Jennifer Barrett
Agency for Health Care Administration
Building 2, Suite 203, Mail Stop 15
2727 Mahan Drive
Tallahassee, Florida 32308-5403

RE: AHCA ITN 001-17/18 – Region 1

Dear Ms. Barrett:

Humana Medical Plan, Inc. (Humana) is pleased to submit the enclosed response to the Agency's ITN 001-17/18 – Region 1 for the Statewide Medicaid Managed Care program. As required by Section 2 (Attachment A, page 12 of 41) of the ITN, Humana includes the following information in accordance with the Transmittal Letter requirements:

- **Respondent's name**: Humana Medical Plan, Inc.
- **Respondent's address**: 3501 SW 160th Avenue, Miramar, FL 33027
- **Respondent's Federal Employer Identification Number**: The information on this page is exempt from disclosure pursuant to Section 119.071(5)

- **The names of the respondent's official contact person and an alternate who have the authority to bind the respondent to a Contract, along with both individuals' title, address, telephone number, email address, and official signature.**

  Please see below for the information requested for Humana's official contact person:

  Name: John Edward Barger III
  Title: Vice President of Dual Eligible and Medicaid Programs
  Address: 4030 Boy Scout Boulevard, Tampa, FL 33607
  Telephone: The information on this page is exempt from disclosure pursuant to Section 119.071(5)
  E-mail Add

  Please see below for the information requested for Humana's alternate contact person:

  Name: Alan Wheatley
  Title: President, Retail Segment
  Address: 500 West Main Street, Louisville, KY 40202
  Telephone: The information on this page is exempt from disclosure pursuant to Section 119.071(5)
  E-mail Add

- **A statement authorizing release of the redacted version of the response in the event the Agency receives a public records request**

  In the event the Agency receives a public records request, Humana Medical Plan, Inc. authorizes the release of the redacted version of our proposal response to ITN 001-17/18 – Region 1.

Sincerely,

John Edward Barger III
Vice President of Dual Eligible and Medicaid Programs
Humana Medical Plan, Inc.

Alan Wheatley
President, Retail Segment
Humana Medical Plan, Inc.

EXHIBIT A-2-a
QUALIFICATION OF PLAN ELIGIBILITY

RESPONDENT NAME: **HUMANA MEDICAL PLAN, INC.**

1. IDENTIFICATION OF PLAN TYPES

I hereby certify that my company is submitting a response to AHCA ITN 001-17/18 to operate as one of the following plan types in Region 1:

☒ Comprehensive Plan

OR

☐ Long-Term Care Plus Plan

OR

☐ Managed Medical Assistance Plan

OR

☐ Specialty Plan

2. QUALIFICATION OF PLAN ELIGIBILITY

I hereby certify my company currently operates as one (1) of the following:

☒ HMO Health Maintenance Organization and possess a current Florida Certificate of Authority and Health Care Provider Certificate in at least one (1) Florida county.

OR

☐ PSN that possesses a Florida Third Party Administrator License or a subcontract/letter of agreement with a Florida-licensed Third Party Administrator. A copy of the Third Party Administrator license, or subcontract/letter of agreement, must be submitted with the solicitation response.

In addition, the respondent shall complete **Exhibit A-2-b,** Provider Service Network Certification of Ownership and Controlling Interest.

OR

☐ Exclusive Provider Organization that meets the licensure requirements of Section 627.6472, Florida Statutes.

EXHIBIT A-2-a
QUALIFICATION OF PLAN ELIGIBILITY

OR

☐ Accountable Care Organization authorized under federal law.

Signature below indicates the respondent's full acknowledgement of, understanding of, and agreement with the certification identified above as written and without caveat.

Humana Medical Plan, Inc.
Respondent Name

John E Barger — 10/8/2017

Exhibit A-2-b, PSN Certification of Ownership and Controlling Interest

Exhibit A-2-b, **Provider Service Network Certification of Ownership and Controlling Interest** is not applicable to Humana. Humana operates as an HMO (Health Maintenance Organization).

EXHIBIT A-2-c
ADDITIONAL REQUIRED CERTIFICATIONS AND STATEMENTS
(10-2-17)

RESPONDENT NAME: Humana Medical Plan, Inc.

1. ACCEPTANCE OF SOLICITATION REQUIREMENTS

I hereby certify that I understand and agree that my organization has read all requirements and Agency specifications provided in this solicitation, accepts said requirements, and that this response is made in accordance with the provisions of such requirements and specifications. By my written signature below, I guarantee and certify that all items included in this response shall meet or exceed any and all such requirements and Agency specifications. I further agree, if awarded a Contract resulting from this solicitation, to deliver services that meet or exceed the requirements and specifications provided in this solicitation.

AND

2. ACCEPTANCE OF CONTRACT TERMS AND CONDITIONS

I hereby certify that should my organization be awarded a Contract resulting from this solicitation, it will comply with all terms and conditions as specified in this solicitation and in the Agency Standard Contract (**Exhibit A-8, including Attachments II - V**).

AND

3. STATEMENT OF NO-INVOLVEMENT

I hereby certify that neither my organization nor any person with an interest in the organization had any prior involvement in performing a feasibility study of the implementation of the subject Contract, in drafting of this solicitation or in developing the subject program.

AND

4. PROHIBITION OF GRATUITIES

I hereby certify that no elected official or employee of the State of Florida has or shall benefit financially or materially from such my organization's response or subsequent Contract in violation of the provisions of Chapter 112, Florida Statutes. I understand that any Contract issued as a result of this solicitation may be terminated if it is determined that gratuities of any kind were either offered or received by any of the aforementioned parties.

AND

5. NON-COLLUSION CERTIFICATION

I hereby certify that all persons, companies, or parties interested in the response as principals are named therein, that the response is made without collusion with any other person, persons, organization, or parties submitting a response; that it is in all respects made in good faith; and as the signer of the response, I have full authority to legally bind the prospective respondent to the provisions of this solicitation.

AND

6. PERFORMANCE OF SERVICES

I hereby certify my organization shall ensure all services, provided directly or indirectly under the Contract resulting from this solicitation, will be performed within the borders of the United States and its territories and protectorates.

AND

7. ORGANIZATIONAL CONFLICT OF INTEREST CERTIFICATION

The standards on organizational conflicts of interest in Title 48, Code of Federal Regulations, Subpart 9.5 – Organizational and Consultant Conflicts of Interest and Section 287.057(17), Florida Statutes, apply to this solicitation. A respondent with an actual or potential organizational conflict of interest shall disclose the conflict. If the respondent believes the conflict of interest can be mitigated, neutralized or avoided, the respondent shall submit a Conflict of Interest Mitigation Plan with its response, that shall, at a minimum:

a) Identify any relationship, financial interest or other activity which may create an actual or potential organizational conflict of interest.
b) Describe the actions the respondent intends to take to mitigate, neutralize, or avoid the identified organizational conflicts of interest.
c) Identify the official within the respondent's organization responsible for making conflict of interest determinations.

The Conflict of Interest Mitigation Plan will be evaluated as acceptable or not acceptable. The Agency reserves the right to request additional information from the respondent or other sources, as deemed necessary, to determine whether or not the plan adequately neutralizes, mitigates, or avoids the identified conflicts.

EXHIBIT A-2-c
ADDITIONAL REQUIRED CERTIFICATIONS AND STATEMENTS
(10-2-17)

Pursuant to the aforementioned requirements, I hereby certify that, to the best of my knowledge, my organization (including its subcontractors, subsidiaries and partners):

Please check the applicable paragraph below. Do not check more than one of the paragraphs below.

☒ Has no existing relationship, financial interest or other activity which creates any actual or potential organizational conflicts of interest relating to the award of a Contract resulting from this solicitation.

☐ Has included information in its response to this solicitation detailing the existence of actual or potential organizational conflicts of interest and has provided a "Conflict of Interest Mitigation Plan", as outlined above.

AND

8. RESPONDENT ATTESTATION FOR EXHIBIT A-4

I hereby certify that no modification and/or alteration has been made to the template, narrative and/or instructions contained in **Exhibit A-4**, Submission Requirements and Evaluation Criteria, including **Exhibits A-4-a, A-4-b, A-4-c and A-4-d,** including all exhibits/attachments, as applicable.

I understand the Agency may not consider supplemental response narrative for evaluation which is not contained within the Response Sections contained in **Exhibit A-4,** Submission Requirements and Evaluation Criteria.

AND

9. RESPONDENT ATTESTATION FOR ATTACHMENT C, COST PROPOSAL INSTRUCTIONS AND RATE METHODOLOGY NARRATIVE

I hereby certify that no modification and/or alteration has been made to the template, narrative and/or instructions contained in **Attachment C, Cost Proposal Instructions and Rate Methodology Narrative, including all applicable exhibits.**

EXHIBIT A-2-c
ADDITIONAL REQUIRED CERTIFICATIONS AND STATEMENTS
(10-2-17)

AND

10. RESPONDENT ATTESTATION REGARDING SCRUTINIZED COMPANIES LIST

I hereby certify that my company is not listed on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Section 215.473, Florida Statutes. Pursuant to Section 287.135(5), Florida Statutes, the respondent agrees the Agency may immediately terminate the resulting Contract for cause if the respondent is found to have submitted a false certification or if the respondent is placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List during the term of the resulting Contract.

AND

11. NAMES OF OPERATION

I hereby certify the following is a list of all names under which my organization has operated during the past five (5) years (since July 14, 2012).

Florida Comfort Choice

Florida Senior's Choice

Humana Family

Miramar Health and Fitness Center

AND

12. BUSINESS RELATIONSHIP

The respondent shall disclose any business relationship (as defined in Section 409.966(3)(e), Florida Statutes) with any other eligible Managed Care Plan that is a potential respondent to this solicitation. Such disclosure shall include identifying information for each Managed Care Plan, the nature of the business relationship, the current service area of each Managed Care Plan (by line of business), and the signature of the authorized representative for each Managed Care Plan.

EXHIBIT A-2-c
ADDITIONAL REQUIRED CERTIFICATIONS AND STATEMENTS
(10-2-17)

The respondent must disclose any business relationship(s) in the space provided below:

Not Applicable

AND

13. COMPLETE MEDICAID PROVIDER ENROLLMENT PACKAGE SUBMISSION

I hereby certify my organization, if awarded a Contract, shall provide the Agency with an accurate and complete Medicaid Provider Enrollment Application, including all ownership and principal fingerprint cards and processing fees, within thirty (30) days after the Contract award is complete.

AND

14. REQUIRED PLAN READINESS DOCUMENTATION

I hereby certify my organization, if awarded a Contract, shall submit to the Agency all required Plan Readiness documentation within established timeframes as required in **Attachment A**, Instructions and Special Conditions, **Section E.**, Contract Implementation.

AND

15. CERTIFICATION REGARDING TERMINATED CONTRACTS

I hereby certify that my organization (including its subsidiaries and affiliates) has not unilaterally or willfully terminated any previous contract prior to the end of the contract with a State or the Federal government and has not had a contract terminated by a State or the Federal government for cause, prior to the end of the contract, within the past five (5) years (since July 14, 2012), other than those listed on **Page 6** of this Exhibit.

AND

16. LIST OF TERMINATED CONTRACTS

List the terminated contracts in chronological order and provide a brief description (half-page or less) of the reason(s) for the termination. Additional

pages may be submitted; however, no more than five (5) additional pages should be submitted in total.

The Agency is not responsible for confirming the accuracy of the information provided.

The Agency reserves the right within its sole discretion, to determine the respondent to be an non-responsible vendor based on any or all of the listed contracts and therefore may reject the respondent's reply.

Respondent Name:Not Applicable

Client's Name:Not Applicable

Term of Terminated Contract: Not Applicable

Description of Services: Not Applicable

Brief Summary of Reason(s) for Contract Termination: Not Applicable

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-3-a
MILLIMAN ORGANIZATIONAL
CONFLICT OF INTEREST MITIGATION PLAN

RESPONDENT NAME: Humana Medical Plan, Inc.

The Agency for Health Care Administration ("Agency" or "AHCA") "must avoid, neutralize, or mitigate significant potential organizational conflicts of interest (OCI) before a Contract is awarded. If the Agency elects to mitigate the significant potential organizational conflict or conflicts of interest, an adequate mitigation plan, including organizational, physical, and electronic barriers, shall be developed. [Section 287.057(17)(a)(1), Florida Statutes]

The Agency has determined that in order to evaluate proposals and negotiate a Contract that is in the best interests of the State, it is necessary to use the services of Milliman, Inc. ("Milliman") to act as an actuary and advisor throughout all stages of the "Statewide Medicaid Managed Care Program" competitive solicitation. The Agency reasonably anticipates one or more prospective respondents may also use Milliman. The Agency has determined that all reasonably anticipated OCIs relating to Milliman may be mitigated by the following mitigation plan, which has been agreed to by Milliman:

I. Milliman

a. All Milliman personnel who will perform services under the "Statewide Medicaid Managed Care Program" competitive solicitation shall be part of a separate internal Milliman working group (the "Milliman AHCA Group") with its own internal electronic and hard folders.

b. All documents or communications received or generated by the Milliman AHCA Group that relate in any way to this solicitation shall be placed only in this Group's separate files.

c. Each member of the Milliman AHCA Group shall submit **Exhibit A-3-b**, Milliman Employee Organizational Conflict of Interest Affidavit indicating they will provide actuarial services to the Agency.

d. No Milliman personnel, other than the Milliman AHCA Group personnel shall have access to the Milliman AHCA's Groups files.

e. The above-listed personnel shall not discuss any information relating to the SMMC ITN Services with any other Milliman personnel.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

EXHIBIT A-3-a
MILLIMAN ORGANIZATIONAL
CONFLICT OF INTEREST MITIGATION PLAN

II. Respondents

a. Any actual or prospective respondent who is using Milliman for this procurement must disclose this fact in its initial reply to the solicitation. Specifically, a respondent wishing to use Milliman must:

i. Identify itself and its intent to use Milliman;
ii. Identify the specific Milliman personnel that will be assisting the respondent in the procurement;
iii. Submit **Exhibit A-3-b, Milliman Employee Organizational Conflict of Interest Affidavit** forms, completed by each identified Milliman personnel.

b. All replies submitted in response to this solicitation must include the completed declaration in **Section IV.** of this Exhibit, signed by the authorized official who signed the reply on behalf of the respondent.

c. Any actual or prospective respondent who learns there is a reasonable basis to believe there has or may have been a violation of the Milliman OCI Mitigation Plan shall, within seventy-two (72) hours, notify the Agency of the facts and circumstances of the possible violation.

