**** REAL STORY: Patience and Persistence Lead to Improved Outcomes**

Christine, a new member with AIDS, first met Angelina, our Managed Care Coordinator, when she was hospitalized for a severe infection. Angelina came to talk with her about remaining compliant with her medications and treatment plan, but Christine was not initially receptive.

Angelina talked with her several times, reinforcing the urgency to be compliant, and due to her patience and persistence, Christine agreed to start taking her HIV medications and enter into care with an infectious disease provider at a local community-based organization. For a time, she was compliant, but she did struggle.

When Christine relocated, Angelina helped her find a new infectious disease provider whom she is comfortable seeing; she has become medication-compliant, is scheduling her own appointments and transportation; and her latest lab tests show improvement. To show her appreciation for Angelina's help, support, and encouragement, Christine sent her a postcard saying, "Through all of my inconsistencies, you never turned me away when I came running back for help. You've impacted my life in ways you will never know, that I cannot explain. Just know I appreciate you and owe my life to you!" ******

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The extent to which the respondent's algorithm and risk stratification approach is well-defined and incorporates data elements other than diagnosis.
2. The extent to which the respondent describes data sources that are incorporated into the risk stratification process that is used for new enrollees.
3. The extent to which the respondent's approach includes the use of predictive modeling.
4. The extent to which the frequency and intensity of the care coordination services (i.e., maximum caseload and minimum contact requirements) are aligned with the respondent's risk stratification process and proportional to the clinical and psychosocial needs of the target population.
5. The extent to which the respondent's approach includes innovative strategies for addressing the unique needs of highly resistant or difficult to serve populations.
6. The adequacy of the respondent's description of evidence-based interventions in achieving improved outcomes and enhancing enrollee engagement.
7. The efficacy of the respondent's approach in achieving cost savings, cost avoidance, emergency department diversion, increased utilization of ambulatory care settings, etc.

Score: This section is worth a maximum of 35 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 21 – Coordination of Benefits (Statewide):

The respondent shall describe the strategies utilized in care coordination with other plans and insurers (e.g., Medicare) to provide necessary services for its enrollees when the third party payer is the primary insurer. The respondent shall include information on its approach in the following circumstances:

- a. Florida Medicaid does not cover the service, but it is available through the third party payer;
- b. Florida Medicaid and the third party payer cover the service, but Medicaid is only liable for the coinsurance/copayment expenses. In this scenario, the respondent shall identify any differences in its approach if the enrollee is dually eligible for Medicare and Medicaid;
- c. The third party carrier benefit limit is exhausted and the service is now a Medicaid expense. In this scenario, the respondent shall identify any differences in its approach if the enrollee is dually eligible for Medicare and Medicaid; and
- d. The service is not covered by the third party but is available through Florida Medicaid.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Efficient coordination of benefits is a central part of our integrated, person-centered approach to meeting individual needs and contributes to both provider and enrollee (member) satisfaction with the plan. We strive to reduce confusion, minimize delays, prevent gaps and coordinate care with other plans and insurers (e.g., Medicare) to provide necessary services for our members when the third party payer is the primary insurer. Our guiding principle is that member access to medically necessary services is paramount. Clear Health's cost avoidance and recovery strategies prudently manage Medicaid funds with the least impact on providers and members. Our program leverages the resources, systems, processes, and best practices from Simply's 14 years of experience in Florida, plus that of our affiliates nationally, so that Medicaid is always the payer of last resort. To achieve these goals, Clear Health has a robust process for identification of other health insurance, cost avoidance processes through coordination of benefits, post-payment recovery strategies and working with members and providers (network and out-of-network) to identify and resolve the root causes of inappropriate billing or confusion regarding benefits. In 2016, Simply's coordination of benefits processes, including processes for Clear Health members, yielded nearly \$106 million in cost avoidance, while maintaining high member and provider satisfaction with the plan. More than 90 percent of providers in our network, including Clear Health network providers, rate high satisfaction with our claims processing performance.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We leverage experienced clinical and financial personnel, technology and automated applications, and consistent, replicable processes to assure our members receive the care they need in a compassionate and financially responsible manner.

Collecting and maintaining accurate third party payer information is central to our coordination of benefits strategy. We build this data collection in member-facing and behind the scenes processes to assure comprehensive information is available:

- Upon enrollment, we collect 834 file indicators for members with other coverage
- We have a nightly batch process that leverages the Centers for Medicare and Medicaid Services (CMS) beneficiary enrollment query (BEQ) to determine if Medicaid members have Medicare primary coverage
- Key personnel maintain MARx access to validate specific Medicare enrollment information
- We update the demographic profile in the member record when we receive third party payment information through the submission of electronic medical records or through paper and electronic claims notifications
- Customer Care Representatives and Case Managers (Managed Care Coordinators) inquire about other health insurance during the new member welcome call, the initial screening, the comprehensive health assessment, and as a part of ongoing case management reviews
- Customer Care Representatives are automatically prompted to inquire about other coverage during calls if not updated in six months
- Annual survey to dual eligible members requesting information on other potential coverage
- Clear Health's coordination of benefits staff review and verify leads of third party liability received from members and providers and electronic files received from State partners.

We provide comprehensive training in the coordination of benefits to all staff and assure the information is readily available in our Core Operations System. Whether it is Claims Representatives understanding the payment hierarchy for a claim, Customer Care Representatives understanding the benefits, or Managed Care Coordinators trying to maximize the support and care they provide; all staff are focused on navigating benefits to support our members. We also assure our subcontractors are extensively trained in coordination of benefits and receive eligibility files with dual status indicators.

1.a. Approach to Coordination of Benefits with Third Party Payers for Benefits Not Covered by Florida Medicaid

All member-facing departments have a responsibility to coordinate benefits when our member needs a service that is not covered by Medicaid but is available through their other insurer:

- We train our Customer Care Representatives under the following model: Listen, Research, Coordinate. First, they understand the member's needs and evaluate those needs against our standard and expanded benefit package. If the needs cannot be satisfied by our Medicaid benefit

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

package, the Representative is responsible for exploring alternatives such as community based resources, primary insurance coverage, or other options. When found, the Representative coordinates access to services for the member.

- When Managed Care Coordinators identify member needs that go beyond our benefit structure, they engage members to develop a comprehensive, person-centered plan of care. The plan of care may include services covered by Clear Health and by third party payers, and services available through resources in communities. Throughout our case management processes, we proactively identify benefits that support the member's plan of care and goals and work collaboratively with members, third party payers, and community based resources to secure the needed services and assure coordination in delivery.
- When our Utilization Management department receives a request for authorization of a service that is not covered under our benefit package, they research the member's third party coverage options and coordinate benefits as necessary.
- When the Claims department receives a claim for a service that is not covered under the standard benefit package, they research the service requested assessing coverage guidelines, any potential authorizations on file supporting medical necessity, and third party payment coverage. For members under age 21, Clear Health follows our customized claims workflows related to EPSDT services. All claims for pediatric members undergo a retrospective medical necessity review and are covered.
- When our Grievances and Appeals department receives an appeal request, part of their response is to assist the member in obtaining the services through other avenues, which may include referring to Customer Care Representatives for assistance in coordinating the service.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.b. Approach to Coordination of Benefits When Florida Medicaid is Responsible for Co-Payments

Clear Health often provides wrap-around coverage for members with more than one health plan, paying for copayments and deductibles for services covered by both plans. When members need services covered by both Medicaid and the third party payer, Clear Health proactively coordinates with member, third party payers and providers to reduce administrative burden and streamline care:

- Customer Care Representatives and Managed Care Coordinators understand the members' needs and evaluate those needs against our standard and expanded benefit packages. If the service requested by the member is covered by the primary insurer, the Customer Care Representative/ Managed Care Coordinator educates the member regarding the secondary coverage and coordinates the services with the primary provider.
- When the Utilization Management department receives a request for authorization of a covered service also covered by a third party payer, Clear Health would not require an authorization for the service unless the research concludes that the member has exhausted the benefits. In the case that the member has exhausted the benefit, Clear Health would assume the role of primary payer and process accordingly.
- When the Claims department receives a claim for a Medicaid covered service for a member with third party liability, the Claims Analyst validates that all needed documents or electronic information were submitted with the claim to coordinate benefits. The claim processes in accordance with the provider handbook, chapter 4, which outlines appropriate copayment and patient responsibilities. If the information received with the claim indicates the member's benefit has been exhausted with the third party payer, Clear Health would assume the role of primary payer and process accordingly.

The following contains more detailed information about our claims process. For example, our Core Operations System applies a series of edits to identify and prevent potential overpayments based on the member's other insurance information or indication of prior adjudication by the primary carrier. Through these edits and associated processes, we make sure that known third party payers are billed prior to paying a claim. For members with third party Medicare, Clear Health accepts the Coordination of Benefits Agreement (COBA) file that includes Medicare adjudicated claim data and automatically processes crossover claims for all our dual eligible members who are not participating in our Medicare Advantage plan, covering the Medicare deductible or coinsurance amount up to the Medicaid maximum fee, less any amounts paid.

For all other third party payers, our Core Operations System checks the claim for the presence of an Explanation of Benefits (EOB) (indicating prior adjudication) and any third party resources documented on the member's record. If an EOB is attached indicating primary carrier adjudication, we coordinate benefits automatically or the claim pends for review. An analyst reviews pended claims and attached EOBs to make sure that any copayment, coinsurance, or deductible amount does not exceed allowable amounts and approves the claim for payment.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

If no EOB is attached, our system checks for third party resources in the member's record. If present and the claim dates of service are within the effective and termination dates of the other coverage, the claim pends for analyst review. If the claim is covered by pay-and-chase rules (such as EPSDT, Title IV-D, and pregnancy related services) or State exceptions, it is paid and subject to retrospective recovery. If exceptions do not apply, the claim is returned to the submitting provider with information on the other carrier, including address, policy number, effective date, and policy holder. We include instructions to bill the appropriate third party for payment and then to resubmit a claim if there is a balance owed.

1.c. Approach to Coordination of Benefits When Third Party Benefit Limit is Exhausted

Members with another plan may exhaust benefit limits for a particular service within the defined time period. When the member needs a service and it is covered by both Medicaid and the third party payer but the third party payer benefits have been exhausted:

- Customer Care Representatives and Managed Care Coordinators understand the members' needs and evaluate those needs against our standard and expanded benefit package. When there is coverage by the primary insurer, the Customer Care Representative and Managed Care Coordinator educates the member regarding the secondary coverage and coordinates the services with the primary provider. This coordination includes proactive engagement with the primary plan to align the person-centered plan of care. If the research indicates the member exhausted the benefit with the third party payer, Clear Health would assume the role of primary payer.
- When our Utilization Management department receives a request for authorization of a service that is covered but the member has primary coverage with a third party insurer who also covers the service, Clear Health researches to determine if the member has exhausted the benefits. In the case that the member has exhausted the primary care benefit, Clear Health assumes the role of primary payer.
- When our Claims department receives a claim for a covered service that is covered under Medicaid, but the member has exhausted the primary payer benefit, Clear Health processes the claim in accordance with primary payer coverage guidelines.

For members who are hospitalized or in another facility setting, we initiate clinical support, tracking, and authorizations for that member at the time of admission before we have financial liability. Regardless of primary payer, our Concurrent Review Nurses review the case with facility staff and our Medical Directors review the cases and support member's treatment plan, as is our standard process for all members. In this way, we assure that the care is integrated in a manner that is person-centered, independent of payer, and that we can be most effective in transitioning the member between service settings when appropriate. For members with Medicare as primary payer, Clear Health staff monitor claim benefit days, supporting proactive engagement between payers to assure seamless transitions when benefits are exhausted.

Claims submitted for members with third party liability are reviewed for an EOB, which indicates prior adjudication by the primary coverage, unless our claims adjudication system is configured to pay primary for billed services. We check to see if the member has exhausted those particular benefits for the time period. If the EOB is attached, the claim pends for review by an analyst to make sure that the benefits comply with Medicaid rules and regulations. We record the EOB

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

indicating exhausted benefits in the history, and manually configure the claims adjudication system to process subsequent claims appropriately.

1.d. Approach to Coordination of Benefits When the Service is Not Covered by Third Party but is Available Through Florida Medicaid

Clear Health staff work to streamline processes for members and providers when the member needs a service that is not covered by the third party but is available through Florida Medicaid:

- Customer Care Representatives and Managed Care Coordinators understand member needs and evaluate those needs against our standard and expanded benefit package. If it is identified that the service requested by the member is not covered by the primary insurer, the Customer Care Representative or Managed Care Coordinator educates the member regarding the coverage and facilitates the appropriate service per our standard processes as Clear Health assumes the role of primary payer.
- When our Utilization Management department receives a request for authorization of a service that is not covered by the primary insurer, but is covered by Clear Health Medicaid, they follow our standard authorization procedures and approve the services. Clear Health assumes the role of primary payer.
- When our Claims department receives a claim for a service that is not covered under the member's primary insurance but is covered by Medicaid, Clear Health processes the claim at the contracted rate (or Medicaid fee schedule for non-pars) in accordance with primary payer coverage guidelines.

We serve as the primary payer for all covered services listed on the Florida Medicaid benefits list not covered by other payers.

Clear Health coordinates closely with third party payers for complementary benefits when member initiates a treatment plan. For example, dual eligible members with HIV/AIDS and serious mental illnesses or substance use disorders access Medicare benefits for outpatient behavioral health care, but rely on Clear Health Specialty MMA benefits for rehabilitation or more intensive therapy. Utilization Management staff and Managed Care Coordinators are involved with the member, provider, and third party case management staff to assure appropriate authorizations are in place to facilitate seamless care delivery and claims payment.

Claims submitted for members with third party liability are reviewed for the inclusion of an EOB indicating prior adjudication by the primary coverage, including a denial of the third party claim as a non-covered benefit. If the EOB is attached, the claim pends for review by an analyst to make sure that the benefits comply with Medicaid rules and regulations. We record the EOB indicating non-covered benefits in the history, and manually configure the claims adjudication system to process subsequent claims appropriately.

If the claim does not reflect primary payer adjudication and no EOB is attached, we attempt to confirm if the benefit is covered by the third party payer or if the claim covered by pay-and-chase rules or State exceptions to simplify administrative processes for providers. For example, for Medicare, consolidated information is available on covered and non-covered codes. This information is programmed into our claims review system to streamline claims processing for dual

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

eligible members. Likewise, we are aware of select exclusions from other payers, and we have proactively programmed those exclusions into our system to streamline claims payment. Claims subject to pay-and-chase rules, including EPSDT, Title IV-D, and pregnancy related services, are paid up front. Other claims are denied pending review by the primary payer and paid when returned with the EOB.

2.a. Strategies to Limit Member Confusion on Benefits

Proactive communication and education of our members regarding their benefits and their rights is a key part of our servicing strategy. We maintain communication materials in multiple modes and languages. Those modes include TTY, braille, and voice recorded materials.

Plan benefit communications occur throughout the enrollment period. Our customer-facing employees are thoroughly trained on benefits, including Customer Care Representatives, Managed Care Coordinators, Community Outreach Representatives, Grievances and Appeals Specialists, and subcontractor personnel are available to clarify any benefit questions our members may have. We provide our members an overview of their benefits and how to access them during the new member welcome calls. The unique demographics of our employee population affords us a high percentage of bilingual employees, which facilitates new member welcome calls in the member's preferred language, increasing their understanding of the benefits. We also quickly initiate telephone interpreter services in any other language by means of our language translation line which operates 24/7 and we arrange sign language interpreters for in-person meetings as needed. The new member welcome packet, available in the member's language of choice, is accessible at the time of enrollment and includes a complete list of covered benefits. The list of benefits is also available to members through our bilingual member website and mobile application.

Furthermore, Customer Care Representatives and Managed Care Coordinators proactively engage members and providers at key intervals to explain benefits and coordinate care as needed to assure appropriate access to needed services. For example, when connecting with members for our proactive post-discharge call, Customer Care Representatives confirm members are aware of benefits and discuss gaps in the plan of care that may be filled by a community-based resource or third party payer. Our Customer Care Representatives receive extensive training and are knowledgeable about both Medicare and Medicaid programs and benefit packages, as well as resources in communities to support members.

2.b. Processes to Identify Non-Covered Services by the Primary Insurer

Clear Health works collaboratively with AHCA to determine benefits on the Florida Medicaid fee schedule that are not covered by third party payers, leveraging the strength of our information technology to streamline processes when that information is available. For example, codes excluded from Medicare benefits are well documented. Clear Health edits the claims payment algorithms to reflect these exclusions, streamlining payment for related claims. We update our edits each time the CMS modifies the published benefits documents. We document all available information currently and incorporate additional information as it becomes available.

When providers submit claims for services not covered by third party payers, our Claims Analysts record the third party EOB denial in our historical record for that member to streamline future claims for the same service.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2.c. Processes Used to Streamline Ongoing Authorization and Payment

To reduce administrative burden on providers, streamline claims payment processes, and prevent subsequent delays in care, our systems are configured to ease crossover claims from Medicare to Medicaid knowing limitations of benefit coverage. Our employees are familiar with Medicare and Medicaid and are tracking services by payer, which streamlines applying authorizations where applicable and generally assists in member care.

Clear Health's Core Operating System stores EOB submissions in history for members with commercial third party liability. When subsequent claims are submitted for the same service, manual claims adjudication reviews recognize the history, and process the claims efficiently. In cases when the service is not covered by the primary insurer, these histories may be coded into the claims adjudication system facilitating automatic processing. While annual re-sets of benefit maximums preclude automation in many cases, we remain committed to timely review of these claims and accurate payment to providers.

3. SPECIAL PROVISIONS IN COORDINATION OF BENEFITS WHEN MEDICARE IS THE PRIMARY INSURER

Clear Health works closely with members, providers, and facilities to ensure a seamless care experience for members who are dual eligible for Medicaid and Medicare and enrolled in our plan. Currently, 35 percent of our Clear Health members have Medicare coverage as primary. Our processes include:

- Collecting 834 file indicators upon receipt and leveraging the CMS beneficiary enrollment query (BEQ) to determine if Medicaid members have Medicare primary coverage
- Automatically updating systems nightly to reflect dual eligibility in the member's profile
- Transmitting dual member status within our eligibility transmissions to downstream subcontractors

Our Customer Care Representatives, Provider Relations staff, Managed Care Coordinators, and subcontractor staff receive training on how to coordinate with Medicare benefits. We prioritize actions to minimize the administrative burden on providers caring for members with Medicare and Medicaid coverage, including automating edits on non-covered benefits to reduce claims payment delays, consistent confirmation of Medicare providers including part D carriers, and proactive coordination by our Managed Care Coordinators to assure alignment of benefits and comprehensive care planning for members.

For members with our Medicare Advantage Special Needs Plan (SNP), a provider can submit a single claim that will be automatically processed through Medicare, SNP crossover, and Medicaid, regardless of whether the provider submits the claim under the member's Medicare or Medicaid identification numbers. Our claims processing system identifies the member as dual eligible and processes the claim first through Medicare.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In line with the AHCA white paper on providing care to Medicare and Medicaid beneficiaries, examples of the specific support we provide to members includes:

- Assist members who do not have a PCP to select a PCP who accepts their Medicare coverage
- Coordinate out-of-network agreements with a PCP or other providers who have an established relationship with our dual eligible members to cover wrap-around services
- Proactively authorize services covered initially by Medicare if primary benefits may be exhausted
- Ensure Medicare providers are enrolled in Florida Medicaid to pay copayments and deductibles for dual eligible members
- Educate network providers about benefits for dual eligible members, including distributing AHCA's white paper on "Coordinating Dual Eligibles Medicare and Medicaid Managed Medical Assistance Benefits."

Our Customer Care Representatives are available to support dual eligible members who may receive bills from providers for all or part of the cost of covered services. In addition, we engage our Provider Relations team to promote coordination of benefits for dual eligible members during visits to providers. Provider education reinforces Medicaid as the payer of last resort (per 42 CFR 433.139), as well as Clear Health's and AHCA's requirements and policies. Provider Network Managers can assist with research on members' coverage to avoid potential coordination of benefits issues that can delay proper reimbursement for services.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The adequacy of the respondent's approach when:
 - (a) Florida Medicaid does not cover the service, but it is available through the third party payer.
 - (b) Florida Medicaid and the third party payer cover the service, but Medicaid is only liable for the coinsurance/copayment expenses.
 - (c) The third party carrier benefit limit is exhausted and the service is now a Medicaid expense.
 - (d) The service is not covered by the third party but is available through Florida Medicaid.
2. The extent to which the respondent's approach includes:
 - (a) Documentation of effective communication strategies to reduce confusion for the enrollee (e.g., strategies used in enrollee materials).
 - (b) Processes used to identify non-covered services by the primary insurer for individual enrollees.
 - (c) Processes used to streamline ongoing authorization and payment of services once the initial determination has been made that a service is not covered by the primary insurer or the benefit from the third party insurer has been exhausted.
3. The extent to which respondent's description specifically addresses special processes in place to improve care coordination, including provider communications, and service provision for dual eligibles when Medicare is the primary insurer.

Score: This section is worth a maximum of 40 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 22 – Early and Periodic Screening, Diagnosis and Treatment (EPSDT) (Statewide):

The respondent shall describe its approach to education and monitoring of Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) requirements, including:

- a. A description of outreach and communication strategies that will be used to enhance enrollee education on EPSDT requirements and to improve compliance with the periodicity schedule and treatment recommendations that are identified as a result of a screening.
- b. A training plan that includes descriptions of strategies that will be used to facilitate a firm understanding of federal and State EPSDT requirements throughout all operations of the plan (case management, utilization management, provider relations, etc.) as well as subcontractors.
- c. A description of the monitoring approach that will be used to ensure compliance with EPSDT requirements throughout all relevant departments within the plan and with subcontractors.
- d. A plan for ensuring greater transparency among external stakeholders (e.g., advocacy groups) in the respondent's approach towards coverage of the EPSDT benefit.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health shares AHCA's commitment to promoting preventive screenings and health care as well as medically necessary diagnostic and treatment services for children. The EPSDT benefit is a hallmark of Medicaid coverage for children and adolescents. Without the recommended EPSDT screenings, potentially serious health conditions are more likely to go undiagnosed and untreated, resulting in poorer health status throughout childhood and into adulthood.

Our approach to ensure children receive recommended and needed services is specialized. We have approximately 300 children in Clear Health, which allows us to use a very high-touch outreach strategy. Every child enrolled in our plan has a Case Manager (Managed Care Coordinator) and may receive home-based doctor visits. For our members (children) that are HIV/AIDS positive, we understand the challenges they face and are here to support them. Some of our members who are positive for HIV/AIDS are newly diagnosed and in their teens. Many others were born with HIV. Our Peer Educators help these members – reinforcing that with the appropriate medications, they can live long, healthy lives.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We combine our high-touch outreach tactics with traditional outreach efforts to increase participation in Florida Medicaid's Child Health Check-Up Program (CHCUP). The overall improvement in our screening and participation ratios and the 80 percent screening benchmark since 2012 is an example of the success of our outreach efforts in improving outcomes for our members under the age of 21.

We provide a variety of education and outreach materials through different mediums, such as printed materials, informational calls promoting events and programs, support and funding for community events, and partnerships with clinics, providers, Federally Qualified Health Centers (FQHCs), and school-based health clinics. We use our EPSDT Data Mart to monitor utilization to verify members are receiving timely and age-appropriate services and to follow up when needed. We encourage our members to get timely care by making it easier for them to access care and by providing incentives. Outreach to families occurs at least monthly; for children with medically complex needs, our Managed Care Coordinators are in contact with families multiple times within a month.

Recognizing the requirements unique to CHCUP, we have a non-denial of service policy for services that are medically necessary. For example, we allow therapies in the home when necessary and have provided durable medical equipment (DME) for glucose monitors and insulin pumps. We detail this policy in a Standard Operating Procedure, which is disseminated to all staff. The attached Figure 22-1 in Attachment SRC# 22-1: Special Service Request Workflow demonstrates our process for approving services. It states that only services determined to lack medical necessity or to be investigational or experimental can be denied authorization for pediatric members. To assure staff understand CHCUP, we employ a training plan that incorporates training events and resources, daily on-the-job support from EPSDT experts, and data monitoring for continuous improvement.

We routinely monitor compliance and apply interventions as needed to assure compliance goals are met. Our multi-disciplinary CHCUP work team meets bi-weekly, and sometimes more frequently, to evaluate all CHCUP measures and conduct causal/barrier analysis related to those that did not reach identified goals. Our interventions are collaborative efforts across several departments including Provider Relations, Member Services, Quality Management, and Disease and Case Management.

1. ENROLLEE OUTREACH AND COMMUNICATION

Our diverse outreach strategy makes it easy for members to find information about the recommended schedule of EPSDT visits and immunizations. We inform members of all testing/screenings due in accordance with the periodicity schedule as specified in the Medicaid Child Health Check-Up Services Coverage and Limitations Handbook. We include this information in the member handbook, newsletters, and educational materials posted on the member website.

Specifically, our CHCUP-related member outreach and education includes:

Printed and Online Resources:

Our printed and online resources are extensive, easily understood (materials are written at a fourth-grade level or below) and provided in languages our members speak. They encompass the Member Welcome packet, reminder letters and postcards, newsletters, fact sheets, and our

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

member website. These sources include reminders about timely preventive services, caregiver educational materials, and encouragement to schedule appointments, in accordance with CHCUP guidelines.

New member education includes informing parents and guardians of the importance of child health check-ups and encouragement to obtain an appointment with the child's Primary Care Provider (PCP). Members receive a new member brochure with their membership ID card that describes a simple process for updating their PCP and making an appointment. New members are also given a welcome call by our Member Services line within 30 days of enrollment. In the welcome call, members are assisted with selecting or changing a PCP if they do not have one or would like to select another, scheduling an appointment, and planning for transportation, if needed. Each month we identify members who enrolled 60 days prior and who have not had a CHCUP visit. These members are then called by Member Services to help with PCP selection as applicable and to help to arrange for appointment scheduling. We maintain a process for outreach and follow-up to EPSDT eligible members with special health care needs such as HIV/AIDS through our Member Outreach Team in Clear Health Alliance.

We reach out to members throughout the year to close gaps in care and assist members with any barriers to care. Additionally we have a targeted Q4 initiative that outreached to members who were compliant in the previous year, but who are not compliant for the current year. Forty-five days before our members' birthdays, we mail an age-specific Preventive Health Reminder. The reminder emphasizes the importance of all EPSDT services and provides a complete schedule of services. If the member is overdue for EPSDT screening, the family receives an EPSDT Overdue Service Reminder postcard. In 2016, Simply and our affiliates across the country mailed more than 9.3 million EPSDT-related items to our members, including annual preventive health reminders that coincide with each child's birthday and overdue service notifications to families that have not completed a recommended visit or service.

Postpartum Outreach for New Moms:

New mothers receive a postpartum phone call from our staff and an educational packet emphasizing well-child services for newborns, as well as the importance of the post-partum visit for the mother. New moms also receive ongoing education about the importance of Well Baby care through our My Advocate tool. My Advocate is a multi-channel communication program that provides health education by phone, text message, smartphone app, or online to pregnant members. Clear Health members are referred to HIV post-exposure screening for newborns by qualified pediatricians and counseled to not breastfeed due to the risk of HIV transmission.

Member Incentives:

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Community-Based Outreach:

Understanding that families can be hard to reach by phone or mail, we bring services to rural and urban communities through locally-based employees and partnerships with community organizations. Clear Health, through the Miami-Dade Mobile Dental Pilot, brought dental services into communities. Managed Care Coordinators call all members under age 21, or their families/caregivers, who live near mobile sites and assist members with appointments. Enrollees who attend mobile clinics receive information regarding nearby brick and mortar clinics where they can receive ongoing dental care as well as contact information for the Dentaquest Clear Health Member Services line. For example, the summer sites include Northside Mall, where Empower U, an HIV-AIDS community health clinic, is located. Enrollees attending the mobile clinic are encouraged to use Empower U for future dental care. Going forward, we will continue using mobile units and other strategies focused on CHCUP services other than dental since dental services will not be in the new contract.

We are developing and leveraging local partnerships and contracts throughout the state to supplement adequacy of our “feet on the street” approach and abilities to find and meet members where they reside to engage them in care. We are developing partnerships and securing contracts with FHQCs, mental health centers, Ryan White providers, former Project AIDS Care (PAC) waiver entities, and housing providers that have traditionally worked with homeless or other individuals who are challenging to engage.

Telephonic and Text Outreach:

Our Florida-based Outreach team contacts and assists members who are due for EPSDT services. In 2016, Clear Health and our affiliates across the country made more than one million phone calls to members and their families with EPSDT and immunization reminders. As part of our Healthy Behaviors program, we send text message reminders to our members about their appointments, congratulate them on achieving program milestones, and more.

Case Management System:

When interacting with members and families, any member of our Member Services and Case Management teams can check the Case Management System record for EPSDT gaps and encourage the family to make an appointment. In addition, Managed Care Coordinators regularly assess compliance with CHCUP at the time of their monthly outreach. If the member is nearing the timeframe for an immunization, well-child visit, or is not in compliance with the periodicity schedule; the Managed Care Coordinator discusses this with the parent/guardian and assists in scheduling the appointment, arranging related transportation, and removing any other barriers to care. In some instances, it is not clinically appropriate for a child to receive a scheduled service. When this occurs, the Managed Care Coordinator documents the rationale in the Case Management System and the monthly State report as appropriate for pediatric complex members. Managed Care Coordinators reach out to families with medically complex children at least monthly, although it is typical that Managed Care Coordinators contact these families multiple times within a month.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2. STRATEGIES FOR MEMBER COMPLIANCE WITH PERIODICITY SCHEDULE

Our members and their responsible parties experience unique barriers to care due to their health condition, including fear of HIV-related stigma, distrust of the health care system, homelessness/transience, lack of consistent communication means (phone or address), difficulty accessing transportation, and limited knowledge about available services. We have a specific set of interventions to address our members' complex barriers to care and to increase the number of CHCUP exams in compliance with the periodicity schedule. They include the following:

Provider Outreach:

We identify providers with the highest number of non-compliant members and then review a sample of records. We coordinate a visit, with the assistance of the Provider Network Managers to the identified providers. During the visit, we share the results of the sample review, provide additional education, and discuss strategies to increase member compliance.

Member Outreach Team:

Our Member Outreach Team or an assigned Managed Care Coordinator calls members when they are enrolled. At the time of the call, we discuss child health check-ups and dental screening, confirm the assigned PCP, and provide dental provider contact information. Members are offered assistance scheduling a child health check-up visits and dental visits as well as assistance with the coordination of transportation services and home medical visits, as needed.

Compliance Tracking:

Managed Care Coordinators keep track of compliance and engagement efforts including appointment scheduling, accuracy of member contact information, member HIV status, and claims received on the CHCUP SharePoint file. Our Quality Management Liaison meets with the Care Coordination team at least every two weeks to review progress using the information documented by Managed Care Coordinators in the CHCUP SharePoint file as well as weekly non-compliance reports.

At least semi- annually, the team reviews the CHCUP SharePoint file and updates content to facilitate the tracking process and the identification of special circumstances that could potentially impact compliance. Managed Care Coordinators prioritize contact with members who were compliant the previous year and members that are set to disenroll.

"CHCUP Act Now":

Managed Care Coordinators have dedicated time on a weekly basis to follow up exclusively with members who are non-compliant with CHCUP.

Care Coordination Home Visits:

Managed Care Coordinators conduct home visits to members who are not in compliance with CHCUP visits according to the periodicity schedule and who have been unreachable by phone or mail. During the Care Coordination Home Visits, Managed Care Coordinators:

- Complete a comprehensive health assessment and an HIV Assessment

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Provide education on available services and Healthy Behaviors program
- Schedule appointments for CHCUP visits
- Coordinate transportation for medical visits as needed
- Complete referral for medical home visits as needed

Medical Home Visits: for members who indicate they would like to complete a CHCUP visit, but who cannot attend a clinic; we provide a medical home visit through a medical home visit vendor.

Healthy Behaviors Program:

We also offer the Healthy Behaviors program to educate and support members in choosing healthy behaviors. Our program follows established clinical practice guidelines as well as the national periodicity schedule for well-child visits and immunizations. We will send text message reminders to our members about appointments, congratulate them on achieving program milestones, and more. The Healthy Behaviors program works to encourage members to complete well-child visits and specific immunizations, including:

- A Complete Well Child Health Check-Up with the PCP per the Periodicity Schedule, based on child's age
- Preventive Dental Visit with a dentist per recommendations of the American Academy of Pediatric Dentistry
- All appropriate immunizations per Bright Futures recommendations, based on child's age
- Lead screening according to Bright Futures recommendations, based on child's age

Members earn points that they can use to redeem a range of health-related gifts from the AHCA-approved list, such as cooking essentials, scales, baby wipes, diaper rash cream, crayons, and play dough. The Well-Child Healthy Behaviors program is divided into two programs – one for babies ages 0-23 months and one for children ages 24 months to 20 years. Each program includes several milestones that are based on the Well-Child Visits in the First 15 Months of Life (W15) and Well-Child Visits in the Third, Fourth, Fifth, and Sixth Years of Life (W34) HEDIS® measures. For example, babies ages 0-23 months are expected to attend at least six well-child visits and receive all required immunizations and a lead screening. Each milestone currently earns the member a set number of points for a total of \$50 per program, which can be used any time for up to one year after completing the program.

All new members receive an introductory packet that includes a Healthy Behaviors brochure along with the new member ID card. Each month, we send invitations to participate in the Healthy Behaviors Well Child Visits Program to parents of all members who are enrolled 60 days prior and are not yet compliant on CHCUP. The Member Services team calls families that do not have a mailing address.

We are making improvements to the Healthy Behaviors program, including revising the milestones and simplifying the program structure. We are also transitioning to a reward card system that will allow members to select a reward card of their choice out of a list of gift cards beginning in November.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

School-based Health Clinics:

We understand that schools offer an ideal setting to engage hard-to-reach members that are sometimes disconnected to care. In response, we developed a school-based strategy that engages school-based providers across Florida, including the Miami-Dade area, Orlando, and Tampa, who offer dental and/or medical services to assure that all members are receiving the preventive care they need. For example, Jessie Trice Community Health Center an FQHC in Miami-Dade County, which operates two comprehensive school-based health centers in Liberty City and Miami Gardens, is a strong partner. In partnership with the FQHC, we have offered Clinic Days at its school-based clinics. Through this effort, we target members and their families connected with these schools who had previously been disconnected from care.

Community Resources:

3. STAFF TRAINING AND EDUCATION PLAN

Clear Health is committed to administering a compliant CHCUP and understands that staff and subcontractor education and training on CHCUP is essential to fulfilling this commitment. The EPSDT program is a locally focused program supported through national resources and experience and compliant with State and federal requirements. We assure compliance through the Clinical Quality Management Program (QMP). We built our staff training and education plan for EPSDT three core strategies: formal training events and resources, daily on-the-job support from EPSDT experts, and data monitoring for continuous improvement.

We educate all staff on the CHCUP as part of our new employee training. We also target employees in member and provider services for additional training given the high volume of direct interaction they have with members and providers. Quarterly refresher trainings are also provided. Training topics include a description of CHCUP and program goals, covered services, the periodicity schedule, well-child billing codes, compliance reports (including the CMS-416), internal EPSDT-related policies and procedures, challenges, current interventions, and potential strategies for increasing member compliance. We use the following mediums to inform and educate staff on CHCUP: in-person trainings, webinar presentations, email communications, written policies and procedures, and program guidance.

While monitoring and processing CHCUP services on behalf of members, our staff receive ongoing support from our Medical Directors who support full compliance. For example, Medical Directors routinely review denial letters, such as those related to services covered on a fee-for-service basis by the State, and confirm that such communications are accurate. If any potential issues are identified, we implement an internal improvement strategy that includes escalation to our Compliance team when applicable.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our training and education efforts are further enhanced by the national organization's EPSDT Program. It is governed by a Medicaid Quality Improvement Committee that comprises expert staff including Medical Directors and leaders from Quality Management, Case Management, Disease Management, Pharmacy, and other divisions. We use the national resources available to better educate and inform our staff. For example, we receive alerts when there are changes to federal and State EPSDT requirements and then initiate applicable interventions and mailings as appropriate. While we leverage our national resources to benefit our Florida plan, Clear Health remains accountable for the success of these efforts locally.

Operating under a philosophy of continuous quality improvement, the Quality Management (QM) team monitors the effectiveness and regulatory compliance of the program and acts on opportunities for improvement. Clear Health's QM program is an ongoing, comprehensive, and integrated system that defines how departments support quality objectively; systematically monitors and evaluates the quality, safety, and appropriateness of medical and behavioral care and service offered by the health network; and identifies and acts on opportunities for improvement. Conducting an effective EPSDT program is one of the QM program objectives. Leveraging our direct and extensive Florida experience, we make sure our work aligns with the State's CHCUP goals.

We will also train all subcontractors on EPSDT. In addition to new subcontractors, our Vendor Delegation Oversight Group will conduct Vendor In-Service training for subcontractors already operational when there are significant changes in programs, policy, or when there are changes in management staff and then annually thereafter.

In addition, we will use a Vendor Handbook that outlines the EPSDT requirements, expectations, and monitoring that is provided to new subcontractors. It will be updated annually, as needed, and used to conduct refresher trainings. Information materials will be disseminated throughout the year. For example, we will provide all subcontractors with the AHCA EPSDT Fact Sheet and the Medicaid Covered Services Not Provided by Managed Medical Assistance Plans guidance after they are issued by the state.

4. ADEQUACY OF RESPONDENTS MONITORING APPROACH

Clear Health monitors, evaluates, and improves the quality and appropriateness of care and service delivery to members through peer review, performance improvement projects, medical and case record audits, performance measures, surveys, and related activities. We use a number of data sources to monitor compliance, including: HEDIS® and CAHPS® data, EPSDT DataMart, Florida State Health Online Tracking System (SHOTS), medical records, and Key Performance Indicator (KPI) reports (for subcontractors).

Clear Health facilitates a formal evaluation of the effectiveness of our QM program, which has oversight of the EPSDT program, at least annually. The evaluation includes the adequacy of resources, training, scope, and content of the QM programs. Clear Health uses HEDIS® and CAHPS® data as the basis of the Quality Management Program Evaluation. In 2016, the Simply legacy plan exceeded its goal of 90 percent for appointment availability for Regular and Routine Care Appointment for Well Care visits. One hundred percent (100 percent) of providers surveyed had available well care appointments within a month. Monitoring the availability of well care appointments helps us make sure our members have access to appointments when they are needed.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our EPSDT Datamart tracks compliance with EPSDT service requirements including initial visits for newborns; EPSDT screenings and reporting of all screening results; and diagnosis, treatment, or referral. We pull data from across the plan, including claims data and SHOTS data, to monitor for compliance. We review medical records to determine if providers are properly documenting well-child visits. When our nurses are on site at a provider's office, they conduct an educational session on any deficiencies at that time upon the provider's request. A team of representatives from Data, Quality, Performance, Case Management, and Member and Provider Services meets monthly to discuss CHCUP, identify/resolve compliance issues, develop next steps, and determine if new program reports are required. Issues and follow-up efforts can include outreach/education to Clear Health staff, CHCUP providers, subcontractors, and members.

We require all subcontractors to report the approvals, and denial of services for under and over 21 on their monthly KPI report. Using this data, we audit their files to verify compliance with EPSDT standards. For example, when we audit the Notice of Adverse Benefit Determination (NABD), we confirm under age 21 CHCUP standards are applied and no denials are for the reason "non-covered". If during our audit we find that services are denied as "non-covered", we require the subcontractor to review the request, correctly apply CHCUP requirements, and make a new determination.

Further, we ensure the subcontractor is educated on CHCUP requirements and require the subcontract to identify the root cause of the error and provide a corrective action so there are no repeat issues. The subcontractor must also identify whether the issues was isolated or not. If the issue is not isolated, a corrective action plan is established and we increase monitoring of the subcontract until 90 days of compliance is demonstrated.

5. OPPORTUNITIES TO IMPROVE TRANSPARENCY FOR EXTERNAL STAKEHOLDERS

It is important that our members, providers, and other stakeholders understand our approach toward coverage of the EPSDT benefit. We promote transparency by making CHCUP information available in our member handbook, through provider dashboards, and our website. Additionally, we participate in a variety of partnerships at the state and local levels to give us different venues to share information about CHCUP. For example, we have partnered with the Children's Trust in Miami-Dade County, including Miami Children's Hospital, to promote health and wellness in schools and to emphasize the importance of well visits. We have also collaborated with The Children's Board to provide information about health and wellness through their Family Resource Centers in Hillsborough County.

Clear Health has a good record of collaborating with stakeholders. One way we evaluate the effectiveness of our transparency with stakeholders is through our constant monitoring of the rate of complaints/grievances, service utilization, and service denials. Nearly 85 percent of our legacy Simply plan members reported they can always or usually get needed care on the 2017 Child CAHPS® survey, a rate that exceeds the national average. The same survey also found that 87 percent of our members reported high satisfaction with Coordination of Care, a score that is in the top quarter of performance nationally. However, we recognize and believe that there is always opportunity for continuous quality improvement.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

To strengthen the relationship with one of our primary stakeholders – our providers – Clear Health seeks to collaborate with the Florida chapter of the American Academy of Pediatrics (AAP) to provide AAP-approved Continuing Medical Education (CME) courses. The courses will be given by our Medical Director on CHCUP-related topics. We are developing the following potential topics:

- Immunization Updates: following biannual Advisory Committee on Immunization Practices (ACIP) meetings, best practices for dealing with barriers to immunization such as parental refusal, follow-up appointments for series, flu vaccine updates
- AAP EPSDT Screenings: review recommended screenings and periodicity schedule and any applicable updates
- Clear Health CHCUP Services: review CHCUP services and the availability of medically necessary services and related processes.

The courses will be provided online periodically. Providers can earn CME credits and MCO points for participation.

Our plan for assuring greater transparency among external stakeholders builds on our strategy of making information about EPSDT/CHCUP easily accessible through our website and other materials and partnering with State and local organizations to promote CHCUP services. We will expand our efforts through targeted outreach to providers by offering CME courses on CHCUP-related topics. Outside of the provider community, we will continue to meet with community stakeholders and advocates, including groups like the Santiago & Friends Family Center for Autism and the Consortium for Healthier Miami-Dade, to build understanding of our approach to coverage of the EPSDT benefit and to connect families with resources that support healthy child development.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

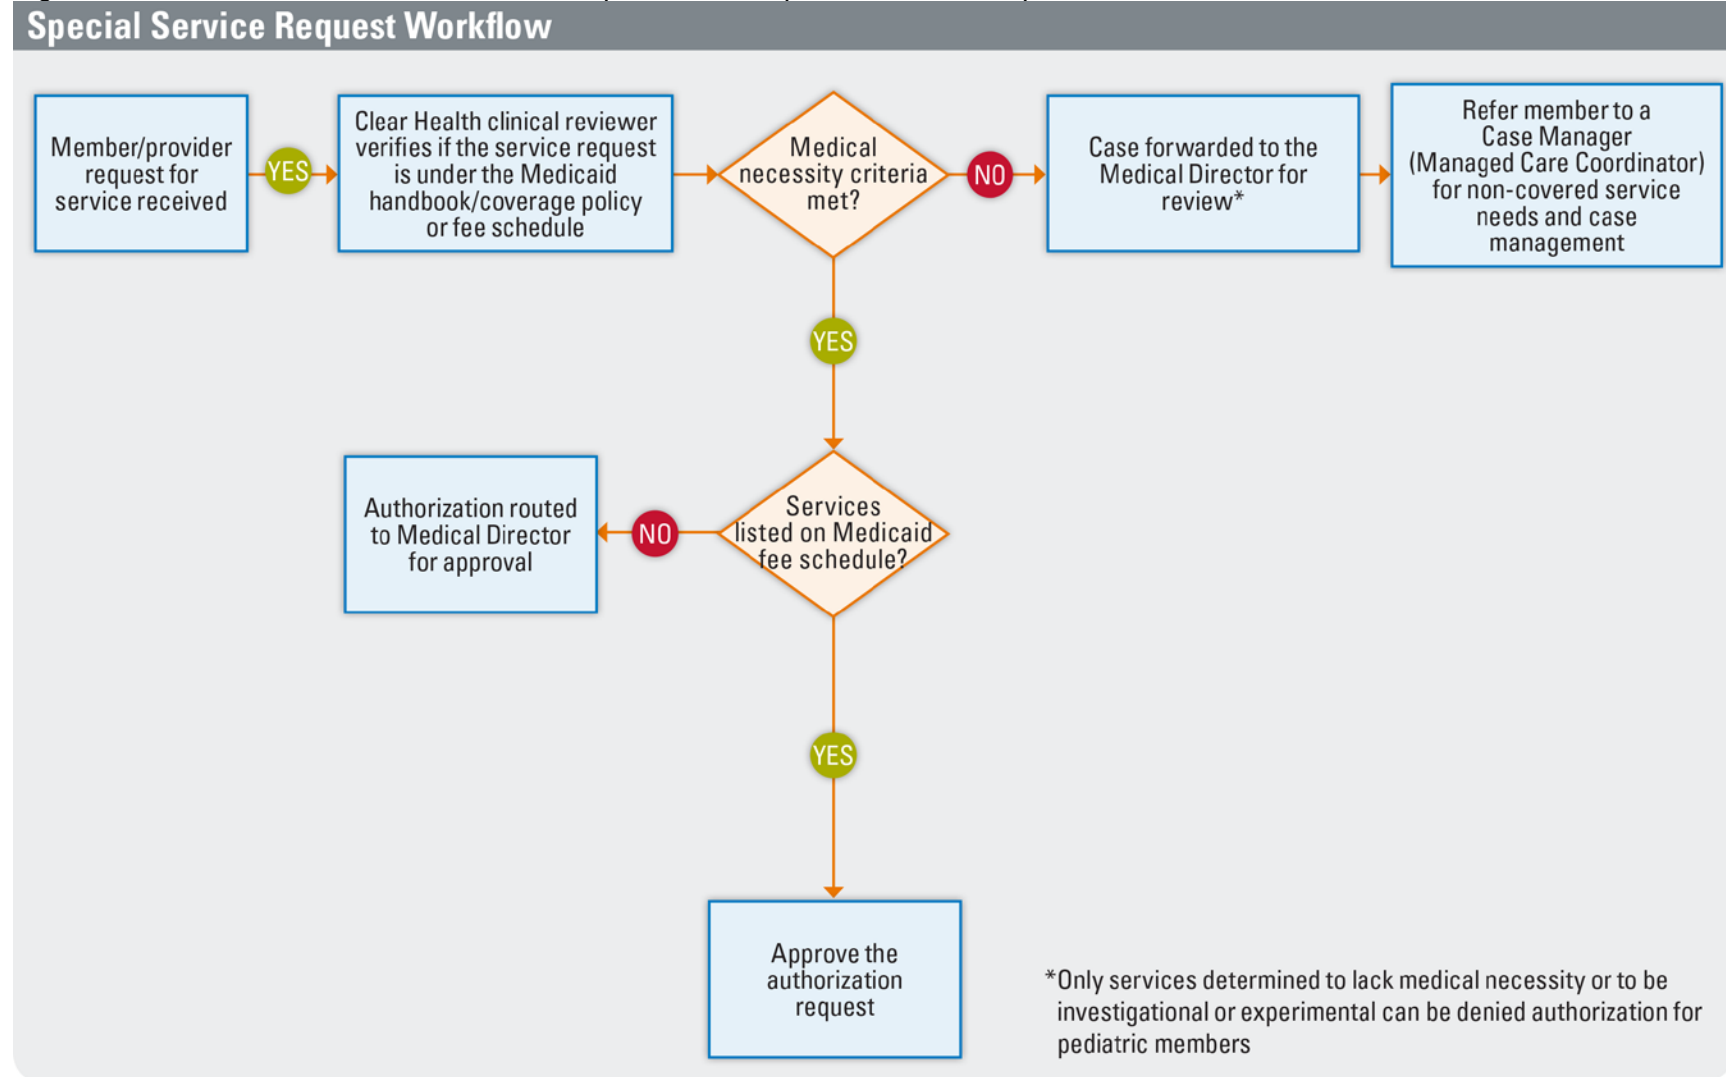

Evaluation Criteria:

1. The adequacy of the respondent's approach related to outreach and communication strategies that will be used to enhance enrollee education on EPSDT requirements.
2. The adequacy of the enrollee engagement approach and strategies that will be deployed to improve compliance with the periodicity schedule and treatment recommendations, including identification of the data sources that will be used to monitor compliance.
3. The adequacy of the respondent's training and education approach to facilitate a firm understanding of federal and State EPSDT requirements throughout all operations of the plan/subcontractors. The respondent must illustrate a commitment to ongoing training and retraining of staff/subcontractors utilizing an array of mediums to earn all points for this component.
4. The adequacy of the respondent's monitoring approach, including all data sources that will be used to ensure compliance with EPSDT requirements throughout all relevant departments within the respondent and with subcontractors.
5. The extent to which the respondent's overall outreach approach identifies opportunities to improve upon the level of transparency for external stakeholders.

Score: This section is worth a maximum of 25 raw points with each of the above components being worth a maximum of 5 points each.

This page is intentionally left blank

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 23 – Behavioral Health/Primary Care Integration (Statewide):

The respondent shall describe its proposed approach in promoting integrated behavioral health and primary care models, including:

- a. Identification of integrated models in various practice settings that have documented improved patient outcomes, patient satisfaction, and cost-effectiveness.
- b. Identification of opportunities for improvement across the respondent's system of care (e.g., care management, provider network, utilization management, enrollee services) with the goal of advancing to more integrated care models.
- c. Description of strategies the respondent will deploy to overcome the barriers/gaps identified to increase its capacity for providing integrated care models, including use of alternative payment models/financing strategies.

Response:

Simply Healthcare Plans, Inc. D/B/A Clear Health Alliance (Clear Health) uses an integrated care model that supports delivery of seamless, integrated physical health (PH) and behavioral health (BH) care, along with social supports and pharmacy management, to decrease fragmentation across our system of care. As a pioneer organization in holistic care for members with HIV/AIDS, integration is more than just a buzz word; we build our operations specifically to promote a person-centered service model as the most effective to meet enrollee (member) needs. We recognize that many members have co-occurring PH and BH conditions that cannot be addressed in silos. Through improved case management, consistent and real-time communication, innovative multi-disciplinary partnerships, and skill-building, we are transforming health care delivery in important ways to meet our member's health goals.

Today our Clear Health plan manages approximately 9,500 members. Many of our members have BH co-morbidities in addition to HIV/AIDS and other medical conditions. Thirty-one percent of Clear Health members have a diagnosed mental illness, with mood disorders, anxiety, dissociative and other nonpsychotic mental disorders, schizophrenia, and other psychotic disorders accounting for the majority of diagnoses. In addition, 37 percent of members have an addiction disorder, including smoking and alcohol. Given this high burden of mental illness and the known impacts of co-morbid physical health and mental health conditions on the cost of care and the outcomes, we prioritize effective integration of BH and primary care for our members and reward providers for achieving improved outcomes through integration.

1. CURRENT APPROACH TO PROMOTING, INCENTIVIZING, AND REMOVING BARRIERS TO INTEGRATION THROUGHOUT OUR SYSTEM OF CARE

Clear Health roots our model of primary care and BH integration in the landmark National Council of Community Behavioral Health Care published study (2006, updated in 2009) that details strategies for effective integrated care. The study includes guidelines in a Four Quadrant Model for tailoring the design of programs to the needs of members based on the complexity of their PH and BH conditions. Widely used, evidence-based integration strategies, including depression management and screening, brief intervention, referral, and treatment (SBIRT) for the diagnosis and treatment of alcohol use disorder, incorporate the Four Quadrants Model as the foundation.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Clear Health aligns our integrated care strategy closely with the Four Quadrants to build the capacity of our provider partners and reduce barriers to integration throughout our system of care.

- Quadrant I: Members with low physical and BH acuity benefit from routine BH screening by trained providers, seamless pharmacy management, and holistic care coordination within a primary care or Patient Centered Medical Home setting. Members are incented to engage in behavior change programs they may otherwise resist to promote overall health.
- Quadrant II: Members with high physical health severity and low BH complexity receive specialized case management support, partnering and sharing information with their primary care and specialty providers to coordinate care including medical, BH, pharmacy, social service, and long-term support needs.
- Quadrant III: Members with low physical health complexity and high BH complexity (including substance use disorders) are supported by a specialized Managed Care Coordinator partnering with their BH providers at Community Mental Health Centers or other settings and members' primary care provider to manage acute crises and maintain stability. Members receive incentives to engage in treatment programs and change difficult behaviors.
- Quadrant IV: Members with high physical health and BH complexity benefit from thorough integration of systems through co-location or frequent communication and sharing information on person-centered plans of care, patterns of pharmacy utilization, and support through transitions in care.

Clear Health supports our integrated system of care with our robust risk stratification process, including our predictive analytics tool, Chronic Illness Intensity Index (CI3), as well as input from providers, members, families, and AHCA through the enrollment file. We initially stratify member needs based on PH and BH criteria and continue to look at member needs holistically through our risk review processes. We design the models to meet all members where they are and to change as needs change through their lives. At all levels and in all interventions, we incorporate the latest evidence and best practices to support members and providers in care planning, delivery, and evaluation of services, and offer meaningful choices so members access the right care at the right place at the right time.

Just as our integrated models vary based on member needs and goals, we recognize that providers are in various stages of integrated care delivery and have different barriers to integration. For this reason, we also tailor our integration strategies to the diverse needs of our providers including type of practice and where they are in the transformation toward patient-centered, integrated care. For smaller, more private practice sites including those in rural areas of the state, we support them with tools to build capacity for integrated care delivery such as identification of depression in their patients and support with mechanisms to identify service providers with whom they can connect their patients. With the larger systems and federally qualified health centers, all practices with pre-existing BH integration infrastructure, we focus on payment structures and contracting models that include reimbursing for diverse services (i.e., tele-medicine), aligning incentives, and improving coordination to provide whole-person care.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.1. Building Capacity for Integrated Care by Primary Care Providers

Clear Health works closely with our primary care partners to build capacity for integrated care and expand member access to routine screening and follow-up for BH conditions. Nationwide, we know that more than half of patients seek treatment for BH conditions from their Primary Care Providers (PCPs), with non-psychiatrists writing more than three-fourths of antidepressant prescriptions.

Clear Health works collaboratively with PCPs to increase rates of BH screenings. The presence of several mental health and substance abuse diagnoses are known to be common among people living with HIV/AIDS. The relative frequency of these diagnoses in Florida appears lower than has been found in published studies, suggesting that members with mental health and substance abuse conditions may not be getting screened and diagnosed, or are not being diagnosed accurately. Therefore, individuals are not being referred for services that could improve their quality of life and enhance the effectiveness of medical treatment. Clear Health requires PCPs to routinely screen members for a range of BH and substance use conditions as a part of routine, preventive care. We provide our PCPs with the tools and expertise needed to complete the screenings, and reimburse PCPs for routine screenings. Screening requirements are included in our provider contracts and provider manual. Furthermore, our interventions focus on provider education regarding accurate coding, member education regarding the importance of discussing BH with a provider, and system improvements to enhance internal reporting.

We make many valid and reliable screening tools for BH conditions easily accessible on our provider website and train PCPs on the appropriate use of them, including tools such as:

- Depression Screening: Patient Health Questionnaire-9 (PHQ-9) for depression
- ADHD Screening: Conners rating forms, Vanderbilt scale, Barkely scale
- Psychosocial Problems Screening: The Pediatric Symptom Checklist
- Mood Disorder Questionnaire
- Anxiety Screening: Generalized Anxiety Disorder-7
- SUD Screening: CAGE-AID
- Mini-Cognitive Assessment Instrument
- Comprehensive training on SBIRT
- The “5 A’s” Model for Treating Tobacco Use and Dependence

Recognizing that PCPs, upon identification of a potential behavioral health condition, may need more than these tools, we also provide an on-call BH specialist to provide consultations when they have a question about managing a member’s BH conditions including medication step-therapy and best practices.

**** REAL STORY:** Reconnecting member with behavioral and physical health providers improves health and satisfaction

Aaron’s infectious disease provider, serving as his PCP, referred him to case management to help reengage him in treatment for schizophrenia, heart problems, and infected teeth. Dina, our Managed Care Coordinator, was glad to know Aaron was consistently seeing his PCP and taking the HIV medications he received via mail order as we had been unable to reach him for many months.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Dina talked with Aaron during her initial assessment to determine his immediate needs and learned he had not followed up with a cardiologist since his pacemaker was placed in 1997 or his psychiatrist for schizophrenia. So she got right to work arranging a cardiologist appointment. Aaron had the batteries replaced in his pacemaker which had almost stopped working and has routine checkups every six months. He is back seeing psychiatrist monthly, taking medication as prescribed, and no longer reports paranoia. She also set up a dental cleaning and assessment which revealed Aaron's many infected teeth necessitated dentures, which reestablished his ability to eat solid food. **

1.2. Targeted Network of Red Ribbon Providers Skilled at Integrated Care

Clear Health's unique model of community-centeredness and responsiveness to the distinct needs of members with HIV/AIDS includes close collaboration with select providers who are proficient in caring for our members. These providers, marked with a Red Ribbon in our provider directory, receive additional training in longitudinal management of HIV/AIDS and frequent co-morbidities and bring experience, expertise, and cultural sensitivity to our members. These providers are acutely aware of the incidence and implications of PH and BH comorbidities and have developed robust integrated processes to deliver whole-person care. Some Red Ribbon providers have co-located or integrated BH care (including many Federally Qualified Health Centers and Rural Health Centers); others established referral networks in their communities for integrated care. As a part of our support for providers and members, we engage Red Ribbon providers to identify all preferred referral networks and attempt to include those additional providers in our network. In this way, we build a circle of high-quality, trusted providers around our members.

Clear Health support for our Red Ribbon providers include efforts to build capacity and share best practices, increased compensation and ongoing communication and collaboration. When appropriate, we refer member without PCP connections to a Red Ribbon provider because of their enhanced quality and integrated care models. As noted in the real story below, the level of access our Managed Care Coordinators achieve with these providers contributes meaningfully to the integrated care delivered and to member outcomes.

** **REAL STORY:** Working together with FQHC providers leads to intensive, integrated care
When 37-year-old Roberto became a member in 2015, he was initially stratified as moderate risk due to his HIV status and psychosis. With strong family support and connections with his PCP and BH provider, Roberto remained stable for over a year. But his repeated disappearances for days at a time signaled noncompliance with his medications and possible methamphetamine use. Sophia, our Managed Care Coordinator, reached out to Roberto when he was hospitalized for exhibiting signs of psychosis.

She worked with Roberto's FQHC PCP and BH providers to increase BH services. Sophia coordinated multi-disciplinary team meetings with Roberto's BH providers, Beacon Health, our Medical Director, and Roberto's partner Steven (who has his power of attorney and is his health care surrogate) to discuss how best to help Roberto. She presented the concerns of Roberto's partner regarding noncompliance and together they brainstormed how to best address the issues. All agreed to address medication concerns with member and concerns and services to address potential substance abuse; however, Roberto's BH issues soon escalated to necessitate police involvement and several involuntary psychiatric admissions.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

In additional multi-disciplinary team discussions coordinated by Sophia, Steven requested all options available and was provided several, including criteria for the Marchman Act that allows for involuntary assessment and/or treatment of substance abuse. The family decided to pursue the Marchman Act for Roberto's safety and well-being. The court order was granted, and Roberto was enrolled in a court-mandated program with Steven assigned as supervisor. Sophia continued to provide support and continuation of care after the process.

Three months later, Steven wrote to thank our staff for their help and support in getting Roberto the care he needed, reporting that he was compliant with his psychiatric and HIV medications, attending outpatient therapy, slowly regaining his cognitive abilities, and was drug-free. Sophia will continue to provide support to the member and family and coordinate services among Roberto's providers to make sure he receives care in the appropriate settings. **

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

1.4. Integration of Information Across Settings

Lack of information is a well-documented barrier to integrated care and a risk to member safety and outcomes. Primary care providers and BH providers in different systems often lack access to comprehensive medical records, including medication lists, and may not be aware when members are hospitalized or experience a change in status. Clear Health proactively engages our provider network to share important information about members' care across settings. For example, we provide our network primary care providers and BH providers with a daily census of members hospitalized at network facilities, including admissions with PH and BH diagnoses, and share information about the member ED visits through the Emergency Notification System. We also share member-level information with providers through our dashboard that includes up-to-date data on medication refills for adherence, gaps in care, and potential overutilization of services.

Our Managed Care Coordinators are at the forefront of enhancing integrated care for our high-risk members by filling the traditional information void — we proactively communicate with and engage primary care, medical specialty, obstetrics, BH providers, home- and community-based service providers, as well as all types of inpatient facilities, to promote our member's care and goals. Our case management team, including medical directors, psychiatrists, managers, pharmacists, and PH and BH staff, discuss member needs and develop real-time, comprehensive strategies and solutions to share with members and their providers. We match Managed Care Coordinators with members based on primary needs (PH or BH) and may assign a supporting Managed Care Coordinator of another discipline as needed to co-manage the member's care. This co-management is seen most often for members with high risk pregnancies where specialized OB Managed Care Coordinators partner with BH Managed Care Coordinators to address SUD issues, depression, anxiety or other BH and PH conditions that may impact birth outcomes. These Managed Care Coordinators communicate with the providers about care plans, member goals, discharge plans, and pharmacy compliance — proactively identifying any gaps in care, additional treatment options, or potential complications. In this way, the Managed Care Coordinators facilitate an integrated care experience for our members.

** TESTIMONIAL: Our patient was already receiving support from our clinic nurses and staff, myself, a pharmacy director and his Ryan White case manager for years without really making a lot of forward progress. He was maintaining a suppressed HIV viral load and was adherent to his HIV and psychiatric medications; however, he wasn't attending to his other important medical needs. Your Managed Care Coordinator, Dina, worked with our patient and convinced him of the need for dental care, something no one else on our team was able to accomplish despite numerous attempts. She found a dentist, arranged an appointment and transportation and supported him through his dental extractions. He is delighted that he no longer has oral pain and has great fitting (and looking) dentures. This has really raised his self-esteem. Dina contributed hugely to his current success! - Jennifer Janelle, MD, Fellowship Program Director, Department of Medicine, Division of Infectious Diseases and Global Medicine, University of Florida **

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

All Clear Health Managed Care Coordinators receive comprehensive training on PH and BH. Our PH and BH Managed Care Coordinators are required to take the integrated case management certification program, which addresses the union between PH and BH conditions. We conduct weekly Case Management rounds in an integrated fashion — medical and psychiatric medical directors and other clinicians are available to support all Managed Care Coordinators by reviewing cases and problem solving for difficult cases. In this way, we work to improve the health and quality of life for the whole member and those that support them.

1.5. Strategies for Hard to Engage Members

Many complex members, including members with severe BH needs (quadrant III), have a difficult time engaging in traditional outpatient care due to homelessness, substance abuse, non-compliance with medications or follow-up appointments, or a history of multiple psychiatric admissions. For members with complex BH needs, the Simply CARES program, a field based case management program dedicated to serving those with behavioral and substance abuse disorders who are hard to engage, enhances the delivery of integrated care by matching members with specialized BH clinician Managed Care Coordinators for face-to-face engagement in the community, ongoing case management and care coordination with community-based and facility-based providers.

Managed Care Coordinators are trained in integrated care and work closely with members using motivational interviewing and other skills to increase medication compliance and reinforce appropriate utilization of behavioral and medical providers. Managed Care Coordinators advocate for and facilitate routine, preventive care by PCPs and BH clinicians by encouraging members to make and keep appointments and preparing for visits. We draw members back into regular care. Managed Care Coordinators in the CARES program coordinate closely with the members' BH providers and, for homeless members, Outreach Care Specialists as needed to help establish the connection, to close gaps in care and make sure the care plan is comprehensive and member-centered.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

2. EXAMPLES OF INTEGRATION IN THE NETWORK THAT SHOW IMPROVED OUTCOMES, MEMBER SATISFACTION AND COST SAVINGS

Our members consistently give our plan high ratings in satisfaction surveys on measures related to access to integrated care: satisfaction with care coordination increased to over 90 percent in 2016 and 80 percent of members reported it is easy to get needed care.

Our innovative partnerships with our network providers show positive results in terms of service to our members and cost savings. This and other strategies for network integration that have improved outcomes and member satisfaction while achieving cost savings are discussed in more detail below.

2.1. Rising Star for Members with Multiple Psychiatric Hospitalizations

2.2. Behavioral Health Medication Management Program

Clear Health's BH Medication Management Program addresses increased concerns about the safe, appropriate, and effective use of psychotropics and controlled substance medications, including opioids, across care settings. The program responds to high rates of inappropriate prescribing of controlled substance medications including in our most vulnerable populations like children and youth in foster care, individuals with intellectual and developmental disabilities, and elderly with HIV. It is a comprehensive program designed to improve effective care integration and members' quality of care through more clinically appropriate prescribing, improve member adherence to appropriate medication treatments, promote care coordination between prescribers, decrease cost of care, and improve performance on HEDIS measures. The program includes provider and member education and interventions with specific focus on building skills and sharing information across settings to inform clinical decisions in line with evidence based care.

- Controlled Substance Utilization Monitoring (CSUM) Program – surveys comprehensive claims reports to identify members receiving multiple controlled substance medications, receiving opioids from multiple providers and filled at multiple pharmacies, or combinations of controlled substances that may indicate risk. This information is relayed to the prescribing providers, including primary care and BH providers, so they can engage their patients who are at-risk for adverse events related to controlled substance and opioid misuse
- Antidepressant Late Fill Fax Program – identifies members who are more than seven days late in refilling their anti-depression medication. We notify the prescribing provider, including both BH and primary care providers, for follow-up and member engagement

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Drug-Dose Optimization program – helps develop the skills of our primary care and BH provider partners by informing prescribers regarding members using high doses of a drug, using less than optimal dosing, and members with potential drug-drug interactions where two or more medications react to each other which can cause unexpected side effects
- Promoting Polypharmacy Reduction program – works with physicians with demonstrated polypharmacy practices by sharing written educational materials, phone calls, and outreach. Targeted members are those with multiple prescribers and multiple medications in the same class (antidepressants, stimulants, antipsychotics, sedative hypnotics) and those with higher risk of side effects. A fax is sent to prescribers to sign off that the polypharmacy is appropriate, change in therapy is needed, or they can request a clinical pharmacist contact them. In addition, outreach is conducted related to children taking 5 or more psychotropic medications regardless of class
- Antipsychotic and Bipolar Related Depression or Mania Medication Adherence program – identifies members on antipsychotic or Bipolar Depression Mania medication with a history of inconsistently filling their prescriptions. When a member falls below the Medication Possession Ratio (MPR) of 80 percent we reach out to prescribers via fax so they can follow up with members in a timely manner
- Off-label Use of Antipsychotics program – performs outreach to primary care and BH prescribers to educate and eliminate inappropriate therapy and inform them of medication's proper use. We target members taking antipsychotics without an approved indication to reduce off label use of antipsychotics, make sure safe and appropriate use of antipsychotic medications, help the prescriber select alternatives to meet member needs, and decrease cost of care

These pharmacy management programs include members from across Simply programs, including Clear Health members. The larger scale allows a depth in programs not attainable by our smaller program, while maintaining the targeted approach that contributes to effectiveness. In a recent evaluation, Simply successfully reached 94 percent of providers, including Clear Health providers, via fax with education materials to promote integration and safe prescribing practices, including prescribing psychotropic medications correctly in the primary care setting. These effective communications resulted in almost 28 percent of members having one or more of the targeted medications discontinued across Simply's programs, improving quality and member outcomes. In addition, under the CSUM program, 70 percent of eligible members reduced their claims for controlled substances to less than 10 at 180 days post intervention. Our BH medication management program also shows cost savings. Across all our markets, the program generated 43 percent higher savings than expected. Furthermore, over the past three years, Clear Health has worked closely with BH prescribing physicians in Region 11 to encourage generic prescriptions for members with serious mental illness (SMI). We have seen an annual increase in the generic prescribing rate of two percent, translating to a 26 percent reduction in the cost per scripts and PMPM for anti-psychotic drugs.

2.3. Improvements in Quality Scores from Integrated Care

In HEDIS® 2017, Clear Health Alliance achieved 54.50 percent on the measure of anti-depressant medication management — Acute Phase — exceeding the prior year's 25th percentile benchmark. Clear Health Alliance also surpassed the 90th percentile for both the IET — Initiation and Engagement of AOD — Initiation Total and Cardiovascular Monitoring for People with Cardiovascular Disease measures. These results demonstrate the extent to which people with

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

BH needs are being effectively managed for BH as well as other chronic health conditions we know to be especially damaging in the population. We achieve these results through partnership with primary care and BH providers across our network supported by case management to help close care gaps.

3. OPPORTUNITIES FOR IMPROVED INTEGRATION AND STEPS TO INCREASE CAPACITY FOR INTEGRATION

Consistent with our commitment to adopt new, evidence-based care to support our members, we are introducing new supports to our provider network to enhance access to high quality, integrated care. We have heard consistently from our members and providers that access to specialized BH and SUD treatment remains a challenge in many areas of Florida, so we prioritize access to these resources through new delivery methods.

The opioid epidemic has hit the entire country hard. Clear Health launched a multi-disciplinary workgroup that meets weekly to discuss how we can contribute solutions. Our focus is to make sure members with acute pain obtain necessary treatment, reduce the likelihood of new addiction, and decrease street drugs and overdoses.

We are considering expansions to innovative Project ECHO models to address the opioid crisis. A nationally recognized team of experts with solid results, Project ECHO offers enhanced training and ongoing clinical support to our providers, including potentially providers across our network, to help physicians, nurse practitioners, BH professionals, and RNs develop skills and confidence to provide SUD care in an integrated manner in their communities. We may also provide consultations to providers through a Physician Resource Line for any questions providers may have regarding medication-assisted treatment for substance use disorder. Clear Health Alliance has an existing relationship with Project ECHO through the AIDS Education and Training Center (AETC) and the University of Miami, one of our Plan partners. The University of Miami serves more than 750 members currently, and we will scale-up its reach through innovative tele-health applications in the future.

3.1. Targeted Capacity Building with Aligned Incentives

[REDACTED]

[REDACTED]

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

3.2. Expanding Focus on Integrated Providers

Clear Health works closely with provider organizations who integrate PH and BH care for our members. We currently contract with 13 Federally Qualified Health Centers (FQHCs) in our service area that include both primary care and psychiatry for members. These centers include Borinquen Health Care Center in Miami, Lee Memorial Health System in Ft. Meyers, Manatee County Rural Health Services in Palmetto, Premier Community Healthcare in Dade City, and Orange Blossom Family Health Center in Orlando. We look forward to working with additional FQHCs in new service areas through the expansion of our comprehensive model.

Achieving the quality metrics in our value-based payment arrangements with health systems and FQHCs requires effective integration of PH and BH conditions for members. These metrics include the following:

- Follow-up after hospitalization
- Anti-depressant medication management
- Initiation and engagement of alcohol and other drug dependence treatment
- Follow-up care for children accessing ADHD treatment
- Hospital re-admissions at 30, 60, 90, and 180 days.

We will continue to build capacity, share information and partner with our physical health providers to help them achieve these targets.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

These programs advance the goals of integration by aligning incentives between Clear Health, BH providers and physical health providers and encourage the investments needed in the care delivery system to achieve meaningful integration. Metrics align with AHCA goals of reducing potentially preventable events and will contribute significantly to improved outcomes for our members.

Evaluation Criteria:

1. The extent with which the respondent thoroughly describes its current approach to and readiness for promoting/incentivizing, and removing barriers to, integrating behavioral health and primary care throughout its system of care.
2. The extent to which the respondent provides examples of more effective integrated models within its provider network that have documented improved patient outcomes, patient satisfaction, and cost-effectiveness. The respondent must also describe the data sources.
3. The extent to which the respondent identified opportunities for improvement in delivering an improved integrated care model and subsequent steps the respondent will implement across its systems to increase capacity for providing integrated care.

Score: This section is worth a maximum of 15 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 24 – Transportation (Statewide):

The respondent shall describe its experience and approach for coverage of non-emergency transportation services by providing the following:

- a. A description of the software capabilities utilized to facilitate ease in scheduling and tracking of enrollee pickup adherence;
- b. Strategies for determining the most appropriate mode of transportation; and
- c. Providing data on the following performance metrics for calendar year 2016:
 - (1) Percentage of trips where the enrollee arrived to their scheduled appointment on-time;
 - (2) Percentage of missed trip requests (failed to pick up the enrollee);
 - (3) Percentage of hospital discharge requests fulfilled within three (3) hours of the request;
 - (4) Percentage of urgent care requests fulfilled within three (3) hours of the request; and
 - (5) Number of transportation related complaints and grievances per 1,000 enrollees.
- d. A description of how the respondent uses the performance metric data above to identify areas in need of improvement and implements successful strategies that improve the provision of service.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Transportation is key to achieving the Agency's overall objective for Medicaid enrollees (members) to receive all medically necessary services in a timely manner. We understand reliable transportation is critical to the quality and continuity of the health and well-being of our members. Consistent provision of safe, reliable, appropriate, timely, easy-to-use (for members and providers), and responsive non-emergency transportation (NET) services will continue to be our goal. In 2016, Simply, including our D/B/A Clear Health Alliance, provided more than 696,000 NET trips to members throughout the state – in urban, suburban, and rural areas.

Our Experience Providing Non-Emergency Transportation Services (NET)

We recognize the challenges associated with this benefit. As in other states and with other health plans, transportation has been a challenge for members, providers, health plans, and State regulators. We have learned to work collaboratively to address transportation concerns. In planning for our future, we took a hard look at the best way to build on improvements we have made to date and to plan for future enhancements.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

As a result of this process, we decided that partnering with two subcontractors to provide high-quality transportation for our members statewide would best support our goals. We will continue our partnerships with LogistiCare Solutions, LLC (LogistiCare), which has shown a commitment to strong performance and an impressive willingness to work with us in continuous process improvement. We will also partner with MCT Express, Inc. (MCT Express), a subcontractor we have found to be very reliable and committed to timely transportation through their own fleet.