III. Protests

a. **Actual or prospective respondents are advised they have a burden to diligently investigate and challenge potential OCIs relating to Milliman**.

b. All challenges to the Milliman OCI Mitigation Plan must be timely filed as a challenge to the specifications of this solicitation. Similarly, challenges to amendments to the Milliman OCI Mitigation Plan must be timely filed as specifications challenges.

c. All challenges to Milliman-related information provided by actual or prospective respondents and posted by the Agency must be timely filed as specifications challenges.

d. **All protests filed after a Notice of Intent to Award has been posted which allege a Milliman-related OCI shall be limited to alleged violations of the Milliman OCI Mitigation Plan**.

BID BOND

Travelers Casualty and Surety Company of America
Hartford, CT 06183

KNOWN ALL BY THESE PRESENTS, That we, Humana Medical Plan, Inc., as Principal, and Travelers Casualty and Surety Company of America, as Surety, are held and firmly bound unto State of Florida, Agency for Healthcare Administration, as Obligee, in the sum of one million & 00/$100 Dollars ($1,000,000.00) for the payment of which we bind ourselves, and our successors and assigns, jointly and severally, as provided herein.

WHEREAS, Principal has submitted or is about to submit a bid to the Obligee on a contract for Florida Medicaid Managed Care Program Solicitation Number: AHCA ITN 001-17/18 Region 1 ("Project").

NOW, THEREFORE, the condition of this bond is that if Obligee accepts Principal's bid, and Principal enters into a contract with Obligee in conformance with the terms of the bid and provides such bond or bonds as may be specified in the bidding or contract documents, then this obligation shall be void; otherwise Principal and Surety will pay to Obligee the difference between the amount of Principal's bid and the amount for which Obligee shall in good faith contract with another person or entity to perform the work covered by Principal's bid, but in no event shall Surety's and Principal's liability exceed the penal sum of this bond.

Signed this 15th day of August, 2017.

March 30, 2015

Audit Committee of the Board of Directors
Humana Medical Plan, Inc.
500 West Main Street
Louisville, Kentucky 40202

In planning and performing our audit of the statutory-basis financial statements of Humana Medical Plan, Inc. (the "Company") as of and for the year ended December 31, 2014, in accordance with auditing standards generally accepted in the United States of America, we considered its internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the statutory-basis financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be material weaknesses and therefore, there can be no assurance that all deficiencies or material weaknesses have been identified. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above, as of December 31, 2014.

This communication is intended solely for the information and use of the audit committee, board of directors, management, others within the organization, and state insurance departments to whose jurisdiction the Company is subject and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

PricewaterhouseCoopers LLP

PricewaterhouseCoopers LLP

March 30, 2015

To the Board of Directors of
Humana Medical Plan, Inc.:

We have audited, in accordance with generally accepted auditing standards, the statutory basis financial statements of Humana Medical Plan, Inc. (the "Company") for the years ended December 31, 2014 and 2013, and have issued our report thereon dated March 30, 2015. In connection therewith, we advise you as follows:

a. We are independent certified public accountants with respect to the Company and conform to the standards of the accounting profession as contained in the Code of Professional Conduct and pronouncements of the American Institute of Certified Public Accountants, and the Rules of Professional Conduct of the Alabama, Florida, Kentucky, and New York Boards of Public Accountancy.

b. The engagement partner and engagement manager, who are certified public accountants, have 25 years and 9 years, respectively, of experience in public accounting and are experienced in auditing insurance enterprises. Members of the engagement team, most of whom have had experience in auditing insurance enterprises and 85 percent of whom are certified public accountants, were assigned to perform tasks commensurate with their training and experience.

c. We understand that the Company intends to file its audited statutory basis financial statements and our reports thereon with the Insurance Department of the State of Florida and other state insurance departments in states in which the Company is licensed and that the insurance commissioners of those states will be relying on that information in monitoring and regulating the statutory financial condition of the Company.

While we understand that an objective of issuing a report on the statutory basis financial statements is to satisfy regulatory requirements, our audit was not planned to satisfy all objectives or responsibilities of insurance regulators. In this context, the Company and insurance commissioners should understand that the objective of an audit of statutory basis financial statements in accordance with generally accepted auditing standards is to form an opinion and issue a report on whether the statutory basis financial statements present fairly, in all material respects, the admitted assets, liabilities, and capital and surplus, results of operations and cash flow in conformity with accounting practices prescribed or permitted by the Insurance Department of the State of Florida. Consequently, under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to plan and perform our audit to obtain reasonable assurance about whether the statutory basis financial statements are free of material misstatement, whether caused by error or fraud, and to exercise due professional care in the conduct of the audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Audit procedures that are effective for detecting errors, if they exist, may be ineffective for detecting misstatements resulting from fraud. Because of the characteristics of fraud, particularly those involving concealment and falsified documentation (including forgery), a properly planned and performed audit may not detect a material misstatement resulting from fraud. In addition, an audit does not address the possibility

pwc

that material errors or misstatements caused by fraud may occur in the future. Also, our use of professional judgment and the assessment of materiality for the purpose of our audit means that matters may exist that would have been assessed differently by insurance commissioners.

It is the responsibility of the management of the Company to adopt sound accounting policies, to maintain an adequate and effective system of accounts, and to establish and maintain internal control that will, among other things, provide reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with accounting practices prescribed or permitted by the Insurance Department of the State of Florida.

The Insurance Commissioner should exercise due diligence to obtain whatever other information that may be necessary for the purpose of monitoring and regulating the statutory financial position of insurers and should not rely solely upon the independent auditor's report.

d. We will retain all documents (including those kept in a hard copy or electronic medium) created or received or received by us that are necessary or appropriate to document the Firm's professional work product, for seven years from the date that we grant permission to use our report in connection with the issuance of the company's financial statements (report release date), unless a longer period of time is required by law. After notification to the Company we will make the workpapers available for review by the Insurance Department of the State of Florida at the offices of the insurer, at our offices, at the Insurance Department or at any other reasonable place designated by the Insurance Commissioner. Furthermore, in the conduct of the aforementioned periodic review by the Insurance Department of the State of Florida, photocopies of pertinent audit workpapers may be made (under the control of the accountant) and such copies may be retained by the Insurance Department of the State of Florida.

e. The engagement partner has served in that capacity with respect to the Company since 2010, is licensed by the Alabama, Florida, Kentucky, and New York Boards of Public Accountancy, and is a member in good standing of the American Institute of Certified Public Accountants.

f. To the best of our knowledge and belief, we are in compliance with the requirements of Section 7 of the NAIC's *Model Rule (Regulation) Requiring Annual Audited Financial Reports* regarding qualifications of independent certified public accountants.

This letter is intended solely for the information and use of the board of directors and management of the Company and the Insurance Department of the State of Florida and other state insurance departments and is not intended to be and should not be used by anyone other than these specified parties.

March 30, 2016

Audit Committee of the Board of Directors
Humana Medical Plan, Inc.
500 West Main Street
Louisville, KY 40202

In planning and performing our audit of the statutory-basis financial statements of Humana Medical Plan, Inc. (the "Company") as of and for the year ended December 31, 2015, in accordance with auditing standards generally accepted in the United States of America, we considered its internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the statutory-basis financial statements, but not for the purpose of expressing an opinion on the Company's internal control over financial reporting. Accordingly, we do not express an opinion on the Company's internal control over financial reporting.

AICPA AU-C 265, *Communicating Internal Control Related Matters Identified in an Audit*, of the AICPA Professional Standards includes the following definitions of a deficiency, a significant deficiency and a material weakness:

> Deficiency - a deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis.
>
> Significant deficiency - a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.
>
> Material weakness - a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses and therefore, material weaknesses may exist that were not identified. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above, as of December 31, 2015.

This letter is intended solely for the information and use of the audit committee, board of directors, management, others within the organization, and state insurance departments to whose jurisdiction the Company is subject and is not intended to be, and should not be, used by anyone other than these specified parties.

Very truly yours,

PricewaterhouseCoopers LLP

PricewaterhouseCoopers LLP

March 30, 2016

To the Board of Directors of
Humana Medical Plan, Inc.:

We have audited, in accordance with generally accepted auditing standards, the statutory basis financial statements of Humana Medical Plan, Inc. (the "Company") for the years ended December 31, 2015 and 2014, and have issued our report thereon dated March 30, 2016. In connection therewith, we advise you as follows:

a. We are independent certified public accountants with respect to the Company and conform to the standards of the accounting profession as contained in the Code of Professional Conduct and pronouncements of the American Institute of Certified Public Accountants, and the Rules of Professional Conduct of the Alabama, Florida, Georgia, Kentucky, and Tennessee Boards of Public Accountancy.

b. The engagement partner and engagement manager, who are certified public accountants, have 27 years and 9 years, respectively, of experience in public accounting and are experienced in auditing insurance enterprises. Members of the engagement team, most of whom have had experience in auditing insurance enterprises and 68 percent of whom are certified public accountants, were assigned to perform tasks commensurate with their training and experience.

c. We understand that the Company intends to file its audited statutory basis financial statements and our reports thereon with the Insurance Department of Florida and other state insurance departments in states in which the Company is licensed and that the insurance commissioners of those states will be relying on that information in monitoring and regulating the statutory financial condition of the Company.

   While we understand that an objective of issuing a report on the statutory basis financial statements is to satisfy regulatory requirements, our audit was not planned to satisfy all objectives or responsibilities of insurance regulators. In this context, the Company and insurance commissioners should understand that the objective of an audit of statutory basis financial statements in accordance with generally accepted auditing standards is to form an opinion and issue a report on whether the statutory basis financial statements present fairly, in all material respects, the admitted assets, liabilities, and capital and surplus, results of operations and cash flow in conformity with accounting practices prescribed or permitted by the Insurance Department of Florida. Consequently, under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to plan and perform our audit to obtain reasonable assurance about whether the statutory basis financial statements are free of material misstatement, whether caused by error or fraud, and to exercise due professional care in the conduct of the audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Audit procedures that are effective for detecting errors, if they exist, may be ineffective for detecting misstatements resulting from fraud.

Because of the characteristics of fraud, particularly those involving concealment and falsified documentation (including forgery), a properly planned and performed audit may not detect a material misstatement resulting from fraud. In addition, an audit does not address the possibility that material errors or misstatements caused by fraud may occur in the future. Also, our use of professional judgment and the assessment of materiality for the purpose of our audit means that matters may exist that would have been assessed differently by insurance commissioners.

It is the responsibility of the management of the Company to adopt sound accounting policies, to maintain an adequate and effective system of accounts, and to establish and maintain internal control that will, among other things, provide reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with accounting practices prescribed or permitted by the Insurance Department of Florida.

The Insurance Commissioner should exercise due diligence to obtain whatever other information that may be necessary for the purpose of monitoring and regulating the statutory financial position of insurers and should not rely solely upon the independent auditor's report.

d. We will retain audit working papers (including those kept in a hard copy or electronic medium) prepared in compliance with professional standards for seven years from the date that we grant permission to use our report in connection with the issuance of the Company's financial statements (report release date), unless a longer period of time is required by law. After notification to the Company we will make the workpapers available for review by the Insurance Department of Florida at the offices of the insurer, at our offices, at the Insurance Department or at any other reasonable place designated by the Insurance Commissioner. Furthermore, in the conduct of the aforementioned periodic review by the Insurance Department of Florida, photocopies of pertinent audit workpapers may be made (under the control of the accountant) and such copies may be retained by the Insurance Department of Florida. In addition, to the extent requested, we may provide the Insurance Department of Florida with copies of certain of our audit working papers (such as unlocked electronic copies of Excel spreadsheets that do not contain password protection or encryption). As such, these audit working papers will be subject to potential modification by the Insurance Department of Florida or by others. We are not responsible for any modifications made to the copies, electronic or otherwise, after they are provided to the Insurance Department of Florida and we are likewise not responsible for any effect that any such modifications, whether intentional or not, might have on the process, substance or outcome of your regulatory examination.

e. The engagement partner has served in that capacity with respect to the Company since 2015, is licensed by the Alabama, Florida, Georgia, Kentucky, and Tennessee Boards of Public Accountancy, and is a member in good standing of the American Institute of Certified Public Accountants.

f. To the best of our knowledge and belief, we are in compliance with the requirements of Section 7 of the NAIC's *Model Rule (Regulation) Requiring Annual Audited Financial Reports* regarding qualifications of independent certified public accountants.

This letter is intended solely for the information and use of the board of directors and management of the Company and the Insurance Department of Florida and other state insurance departments and is not intended to be and should not be used by anyone other than these specified parties.

March 30, 2017

Audit Committee of the Board of Directors
Humana Medical Plan, Inc.
500 West Main Street
Louisville, KY 40202

In planning and performing our audit of the statutory-basis financial statements of Humana Medical Plan, Inc. (the "Company") as of and for the year ended December 31, 2016, in accordance with auditing standards generally accepted in the United States of America, we considered its internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the statutory-basis financial statements, but not for the purpose of expressing an opinion on the Company's internal control over financial reporting. Accordingly, we do not express an opinion on the Company's internal control over financial reporting.

AICPA AU-C 265, *Communicating Internal Control Related Matters Identified in an Audit*, of the AICPA Professional Standards includes the following definitions of a deficiency, a significant deficiency and a material weakness:

> Deficiency - a deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis.
>
> Significant deficiency - a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.
>
> Material weakness - a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses and therefore, material weaknesses may exist that were not identified. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above, as of December 31, 2016.

This letter is intended solely for the information and use of the audit committee, board of directors, management, others within the organization, and state insurance departments to whose jurisdiction the Company is subject and is not intended to be, and should not be, used by anyone other than these specified parties.