LogistiCare and MCT Express bring years of state and national experience. LogistiCare has served as a transportation subcontractor throughout the nation for more than 21 years and provides these services in 39 states and the District of Columbia. MCT Express has been a Medicaid transportation provider in Florida for more than 25 years and currently contracts with Simply through its MMA and Medicare Advantage plans, serving a membership of more than 160,000 in Regions 10 and 11. As a transportation subcontractor, the MCT Express provider network will primarily be MCT Express-employed drivers and -owned vehicles. We believe this combination of transportation subcontractors will best meet AHCA's and our own quality and time performance standards.

Our Approach to Non-Emergency Transportation

Beginning with the roll-out of the new SMMC Contract, LogistiCare will serve regions 1 through 9, and MCT Express will serve regions 10 and 11. This model also creates a competitive environment and gives us a risk mitigation strategy to migrate to one statewide subcontractor if necessary.

To supplement the services of our two delegated transportation subcontractors, we will continue to provide same-day, on-demand transportation services in all regions throughout the State. With Trip2 (an MCT Express product) and Ride2MD, Inc. (Ride2MD) statewide on-demand transportation services, our Customer Care Representatives can immediately address, through online internet access, a member's report of a late transportation provider by arranging a backup ride that meets all Medicaid credentialing standards. These on-demand services effectively expand the network of transportation providers available to our members in compliance with all Medicaid transportation policy and ITN requirements.

1. TRANSPORTATION SOFTWARE CAPABILITIES - SCHEDULING AND TRACKING OF PICKUP ADHERENCE

Both of our subcontractors have state-of-the-art software enabling members, health plan staff, and providers to access to real-time tracking and scheduling of transportation.

Transportation Software Capabilities

While LogistiCare and MCT Express each use proprietary software to manage and monitor transportation services, there are many similarities in their software. Both interface with our system to facilitate accurate and automatic eligibility verification and enable users to schedule reservations by phone, mail, email, fax, and online. Both systems facilitate efficient identification of appropriate alternative modes of transportation and level of service to meet each member's specific needs. Both software systems enable effective utilization of their transportation networks; include robust tracking and reporting tools to facilitate quality oversight and fraud, waste, and abuse detection; meet HIPAA and privacy requirements; support transportation provider claims

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

processing and adjudication; and support complaints processes. The systems are flexible, scalable, enable real-time updates, and have high levels of transparency. Both companies offer users the ability to make real-time changes to their reservations.

LogistiCare's WellRyde GPS and Automatic Vehicle Locator Software enable real-time and on-time performance monitoring to determine actual trip details, such as pick-up and drop off times, journey time, wait times, and vehicle speed along the route. Using this technology, LogistiCare can immediately identify vehicles that are running late and take proactive steps to make sure members arrive in time for their scheduled appointments. LogistiCare can also use data from WellRyde to prevent fraud, waste, and abuse, and improve the member experience.

MCT Express developed their proprietary software application specifically to manage NET. Users can view detailed routes for each reservation; schedule groups of trips with one click; monitor and regulate service in real-time with a variety of devices, such as cellular phones and tablets, enabling them to instantly track cancellations, no-shows, and schedule changes; and make reservation changes in real-time. MCT Express software also offers improved passenger interfaces for booking and tracking rides; vehicle tracking; digital signatures to reduce fraud, waste, and abuse; and verify covered services.

Scheduling and Dispatch Process

Through the Member Services call center, member handbook, provider manual, newsletters, our member website, and provider portal, we inform members and providers about transportation benefits and how to schedule rides. This includes information about guidelines for requesting and using transportation services, and reporting late rides. Members, member caregivers or representatives, Managed Care Coordinators, providers, and facilities may schedule NET rides 24/7, including holidays, in a variety of ways:

- Calling the transportation subcontractor's toll-free number to talk with Call Center Representatives who speak English and Spanish and have access to language line translation services in more than 200 languages
- Through transportation subcontractors' websites
- Through MCT Express' mobile application for smartphones and tablets
- By email, triggering a call back
- For facilities, by fax, triggering a call back

The process is the same for all scheduling methods and guided by subcontractor software. Using a script displayed on monitors for subcontractor Call Center Representatives to verbally relay to phone, email, and fax applicants and on-screen for internet and mobile application applicants to read, each applicant answers a series of questions to complete the following steps of the scheduling process:

- Verify member eligibility for Medicaid, our health plan, and transportation services on the day of the requested ride through system access to current member eligibility information

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Verify that request meets timeliness requirements of 48 hours before appointment time for covered services that are not urgent
- Confirm member contact information
- Gather information on the service, provider, appointment time, and whether the request is urgent or the member has special needs
- Determine that the member does not have other available means of transportation
- Determine the appropriate mode of transportation and level of service
- Confirm trips to and from the covered service and set up standing orders as appropriate

At the end of the scheduling process, Call Center Representatives verify and confirm trip data, including pickup time, location, and other details. Members scheduling by internet or mobile application receive electronic confirmation. All members receive a reservation number that they can use online to see an electronic summary of their reservation.

The scheduling application ties into ride dispatch for assignment of a vehicle and a driver, as described in the next section of this response. Both the scheduling and ride dispatch applications connect to a monitoring system that continually tracks provider performance, including timely pickup and other metrics.

The software supports specialized processes for scheduling short-notice, non-urgent trips; urgent trip requests; standing appointments; and facility discharges. Other tracking features include:

- Last minute requests and changes
- Member no-shows
- Late providers
- Provider no-shows
- Automated appointment reminder calls

2. DETERMINING THE APPROPRIATE MODE OF TRANSPORTATION TO MEET THE ENROLLEE'S INDIVIDUAL NEEDS

We provide a full range of transportation options to meet our members' NET needs, such as:

- Mass transit passes
- Sedan for ambulatory riders
- Van for ambulatory riders, including multi-loading
- Taxi for ambulatory riders
- Wheelchair-lift equipped vehicle
- Vehicle to accommodate stretchers
- Non-emergency ambulance

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We also provide the following levels of services by drivers:

- Curb-to-curb
- Door-to-door
- Hand-to-hand

While the caller is on the phone, software enables the representative to assign the most medically appropriate vehicle and level of service to meet the members' needs for each trip, based on information from the member regarding their mobility limitations — whether they use a cane, walker, wheelchair, or stretcher, or have other special needs. Other considerations include whether attendants, escorts, or children (with or without child car seats) will be traveling with the member. Subcontractor staff may manually override the mode of transportation recommended by system software logic if the member's medical condition requires a different level of service. Subcontractor management teams review and audit overrides to make sure each is appropriate.

The Dispatch team is responsible for identifying which driver and vehicle to schedule to complete each trip. The team contacts transportation providers to select an available provider with the appropriate vehicle and ability to provide the appropriate level of service on the date and time of the trip. Once they identify the provider, the dispatch team assigns the trip to the provider within the system.

3. ASSESSING WHETHER THE ENROLLEE HAS OTHER MEANS OF TRANSPORTATION

To determine the right means of transportation for members, subcontractor Call Center staff ask a series of questions to assess whether the rider has access to other means of transportation. Questions include "Do you have a friend or family member who can drive you to your appointment?" and "Can you walk to the nearest bus stop and take the bus to your appointment?" If the member can take mass transit, the Representative will flag him or her in the system as appropriate for mass transit and will mail a mass transit pass to him or her. If there is insufficient time to mail the pass to the member prior to the date of the scheduled appointment, the Representative will schedule a ride.

☀ Simply Helping ☀

As part of putting our Safety Plan into action, we reached out to Thomas, a 56-year-old member in Broward County who is blind and HIV-positive, to offer assistance and transportation to a shelter prior to the arrival of Hurricane Irma. Thomas needed transportation to a shelter as well as to his dialysis appointment in two days.

Stephanie, our Member Services Representative, found the shelter closest to Thomas was full, so she called the Red Cross support line to locate a shelter appropriate for persons with special needs. Stephanie contacted the church-based provider operating a shelter close to Thomas's home, and they agreed to offer shelter and provide transportation. They picked up Thomas, got him to his dialysis appointment, and transported him to their shelter during the storm. Thomas said he was very grateful for the assistance as his main concern was to be with others during the hurricane instead of home alone.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

4. PERFORMANCE METRICS

In the following sections, we provide 2016 calendar year transportation data for all legacy health plans, for all trips provided by our current subcontractors, LogistiCare and Access2Care.

4.a. Percentage of Trips Where the Enrollee Arrived to Their Scheduled Appointment On-Time

In 2016, of more than 696,000 completed rides, members arrived on or before the time of their appointment 94 percent of the time. Although we cannot entirely avoid unforeseen delays and arriving late does not always result in a missed appointment, we recognize that this is short of the State's goal that members are never late for an appointment. We have implemented several strategies to improve performance on this metric.

Improvement Strategy 1 - We contracted with two same-day, on-demand transportation programs, Trip2 and Ride2MD. We require transportation subcontractors to promptly notify our Member Services team as soon as they know a provider will likely be late to pick up a member. Our Customer Care Representatives then schedule a second driver and vehicle using the Trip2 or Ride2MD application to get the member to the appointment on time. We frequently notify and remind members to call our Member Services team or transportation subcontractors as soon as their ride is late to provide us maximum time to reschedule with Trip2 or Ride2MD.

Improvement Strategy 2 - We worked with our subcontractors to examine reasons why members arrive late. Subcontractors now have the technical capabilities to record a reason each time a member arrives late to an appointment and we require them to include reason codes in the data they send to us daily. With this data we can track and trend data on reasons such as severe weather conditions, unexpectedly heavy traffic, vehicle breakdown, inaccurate reservation information, earlier trip delays, and delays in members boarding vehicles. We work with each subcontractor to identify trends that we can address with scheduling and dispatching protocol changes and transportation provider network changes. While there will always be extenuating circumstances, we will continue to focus on making process changes to avoid delays wherever we can.

4.b. Percentage of Missed Trip Requests

It is rare that a transportation provider does not arrive to pick up a member for a scheduled ride. In 2016, this occurred for less than two-tenths (0.13) of one percent of all scheduled rides. Although a missed trip is rare, we continue to strive to have it never occur.

Improvement Strategy - As with late trips, we require very detailed trip documentation of each provider no-show incident to assure accurate trip cancellation information and identify network, staffing, and other initiatives to avoid no shows in the future. For example, to make sure we are getting accurate information on trip cancellations, a driver can no longer just indicate that the member cancelled the ride. They must now report the details of the cancellation and clearly indicate when the member rescheduled the appointment. We also now require transportation subcontractors to notify us each business day if they cannot staff a ride for the upcoming day. This gives us sufficient time to schedule a second driver and vehicle through Trip2 and Ride2MD.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

4.c. Percentage of Hospital Discharge Requests Fulfilled Within Three Hours of the Request

For hospital discharge requests fulfilled within three hours, LogistiCare achieved 91 percent in 2016 and 97 percent in the first six months of 2017. In 2016, the data metric was 82 percent for all rides from LogistiCare and Access2Care. This metric was a factor in our selection of transportation subcontractors for the future. Moving forward, as previously stated, we have selected to do business with the higher performing transportation subcontractor, LogistiCare.

Improvement Strategy 1 - Our plan for the future with two transportation subcontractors coupled with the two on-demand same-day programs will enable us to further improve on this performance.

Improvement Strategy 2 - We often get a ride request with an estimated discharge time for which the transportation provider arrives on time at the hospital to find that the member's discharge process is not complete. The member may be waiting for home health equipment or a final sign-off of his or her discharge. We will explore opportunities for working with hospitals and members when scheduling hospital and other facility discharge trips to better understand the best time to arrive and minimize wait time for the member and transportation provider.

4.d. Percentage of Urgent Care Requests Fulfilled within Three Hours of the Request

In 2016, 88 percent of all completed urgent care rides occurred within three hours of the request. While we recognize there is opportunity for improvement for this measure, we are committed to significant improvement by tracking root causes and implementing process improvements. We also recognize that the data may not accurately reflect the experience of the member. Not all member urgent care appointment times fall within the three-hour transportation pick-up window. For example, a member may call at 9:00 am for a same-day urgent care appointment at 4:00 pm. Because of the unpredictable nature of urgent care trips, it can be difficult for transportation subcontractors to appropriately plan for sufficient staff resources for all urgent trip requests.

Improvement Strategy - To address this situation, we implemented a protocol for each transportation subcontractor to notify us when they receive an urgent trip request they are not certain they can complete in three hours. In these cases, our Customer Care Representatives immediately schedule a driver and a vehicle through one of our same-day, on-demand subcontractors.

4.e. Number of Transportation Related Complaints and Grievances per 1,000 Enrollees

In calendar year 2016, we had less than one (0.83) complaint or grievance for every 1,000 member months. For all transportation complaints, we document, research, and triage to determine the level of urgency, and then respond accordingly.

Improvement Strategy - In early 2016, we implemented a process for daily reporting of transportation complaints. Our Vendor Delegation Oversight Group (VDOG) reviews a daily report of aggregated transportation complaints from members, their families, providers, and others that AHCA, our Member Services team, transportation subcontractors, and Grievance and Appeal team received. We implement strategies for addressing concerns — both global strategies, such as using same-day, on-demand transportation programs and strategies related to individual providers, regions, or circumstances. We work to address complaints before they become formal

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

grievances and work to identify and address their root causes to prevent reoccurrence. These efforts coincide with significant improvement in this performance metric, going from 0.83 complaints and grievances per 1,000 member months in 2016 to 0.37 for the first six months of 2017.

5. USING PERFORMANCE METRIC DATA TO IDENTIFY AREAS IN NEED OF IMPROVEMENT AND STRATEGIES TO IMPROVE THE PROVISION OF SERVICES

Using Data in Day to Day Operations

We use data to monitor the performance of our transportation subcontractors and providers. Our proven subcontractor oversight process, led by VDOG, uses data extensively. VDOG employs a far-reaching and vigorous approach that combines various methodologies to monitor transportation subcontractor performance data. VDOG receives monthly transportation performance data from subcontractors, grievance and appeal data from plan staff, and daily ride and complaint information through direct access to subcontractor systems. Through data analysis and trending, we compare data to service level agreements for each subcontractor to identify performance issues and report them to our Quality Management Committee (QMC) and Florida Medicaid Compliance Committee at least monthly. With QMC and Compliance Committee support, we work with subcontractors to develop strategies to improve performance whether through an informal process or the more formal corrective action plan process. We make sure that improvement strategies achieve intended results by monitoring performance data to understand the impact of implemented strategies. If the data indicates that strategies are not achieving intended results, we go back to subcontractors to consider additional causes and strategies to address them. We work in partnership with subcontractors to improve processes, often applying Lean Six Sigma principles to drive change.

Each of the five performance metrics outlined in our response to Evaluation Criteria 4 above provide visibility into our members' experience with transportation services. As described above, we used data to drive improvement for these metrics. The data points we gather aid in our ability to monitor subcontractor and provider performance, identify areas of risk or concern, then develop and assess improvement strategies and their effectiveness. We gather and trend the following data for each of our transportation subcontractors:

- Trip volume, including total number of reservations, cancellations, cancellations as a percentage of reservations, total completed trips, average monthly members, average utilization percentage, and unique utilization percentage
- Level of Service – total numbers of authorized ambulatory, wheelchair, stretcher, and public transportation trips
- Mileage distribution under 10, 24, 50, or 100 miles, and more than 100 miles
- Trip reason – transportation to diagnostic center, dialysis, hospital, pharmacy, primary care or specialist, residence, skilled nursing facility, assisted living facility
- Call center operations – number of calls received and answered, average speed to answer, abandonment rate, call blockage rate, average wait time in queue, maximum hold time

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Network development and maintenance – number of transportation providers in network by region
- Fraud, waste, and abuse – number of open cases, cases referred by health plan, closed cases

**** RESULTS & SUCCESSES:** In late 2015, an audit and an increased number of complaints from dissatisfied members exposed gaps in our transportation process. In January 2016, we initiated enhanced subcontractor oversight and set up a process for reviewing daily LogistiCare trip and complaint data. We used root cause analysis, and statistical analysis featuring the Pareto principle, by which we identify the problem areas that occur most often and address those first, to determine that five providers and five regions accounted for more than half of all late rides. We then implemented process and network changes to address the providers and regions with the most late rides first. As a result, by the end of 2016, we saw on-time performance measures increase by five percent and monthly complaints decrease by 85 percent. ******

Using Data to Select Transportation Subcontractors

We used performance data to develop our new transportation approach and select the transportation subcontractors we will work with in the future. We set detailed service level requirements and evaluated potential partners against them to make sure we selected the subcontractors that will best meet our expectations and AHCA's. We selected LogistiCare and MCT Express because they offer the best performance data to-date and a commitment to continuous improvement through use of performance data. Our same-day, on-demand services, Trip2 and Ride2MD, which meet all Medicaid credentialing standards, are also committed to the use of performance data to improve the quality of our transportation benefit. We conducted the following activities as part of our process for selecting transportation subcontractors:

- Defined our requirements for all parts of the State Contract, setting service level requirements, and detailing our expectations
- Assessed system software and technology to see that subcontractors had reliable systems and included the latest technology, such as smartphone and online ride scheduling
- Reviewed quality of care data for subcontractors, including ride volume, late and missed rides, member and provider complaints, and compliance with driver credentialing and vehicle safety requirements
- Considered each subcontractor's Medicaid and Florida experience

Beyond data, we also use subcontractor onsite visit reviews to monitor transportation services our members receive. LogistiCare sends staff to dialysis centers throughout the state to observe transportation providers as they drop off members for treatment and pick them up to take them home. They observe timeliness, customer service, and vehicle conditions to identify areas of concern that are promptly addressed.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The adequacy of the respondent's software capabilities to facilitate ease in scheduling transportation and tracking of enrollee pickup adherence;
2. The extent to which the respondent describes strategies for determining the appropriate mode of transportation equipped to meet the enrollee's individual needs.
3. The extent to which the respondent's approach includes an assessment of whether the enrollee has any other means of transportation, including a description of the process that will be utilized to make this assessment.
4. The adequacy of the respondent's performance related to:
 - (a) Percentage of trips where the enrollee arrived to their scheduled appointment on-time;
 - (b) Percentage of missed trip requests;
 - (c) Percentage of hospital discharge requests fulfilled within three (3) hours of the request;
 - (d) Percentage of urgent care requests fulfilled within three (3) hours of the request; and
 - (e) Number of transportation related complaints and grievances per 1,000 enrollees.
5. The extent to which the respondent uses performance metric data to identify areas in need of improvement and implements successful strategies to improve the provision of services.

Score: This section is worth a maximum of 45 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 25 – Vignette (Statewide):

The respondent shall review the below case vignette, which describes potential Florida Medicaid recipients. Note: The vignette included below is fictional.

Deshea is 25 years old. She was auto-assigned to your plan and enrolled effective January 1, 2019. Deshea's enrollment information did not include a telephone number and listed a local area homeless shelter as her last place of residence. She left the shelter on December 27, 2018, and the shelter does not know her current whereabouts.

The respondent shall describe the process it will use to attempt to contact Deshea by March 29, 2019.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), provides a response for each of the Evaluation Criteria for SRC 25. We describe our process to contact the fictional new enrollee (member), Deshea, at the end of our responses that address the specific Evaluation Criteria numbers 1 through 3.

Clear Health's processes to locate, contact, and engage our members are specialized and responsive to member needs, concerns, and fears. We provide specialized sensitivity training to our Customer Care Representatives, who are often the first to establish contact with our new members, to make sure that members are welcomed into our plan with a sense of community and confidence in our ability to uphold their privacy. Privacy is a prime consideration for people with HIV/AIDS, as there is still significant stigma related to the diagnosis. Protection of health information inside and outside the care system is therefore paramount to our members. In response, we have customized our logo to "CHA" and modified member mailing protocols so that material is not readily identifiable as "Clear Health Alliance," which is recognized in the community as an HIV/AIDS Specialty Plan. In addition, we make sure that stringent HIPAA protection policies and procedures are applied.

Clear Health is aware that our member population has a higher prevalence of homelessness and mental health, substance abuse, and co-occurring disorders than members in traditional plans. We therefore designed and implemented a specialized Member Outreach Team to help us quickly locate new members so that we can fully assess their needs and promptly engage them in care. Through collaborating with providers, local shelters, and community-based organizations, as well as providing "feet on the street" outreach services, our Member Outreach Team also plays a critical role in locating and engaging new members who are homeless.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1. STRATEGIES AND DATA WE USE TO IDENTIFY NEW MEMBERS

Clear Health understands that typical contact methods used to engage new members, such as welcome calls and mailings, often do not work with hard-to-reach members and members who are homeless or have unstable housing with no address or phone number. Therefore, we also use a combination of technology and “feet on the street” approaches through our Member Outreach Team, as well as strategic partnerships with community-based providers who incorporate innovative outreach initiatives to locate and engage Deshea, and our other members facing similar housing issues.

1.a. Innovative Strategies Help Us Identify New Members

We continually look for efficient and effective processes that will enable us to connect all of our members with the services and assistance they need. In addition to our internal Member Outreach Team, we are implementing other initiatives to help locate and engage members who are homeless or otherwise hard to reach. Innovative and best practice strategies we recently implemented or will be implementing and expanding in the near future to help locate and contact hard-to-reach members include “feet on the street” community-based partnerships and securing access to the Homeless Management Information System (HMIS). Access to real-time notifications through the Event Notification System will continue to be instrumental in helping us locate hard-to-reach members if they are admitted to a hospital or visit an emergency department. We will continue to explore additional options to obtain service notification data from other vendors we work with, like transportation providers.

Homeless Management Information System (HMIS)

We have recently secured access to the HMIS, a local information technology system that collects client-level data on the provision of housing and services to homeless individuals and families and persons at risk of homelessness. This system enables us to use the “client tracker,” a valuable application that helps us locate members experiencing homelessness. This will be a valuable new tool for our Case Managers (Managed Care Coordinators) and Member Outreach Team. This application identifies shelters and other organizations that are currently providing services or that recently provided services to a member.

Our affiliate health plan in Indiana recently began using the HMIS as a tool to successfully locate members with unstable housing. Based on total per member per month costs prior to and after engaging, our affiliate calculated that actual savings already exceed \$100,000 for the 52 homeless members they were able to locate and engage in services using the HMIS for only four-months (May through August 2017). Encouraged by early results, our affiliate will be expanding their use of the HMIS to incorporate notification alerts when a member they are searching for is identified. Clear Health will incorporate the innovative best practices that our affiliate plan is implementing to maximize the value of the HMIS.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Clear Health Member Outreach Team

Clear Health has learned best practices for communicating and engaging with medically and behaviorally complex members. We understand that our members face significant social stigma in addition to challenges navigating their health needs. Our Member Outreach Team is strategically designed to address the barriers we encounter in contacting these hard-to-reach members. Our staff are specially trained and have years of experience supporting our members with compassion and respect. They personally reach out to and visit with other organizations and agencies that provide services to individuals who are homeless, building strong relationships and collaborations that assist us in locating and engaging our own members. This approach also involves moving outside of the walls of these organizations and agencies, directly engaging members experiencing homelessness who may be lost to care and services, living in the streets.

“Feet on the Street” Outreach through Community-based Partnerships

To support further growth and process efficiency, we are leveraging local partnerships and contracts throughout the State to supplement our “feet on the street” approach to find members where they reside to initiate engagement into care. These partnerships and contracts are being developed with Federally Qualified Health Centers, Community Mental Health Centers, Ryan White providers, former Project AIDS Care (PAC) waiver entities, and housing providers that have traditionally worked with homeless or other hard-to-reach individuals. These entities have dedicated teams comprised of skilled and trusted outreach workers who know where the homeless populations are, in shelters as well as on the streets, and when (weekdays, evenings, and weekends). These specialized field-based workers have established strong relationships over the years with key homeless leaders and individuals living on the streets. These workers can use those relationships to help our internal Member Outreach Team locate hard-to-reach members. Clear Health is in active discussions with the organizations we will partner with in Florida. After having successes with the local presence model across many of our current regions, we will be implementing these innovative partnerships to expand and supplement our “feet on the street” Member Outreach Team on a larger scale to support a scalable and sustainable local model.

Our affiliate health plan in Indiana implemented similar “feet on the street” strategies beginning March of 2017, in partnership with community health workers and entities in the community. Their program has been successful and has touched the lives of 1,230 members from March through August 2017. Actual savings through August 2017 already exceed \$440,000 based on per member per month costs prior to and after engaging members.

Real-time Data Helps Us Locate and Engage Members Certain Services

Access to the Event Notification Services will also help us locate Deshea and other hard-to-reach members through real time notification if they are admitted into a hospital or visit an emergency department at a participating facility. For example, if we are alerted through the Event Notification Service that Deshea is in a hospital, we will coordinate a Clear Health team member to meet with her face-to-face. At some hospitals, we have on-site Concurrent Review Nurses who are immediately able to make contact with Deshea. If Deshea is in a hospital where we do not have on-site team members, then we will promptly send a Managed Care Coordinator and/or Outreach Care Specialist to meet with her at the facility. We have found that face-to-face contact is an

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

important tool for developing a connection and establishing rapport with our members who are homeless or difficult to engage into care and treatment for HIV/AIDS.

We will continue to explore additional options to obtain service notification data from other subcontractors. For example, our systematic process to locate hard-to-reach members includes contacting transportation vendors to obtain current pick-up addresses. Transportation data notifications will enhance our ability to locate hard-to-reach members, enabling us to meet the member where they are currently accessing transportation services. We will also ask our behavioral health vendor to search their files to share data, such as claims and provider history, which we can follow up on.

1.b. Data and Information Sources Assist in Identification of Members with Special Health Care Needs or Circumstances

We use multiple sources of information to help us locate members like Deshea, including those who we are unable to contact due to missing or outdated information in the enrollment file. We also use these information sources to identify special needs or circumstances that our new members may be experiencing (from enrollment through the first 90 days). We use the following information sources to support our new member location and identification processes:

- State enrollment files (current and past) including the 834 enrollment file and the Special Needs Supplemental File
- Historical claims data
- Face sheets from hospital emergency department visits or admissions
- Hospital and emergency department visit alerts through the Event Notification Service
- Prescriptions filled
- Health plan transportation service records and other vendor records (transportation, vision, dental, behavioral health)
- Exchange of information with local Ryan White providers and PCPs
- Weekly data exchange with Healthy Start Coalitions
- Public arrest record search (local and state level) at State of Florida, Department of Corrections, Corrections Offender Network (<http://www.dc.state.fl.us/activeinmates/search.asp>)
- Social media search tactics

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Identification of Special Circumstances and Needs using the HMIS

In addition to the above information sources, we will use the HMIS to access additional data that may assist in identifying member needs and circumstances. We will use the HMIS to help us locate members who have unstable housing or who are homeless throughout Florida, and as a resource to help us better understand member needs and circumstances. After locating a member, we will also use the HMIS to identify the organizations currently providing services to them, and to make sure that they are receiving the community-based supports we referred them to, collaborate with them as needed, and identify and fill service and support gaps. For example, our affiliate health plan in Indiana currently uses the HMIS to assess the amount of time and number of times a member has been homeless, to identify other organizations that are working with a member, and the number of past and current services utilized. This information helps our affiliate with early identification and location of the member, and also helps obtain accurate assessments, timely record sharing, identification of gaps in services or participation, and coordination of services.

Identification of Special Health Care Needs and Circumstances through Member Outreach

Once we are able to locate and establish contact with our new members, we collect additional information from them to help us identify special health care needs or circumstances. Our Customer Care Representatives conduct outreach calls to each new member to welcome them to the plan, discuss benefits, confirm demographic information including language needs and the use of interpreters, encourage them to complete an initial screening to understand their health care needs, and inquire about current or emergent needs for services. We also identify the comprehensive needs of our hard-to-reach or homeless members located by our Member Outreach Team, including Outreach Care Specialists, in collaboration with our Managed Care Coordinators and the outreach workers from the entities we partner with. All Clear Health members are referred to their assigned Managed Care Coordinator for follow up and completion of the comprehensive health assessment.

Other Strategies to Identify Special Needs and Circumstances for our Hard-to-reach Members

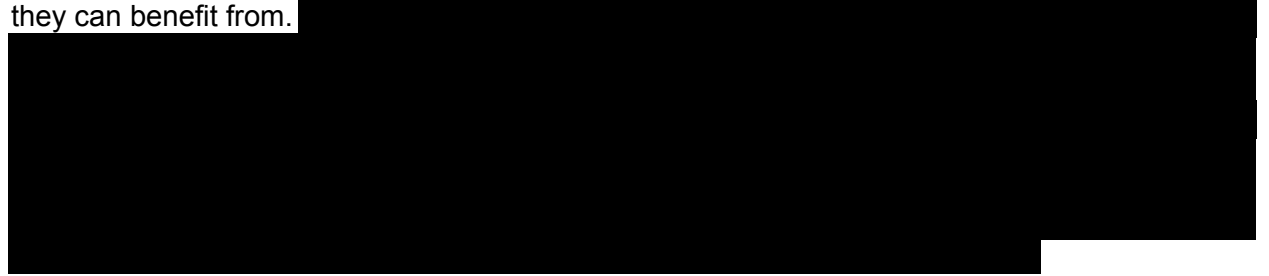

In addition to helping locate members to establish initial contact, our Member Outreach Team and the entities we partner with are also instrumental in establishing and maintaining supportive relationships, providing advice and support, and improving the likelihood that members will not only engage but will continue to access necessary services and supports for their health and well-being. We know that building strong relationships with a member is essential to establishing trust and understanding individual circumstances. We understand that there may be legitimate barriers preventing members from accessing services, including being unaware of the range of services and supports available to more complicated barriers like problematic experiences with child protection services, homeless shelters, or mental health facilities. Some members may have addictions or other barriers like pets, partners they refuse to part with, or being underage and fearful of being turned over to child protection authorities.

To support our members, we employ field-based Outreach Care Specialists as part of the Member Outreach Team and clinical Managed Care Coordinators, and have partnerships with entities that understand this population and have the “cultural competence” to know how to connect, engage, and maintain communication with members struggling with homelessness and HIV/AIDS. We educate these members on the many services and supports available to help them move off the

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

streets. Our outreach workers and Managed Care Coordinators establish a trusting connection with each member, and take a holistic approach to collaborate to identify their goals, needs, and preferences for obtaining access to the services and supports they need and desire. We use a trauma informed and person-centered approach to assess each member's strengths as well as their educational, employment, nutritional, and transportation needs. We either make community connections for services or provide support such as bus cards, cell phones, or food and clothing referrals.

We carefully assess member circumstances to identify behavioral health, social, and physical health care needs, including services for sexual assault, sex trafficking, sexual or physical abuse, or sexual identity. Our holistic assessment helps us connect our members to the services that they can benefit from.

2. PROCESSES AND DATA SOURCES WE USE TO CONTACT MEMBERS

Upon our receipt of the X12-834 Enrollment File provided by the Agency, our Customer Care team mails each member a new member welcome packet, which includes member ID cards, and plan materials, including an initial screening form with a self-addressed stamped return envelope. This new member welcome packet is mailed within five calendar days of the member's enrollment. Clear Health's specially trained Customer Care Representatives also call new members to welcome them to our plan. Representatives who communicate with Clear Health members receive additional training on HIV/AIDS, including sensitivity training and training on comorbidities. The Customer Care Representatives attempt to obtain the initial screening during the welcome call, if not already completed and returned by the member. These calls are made at least twice if necessary within 30 days of a new member's enrollment. Our welcome calls are handled through our Florida-based Member Services help line. We employ bilingual Customer Care Representatives; therefore, translation services are not needed for Spanish welcome calls. If a member speaks a language other than Spanish or English, the Customer Care Representative will initiate translation services through our standard process.

If members do not respond to these initial outreach efforts, then in the second month of their enrollment we attempt four to six additional calls at different times of day and during the weekends. If the member is still not contacted and did not complete an initial screening within 60 days, our Member Outreach Team continues the process, along with further research and outreach attempts, during the third month of enrollment. Using the information we identified in evaluation criteria 1.b above, our data analytics resources simultaneously mine all available information about diagnoses, past health care utilization, demographics and other information to help us identify risks and anticipate the needs of our members, and to identify current contact information. A Member Outreach Team member also looks at external sources of information to contact a hard-to-reach member. For example, if a female member is of childbearing age, our systematic process includes review of Healthy Start Coalition enrollment files. We will also include this step if the enrollment file indicates a member is pregnant. Through our established data

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

exchange agreement with Healthy Start Coalitions, we will receive these files weekly. If a member is identified in the file as pregnant, we will collaborate with the Healthy Start Coalition to locate the member and coordinate services.

Our Member Outreach Team also looks at service and visit records from our vendors, arrest records, Google searches, and other publicly available data sources that may provide updated contact information, and homelessness information using the HMIS. Clear Health conducts this type of investigation and follows up with every new member to identify any special health care needs or circumstances, and to find updated or missing contact information. In addition, if we receive returned mail with a new address, we update our records and promptly mail the new member welcome packet to the new address. We also implement “feet on the street” outreach strategies through our Member Outreach Team as well as with the entities we partner with, as we described in our response to evaluation criteria 1.a. These strategies are used to contact and engage our homeless, potentially homeless, and otherwise hard-to-reach members we are not able to contact through phone. If we identify an unreachable member goes regularly to a particular location, we may send an Outreach Care Specialist to try to meet the member at a point of contact and begin engagement while ensuring privacy and safety standards are upheld.

Additional outreach attempts are also made directly by the Managed Care Coordinator assigned to every new member. If we are unable to contact a new member, and after the Managed Care Coordinator extensively researches other sources of contact information and makes at least three call attempts is also unable to contact the new member, we will mail the new member another Unable to Contact letter asking him or her to contact our case management department.

At that time, the Managed Care Coordinator turns to the Member Outreach Team for ongoing periodic follow up. If all attempts to locate a member are unsuccessful, and if we exhaust all avenues in the first 90 days of enrollment, then our Member Outreach Team will flag the member's record in the Case Management System identifying that we have been unable to contact him or her. This flag will make sure that appropriate and immediate action, such as connecting the member directly to a Managed Care Coordinator, is taken by our Customer Care Representatives in the event the member calls us. In addition, as soon as member utilization, claims, or pharmacy usage is identified through regular reports, our Member Outreach Team pursues the new lead. If a member is hospitalized or shows up in an emergency department, we will call the hospital and visit to try to engage them. In some areas, we have special access to visit members in psychiatric facilities during discharge preparations. Our proactive search process for every member we are unable to locate will be attempted and refreshed on an annual basis.

3. ENGAGING NETWORK PROVIDERS AND COMMUNITY PARTNERS TO ASSIST NEW MEMBER IDENTIFICATION PROCESS

We strategically engage providers who have historically served the homeless population and are best prepared to engage and maintain meaningful contact with our members who face homelessness. The Street Outreach services we are also implementing through a provider partnership in key regions across Florida not only locate a member, but engages them in services such as health screenings, preventive care or treatment, community services, behavioral health services, peer supports, and housing services. These services effectively connect a member to resources they need in the community as well as the Continuum of Care Coordinated Entry system to help them connect with the best housing option. We are already partnering with agencies across Florida — entities such as Healthcare for the Homeless dba Orange Blossom

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Family Health (FQHC) in the Orlando area; Camillus House in the Miami area; Baley Center in St. Petersburg; Gracepoint in Tampa; the Homeless Services Network in Central Florida; and other statewide entities like the Florida Coalition for Supportive Housing.

Engaging Network Providers

We will continue to engage our provider network community and work with providers to collaboratively locate and stay in contact with our members. Our locally based Provider Relations team, Provider Network Managers, and Managed Care Coordinators work hard to build strong relationships with providers in our network, including those who provide services to hard-to-reach members, making sure they have the tools and resources they need to support each member. Our Provider Network Managers are in the community meeting face-to-face with providers to share actionable data and collaborate on optimal approaches to make sure our members receive services they need. We enlist the assistance of providers in locating specific members, and helping us connect with our members by notifying us while they are in the emergency department, hospital, or at a doctor appointment. They are instrumental in advocating on our behalf to help build trust with our members, helping us get thorough comprehensive health assessments, and maintaining contact with members that are reluctant to accept our assistance.

Community Partnerships

We have strategically developed partnerships with entities across the State that have traditionally served members with unstable housing. For example, we continue to develop partnerships with the former PAC waiver entities across every region in Florida to help us locate Clear Health's new members who may be homeless and other hard-to-reach members. The PAC waiver entities will enhance our ability to locate and engage members who are homeless because of their longstanding work with local community homeless organizations. Their role has been critical to many of these members who need a community liaison and support system to engage in care. The PAC waiver entities we partner with will also work closely with our Managed Care Coordinators to be our local "feet on the street," personally working with our members to help engage them in care.

After we locate and engage these members, we will continue to monitor member engagement and gaps in care, and coordinate with these former PAC waiver entities to further support our HEDIS® initiatives by helping us engage our members who are homeless or difficult to contact to make sure timely care and services are arranged and received.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We will also have partnerships in specific regions in the State with other entities including FQHCs, CMHCs, and housing providers. These entities will provide additional street outreach services to locate and engage our members who are homeless.

Ongoing Collaboration with Community-based Organizations

Our Customer Care team, Managed Care Coordinators and the entities we establish partnerships with for street outreach services will collaborate with organizations such as community centers, community mental health providers, shelters, drop-in centers, faith-based organizations, senior centers, clinics, housing authorities, recovery organizations, and food banks to help us maintain contact and engage our members who are hard to reach. We will continue to conduct community outreach initiatives that extend existing social support services to these types of organizations and others serving the homeless, such as Feeding South Florida, Healthcare for the Homeless, Immokalee Friendship House, and Department of Children and Families Office on Homelessness.

Partnerships to Address Potential Justice System Involvement

We continually identify locally based resources and assess their capabilities, educate our employees about them, build mutually beneficial relationships, incorporate them into our outreach and case management activities, and customize our approach based on these resources. For example, we are collaborating with Drug Abuse Comprehensive Coordinating Office (DACCO) in Florida Regions 5 and 6 to coordinate activities for our members suffering from substance abuse. DACCO is currently a contracted provider and by working with them to integrate behavioral health and medical services, our members benefit from a wrap-around approach that can help break the cycle of substance abuse and justice system involvement.

Partnerships to Support Employment Services

To help provide additional support to members, Clear Health is working with State and local behavioral health providers as well as the Department of Vocational Rehabilitation to expand evidenced-based models such as Individual Placement and Support (IPS). Currently this model is exclusively in Broward County, and we would like to partner with the State to expand this model to other counties or regions across Florida. As we move forward with expanding this initiative, Clear Health will develop relationships with additional community-based organizations, workforce development agencies, and the Division of Vocational Rehabilitation. We will collaborate with these organizations on behalf of our members to help them enter the workforce and gain skills needed to establish self-sufficiency.

DESHEA MEMBER VIGNETTE:

CLEAR HEALTH'S PROCESS TO CONTACT DESHEA BY MARCH 29, 2019

Upon receipt of notification of Deshea as a new member effective January 1, 2019 through the X12-834 Enrollment File provided by the Agency, our Customer Care team immediately sees that Deshea's last known residence was a homeless shelter, and that her file is missing a phone number – key information we need to contact her to tell her about her benefits. We place an alert on Deshea's file in the Core Operations System to inform all plan staff who may interact with her that contact information is needed. We also mail a letter to Deshea to her last known address at the homeless shelter, requesting that she respond to a dedicated phone number designed to link

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

her with specialized services. Many homeless shelters will keep mail for persons who have lived in or have a relationship with the shelter.

Since Deshea had the shelter address on file with the State, she may have previously been able to receive mail at the facility and may come by to check if any mail has been set aside for her. The new member welcome packet is also mailed to Deshea, using our modified member mailing protocols so material is not identifiable as from "Clear Health." This is mailed to Deshea at the homeless shelter's address within five days of her enrollment. We then proceed with our alternative enhanced member outreach processes.

Since we do not have a phone number to directly reach Deshea, the Customer Care Representative sends Deshea's profile to our Member Outreach Team for further research and individualized processes by a Managed Care Coordinator and an Outreach Care Specialist from our Member Outreach Team. Our Member Outreach Team uses multiple strategies and outreach attempts to locate and contact Deshea as soon as possible and no later than March 29, 2019.

The Managed Care Coordinator, Cindy, immediately contacts the local area shelter by phone to locate Deshea. Cindy learns that Deshea recently left the shelter and her location is now unknown, so Cindy attempts to identify Deshea's current homeless shelter address through the HMIS client tracker. Cindy confirms that Deshea is not currently staying in any shelter, and the shelter listed on the enrollment file was the last place she stayed. Cindy finds out that Deshea has not returned to the shelter to retrieve any of the mailings we have sent. Cindy researches any prescription refills and contacts the pharmacy that Deshea used in the past for alternative contact information. Cindy also researches any claims to contact providers and call logs to identify alternative contact information. Cindy checks back with the homeless shelters.

Cindy also engages an Outreach Care Specialist from our Member Outreach Team, Wendy, to personally visit any locations where Deshea may be. For example, if Cindy finds out that Deshea will be having a clinical appointment, she will send Wendy to the location to meet her. Wendy continues to search for Deshea by calling every shelter and organization identified through the HMIS as providing past services to Deshea. Wendy also calls all other area shelters. Wendy enlists the assistance of each shelter and organization she calls, requesting that they contact us and provide Deshea with our contact information if she chooses to seek shelter or services at their location in the future. Wendy also contacts the PCP who Deshea has been assigned to. She informs the PCP that we have not been able to contact Deshea, and requests to be notified if Deshea visits to receive services in the future.

Wendy continues to search for alternative addresses or contact numbers in all current and past information we have. She contacts the local Ryan White Agency Case Manager to determine if they have seen Deshea or have any additional information that may assist in locating her. She also identifies any past enrollment files from the State and all historical claims information we have. She finds historical information on Deshea from a prior enrollment period and identifies the providers she accessed in the past, pharmacies she used, hospitals she visited, and services she used such as transportation. Wendy reaches out to the past providers and entities for any contact information that could lead to Deshea, and follows up on each lead. Wendy asks Deshea's past providers to help us contact her and request that they give her a message to contact us if she visits them. Deshea's hospital member record is noted with an identifier that indicates she is assigned to our plan and we are unable to reach her. If she has a future hospital admission, our nurse will visit Deshea in the hospital to connect her with her benefits, case management, and

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

other needed services. We will also look for information on Deshea to appear on the ENS. Wendy will also reach out to our behavioral health vendor to ask them to search for data, such as claims and provider history that we can follow up on.

Wendy also follows up on all contact leads identified by our Customer Care team identified through external data resources. For example, since Deshea is of childbearing age, Wendy continues to check the weekly Healthy Start Coalition files. Wendy continues to try to locate Deshea's current contact information by reviewing other external data resources. She searches the county and state public arrest records to rule out incarceration at the State or local level, or to find out if Deshea has a probation or parole officer who can identify her location or assist in making a connection. Wendy tries to find Deshea's contact information through other publicly available data resources and Google searches.

Cindy, Wendy, and other members from our Member Outreach Team are unable to locate Deshea through the measures described above so they collaborate with our regional partner for additional "feet on the street" outreach initiatives.

Rick, a field based team member from one of our partner organizations, helps Cindy and Wendy look for Deshea. Rick frequently searches areas surrounding the shelter where Deshea was last seen. Rick also strategically enlists the assistance of each shelter and other community-based organizations we identified through the HMIS that may provide services to Deshea, again asking them to contact us and provide her with our contact information if she receives services at their location in the future.

After using all of these methods to locate Deshea, Cindy finally made contact with Deshea with the assistance of Rick on February 21. Typically, we locate members who are homeless at the homes of family or friends, or we find them at a different shelter location. However, Deshea's situation was more complicated. Rick found Deshea living on the streets, in an alley behind a local grocery store, not far from the shelter she resided in until December 27. He learned that she was escaping from family and friends after the holidays following a dispute. She resisted all services so she could remain hidden and live in seclusion.

Strategies and Data Sources We Use to Establish and Maintain Contact

As soon as Rick finds Deshea, he shifts his priority to establishing and maintaining a supportive relationship with her to make sure that she will engage with us and will access necessary services and supports for her health and well-being. Rick understands that building strong relationships with a member is essential to establishing trust and understanding individual circumstances. He understands that there may be legitimate barriers that prevent her from accessing services. These barriers range from being unaware of services and supports available, to more complicated barriers like problematic experiences with child protection services, homeless shelters, or mental health facilities. He knows that Deshea may have addictions or other real or perceived barriers to receiving services.

Rick explains to Deshea that there are many services and support options to help her move off the streets. He provides her with multiple locations where Cindy can meet with her face-to-face to explain her benefits and connect her with services. Rick explains that they could meet her at places like the community center, shelter, or other young-adult friendly meeting spaces. He encourages Deshea to choose anywhere she feels comfortable and that he would make it work. Due to Rick's patience and persistence in gaining Deshea's trust, Deshea agreed to meet Cindy

**EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)**

at a community center. Cindy immediately helped identify Deshea's barriers to returning to the shelter where she previously resided. Cindy works with Deshea to find alternative placement options and services to get her off the streets immediately.

Cindy takes a holistic approach and collaborates with Deshea to identify her goals, needs, and preferences for obtaining access to the services and supports she needs and desires. Using a trauma informed and person-centered approach, Cindy works with Deshea to assess her strengths as well as her educational, employment, nutritional, and transportation needs and makes community connections for services and provides support including a bus card, a cell phone, and food and clothing referral. She carefully assesses Deshea's circumstances to identify social and health care needs, including mental health needs; service for sexual assault, sex trafficking, or sexual/physical abuse; and sexual identity. Cindy's holistic assessment helps connect Deshea to the services that she can benefit from. Through the HMIS client tracker, Cindy identifies and monitors what community-based services Deshea receives. She uses the HMIS to make sure that Deshea is receiving the community-based supports that Sarah referred her to, collaborate with other organizations as needed, and identify and fill service and support gaps.

AND EVALUATION CRITERIA (10-2-17)**

[REDACTED]

[REDACTED]

[REDACTED]

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The adequacy of the respondent's approach in addressing the following:
 - (a) Identification of strategies for identifying new enrollees; and
 - (b) Description of the sources of data/information that will be utilized to identify enrollees with special health care needs or circumstances.
2. The extent to which the respondent describes its process for contacting enrollees, including the data sources.
3. A description of how network providers and community partners will be engaged in the identification process.

Score: This section is worth a maximum of 20 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

F. OVERSIGHT AND ACCOUNTABILITY

SRC# 26 – Subcontractor Oversight (Statewide):

The respondent shall list any proposed subcontractors to which it will delegate the management of: provision of covered services, utilization management, provider networks or paying providers. The respondent shall describe how it will oversee and monitor the performance of subcontractors in general, as well as any specific oversight planned for certain subcontractors, including any corresponding service level agreements. The respondent shall include in its response the schedule and type of monitoring and how findings are reported, remediated, and used for process improvements.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health views subcontractors as valued partners in delivering the highest quality services to enrollees (members), providers, and the Agency. Through a comprehensive vetting process, we select top-level qualified subcontractors who can best serve our members. Our subcontractors represent an extension of Clear Health and the services we deliver to our members. We build trusted, collaborative, long-standing relationships with our subcontractors to coordinate seamless delivery of services that meet AHCA requirements.

We maintain an established Subcontractor Oversight Program, refined over our 14 years of serving members in Florida Medicaid programs. We will continue to use and enhance this program to assure timely, appropriate, and quality care and services. Further, we include detailed requirements and service level agreements (SLAs) in our subcontractor agreements, set clear expectations of how we measure performance and boundaries of what is acceptable, and specify the consequences for non-compliance.

Our program enables us to continuously oversee and monitor subcontractor performance through daily collaboration, regular monitoring, and formalized auditing processes. Throughout the life of our Contract, Clear Health will retain sole responsibility for fulfilling SMMC Contract requirements and remain fully accountable for our subcontractors' performance. We will continue to oversee, monitor, supervise, and enforce Contract compliance, as well as promote frequent, open, and effective communication that emphasizes delivery of quality services to members. We monitor subcontractors to assure they meet or exceed Contract requirements.

Our Subcontractor Oversight Program leverages a dedicated local health plan team supported by national subcontractor management resources. Our dedicated Florida-based Vendor Delegation Oversight Group (VDOG) oversees and monitors subcontractor performance. Led by Judi Peterson, our Staff Vice President of Operations and System Solutions, VDOG includes four full-time dedicated staff. The VDOG team has support from executive leadership and departments

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

across Clear Health, including Provider Relations, Member Services, Compliance, Regulatory, Operations, Utilization Management (UM), and Medical Management.

While we delegate some functions to subcontractors, we believe that maintaining complete visibility into the volume and topics of member grievances and appeals is a critical component of subcontractor oversight. For this reason, Clear Health maintains direct responsibility for all member grievances and appeals. We hold ourselves accountable for all aspects of our plan, and we believe that member concerns provide us with valuable insight into subcontractor performance. We do not delegate any member grievances and appeals, including for services provided by our subcontractors, such as pharmacy, dental, vision, and transportation. Our Florida-based team oversees the entire process (intake, investigation, and resolution), working closely with our subcontractors. We instruct subcontractors to forward any member grievances and appeals to Clear Health.

In the sections below, we list our proposed subcontractors and describe our Subcontractor Oversight Program, which includes three main phases:

- Selection and Pre-delegation Assessment – confirming the subcontractor can meet operational, financial, legal, compliance, regulatory, accreditation, and ethical standards
- Ongoing Oversight and Monitoring – regular, consistent, and detailed monitoring and oversight of the subcontractor’s delegated functions and financial solvency
- De-delegation or Termination
 - De-delegation – transitioning delegated functions away from the subcontractor if business needs change or if a subcontractor becomes unable to adequately perform a delegated function (such as removing subcontractor responsibility for UM)
 - Termination – activating our contingency plan in the event a subcontractor is unable to continue operations or if subcontractor becomes unable to perform the functions stipulated in the contract

1. SUBCONTRACTORS WE PROPOSE TO USE UNDER THE SMMC PROGRAM

Clear Health proposes 12 subcontractors to support our SMMC program across provision of covered services, UM, provider networks, or payment of providers, including:

- Provision of covered services, UM, provider network, and payment of providers
 - Beacon Health Options (Beacon): Behavioral health services
 - Chiro Alliance Corporation: Chiropractic services
 - DentaQuest of Florida, Inc. D/B/A EyeQuest: Vision services
 - Health Network One, Inc. (HN1): Therapy services (occupational, physical, speech)
- Provision of covered services, provider network, and payment of providers
 - Audiology Distribution, LLC D/B/A HearUSA, Inc.: Audiology/hearing services
 - DentaQuest of Florida, Inc.: Dental services
 - Express Scripts, Inc.: Pharmacy services

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- LogistiCare Solutions, LLC (LogistiCare): Non-emergency transportation services (Regions 1 through 9)
- MCT Express, Inc.: Non-emergency transportation services (Regions 10 and 11)
- Ride2MD, Inc.: Non-emergency transportation services (all regions)
- Administrative/support services and UM
 - Anthem, Inc. (Clear Health's ultimate parent company): Administrative/support services, including payment of providers and UM
 - AIM Specialty Health: UM, including radiology

All of these subcontractors already provide services under our existing Florida contracts and have demonstrated their ability to partner with us to meet the needs of members, providers, and the Agency. As we merged the health plans into one, we selected the best performing, most collaborative, most responsive, and innovative subcontractors based on our experience, and chose those that will best meet the needs of our SMMC members.

1.1. Subcontractor Selection and Pre-delegation Assessment

Our subcontractor selection process is driven by multiple data sources and clearly defined expectations. We carefully select our subcontractors only after we thoroughly evaluate and determine that they will improve the quality, efficiency, and value of services we deliver to our members and providers. Once Clear Health identifies the need for a subcontractor, Provider Relations identifies entities capable of delivering the service. They meet with each prospective subcontractor to discuss the requirements (including service levels) and capabilities. Provider Relations then executes a side-by-side comparison of the organizations and selects the entity that will best serve our Florida program.

We use a rigorous process for selecting our subcontractors and perform pre-delegation audits and reviews. Subcontractor selection and pre-delegation assessment is a collaboration between Clear Health and the national team and includes the following major tasks:

- Complete subcontractor identification, meetings, review, evaluation, and selection
- Develop agreement, including clear definition of delegated functions, expectations, and SLAs
- Conduct pre-delegation assessment
- Submit to the Agency for approval
- Implement agreement, including training, policies and procedures, and testing of interfaces

As part of the selection and pre-delegation assessment phase, we evaluate the subcontractor, which includes a written review of the subcontractor's understanding of the standards and delegated tasks, appropriate documents, staff capabilities, financial stability, performance record, and a review of State licensing and certification requirements. The process also includes an evaluation of the subcontractor's adherence to NCQA and Accreditation Association for Ambulatory Health Care (AAAHC) subcontractor standards. Evaluation often involves an on-site visit at the subcontractor's place of business.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

After determining that the subcontractor is qualified, a pre-delegation audit confirms that the proposed organization meets Clear Health's and AHCA's operational, financial, legal, compliance, regulatory, accreditation, and ethical standards. We examine items such as the organization's HIPAA privacy and security compliance, grievance and appeals history, operating procedures, staffing ratios, and financial viability. When possible, we also check credible references in the industry about subcontractor service delivery. After the subcontractor passes the pre-delegation audit, Clear Health submits information on the proposed subcontractor and the delegated functions to AHCA for approval.

Our written agreements with subcontractors comply with all Florida statutes and are subject to their provisions. Agreements define roles and responsibilities, performance standards, SLAs, quality assurance requirements, reimbursement, financial responsibilities, hold-harmless provisions, insurance requirements, privacy and security requirements, data exchange and reporting requirements, and record retention. We will continue to provide copies of subcontractor agreements to the Agency.

After subcontractor selection, functional departments across our health plan begin meeting to discuss expectations and service levels in each area. These initial discussions lead to pre-implementation meetings where functional departments confirm subcontractor compliance with detailed requirements and discuss required operational processes, including a review of policies and procedures and test files.

2. SUBCONTRACTOR OVERSIGHT STRUCTURE

Our dedicated, Florida-based VDOG team is the central component of our subcontractor oversight structure. VDOG receives support from the executive leadership of our organization as well as participation of functional departments across Clear Health, such as Provider Relations, Member Services, Compliance, Regulatory, Operations, UM, and Medical Management.

Clear Health created the VDOG team to expand and enhance our local Subcontractor Oversight Program, creating a team with diverse skills, knowledge, and expertise. To comprehensively monitor and oversee subcontractors as well as bring value to the partnership, our team includes staff with direct experience in the functions our subcontractors perform. The VDOG model represents another example of the strength that comes from combining the best practices and capabilities of three health plans. Our model combines a strong local oversight model focused on the unique needs of Florida with the significant experience of a national model that supports affiliates across the country.

Figure 26-1 in Attachment SRC# 26-1: Subcontractor Oversight shows an organizational chart of our subcontractor oversight structure, including participation of executive level staff and support delivered by other Clear Health departments as well as national subcontractor oversight teams and committees. The chart also includes short biographies of our VDOG team members, highlighting the experience and expertise they bring to our Subcontractor Oversight Program.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

VDOG assigns an Account Manager to each subcontractor to conduct day-to-day management, oversight, and performance review. This approach builds trust between our organization and our subcontractors, and also allows us to be proactive in resolving any issues that may arise, which helps mitigate any compliance issues. Account Managers possess many years of knowledge and experience that allow them to function as a subject matter expert in areas such as call center operation, provider relations, and claims processing. A dedicated Business Analyst provides the team with data analytical support.

The responsibilities of the VDOG cover all aspects of our relationship with the subcontractor. In this capacity, the VDOG team:

- Manages the relationship day-to-day at an operational level
- Identifies strategic relationship needs and issues, or addresses need for additional capacity or capabilities
- Manages daily and ongoing operational compliance according to the operational area's framework, tools, and processes
- Reviews operational performance tracking standards and measures against SLAs through monthly Key Performance Indicators (KPI) reports and other operational reports
- Requests, implements, and tracks any Corrective Action Plans (CAPs) to resolve identified deficiencies and reports to leadership, compliance, and the national team
- Maintains centralized online repository of subcontractor contact and performance data – the VDOG Dashboard – and assists with the development and planning of communications and dissemination of information
- Leads quarterly Joint Operational Committee meetings that include key business units to review subcontractor performance, KPI reports, and other issues or initiatives

The VDOG team maintains a focus on continuous improvement. Team members and leadership continuously review processes to strengthen what is working and implement change where we identify a better way. Clear Health's goal will always be to deliver the highest level of service to our members, regardless of who provides the service.

The VDOG team leverages resources from our national Enterprise Delegation Oversight and Management (EDOM) department, especially in the review of subcontractor financial stability, annual audits, and oversight of subcontractors who also serve our affiliates in other states. Due to the unique nature of administering pharmacy benefits, the national Pharmacy Performance Oversight Council (PPOC) will continue to monitor the performance of Clear Health's pharmacy subcontractor to make sure that performance meets all regulatory and accreditation standards (such as NCQA, AAAHC, CMS, URAC, State, and federal regulations).

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Key national committees deliver cross-functional management and support to our Subcontractor Oversight Program. The Delegate/Vendor Oversight and Management Committee (DVOMC) meets monthly and is the final internal approval authority for subcontractor delegation and oversight. Participation at the national level offers key benefits, including:

- Consistency in management, expectations, and remediation/corrective actions as well as a high-level review of performance across all markets/states to better identify trends
- Identification of best practices and innovations in other states that may benefit Florida
- Proactive identification and mitigation of performance variance in a single state, often avoiding impact on other markets

2.1. Executive Level Participation

Clear Health's subcontractor oversight structure includes executive-level participation from across the organization. We embrace our responsibility for the functions our subcontractors deliver under our SMMC Contract and our executives are instrumental in making sure that subcontractor services remain aligned with AHCA standards and program requirements.

Judi Peterson, the leader of the VDOG team, has direct and immediate access to our Plan President, Lourdes Rivas, to address any concerns or risks. The executive team meets every other week to discuss strategy, confirm that performance is on track, review action plans, share successes, and discuss risks and mitigation. Subcontractor strategy and performance is a component of these meetings. In addition, the entire executive leadership team is part of the Florida Medicaid Compliance and Quality Management Committees where VDOG reports on status, CAPs, and risks.

VDOG holds a quarterly Joint Operations Committee meeting with each subcontractor to review and discuss performance, issues, gaps, concerns, operational enhancements or challenges, and any upcoming new or changed policies. These meetings include key members of the executive team, including Efrain Duarte (Regional Vice President of Provider Solutions), Dr. Vincent Pantone (Chief Medical Officer), Suzanna Roberts (Chief Operating Officer), and Holly Prince (Regional Vice President of Finance).

In addition, we review with the executive leadership team and discuss any subcontractor concerns that lack commitment of improvement and directly impact the quality and care of our members. This executive review includes discussions of next steps and potential subcontractor change.

2.2. VDOG Dashboard

Our VDOG Dashboard is a comprehensive repository of detailed information on each of our subcontractors. It promotes transparency of information and consistency in management and oversight. Maintaining a centralized repository also allows other VDOG team members to easily manage the subcontractor and make sure we continue to meet day-to-day operational excellence if the assigned Account Manager is out of the office. The VDOG Dashboard contains comprehensive information, including:

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- VDOG team information, such as contact information, meeting minutes, and reference materials (including website links), documents, and other information
- A list of subcontractors, along with detailed information for each, including:
 - General information, such as legal name, physical address, and correspondence address; contact names, numbers, and e-mail addresses; delegated functions; programs and regions; VDOG Account Manager and Business Owner
 - Subcontractor agreement
 - Scorecard for the current month and historical
 - Reports submitted, including operational and KPI
 - Corrective Action Plans (current and historical)
 - Document repository, containing policies and procedures, and meeting minutes
- Reports Calendar, listing due dates for reports and information due from subcontractors
- Task Tracker, listing activities for implementation of policy changes or special projects at the team or subcontractor level and tracking progress and completion

Figure 26-2 in Attachment SRC# 26-1: Subcontractor Oversight shows several screen shots of our VDOG Dashboard, including the home page and the scorecard for one of our subcontractors.

3. USE OF SERVICE LEVEL AGREEMENTS CONSISTENT WITH THE SMMC PROGRAM

Clearly defined expectations and consistent monitoring of performance against them is a key component of our Subcontractor Oversight Program. Clear Health executes written agreements with each subcontractor that detail the delegated functions, performance standards, SLAs, and reporting responsibilities. The agreements also specify the actions we will take to address inadequate or substandard performance, such as development of a CAP, financial sanctions, and termination. If at any time performance does not meet requirements, we will take action and work closely with the subcontractor toward a resolution and a return to complete and ongoing compliance.

We outline specific SLAs for each function we delegate to the subcontractor. SLAs are never less stringent than AHCA requirements in the SMMC Program Scope of Services. If AHCA modifies a standard, we amend the subcontractor agreement to reflect the change. We currently hold our subcontractors to SLAs that meet AHCA requirements, including the following samples:

- Timely claims payment, pay or deny
 - 50 percent of all clean claims within 7 days
 - 70 percent of all clean claims within 10 days
 - 90 percent of all clean claims within 20 days

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Timely processing of authorization requests
 - Process 95 percent of all standard authorizations within 14 days
 - Average turnaround time for standard authorization requests is seven days or less
 - Process 95 percent of all expedited authorization requests within three business days
 - Average turnaround time for expedited authorizations requests is two business days or less
- Call center performance
 - Average speed of answer of less than 30 seconds
 - Call blockage rate of less than 0.5 percent
 - Call abandonment rate of less than 3 percent

Where appropriate, Clear Health requires subcontractors to meet more stringent SLAs. For example, we require that our transportation subcontractors meet on time performance metrics for each drop-off and pick-up leg.

Our approach to subcontractor oversight is data driven. Clear Health monitors subcontractor performance against SLAs in several frequencies (daily, weekly, and monthly) and methods. One key tool is our KPI report. Subcontractors submit the KPI report each month to provide us with statistics and detailed data to document and demonstrate their performance against delegated functions. We customize the KPI report template for each subcontractor, listing performance elements specific to the services they provide. If the performance element has an SLA, the KPI report tracks performance. The report documents a rolling 13 months of statistics, allowing us to easily identify and monitor trends. Figure 26-3 in Attachment SRC# 26-1: Subcontractor Oversight provides a sample of a KPI report.

In addition to the comprehensive monthly KPI reporting, we receive daily and weekly data from some subcontractors. The VDOG team and other Clear Health functional areas use this information to support monitoring and clinical operations. For example, our behavioral health subcontractor submits a daily clinical census report and weekly clinical authorization reports related to pending appointments after discharge and pending discharge. We also receive daily member call center complaint logs from our transportation subcontractor that give us greater visibility into member needs and satisfaction levels. To confirm compliance with network access and availability requirements, we use “secret shopper” techniques to make sure providers indicated as having open panels are accepting new patients and are complying with appointment availability standards.

3.1. Working with Subcontractors on Process Improvements

Clear Health will always strive to improve the level of service we deliver, and we expect our subcontractors to do the same. During our subcontractor oversight and monitoring, we seek out opportunities to “raise the bar” and deliver better service. The VDOG team and departments across Clear Health collaborate with subcontractors to identify ways to improve performance, processes, and member care, such as the following recent examples:

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- **Beacon – Integrated Rounds on Complex Members.** To better integrate the physical and behavioral health needs of members who have complex needs, Clear Health holds monthly rounds with Beacon that include Clear Health's physical health and behavioral health Medical Directors, Beacon's behavioral health Medical Director, and the case management staff from Clear Health and Beacon. These integrated rounds help address transition and coordination of care issues and the needs of our members holistically, particularly those who may be challenging to engage or have highly complex situations.
- **LogistiCare – Improving On Time Performance.** As part of our oversight of transportation, we requested more detailed trip data. In our analysis, we discovered that one-third of late pick-ups were attributable to two specific downstream providers (transportation companies). The VDOG reviewed the findings with LogistiCare, and they worked to improve performance through driver education, performance improvement plans, and termination. LogistiCare also added increased data analysis as part of their operational processes to identify similar situations more quickly.
- **Health Network One – Cost Effective Service Delivery.** Clear Health worked with HN1 to make sure that our members obtain therapy services in the most cost-effective setting that can provide appropriate care. Since implementation of new processes, services for more than 300 members have been successfully redirected to a more appropriate care setting. Clear Health also worked with HN1 and hospitals to identify where a hospital setting is appropriate so members are not redirected to the office setting.

4. APPROACH TO MONITORING THE QUALITY OF WORK OF SUBCONTRACTORS

As discussed earlier, our Subcontractor Oversight Program begins with a thorough, rigorous evaluation process to confirm that subcontractors meet operational, financial, legal, compliance, regulatory, accreditation, NCQA/AAAHHC, and ethical standards. Our written subcontractor agreements clearly define delegated functions, expectations, all required provisions, and performance standards, SLAs, and metrics. Subcontractor training includes Clear Health policies and procedures; program-specific information; HIPAA; fraud, waste, and abuse; cultural competency; and more.

Once subcontractors are operational, our program includes activities that enable us to closely and continuously monitor their performance and financial stability to confirm members are receiving the highest quality services. We tailor our program to the functions and services each subcontractor provides, and the scope and frequency of oversight activities reflects the nature of the role, responsibilities, and service nuances.

Our program's flexibility means we can easily expand in scope or increase in frequency our oversight activities based on issues or complaints we see from members or AHCA. We often have ad hoc meetings with subcontractors throughout the month for special projects or communications that we need to discuss. Meetings may include collaborating on activities to improve performance, discussing implementation of new technology to optimize operations, or requesting updates on a new program to reduce complaints. We customize each meeting to the current activities and operations of the subcontractor.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In the sections below, we describe the frequency (daily, weekly, monthly, quarterly, and annual) and type of monitoring activities we perform. We provide separate discussions on report and data file submissions and implementation of policy changes. Following the discussion of monitoring activities, we describe new initiatives underway to enhance our Subcontractor Oversight Program. Because of the unique nature of administering pharmacy benefits, we discuss the frequency and activities for monitoring our pharmacy subcontractor in a separate section.

4.1. Daily Management, Oversight, and Problem Solving

Account Managers communicate and collaborate with subcontractors daily. They discuss performance matters (urgent and routine), answer questions, problem solve, and identify and discuss areas of improvement, especially related to escalated member or provider concerns. With extensive experience in the operational areas critical to subcontractor performance (call center operation, provider relations, claims adjudication, and configuration), our Account Managers use their critical problem-solving skills to assist subcontractors.

This close and frequent interaction fosters a collaborative, trusting relationship between Clear Health and our subcontractors. Our subcontractors view Clear Health as part of their team, often giving us earlier insight into any management, operational, or financial changes that may affect performance.

4.1.1. Specific Oversight for Transportation

Clear Health knows that transportation and the benefits available can be a challenge for members, providers, health plans, and state regulators. Recognizing that transportation issues have been a point of concern for AHCA and stakeholders in the past, we established specific activities for overseeing our transportation subcontractors.

We use data to monitor performance of transportation subcontractors and providers. The VDOG receives monthly transportation performance data from subcontractors, grievance and appeal data from plan staff, and daily ride and complaint information through direct access to subcontractor systems. Through data analysis and trending, we compare data to SLAs for each subcontractor to identify performance issues. If we see issues, we work with subcontractors to develop strategies to improve performance whether through an informal action plan or the more formal CAP process.

In addition, we recently added additional performance measures related to on-time performance for members receiving dialysis and chemotherapy, as well as hospital and nursing facility discharge timely pick-up. We monitor these performance metrics closely and react quickly when we see issues.

Beyond data, we also use the subcontractor's onsite visit reviews to monitor transportation services our members receive. LogistiCare sends staff to dialysis centers throughout Florida to observe transportation providers as they drop off members for treatment and pick them up to take them home. They observe timeliness, customer service, and vehicle conditions to identify areas of concern for prompt follow-up.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

4.2. Weekly Scheduled and Ad Hoc Touch Base Meetings

A series of regularly scheduled weekly meetings, detailed below, are a key part of our Subcontractor Oversight Program. Having a scheduled time to discuss open items helps us address issues promptly and thoroughly. An agenda and minutes provide structure and documentation of topics discussed, decisions, and action items.

The VDOG team has an internal touch base meeting every Thursday to discuss each subcontractor's open items, concerns, and any potential risks. They also review the Task Tracker for open issues, policy changes, or special projects that affect the subcontractor (such as implementation of updates for notice of adverse benefit determination letters or quarterly waste report implementation).

We hold weekly or bi-monthly meetings with each subcontractor. Meetings include the Account Manager and representatives from other Clear Health or subcontractor teams (such as call center, grievances and appeals, claims, encounters, or information technology) based on the open items. Weekly meetings focus on a variety of topics, including performance, SLAs, member grievances, and progress on implementing policy changes.

Every other Monday, the VDOG team meets with the Compliance team to discuss open issues, trends, and any potential impacts and to monitor the subcontractor's ongoing compliance with contract requirements. These regular, small group meetings promote detailed discussions about subcontractor performance, brainstorming of interventions, and discussion of current CAPs and associated risk.

As necessary, ad hoc meetings with executive leadership and the Compliance team provide a forum to review subcontractor innovations, set expectations, review issues, and address escalated matters.

4.3. Monthly KPI Report Submissions and Review Meetings

As a critical and more formal component of our Subcontractor Oversight Program, we carefully review monthly subcontractor report and data submissions and performance against the SLAs specified in the subcontractor agreement. Open communication, collaboration, and partnership toward the service of our members remains a top priority. Monthly subcontractor oversight activity includes the following:

- Subcontractor submission of KPI report
- Internal VDOG meeting to review KPI reports
- Account Manager operational meeting with subcontractor to review KPI report
- Call center calibration meeting with subcontractors
- VDOG presentation at Compliance Committee meeting
- VDOG meeting with the Director of EDOM

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

On the 15th of every month, subcontractors submit their KPI report. Upon receipt, the VDOG Business Analyst checks data integrity to document timeliness and completeness, and then scores the KPI report. Specific measures have weights, typically functions that influence the member experience/satisfaction. Scoring information is calculated and posted to the Scorecard section of the VDOG Dashboard, including a score for each component, a weighted overall score, and a final “grade” (such as A, B-, or C+). The Scorecard becomes a readily available visual representation of the subcontractor’s monthly performance.

We hold an internal VDOG team meeting to conduct a detailed review of each subcontractor KPI report and identify areas to discuss with the subcontractor. During the review, we evaluate the performance reported against standards and SLAs. We also look at trends, noting where performance is improving or still meeting requirements, but is trending down.

The Account Manager holds an operational meeting with subcontractors using online meeting technology to review their KPI report, going section by section through the report to discuss performance, trends, and any issues. The Account Manager will ask for an explanation behind any areas where there is a performance concern, and collaborate on intervention, remediation, and other opportunities for improvement. The agenda also includes review of any ongoing plans (informal action items or CAPs), discussing progress, outcomes, and continued areas for improvement. The meetings provide a forum to discuss issues and brainstorm potential solutions. Our Grievance and Appeal Director attends the meeting to review the topics of member grievances and appeals and discuss any concerns. Our experience shows that transparency and open, constructive dialogue is critical to maintaining a collaborative partnership and seamless service delivery to members.

We hold a call center calibration meeting with each subcontractor who is delegated for Member Services and include representatives from our Member Services department. The primary purpose of the meeting is to make sure we are providing consistent information and quality of service to all of our members – regardless of which organization handles the call. During the meeting, we review the call log to identify opportunities to improve service and collaborate on process improvements that would better serve member needs. The extensive call center experience of our VDOG Account Managers has proven instrumental in helping our subcontractors improve the member experience.

The Florida Medicaid Compliance Committee meeting brings together executive leadership and departmental Directors from across Clear Health and our national support services teams to present updates across functional areas, such as compliance, regulatory, operations, clinical, call center, and provider services. During the subcontractor management portion of the agenda, VDOG reports on each subcontractor, including general updates, KPI performance, issues/risk by functional area, and any CAP updates.

VDOG meets with the Director of EDOM each month to discuss our Florida subcontractors. The meeting covers a variety of topics, including subcontractor responsiveness to annual audits, progress on CAPs, and financial solvency, or other risks. VDOG also receives monthly reports from EDOM’s DVOMC meeting, and the meeting with the Director of EDOM provides an opportunity to review the report’s summary on our subcontractors. Discussions between VDOG, Compliance, and the Director of EDOM help make sure that oversight activities are aligned for appropriate follow up or collaboration.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

4.4. Quarterly and Annual Reviews

VDOG holds a quarterly Joint Operations Committee meeting with each subcontractor to review and discuss performance, issues, gaps, concerns, operational enhancements or challenges, and any upcoming new or changed policies. The meeting includes executive leadership and department directors, including the Grievance and Appeal Director. We invite EDOM to the meeting to address any outstanding items required for audit completion or deficiencies identified on the annual audit. This meeting is an open forum to ask questions or discuss trends, concerns, or expectations.

Quarterly and annual oversight activities also focus on reviews and audits. VDOG receives and reviews reports of the quarterly financial reviews and the annual audit. Quarterly and annually, delegated subcontractors submit their financial statements for a careful review (discussed in detail later in our response to this SRC).

In addition, EDOM performs an annual audit to confirm that each delegated subcontractor meets operational, financial, legal, compliance, regulatory, accreditation, NCQA/AAHC, and ethical requirements. EDOM maintains a schedule for each subcontractor's annual audit and a comprehensive set of audit tools for each type of function that may be delegated to subcontractors (such as network management, credentialing, claims processing, call center, and UM). A global tool addresses areas such as HIPAA privacy and security; fraud, waste, and abuse; cultural competency; disclosure of ownership; and record retention. Each audit tool lists a series of audit elements applicable to the function and the evidence required to assess compliance.

During the audit, EDOM reviews each element, decides whether the subcontractor is compliant or non-compliant, and documents the evidence. The audit process includes review of documents such as policies and procedures, financial statements, member complaints, employee and provider training documents, provider contract templates, credentialing committee minutes. For subcontractors with provider credentialing, authorization, and claims processing responsibilities, sample files are randomly selected for audit. EDOM presents audit findings to VDOG and the DVOMC.