Very truly yours,

PricewaterhouseCoopers LLP

PricewaterhouseCoopers LLP

March 30, 2017

To the Board of Directors of Humana Medical Plan, Inc.:

We have audited, in accordance with generally accepted auditing standards, the statutory basis financial statements of Humana Medical Plan, Inc. (the "Company") for the years ended December 31, 2016 and 2015, and have issued our report thereon dated March 30, 2017. In connection therewith, we advise you as follows:

a. We are independent certified public accountants with respect to the Company and conform to the standards of the accounting profession as contained in the Code of Professional Conduct and pronouncements of the American Institute of Certified Public Accountants, and the Rules of Professional Conduct of the Alabama, Florida, Georgia, Kentucky, and Tennessee Boards of Public Accountancy.

b. The engagement partner and engagement manager, who are certified public accountants, have 28 years and 11 years, respectively, of experience in public accounting and are experienced in auditing insurance enterprises. Members of the engagement team, most of whom have had experience in auditing insurance enterprises and 70 percent of whom are certified public accountants, were assigned to perform tasks commensurate with their training and experience.

c. We understand that the Company intends to file its audited statutory basis financial statements and our reports thereon with the Insurance Department of Florida and other state insurance departments in states in which the Company is licensed and that the insurance commissioners of those states will be relying on that information in monitoring and regulating the statutory financial condition of the Company.

   While we understand that an objective of issuing a report on the statutory basis financial statements is to satisfy regulatory requirements, our audit was not planned to satisfy all objectives or responsibilities of insurance regulators. In this context, the Company and insurance commissioners should understand that the objective of an audit of statutory basis financial statements in accordance with generally accepted auditing standards is to form an opinion and issue a report on whether the statutory basis financial statements present fairly, in all material respects, the admitted assets, liabilities, and capital and surplus, results of operations and cash flow in conformity with accounting practices prescribed or permitted by the Insurance Department of Florida. Consequently, under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to plan and perform our audit to obtain reasonable assurance about whether the statutory basis financial statements are free of material misstatement, whether caused by error or fraud, and to exercise due professional care in the conduct of the audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Audit procedures that are effective for detecting errors, if they exist, may be ineffective for detecting misstatements resulting from fraud. Because of the characteristics of fraud, particularly those involving concealment and falsified documentation (including forgery), a properly planned and performed audit may not detect a material misstatement resulting from fraud. In addition, an audit does not address the possibility that material errors or misstatements caused by fraud may occur in the future. Also, our use of professional

judgment and the assessment of materiality for the purpose of our audit means that matters may exist that would have been assessed differently by insurance commissioners.

It is the responsibility of the management of the Company to adopt sound accounting policies, to maintain an adequate and effective system of accounts, and to establish and maintain internal control that will, among other things, provide reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with accounting practices prescribed or permitted by the Insurance Department of Florida.

The Insurance Commissioner should exercise due diligence to obtain whatever other information that may be necessary for the purpose of monitoring and regulating the statutory financial position of insurers and should not rely solely upon the independent auditor's report.

d. We will retain audit working papers (including those kept in a hard copy or electronic medium) prepared in compliance with professional standards for seven years from the date that we grant permission to use our report in connection with the issuance of the Company's financial statements (report release date), unless a longer period of time is required by law. After notification to the Company we will make the workpapers available for review by the Insurance Department of Florida at the offices of the insurer, at our offices, at the Insurance Department or at any other reasonable place designated by the Insurance Commissioner. Furthermore, in the conduct of the aforementioned periodic review by the Insurance Department of Florida, photocopies of pertinent audit workpapers may be made (under the control of the accountant) and such copies may be retained by the Insurance Department of Florida. In addition, to the extent requested, we may provide the Insurance Department of Florida with copies of certain of our audit working papers (such as unlocked electronic copies of Excel spreadsheets that do not contain password protection or encryption). As such, these audit working papers will be subject to potential modification by the Insurance Department of Florida or by others. We are not responsible for any modifications made to the copies, electronic or otherwise, after they are provided to the Insurance Department of Florida and we are likewise not responsible for any effect that any such modifications, whether intentional or not, might have on the process, substance or outcome of your regulatory examination.

e. The engagement partner has served in that capacity with respect to the Company since 2015, is licensed by the Alabama, Florida, Georgia, Kentucky, and Tennessee Boards of Public Accountancy, and is a member in good standing of the American Institute of Certified Public Accountants.

f. To the best of our knowledge and belief, we are in compliance with the requirements of Section 7 of the NAIC's *Model Rule (Regulation) Requiring Annual Audited Financial Reports* regarding qualifications of independent certified public accountants.

This letter is intended solely for the information and use of the board of directors and management of the Company and the Insurance Department of Florida and other state insurance departments and is not intended to be and should not be used by anyone other than these specified parties.

State of Kentucky
County of Jefferson SS:

The officers of this reporting entity being duly sworn, each depose and say that they are the described officers of said reporting entity, and that on the reporting period stated above, all of the herein described assets were the absolute property of the said reporting entity, free and clear from any liens or claims thereon, except as herein stated, and that this statement, together with related exhibits, schedules and explanations therein contained, annexed or referred to, is a full and true statement of all the assets and liabilities and of the condition and affairs of the said reporting entity as of the reporting period stated above, and of its income and deductions therefrom for the period ended, and have been completed in accordance with the NAIC Annual Statement Instructions and Accounting Practices and Procedures manual except to the extent that: (1) state law may differ; or, (2) that state rules or regulations require differences in reporting not related to accounting practices and procedures, according to the best of their information, knowledge and belief, respectively. Furthermore, the scope of this attestation by the described officers also includes the related corresponding electronic filing with the NAIC, when required, that is an exact copy (except for formatting differences due to electronic filing) of the enclosed statement. The electronic filing may be requested by various regulators in lieu of or in addition to the enclosed statement.

Bruce Broussard, Director, President and Chief Executive Officer and Kurt Hilzinger, Chairman of the Board of Directors

Dear fellow stockholders,

In an environment of rapid change, Humana continued in 2014 to refine and enhance our integrated care delivery model. Specifically, we made significant progress in: 1) building trusting relationships with our members through improving the customer experience, 2) engaging our members in clinical programs based on these trusting relationships, and 3) offering assistance to providers in transitioning from fee-for-service to value-based reimbursement. This was accomplished by putting our nearly 14 million medical members at the center of the healthcare equation and surrounding them with up-to-the-minute technology, data analytics, and vibrant partnerships with thousands of Humana-affiliated physicians and other health professionals who are dedicated to a single goal – making it easy for people to achieve their best health.

Why easy? One of the many curious aspects of healthcare in the U.S. is that, despite all the attention paid to the obesity epidemic and the growing prevalence of preventable diseases, as a society and as an industry we've made achieving and maintaining health hard. The fact is, if you want to eat right and live a healthy lifestyle, you have to work at it. And if you need help in improving your health or managing an illness, the complexity and countless other barriers presented by the health industry can often be nearly impossible to navigate and overcome.

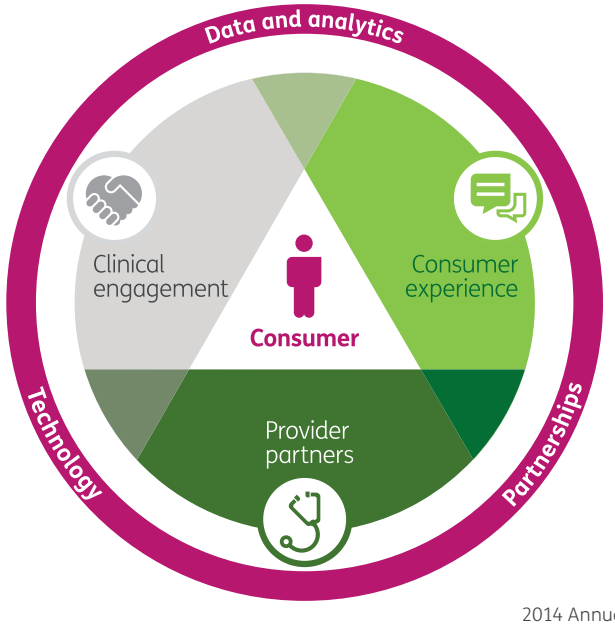
It doesn't have to be this way. Health should be easy to achieve, not hard. The good news is that we're gradually realigning a health system that's vastly out of balance. For example, according to the Bipartisan Policy Center, 50 percent of what ***makes*** us healthy is our own behaviors. But what we ***spend*** on healthy behaviors is only 4 percent of the nation's total healthcare bill each year.

Our commitment

This disconnect is the gap between people and the rational, evidence-based, and simple medical care they deserve. In fact, at Humana we are dedicated to "closing the gap between people and care." To keep us on track and accountable, we've committed to improving the health of the communities we serve by making it easy for people to achieve their best health.

Integrated care makes it easy for people to achieve their best health

Our Integrated Care Delivery Model



Total Medicare Advantage membership **increased**

18%

to 2.9 million members

Total Medicare stand-alone Prescription Drug Plan membership **increased**

22%

to 4.0 million members

HumanaOne membership more than doubled to approximately

1 million members

State-based contract membership growth more than tripled to approximately

300,000 members

This transformative work is consistent with Humana's own ongoing transformation. From a traditional health insurer with an episodic, claims-based relationship with our customers, we're becoming a health company dedicated to co-creating improved health with our members through a closer relationship with them. We're working to better understand the challenges of managing chronic conditions – such as diabetes and congestive heart failure – to help people modify their lifestyles and improve their lives. Additionally, we're putting technologically driven tools at our members' disposal – and in the hands of our hundreds of thousands of physician-partners – along with sophisticated data analytics to help them achieve their best health.

At the center of this new clinical model is not the health plan, but the person. To that end, Humana is committed to becoming a consumer-focused health company, providing integrated care that makes it easy for people to achieve their best health through outstanding clinical capabilities and a personalized consumer experience.

Results so far

How are we doing, in light of our commitment? Humana's consumer-focused strategy and integrated care delivery model facilitated a number of accomplishments this past year, while we simultaneously invested in new growth areas. These accomplishments included:

Wellness and prevention

- 62 percent of our new Medicare Advantage members for 2014 had wellness screenings via a Health Risk Assessment
- 1.3 million of our medical members received their preventive care on schedule

Primary care engagement

- We continued to make meaningful progress in improving our Star quality ratings, with 92 percent of individual Medicare Advantage members in 4 Star or greater rated plans, up from 60 percent in the previous year
- We increased the number of primary care providers in value-based relationships by 26 percent to over 42,000 at the end of 2014

Home health

- We grew the number of our members engaged in the Humana Chronic Care Program by 50 percent, significantly outpacing our total Medicare Advantage membership growth of 18 percent
- Our Chronic Care Program enabled newly-managed members to have 496,000 more days at home by reducing hospitalizations

Associate engagement and health

- We achieved world-class associate engagement for the first time, with results in the 91st percentile
- Forty percent of our associates have improved their health profile since 2012, reducing their modifiable health risks such as high body mass index (BMI), blood pressure, and glucose levels, and losing an aggregate of 97 tons

The beneficial effect of these and other consumer-focused components of our strategy allowed us to maintain stable member benefits and premiums for many of our members across the nation. At the same time, we entered into two new areas of growth for 2014 and the future: healthcare exchanges and state-based contracts. Because of these initiatives, medical membership grew substantially and our financial metrics improved.

Membership growth

- Total Medicare Advantage membership increased 18 percent to 2.9 million members
- Total Medicare stand-alone Prescription Drug Plan membership increased 22 percent to 4.0 million members
- HumanaOne membership more than doubled to approximately 1 million members
- State-based contract membership growth more than tripled to approximately 300,000 members

Financial results

- Healthcare Services segment revenues grew 26 percent to $20 billion
- Consolidated pretax earnings increased 13 percent though net income was challenged by a dramatic rise in our income tax rate due to the non-deductibility of the health insurance industry fee
- We rededicated ourselves to focusing on return on invested capital (ROIC) across all our lines of business, enhancing our alignment with the interests of our investors

The future

In conclusion, we believe the elements we've described come together to form a powerful investment thesis for shareholders:

- Continued robust organic membership and revenue growth,
- Proven superior clinical operating performance, and
- Disciplined capital allocation, which all lead to
- A sustainable competitive advantage.

We continue to be pleased with Humana's prospects as we further develop and implement our strategy. The engagement of our associates and focus on the consumer through our Integrated Care Delivery Model have never been stronger. Humana believes it's not enough just to try to close the gap between people and care. We believe in the accountability that comes from "a dream with a deadline." But we also know we can't do it alone. We eagerly invite partnerships from all like-minded groups and individuals in the communities we serve, to make a positive, enduring difference in people's health and lives.

Sincerely,

Kurt J. Hilzinger
Chairman of the Board and Stockholder

☑ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2014
OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from to
Commission file number 1-5975

HUMANA INC.
(Exact name of registrant as specified in its charter)

Delaware	**61-0647538**
(State of incorporation)	**(I.R.S. Employer Identification Number)**
500 West Main Street Louisville, Kentucky	**40202**
(Address of principal executive offices)	**(Zip Code)**

Registrant's telephone number, including area code: (502) 580-1000
Securities registered pursuant to Section 12(b) of the Act:

Title of each class	**Name of exchange on which registered**
Common stock, $0.16 2/3 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☑ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☑

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☑ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☑ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☑

Indicate by checkmark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☑ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☑

The aggregate market value of voting stock held by non-affiliates of the Registrant as of June 30, 2014 was $19,712,008,342 calculated using the average price on June 30, 2014 of $128.11.

The number of shares outstanding of the Registrant's Common Stock as of January 31, 2015 was 149,607,897.

DOCUMENTS INCORPORATED BY REFERENCE

Parts II and III incorporate herein by reference portions of the Registrant's Proxy Statement to be filed pursuant to Regulation 14A with respect to the Annual Meeting of Stockholders scheduled to be held on April 16, 2015.