4.4.1. Subcontractor Contingency Plan Review

Clear Health maintains a contingency plan for each subcontractor that we can activate if we find it necessary to terminate a subcontractor, especially in the event of financial insolvency (potential or actual) since it would compress the timeline. We perform annual activities to keep the contingency plan current and viable such as:

- Confirm the viability of the approach (bring in house, implement an alternate vendor, or a combination)
- Update the size and scope of the subcontractor (programs/lines of business, functions, regions, and number of members affected)
- Confirm contact information for alternate vendor representative (if part of the approach)

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Analyze encounter data to create list of top providers
- Review default provider agreements

4.5. Subcontractor Report and Data File Submissions

Clear Health requires subcontractors to submit two primary types of reports: data we need to fulfill AHCA's regulatory reporting requirements and operational information to monitor their performance against standards, including the KPI report. Account Managers maintain a schedule of due dates for both types of reports (posted on the VDOG Dashboard) and reach out promptly if the submission is late, incomplete, or inaccurate.

For all reports, we identify an internal due date prior to the Agency's deadline to provide time for a thorough quality review. When we receive reports, the first step is a set of data integrity checks to confirm timely submission, completeness, and compliance. Subcontractors also submit a monthly KPI report so that we can monitor and manage their performance against a defined set of metrics and SLAs.

Clear Health also requires each subcontractor to submit data files, including member encounter data, on a specified schedule and in full compliance with AHCA requirements as described in the Medicaid Companion Guides. We document the schedule (frequency and day/time) as well as the format and secure transmission method. If we do not receive a file on its due date, an email alert notifies the Account Manager and prompts outreach to the subcontractor to ascertain the status and reason for the delay. We also maintain a schedule for data files we send to subcontractors, including member enrollment data (X12-834 enrollment file).

VDOG works with the Encounter Audit and Medical Economics teams to monitor subcontractor encounter data and submission. The Encounter Audit team uses the Clear Health Analytics business intelligence dashboard to track subcontractor encounter data. Any gaps in submission or drops in overall volume are noted, and the Encounter Audit team reaches out to the VDOG to facilitate outreach and additional training or other intervention. The VDOG participates in the weekly Encounter Task Force meetings where a cross-functional team reviews the BI dashboard monitoring reports, identifies issues, and manages the corresponding remediation.

Each subcontractor has a designated day for encounter submissions. The Account Manager receives an alert if a submission is not received according to the established schedule. Regular monitoring facilitates outreach to our subcontractors to confirm that they submit their encounters timely. Clear Health reconciles encounter submissions to subcontractor payment data as part of our oversight process. VDOG escalates non-responsive subcontractors to executive leadership for resolution. A trend of late or incomplete encounter submissions will result in a CAP or other intervention.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

4.6. Management and Oversight of Policy Changes

Our Subcontractor Oversight Program includes defined processes to make sure that new or changed AHCA policies or other information are clearly and consistently communicated, managed, implemented, and verified by our subcontractors.

For example, when AHCA issues a new or changed policy, including ineligible and sanctioned provider lists, our VDOG works with our Regulatory and Compliance teams to evaluate the policy and determine if any subcontractors are affected and to what extent. Based on the nature and complexity of the change, the team documents a plan for notification, implementation, and verification.

The team tracks each subcontractor's plan and progress in the Task Tracker portion of the VDOG Dashboard. A documented process and centralized tracking system allows us to manage on-time, accurate implementation for each subcontractor and provides a vehicle to continue to work with those facing challenges. We have the subcontractor submit an attestation and documented proof that the change or task was completed.

4.7. New Initiatives to Enhance Subcontractor Management and Oversight

Quality is fundamental to everything we do, and Clear Health operates under a culture of continuous improvement. We encourage every health plan employee to identify initiatives or process changes to help us improve efficiency and deliver better value to our members, providers, subcontractors, the Agency, and other stakeholders. The VDOG team is currently implementing two new initiatives that will deliver tangible benefits to our subcontractors, which helps them deliver better services to our members.

Our new Vendor In-Service will provide focused orientation and training for new subcontractors. We are modeling these sessions after our successful provider education program and designing modules specifically targeted to our subcontractors. We will hold Vendor In-Service programs using multiple formats: in-person, webinars, and conference calls. We will also hold sessions at a subcontractor site and invite others to participate through online conferencing technology. In addition to new subcontractors, we will hold Vendor In-Service sessions for those already operational when there are significant changes in programs, policy, or when there are changes in their leadership team. We will hold our first Vendor In-Service in January 2018.

We are also creating a Vendor Handbook, incorporating the lessons learned from developing and refining our provider handbook. The Vendor Handbook will supplement our Vendor In-Service program, giving our subcontractors a binder of important and useful information they can reference at any time. The Vendor Handbook will have sections across the spectrum of subcontractor interactions with Clear Health, including:

- Contact information
- Overview of each program: MMA, LTC, and specialty plan
- Meeting schedule
- Required report submissions with associated due dates, format, and submission process

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Encounter submission, including submission requirements and how to correct and resubmit encounters that fail edits
- Definitions and appropriate routing for complaints, grievances, and appeals
- Description of delegated functions and AHCA's language requirements for the function
- Responsibilities for identifying, detecting, and preventing fraud, waste, and abuse
- Annual audit requirements, including process and expectations
- Process to manage issues or areas of non-compliance, including setting expectations for compliance and interventions we employ to address performance issues
- Required compliance with telecommunications regulations and the Clear Health Do Not Call policy for member outreach activities, including how to get help from Clear Health
- Useful references, including Medicaid handbooks, telephone numbers, and e-mail addresses for key external resources

We will distribute our Vendor Handbook to each subcontractor's leadership team in January 2018. Figure 26-4 in Attachment SRC# 26-1: Subcontractor Oversight shows the cover and table of contents for our Vendor Handbook.

4.8. Monitoring the Quality of Work Performed by our Pharmacy Subcontractor

Clear Health requires the same high level of performance from our pharmacy subcontractor, including agreements that specify requirements, expectations, and SLAs; regular comprehensive and detailed performance monitoring; and bi-annual audits. Our national Pharmacy Services Compliance and Audit team maintains primary responsibility for monitoring the performance of our Pharmacy Benefits Manager (PBM).

The pharmacy subcontractor must meet certain performance guarantees specified in their agreement, such as maintaining required pharmacy call center services levels, claims processing, system availability and adjudication response time, pharmacy benefit set up, mail service dispensing accuracy and timeliness, and network pharmacy access. There are required reports associated with each performance guarantee.

4.8.1. Pharmacy Oversight Activities

Responsibility for regular PBM oversight lies with the national Pharmacy Services Compliance and Audit team. The team receives regular monthly and quarterly reports and data files from the PBM. Assigned business reviewers evaluate reports and data files to determine if the PBM's performance complies with requirements and SLAs. They review each function either monthly or quarterly, depending on the function, and identify deficiencies or contractual gaps. Functions reviewed include:

- Claims processing accuracy
- Eligibility processing

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Network access
- Prompt payment
- State or federal provider exclusions/sanctions
- Call center performance
- Network audits
- Fraud, waste, and abuse activity
- Drug utilization review
- Delegated functions such as drug recalls

We implement CAPs to address contractual issues, regulatory/compliance issues, or standing unresolved issues needing resolution. We hold meetings with the PBM every other week to review CAP status and discussion of criteria for closure.

4.8.2. Oversight Audits

In addition, pharmacy subcontractor oversight also includes conducting two formal audits each year. Audits help us verify compliance with the PBM Services Agreement and State, federal, NCQA/AAAHHC, URAC, and Medicaid regulations applicable to PBM functions. The team collaborates with other national business units, including the Reliability Team and pharmacy regulatory mandates subject matter experts, to determine the scope of the audit. National staff and/or an external auditing firm conduct audits. Audit activities may include:

- Developing audit scope in collaboration with the business areas and receiving management approval
- Creating and/or revise audit tools
- Monitoring audit progress and PBM participation/cooperation
- Determining audit deficiencies and opportunities for improvement; if applicable, reaching agreement with applicable business area and creating final report
- Collaborating with legal on final audit report
- Collecting PBM documentation for audit deficiencies, tracking until resolution, coordinating information with applicable business and approval for closure, presenting to PPOC for closure

Oversight audit results and CAPs resulting from audits are reported to our Compliance Officer.

4.8.3. Pharmacy Oversight Committees

Pharmacy subcontractor oversight and monitoring includes two main committees: the PPOC and the Joint Compliance Committee (JCC).

The PPOC monitors the overall performance of all delegated functions related to providing pharmacy operational/clinical service solutions and confirms that performance meets all applicable health plan, regulatory, and accreditation standards (such as NCQA, CMS, URAC, State, and federal regulations). The PPOC meets at least four times each year and includes

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

representatives from key areas, including UM, Medical Directors, Clinical, Appeals/Grievances, Delegation, Finance, Pharmacy Operations, and EDOM). The PPOC was established to:

- Review and analyze performance metrics and information
- Provide recommendations to improve member quality of care and service
- Review and approve PBM oversight audit reports
- Review and approve the PBM's annual UM program, UM work plan, and UM annual report
- Review and approve CAPs
- Supply quarterly reports maintaining linkage between service and clinical
- Assess activities to verify that contract, accreditation, and regulatory requirements are met

The JCC meets every two weeks with the pharmacy subcontractor to discuss new and existing mandates as well as legal, regulatory, and contractual requirements; approve implementation plans to comply with these requirements; and to discuss any legal, contractual, or compliance concerns with the subcontractor and their legal team. If agreement on or resolution of an issue cannot be obtained in the JCC, the issue is escalated.

5. PROCESSES FOR ADDRESSING PERFORMANCE ISSUES

Clear Health's approach to identify and address performance deficiencies centers on establishing and maintaining a partnership with each subcontractor and regular, consistent monitoring. Throughout our relationship with each subcontractor, we maintain clear expectations of how we measure performance, boundaries of what is acceptable, and the consequences for non-compliance.

The Account Manager works daily to identify and discuss resolution of performance issues early – before they become a problem. We supplement our proactive account management structure with robust monitoring, including regular performance reporting, quarterly reviews, and annual audits.

When we identify a performance or operational problem, we immediately address our concerns with the subcontractor. We emphasize the need to evaluate and implement change as quickly as possible, and that we are here to help.

In the sections below, we discuss triggers for increased monitoring or other interventions and the types of interventions we deploy.

5.1. Triggers for Increased Monitoring Activities or Interventions

Every element of subcontractor performance can trigger increased monitoring or interventions, including review of the KPI report, submission of other required reports and data files, complaints or liquidated damages from AHCA, audit results, or a regulatory/compliance requirement. In addition to objective data, we take seriously overall information (sometimes intangible and subjective) the Account Manager and others (internal or external) gain from communication and interactions with the subcontractor. We consider all data sources as triggers to increase monitoring, including:

- Missed SLA

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Change in performance trend, even if still meeting SLA
- Increase in the volume or change in topics of member complaints, grievances, or appeals
- Change in subcontractor management or operational staff
- Complaints or concerns from AHCA
- Complaints from the subcontractor's downstream providers
- Decrease in financial performance
- General concerns from the VDOG Account Manager (including responsiveness)
- Information gained from the field by Provider Relations staff, Case Managers, or community organizations

We review the subcontractor's KPI report and overall performance each month, first internally and then with the subcontractor. During the review, we identify any missed SLAs and ascertain the reason. We also discuss any other concerns outside of SLAs, such as staffing, responsiveness, or member satisfaction. The VDOG will determine the need for increased monitoring or other intervention.

5.2. Interventions

The VDOG applies a series of escalating interventions when we identify issues with subcontractor performance, including increased meeting frequency and data submission, development of an informal action plan, development of a CAP, and financial sanctions. We view interventions not as a punitive action; but rather, a documented process to improve performance.

The type of intervention depends on a combination of factors, including the severity of the issue and historical performance. For example, a single month of missing an SLA will likely result in increased monitoring and an action plan, while missing an SLA in two consecutive months warrants a CAP. We track information about interventions in our VDOG Dashboard.

In the event that interventions are unsuccessful in generating a sustained improvement in subcontractor performance, Clear Health will consider termination.

5.2.1. Increased Monitoring

When we identify any type of concern with the subcontractor's performance or ability to continue to provide a high level of service to our members, we increase the frequency and type of monitoring.

We may move from weekly meetings to daily meetings and may add additional participants from the subcontractor or Clear Health teams. We may also request more frequent submission of current reports or ask subcontractors to submit information (reports or data files) at a lower level of detail. The VDOG, in collaboration with the Compliance Officer, implements the type and intensity of increased monitoring that best fits the situation.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

During discussions with the subcontractor about the deficiency, we will also ask them to conduct a root cause and member/provider impact analysis and submit an informal action plan that documents the steps they will take to remedy the situation and prevent a recurrence. We review the action plan with them, asking for clarification or additional tasks, as appropriate.

5.2.2. Implementing and Monitoring a CAP

There are many situations that would prompt the VDOG to place a subcontractor on a CAP, including:

- SLA missed for more than one month (assuming first month grace period or isolated reason)
- History of the issue indicates a reoccurring trend, even if not in consecutive months
- Severity of the SLA non-compliance, even after the first occurrence
- Audit results showing non-compliance
- Other subcontractor circumstances
 - Network impact
 - Member Service impact
 - Financial impact
 - AHCA imposed CAP or liquidated damages

Additionally, if the subcontractor fails to implement new or revised policies (for example, a revised member letter) by the established due date, a CAP is developed.

When the VDOG identifies the potential need for a CAP, they meet with the Compliance Officer to discuss the areas of concern or non-compliance and make a final decision on the need to impose a CAP. If the decision supports a CAP, VDOG schedules a meeting with the subcontractor to discuss our concerns and request a complete root cause analysis and CAP. We follow this discussion with a formal written request that requests an e-mail confirmation of receipt.

We give subcontractors 15 days to develop and submit a CAP, which must include all of the corrective actions and steps needed to resolve the identified deficiencies; the name and title of responsible parties; and planned/completion dates of each action step. Upon receipt of the CAP, the VDOG and the Compliance Officer review the CAP for adequacy, collaborating with the subcontractor to make sure it addresses all identified deficiencies. VDOG presents final CAP documents to the Compliance committee and EDOM for review and approval.

During development of the CAP, the VDOG may include additional monitoring activities, dashboards to review ongoing metrics, and regularly scheduled meetings with the subcontractor to review progress. Depending on the situation, we may increase meeting frequency, including daily touch base meetings. However, we find that weekly/monthly meetings are sufficient to manage most CAPs. Progress on the action plan is recorded directly in the CAP document. The VDOG provides detailed updates on CAP progress during the monthly compliance meeting. The VDOG also updates the Compliance committee and EDOM on subcontractor progress and CAP closure.

The corrective action monitoring process ends and the CAP is closed when the subcontractor demonstrates ongoing compliance for at least 90 days. CAP information remains in the VDOG Dashboard repository for ongoing reference.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5.2.3. Financial Sanctions

In the event that AHCA assesses liquidated damages based on subcontractor performance, Clear Health will pay the fine and seek reimbursement from the subcontractor. Our subcontractor agreements clearly document that they are responsible for any AHCA imposed liquidated damages resulting from their performance of delegated functions.

5.2.4. Escalation to our Subcontractor Contingency Plan

If interventions are unsuccessful or we see serious systemic problems, Clear Health escalates the concerns to executive leadership and may begin to activate our subcontractor contingency plan. We would initiate a set of preliminary tasks when our review of financial data or other monitoring activities gives us reason to suspect that the situation with a subcontractor may become unsustainable.

Activities are “behind the scenes” and focus on positioning Clear Health for a full activation of our contingency plan, and include the following:

- Confirm approach (such as bring functions in house, sign with alternate vendor, or combination) and contact alternate vendor representative (if applicable)
- Confirm size and scope of subcontractor (programs/lines of business, functions, regions, and number of members affected)
- Request more frequent submission of operational information (reports or data files) from the subcontractor, such as claims listings (paid or denied) and open authorizations
- Generate list of top providers, assign to Provider Network Managers, and build contact plan
- Build staffing model, including identifying positions, number needed, and hiring sources (such as external search firms, temporary agencies, and the subcontractor)
- Begin configuring system with providers, benefits, and claims history (from encounter data)

During this time, we continue to work closely with the subcontractor on remediating the situation. Clear Health will increase the frequency of monitoring and add additional focus to regular discussions.

6. MONITORING THE FINANCIAL STABILITY OF SUBCONTRACTORS

To provide services to our members, Clear Health understands the importance of subcontractors maintaining a strong financial position. Our day-to-day interactions and monthly monitoring activities give us insight into our subcontractors’ financial health. VDOG team members pay careful attention to signs that may indicate problems, such as a drop in claims payment timeliness or an increase in complaints. We discuss any concerns at internal VDOG meetings and meetings with the Compliance team. When necessary, we escalate to executive leadership.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In addition, we regularly review the financial stability of each of our delegated subcontractors. Our Regional Vice President of Finance and national subject matter experts on our Medicaid Financial Analysis team review subcontractor financial documents each quarter. The review focuses on identifying any potential issues as early as possible and implementing any necessary action to avoid any service disruption. We leverage our keen understanding of each subcontractor's financial solvency, the risk to our operations, and ability to serve Florida members as key components in making a decision to implement our Contingency Plan.

Clear Health requires delegated subcontractors to submit unaudited financial statements quarterly and audited financial statements annually. These financial statements include the profit and loss statement, balance sheet, and statement of cash flow. Each quarterly statement is both the respective quarter and year-to-date, so that as the year progresses, the team can see how the subcontractor is performing over time.

During the review, accountants carefully review the entire submission, looking at the strengths and weaknesses and identifying if the subcontractor's financial position shows signs of deterioration. Based on this, we determine whether the subcontractor passes financial solvency. We assign a status to each subcontractor, taking into consideration this quarter's review and the prior quarter. We assign green for passed solvency, yellow for failed solvency for one quarter, and so on.

The Medicaid Financial Analysis team maintains a Financial Summary for each delegated subcontractor that documents the results of each quarterly review and contains a rolling two years of information. The Financial Summary is a key tool that allows the team to review information quarter over quarter and identify trends that may indicate an emerging issue.

Annually, the team reviews the audited financial statements prepared by the subcontractor's auditor. With more detail and the opinion of an auditor, these statements provide additional visibility into the financial stability of the subcontractor.

The team will reach out to subcontractors at any time to get additional information or clarification regarding financial stability and ability to continue serving members. If necessary, the team will request a mid-quarter financial statement from the subcontractor.

6.1. Financial Guarantee

We require a financial guarantee from all new delegated subcontractors, and we are in the process of acquiring financial guarantees on existing subcontractors. However, if a delegated subcontractor misses financial solvency for two quarters, we require a financial guarantee.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

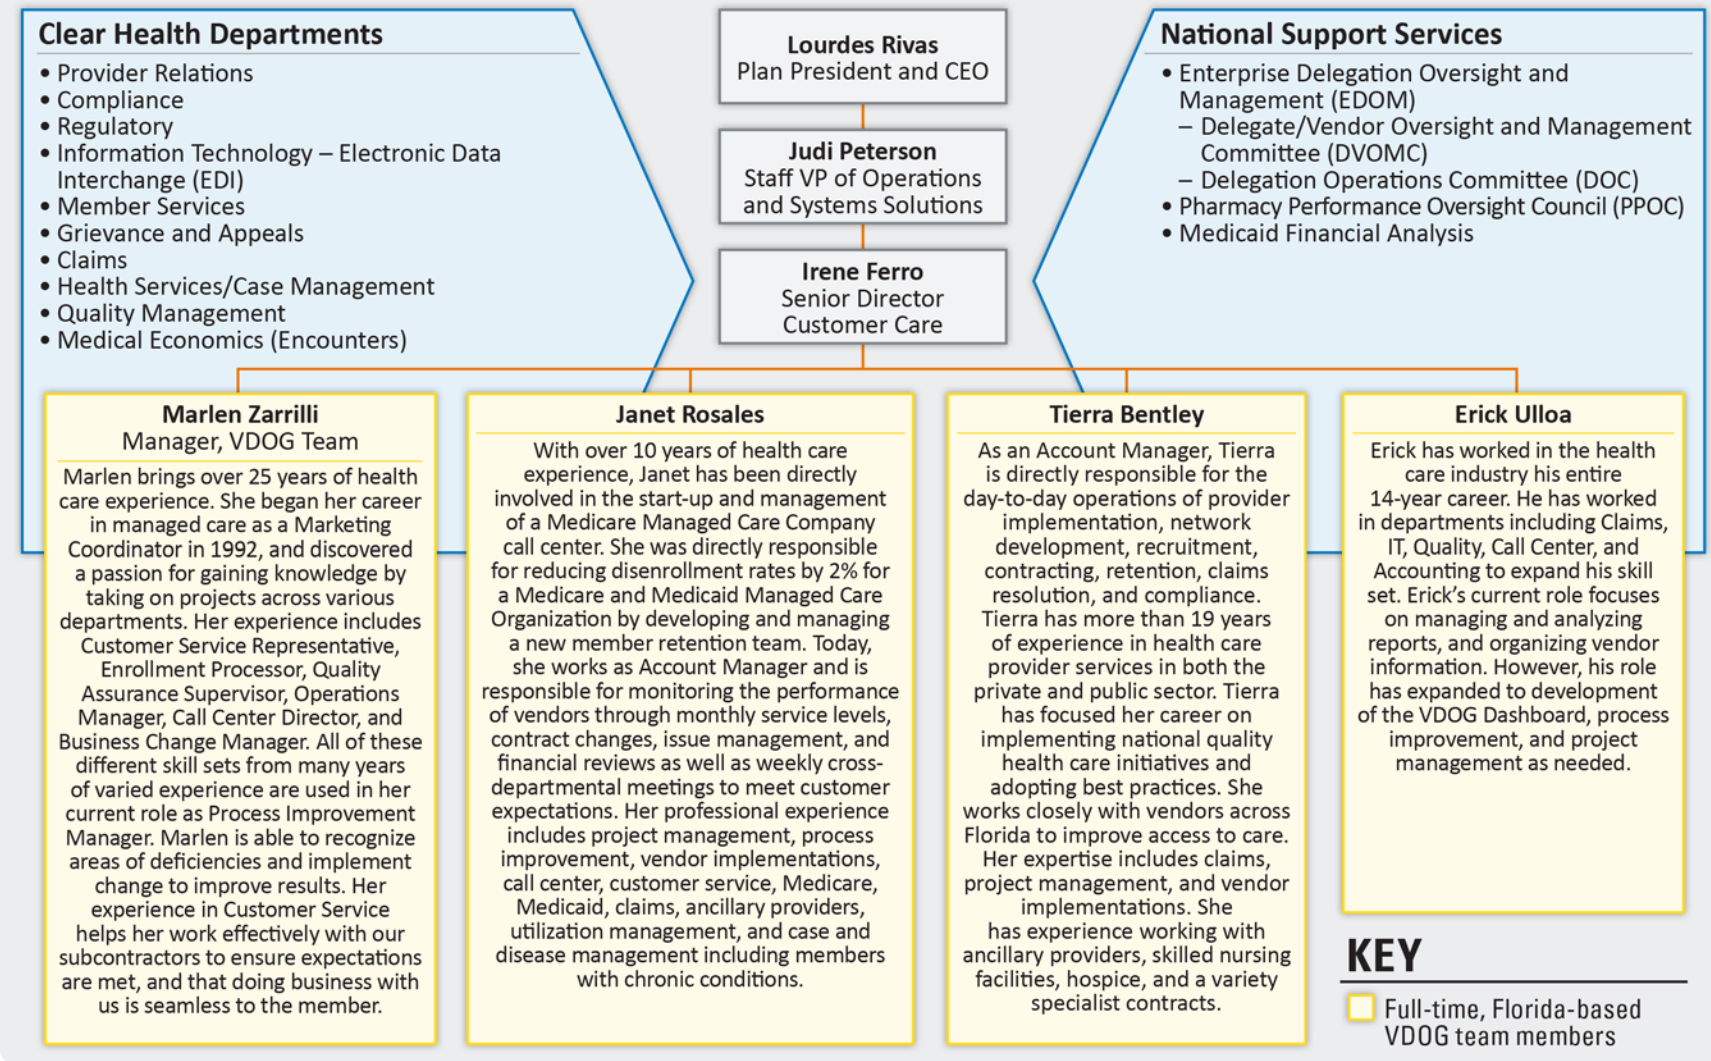

1. The extent to which the respondent provides a list of subcontractors it proposes to use under the SMMC Program for the delegation of work as described above.
2. The adequacy of the respondent's oversight structure, including the extent of executive level staff participation.
3. The extent to which the respondent uses and monitors for service level agreements consistent with the SMMC Program Scope of Services.
4. The adequacy of the respondent's approach to monitoring the quality of work performed by subcontractors, including the frequency and type of monitoring.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

5. The adequacy of the respondent's processes for addressing performance issues, including the triggers for increased monitoring activities, interventions and Contract compliance action.
6. The extent to which the respondent provides monitoring activities it will use to ensure the financial stability of the subcontractor, including the required financial reporting frequency for subcontractors.

Score: This section is worth a maximum of 30 raw points with each of the above components being worth a maximum of 5 points each.

Figure 26-1. Our Dedicated VDOG Team Receives Support from Key Clear Health Departments and National Resources

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 27 – Subcontractor Oversight (Statewide):

The respondent shall submit a sample contingency plan it would enact in the event a subcontractor to which the plan has delegated authority to manage utilization and pay providers on behalf of the plan, files for bankruptcy or otherwise becomes unable to continue operations due to lack of financial resources.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health knows that a comprehensive and detailed plan is critical to any change in subcontractors. However, when an unplanned change occurs, such as one due to bankruptcy or an inability to continue operations due to a lack of financial resources, a well-thought out and documented contingency plan is even more important. Above all, we focus on making sure enrollees (members) have uninterrupted access to medically necessary services and continue to receive the care they need. We also make sure providers receive timely payment for the services they deliver. Clear, consistent, timely, and transparent communication with the Agency, as well members, providers, and other stakeholders is paramount throughout any change in subcontractors. Clear Health welcomes the opportunity to review our sample contingency plan with the Agency.

To develop our contingency plan, we combined our standard subcontractor de-delegation workflow that addresses a planned transition with the lessons learned from the Univita situation Clear Health and other Florida managed care organizations (MCOs) experienced in July 2015. We spent considerable time reviewing and analyzing what worked well and where we saw opportunities to streamline processes and communication. We also incorporated many activities focused on reducing risk. The sample contingency plan we provide in Attachment SRC# 27-1: Sample Contingency Plan leverages the strength and experience of Clear Health, our affiliates, and our national subcontractor oversight resources.

Our contingency plan includes a comprehensive set of tasks so that the functions our subcontractor was providing continue seamlessly. We customize our contingency plan for each type of subcontractor, recognizing that the contingency plan for a behavioral health subcontractor is quite different from one providing utilization management for radiology services. As such, the tasks and activities may differ in size and scope depending on the functions the subcontractor provides. Our contingency plan includes the following major components:

- General approach (such as bringing functions in house or contracting with another vendor)
- Communication strategy for members, providers, the Agency, and Clear Health employees
- Staffing plan to augment Clear Health staff to support contingency operations
- Member continuity of care and uninterrupted access to medically necessary services
- Direct outreach to providers of the prior subcontractor to add them to our network

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Payment for services rendered by independent parties, but not reimbursed
- Prevention of potential provider fraud, waste, and abuse
- Negotiations, contracting, and implementation of alternate vendor
- Transition to a steady-state operation

The general approach includes options such as bringing the services in-house, contracting with a new vendor, or a combination of the two. Clear Health recognizes that our interim solution may differ from our final steady-state solution. Since the approach varies by subcontractor, a key part of our contingency plan is identifying our approach long before there is a problem. If the approach includes contracting with a new vendor, then our plan identifies the alternate vendor. For all current subcontractors, we have already identified potential alternate vendors. We reassess the approach for each subcontractor annually as our operations and the competitive landscape changes.

We provide information on our contingency plan in the sections below and in Attachment SRC# 27-1: Sample Contingency Plan.

1. DATA SOURCES USED TO TRIGGER IMPLEMENTATION OF CONTINGENCY PLAN

Monitoring the financial stability of our subcontractors is a key component of our Subcontractor Oversight Program, and critically important to our ability to recognize risk and trigger implementation of our contingency plan. We never want to be surprised by a subcontractor's insolvency. Early identification of problems is key. Whenever possible, we work to resolve issues as long as it is in the best interest of our members.

We know that regular, comprehensive review and analysis of the subcontractor's financial statements combined with detailed monitoring of key performance metrics that may indicate an issue – such as late claims payment, significant or notable change in management or staffing, increase in provider complaints, or a delay in responsiveness – is critical. Review of the following data sources may trigger implementation of our contingency plan in advance of the subcontractor filing for bankruptcy or becoming unable to continue operations due to lack of financial resources:

- Unaudited quarterly financial statements, including profit and loss statement, balance sheet, and statement of cash flow
- Annual audited financial statements, including profit and loss statement, balance sheet, statement of cash flow, and opinion of auditor
- Monthly Key Performance Indicator report, specifically a change that may indicate financial problems, such as:
 - A drop in claims payment timeliness
 - An increase in claims denials
 - An increase in authorization denials if delegated, or a reduction in requests if not delegated
 - A drop in call center metrics (that may be due to reduced staffing)
 - An increase in provider complaints (especially due to payment disputes)
 - For transportation, a drop in on time performance or increase in missed pick-ups
- An increase in member complaints, grievances, and appeals and/or a change in the types of topics

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- A decrease in the number and dollar value of member encounters submitted to Clear Health
- Turnover of subcontractor leadership key position or operational staff
- Requests for faster or increased payment of accounts receivable
- Information (including data analysis) from our Florida Special Investigation Unit (SIU)
- Information from the Agency, our national vendor team, our affiliate health plans using the subcontractor, or other Florida MCOs regarding subcontractor performance

In addition to objective data, we take seriously overall information (sometimes intangible and subjective) the Account Manager and others (internal or external) gain from communication and interactions with the subcontractor. Our Provider Network Managers, Case Managers (Managed Care Coordinators), and others are out in the community, and will report any comments from credible sources about subcontractor service delivery to the VDOG. Based on our experience, we consider all data sources when deciding to activate our contingency plan.

Executive leadership (Plan President and CEO, Plan Compliance Officer, Regulatory, and department directors) will make the decision to activate our contingency plan for a subcontractor. Clear Health will notify the Agency immediately.

2. COMMUNICATION STRATEGY

Clear Health understands the importance of effectively communicating any change in business operations – systems, policies, processes, or subcontractors – to our members, providers, the Agency, Clear Health employees, and other stakeholders. We take this responsibility seriously and as such, a communication strategy is an integral part of our contingency plan.

Whenever we make a change to our operations, we analyze the impact of the change to other systems, processes, and stakeholder groups. We assess the impact to all stakeholders – members, providers, Clear Health employees, subcontractors, and the Agency – and develop appropriate communication and training plans. In the unfortunate situation of a subcontractor's inability to continue to perform delegated functions, that communication is even more critical. Our communication strategy focuses on providing timely, complete, and consistent information to all affected groups through multiple channels. Simply maintains a library of communications that we can modify based on the type of subcontractor, allowing us to expedite the development and approval of member and provider communication.

In the sections below, we discuss the format and nature of our communications with the Agency, members, providers, and our employees.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

2.1. Communicating with the Agency

Clear Health will notify the Agency as soon as we make the decision to activate our contingency plan. We will be fully transparent with the Agency on our concerns about the subcontractor, our contingency plan, and our progress.

We will immediately reach out to the Agency by telephone to explain the situation, that we are activating our contingency plan, and outline any assistance we need. If the subcontractor is also providing services to other Florida MCOs, we are happy to participate in a joint meeting with the Agency and other affected MCOs to review and potentially coordinate our contingency plans, especially communication with providers related to member continuity of care and claims submission.

We will maintain regular communication and standing meetings with the Agency, following a mutually agreed upon frequency, schedule, and method (such as in person, telephone, online conferencing) to collaborate on member and provider communication, provide updates on progress, discuss concerns and challenges, and outline future arrangements for steady-state operations.

2.2. Communicating with Members

Clear, concise, and timely communication to members is a critical part of our strategy. In keeping our members informed, we will explain why we are contacting them and how they will continue to receive the services they need, even if there is a change in service provider. We will also include information on what this change means to them, continuity of care requirements, and how to get additional information or help. We will discuss the timing and approval process for member communications with the Agency during initial meetings after contingency plan implementation.

We will use a variety of methods to communicate a subcontractor change and to help make sure that we reach members. Depending on the impact of the change and the associated timeframe, we will communicate with members through the following ways:

- Written documents and notices mailed to the member
- Information and alerts posted on the member website
- Member call center staff to answer questions and deliver information about the impact the change will have on members
- Audio messages through our member call center to provide information about the change when our interactive voice response system answers the call
- Outbound member calls using an approved script that outlines the change, its impact, and how to get more information
- Direct outreach by Managed Care Coordinators

We have processes in place to capture member feedback (positive or negative) from these interactions so that we can make any necessary changes to our materials or approach.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Clear Health will analyze encounter and authorization data and prioritize outreach to members with high acuity or high utilization to make sure their needs are met. This analysis will also help us identify members with open authorizations or those that may need extra attention, as well as identify the treating provider for members with complex medical needs.

Clear Health will comply with the requirements listed in Section V.B for material information sent to members. We will work with the Agency on a process to expedite approval of member and provider communications so that we can release communication as quickly as possible.

We employ strict safeguards to verify compliance, accuracy, and ease of understanding in our member materials. We follow a well-established Collateral Materials Approval Process (CMAP) to verify compliance. Through CMAP, we review all communications to members, providers, and other external audiences to meet both legal and internal company standards. During CMAP, materials undergo review to verify cultural sensitivity, accuracy, and compliance with all Agency program requirements. CMAP confirms that our member materials are written at or near the 4th grade reading level, verified by the Flesch-Kincaid index. We use an innovative, interactive literacy software tool that replaces hard-to-read medical terms and phrases with plain language and scores documents on their general readability.

2.3. Communicating with Providers

Our provider communication strategy addresses the subcontractor's downstream providers and our network providers.

2.3.1. Downstream Providers of the Subcontractor

Since providers often have agreements with the prior subcontractor, we recognize that communicating the change to them must be clear, focused, timely, and sensitive. As with member communication, we will discuss the timing and approval process for provider communications with the Agency.

Through the provider data files subcontractors submit to Clear Health (full roster monthly and adds/terms weekly), we have provider contact information. By combining the provider data files with encounter data, we can also identify the number of our members each provider serves and the scope and volume of services provided. We will use this information to prioritize and focus outreach and communication efforts. Our communication strategy will prioritize outreach to providers who are actively rendering a high volume of services to Clear Health's members. In addition, we verify contact with all providers has been made. We will also tailor communications, as appropriate, based on the type of services the provider renders, altering information on continuity of care and claims submission, as necessary.

Our provider communication strategy will include several focused communications as we move through the process toward steady-state operations. Communication to providers will focus on apprising them of the situation as well as assuring them that they can and should continue to provide services to Clear Health members and that they will be paid for covered services provided in the future. We will outline procedures for continuity of care and new authorizations, explain claims submission guidelines, and let them know where to go and who they can call for help.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

As with member communication, we will use a variety of methods to make sure that we reach providers quickly. Depending on the situation and the associated timeframe, we will communicate with providers through the following methods:

- Written documents and notices mailed, e-mailed, and/or faxed to the provider
- Information and alerts posted on the provider portal
- Provider call center staff, who will answer questions and deliver information about the impact the change will have on providers and their members
- Direct outreach by our Provider Relations team (armed with talking points and FAQs), who will prioritize calls to high volume or specialty providers

Depending on the nature of the services the provider renders, we may also hold targeted meetings with providers and Managed Care Coordinators for members who have complex needs under the provider's care. For vulnerable populations, we make sure that providers know the Managed Care Coordinators is the point of contact for members who need heightened monitoring and support.

2.3.2. Clear Health's Network Providers

Communication to our network providers will focus on apprising them of the situation and communicating any changes that would impact them or how they support our members. As with the subcontractor's downstream providers, we will use a variety of methods to make sure that we reach providers quickly. Depending on the situation and the associated timeframe, we will communicate with providers through Agency-approved written documents and notices, information posted on our provider portal, and direct outreach by our Provider Relations team armed with talking points and FAQs. Our provider call center staff will also be available to answer questions and deliver information about how the change will impact providers and members.

2.4. Communicating with Clear Health Employees

Clear Health also recognizes the need to notify our employees of material changes to our Florida operations. For a change in subcontractor, it is critically important that our call center employees have complete and accurate information to respond to member concerns. To communicate with our employees, we will:

- Develop and distribute documents with talking points and FAQs
- Notify affected departments using regulatory alerts and/or email
- Hold meetings with affected departments to discuss the change and its impact, including employee training

As the situation progresses, we will add additional communication as necessary to make sure that our employees have the information they need to support the SMMC program, our members, providers, and the Agency and to continue to meet Contract requirements.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

3. STRATEGIES FOR OPEN AUTHORIZATIONS

Clear Health remains fully accountable for our subcontractors and the quality of service they deliver. In the event of a subcontractor's financial insolvency, our priority is to minimize impact on our members and the providers who serve them. If we need to activate our contingency plan, a few critical things must happen:

- Members will continue to get the care and services they need, for open authorizations and for new services
- Providers can and should continue to serve our members, with confidence that they will be paid (including how to submit claims and how much they will be reimbursed)
- Providers will be paid for services they have already rendered and have not been reimbursed by the prior subcontractor

In the sections below, we describe the strategies we will employ to address open authorizations and provider payment. We also explain the financial guarantees we obtain and hold from our subcontractors to cover this type of contingency.

3.1. Open Authorizations and Continuity of Care

Clear Health knows that members with open authorizations need to receive uninterrupted access to approved services. So that our members can continue with their approved treatment plan, our contingency plan includes a 60-day continuity of care waiver period, for applicable services, to make sure that our members are not denied services and that providers who serve our members do not experience a delay in claims payment. Clear Health will expand the continuity of care period for certain services and for members with an active treatment plan where a transition would be clinically detrimental. The communication we send to members and providers will explain continuity of care and authorizations, providing clear instructions on what they need to do.

We will also analyze encounter data to identify members with open authorizations. Since we know what subcontractor services require authorization, we will query encounters for these services to identify the member and the rendering provider. We will also search encounter data for the presence of an authorization number. Once we know the providers currently delivering services that require authorization, we will conduct direct outreach (through letter or telephone) to explain processes.

For members in case management, the assigned Managed Care Coordinators will reach out to providers to make sure that the member continues to receive uninterrupted service.

3.2. Paying Providers for Services Rendered

Clear Health realizes that a subcontractor's downstream providers may also be greatly impacted by the situation and may have experienced delayed or denied payment for services delivered to our members. We will do everything we can to minimize the impact on providers so that our members can continue to receive the care and services that they need.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

If a subcontractor delegated for claims payment is unable to continue operations, our contingency plan includes tasks and activities for Clear Health to process and pay the claims (at least as an interim solution), including configuring providers, benefits, and claim edits and adjudication rules in our Management Information System (MIS).

Clear Health maintains a data file of the providers in the subcontractor's network at all times. We require each subcontractor to submit a full roster monthly and a weekly list of new and terminated providers. Having a provider roster that contains the information we need to configure providers in our MIS, including taxonomies (such as provider type, categories of service, and place of service), is a key step in our ability to pay providers. Our plan also includes tasks to configure benefits to support accurate claims adjudication, including covered and non-covered services, demographic limitations (such as program, age, and gender), benefit limits, prior authorization rules, and member liability. Prior to complete configuration to pay claims, we will adjust our adjudication rules to pend claims we receive for services provided previously by the prior subcontractor.

Our communications with providers will explain what they need to know, including continuity of care waivers, when and how to submit a new authorization request, where and how to submit new claims and claims not reimbursed by the prior subcontractor, and reimbursement rates. We will honor the providers' agreements with the prior subcontractor until we contract directly with them. We will also make sure that providers know who to call and where to go for help.

For new claims for services rendered to our members, Clear Health will inform providers how to submit claims (paper and electronic) and direct them to resources to gain help in clean claims practices and options for electronic claims submission. We will direct providers to the provider handbook posted on the public portion of our provider portal, which includes a section titled "Claim Submission and Adjudication Procedures." Our provider call center and Provider Relations team will be available to help. Clear Health will review claim denial reports to confirm appropriateness and to proactively reach out to providers we see may need help with claims submission.

We will also explain exactly what providers need to do if they have unreimbursed claims from the prior subcontractor. We will mail letters to all network providers, post the information on the public portion of our provider portal, and train our Customer Care Representatives on the process. The communication will clearly identify the dates of service for which unpaid claims for services rendered to our members can be submitted to Clear Health and the deadline for submission. For each claim a provider submits for payment, we will require a packet of information, including a copy of their contract (including fee schedule) with the prior subcontractor, a signed attestation that they did not receive other payment, and optionally, a copy of their authorization which would speed the claim payment process.

4. STRATEGIES TO PREVENT PROVIDER FRAUD AND ABUSE

Clear Health realizes that this type of situation could present increased opportunities for provider fraud and abuse. While we make sure that providers who rendered services to our members are compensated, we also continue to abide by our responsibility to research, investigate, and report any suspected instances of fraud, waste, or abuse. To prevent and detect provider fraud, waste, and abuse, our contingency plan includes the following strategies:

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Configuring providers and benefits in our MIS, with the information necessary to properly adjudicate claims in accordance with Agency requirements
- Applying the standard automated pre-payment controls and post-payment analyses that are part of Clear Health's Anti-Fraud Plan and comprehensive approach to prevent and detect potential or suspected fraud, waste, and abuse and overpayment
- Implementing additional post-payment verification activities and analysis of claims data
- Requiring providers to submit documentation, including a signed attestation, to request payment for services not paid by the prior subcontractor

Clear Health maintains a list of the providers in the subcontractor's network at all times. Having a provider roster that contains the information we need to configure providers in our MIS is not only a key step in our ability to pay providers, but an important part of our strategy to prevent fraud, waste, and abuse.

Clear Health has established processes to confirm that excluded providers are not included in our network. We check the lists of providers currently excluded by State and federal governments every 30 days. We require our subcontractors and providers to comply with all federal requirements (42 CFR 1002) on exclusion and debarment screening. As another strategy to prevent provider fraud, waste, and abuse, Clear Health will confirm that the prior subcontractor's providers are not excluded by checking provider information against the Federal List of Excluded Individuals and Entities (LEIE) and the System for Award Management (SAM), and any available Florida and federal databases.

Configuring our MIS with complete information about the benefits (covered services, limits, fee schedule), and any specific claims adjudication rules will enable execution of the proactive (pre-payment and prevention) and reactive (post-payment) fraud, waste, and abuse detection methods and internal controls. Many controls are embedded in our claims adjudication logic, including code editing, duplicate claims checks, evaluating third party liability, and checking authorization requirements.

Clear Health will expand our post-payment analysis activities to look for instances of provider fraud, waste, abuse, and overpayment. We will select a random sample of claims paid and send the member a verification of services letter that will describe the services on the claim and instruct the member to contact us if the services were not rendered. We will also analyze provider claims activity (such as number of claims, dollar amount of claims, number of members served) and compare it to prior periods to identify any change in the provider's billing pattern. Monthly analysis using our claims activity dashboard supports the generation and verification of leads related to potential provider fraud, waste, and abuse. The dashboard displays a rolling 13 months of data and supports the sorting, filtering, and drill-down analysis on many elements, including county or city, provider tax ID, and top procedure codes. The ability to show a summary of billing history for a provider, including change from last month and peer comparison is a key strategy to detect and prevent provider fraud, waste, and abuse.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In addition, Clear Health's SIU routinely collaborates with our other lines of business (Medicare and commercial) on trending schemes, provider types, and providers. In addition to the pre- and post-payment software programs, our SIU has an internal team of investigators proficient in data analysis to identify more leads for potential further development.

As discussed earlier, Clear Health will require providers with unreimbursed claims to complete a packet that includes a signed attestation. We will review the packet and pay claims, where appropriate, for covered services provided to our members when the prior subcontractor had financial responsibility, but failed to pay. Our communication will remind providers that they must comply with all applicable State and federal laws and regulations regarding requests for payment and claim reimbursement.

Evaluation Criteria:

1. The extent to which the respondent has outlined the data sources it would use to trigger the respondent to put the contingency plan into play in advance of the subcontractor filing for bankruptcy or otherwise becoming unable to continue operations due to lack of financial resources.
2. The extent to which the respondent outlines a communications strategy in the contingency plan.
3. The extent to which the contingency plan includes strategies for ensuring providers get paid for situations where there were open authorizations.
4. The extent to which the contingency plan includes strategies to prevent provider fraud and abuse in situations where a subcontractor files for bankruptcy or otherwise becomes unable to continue operations due to lack of financial resources.

Score: This section is worth a maximum of 20 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

Attachment SRC# 27-1: Sample Contingency Plan

Contingency Plan For: (name of subcontractor)

Delegated Functions:

Programs and Regions:

Account Manager:

Planned Approach: (full description of interim and final steady-state approach, such as in house, alternate vendor, or combination)

Alternate Vendor: (vendor name and representative contact information, if applicable)

Size and Scope

Objective: Document the size and scope of the impact on SMMC program operations.

Programs/Lines of Business Affected	Functions Provided by Subcontractor	Regions	Approximate Number of Members Affected

Contingency Plan

Objective: Implement contingency plan to deliver uninterrupted service to members and providers for subcontractor functions.

Major Tasks (some dependent on approach):

- Activate communication plan (Agency, members, providers, and employees)
- Implement staffing plan
- Evaluate and document approach to continuity of care and utilization management
- Initiate direct outreach to downstream providers of the prior subcontractor
- Configure systems for claims processing and payment and make sure members and providers have access to customer service professionals who can assist with questions
- Tightly manage operations
- Validate or implement fraud, waste, and abuse strategies
- Initiate alternate vendor negotiations and implementation (if part of approach)
- Transition to steady-state operations

Communication Plan

Objective: Deliver clear, concise, and timely communication to affected stakeholders (Agency, members, providers, and employees).

Action	Lead Department	Begin Date
AHCA		
Notify AHCA of event	Regulatory	Day 1
Provide Plan to AHCA	Regulatory	
Establish meeting/update frequency/schedule with AHCA	Regulatory	
Provide contact information to AHCA	Regulatory	
Provide regular (weekly) updates to AHCA	Regulatory	
Members		
Extend call center hours	Call Center	
Send AHCA-approved notification letters	Regulatory	
Begin outbound call campaign (AHCA-approved script)	Call Center	
Implement notices or changes to website as needed	Marketing	
Providers		
Distribute AHCA-approved communication to downstream providers (letter, fax blast, website alerts)	Provider Relations	
Use AHCA-approved written notification to inform network providers, hospitals, skilled nursing facilities (based on impact)	Provider Relations	
Complete AHCA-approved Frequently Asked Questions (FAQs)	Provider Relations	
Conduct provider visits – immediate and ongoing	Provider Relations	
Implement notices or changes to website as needed (such as post FAQs)	Marketing	
Employees		
Hold Executive Leadership meeting to launch contingency effort	Plan President	Day 1
Launch project team – team members notified	Project Management Office	Day 1
Notify all employees of event	Plan President and CEO	
Share updates as finalized	Project Management Office	
Establish leadership and employee meeting schedule	Project Management Office	
Update online reference tools	Project Management Office	
Create and execute training for all affected departments	Training and Development	

Staffing Plan

Objective: Hire or reallocate staff necessary to support contingency operations. Recruiting source will consider employees of the subcontractor, as well as external search firms and temporary agencies.

Action	Lead Department	Begin Date
Validate pre-determined plan of areas needing additional staff	Human Resources	Day 1
Finalize resource request for short-term/contingency (including temps, shift from other departments, outsource)	Finance	
Execute contingency resource/staffing plan	Human Resources	
Determine interim plan for benefit administration (in-house or subcontracted delegated vendor)	Plan President and CEO	
Based on plan for benefit administration, prepare, finalize, and execute go-forward staffing plan	Human Resources	

Member Continuity of Care and Utilization Management

Objective: Document continuity of care provisions and review with the Agency. Include length of continuity of care waiver period (general and differences by service), components for member and provider communication, system configuration, and employee training (such as Call Center, Utilization Management, and Claims).

Action	Lead Department	Begin Date
Continuity of Care		
Identify members impacted by event (closed, open, pending authorizations/orders)	Health Care Management	Day 1
Finalize member condition stratification process	Health Care Management	
Match members to stratified outreach approach, prioritizing most vulnerable members	Health Care Management	
Communicate and train all employees involved in Plan	Training and Development	
Update all online tools and training documentation, including: VDOG, Call Centers, Claims, Provider Relations, Health Care Management, Grievances and Appeals, and Enrollment	Training and Development	
Execute Case Management Member Outreach Plan	Health Care Management	
Confirm continued employee access to accurate list of contracted providers	Provider Relations	
Utilization Management		
Validate pre-established contingency authorization process for receiving new authorization requests	Health Care Management	Day 1
Communicate fax number and phone number	Health Care Management	
Begin accepting and processing new requests for services	Health Care Management	
Establish process and script to respond to questions regarding authorizations received prior to event	Health Care Management	
Confirm UM staff can access previous and open authorization data from prior subcontractor	Information Technology	
Confirm UM reporting is in place to track volumes, variances, and verify that turn-around time is being met	Health Care Management	

Provider Network Relations and Contracting

Objective: Conduct outreach and contracting to add providers to our network, prioritizing those delivering a high-volume of services to our members. Includes scheduling meetings with providers, building additional provider agreements (from templates) to meet contracting terms, and establishing pricing for covered benefits not priced in the fee schedule. Obtain Letters of Agreement (LOAs) from providers so we can pay claims while we complete the contracting process.

Action	Lead Department	Begin Date
Communicate with the prior subcontractor's downstream providers to make sure they are aware of event, updated on decisions, and feel confident they will be made whole (so member care is not impacted)	Provider Relations	
Provide contract language related to hold harmless protection for downstream providers – create plan for LOAs as needed	Provider Relations	
Assess downstream network performance	Provider Relations	
Continue visits and communicate with providers	Provider Relations	
Define contracting strategy post contingency	Provider Relations	

Operations and Technology

Objective: Establish processes and systems to accurately pay providers for services rendered to our members. Address process differences for claims unreimbursed by the prior subcontractor. Review processes with Agency, as necessary. Include tasks to configure our MIS to pay claims for the services delegated to the prior subcontractor according to AHCA requirements. Make sure members and providers have access to staff who can answer questions. Deliver solid operational performance.

Action	Lead Department	Begin Date
Customer Service		
Expand call center hours of operation based on event	Call Center	Day 1
Determine call routing strategy and change interactive voice response (IVR) scripts/routing if needed	Call Center	
Confirm that staff are prepared to handle inquiries (training, online tools updated, provider information updated, FAQs)	Call Center	
Implement reporting and tracking tools	Call Center	
IT		
Validate file transfers to subcontractor are discontinued and confirm that access has been terminated	Information Technology	Day 1
Configuration		
Configure new contracts and LOAs; test to verify accuracy	Configuration	
Configure benefits in the MIS to include limitations, and exclusions; test to verify accuracy	Configuration	
Claim Payment		
Finalize claims processing plan	Claims	
Load prior claim history and transfer accumulators from the prior subcontractor (if applicable)	Claims	
Create Explanation of Payment (EOP) language as needed	Claims	
Implement AHCA-approved claim payment process for services received prior to the event	Claims	
Implement AHCA-approved claim payment process for services received during the continuity of care period	Claims	
Define and implement the ongoing process for the post-continuity of care period	Claims	
Implement AHCA-approved claim payment dispute/appeal process for services received before the event and during the continuity of care period.	Claims	
Reporting and Analytics		
Provide ongoing project status reports to AHCA and Executive team	Project Management Office	
Determine impact on reporting (such as PNV and encounters)	Project Management Office	
Implement project scorecard and tracking	Project Management Office	
Implement Operations flash reports	Project Management Office	
Generate upper and lower control limit reports to manage inventory and watch for trends/outliers	Project Management Office	

Fraud, Waste, and Abuse Strategies

Objective: Review and implement strategies to prevent and detect provider fraud, waste, and abuse. Include additional pre- and post-payment activities, such as additional member verification of services letters and provider claims activity over time analysis. Review strategies with AHCA.

Action	Lead Department	Begin Date
Define and implement appropriate strategies to detect and prevent any fraud, waste, and abuse	Executive Leadership and Medicaid Special Investigations Unit (SIU)	
Verify process defined to quickly escalate suspected concerns	Executive Leadership and Medicaid SIU	
Evaluate/implement pre- and post-payment activities to support fraud, waste, and abuse, as needed.	Medicaid SIU and Claims and Recovery	
Create reports and utilize analytics platform to support fraud, waste, and abuse strategy	Medicaid SIU	

Alternate Subcontractor

Objective: Initiate negotiation and contracting with alternate subcontractor (if part of approach). Includes developing agreement, completing a successful pre-delegation audit, gaining Agency approval, and full implementation (including configuration, interfaces, member and provider communication, and testing). Engage the Project Management Office to support implementation plan.

This process may begin at any point before, during, or after the contingency plan is initiated, depending on the circumstances involved.

Major Tasks	Timeframe	Responsible Owner	Completion Date
Approval to initiate new subcontractor implementation process	Begin Process	Plan President	
Validate alternate subcontractor is best option		RVP Provider Relations	
Initiate negotiation process		RVP Provider Relations	
Begin pre-delegation audit after completion of final agreement draft		Delegation Oversight	
Finalize pre-delegation audit		Delegation Oversight	
Obtain AHCA approval for subcontractor		Regulatory	
Execute final subcontractor agreement		RVP Provider Relations	
Launch project to implement new subcontractor		Project Management Office	

Transition to Steady-state Operations

Objective: Transition functions to the future steady-state operations, if different from contingency operations (for example, transitioning functions moved in-house during contingency to a new subcontractor). Includes full debrief of contingency plan implementation once transition is complete and fully operational. Also includes identifying opportunities to improve the contingency plan and documentation of an action plan with responsibilities and timeframes for completion.

Action	Lead Department	Begin Date
Finalize plan for steady-state operations (steps will vary)	Project Management Office	
Conduct project lessons learned to document successes and improvement opportunities learned throughout the event	Project Management Office	
Close out project; move to Operations	Project Management Office	

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 28 – System Modification Protocol (Statewide):

The respondent shall describe, in detail the following change control IT processes:

- a. How the respondent will initiate and coordinate internal modifications for any of its core systems (including, but not limited to, encounter submission, EDI/Clearinghouse, and financial reporting) or any potential subcontractor's core systems,
- b. How the respondent will accommodate Agency-directed IT modifications; and
- c. How the respondent will identify, track, communicate, and resolve IT production issues that affect internal or external stakeholders.

For each of the descriptions, the respondent shall also include the expected timeframes for making modifications, the prioritization process employed, the communication processes used for planned or unplanned changes, as well as status updates provided to employees, Agency staff, and providers. The descriptions shall also address testing procedures, production control procedures, and any applicable claims/encounter reprocessing for historical or retroactive system changes.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Our national Technology Services department has more than 20 years of experience with Medicaid programs and has established a comprehensive and robust Management Information System (MIS) and change management process that fully supports implementation of new systems and applications and enhancements to existing processes. Our system change management process follows a multi-level governance model with well-defined roles, responsibilities, and checkpoints and is designed according to the following guiding principles:

- All changes in scope to the production IT environment are submitted and approved using an enterprise change management tool
- An owner is defined for each change request
- Change requests must be consistent, detailed, and contain timely information that is appropriately communicated and accessible
- Change requests are approved based on change content, risk, and schedule
- Changes are scheduled to minimize business impact
- Implementation and back-out plans are required for each documented change request

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Separate workflows are defined to accommodate Emergency and Urgent changes
- The change management process includes a protocol for resolving conflicting change requests
- Any document that is attached to requests in the change management process tool may not contain protected health information (PHI)

By promoting consistent and timely implementation of changes, and by improving visibility and communication of those changes and their impacts, we are able to minimize adverse impact to production environments and external partners and customers.

1. INITIATION AND COORDINATION OF INTERNAL MODIFICATIONS OF CORE SYSTEMS

Whether implementing new functionality, enhancing existing processes, or resolving production issues, Technology Services has established policies and procedures to manage modification to all our systems. We maintain separate development and testing environments as part of our change management protocol and verify that only systems and programs that are tested and approved are released into production. The change management function is responsible for managing and coordinating change requests and releases to the production environment. This includes infrastructure, network, system components, protocols, configurations, hardware, and software related changes.

Our IT change management process is governed by the Change Management team, Change Advisory Board (CAB), and Emergency Change Advisory Board (eCAB). The Change Management team oversees all change management processes and is responsible for maintaining the enterprise change management tool and all change management policies and procedures.

The CAB is a dynamic board comprised of Change Management team leaders, IT Managers, Project Managers, requestors, and other stakeholders who are responsible for monitoring, reviewing, and approving IT change requests. CAB meetings take place on scheduled days twice weekly and serve as a forum to discuss changes to production IT services, systems and environments, and to assess content, impact, risk, urgency, and schedule. Dockets for the CAB meetings are provided in advance with supporting documentation available for review in the enterprise change management tool. The CAB is responsible for approving, reviewing, monitoring, and governing changes for all high- and medium-risk impacts to the production environment.

The eCAB is made up of key leaders from the Change Management team and is dynamically supplemented by senior-level leaders with oversight of the impacted system or process. Due to limited or non-existent lead time, urgent and emergent changes follow a streamlined review and approval process in which all required information and documentation is collected in the enterprise change management tool, but approval is expedited through the eCAB. Key urgent and emergent changes are still reviewed, post-deployment, during the bi-weekly CAB meetings for informational purposes only.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.1. Systems Changes and our SDLC

Our information systems change management and version control processes are tightly integrated with our Systems Development Life Cycle (SDLC) methodology. For all system changes, including encounter submission, electronic data interchange (EDI), clearinghouse, and financial reporting, Technology Services follows formal change notification policies and procedures that include standards for requirements gathering, analysis, design, tests, and implementation. The SDLC methodology, shown in Figure 28-1 in Attachment SRC# 28-1 Software Development Methodology, can be tailored to include only activities that are appropriate based on project type (new or modified system or configuration change) and whether the system is automated or manual. We have adopted the Scaled Agile Framework (SAFe) for delivering valuable capabilities to stakeholders. Our documented policies and procedures include all methodologies required to manage the life cycle of our applications and systems. We have procedures, templates, checklists, and processes that enable systems projects to move through iterative cycles, or sprints of:

- Requirements Analysis
- Design
- Development
- Testing
- Deployment

Our change management processes are documented, repeatable, monitored, and subject to continuous process improvement activities. The following sections provide details on the SDLC stages.

1.2. Requirements Analysis

Requirements analysis is the first step in the SDLC. A trained group of Business Analysts (BAs) work with business owners to identify business requirements, develop system requirements, and document results in a Requirements Review Document. This document is continuously updated and approved by the business owners and is one of the primary artifacts tracked via the enterprise change management tool. For cross-functional systems or projects, an impact assessment is part of the requirements analysis and changes to any other systems and processes will be considered as part of the overall scope.

Using the Requirements Review Document, we validate the traceability of requirements through system design, development, and testing processes. During the requirements phase, we also identify modifications to documentation, including systems documentation and user manuals, necessitated by the change. A high-level overview of the testing approach is also noted along with any training requirements. Requirements are prioritized and assigned to current sprints or backlogged for future development.

1.3. Design

While BAs collect and document the business requirements, they work collaboratively with the assigned development team so that the developers fully understand the system requirements when designing the system solution. The Requirements Review Document also includes a section for the system design details that are documented by the assigned developer. A requirements

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

traceability matrix is built as part of the design process to make sure that all requirements are accounted for in the system design. A senior-level developer or team lead is responsible for verifying the system design fully supports the business requirements and meets technical standards.

Within the Agile process, requirements are expressed as 'stories' by business experts. Stories are converted to use cases that support the design process for developers and serve as the basis for test scenarios.

1.4. Development

Developers continue to work closely with the BAs during the coding process, reaching out to the BA to obtain answers to questions regarding the requirements or additional information that is needed to support the development effort. During coding, the developer is responsible for unit testing and a senior-level developer or team lead will perform a code review, cross-checking the development against the requirements traceability matrix. A successful review indicates readiness for the testing phase.

The Agile process focuses on good communication with Agile teams holding daily 'stand-up' meetings to quickly resolve issues and weekly progress meetings with all stakeholders.

1.5. Testing

The BA works with the Business Owner and the development team to develop test scenarios and scripts for each requirement. BAs develop complete data for each test script that fully exercises system capabilities. For changes that interface with Agency systems, Agency staff, and others as appropriate, are important members of the testing team and will work with Clear Health to validate that our systems are ready for Florida operations.

System changes go through a number of testing phases to verify that they are ready for a production environment, including:

- Unit testing, which tests just the component
- System testing, which tests the component with all other components and processes it touches
- Regression testing, which confirms the change does not cause problems with existing processes
- User acceptance testing, which validates that the change satisfies user expectations

When a change affects external entities (for example, the eligibility/enrollment data exchange with the enrollment broker), we heavily engage them in the testing process to verify production readiness. If necessary, we use subsets of production data to test specific scenarios and simulate the production environment as much as possible.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

As a part of the adoption of SAFe, we have evolved our testing methodology to better support the iterative nature of Agile by adopting Acceptance Test Driven Development (ATDD). ATDD is a technique used to bring business owners into the test design process before coding has begun. It is a collaborative practice where users, testers, and developers define automated acceptance criteria. ATDD helps to ensure that all project members understand precisely what needs to be done and implemented. This is the primary technique used by Technology Services to approach sprint work with a Test-First mentality.

In addition, since the Software Development Engineer in Test (SDET) and Test Engineers are using the same test format, the SDETs can begin their test case creation early, since the steps are already defined. This helps to eliminate confusion on what needs to be automated and how it traces back to the original request. Acceptance tests define the behavior of the system and verify that requested features work as expected. These tests then become the acceptance criteria for the user story.

Our automated testing framework fully supports ATDD and gives test engineers the ability to automate their ATDD test scenarios. Jira/XRay is used for managing user stories and test scripts along with Selenium for testing web interfaces. Rational Function Tester is used to execute automated functional and integration tests against our other non-web interfaces. All reporting and defect management is centralized allowing our test engineers, developers, and stakeholders real-time visibility into the quality of the release.

1.6. Change Control and Deployment

Technology Services safeguards all systems from unauthorized modifications with systems tools and strict procedures that require a Production Code Move Sheet for every change or maintenance request, as well as an appropriate review meeting prior to deployment.

Prior to the review meeting, the development group notifies the change control group that new production code is ready for promotion. For routine maintenance requests (low risk), Technology Services conducts a desk-check procedure. For all high-risk requests, we conduct a Pre-deployment Review Meeting. Each of these reviews certifies that the change being requested has been completed according to the requirements and design documents. It validates that appropriate documentation updates have been made, testing has occurred, and business owners for the areas affected by the change have reviewed and approved the test results and agreed to implement the change.

Technology Services maintains a separate group of individuals who have the ability to promote code changes or new code to production libraries. The development group develops and tests the code, obtains approval for the completed product, and plans the implementation strategy. The change control group moves the approved code into a designated staging area. We use a release management tool to monitor and control the entire process.

Once approval is obtained from the desk-check or the Pre-deployment Review Meeting, Data Center Operations follows the instructions on the Production Code Move Sheet. This document covers promotion of code changes and detailed instructions for the introduction of new code to an application. Data Center Operations does not permit any code to be placed into a production environment without the appropriate documentation and required approvals.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.7. Documentation and Training Requirements

Clear Health will develop, prepare, print, maintain, produce, and distribute distinct system process and procedure manuals, user manuals, and quick-reference guides, as well as any updates, for the Agency and other appropriate staff as required. Designated manuals and reference guides will be available in printed form or online and, where applicable, manuals will be published in accordance with the appropriate Agency or State standard.

Comprehensive documentation is required for all core systems and ancillary applications. Where it exists, we leverage vendor documentation to supplement internally developed documentation. Technology Services maintains a complete set of documentation, comprising:

- Vendor (third-party) software documentation, including user and system manuals, installation manuals, and release notes
- Internal technical documentation, including system process and procedure manuals, describing all manual and automated system procedures, business rules, data models and dictionaries, flow diagrams, requirement and design documents, system change logs, and change management documents
- System user and training manuals with instructions on applicable system functions and accessing system data
- Policy and procedure documentation

When a system change is subject to the Agency's written approval, Clear Health will draft revisions to the appropriate manuals prior to approval of the change. Updates to the electronic version of these manuals will occur in real time; updates to the printed version of these manuals will occur within 10 business days of the effective date of the update.

Technology Services uses change management software during implementation and maintenance of all application software and documentation. Changes to documentation begin at the initiation of systems requirements and continue through testing. We use the updated documentation as a basis to train all employees affected by the change before deployment.

Training requirements are also documented as part of the Requirements Review Document and development of training materials takes place in parallel with the system development efforts. Validation of training materials is part of the testing process and once testing is complete, training begins for all individuals affected by the change.

1.8. Case Study: Applying a System Upgrade to the Core Operations System

For system upgrades to our Core Operations System, we receive notification from the software vendor about two to three months prior to scheduled releases — typically twice annually, in February and August. A project lead is assigned and a plan is built to track all of the key deliverables and checkpoints for the upgrade project, including impact, assessment, program modifications, testing, training, and appropriate internal and external notifications. Details of the release are shared with the technical team and designated system users, who are instructed to review and complete an Impact Assessment form for their areas. A kick-off meeting is also held

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

to discuss the testing timeline and answer questions. The Systems Testing Group creates a test plan and establishes the required test data in Jira, which is used to automate testing and perform defect management.

Once the release is available, it is deployed first to a development environment for initial validation and then to a quality assurance (QA) environment where we run through the full set of test cases, which generally takes about five to six weeks. Any defects found during testing are logged and tracked, working with the software vendor as needed to resolve. Weekly testing meetings are held to make sure that everyone is on track with their assigned testing efforts. Once testing is complete, we hold a Go/No-Go call with all areas to verify that there are no outstanding issues and we are confident that the release can be moved to production.

To minimize impact, the release is scheduled to occur over a maintenance weekend with the designated technical teams actively engaged in all stages of the deployment process. During the process, we maintain an open communication channel with a project lead at the ready to pull the team together to address any issues or concerns. After all deployment tasks are complete, the team holds a final Go/No-Go meeting before releasing the Core Operations System back into production.

Any post-production issues are reported via our Incident Management process and triaged according to severity and impact. The project lead monitors all logged issues and escalates as needed. If a defect has a significant impact, we escalate to the vendor, who may provide an emergency hot-fix. The hot-fix is then scheduled, deployed, and tested as quickly as possible. For system issues that impact claims batch processing, our Core Operations System has an automated recall process that tracks where failure occurred and reprocesses the affected claims batch, assuring successful completion.

1.9. Coordinating Subcontractor System Modifications

Clear Health retains sole responsibility for fulfilling SMMC Contract requirements and works with our subcontractors to identify necessary modifications to their core systems to support operations and comply with contractual obligations. Modifications to subcontractors' core systems are identified as part of their initial implementation, with additional changes as needed to support State requirements and ongoing operations.

For initial implementation, all system configuration and changes are fully reviewed by appropriate members of the Clear Health implementation team before the subcontractor is given approval to begin operations. A project plan is defined with specific milestones and checkpoints for system modifications, integration testing, and readiness review. The scope of system modifications is comprehensive and based on the subcontractors' written agreements.

Clear Health maintains an established Subcontractor Oversight Program with a Florida-based Vendor Delegation Oversight Group (VDOG) that is staffed with a dedicated team and supported by executive leadership and departments across our organization. Our Subcontractor Oversight Program includes defined processes for making sure that new or changed Agency policies, data exchanges, and system requirements are clearly and consistently communicated, managed, implemented by our subcontractors, and verified by VDOG.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

VDOG works with Clear Health's Regulatory and Compliance teams to evaluate the required change and determine if any subcontractors are affected and to what extent. Based on the nature and complexity of the change, the team documents a plan for notification, implementation, and verification. As needed, system design discussions are arranged between the subcontractor and Clear Health's VDOG and Technology Services team to review required changes, establish a timeline for development, and plan for integration and user acceptance testing as appropriate.

The team tracks each subcontractor's plan and progress against the plan in the Task Tracker portion of the VDOG Dashboard. A documented process and centralized tracking system allows us to manage on-time, accurate implementation for each subcontractor, and provides a vehicle to continue to work through open issues. Additionally we have the subcontractor submit an attestation and documented proof that the change or task was completed. Oversight and monitoring of subcontractors provides the structure necessary to apply remediation and corrective action if they are not in compliance with contractual requirements.

2. NOTIFYING THE AGENCY OF POTENTIAL SYSTEM CHANGES AND ACCOMMODATING AGENCY DIRECTED SYSTEM MODIFICATIONS

Clear Health has documented processes for implementing any system change or modification to include any Agency directed change requests. Systems availability is critical to efficient operations in Florida and we schedule all maintenance that results in systems unavailability during times that do not compromise critical business operations. Our usual practice is to schedule system downtime on maintenance weekends. If we must schedule maintenance during normal systems operational hours, we will coordinate with the Agency for scheduling and approval.

2.1. Compliance with State Mandated Changes in Less Than 90 Days

Our MIS is built on a managed Medicaid model designed to facilitate the configuration and customization needed to meet State-specific requirements, and is supported by more than 4,500 employees in our Technology Services department. If the Agency mandates changes that require system modifications, our goal is to implement those as quickly as possible without sacrificing quality and accuracy of the system modification. We evaluate the system change request and make every effort to implement changes without system downtime to core processes. We will work with the Agency to establish an implementation and testing timeline that meets the State's expectations while not exceeding 90 days from the notice date.

2.2. Notification and Discussion of Potential System Changes

If a system modification is identified that would result in system unavailability to critical business processes, we have documented protocols that will be followed. We would create and maintain a project plan with key dates for configuration, testing, end user validation, and go-live target. As our partner in Florida, the Agency is notified before major changes are made to these core processes:

- Claims processing
- Eligibility and enrollment processing
- Service authorization management
- Provider enrollment and data management

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

When Clear Health executes a major conversion of a core transaction system, we will notify the Agency at least 90 days in advance. As directed by the Agency, we will discuss the proposed changes with its designated staff.

Unless otherwise agreed in advance by the Agency, scheduled system unavailability to perform maintenance, repair, or upgrade activities will not take place during hours that could compromise or prevent critical business operations.

3. IDENTIFYING, TRACKING, COMMUNICATING, AND RESOLVING IT PRODUCTION ISSUES THAT IMPACT INTERNAL OR EXTERNAL STAKEHOLDERS

Clear Health uses a single, common Incident Management process that is adhered to by all IT staff and vendors to manage all incidents within our IT environment.

The underlying objectives of Clear Health's Incident Management process are to:

- Resolve incidents within committed service level agreements (SLAs)
- Minimize duration and impact of service outages associated with an incident
- Help minimize business impact during an incident
- Minimize incident life cycles by automating tasks whenever possible, maximizing productivity of resources, and monitoring and measuring progress
- Classify incidents having a critical business impact as high priority and handle them effectively to minimize their impact

The Incident Management process defines the major activities, roles, and responsibilities for identifying, reporting, tracking, and resolving system incidents. This process improves manageability and reduces incident reoccurrence through a framework that supports consistency among all departments and provides a method for effective communication.

Clear Health's Incident Management Process:

- Establishes a common repository to be used across IT functional areas, providing visibility to all captured incident data and any actions taken to restore or provide the requested service
- Requires a single point-of-contact (SPOC) for internal end users to report all incidents; the SPOC is responsible for owning and overseeing the resolution and closing all incidents
- Provides a means for logging and assigning priority to incidents, which are then managed according to that priority and tracked to resolution throughout their life cycle (and escalated when appropriate)
- Focuses on restoring service
- Calculates priority based on impact and urgency noted on the incident record

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Uses SLAs to identify objectives and expectations for the user and the IT support staff
- Provides Incident Management personnel with access to all appropriate tools and information databases to help address the incident
- Documents workarounds and solutions on the incident record

The scope of Incident Management includes any event that could or does disrupt a service. This includes events communicated either directly by users, through the IT Enterprise Service Desk, or through an alert from an event management system tool or command center operator.

A SWAT or Tiger team approach is often employed to address high priority events that have cross-functional impact, with multiple IT teams involved in the solution. This approach uses a round-the-clock conference call meeting to facilitate communication between the SPOC and technical resources who are addressing the issue. The conference call line remains open and resources will continue to communicate and coordinate the solution until the problem has been resolved.

3.1. Response to Events Resulting in System Unavailability

We maintain processes and procedures to make sure that critical system functions are available to enrollees (members) and providers 24/7, except during periods of scheduled system unavailability agreed upon by the Agency and Clear Health. All other system functions and information are available to the applicable system users between the hours of 7:00 a.m. and 7:00 p.m. EST/EDT, Monday through Friday.

Upon discovery of a problem that may jeopardize availability or performance of critical system functions or the availability of information from our systems, including problems affecting scheduled exchanges of data between Clear Health and the Agency or its agents, we will notify Agency staff by phone, fax, or email within one hour. We will provide hourly status updates until the problem is resolved. In the notification, Clear Health will provide details regarding the impact to critical path processes, such as enrollment management and claims submission, and will work to resolve issues and restore services within 48 hours. When requested, Clear Health will provide the Agency with full written documentation, including a corrective action plan (CAP), regarding the critical system issue and our plans for preventing recurrence. The CAP will be delivered to the Agency within five business days of the problem's occurrence.

4. COMMUNICATING ISSUES AND UPDATES

Upon discovery of any problem within our span of control that may jeopardize availability or performance of critical systems or impact the scheduled exchange of data between Clear Health and the Agency or its agents, we will notify Agency staff by phone, fax, or email within one hour. Notification will include detail regarding critical path processes and plans for restoring the system or designated functionality. Clear Health will provide the Agency with hourly updates on progress resolving the issue.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

4.1. Response to Agency Reports of System Problems not Resulting in System Unavailability

Clear Health will respond in writing to Agency reports of system problems not resulting in unavailability within seven days of notification and will make corrections or complete requirement analysis and specifications within 20 days, correcting the deficiency by the effective date determined by the Agency.