Forward-Looking Statements

Some of the statements under "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this report may contain forward-looking statements which reflect our current views with respect to future events and financial performance. These forward-looking statements are made within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, or the Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. We have based these forward-looking statements on our current expectations and projections about future events, trends and uncertainties. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions, including the information discussed under the section entitled "Risk Factors" in this report. In making these statements, we are not undertaking to address or update them in future filings or communications regarding our business or results. Our business is highly complicated, regulated and competitive with many different factors affecting results.

PART I

ITEM 1. BUSINESS

General

Headquartered in Louisville, Kentucky, Humana Inc. and its subsidiaries, referred to throughout this document as "we," "us," "our," the "Company" or "Humana," is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country. As of December 31, 2014, we had approximately 13.8 million members in our medical benefit plans, as well as approximately 7.7 million members in our specialty products. During 2014, 73% of our total premiums and services revenue were derived from contracts with the federal government, including 15% derived from our individual Medicare Advantage contracts in Florida with the Centers for Medicare and Medicaid Services, or CMS, under which we provide health insurance coverage to approximately 542,400 members as of December 31, 2014.

Humana Inc. was organized as a Delaware corporation in 1964. Our principal executive offices are located at 500 West Main Street, Louisville, Kentucky 40202, the telephone number at that address is (502) 580-1000, and our website address is www.humana.com. We have made available free of charge through the Investor Relations section of our web site our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

This Annual Report on Form 10-K, or 2014 Form 10-K, contains both historical and forward-looking information. See Item 1A. – Risk Factors in this 2014 Form 10-K for a description of a number of factors that may adversely affect our results or business.

Health Care Reform

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. Implementation dates of the Health Care Reform Law began in September 2010 and will continue through 2018, and many aspects of the Health Care Reform Law are already effective and have been implemented by us. Certain significant provisions of the Health Care Reform Law include, among others, mandated coverage requirements, mandated benefits and guarantee issuance associated with commercial medical insurance, rebates to policyholders based on minimum benefit ratios, adjustments to Medicare Advantage premiums, the establishment of federally facilitated or state-based exchanges coupled with programs designed to spread risk among insurers, an annual insurance industry premium-based assessment, and a three-year commercial reinsurance fee. The

Health Care Reform Law is discussed more fully in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations under the section titled "Health Care Reform."

Business Segments

On January 1, 2014, we reclassified certain of our businesses from our Healthcare Services segment to our Employer Group segment to correspond with internal management reporting changes. Our reportable segments remain the same and prior period segment financial information has been recast to conform to the 2014 presentation. See Note 17 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for segment financial information.

We manage our business with three reportable segments: Retail, Employer Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

Our Products

Our medical and specialty insurance products allow members to access health care services primarily through our networks of health care providers with whom we have contracted. These products may vary in the degree to which members have coverage. Health maintenance organizations, or HMOs, generally require a referral from the member's primary care provider before seeing certain specialty physicians. Preferred provider organizations, or PPOs, provide members the freedom to choose a health care provider without requiring a referral. However PPOs generally require the member to pay a greater portion of the provider's fee in the event the member chooses not to use a provider participating in the PPO's network. Point of Service, or POS, plans combine the advantages of HMO plans with the flexibility of PPO plans. In general, POS plans allow members to choose, at the time medical services are needed, to seek care from a provider within the plan's network or outside the network. In addition, we offer services to our health plan members as well as to third parties that promote health and wellness, including pharmacy, provider, home based, and integrated wellness services. At the core of our strategy is our integrated care delivery model, which unites quality care, high member engagement, and sophisticated data analytics. Three core elements of the model are to improve the consumer experience by simplifying the interaction, engaging members in clinical programs, and offering assistance to providers in transitioning from a fee-for-service to a value-based arrangement. Our approach to primary, physician-directed care for our members aims to provide quality care that is consistent, integrated, cost-effective, and member-focused. The model is designed to improve health outcomes and affordability for individuals and for the health system as a whole, while offering our members a simple, seamless healthcare experience. The discussion that follows describes the products offered by each of our segments.

Our Retail Segment Products

This segment is comprised of products sold on a retail basis to individuals including medical and supplemental benefit plans described in the discussion that follows. The following table presents our premiums and services revenue for the Retail segment by product for the year ended December 31, 2014:

	Retail Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Premiums:		
Individual Medicare Advantage	$ 25,941	53.9%
Medicare stand-alone PDP	3,396	7.1%
Total Retail Medicare	29,337	61.0%
Individual commercial	3,265	6.8%
State-based Medicaid	1,096	2.3%
Individual specialty	256	0.4%
Total premiums	33,954	70.5%
Services	39	0.1%
Total premiums and services revenue	$ 33,993	70.6%

Individual Medicare

We have participated in the Medicare program for private health plans for over 30 years and have established a national presence, offering at least one type of Medicare plan in all 50 states. We have a geographically diverse membership base that we believe provides us with greater ability to expand our network of PPO and HMO providers. We employ strategies including health assessments and clinical guidance programs such as lifestyle and fitness programs for seniors to guide Medicare beneficiaries in making cost-effective decisions with respect to their health care. We believe these strategies result in cost savings that occur from making positive behavior changes.

Medicare is a federal program that provides persons age 65 and over and some disabled persons under the age of 65 certain hospital and medical insurance benefits. CMS, an agency of the United States Department of Health and Human Services, administers the Medicare program. Hospitalization benefits are provided under Part A, without the payment of any premium, for up to 90 days per incident of illness plus a lifetime reserve aggregating 60 days. Eligible beneficiaries are required to pay an annually adjusted premium to the federal government to be eligible for physician care and other services under Part B. Beneficiaries eligible for Part A and Part B coverage under traditional fee-for-service Medicare are still required to pay out-of-pocket deductibles and coinsurance. Throughout this document this program is referred to as Medicare FFS. As an alternative to Medicare FFS, in geographic areas where a managed care organization has contracted with CMS pursuant to the Medicare Advantage program, Medicare beneficiaries may choose to receive benefits from a Medicare Advantage organization under Medicare Part C. Pursuant to Medicare Part C, Medicare Advantage organizations contract with CMS to offer Medicare Advantage plans to provide benefits at least comparable to those offered under Medicare FFS. Our Medicare Advantage plans are discussed more fully below. Prescription drug benefits are provided under Part D.

Individual Medicare Advantage Products

We contract with CMS under the Medicare Advantage program to provide a comprehensive array of health insurance benefits, including wellness programs, chronic care management, and care coordination, to Medicare eligible persons under HMO, PPO, and Private Fee-For-Service, or PFFS, plans in exchange for contractual payments received from CMS, usually a fixed payment per member per month. With each of these products, the beneficiary receives benefits in excess of Medicare FFS, typically including reduced cost sharing, enhanced prescription drug benefits, care coordination, data analysis techniques to help identify member needs, complex case management, tools to guide

members in their health care decisions, care management programs, wellness and prevention programs and, in some instances, a reduced monthly Part B premium. Most Medicare Advantage plans offer the prescription drug benefit under Part D as part of the basic plan, subject to cost sharing and other limitations. Accordingly, all of the provisions of the Medicare Part D program described in connection with our stand-alone prescription drug plans in the following section also are applicable to most of our Medicare Advantage plans. Medicare Advantage plans may charge beneficiaries monthly premiums and other copayments for Medicare-covered services or for certain extra benefits. Generally, Medicare-eligible individuals enroll in one of our plan choices between October 15 and December 7 for coverage that begins on the following January 1.

Our Medicare HMO and PPO plans, which cover Medicare-eligible individuals residing in certain counties, may eliminate or reduce coinsurance or the level of deductibles on many other medical services while seeking care from participating in-network providers or in emergency situations. Except in emergency situations or as specified by the plan, most HMO plans provide no out-of-network benefits. PPO plans carry an out-of network benefit that is subject to higher member cost-sharing. In some cases, these beneficiaries are required to pay a monthly premium to the HMO or PPO plan in addition to the monthly Part B premium they are required to pay the Medicare program.

Most of our Medicare PFFS plans are network-based products with in and out of network benefits due to a requirement that Medicare Advantage organizations establish adequate provider networks, except in geographic areas that CMS determines have fewer than two network-based Medicare Advantage plans. In these areas, we offer Medicare PFFS plans that have no preferred network. Individuals in these plans pay us a monthly premium to receive typical Medicare Advantage benefits along with the freedom to choose any health care provider that accepts individuals at rates equivalent to Medicare FFS payment rates.

CMS uses monthly rates per person for each county to determine the fixed monthly payments per member to pay to health benefit plans. These rates are adjusted under CMS's risk-adjustment model which uses health status indicators, or risk scores, to improve the accuracy of payment. The risk-adjustment model, which CMS implemented pursuant to the Balanced Budget Act of 1997 (BBA) and the Benefits and Improvement Protection Act of 2000 (BIPA), generally pays more for members with predictably higher costs and uses principal hospital inpatient diagnoses as well as diagnosis data from ambulatory treatment settings (hospital outpatient department and physician visits) to establish the risk-adjustment payments. Under the risk-adjustment methodology, all health benefit organizations must collect from providers and submit the necessary diagnosis code information to CMS within prescribed deadlines.

At December 31, 2014, we provided health insurance coverage under CMS contracts to approximately 2,446,200 individual Medicare Advantage members, including approximately 542,400 members in Florida. These Florida contracts accounted for premiums revenue of approximately $7.2 billion, which represented approximately 27.8% of our individual Medicare Advantage premiums revenue, or 15.0% of our consolidated premiums and services revenue for the year ended December 31, 2014.

Our HMO, PPO, and PFFS products covered under Medicare Advantage contracts with CMS are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare Advantage products have been renewed for 2015, and all of our product offerings filed with CMS for 2015 have been approved.

Individual Medicare Stand-Alone Prescription Drug Products

We offer stand-alone prescription drug plans, or PDPs, under Medicare Part D, including a PDP plan co-branded with Wal-Mart Stores, Inc., or the Humana-Walmart plan. Generally, Medicare-eligible individuals enroll in one of our plan choices between October 15 and December 7 for coverage that begins on the following January 1. Our stand-alone PDP offerings consist of plans offering basic coverage with benefits mandated by Congress, as well as plans providing enhanced coverage with varying degrees of out-of-pocket costs for premiums, deductibles, and co-insurance. Our revenues from CMS and the beneficiary are determined from our PDP bids submitted annually to CMS. These revenues also reflect the health status of the beneficiary and risk sharing provisions as more fully described in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations under the section titled "Medicare Part D Provisions." Our stand-alone PDP contracts with CMS are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare stand-alone PDP products have been renewed for 2015, and all of our product offerings filed with CMS for 2015 have been approved.

We have administered CMS's Limited Income Newly Eligible Transition, or LI-NET, prescription drug plan program since 2010. This program allows individuals who receive Medicare's low-income subsidy to also receive immediate prescription drug coverage at the point of sale if they are not already enrolled in a Medicare Part D plan. CMS temporarily enrolls newly identified individuals with both Medicare and Medicaid into the LI-NET prescription drug plan program, and subsequently transitions each member into a Medicare Part D plan that may or may not be a Humana Medicare plan.

Medicare and Medicaid Dual Eligible and Long-Term Care Support Services

Medicare beneficiaries who also qualify for Medicaid due to low income or special needs are known as dual eligible beneficiaries, or dual eligibles. The dual eligible population represents a disproportionate share of Medicaid and Medicare costs. There were approximately 9.6 million dual eligible individuals in the United States in 2014, trending upward due to Medicaid eligibility expansions and individuals aging into the Medicare program. These dual eligibles may enroll in a privately-offered Medicare Advantage product, but may also receive assistance from Medicaid for Medicaid benefits, such as nursing home care and/or assistance with Medicare premiums and cost sharing. The dual eligible population is a strategic area of focus for us and we are leveraging the capabilities of our integrated care delivery model, including care management programs particularly as they relate to chronic conditions, to expand our services to this population. As of December 31, 2014, we served approximately 404,000 dual eligible members in our Medicare Advantage plans and approximately 992,000 dual eligible members in our stand-alone prescription drug plans.

Since the enactment of the Health Care Reform Law, states are pursuing stand-alone dual eligible CMS demonstration programs in which Medicare, Medicaid, and Long-Term Care Support Services (LTSS) benefits are more tightly integrated. Eligibility for participation in these stand-alone dual eligible demonstration programs may require state-based contractual relationships in existing Medicaid programs. We were successful in our bids for state-based contracts in Florida and Virginia in 2013 and in Ohio, Illinois, and Kentucky in 2012. Ohio, Illinois, and Virginia are contracts for stand-alone dual eligible demonstration programs serving individuals dually eligible for both the federal Medicare program and the state-based Medicaid program. We began serving members in Illinois in the first quarter of 2014 and in Virginia in the second quarter of 2014. We partner with organizations, including CareSource Management Group Company, to serve individuals in certain states. We began serving members in Kentucky and certain LTSS regions in Florida at various effective dates ranging from the second half of 2013 through the first quarter of 2014.

LTSS eligible beneficiaries heavily overlap with the dual eligible population. On September 6, 2013, we acquired American Eldercare Inc., or American Eldercare, the largest provider of nursing home diversion services in the state of Florida, serving frail and elderly individuals in home and community-based settings. American Eldercare complements our core capabilities and strength in serving seniors and disabled individuals with a unique focus on individualized and integrated care, and has contracts to provide Medicaid long-term support services across the entire state of Florida. The enrollment effective dates for the various regions ranged from August 2013 to March 2014.

Individual Commercial Coverage

Our individual health plans are marketed under the HumanaOne® brand. We offer products both on and off of the public exchange, including exchange offerings in certain metropolitan areas in 15 states. We offer products on exchanges where we can achieve an affordable cost of care, including HMO offerings and select networks in most markets. Our off-exchange products offered in 22 states are primarily PPO and POS offerings, including plans issued prior to 2014 that were previously underwritten. Policies issued prior to the enactment of the Health Care Reform Law on March 23, 2010 are grandfathered policies. Grandfathered policies are exempt from most of the requirements of the Health Care Reform Law, including mandated benefits. However, our grandfathered plans include provisions that guarantee renewal of coverage for as long as the individual chooses. Policies issued between March 23, 2010 and December 31, 2013 are required to conform to the Health Care Reform Law, including mandated benefits, upon renewal in 2014, 2015 or 2016, depending on the state.

Prior to 2014, our HumanaOne® plans primarily were offered as PPO plans in 27 states where we could generally underwrite risk and utilize our existing networks and distribution channels. As indicated above, this individual product included provisions mandated by law to guarantee renewal of coverage for as long as the individual chooses.

Rewards-based wellness programs are included with many individual products. We also offer optional benefits such as dental, vision, life, and a portfolio of financial protection products.

Employer Group Segment Products

This segment is comprised of products sold to employer groups including medical and supplemental benefit plans as well as health and wellness products as described in the discussion that follows. The following table presents our premiums and services revenue for the Employer Group segment by product for the year ended December 31, 2014:

	Employer Group Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
External Revenue:		
Premiums:		
Group Medicare Advantage	$ 5,490	11.4%
Group Medicare stand-alone PDP	8	—%
Total group Medicare	5,498	11.4%
Fully-insured commercial group	5,339	11.1%
Group specialty	1,098	2.3%
Total premiums	11,935	24.8%
Services	362	0.8%
Total premiums and services revenue	$ 12,297	25.6%
Intersegment services revenue:		
Wellness	$ 78	n/a
Total intersegment services revenue	$ 78	

n/a – not applicable

Employer Group Commercial Coverage

Our commercial products sold to employer groups include a broad spectrum of major medical benefits with multiple in-network coinsurance levels and annual deductible choices that employers of all sizes can offer to their employees on either a fully-insured, through HMO, PPO, or POS plans, or self-funded basis. Our plans integrate clinical programs, plan designs, communication tools, and spending accounts. We participate in the Federal Employee Health Benefits

Program, or FEHBP, primarily with our HMO offering in certain markets. FEHBP is the government's health insurance program for Federal employees, retirees, former employees, family members, and spouses. As with our individual commercial products, the employer group offerings include HumanaVitality®, our wellness and loyalty reward program.

Our administrative services only, or ASO, products are offered to employers who self-insure their employee health plans. We receive fees to provide administrative services which generally include the processing of claims, offering access to our provider networks and clinical programs, and responding to customer service inquiries from members of self-funded employers. These products may include all of the same benefit and product design characteristics of our fully-insured HMO, PPO, or POS products described previously. Under ASO contracts, self-funded employers generally retain the risk of financing substantially all of the cost of health benefits. However, more than half of our ASO customers purchase stop loss insurance coverage from us to cover catastrophic claims or to limit aggregate annual costs.

As with individual commercial policies, employers can customize their offerings with optional benefits such as dental, vision, life, and a portfolio of voluntary benefit products.

Group Medicare Advantage and Medicare stand-alone PDP

We offer products that enable employers that provide post-retirement health care benefits to replace Medicare wrap or Medicare supplement products with Medicare Advantage or stand-alone PDPs from Humana. These products offer the same types of benefits and services available to members in our individual Medicare plans discussed previously and can be tailored to closely match an employer's post-retirement benefit structure.

Wellness

We offer wellness solutions including our Humana Vitality® wellness and loyalty rewards program, health coaching, and clinical programs. These programs, when offered collectively to employer customers as our Total Health product, turn any standard plan of the employer's choosing into an integrated health and well-being solution that encourages participation in these programs.

Our Humana Vitality® program provides our members with access to a science-based, actuarially driven wellness and loyalty program that features a wide range of well-being tools and rewards that are customized to an individual's needs and wants. A key element of the program includes a sophisticated health-behavior-change model supported by an incentive program.

We also provide employee assistance programs and coaching services including a comprehensive turn-key coaching program, an enhancement to a medically based coaching protocol and a platform that makes coaching programs more efficient.

Our Healthcare Services Segment Products

The products offered by our Healthcare Services segment are key to our integrated care delivery model. This segment is comprised of stand-alone businesses that offer services including pharmacy solutions, provider services, home based services, integrated behavioral health services, and predictive modeling and informatics services to other Humana businesses, as well as external health plan members, external health plans, and other employers or individuals and are described in the discussion that follows. Our intersegment revenue is described in Note 17 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. The following table presents our services revenue for the Healthcare Services segment by line of business for the year ended December 31, 2014:

	Healthcare Services Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Intersegment revenue:		
Pharmacy solutions	$ 16,905	n/a
Provider services	1,110	n/a
Home based services	585	n/a
Integrated behavioral health services	133	n/a
Total intersegment revenue	$ 18,733	
External services revenue:		
Provider services	$ 1,076	2.3%
Home based services	107	0.2%
Pharmacy solutions	99	0.2%
Integrated behavioral health services	—	—%
Total external services revenue	$ 1,282	2.7%

n/a – not applicable

Pharmacy solutions

Humana Pharmacy Solutions®, or HPS, manages traditional prescription drug coverage for both individuals and employer groups in addition to providing a broad array of pharmacy solutions. HPS also operates prescription mail order services for brand, generic, and specialty drugs and diabetic supplies through RightSourceRx®, as well as research services.

Provider services

Our subsidiary, Concentra Inc.®, acquired in 2010, delivers occupational medicine, urgent care, physical therapy, and wellness services to employees and the general public through its operation of medical centers and worksite medical facilities.

Our CAC Medical Centers, or CAC, in South Florida operate full-service, multi-specialty medical centers staffed by primary care providers and medical specialists practicing cardiology, endocrinology, geriatric medicine, internal medicine, ophthalmology, neurology, and podiatry.

Our subsidiary, Metropolitan Health Networks, Inc., or Metropolitan, and our noncontrolling equity interest in MCCI Holdings, LLC, or MCCI, both acquired in 2012, are Medical Services Organizations, or MSOs, that coordinate medical care for Medicare Advantage beneficiaries and Medicaid recipients, primarily in Florida and Texas. These MSOs represent key components of our integrated care delivery model which we believe is scalable to new markets.

Home based services

Via in-home care, telephonic health counseling/coaching, and remote monitoring, we are actively involved in the care management of our customers with the greatest needs. Home based services include the operations of Humana At Home, Inc., or Humana At Home® (formerly known as SeniorBridge Family Companies, Inc.), acquired in 2012. As a chronic-care provider of in-home care for seniors, we provide innovative and holistic care coordination services for individuals living with multiple chronic conditions, individuals with disabilities, fragile and aging-in-place members and their care givers. We focus our deployment of these services in geographies, such as Florida, with a high concentration of members living with multiple chronic conditions. The clinical support and care provided by Humana At Home® is designed to improve health outcomes and result in a higher number of days members can spend at their homes instead of in an acute care facility.

Integrated behavioral health services

Corphealth, Inc. (d/b/a LifeSynch®), a Humana subsidiary, offers care management, behavioral health services and wellness programs.

Other Businesses

Products and services offered by our Other Businesses are described in the discussion that follows. The following table presents our premiums and services revenue for our Other Businesses for the year ended December 31, 2014:

	Other Businesses Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Premiums:		
Military services	$ 19	—%
Closed-block long-term care insurance policies	51	0.1%
Total premiums	70	0.1%
Services	481	1.0%
Total premiums and services revenue	$ 551	1.1%

Military Services

Under our TRICARE South Region contract with the United States Department of Defense, or DoD, we provide administrative services to arrange health care services for the dependents of active duty military personnel and for retired military personnel and their dependents. We have participated in the TRICARE program since 1996 under contracts with the DoD. On April 1, 2012, we began delivering services under our current TRICARE South Region contract that the Defense Health Agency, or DHA (formerly known as the TRICARE Management Activity), awarded to us on February 25, 2011. Under the current contract, we provide administrative services while the federal government retains all of the risk of the cost of health benefits. Accordingly, we account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement.

Closed Block of Long-Term Care Insurance Policies

We have a non-strategic closed block of approximately 32,700 long-term care insurance policies associated with our acquisition of KMG America Corporation in 2007. Long-term care insurance policies are intended to protect the insured from the cost of long-term care services including those provided by nursing homes, assisted living facilities, and adult day care as well as home health care services. No new policies have been written since 2005 under this closed block and we are evaluating strategic alternatives for this business.

Informatics

Programs to enhance the quality of care for members are key elements of our integrated care delivery model. We believe that technology represents a significant opportunity in health care that positively impacts our members. We have enhanced our health information technology capabilities enabling us to create a more complete view of an individual's health, designed to connect, coordinate and simplify health care while reducing costs. These capabilities include our health care analytics engine, which reviews millions of clinical data points each day to provide members, providers, and payers real-time clinical insights and gaps-in-care data to improve health outcomes, as well as technology that allows disparate electronic health record systems and Humana to share data that gives providers a comprehensive view of the patient and enables the exchange of essential health information in real-time. As we have integrated these and related assets into our operations over the past few years, we have enhanced our ability to leverage predictive modeling capabilities that enable us to anticipate, rather than react to, our members' health needs. To that end, we have accelerated our process for identifying and reaching out to members in need of clinical intervention. At December 31, 2014, we had approximately 420,700 members with complex chronic conditions in the Humana Chronic Care Program,

a 50.1% increase compared with approximately 280,200 members at December 31, 2013, reflecting enhanced predictive modeling capabilities and focus on proactive clinical outreach and member engagement, particularly for our Medicare Advantage membership. We believe these initiatives lead to better health outcomes for our members and lower health care costs.

Membership

The following table summarizes our total medical membership at December 31, 2014, by market and product:

	Retail Segment				Employer Group Segment					
	(in thousands)									
	Individual Medicare Advantage	Individual Medicare stand-alone PDP	Individual Commercial	State-based contracts	Fully-insured commercial Group	Group Medicare Advantage and stand-alone PDP	ASO	Other Businesses	Total	Percent of Total
Florida	542.4	300.6	252.7	293.7	189.7	22.6	28.3	—	1,630.0	11.8%
Texas	184.0	258.5	181.6	—	238.6	63.2	118.2	—	1,044.1	7.5%
Kentucky	74.5	185.6	27.3	—	101.8	81.0	472.1	—	942.3	6.8%
Georgia	92.8	90.3	286.4	—	140.8	2.4	15.8	—	628.5	4.5%
Ohio	81.3	121.1	21.9	—	48.6	151.0	139.0	—	562.9	4.1%
Illinois	83.9	126.1	28.8	4.8	108.1	11.6	90.3	—	453.6	3.3%
California	38.4	378.9	9.6	—	0.1	0.1	—	—	427.1	3.1%
Wisconsin	51.5	80.2	11.7	—	89.4	14.2	113.3	—	360.3	2.6%
Missouri/Kansas	82.2	175.6	14.3	—	53.3	5.0	6.9	—	337.3	2.4%

Provider Arrangements

We provide our members with access to health care services through our networks of health care providers whom we employ or with whom we have contracted, including hospitals and other independent facilities such as outpatient surgery centers, primary care providers, specialist physicians, dentists, and providers of ancillary health care services and facilities. These ancillary services and facilities include laboratories, ambulance services, medical equipment services, home health agencies, mental health providers, rehabilitation facilities, nursing homes, optical services, and pharmacies. Our membership base and the ability to influence where our members seek care generally enable us to obtain contractual discounts with providers.

We use a variety of techniques to provide access to effective and efficient use of health care services for our members. These techniques include the coordination of care for our members, product and benefit designs, hospital inpatient management systems, the use of sophisticated analytics, and enrolling members into various care management programs. The focal point for health care services in many of our HMO networks is the primary care provider who, under contract with us, provides services to our members, and may control utilization of appropriate services by directing or approving hospitalization and referrals to specialists and other providers. Some physicians may have arrangements under which they can earn bonuses when certain target goals relating to the provision of quality patient care are met.

We have available care management programs related to complex chronic conditions such as congestive heart failure and coronary artery disease. We also have programs for prenatal and premature infant care, asthma related illness, end stage renal disease, diabetes, cancer, and certain other conditions.

We typically contract with hospitals on either (1) a per diem rate, which is an all-inclusive rate per day, (2) a case rate or diagnosis-related groups (DRG), which is an all-inclusive rate per admission, or (3) a discounted charge for inpatient hospital services. Outpatient hospital services generally are contracted at a flat rate by type of service, ambulatory payment classifications, or APCs, or at a discounted charge. APCs are similar to flat rates except multiple services and procedures may be aggregated into one fixed payment. These contracts are often multi-year agreements, with rates that are adjusted for inflation annually based on the consumer price index, other nationally recognized inflation indexes, or specific negotiations with the provider. Outpatient surgery centers and other ancillary providers typically are contracted at flat rates per service provided or are reimbursed based upon a nationally recognized fee schedule such as the Medicare allowable fee schedule.

Our contracts with physicians typically are renewed automatically each year, unless either party gives written notice, generally ranging from 90 to 120 days, to the other party of its intent to terminate the arrangement. Most of the physicians in our PPO networks and some of our physicians in our HMO networks are reimbursed based upon a fixed fee schedule, which typically provides for reimbursement based upon a percentage of the standard Medicare allowable fee schedule.

The terms of our contracts with hospitals and physicians may also vary between Medicare and commercial business. A significant portion of our Medicare network contracts, including those with both hospitals and physicians, are tied to Medicare reimbursement levels and methodologies.

Automatic reductions to the federal budget, known as sequestration, took effect on April 1, 2013, including aggregate reductions to Medicare payments to providers of up to 2% per fiscal year. Due to the uncertainty around the application of these reductions, there can be no assurances that we can completely offset any reductions to the Medicare healthcare programs. See "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Capitation

We offer providers a continuum of opportunities to increase the integration of care and offer assistance to providers in transitioning from a fee-for-service to a value-based arrangement. These include performance bonuses, shared savings and shared risk relationships. For some of our medical membership, we share risk with providers under capitation contracts where physicians and hospitals accept varying levels of financial risk for a defined set of membership, primarily HMO membership. Under the typical capitation arrangement, we prepay these providers a monthly fixed-fee per member, known as a capitation (per capita) payment, to cover all or a defined portion of the benefits provided to the capitated member.

We believe these risk-based models represent a key element of our integrated care delivery model at the core of our strategy. Our health plan subsidiaries may enter into these risk-based contracts with third party providers or our owned provider subsidiaries.