4.2. Notification of Termination of Staff with Access to the Agency's Network

Clear Health will maintain connectivity to the Agency's wide area data communications network and relevant systems attached to the network, and will notify the Agency of termination of any staff with access to the Agency's network within 24 hours.

4.3. Subcontractor Notification Process

Clear Health's subcontractors are contractually required to notify us upon discovery of a problem that jeopardizes availability or performance of critical systems or in the event that they are unable to provide data that is needed to support compliance with scheduled data exchanges between Clear Health and the Agency. Upon receiving notification from the subcontractor, Clear Health will in turn notify the Agency and continue to send hourly updates until resolved. The Plan will maintain communications with the subcontractor until the issue has been resolved.

5. INTERNAL TESTING

Clear Health fully tests all system changes prior to deployment, defining the scope of testing and all required participants as part of the requirements analysis. For changes that interface with Agency or other external systems, we will coordinate with Agency staff, and others as appropriate, to perform integration testing. Additional details on integration testing are provided in the following section.

The BA and operational owner build or identify test data to validate that all requirements have been met, and regression test and fully exercise system capabilities.

During the coding process, the developer performs component and system testing to verify that all requirements have been accounted for. Additional system testing is then performed by the BA to cross-check the developer's results.

Once the BA has confirmed all required elements have been accounted for, the full suite of test cases is executed, including regression and integration testing, if applicable. In some instances we use tools to validate control totals within data tables or comparison analyses of before and after implementation for areas like claims processing. We also deploy automated testing scripts to execute on core functions. These types of tools enable us to volume test system changes and validate accuracy efficiently. Deployment requires that all testing is complete and appropriate approvals are documented. Approval, test cases, and results are archived in the release management tool.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5.1. Coordinating Subcontractor System Testing

Our Subcontractor Oversight Program has defined policies and processes for working with our subcontractors to make sure their systems are configured in compliance with the Agency's operational requirements. Implementation and verification plans are defined based on the nature and complexity of the required change, and testing plans are established and overseen by VDOG with final approval being required prior to initiation of production processes.

6. INTEGRATION TESTING

The BA reviews cross-functional and cross-system impact as part of the requirements analysis and documents identified impacts as part of the Requirements Review Document. The BA defines the scope and participants for each test component, as well as detailed test scenarios necessary to fully verify that all components are working as expected following the system change.

When a change affects external entities (for example, modified benefit indicators on the enrollment data exchange), the BA works with all impacted entities, such as the Enrollment Broker and subcontractors, to coordinate full end-to-end testing to verify production readiness. If necessary, we use subsets of production data to test specific scenarios and simulate the production environment as closely as possible.

Clear Health will work with the Agency on any required testing initiative, and, upon written request, will provide details of the test regions and environments for our Core Operations System, including a live demonstration of all systems, including our subcontractors systems, to enable Agency validation of system readiness.

7. CLAIMS REPROCESSING FOR RETROACTIVE SYSTEM CHANGES

Technology Services assesses all EDI and Core Operations System changes to determine impact to past claims, future claims, and those queued up for processing. If the effective date for a system change precedes the implementation date for that change, the BA includes a work plan for reprocessing any claims that meet the date of service requirements but were processed before the change implementation date. Once the system change has been made, but before production deployment, we perform regression testing by processing several batches of claims, including both impacted and non-impacted claims, for multiple providers. The BA and the Claims Operations team review the results to verify the change is working as expected.

Following deployment to production, the work plan is executed and all claims identified during the impact assessment are reprocessed and verified. Our goal is to have all claims reprocessed within 30 days of the production deployment date. Any applicable interest is paid at that time as well.

For system changes that are determined to impact claims processing by Clear Health's subcontractors, VDOG works with the subcontractor to define the scope of the change, establishing a plan for system testing and reprocessing impacted claims. The team tracks each subcontractor's plan and progress against the plan in the Task Tracker portion of the VDOG Dashboard. Once the claims are reprocessed, the VDOG team will obtain a paid claims report of the impacted claims and do a sample validation to assure accuracy of payment and any interest penalties.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The adequacy of the respondent's IT processes addressing internal modifications for its core systems and subcontractor's systems.
2. The extent to which the respondent's IT processes documented for implementing Agency-directed modifications is less than ninety (90) days.
3. The adequacy of the respondent's processes documented for handling production IT system issues.
4. The adequacy of the respondent's communication process used when system issues/updates are identified and resolved by the respondent and/or its subcontractors throughout the change control process.
5. The adequacy of the respondent's approach to system internal testing to ensure the respondent's and/or subcontractors' system changes/updates are accurate.
6. The adequacy of the respondent's approach to integration testing to ensure the respondent's and/or subcontractors' system changes/updates do not adversely affect other systems, including systems operated by Florida Medicaid and subcontractors' systems.
7. The adequacy of the respondent's approach to applicable claims reprocessing for retroactive system changes, including processing performed by its subcontractor(s).

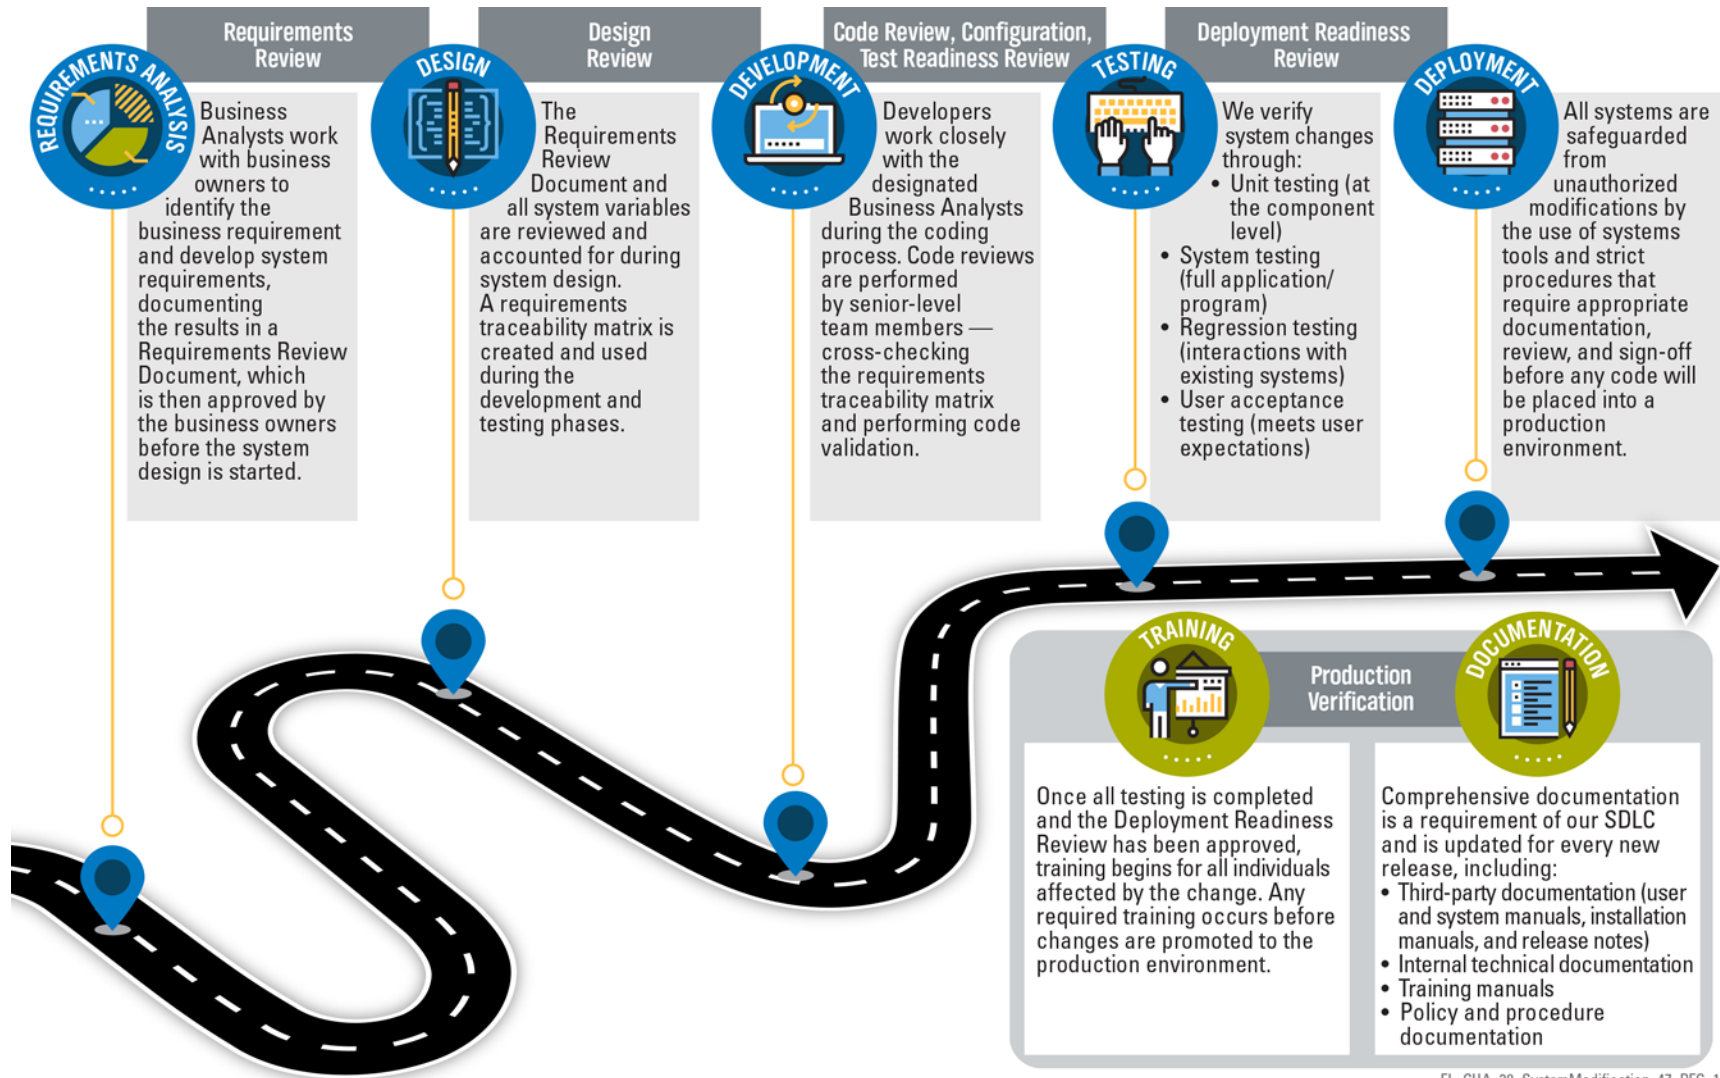

Score: This section is worth a maximum of 35 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 29 – Encounter Data Submission (Statewide):

- a. The respondent shall submit a flow chart and narrative description of its encounter data submission process including, but not limited to, how accuracy, timeliness and completeness are ensured.
- b. Completeness of encounter submissions requires that key fields are populated accurately for every encounter submission. The respondent must describe quality control processes that will ensure key fields including, but not limited to, recipient Medicaid ID, provider Medicaid ID, claim type, place of service, revenue code, diagnosis codes, amount paid, and procedure code are accurately populated when encounters are submitted.
- c. The respondent shall demonstrate quality control procedures to ensure documentation and coding of encounters are consistent throughout all records and data sources (ASR, FMMIS, special submissions) and across providers and provider types. The description should include tracking, trending, reporting, process improvement, and monitoring of encounter submissions, encounter revisions, and methodology to eliminate duplicate data.
- d. The respondent shall include any feedback mechanisms to improve encounter accuracy, timeliness and completeness.
- e. The respondent shall include documentation of the most recent three (3) years of encounter data submission compliance ratings, corrective actions, if indicated, and timeframe for completing corrective actions for Florida Medicaid.
- f. The respondent shall submit documentation describing the tools and methodologies used to determine compliance with encounter data submission requirements.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

With extensive experience submitting encounter data, we implement best practices, including processes that focus on submitting encounter data in compliance with the requirements specified in Attachment B, Scope of Service – Core Provisions Section X, Administration and Management, E – Encounter Data Requirements, a dedicated Encounter Audit team that continuously monitors and tracks encounter submission metrics using our Clear Health Analytics business intelligence (BI) dashboard, and an Encounter Task Force that performs root cause analysis and supports cross-functional issue resolution.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In Attachment SRC# 29-1: Encounter Workflow and Attachment SRC# 29-2: Historical Encounter Compliance, we have provided the following:

- A diagram of our encounter process that shows monitoring as integral to our workflow
- Our completeness and accuracy metrics for the previous three years

Clear Health understands that encounter data is essential to the continued success of the FL SMMC program and will continue to partner with the Agency, supporting its initiatives and collaborating on process improvements.

1. PROCESS TO ENSURE ACCURATE, TIMELY, AND COMPLETE ENCOUNTER DATA

Clear Health maintains high standards across all our systems and operations—especially in the critical areas of accurate, timely, and complete claims processing and encounter data submission. The leader of our dedicated Florida-based Encounter Audit team has over 20 years of Medicaid experience. This team is responsible for overall encounters compliance and manages our comprehensive end-to-end encounter data management operations to support our Florida SMMC program. We are supported by national teams that focus on the integrity of our claims processing and encounter data extract process. Dedicating knowledgeable resources to our Florida claims processing and encounter management promotes the following:

- Continued compliance with Agency requirements
- The highest degree of claims payment accuracy
- Provider satisfaction through prompt claims payment and focused attention to claims inquiries
- Submission of complete, accurate, and timely encounter data to the Agency
- Remediation and resubmission of rejected encounters
- Performance and scalability to support current volumes and future growth

Clear Health's encounter data submission process is designed to support complete, accurate, and timely encounter submissions to the Agency:

- Complete encounter data: We have established strict controls in our encounter process to ensure that adjudicated claims – paper and electronic, as well as subcontracted provider claims – are processed and submitted.
- Accurate encounter data: We run incoming claims and encounters against edits that check for the presence and validity of required data elements during initial processing to make sure that we have complete and accurate data for submission to the Agency. If a claim or encounter fails one or more edits, we return it to the submitter for correction and resubmission.
- Timely encounter data: We have designed our submission schedule to meet Agency submission requirements – with additional time allowed for review and remediation of any errors.

1.1. Complete Encounter Data

Clear Health will continue to submit encounter files to the Agency that contain encounter data from all claim sources – regardless of format (paper or electronic) or type of provider (network, out-of-network, sub-capitated, atypical, or subcontracted), for all services rendered to enrollees (members), including expanded benefits. We strive to achieve a 100 percent complete submission

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

rate and have monitoring processes in place to assure we maintain the contractually required 95 percent completeness measure.

Our process pulls claims, claim adjustments, and encounters processed since the last submission and loads the data into our Encounters Management System. Controls validate that all retrieved claims and subcontractor encounter records load properly to the Encounters Management System for subsequent processing using comprehensive edit routines to verify all fields contain accurate and complete information.

We compile all encounters that pass the required edits into a HIPAA-compliant 837 or National Council for Prescription Drug Programs (NCPDP) file and send it to the Agency's designated fiscal agent. The Encounter Audit team uses a real-time view of claims data provided by the Clear Health Analytics Business Intelligence (BI) dashboard to review pended claims or service lines that failed edits and coordinates corrective action with the appropriate operational unit. If we determine changes to the encounter data are needed, we will work with our health care providers to require submission of an adjustment to any claims we may have paid.

The BI dashboard provides the team with the ability to drill down and view metrics and data for encounter submission and to monitor key performance indicators (KPIs) such as completeness, acceptance/rejection rates, and timeliness. The BI dashboard contains a complete view of all encounters including those from subcontractors. The system generates detailed management reports to help the team monitor timely remediation and submission of encounters that pend for incomplete or incorrect data during internal processing. Once we receive corrected information, the automated process includes the remediated encounter in a subsequent submission.

We load encounter response files from the Agency's fiscal agent and work rejections with the appropriate department or subcontractor. We also monitor rejected encounters using aging reports and manage correction and resubmission of 100 percent of encounters for which errors can be remediated by the submitting provider.

We maintain comprehensive information on each encounter submission – including claim ID, line number, type (original, adjustment, void), file path, and creation data. File retention policy exceeds the Agency 10-year requirement.

Our Encounter Audit team performs a weekly reconciliation of all adjudicated claims and submitted encounters to confirm the Completeness KPI is at 95 percent or better. During their weekly meetings, the Encounter Task Force reviews all claims and encounters that could not be submitted and engages the appropriate resources to drill down and determine the root cause. The workgroup determines appropriate action to address issues quickly to maintain the required KPI measure.

Quarterly, upon receipt of the FMMIS Encounter Data for Risk Adjustment file, we reconcile Clear Health's claims and encounters to the FMMIS file to ensure all were submitted and accepted by the Agency. If any claims/encounters are missing, we will make sure they are submitted within the timeline provided by the Agency.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.1.2. Encounters for Sub-capitated Providers

Sub-capitated providers present a unique challenge to complete encounter data submission due to the alternate reimbursement methodology defined in their contracts. Because of this, we have put tracking and controls in place to monitor claim submissions, identify potential submission issues, and work with sub-capitated providers to improve the completeness of their submissions. We have added focused reporting for our sub-capitated providers and use our Clear Health Analytics BI dashboard to drill down and analyze data using various criteria such as provider, claim source, claim status, region, and date (received, adjudicated, paid, or submitted). On a weekly and monthly basis, we run reports to analyze submission patterns across providers and compare claim submissions for sub-capitated providers with claim volume statistics for fee-for-service providers. Using a volume ratio based on assigned membership and total claims submitted, we identify sub-capitated providers that are not performing as expected. Provider Relations then meets with the provider to discuss any roadblocks to claim submission and sets up a monitoring program with benchmarks for that provider.

1.2. Accurate Encounter Data

Accurate encounter data requires accurate claims data and a thorough understanding of the claims data elements required for FL SMMC encounters. Clear Health bases our claim and encounter edits on Agency program requirements – ensuring the presence and validity of all required data elements — including member and provider data, date of service, diagnosis, procedure, revenue code, date of claim processing, and date of payment. We check for valid X12 format as well as the presence and validity of provider Medicaid ID and taxonomy. We promote encounter data accuracy by applying service specific edits to all incoming claim records regardless of claim format (paper or electronic) or type of provider (network, out-of-network, sub-capitated, or atypical).

We contractually require our subcontractors to comply with the Agency's claim requirements. By reviewing subcontractor encounter data against the same comprehensive edit routines as internally processed claims, we verify all fields contain accurate and complete information and follow the Agency's submission requirements.

We have built our encounter submission schedule to include time for careful review and remediation of errors. Encounter Audit closely monitors the process to support compliance with Agency requirements. Encounters Analysts monitor each encounter data file submission as it moves through the process including the use of Ramp Manager to validate all encounter files.

We have included checkpoints throughout the encounter process and use a series of internal reconciliation and certification reports to manage, monitor, and validate the integrity of the encounter data submission. If there are problems with individual records that would cause the encounter to fail, we work with the provider or subcontractor to remediate, pending the encounter for inclusion in a future submission. We closely manage remediation of pended claims and work to resolve issues quickly so that encounter submission deadlines are met. When necessary, we make program changes to enhance encounter processing and reporting, incorporating additional front-end edits to maintain compliance with the Agency's requirements.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

1.3. Timely Encounter Data

Our encounter data submission process is highly structured and closely monitored, using our Clear Health Analytics BI dashboard to support compliance with contractual requirements. We maintain a comprehensive schedule of system processes, review tasks, and submission dates necessary to deliver complete, accurate, and timely encounter data to the Agency. This schedule documents each step and when it needs to be completed to meet encounter data submission deadlines.

The processing and submission schedule can be easily modified to accommodate changes to the Agency's encounter data submission requirements. We have set up the current process to submit encounters according to the following timeline:

- New claims within seven days of claims adjudication
- Rejected encounter files within seven days (but most are resubmitted within 48 hours)
- Updated X12 encounters within 30 days of reversal or payment adjustment
- Updated NCPDP encounters within seven days of reversal or payment adjustment
- Corrections for rejected encounters within 30 days

We validate the submission details tracked on our BI dashboard against the Agency's weekly timeliness reports and investigate any discrepancies using the rejection details provided in the response files, identifying root cause and making corrections as needed.

2. KEY FIELDS NEEDED TO IDENTIFY SERVICES

We understand that the data we submit as encounters must be able to be linked to and integrated with Agency data and therefore have edits in place to make sure that we provide key elements such as the State assigned member and provider IDs.

We base our claim and encounter edits on Agency program requirements – ensuring the presence and validity of all required data elements to provide the Agency with the information they need to perform rate setting and meet all CMS reporting requirements, including the following:

- Billing Provider Taxonomy and NPI
- Member data including State assigned ID
- Rendering provider taxonomy, NPI, and physical location address (including zip+4)
- Date of service
- Diagnosis codes and service diagnosis pointers
- Procedure/revenue codes
- Units
- COB payer paid amount
- Amount paid
- Date of adjudication
- Date of payment/check date
- Adjustment information

We review subcontractor encounter data against the same comprehensive edit routines as internally processed claims and hold our subcontractors accountable for correctly submitting all required and key field combinations.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

3. QUALITY CONTROL PROCEDURES FOR KEY FIELDS

We maintain front-end edits as part of our claims processing to verify the presence and validity of key fields including non-PO box provider address and dispensing provider NPI as applicable. Providers are required to correct and resubmit claims and encounters with missing or invalid information.

We also perform a final validation on all encounters before submission to ensure that claims data was captured and mapped to the outbound encounter correctly. The Encounter Task Force validates and creates edits as needed to comply with system changes and any new requirements communicated by the Agency.

During orientation and training, we educate providers on claim/encounter requirements and also list those requirements in the provider handbook and on the provider portal. The Encounter Audit team monitors provider claim submission using detailed reports to identify gaps in the submission of required data, notifying Provider Relations that outreach to the provider is needed. The Network Manager then reaches out to providers to assist them in correcting their future claim submissions to include all required information.

We review subcontractor encounter data against the same comprehensive edit routines as internally processed claims to verify all key fields are included and populated correctly. Encounters that are missing required elements are rejected and must be corrected and resubmitted by the subcontractor.

4. PROCEDURES TO ENSURE ENCOUNTERS ARE CODED CONSISTENTLY ACROSS PROVIDERS AND PROVIDER TYPES

We require all providers in the network to enroll in the FMMIS as a provider or managed care registered provider to make sure encounters submitted with their provider information will not be rejected. We understand that the information submitted on the 837 encounter transaction must make a one-to-one match to a provider's Medicaid ID based on the NPI Crosswalk information (NPI, taxonomy, and Zip+4) that is provided on the Provider Master List (PML). We also check incoming claims and encounters submitted by our subcontractors to verify that valid FMMIS member ID and provider ID are present.

As a part of our comprehensive encounter submission process, we monitor and track all rejections including any provider related rejections. We check for submission compliance, including the use of required forms as applicable, and reach out to providers for education and training if they are not submitting claims information as required.

We understand the critical importance of capturing prescribing provider data on pharmacy encounters and have worked closely with Express Scripts, our Pharmacy Benefit Manager (PBM), to establish provider education regarding submitting the appropriate Medicaid ID on all prescriptions and have established monitoring to make sure that this data is supplied and captured consistently.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

5. PROCEDURE TO ENSURE ENCOUNTERS ARE CONSISTENT ACROSS DATA SOURCE

Clear Health collects all claims and encounter data received from participating and non-participating providers, sub-capitated providers, and subcontracted vendors into a central repository from which we source all scheduled encounter submissions to the Agency's FMMIS via the designated fiscal agent. We maintain all encounter details, including those that we use to facilitate tracking and validation across sources such as Claim ID, encounter submission status, and the State assigned transaction control number. Data retention for the Encounters Management System exceeds the Agency's 10-year requirement.

We verify that all submitted encounters include the amount billed and the actual amount paid to the provider for the service, including claims paid by our subcontractors. Our electronic data interchange (EDI) process verifies that billed amount is submitted and rejects any claims that are missing this and other required data elements. For pharmacy claims, our PBM reports the amount that was actually paid to the pharmacy, excluding any PBM or other administrative costs, as part of the paid claims data submitted by the vendor.

Clear Health contractually requires our subcontractors to comply with the Agency's claim requirements and reviews subcontractor encounter data against the same comprehensive edit routines as internally processed claims to verify all fields contain accurate and complete information and follow the Agency's submission requirements. We reject encounters that are missing required elements and monitor correction and resubmission by the delegated subcontractor. Our contracts hold subcontractors accountable for submission of encounters and specify penalties for non-compliance. Account Managers monitor receipt of accurate, timely, and complete encounter data and Encounter Analysts closely monitor encounters for our subcontracted vendors.

6. ENCOUNTER SUBMISSION PROCESS FLOWCHART

We have provided Attachment SRC# 29-1: Encounter Workflow Flowchart to illustrate our process from consolidation of paid claims and subcontractor encounter data through loading the response file from the Agency's fiscal agent and remediating any errors.

7. TRACKING, TRENDING, AND MONITORING ENCOUNTER SUBMISSIONS AND REVISIONS

Following a comprehensive schedule of system processes, review tasks, and submission dates, the Encounter Audit team closely tracks, trends, and monitors the full encounter process lifecycle, starting with the adjudicated claim and ending with the remediation of rejections and submission of adjustments and recoupments.

Adjunct to our Encounter Audit team, we have established a cross-functional Encounter Task Force as the front-line team to identify and remediate encounter issues as quickly as possible and to assure that we meet the following service levels and compliance standards:

- Submission of 95-100 percent of all encounter data within seven days of the claim adjudication date
- 30-day reconciliation and remediation of rejected encounters

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- 30-day submission of adjustments and recoupments for X12 encounter transactions with seven-day submission of updates for NCPDP encounter data
- 100 percent completeness against our internal check-run file

Comprised of key stakeholders and executive sponsors, the Task Force has implemented key performance measures for encounter data and established cross-functional monitoring metrics that are based on line of business requirements — including per-member-per-month averages and total volume. Responsible parties have been established throughout the encounter process, including a dedicated subcontractor oversight team — the Vendor Delegation Oversight Group — which engages delegates in the monitoring process.

The Task Force engages teams throughout the organization to quickly implement process modifications and enhancements to remediate issues and address encounter submission delays.

7.1. Monitoring Subcontractor Encounters

The Encounter Audit team maintains an internal calendar of expected submission dates for each subcontractor. The automated process checks for files and sends alerts to the designated manager if files are not received according to the calendar, triggering the manager to follow up with the subcontractor. As noted above, subcontractors are included in and monitored using the same KPI reporting tool guides that the Encounters Audit team uses. This is also presented to the Task Force and includes monitoring submission statistics, including claim volume for subcontractors and sub-capitated providers, via the Clear Health Analytics BI dashboard. Gaps in submission or drops in overall volume are noted and the Vendor Delegation Oversight reaches out to the delegate's Account Manager who works with the subcontractor to address the issue. A summary of these metrics is also reported to the Encounter Task Force for its review.

7.2. Claims and Encounters Reconciliation

Using the Clear Health Analytics BI dashboard, the Encounter Audit team reconciles incoming claim statistics to outbound encounter totals, reporting any discrepancies to the Encounter Task Force to be researched and resolved.

We maintain all encounter details in the Encounters Management System, including source Claim ID and encounter submission status. The extract process uses these details to identify initial submissions vs. replacements or adjustments to make sure the encounter is submitted appropriately. We also use sophisticated edits in the front-end claim process to evaluate the claim against processed claims data to identify duplicate claims. We automatically deny claims that are definitively identified as duplicates and pend claims for review when the system cannot make a positive determination. Eliminating duplicate claims reduces the chance of submitting duplicate encounters.

On a weekly basis, the Encounter Audit team reviews details from Agency response files to identify high volume errors that may require research, updating the encounter's status within the Encounters Management System, and tracking error correction and resubmission.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

7.3. Financial Reports and Monitoring

The Encounter Audit team monitors weekly reports that are generated via the Clear Health Analytics BI dashboard. The weekly encounter summary report shows current performance measures for completeness, accuracy, and timeliness that are based on financial claim counts and total dollars as compared to submitted encounter counts and totals. Also, on a weekly basis, we review our monthly performance on accepted encounters with detailed counts by edit code for pends and rejections. The Encounter Task Force uses these reports and metrics for its weekly review.

Our Medical Economics department performs additional monitoring through routine monthly reports. Medical Economics also reviews this data for over- and under-utilization trends, scoring providers according to their annualized encounter submission rate based on the number of assigned members. Using a green, yellow, red rating system, we identify providers for re-education and assistance in removing any barriers to timely submission. Unsuccessful remediation efforts could result in converting sub-capitated contracts to fee-for-service or terminating the provider.

7.4. Scheduled Processes and Tasks

For each encounter submission we:

- Load newly adjudicated claims to the Encounters Management System and apply encounter edits against all encounter data that has not yet been sent to the Agency
- Generate encounter error reports and distribute to corresponding departments to be worked
- Create 837 and NCPDP formatted files for all encounters that have passed the edits. Validate 837 files in Ramp Manager
- Submit 837 and NCPDP files to the Agency's fiscal agents
- Complete all attestations within the same day as submission
- Retrieve the 999, 277U, and 835 response files from the Agency's fiscal agents
- Upload the response files to the Encounters Management System
- Review encounter submission results and remediate rejected encounters
- Review daily encounter aging report

Weekly:

- Monitor and confirm the Completeness KPI is at 95 percent or better; if not, then escalate to be addressed
- Monitor and confirm the Timeliness KPI is at 9 percent or better; if not, then escalate to be addressed

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- Validate timeliness against the Agency's timeliness reports and work with internal users to resolve differences
- Monitor and confirm the Accuracy KPI is at 95 percent or better based on previous week's encounter response files; if not, then escalate to be addressed
- Weekly rejection review:
 - Review reconciliation results for comparison of claims processed against 837 encounter submission and corresponding 277U/835 files
 - Identify new rejection codes, investigate root cause, and identify and implement solutions
 - Monitor and track all rejections to gauge success and escalate issues as needed during our weekly Encounter Task Force meeting
 - Generate rejection reports for encounters to be remediated prior to the next resubmission
- Edit analysis: Identify if there are any additional edits based on new rejections
- Encounter Task Force meeting with all departments to communicate and verify the completeness, timeliness, and accuracy, and provide a resubmission status update; prioritize and follow up on all outstanding encounter issues
- Encounter Task Force meeting to review current encounter related issues, verify any Agency required changes/upgrades and create an action plan to solve any outstanding issues

8. HISTORICAL COMPLIANCE RATINGS

Clear Health has provided detailed compliance statistics in Attachment SRC# 29-2: Historical Encounter Compliance. This data represents historical ratings for both legacy Amerigroup and Simply (inclusive of Better and d/b/a Clear Health data) for the preceding three fiscal years. Our goal is to continue to improve our overall performance against these measures by applying best practices drawn from all three organizations, including our dedicated Florida-based Encounter Audit team and real-time monitoring using our Clear Health Analytics BI dashboard.

9. TIMELY CORRECTIVE ACTIONS AS NEEDED

A successful encounter process is built by regularly reviewing outcomes and learning from successes and failures. Over time and as Medicaid Managed Care has matured, encounter data reporting and the expectations around its use have changed incrementally, and we have adapted our processes to comply, building a successful and robust encounter data management process as a result.

Through our weekly monitoring processes, we have a timely view of the issues that are impacting our encounter submissions. Our cross-functional Encounter Task Force reviews all rejections and quickly works towards identifying and implementing solutions. Key leaders from various departments each bring a different perspective to the table, creating a synergy that helps us to see the broader picture and facilitates prompt resolutions to difficult problems.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

By applying this strategy – monitoring rejections, reviewing, discussing, and sharing cross-functional insights – we were able to quickly resolve an issue where an edit, that we had added to our front-end claims process in compliance with an Agency encounter edit, was causing a large volume of claim rejections and provider disputes. By bringing together representation from the Encounters, Claims, and Provider Relations team at Encounter Task Force meetings, we were able to identify this as an issue that needed to be addressed quickly and had the expertise needed to determine that the Agency edit that was causing this was not in agreement with the Agency's UB-04 Claim Form Handbook. We presented our case to the Agency and were able to get the edit changed to Informational. We then quickly removed the edit from our claims system and reprocessed the impacted claims and submitted the corresponding encounters.

External collaboration is equally as important to timely corrective actions. Shortly following the implementation of the SMMC program, and at the Agency's request, Clear Health quickly established regular monthly meetings with the Agency and its fiscal agent to provide a forum for collaboration and issue resolution. For the past four years, we have faithfully hosted monthly meetings where key technical leads from our IT, EDI, and Encounters teams have come together with their counterparts at DXC to discuss new requirements or old challenges.

Our participation in these meetings has enabled us to clarify Agency policy and proactively address issues that may occur due to new requirements. One such case occurred when the Agency differentiated repairable edits from fatal (non-repairable) edits. There were two provider-related edits that were marked as fatal but based on our analysis we knew that these edits were due to events that were in fact repairable and marking them fatal would create a gap in encounters reporting. We presented our case to the Agency and these edits were switched to repairable thereby avoiding a large volume of encounters that we would have otherwise never been able to submit.

10. TOOLS AND METHODOLOGIES TO DETERMINE COMPLIANCE

As a part of the weekly rejection review process, Clear Health pulls data from the Clear Health Analytics BI dashboard and uses pivot tables to reconcile all adjudicated claims against the encounters files — including submission and response files. The BI dashboard supports the following tasks and analysis:

- Extracting data based on adjudication or submission date
- Reconciling encounter submission and response files
- Reviewing Encounters Management System edit results in total or by rejection code
- Generating summary sheets for completeness, timeliness, and accuracy for initial submission and resubmission
- Reviewing encounter details by provider to identify provider specific issues

This monitoring approach promotes contract compliance and continuous quality improvement.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

11. CONVERTING PAPER CLAIMS TO ELECTRONIC ENCOUNTER DATA

The clearinghouses perform HIPAA compliant editing and submit 837 files daily to Clear Health. We have an automated process to upload 837 files into our Core Operations System for processing. The Core Operations System assigns each claim a unique internal control number to track its progress from initial entry into our system to final adjudication. We maintain an image of each electronic claim in our document management system, and real-time access to images facilitates adjudication and research tasks. The claims process applies HIPAA compliance and initial business rule edits (such as member exists in our system) to electronic and paper claims prior to adjudication. We reject claims that fail edits (prior to loading into our adjudication system) and notify the provider of the reason.

For claims we receive on paper, throughout each day, Document Services batches, scans, and exports the files for data entry. After we perform quality checks, we create 837 claims data files for processing into our claims system. On average, this cycle occurs within 48 hours of receipt, helping us process clean claims as quickly as possible.

We run daily exception reports to monitor that all claim batches are loaded into the Core Operations System. Claims are processed daily through an automated mass adjudication process after the claims upload is completed.

We currently acknowledge claims receipt according to the Agency's requirements. For claims submitted electronically we provide an electronic receipt within 24 hours after the start of the next business day and we make receipts for paper claims available through our secure provider website within 15 days of receipt.

12. IDENTIFYING AND CORRECTING ISSUES THAT COULD RESULT IN INVALID ENCOUNTER SUBMISSIONS

We understand the value of encounter data to the Agency and devote the system and staffing resources necessary to submit complete and accurate data. Accurate operational data is critical to accurate encounter data. Our operational functions contain processes and procedures designed to protect the accuracy and integrity of our member, provider, and claims data.

By applying tight controls on these processes, we are able to prevent submission of invalid encounter data to the Agency. These processes and controls include:

- Strict controls on the modification of provider and member information and regular data audits to validate accuracy
- Conversion of all paper claims into electronic format prior to claims processing
- Comprehensive and stringent compliance edits and business rule validations performed on all claims regardless of source and type of provider
- Tightly managed claims process to resolve pended claims quickly and accurately

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our encounter data submission process contains multiple sets of edits, validations, and checkpoints designed to identify processing issues and data problems before encounters are submitted to the Agency.

When issues are discovered after submission, we perform a root cause analysis to identify changes that we can make to our processes or systems to prevent a recurrence or identify problems earlier in the cycle. Our goal is to provide the Agency with the most complete and accurate encounter data possible.

To facilitate continuous improvement, we regularly meet with the Agency and its fiscal agent to discuss solutions for current encounter submission challenges, and review policies, procedures, and systems to identify ways to streamline operations, increase efficiency, and improve overall performance. Through these efforts we have worked with the Agency to adjust the status for various encounter edits (from fatal to repairable, or repairable to informational), and have implemented several new reports to better track data through the encounters process and monitor the accuracy of data that is sent to state partners. Reports include the following:

- Source-to-target reconciliations to confirm that all claim data is loaded into the Encounters Management System, including subcontractor claims
- Full accounting of each claim within a batch to verify that all claims are present and that the number of claims loaded matches those submitted and pending
- File submission validation reports that match data written to the encounter file to the source system to validate key data elements
- FMMIS quarterly file reconciliation
- Financial reporting comparison between encounters submissions and cash disbursement journals, lag reports, and financial statistical reports

13. TOOLS TO MONITOR ENCOUNTER SUBMISSION COMPLIANCE

The Encounter Audit team monitors encounter submission status and statistics, including details for subcontractors and sub-capitated providers via the Clear Health Analytics BI dashboard. Any gaps in submission or drops in overall volume are noted and the Audit team reaches out to Provider Relations or the Vendor Delegated Oversight Group to facilitate provider outreach and training.