At December 31, 2014, approximately 883,000 members, or 6.4% of our medical membership, were covered under risk-based contracts, including 709,000 individual Medicare Advantage members, or 29.0% of our total individual Medicare Advantage membership.

Physicians under capitation arrangements typically have stop loss coverage so that a physician's financial risk for any single member is limited to a maximum amount on an annual basis. We typically process all claims and monitor the financial performance and solvency of our capitated providers. However, we delegated claim processing functions under capitation arrangements covering approximately 141,200 HMO members, including 113,200 individual Medicare Advantage members, or 16.0% of the 709,000 individual Medicare Advantage members covered under risk-based contracts at December 31, 2014, with the provider assuming substantially all the risk of coordinating the members' health care benefits. Capitation expense under delegated arrangements for which we have a limited view of the

underlying claims experience was approximately $833 million, or 2.2% of total benefits expense, for the year ended December 31, 2014. We remain financially responsible for health care services to our members in the event our providers fail to provide such services.

Accreditation Assessment

Our accreditation assessment program consists of several internal programs, including those that credential providers and those designed to meet the audit standards of federal and state agencies as well as external accreditation standards. We also offer quality and outcome measurement and improvement programs such as the Health Care Effectiveness Data and Information Sets, or HEDIS, which is used by employers, government purchasers and the National Committee for Quality Assurance, or NCQA, to evaluate health plans based on various criteria, including effectiveness of care and member satisfaction.

Providers participating in our networks must satisfy specific criteria, including licensing, patient access, office standards, after-hours coverage, and other factors. Most participating hospitals also meet accreditation criteria established by CMS and/or the Joint Commission on Accreditation of Healthcare Organizations.

Recredentialing of participating providers occurs every two to three years, depending on applicable state laws. Recredentialing of participating providers includes verification of their medical licenses, review of their malpractice liability claims histories, review of their board certifications, if applicable, and review of applicable quality information. A committee, composed of a peer group of providers, reviews the applications of providers being considered for credentialing and recredentialing.

We request accreditation for certain of our health plans and/or departments from NCQA, the Accreditation Association for Ambulatory Health Care, and URAC. Accreditation or external review by an approved organization is mandatory in the states of Florida and Kansas for licensure as an HMO. Additionally, all products sold on the federal and state marketplaces are required to be accredited. Certain commercial businesses, like those impacted by a third-party labor agreement or those where a request is made by the employer, may require or prefer accredited health plans.

NCQA reviews our compliance based on standards for quality improvement, credentialing, utilization management, member connections, and member rights and responsibilities. We have achieved and maintained NCQA accreditation in most of our commercial, Medicare and Medicaid HMO/POS markets with enough history and membership, except Puerto Rico, and for many of our PPO markets.

Sales and Marketing

We use various methods to market our products, including television, radio, the Internet, telemarketing, and direct mailings.

At December 31, 2014, we employed approximately 1,700 sales representatives, as well as approximately 1,200 telemarketing representatives who assisted in the marketing of individual Medicare and individual commercial health insurance and specialty products in our Retail segment, including making appointments for sales representatives with prospective members. We also market our individual Medicare products via a strategic alliance with Wal-Mart Stores, Inc., or Wal-Mart. This alliance includes stationing Humana representatives in certain Wal-Mart stores, SAM'S CLUB locations, and Neighborhood Markets across the country which provides an opportunity to enroll Medicare eligible individuals in person. In addition, we market our individual Medicare and individual commercial health insurance and specialty products through licensed independent brokers and agents. For our Medicare products, commissions paid to employed sales representatives and independent brokers and agents are based on a per unit commission structure, regulated in structure and amount by CMS. For our individual commercial health insurance and specialty products, we generally pay brokers a commission based on premiums, with commissions varying by market and premium volume. In addition to a commission based directly on premium volume for sales to particular customers, we also have programs that pay brokers and agents based on other metrics. These include commission bonuses based on sales that attain certain levels or involve particular products. We also pay additional commissions based on aggregate volumes of sales involving multiple customers.

In our Employer Group segment, individuals may become members of our commercial HMOs and PPOs through their employers or other groups, which typically offer employees or members a selection of health insurance products, pay for all or part of the premiums, and make payroll deductions for any premiums payable by the employees. We attempt to become an employer's or group's exclusive source of health insurance benefits by offering a variety of HMO, PPO, and specialty products that provide cost-effective quality health care coverage consistent with the needs and expectations of their employees or members. In addition, we have begun to offer plans to employer groups through private exchanges. Employers can give their employees a set amount of money and then direct them to a private exchange. There, employees can shop for a health plan and other benefits based on what the employer has selected as options. We also sell group Medicare Advantage products through large employers. We use licensed independent brokers, independent agents, and employees to sell our group products. Many of our larger employer group customers are represented by insurance brokers and consultants who assist these groups in the design and purchase of health care products. We pay brokers and agents using the same commission structure described above for our individual commercial health insurance and specialty products.

Underwriting

Beginning in 2014, the Health Care Reform Law requires all individual and group health plans to guarantee issuance and renew coverage without pre-existing condition exclusions or health-status rating adjustments. Accordingly, newly issued individual and group health plans are not subject to underwriting in 2014 and beyond. Further, underwriting techniques are not employed in connection with our Medicare, military services, or Medicaid products because government regulations require us to accept all eligible applicants regardless of their health or prior medical history.

Prior to 2014, through the use of internally developed underwriting criteria, we determined the risk we were willing to assume and the amount of premium to charge for our commercial products. In most instances, employer and other groups had to meet our underwriting standards in order to qualify to contract with us for coverage.

Competition

The health benefits industry is highly competitive. Our competitors vary by local market and include other managed care companies, national insurance companies, and other HMOs and PPOs. Many of our competitors have larger memberships and/or greater financial resources than our health plans in the markets in which we compete. Our ability to sell our products and to retain customers may be influenced by such factors as those described in Item 1A. – Risk Factors in this 2014 Form 10-K.

Government Regulation

Diverse legislative and regulatory initiatives at both the federal and state levels continue to affect aspects of the nation's health care system.

Our management works proactively to ensure compliance with all governmental laws and regulations affecting our business. We are unable to predict how existing federal or state laws and regulations may be changed or interpreted, what additional laws or regulations affecting our businesses may be enacted or proposed, when and which of the proposed laws will be adopted or what effect any such new laws and regulations will have on our results of operations, financial position, or cash flows.

For a description of certain material current activities in the federal and state legislative areas, see Item 1A. – Risk Factors in this 2014 Form 10-K.

Certain Other Services

Captive Insurance Company

We bear general business risks associated with operating our Company such as professional and general liability, employee workers' compensation, and officer and director errors and omissions risks. Professional and general liability risks may include, for example, medical malpractice claims and disputes with members regarding benefit coverage. We retain certain of these risks through our wholly-owned, captive insurance subsidiary. We reduce exposure to these risks by insuring levels of coverage for losses in excess of our retained limits with a number of third-party insurance companies. We remain liable in the event these insurance companies are unable to pay their portion of the losses.

Centralized Management Services

We provide centralized management services to each of our health plans and to our business segments from our headquarters and service centers. These services include management information systems, product development and administration, finance, human resources, accounting, law, public relations, marketing, insurance, purchasing, risk management, internal audit, actuarial, underwriting, claims processing, billing/enrollment, and customer service.

Employees

As of December 31, 2014, we had approximately 57,000 employees and approximately 2,700 additional medical professionals working under management agreements primarily between Concentra and affiliated physician-owned associations. We believe we have good relations with our employees and have not experienced any work stoppages.

ITEM 1A. RISK FACTORS

If we do not design and price our products properly and competitively, if the premiums we charge are insufficient to cover the cost of health care services delivered to our members, if we are unable to implement clinical initiatives to provide a better health care experience for our members, lower costs and appropriately document the risk profile of our members, or if our estimates of benefits expense are inadequate, our profitability may be materially adversely affected. We estimate the costs of our benefits expense payments, and design and price our products accordingly, using actuarial methods and assumptions based upon, among other relevant factors, claim payment patterns, medical cost inflation, and historical developments such as claim inventory levels and claim receipt patterns. These estimates, however involve extensive judgment, and have considerable inherent variability because they are extremely sensitive to changes in claim payment patterns and medical cost trends.

We use a substantial portion of our revenues to pay the costs of health care services delivered to our members. These costs include claims payments, capitation payments to providers (predetermined amounts paid to cover services), and various other costs incurred to provide health insurance coverage to our members. These costs also include estimates of future payments to hospitals and others for medical care provided to our members. Generally, premiums in the health care business are fixed for one-year periods. Accordingly, costs we incur in excess of our benefit cost projections generally are not recovered in the contract year through higher premiums. We estimate the costs of our future benefit claims and other expenses using actuarial methods and assumptions based upon claim payment patterns, medical inflation, historical developments, including claim inventory levels and claim receipt patterns, and other relevant factors. We also record benefits payable for future payments. We continually review estimates of future payments relating to benefit claims costs for services incurred in the current and prior periods and make necessary adjustments to our reserves. However, these estimates involve extensive judgment, and have considerable inherent variability that is sensitive to claim payment patterns and medical cost trends. Many factors may and often do cause actual health care costs to exceed what was estimated and used to set our premiums. These factors may include:

- increased use of medical facilities and services;
- increased cost of such services;
- increased use or cost of prescription drugs, including specialty prescription drugs;
- the introduction of new or costly treatments, including new technologies;
- our membership mix;
- variances in actual versus estimated levels of cost associated with new products, benefits or lines of business, product changes or benefit level changes;
- changes in the demographic characteristics of an account or market;
- changes or reductions of our utilization management functions such as preauthorization of services, concurrent review or requirements for physician referrals;
- changes in our pharmacy volume rebates received from drug manufacturers;
- catastrophes, including acts of terrorism, public health epidemics, or severe weather (e.g. hurricanes and earthquakes);
- medical cost inflation; and
- government mandated benefits or other regulatory changes, including any that result from the Health Care Reform Law.

Key to our operational strategy is the implementation of clinical initiatives that we believe provide a better health care experience for our members, lower the cost of healthcare services delivered to our members, and appropriately document the risk profile of our members. Our profitability and competitiveness depend in large part on our ability to appropriately manage health care costs through, among other things, the application of medical management programs such as our chronic care management program.

In addition, we also estimate costs associated with long-duration insurance policies including long-term care, life insurance, annuities, and certain health and other supplemental insurance policies sold to individuals for which some

of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these future policy benefit reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Because these policies have long-term claim payout periods, there is a greater risk of significant variability in claims costs, either positive or negative. Our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. We monitor the loss experience of these long-term care insurance policies, and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. However, to the extent premium rate increases or loss experience vary from the assumptions we have locked in, additional future adjustments to reserves could be required.

While we proactively attempt to effectively manage our operating expenses, increases or decreases in staff-related expenses, additional investment in new products (including our opportunities in the Medicare programs, state-based contracts, participation in health insurance exchanges, and expansion of clinical capabilities as part of our integrated care delivery model), investments in health and well-being product offerings, acquisitions, new taxes and assessments (including the non-deductible health insurance industry fee and other assessments under the Health Care Reform Law), and implementation of regulatory requirements may increase our operating expenses.

Failure to adequately price our products or estimate sufficient benefits payable or future policy benefits payable, or effectively manage our operating expenses, may result in a material adverse effect on our results of operations, financial position, and cash flows.

We are in a highly competitive industry. Some of our competitors are more established in the health care industry in terms of a larger market share and have greater financial resources than we do in some markets. In addition, other companies may enter our markets in the future, including emerging competitors in the Medicare program or competitors in the delivery of health care services. We may also face increased competition due to participation by other insurers in the health insurance exchanges implemented under the Health Care Reform Law. We believe that barriers to entry in our markets are not substantial, so the addition of new competitors can occur relatively easily, and customers enjoy significant flexibility in moving between competitors. Contracts for the sale of commercial products are generally bid upon or renewed annually. While health plans compete on the basis of many factors, including service and the quality and depth of provider networks, we expect that price will continue to be a significant basis of competition. In addition to the challenge of controlling health care costs, we face intense competitive pressure to contain premium prices. Factors such as business consolidations, strategic alliances, legislative reform, and marketing practices create pressure to contain premium price increases, despite being faced with increasing medical costs.

The policies and decisions of the federal and state governments regarding the Medicare, military, Medicaid and health insurance exchange programs in which we participate have a substantial impact on our profitability. These governmental policies and decisions, which we cannot predict with certainty, directly shape the premiums or other revenues to us under the programs, the eligibility and enrollment of our members, the services we provide to our members, and our administrative, health care services, and other costs associated with these programs. Legislative or regulatory actions, such as those resulting in a reduction in premium payments to us, an increase in our cost of administrative and health care services, or additional fees, taxes or assessments, may have a material adverse effect on our results of operations, financial position, and cash flows.

Premium increases, introduction of new product designs, and our relationships with our providers in various markets, among other issues, could also affect our membership levels. Other actions that could affect membership levels include our possible exit from or entrance into Medicare or commercial markets, or the termination of a large contract.

If we do not compete effectively in our markets, if we set rates too high or too low in highly competitive markets to keep or increase our market share, if membership does not increase as we expect, if membership declines, or if we lose membership with favorable medical cost experience while retaining or increasing membership with unfavorable

medical cost experience, our results of operations, financial position, and cash flows may be materially adversely affected.

If we fail to effectively implement our operational and strategic initiatives, including our Medicare initiatives, our state-based contracts strategy, and our participation in the new health insurance exchanges, our business may be materially adversely affected, which is of particular importance given the concentration of our revenues in these products.

Our future performance depends in large part upon our ability to execute our strategy, including opportunities created by the expansion of our Medicare programs, the successful implementation of our integrated care delivery model, our strategy with respect to state-based contracts, including those covering members dually eligible for the Medicare and Medicaid programs, and our participation in health insurance exchanges.

We have made substantial investments in the Medicare program to enhance our ability to participate in these programs. Over the last few years we have increased the size of our Medicare geographic reach through expanded Medicare product offerings. We offer both stand-alone Medicare prescription drug coverage and Medicare Advantage health plans with prescription drug coverage in addition to our other product offerings. We offer a Medicare prescription drug plan in 50 states as well as Puerto Rico and the District of Columbia. The growth of our Medicare products is an important part of our business strategy. Any failure to achieve this growth may have a material adverse effect on our results of operations, financial position, or cash flows. In addition, the expansion of our Medicare products in relation to our other businesses may intensify the risks to us inherent in Medicare products. There is significant concentration of our revenues in Medicare products, with approximately 72% of our total premiums and services revenue for the year ended December 31, 2014 generated from our Medicare products, in particular our contracts with CMS in Florida. These expansion efforts may result in less diversification of our revenue stream and increased risks associated with operating in a highly regulated industry, as discussed further below.

The recently implemented Health Care Reform Law created a federal Medicare-Medicaid Coordination Office to serve dual eligibles. This Medicare-Medicaid Coordination Office has initiated a series of state demonstration projects to experiment with better coordination of care between Medicare and Medicaid. Depending upon the results of those demonstration projects, CMS may change the way in which dual eligibles are serviced. If we are unable to implement our strategic initiatives to address the dual eligibles opportunity, including our participation in state-based contracts, or if our initiatives are not successful at attracting or retaining dual eligible members, our business may be materially adversely affected.

Additionally, our strategy includes the growth of our commercial products, including participation in the new health insurance exchanges, introduction of new products and benefit designs, including HumanaVitality and other wellness products, growth of our specialty products such as dental, vision and other supplemental products, the adoption of new technologies, development of adjacent businesses, and the integration of acquired businesses and contracts.

There can be no assurance that we will be able to successfully implement our operational and strategic initiatives, including implementing our integrated care delivery model, that are intended to position us for future growth or that the products we design will be accepted or adopted in the time periods assumed. Failure to implement this strategy may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we fail to properly maintain the integrity of our data, to strategically implement new information systems, or to protect our proprietary rights to our systems, our business may be materially adversely affected.

Our business depends significantly on effective information systems and the integrity and timeliness of the data we use to run our business. Our business strategy involves providing members and providers with easy to use products that leverage our information to meet their needs. Our ability to adequately price our products and services, provide effective and efficient service to our customers, and to timely and accurately report our financial results depends significantly on the integrity of the data in our information systems. As a result of our past and on-going acquisition activities, we have acquired additional information systems. We have reduced the number of systems we operate, have

upgraded and expanded our information systems capabilities, and are gradually migrating existing business to fewer systems. Our information systems require an ongoing commitment of significant resources to maintain, protect, and enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving industry and regulatory standards, and changing customer preferences. If the information we rely upon to run our businesses was found to be inaccurate or unreliable or if we fail to maintain effectively our information systems and data integrity, we could have operational disruptions, have problems in determining medical cost estimates and establishing appropriate pricing, have customer and physician and other health care provider disputes, have regulatory or other legal problems, have increases in operating expenses, lose existing customers, have difficulty in attracting new customers, or suffer other adverse consequences.

We depend on independent third parties for significant portions of our systems-related support, equipment, facilities, and certain data, including data center operations, data network, voice communication services and pharmacy data processing. This dependence makes our operations vulnerable to such third parties' failure to perform adequately under the contract, due to internal or external factors. A change in service providers could result in a decline in service quality and effectiveness or less favorable contract terms which may adversely affect our operating results.

We rely on our agreements with customers, confidentiality agreements with employees, and our trade secrets and copyrights to protect our proprietary rights. These legal protections and precautions may not prevent misappropriation of our proprietary information. In addition, substantial litigation regarding intellectual property rights exists in the software industry, including litigation involving end users of software products. We expect software products to be increasingly subject to third-party infringement claims as the number of products and competitors in this area grows.

There can be no assurance that our information technology, or IT, process will successfully improve existing systems, develop new systems to support our expanding operations, integrate new systems, protect our proprietary information, defend against cybersecurity attacks, or improve service levels. In addition, there can be no assurance that additional systems issues will not arise in the future. Failure to adequately protect and maintain the integrity of our information systems and data, or to defend against cybersecurity attacks, may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we are unable to defend our information technology security systems against cybersecurity attacks or prevent other privacy or data security incidents that result in security breaches that disrupt our operations or in the unintended dissemination of sensitive personal information or proprietary or confidential information, we could be exposed to significant regulatory fines or penalties, liability or reputational damage, or experience a material adverse effect on our results of operations, financial position, and cash flows.

In the ordinary course of our business, we process, store and transmit large amounts of data, including sensitive personal information as well as proprietary or confidential information relating to our business or a third-party. A cybersecurity attack may penetrate our layered security controls and misappropriate or compromise sensitive personal information or proprietary or confidential information or that of third-parties, create system disruptions, cause shutdowns, or deploy viruses, worms, and other malicious software programs that attack our systems. A cybersecurity attack that bypasses our IT security systems successfully could materially affect us due to the theft, destruction, loss, misappropriation or release of confidential data or intellectual property, operational or business delays resulting from the disruption of our IT systems, or negative publicity resulting in reputation or brand damage with our members, customers, providers, and other stakeholders.

The costs to eliminate or address cybersecurity threats and vulnerabilities before or after an incident could be substantial. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service, and loss of existing or potential members. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary or confidential information about us or our members or other third-parties, could expose our members' private information and result in the risk of financial or medical identity theft, or expose us or other third-parties to a risk of loss or misuse of this information, result in significant regulatory fines or penalties, litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

Our business may be materially adversely impacted by the adoption of a new coding set for diagnoses.

Federal regulations related to the Health Insurance Portability and Accountability Act of 1996, as amended (HIPAA), contain minimum standards for electronic transactions and code sets, and for the privacy and security of protected health information. ICD-9, the current system of assigning codes to diagnoses and procedures associated with hospital utilization in the United States, was scheduled to be replaced by ICD-10 code sets on October 1, 2014. However, on April 1, 2014, The Protecting Access to Medicare Act of 2014 was signed into law, delaying implementation of ICD-10 until at least October 1, 2015. For dates of service on or after the date of final implementation, health plans and providers will be required to use ICD-10 codes for such diagnoses and procedures. While we have prepared for the transition to ICD-10, if unforeseen circumstances arise, it is possible that we could be exposed to investigations and allegations of noncompliance, which could have a material adverse effect on our results of operations, financial position and cash flows. In addition, if some providers continue to use ICD-9 codes on claims after the final implementation date, including providers in our network who are employees, we will have to reject such claims, which may lead to claim resubmissions, increased call volume and provider and customer dissatisfaction. Further, providers may use ICD-10 codes differently than they used ICD-9 codes in the past, which could result in lost revenues under risk adjustment. During the transition to ICD-10, certain claims processing and payment information we have historically used to establish our reserves may not be reliable or available in a timely manner. If we do not adequately implement the new ICD-10 coding set, or if providers in our network do not adequately transition to the new ICD-10 coding set, our results of operations, financial position and cash flows may be materially adversely affected.

We are involved in various legal actions and governmental and internal investigations, any of which, if resolved unfavorably to us, could result in substantial monetary damages or changes in our business practices. Increased litigation and negative publicity could increase our cost of doing business.

We are or may become a party to a variety of legal actions that affect our business, including breach of contract actions, employment and employment discrimination-related suits, employee benefit claims, securities laws claims, and tort claims.

In addition, because of the nature of the health care business, we are subject to a variety of legal actions relating to our business operations, including the design, management, and offering of products and services. These include and could include in the future:

- claims relating to the methodologies for calculating premiums;
- claims relating to the denial of health care benefit payments;
- claims relating to the denial or rescission of insurance coverage;
- challenges to the use of some software products used in administering claims;
- claims relating to our administration of our Medicare Part D offerings;
- medical malpractice actions based on our medical necessity decisions or brought against us on the theory that we are liable for providers' alleged malpractice;
- claims arising from any adverse medical consequences resulting from our recommendations about the appropriateness of providers' proposed medical treatment plans for patients;
- allegations of anti-competitive and unfair business activities;
- provider disputes over compensation or non-acceptance or termination of provider contracts or provider contract disputes relating to rate adjustments resulting from the Balance Budget and Emergency Deficit Control Act of 1985, as amended (commonly referred to as "sequestration");
- disputes related to ASO business, including actions alleging claim administration errors;
- qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that we, as a government contractor, submitted false claims to the government including, among other allegations, resulting from coding and review practices under the Medicare risk-adjustment model;
- claims related to the failure to disclose some business practices;
- claims relating to customer audits and contract performance;

- claims relating to dispensing of drugs associated with our in-house mail-order pharmacy; and
- professional liability claims arising out of the delivery of healthcare and related services to the public.

In some cases, substantial non-economic or punitive damages as well as treble damages under the federal False Claims Act, Racketeer Influenced and Corrupt Organizations Act and other statutes may be sought.

While we currently have insurance coverage for some of these potential liabilities, other potential liabilities may not be covered by insurance, insurers may dispute coverage, or the amount of our insurance may not be enough to cover the damages awarded. In addition, some types of damages, like punitive damages, may not be covered by insurance. In some jurisdictions, coverage of punitive damages is prohibited. Insurance coverage for all or some forms of liability may become unavailable or prohibitively expensive in the future.

The health benefits industry continues to receive significant negative publicity reflecting the public perception of the industry. This publicity and perception have been accompanied by increased litigation, including some large jury awards, legislative activity, regulation, and governmental review of industry practices. These factors may materially adversely affect our ability to market our products or services, may require us to change our products or services or otherwise change our business practices, may increase the regulatory burdens under which we operate, and may require us to pay large judgments or fines. Any combination of these factors could further increase our cost of doing business and adversely affect our results of operations, financial position, and cash flows.

See "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. - Financial Statements and Supplementary Data. We cannot predict the outcome of these matters with certainty.

As a government contractor, we are exposed to risks that may materially adversely affect our business or our willingness or ability to participate in government health care programs.

A significant portion of our revenues relates to federal and state government health care coverage programs, including the Medicare, military, and Medicaid programs. These programs accounted for approximately 76% of our total premiums and services revenue for the year ended December 31, 2014. These programs involve various risks, as described further below.

- At December 31, 2014, under our contracts with CMS we provided health insurance coverage to approximately 542,400 individual Medicare Advantage members in Florida. These contracts accounted for approximately 15% of our total premiums and services revenue for the year ended December 31, 2014. The loss of these and other CMS contracts or significant changes in the Medicare program as a result of legislative or regulatory action, including reductions in premium payments to us or increases in member benefits without corresponding increases in premium payments to us, may have a material adverse effect on our results of operations, financial position, and cash flows.
- At December 31, 2014, our military services business primarily consisted of the TRICARE South Region contract which covers approximately 3,090,400 beneficiaries. For the year ended December 31, 2014, premiums and services revenue associated with the TRICARE South Region contract accounted for approximately 1% of our total premiums and services revenue. On April 1, 2012, we began delivering services under the current TRICARE South Region contract that the Defense Health Agency, or DHA (formerly known as the TRICARE Management Activity), awarded to us on February 25, 2011. The current 5-year South Region contract, which expires March 31, 2017, is subject to annual renewals on April 1 of each year during its term at the government's option. On January 27, 2015, we received notice from the DHA of its intent to exercise its option to extend the TRICARE South Region contract through March 31, 2016. The loss of the TRICARE South Region contract, should it occur, may have a material adverse effect on our results of operations, financial position, and cash flows.
- There is a possibility of temporary or permanent suspension from participating in government health care programs, including Medicare and Medicaid, if we are convicted of fraud or other criminal conduct in the

performance of a health care program or if there is an adverse decision against us under the federal False Claims Act. As a government contractor, we may be subject to qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that the government contractor submitted false claims to the government. Litigation of this nature is filed under seal to allow the government an opportunity to investigate and to decide if it wishes to intervene and assume control of the litigation. If the government does not intervene, the lawsuit is unsealed, and the individual may continue to prosecute the action on his or her own.

- CMS uses a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity. The risk-adjustment model pays more for enrollees with predictably higher costs. Under this model, rates paid to MA plans are based on actuarially determined bids, which include a process that bases our prospective payments on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's traditional fee-for-service Medicare program (referred to as "Medicare FFS"). Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses this diagnosis data to calculate the risk-adjusted premium payment to MA plans. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on providers to appropriately document all medical data, including the diagnosis data submitted with claims. In addition, we conduct medical record reviews, as part of our data and payment accuracy compliance efforts, to more accurately reflect diagnosis conditions under the risk adjustment model. These compliance efforts include the internal contract level audits described in more detail below.

  CMS is continuing to perform audits of various companies' selected MA contracts related to this risk adjustment diagnosis data. These audits are referred to herein as Risk-Adjustment Data Validation Audits, or RADV audits. RADV audits review medical records in an attempt to validate provider medical record documentation and coding practices which influence the calculation of premium payments to MA plans.

  In 2012, CMS released a "Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation (RADV) Contract-Level Audits." The payment error calculation methodology provides that, in calculating the economic impact of audit results for an MA contract, if any, the results of the audit sample will be extrapolated to the entire MA contract based upon a comparison to "benchmark" audit data in Medicare FFS (which we refer to as the "FFS Adjuster"). This comparison to the Medicare FFS benchmark audit is necessary to determine the economic impact, if any, of audit results because the government program data set, including any attendant errors that are present in that data set, provides the basis for MA plans' risk adjustment to payment rates. CMS already makes other adjustments to payment rates based on a comparison of coding pattern differences between MA plans and Medicare FFS data (such as for frequency of coding for certain diagnoses in MA plan data versus the government program data set).

  The final methodology, including the first application of extrapolated audit results to determine audit settlements, is expected to be applied to the current round of RADV contract level audits being conducted on 2011 premium payments. Selected MA contracts will be notified of an audit at some point after the close of the final reconciliation for the payment year being audited. The final reconciliation occurs in August of the calendar year following the payment year. We have been notified that certain of our Medicare Advantage contracts have been selected for audit for contract year 2011.