Using the BI dashboard, the Encounter Audit team can review encounter details by provider to monitor volume, review rejections, and identify specific edits that are issues for each provider. Summary level data is used to identify trends and isolate providers who require additional training. A summary of these metrics is also reported to the Encounter Task Force for its weekly review.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Evaluation Criteria:

1. The adequacy of the respondent's process to ensure accurate, timely, and complete encounter data.
2. Demonstrated knowledge of the combination of key fields needed to identify services.
3. Adequacy of procedures, including quality control procedures, to identify key fields and ensure they are accurately populated during encounter data submission.
4. Adequacy of procedures to ensure encounters are coded consistently across providers and provider types.
5. Adequacy of procedures to ensure encounters (volume, categorization, dollar amounts, dates) are consistent across data sources, including applicable subcontractors.
6. The completeness of the respondent's flowcharts describing its encounter data submission process.
7. The adequacy of the respondent's mechanisms for tracking, trending, monitoring encounter submissions and revisions, including the type and frequency of activities, and methodology to eliminate duplicate data.
8. The adequacy of the respondent's encounter data submission historical compliance ratings.
9. The adequacy of the respondent's ability to implement timely corrective actions to compliance ratings, if indicated.
10. The adequacy of the tools and methodologies used to determine compliance.
11. The adequacy of the respondent's process for converting paper claims to electronic encounter data.
12. The adequacy of the respondent's approach to identifying and correcting specific processing/systems issues that could result in invalid data being submitted to the State.
13. The adequacy of the tool to ensure that all encounters are submitted.

Score: This section is worth a maximum of 65 raw points with each of the above components being worth a maximum of 5 points each.

*Simply and Amerigroup statistics are based on encounter submissions for all products for Simply Healthcare (Simply Healthcare, Better Health, Clear Health Alliance) and Amerigroup.

This page is intentionally left blank

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 30 – Encounter Submission for Sub-Capitated, Subcontracted, Non-Pay and Atypical (Statewide):

The respondent shall describe how it will work with providers, particularly subcapitated providers, subcontractors, atypical providers, and non-participating providers to ensure the accuracy, timeliness and completeness of encounter data.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

We understand that encounter data is critical to the continued success of the SMMC program and have established training and support for our providers and subcontractors to aid them in complete, accurate, and timely submission of claims and encounters. We also understand that providers must be eligible for participation in the Medicaid program. If a provider is currently suspended or terminated from the Florida Medicaid program whether by contract or sanction, other than for purposes of inactivity, that provider is not considered an eligible Medicaid provider and therefore is not allowed in our network, nor will we pay claims for this provider.

1. REGISTERING PROVIDERS IN THE FLORIDA MEDICAID MANAGEMENT INFORMATION SYSTEM (FMMIS)

Clear Health understands that for encounter data records to be accepted by the Agency, providers must be recognized in the FMMIS as either actively enrolled Medicaid providers or as Health Plan registered providers. We have a process in place to ensure that both out-of-network providers and network providers are registered in FMMIS prior to encounter submission to the Agency. Sub-capitated providers are network providers and follow the same enrollment and setup processes including registration in the FMMIS.

During the network contracting and credentialing process, Provider Relations and Credentialing use the most recent state Provider Master List (PML) to verify that the provider NPI is registered in FMMIS and the provider has an active Medicaid provider number or has submitted their registration form to the Agency. We also check the following exclusion lists:

- Office of the Inspector General (OIG)
- Federal List of Excluded Individuals and Entities (LEIE)
- Federal System for Award Managements (SAMS)
- CMS

If, after careful review of the PML file and designated exclusion lists, it is determined the provider is not registered with FMMIS and is not present on any exclusion list, we then review the following to make sure the provider is not ineligible to provide services:

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

- AHCA MPI Monthly Ineligible Provider Reports
- AHCA MPI Terminated Providers
- Payment withhold alerts

If the provider is determined to be eligible, they are directed to begin the registration process. Our Provider Network Managers instruct each provider that claims will not be paid until they have been assigned a Medicaid ID and that claims must be billed with the appropriate ID for each designated NPI, taxonomy, and Zip+4.

We verify appropriate Medicaid ID submission as part of our claims processing using front-end edits to reject claims submitted by providers who do not have a state Medicaid ID. We then contact those providers and explain the process to acquire a state Medicaid ID. This validation step ensures that adjudicated claims pulled for encounters processing have the state Medicaid ID as required by the Agency.

For non-par providers, prior to claims payment, we use a limited provider verification/credentialing process to validate the provider's NPI, active state license, and Medicaid ID. We also check the state's Background Screening (BGS) database and query the OIG, LEIE, SAMS, Agency, and CMS provider exclusions lists as well as the Agency's provider payment suspension information received from MPI.

If the provider does not have a Florida Medicaid ID or a completed BGS record, we refer the provider to the Agency's limited provider enrollment process for the completion of a Level II background screening and to obtain a Medicaid ID. If the provider already has a Level II BGS and is not listed on any of the exclusion or suspension lists, we will submit the appropriate registration form to the State.

We enforce the same requirement with our subcontractors and require that they verify providers in their network obtain a Medicaid provider ID or a managed care plan registration number during contracting and credentialing.

2. PROVIDER EDUCATION AND TRAINING ON ENCOUNTERS REPORTING

We base our encounter edits on Agency program requirements, which ensures the presence and validity of all required data elements, including enrollee (member) demographic data, rendering/billing provider NPI and Medicaid ID (as appropriate for service), provider service address, date of service, diagnosis, procedure, revenue code, date of claim processing, date of payment, and amount paid for the service.

2.1. Initial Provider Training

Provider training is an important element in supporting providers and making sure they submit claims that include required information for encounters reporting. We provide newly contracted providers with comprehensive initial training within 30 days of their contract effective date; providing the tools and knowledge to accurately report the services they provide to our members and receive timely reimbursement for those services. Training participants are shown how to complete a paper claim and how to use our provider portal tools. We have created online training for those providers who cannot attend an onsite training session within 30 days.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

The claim specific training includes education on:

- Clear Health member ID cards and eligibility verification
- Provider help line
- Service authorizations
- Claims submission methods, including paper, provider portal, and clearinghouse
- How to complete a paper claim including specific field values and common errors
- Benefits of electronic claims submission
- Entry of a claim through our provider portal
- How to register with FMMIS
- Claims adjudication and payment
- How to check claims status
- Common claims submission errors, avoidance, and problem resolution
- Key fields needed to identify services
- Process and timing for filing an appeal
- Contact information for the Provider Network Manager
- Forms (CMS 1500, UB 04/CMS 1450)

At the end of each training session, we ask participants to complete a survey to assess their satisfaction with the presenters, training materials, content, and effectiveness, and also solicit suggestions for additional provider education topics. Over 98 percent of providers surveyed found the presentation valuable, informative, and easily understood.

At initial training, we also distribute copies of our provider manual which outlines billing procedures, claims processing timeframes, and dispute resolution process and timeframes. We also present instructions on how to use our provider portal where providers can access key provider education information.

2.2. Ongoing Provider Training

Clear Health Provider Network Managers work individually with providers in their office locations to train them on paper and electronic claims submission and guide them step-by-step through the process. They walk providers through completing a paper claim and teach them how to submit an electronic claim using the online claim entry tool on our provider portal. We stress to the provider the potential cost savings they can achieve by submitting claims electronically rather than on paper.

We have received a positive response from our providers on the value of this direct hands-on approach to claims training. Although we encourage providers to submit claims electronically, we support providers with all claim submission methods and associated benefits. We will continue to support providers who wish to submit paper claims.

We present ongoing provider training for the top five specific provider types identified by Clear Health through our monitoring and QI processes, and claims submission and payment processes. We will conduct the training monthly for a period of at least 12 months following the implementation of the SMMC Contract, covering, at a minimum, common claims submission errors and how to avoid them.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Subcontractors are required to meet the same level of training and support for our downstream providers.

2.3. Day-to-day Support for Providers

We furnish providers with a toll-free provider help line for assistance with claims submission. We make every effort to quickly and efficiently resolve claim and encounter questions from providers. Call center employees are trained to address questions, revise and reprocess claims, and provide further education while providers are on the telephone. We route any issues that require additional research to our Florida-based Internal Resolution Unit (IRU).

We use provider bulletins and blast faxes to communicate program updates, changes to policy and claims billing rules, and upcoming webinars and training events. Provider bulletins are available 24/7 via the provider portal and blast faxes are sent out as needed to the fax number designated by the provider.

Claims Operations monitors daily claims processing reports, including a review of pended claims. We focus on key fields as part of our monitoring and if a problem requires provider intervention, we proactively contact the provider to explain the error, achieve resolution, and deliver education to help prevent future errors. We also review specific claims monitoring reports to make sure providers are paid quickly and correctly. If we see specific provider problems, we work with the provider to correct the error and customize our education to reinforce correct billing procedures.

To educate and support providers who wish to submit claims electronically, we also maintain two electronic data interchange (EDI) claims submission guides, one for professional claims and one for institutional claims, that include detailed information on electronic claims submission. We publish these as tools and resources via the provider portal. These documents describe the EDI process and the benefits to providers. They provide an overview of the EDI process and include topics such as:

- Responsibilities of Clear Health and the clearinghouses
- Provider responsibilities for using the clearinghouse and our provider portal
- How to get started with EDI
- Clearinghouse fees and charges
- EDI claim requirements
- Claim rejection scenarios
- EDI report options and features

We also maintain a dedicated EDI hotline to answer specific questions related to electronic claims submission. Hotline employees can help providers with questions related to set-up, submission issues, and claim rejections.

3. PROVIDING SERVICE AMOUNT AND COST DATA

All claims data processed by Clear Health include the amount billed and the actual amount paid to the provider for the service, including claims paid by our subcontractors. Our EDI process verifies that billed amount is submitted and rejects any claims that are missing this and other required data elements. For pharmacy claims, our PBM reports the amount that was actually paid to the pharmacy, excluding any PBM or other administrative costs, as part of the claims data.

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

submitted by the vendor. Edits are applied to subcontractor encounter submissions to verify all required data elements are included. Encounters that are missing required elements are rejected and must be corrected and resubmitted by the subcontractor. Validation of all encounter files submitted to the Agency ensures that appropriate payment amounts are submitted as well.

4. EDUCATING AND SUPPORTING PROVIDERS WHO SUBMIT PAPER CLAIMS

Clear Health offers flexible claim submission options to providers, including paper and several electronic methods. While we accept and support providers who submit paper claims, we encourage providers to take advantage of one of our several methods of electronic claims submission, including a no-cost option for electronic claims submission via Availity. Our provider education campaign has increased the rate of electronic claims submission. Today, more than 85 percent of Florida claims are submitted electronically, and we continue to work toward increasing the number of electronic submissions. Our provider training, both initial and ongoing, covers the process for submitting paper claims, provides an overview of fields in the CMS 1500 and CMS 1450 forms, as applicable, and educates providers about key fields needed to support encounters and common errors.

Our claims processing system also supports quick and efficient paper claims processing, converting paper claims to electronic format for processing in less than 48 hours from date of receipt on average. Document Services scans and exports the files for data entry throughout each production day. After we perform quality checks, we create 837 claims data files for processing into our claims system. The electronic version of the paper claim is adjudicated with other claims received electronically and follows all of the same processing timelines and rules from that point forward.

5. ENCOURAGING PROVIDERS TO SUBMIT ACCURATE, TIMELY, AND COMPLETE ENCOUNTER DATA

To support complete, accurate, and timely encounter data to the Agency, Clear Health contractually requires providers in our network to submit complete and accurate claims within six months after the date of service or discharge. Complete, accurate, and timely encounters support payment rates, both to us from the State and from us to the provider, and allows us to monitor service utilization and calculate accurate outcome measures, such as HEDIS®.

In coordination with monitoring and oversight activities employed by our Claims Operations and Encounter Management teams, our Provider Network Managers also monitor claim submission and compliance with appropriate billing rules. The Provider Network Manager will work with providers to address compliance issues and develop CAPs for those who fail to consistently submit accurate, timely, and complete claims and encounter data. These CAPs enable us to work with the provider in a collaborative way, educating the provider on the value and necessity of complete encounter data. The cleaner the data submitted to Clear Health, the faster the provider's claim is processed, benefiting all stakeholders in the health care system: the Agency, the providers, the members, and the MCOs.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In addition, we track completeness, timeliness, accuracy, and resubmission measures for providers and subcontractors as part of our weekly Encounter Audit process. Details on submissions are tracked using the Clear Health Analytics business intelligence (BI) dashboard, we also meet regularly with all subcontractors to review their compliance with the required completeness, timeliness, accuracy, and resubmission measures. Deficiencies are noted and corrective actions are identified.

5.1. Network Providers

Clear Health's provider contracts require all network providers, including sub-capitated and atypical providers, to submit timely and accurate claims. We contract with most providers in our network on a fee-for-service basis, which inherently drives timely claim submission and results in complete encounter data. We monitor claims activity and work closely with providers to correct errors and educate them on accurate claims submission.

Provider Network Managers educate and support providers in submitting accurate claims including delivery of hands-on paper claims training and the use of our provider portal to submit an electronic claim. Our proactive, one-on-one approach is especially valued by Florida providers in our network.

5.1.1. Sub-capitated Providers

We include language in contracts for sub-capitated providers that requires submission of encounter data as zero pay claims. Recognizing encounter capture for sub-capitated providers as a challenge for us as it is industry wide, we have added focused reporting for our sub-capitated providers and use our custom developed Simply Analytics Business Intelligence (BI) dashboard to drill down and analyze data using various criteria such as provider, claim source, claim status, region, and date (received, adjudicated, paid, or submitted). On a weekly and monthly basis, we run reports to analyze submission patterns across providers and compare claim submissions for sub-capitated providers with claim volume statistics for fee-for-service providers. Using a volume ratio based on assigned membership and total claims submitted, we identify sub-capitated providers that are not performing as expected. Provider Relations then meets with the provider to discuss any roadblocks to claim submission and sets up a monitoring program with benchmarks for that provider.

5.1.2. Subcontractors

Our contracts hold subcontractors accountable for submission of encounters and specify penalties for non-compliance. Account Managers monitor receipt of accurate, timely, and complete encounter data and Encounter Analysts closely monitor encounters for our subcontracted vendors. Clear Health works with each subcontractor to define a twice-weekly encounter submission schedule based on their adjudication schedules.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Clear Health established the Vendor Delegation Oversight Group (VDOG) to monitor and remediate any encounter data issues or gaps. The VDOG team monitors the BI dashboard weekly, based on the days of the week the subcontractor is scheduled to submit their encounter data. Alerts are sent to the Account Manager if submissions are not received according to the established schedule. This weekly monitoring facilitates outreach to our subcontractors to ensure that they submit their encounters timely. Clear Health reconciles encounter submissions to subcontractor payment data as part of our oversight process.

VDOG escalates non-responsive subcontractors to Compliance and executive leadership for immediate resolution. If there is a trend of late or incomplete encounter submissions, a CAP will be implemented for the subcontractor.

Encounters from subcontracted providers go through the same monitoring as all Simply encounters. This is monitored by the Florida-based Encounters Audit Team, which is responsible for overall encounters compliance as discussed previously and is reported up to the cross-functional Encounter Task Force and the Quality Management committee.

5.2. Out-of-network Providers

For out-of-network providers, Clear Health uses a single-case agreement that thoroughly explains the claims submission and reimbursement process. Terms and conditions in the agreement include:

- Provider agrees to follow proper billing and submission guidelines, and provider agrees to use industry standard codes for claim submissions; provider understands the billed codes denote the services or procedures performed and should be fully supported in the medical record and office notes
- Provider shall submit claims on a current CMS-1500 form for professional claims or a CMS-1450 (UB-04) form for institutional claims (or their electronic equivalent or successor formats) within 180 days of the date the authorized covered health service was provided
- Upon receipt of the provider's clean claim, Clear Health will pay the provider for the services provided within the time frame required by the SMMC Contract, or State and federal requirements, with the most stringent prevailing
- Provider will attach a copy of the agreement to any paper claim submitted

The agreement also includes an individual contact name, an address to mail paper claims, and highlights information for electronic billing.

5.3. Atypical Providers

Clear Health also works with atypical providers, or providers that do not routinely submit the industry standard claim forms. We work closely with these types of providers to assure prompt and appropriate claims submission and payment, confirming data for services rendered is captured and reported to the Agency. We use a variety of techniques to capture data from atypical providers, including standard billing for services like pest control, super-billing for in-home services, roster billing for assisted living facilities, and invoices for translation services.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

We recognize that, while atypical providers are not traditional providers with medical billing systems and staff, they do provide services that bring a real benefit to our members. Our dedicated team works with each provider, providing the tools and training they need to bill and receive the correct payment.

5.4. Activities and Incentives or Penalties

Clear Health has created a Customer Experience Committee comprising representatives from departments across the Medicaid Business Unit and Clear Health, including Claims, National Customer Care, Provider Relations, Medical Management, and Grievances and Appeals. Customer Experience proactively gathers and analyzes data associated with the most prevalent causes of provider dissatisfaction, including claim denials, provider disputes, complaints, and grievances and appeals. They use this information to identify root causes and provides an opportunity to implement system-wide solutions which result in continuous improvement.

Accurate and complete encounter data, education, training, and improved Customer Experience activities are all designed to reduce claims denials. Reducing claims denials translates to immediate improvement in provider satisfaction and can improve member satisfaction in the long term. Most importantly, clean claims data means Clear Health submits the cleanest and most accurate encounters to the Agency.

Our contracts with our subcontractors clearly identify the requirement to submit accurate encounter data in a timely fashion. Contracts include penalties for non-compliance and Account Managers closely monitor encounter submissions to ensure that subcontractors adhere to all contract requirements.

6. CONNECTING WITH PROVIDERS TO REVISE ENCOUNTERS IN A TIMELY MANNER

Clear Health supports a number of different methods to connect with providers to revise claims or encounters in a timely manner. We staff our call center with employees who are empowered to update demographic data and adjudicate claims on the phone, working one-on-one with providers on more complex issues to coach them on correct submission and help them resolve claim errors. Clear Health approaches each situation as an educational opportunity to improve provider satisfaction and the quality of claims and encounters.

We work as a cross-departmental team. Our Encounter Management team carefully reviews problems identified during the encounter submission process. If they find issues with a specific provider or one of our subcontractors, they enlist the support of the Provider Network Manager or the VDOG Account Manager to quickly remediate errors and educate the provider or subcontractor so that we can submit complete and accurate encounters to the State's fiscal agent.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In addition, our Provider Network Managers review weekly claims reports to proactively identify possible provider submission errors. For example, if we see a large number of claims pending, our representatives promptly reach out to providers to help facilitate correct submission and payment. Representatives also carry laptops to provide immediate claims status information during visits.

Clear Health recognizes the absolute necessity of accurate and complete health care encounter data. To that end, we are committed to making sure the data providers submit to us is accurate, complete, and represents the actual health care activity of our members, thereby supporting our submission of the cleanest, most precise data to the Agency.

Submission metrics, including timeliness measures for initial submission and resubmission of errors are monitored via the BI dashboard by the Encounter Audit team who sets performance thresholds according to the timeliness standards defined by the Agency. If the required performance threshold is not being met for any of our subcontractors, the Audit team contacts the VDOG Account Manager to coordinate outreach and remediation with the subcontractor. A twice-weekly submission schedule also facilitates timely encounter revisions.

For fee-for-service and sub-capitated providers, the Encounter Audit team uses the BI dashboard to review encounter details by provider to monitor volume, review rejections, and identify specific edits that are issues for each provider. We also use summary-level data to identify trends and isolate providers who require additional training. A summary of these metrics is also reported to the Encounter Task Force for its weekly review.

7. SUPPORTING PROVIDER COMPLIANCE WITH CORRECT CODING

Clear Health promotes correct coding by incorporating National Correct Coding Initiative (NCCI) edits into our claims processing and payment system. For our network providers (including sub-capitated and atypical), we review key fields and proper coding during initial provider training and reinforce these during subsequent interactions with each provider.

For out-of-network providers, the single-case agreement that is reviewed and signed by the provider requires them to follow proper billing guidelines and use industry standard codes, and emphasizes that billed codes denote the services or procedures performed and should be fully supported in the medical record and office notes.

8. VERIFYING SUBMISSION OF ALL ENCOUNTERS

Clear Health has established monitoring activities to identify claims issues that have the potential to impact encounter submissions. Claims Operations monitors daily claims processing reports, including a review of pended claims and our Provider Service Unit (PSU) proactively reaches out to providers to address Issues requiring provider intervention.

For our sub-capitated providers, we have added focused reporting to monitor their completeness, accuracy, and timeliness. Using the BI dashboard, we run reports to analyze submission patterns across providers and compare claim submissions for sub-capitated providers with claim volume statistics for fee-for-service providers. Using a volume ratio based on assigned membership and total claims submitted, we identify sub-capitated providers that are not performing as expected.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Provider Relations then meets with the provider to discuss any roadblocks to claim submission and sets up a monitoring program with benchmarks for that provider.

For our delegated arrangements, our VDOG actively monitors encounter data submissions to identify encounter data issues or submission gaps. In addition to monitoring for the receipt of scheduled encounter files, this team also reconciles submitted encounter data to payment data as an additional verification step. VDOG escalates non-responsive subcontractors to executive leadership for immediate resolution. If there is a trend of late or incomplete encounter submissions, a CAP will be implemented for the subcontractor.

Evaluation Criteria:

1. The adequacy of the respondent's approach to ensure that all network providers, including subcapitated providers, are known to the Florida Medicaid Management Information System (FMMIS) for the purposes of encounter data submission.
2. The adequacy of the respondent's approach to educating all providers about the importance of key field combinations in accurately identifying the service/s provided, the importance of populating all key fields, and the importance of consistency in coding across all records, providers, and provider types on encounter data submissions.
3. The adequacy of the respondent's approach to ensuring that all providers, including subcapitated providers and subcontractors, provide an amount or cost of the Medicaid service provided (including pharmacy paid amount). For pharmacy claims, this includes the adequacy of the respondent's approach to ensuring the amount or cost of the Medicaid service provided must be the amount that was actually paid to the pharmacy excluding any PBM or other administrative costs.
4. The adequacy of the respondent's approach to educating and supporting providers who submit paper claims.
5. The adequacy of the respondent's approach to encouraging providers, particularly subcapitated providers, subcontractors, atypical providers, and non-participating providers to submit accurate, timely, and complete encounter data, including the type and frequency of activities and any incentives/penalties.
6. The adequacy of the respondent's description of how it will connect with providers to revise encounter submissions in a timely manner.
7. The adequacy of the respondent's approach to work with providers to comply with correct coding.
8. The adequacy of the respondent's approach to ensure that all encounters are included in submissions.

Score: This section is worth a maximum of 40 raw points with each of the above components being worth a maximum of 5 points each.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 31 – Fraud and Abuse/Compliance Office (Statewide):

The respondent shall describe its compliance program including the compliance officer's level of authority and reporting relationships. The respondent shall describe its experience in identifying subcontractor fraud and internal fraud and abuse in managed care programs. The respondent shall include a résumé or curriculum vitae for the compliance officer. The respondent shall also include an organizational chart that specifies which staff are involved in compliance, along with staff levels of authority.

Response:

Simply Healthcare Plans, Inc. (Simply), D/B/A Clear Health Alliance (Clear Health), is our HIV/AIDS specialty plan and is the respondent to this ITN. Simply brings together the best practices and innovative solutions of three Florida health plans that recently merged to become one entity. The merged entities are the original Simply, Better Health, Inc. (Better Health), and AMERIGROUP Florida, Inc. (Amerigroup). The unified Simply draws on the strength of each legacy organization's experience to elevate the performance of every area of our operations.

Clear Health supports a culture of ethics and compliance, including continuous improvement through an infrastructure that effectively prevents, detects, and resolves issues of conduct inconsistent with our culture and applicable federal and State laws, regulations, and contractual requirements. As a qualified health plan in Florida and under the Medicaid program, Clear Health maintains an established Florida Compliance Plan. In addition, the national Ethics and Compliance Plan provides national governance and reinforces the principles, policies, and procedures on how employees are required to conduct business and themselves.

Through our Compliance Plan, we:

- Assure compliance of our organization and employees with all federal and State laws, regulations, and regulatory and contractual requirements
- Prevent, detect, and correct overpayments as well as fraud, waste, and abuse (FWA)
- Provide employees with the knowledge and tools to perform their jobs in a compliant manner, identify potential compliance issues, and report suspected or known non-compliance, as well as FWA

Our comprehensive compliance program includes a rigorous program integrity component to identify and protect against both internal and external FWA. Working in tandem with our Compliance team, our special investigations unit (SIU) has an effective program to proactively and reactively identify and investigate suspected fraud and abuse and to help prevent payment of fraudulent, wasteful, or abusive claims.

Clear Health recognizes our responsibility to be a trusted steward of State and federal funds. Reducing improper Medicaid payments is critical to make sure that taxpayer dollars are spent on the health and well-being of our enrollees (members). We consistently demonstrate our commitment to AHCA's goals and expectations. Our compliance program and staff stand ready to continue in their efforts to meet and exceed AHCA requirements.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We provide the résumé of our Plan Compliance Officer (Compliance Officer), Alison Cardenas, in Attachment SRC# 31-1: Compliance Officer Résumé and an organizational chart of our Compliance team in Attachment SRC# 31-2: Organizational Chart.

In the sections below, we discuss how our compliance program complies with all AHCA, State, and federal requirements; the qualifications of the Florida Compliance team; and our experience identifying subcontractor fraud and internal fraud and abuse.

1. OUR COMPLIANCE PROGRAM COMPLIES WITH ALL STATE AND FEDERAL REQUIREMENTS

Clear Health has a strong, proactive compliance program led by our local Compliance Officer and supported with the extensive resources and best practices of our national Compliance department. Our Florida Compliance team has dedicated resources and maintains a comprehensive repository of all our contractual requirements and commitments. Our Board of Directors (BOD) and Plan President and CEO conduct business in accordance with the Compliance Plan, Anthem's Standards of Ethical Business Conduct, and core values that emphasize compliance, integrity, and accountability.

Our compliance program reflects the guidelines of numerous authority sources, including the Department of Health and Human Services Office of Inspector General, CMS, and industry surveys and best practices, such as the Society of Corporate Compliance and Ethics and the Compliance and Ethics Leadership Council. Clear Health's compliance program meets the elements to demonstrate an effective compliance program, as recommended by the U.S. Sentencing Guidelines. Our Compliance and Anti-Fraud Plans comply with Florida Statutes (FS) 409.91212 and 409.967(2)(g) and 42 CFR 438.608, as well as all other applicable State and federal laws, regulations, and regulatory and contractual requirements. Additionally, our program includes other best practices such as avoidance of delegation of authority to "disqualified" individuals through, for example, new hire background checks and other screening, as well as values and ethics assessments incorporated into performance evaluations. As part of our overall program, we mandate that our employees, as well as subcontractors and providers, conduct business in accordance with our Compliance Plan.

Through the compliance program, we use robust processes and controls to prevent, identify, and mitigate potential risks. Reflective of our core values, we are trustworthy and foster open, honest communication and dialogue across our health plan and with AHCA. Further, we dedicate resources that focus on contract compliance and education, monitoring and oversight, and risk identification and mitigation. Our Florida Compliance team also benefits from oversight, guidance, and sharing of best practices across our affiliate health plans in 19 other markets across the country.

As part of our ultimate parent company's national Medicaid division and subject to the Anthem Ethics and Compliance Plan, Clear Health's Compliance team has ready access to the resources of our national Medicaid Compliance Officer and the Medicaid Compliance Program Services department. Collectively, this team manages Medicaid compliance program initiatives, including effectiveness reviews, standardized risk identification, prioritization and mitigation framework, and overall direction and guidance by sharing best practices with our Florida Compliance Officer and committees.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Our Compliance Plan complies with Section X.F of Attachment B, Scope of Services and has been approved by the Agency's Medicaid Program Integrity (MPI) unit. We submit our Compliance Plan and Anti-Fraud Plan to the Agency each year, and our most recent submission was on September 1, 2017. If requested, we will submit an updated Compliance Plan to the Agency no later than 45 calendar days prior to implementation of the new SMMC Contract. As required by our existing contract, we maintain current information in the Compliance Plan, including new or revised contract amendment language and State and federal regulations.

1.1. Summary of How Our Compliance Program Meets AHCA Requirements

Our Compliance Plan complies with all applicable federal and State laws, regulations, and guidelines. We review and update the Compliance Plan each year to incorporate new requirements, to confirm alignment with Medicaid regulations, and to incorporate policies and procedures that address risk and assist in the detection and prevention of internal and external FWA. Updates and reviews take place at least annually or more often as required by applicable contractual and legal requirements. Clear Health's BOD reviews and approves the Compliance Plan and Anti-Fraud Plan annually.

Clear Health's Compliance Plan establishes the framework for comprehensive compliance activities to achieve the following 14 objectives:

1. Effectively enable Clear Health and our employees to comply with all applicable legal requirements, and thereby avoid legal and compliance problems
2. Effectively address compliance allegations as they arise
3. Remedy the effects of non-compliance
4. Identify and remove FWA
5. Provide employees, providers, subcontractors, and the public with an official statement of how we conduct business
6. Provide a coordinated reporting structure between impacted parties and regulatory authorities
7. Comply with obligations to AHCA, the Office of Insurance Regulation, and other regulatory agencies
8. Articulate Clear Health's commitment to comply with all applicable federal and State standards
9. Describe compliance expectations as embodied in the standards of conduct
10. Address the operation of the compliance program
11. Provide guidance to employees, contractors, subcontractors, and other applicable entities on dealing with potential compliance issues
12. Identify how to communicate compliance issues to appropriate compliance personnel

EXHIBIT A-4-a

GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

13. Describe how we investigate and resolve potential compliance issues

14. Include a policy of non-intimidation and non-retaliation for good faith participation in the compliance program including reporting potential issues; investigating issues; conducting self-evaluations, audits and remedial actions; and reporting to appropriate officials

The Compliance Plan promotes transparency and an open environment of communication that encourages everyone to view compliance as a professional and ethical requirement.

In the following sections, we summarize how our Compliance Plan directly complies with 42 CFR 438.608 including the seven elements of an effective compliance program.

1.1.1. AHCA Requirement: Written policies, procedures, and standards of conduct that articulate a commitment to comply with all applicable federal and State standards

Policies and Procedures. Clear Health maintains a robust library of written standards and policies and procedures that address our regulatory, contractual, and other program requirements. Our Compliance policies and procedures outline our commitment to integrity, ethics, and compliance and provide detail on the specific actions and activities the Compliance team will take to help Clear Health maintain an effective ethics and compliance program. They serve as a primary resource for employee guidance on conducting business activities in an ethical and compliant manner.

Functional Managers throughout the organization develop policies and procedures, and consult with our dedicated Compliance Officer and Regulatory Director, when necessary. These policies play a major role in guiding health plan activities and operations. We review policies and procedures annually, or more frequently based on new laws, regulations, contractual provisions, or compliance guidance. We publish policies and procedures on an internal website accessible to all employees.

Standards of Ethical Business Conduct (the Code). The Code articulates the company's commitment to comply with all applicable laws and regulations while providing guidance on actions, decisions, and operations that help employees safeguard our company's integrity and reputation as ethical and compliant. All Clear Health employees must acknowledge and agree to comply with the Code as a condition of employment. All new employees receive a copy of the Code, and we expect all employees to read and understand their responsibilities. In addition, employees must complete an annual compliance refresher training. The Code is also available on our public website for anyone to view.

1.1.2. AHCA Requirement: The designation of a Compliance Officer and a compliance committee accountable to senior management

Compliance Officer. We maintain a full-time Florida-based Compliance Officer, Alison Cardenas, who partners with health plan leadership to provide extensive and focused engagement on education and training; risk identification and mitigation; and development and oversight of corrective actions. She provides executive-level oversight and works collaboratively across all functional areas to infuse compliance into everything we do.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

Regulatory Director. Our Regulatory Director, Vicky Camero, is our primary liaison with AHCA for day-to-day contract management and oversight issues. Ms. Camero manages submission of all required regulatory reporting and serves as our internal subject matter expert and resource on Clear Health's contractual and regulatory obligations for all of our Florida Medicaid programs.

Florida Medicaid Compliance Committee (Compliance Committee). Chaired by our Compliance Officer, our Compliance Committee reviews compliance activities and oversees the compliance program for our MMA, LTC, and HIV/AIDS specialty plan operations. The Compliance Committee includes executive-level leadership, the Regulatory Director, as well as leaders from multiple functional areas, including Quality, Utilization Management, Case Management, LTC, Operations, Provider Relations, Member Services, Subcontractor Oversight, Finance, and Human Resources. The committee meets monthly and provides a forum to review and discuss emerging issues and upcoming activities, assess potential risks, and provide input into mitigation activities and corrective action plans.

Our Compliance Officer and Compliance Committee promote an integrated approach to assure the integrity and ethical behavior of the health plan.

1.1.3. AHCA Requirement: Effective training and education of the Compliance Officer and employees

Compliance Officer Training. The Compliance Officer receives extensive training at initial hire (or transfer into the position), as well as regular continuing education. Initial training covers a broad range of topics, including review of national compliance structure; compliance operations overview; investigations overview; one-on-one meetings with the national Medicaid Chief Compliance Officer, legal counsel, and national Privacy Officer; risk tracking overview and use of risk tool; marketing oversight; Medicaid compliance effectiveness review; regulatory services overview and partnership; project management and audit support review; enrollment initiative and cost of care overview; and an opportunity for peer interaction.

Monthly national Operational Compliance Committee meetings provide a forum for ongoing compliance education for our Compliance Officer and her counterparts at our affiliate health plans. Recent topics included the impact of the Medicaid Managed Care Final Regulations ("Mega Reg") on our organization and the impact of the Telephone Consumer Protection Act (TCPA) on processes and expectations.

Employee Compliance Training. All employees receive mandatory compliance training within 30 days of hire and annually. The Ethics, Privacy, Information Security and Compliance training program covers the requirements of current laws and regulations and includes topics such as reporting compliance concerns and suspected or actual misconduct; FWA; HIPAA; current risks related to the health care industry; and other aspects of the program, such as the Code, cultural competency, drug-free workplace policies and procedures, the federal Deficit Reduction Act, and any contractually required training. We track and monitor completion of and demonstrated understanding of all required training through our online learning systems. The Compliance team follows up directly with employees to confirm completion.

EXHIBIT A-4-a GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

In addition, we require all employees to complete the annual online refresher training course on Ethics, Compliance, Privacy, and Fraud and Abuse. This helps reinforce and reaffirm our commitment to fostering an ethical and compliant culture in which the top priority is always to do the right thing. Topics covered include an overview of the Ethics and Compliance Program; channels to report compliance, ethics, privacy, fraud, waste, or abuse concerns, and to ask questions; an overview of relevant policies and procedures; consequences of non-compliance; important related laws and requirements; and the Code.

Each employee confirms course completion and agrees to comply with all guidelines. After the annual refresher training, employees must complete a certification that includes questions regarding exclusion and debarment and previous felony or health care fraud convictions. Any positive response generates follow-up by the Ethics Office and investigation. We document and track training in a learning management system, allowing our Compliance team to verify completion by every employee.

Our Compliance team also conducts focused training sessions, as warranted or if requested by management. If we see trends, such as misconduct in a geographic area or business segment, enforcement, or compliance risks; our Compliance team will provide targeted training.

Continuing Education and Awareness. We conduct additional compliance education and awareness activities throughout the year to reinforce the role of all our employees in fostering a culture of compliance. An annual "Ethics, Compliance, and Privacy Awareness Week" celebration includes activities and information highlighting how employee commitment supports overall success. In addition, our SIU sponsors periodic awareness initiatives that include educational materials and activities to help employees better understand how they can help identify and prevent FWA.

We held our annual celebration from June 5-9, 2017. Our theme was "Empowering Everyone to do the Right Thing" related to ethics, compliance, and privacy. To engage staff, we included educational flyers, giveaway items, and a raffle. Compliance staff were available to meet face-to-face with employees to answer questions. We also gave employees the opportunity to nominate someone they saw "doing the right thing", making a noteworthy, ethical decision.

We also circulate monthly Medicaid bulletins that contain information on compliance and FWA updates and information, including TCPA bulletins.

1.1.4. AHCA Requirement: Effective lines of communication between the Compliance Officer, employees, subcontractors, and the Compliance committee

Awareness. Open lines of communication are essential to the compliance program. We educate all employees on the proper channels to report FWA and any other compliance concerns. Employees may use both internal and external telephone numbers to report FWA anonymously. We promote frequent and accessible interaction between the Compliance Officer and our employees, including town hall meetings, monthly e-mail reminders about compliance programs and instructions for reporting suspected violations, and prominently-placed tip sheets about reporting potential issues (such as through the anonymous hotline). We have two Compliance team members in Tampa and one in Miami, and someone is always available during core business hours. The Compliance team has an open door policy, and is accessible and available to employees in person, phone, or e-mail for questions and guidance on contracts, programs, or