  Estimated audit settlements are recorded as a reduction of premiums revenue in our consolidated statements of income, based upon available information. We perform internal contract level audits based on the RADV audit methodology prescribed by CMS. Included in these internal contract level audits is an audit of our Private Fee-For-Service business which we used to represent a proxy of the benchmark audit data in Medicare FFS which has not yet been released. We based our accrual of estimated audit settlements for contract years 2011 (the first year that application of extrapolated audit results is applicable) through 2014 on the results of these internal contract level audits and update our estimates as each audit is completed. Estimates derived from these results were not material to our results of operations, financial position, or cash flows. However,

as indicated, we are awaiting additional guidance from CMS regarding the benchmark audit data in Medicare FFS. Accordingly, we cannot determine whether such RADV audits will have a material adverse effect on our results of operations, financial position, or cash flows.

In addition, CMS' recent comments in formalized guidance regarding "overpayments" to Medicare Advantage plans appear to be inconsistent with CMS' prior RADV audit guidance. These statements, contained in the preamble to CMS' final rule release regarding Medicare Advantage and Part D prescription drug benefit program regulations for Contract Year 2015, appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the FFS Adjuster referenced above. We will continue to work with CMS to ensure that Medicare Advantage plans are paid accurately and that payment model principles are in accordance with the requirements of the Social Security Act, which if not implemented correctly, could have material adverse effect on our results of operations, financial position, or cash flows.

- Our CMS contracts which cover members' prescription drugs under Medicare Part D contain provisions for risk sharing and certain payments for prescription drug costs for which we are not at risk. These provisions, certain of which are described below, affect our ultimate payments from CMS.

  The premiums from CMS are subject to risk corridor provisions which compare costs targeted in our annual bids to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to us or require us to refund to CMS a portion of the premiums we received (known as a "risk corridor"). We estimate and recognize an adjustment to premiums revenue related to the risk corridor payment settlement based upon pharmacy claims experience. The estimate of the settlement associated with these risk corridor provisions requires us to consider factors that may not be certain, including member eligibility differences with CMS. Our estimate of the settlement associated with the Medicare Part D risk corridor provisions was a net receivable of $69 million at December 31, 2014.

  Reinsurance and low-income cost subsidies represent payments from CMS in connection with the Medicare Part D program for which we assume no risk. Reinsurance subsidies represent payments for CMS's portion of claims costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage level. Low-income cost subsidies represent payments from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts above the out-of-pocket threshold for low-income beneficiaries. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. A reconciliation and settlement of CMS's prospective subsidies against actual prescription drug costs we paid is made after the end of the year.

  Settlement of the reinsurance and low-income cost subsidies as well as the risk corridor payment is based on a reconciliation made approximately 9 months after the close of each calendar year. This reconciliation process requires us to submit claims data necessary for CMS to administer the program. Our claims data may not pass CMS's claims edit processes due to various reasons, including discrepancies in eligibility or classification of low-income members. To the extent our data does not pass CMS's claim edit processes, we may bear the risk for all or a portion of the claim which otherwise may have been subject to the risk corridor provision or payment which we would have otherwise received as a low-income subsidy or reinsurance claim. In addition, in the event the settlement represents an amount CMS owes us, there is a negative impact on our cash flows and financial condition as a result of financing CMS's share of the risk. The opposite is true in the event the settlement represents an amount we owe CMS.

- The Budget Control Act of 2011, enacted on August 2, 2011, increased the United States debt ceiling conditioned on deficit reductions to be achieved over the next ten years. The Budget Control Act of 2011 also established a twelve-member joint committee of Congress known as the Joint Select Committee on Deficit Reduction to propose legislation to reduce the United States federal deficit by $1.5 trillion for fiscal years 2012-2021. The failure of the Joint Select Committee on Deficit Reduction to achieve a targeted deficit reduction by December 23, 2011 triggered an automatic reduction, including aggregate reductions to Medicare payments to providers of up to 2 percent per fiscal year. These reductions took effect on April 1, 2013, and the Bipartisan Budget Act of 2013, enacted on December 26, 2013, extended the reductions for

two years. We expect a corresponding substantial reduction in our obligations to providers. Due to the uncertainty around the application of any such reductions, there can be no assurances that we can completely offset any reductions to the Medicare healthcare programs applied by the Budget Control Act of 2011.

- We are also subject to various other governmental audits and investigations. Under state laws, our HMOs and health insurance companies are audited by state departments of insurance for financial and contractual compliance. Our HMOs are audited for compliance with health services by state departments of health. Audits and investigations are also conducted by state attorneys general, CMS, the Office of the Inspector General of Health and Human Services, the Office of Personnel Management, the Department of Justice, the Department of Labor, and the Defense Contract Audit Agency. All of these activities could result in the loss of licensure or the right to participate in various programs, including a limitation on our ability to market or sell products, the imposition of fines, penalties and other civil and criminal sanctions, or changes in our business practices. The outcome of any current or future governmental or internal investigations cannot be accurately predicted, nor can we predict any resulting penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities. Nevertheless, it is reasonably possible that any such outcome of litigation, penalties, fines or other sanctions could be substantial, and the outcome of these matters may have a material adverse effect on our results of operations, financial position, and cash flows. Certain of these matters could also affect our reputation. In addition, disclosure of any adverse investigation or audit results or sanctions could negatively affect our industry or our reputation in various markets and make it more difficult for us to sell our products and services.

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 could have a material adverse effect on our results of operations (including restricting revenue, enrollment and premium growth in certain products and market segments, restricting our ability to expand into new markets, increasing our medical and operating costs by, among other things, requiring a minimum benefit ratio on insured products, lowering our Medicare payment rates and increasing our expenses associated with a non-deductible health insurance industry fee and other assessments); our financial position (including our ability to maintain the value of our goodwill); and our cash flows.

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. The provisions of the Health Care Reform Law include, among others, imposing a significant new non-deductible health insurance industry fee and other assessments on health insurers, limiting Medicare Advantage payment rates, stipulating a prescribed minimum ratio for the amount of premiums revenue to be expended on medical costs for insured products, additional mandated benefits and guarantee issuance associated with commercial medical insurance, requirements that limit the ability of health plans to vary premiums based on assessments of underlying risk, and heightened scrutiny by state and federal regulators of our business practices, including our Medicare bid and pricing practices. The Health Care Reform Law also specifies benefit design guidelines, limits rating and pricing practices, encourages additional competition (including potential incentives for new market entrants), establishes federally-facilitated or state-based exchanges for individuals and small employers (with up to 100 employees) coupled with programs designed to spread risk among insurers (subject to federal administrative action), and expands eligibility for Medicaid programs (subject to state-by-state implementation of this expansion). In addition, the Health Care Reform Law has increased and will continue to increase federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms will come, in part, from material additional fees and taxes on us and other health plans and individuals which began in 2014, as well as reductions in certain levels of payments to us and other health plans under Medicare. Implementation dates of the provisions of the Health Care Reform Law began in September 2010 and continue through 2018. If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. For additional information, please refer to the section entitled, "Health Care Reform" in "Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing in this annual report.

Our participation in the new federal and state health insurance exchanges, which entail uncertainties associated with mix, volume of business and the operation of premium stabilization programs, which are subject to federal administrative action, could adversely affect our results of operations, financial position, and cash flows.

The Health Care Reform Law required the establishment of health insurance exchanges for individuals and small employers to purchase health insurance that became effective January 1, 2014, with an annual open enrollment period. Insurers participating on the health insurance exchanges must offer a minimum level of benefits and are subject to guidelines on setting premium rates and coverage limitations. We may be adversely selected by individuals who have a higher acuity level than the anticipated pool of participants in this market. In addition, the risk corridor, reinsurance, and risk adjustment provisions of the Health Care Reform Law, established to apportion risk for insurers, may not be effective in appropriately mitigating the financial risks related to our products. In addition, regulatory changes to the implementation of the Health Care Reform Law that allowed individuals to remain in plans that are not compliant with the Health Care Reform Law may have an adverse effect on our pool of participants in the health insurance exchange. All of these factors may have a material adverse effect on our results of operations, financial position, or cash flows if our premiums are not adequate or do not appropriately reflect the acuity of these individuals. Any variation from our expectations regarding acuity, enrollment levels, adverse selection, or other assumptions used in setting premium rates could have a material adverse effect on our results of operations, financial position, and cash flows.

Our business activities are subject to substantial government regulation. New laws or regulations, or changes in existing laws or regulations or their manner of application, including reductions in Medicare Advantage payment rates, could increase our cost of doing business and may adversely affect our business, profitability, financial condition, and cash flows.

In addition to the Health Care Reform Law, the health care industry in general and health insurance are subject to substantial federal and state government regulation:

Health Insurance Portability and Accountability Act (HIPAA) and the Health Information Technology for Economic and Clinical Health Act (HITECH Act)

The use of individually identifiable health data by our business is regulated at federal and state levels. These laws and rules are changed frequently by legislation or administrative interpretation. Various state laws address the use and maintenance of individually identifiable health data. Most are derived from the privacy provisions in the federal Gramm-Leach-Bliley Act and the Health Insurance Portability and Accountability Act, or HIPAA. HIPAA includes administrative provisions directed at simplifying electronic data interchange through standardizing transactions, establishing uniform health care provider, payer, and employer identifiers, and seeking protections for confidentiality and security of patient data. The rules do not provide for complete federal preemption of state laws, but rather preempt all inconsistent state laws unless the state law is more stringent.

These regulations set standards for the security of electronic health information. Violations of these rules could subject us to significant criminal and civil penalties, including significant monetary penalties. Compliance with HIPAA regulations requires significant systems enhancements, training and administrative effort. HIPAA can also expose us to additional liability for violations by our business associates (e.g., entities that provide services to health plans and providers).

The HITECH Act, one part of the American Recovery and Reinvestment Act of 2009, significantly broadened the scope of the privacy and security regulations of HIPAA. On January 17, 2013, HHS issued the omnibus final rule on HIPAA privacy, security, breach notification requirements and enforcement requirements under the HITECH Act, and a final regulation for required changes to the HIPAA Privacy Rule for the Genetic Information Nondiscrimination Act, or GINA. The omnibus final rule became effective on March 26, 2013, with a compliance date of September 23, 2013. Among other requirements, the HITECH Act and Omnibus final rule mandates individual notification in the event of a breach of unsecured, individually identifiable health information, provides enhanced penalties for HIPAA violations, requires business associates to comply with certain provisions of the HIPAA privacy and security rule, and grants enforcement authority to state attorneys general in addition to the HHS Office of Civil Rights.

In addition, there are numerous federal and state laws and regulations addressing patient and consumer privacy concerns, including unauthorized access or theft of personal information. State statutes and regulations vary from state to state and could impose additional penalties. Violations of HIPAA or applicable federal or state laws or regulations could subject us to significant criminal or civil penalties, including significant monetary penalties. Compliance with HIPAA and other privacy regulations requires significant systems enhancements, training and administrative effort.

American Recovery and Reinvestment Act of 2009 (ARRA)

On February 17, 2009, the American Recovery and Reinvestment Act of 2009, or ARRA, was enacted into law. In addition to including a temporary subsidy for health care continuation coverage issued pursuant to the Consolidated Omnibus Budget Reconciliation Act, or COBRA, ARRA also expands and strengthens the privacy and security provisions of HIPAA and imposes additional limits on the use and disclosure of protected health information, or PHI. Among other things, ARRA requires us and other covered entities to report any unauthorized release or use of or access to PHI to any impacted individuals and to the U.S. Department of Health and Human Services in those instances where the unauthorized activity poses a significant risk of financial, reputational or other harm to the individuals, and to notify the media in any states where 500 or more people are impacted by any unauthorized release or use of or access to PHI. ARRA also requires business associates to comply with certain HIPAA provisions. ARRA also establishes higher civil and criminal penalties for covered entities and business associates who fail to comply with HIPAA's provisions and requires the U.S. Department of Health and Human Services to issue regulations implementing its privacy and security enhancements.

Corporate Practice of Medicine and Other Laws

As a corporate entity, Humana Inc. is not licensed to practice medicine. Many states in which we operate through our subsidiaries limit the practice of medicine to licensed individuals or professional organizations comprised of licensed individuals, and business corporations generally may not exercise control over the medical decisions of physicians. Statutes and regulations relating to the practice of medicine, fee-splitting between physicians and referral sources, and similar issues vary widely from state to state. Under management agreements between certain of our subsidiaries and affiliated physician-owned professional groups, these groups retain sole responsibility for all medical decisions, as well as for hiring and managing physicians and other licensed healthcare providers, developing operating policies and procedures, implementing professional standards and controls, and maintaining malpractice insurance. We believe that our health services operations comply with applicable state statutes regarding corporate practice of medicine, fee-splitting, and similar issues. However, any enforcement actions by governmental officials alleging non-compliance with these statutes, which could subject us to penalties or restructuring or reorganization of our business, may result in a material adverse effect on our results of operations, financial position, or cash flows.

Anti-Kickback, Physician Self-Referral, and Other Fraud and Abuse Laws

A federal law commonly referred to as the "Anti-Kickback Statute" prohibits the offer, payment, solicitation, or receipt of any form of remuneration to induce, or in return for, the referral of Medicare or other governmental health program patients or patient care opportunities, or in return for the purchase, lease, or order of items or services that are covered by Medicare or other federal governmental health programs. Because the prohibitions contained in the Anti-Kickback Statute apply to the furnishing of items or services for which payment is made in "whole or in part," the Anti-Kickback Statute could be implicated if any portion of an item or service we provide is covered by any of the state or federal health benefit programs described above. Violation of these provisions constitutes a felony criminal offense and applicable sanctions could include exclusion from the Medicare and Medicaid programs.

Section 1877 of the Social Security Act, commonly known as the "Stark Law," prohibits physicians, subject to certain exceptions described below, from referring Medicare or Medicaid patients to an entity providing "designated health services" in which the physician, or an immediate family member, has an ownership or investment interest or with which the physician, or an immediate family member, has entered into a compensation arrangement. These prohibitions, contained in the Omnibus Budget Reconciliation Act of 1993, commonly known as "Stark II," amended prior federal physician self-referral legislation known as "Stark I" by expanding the list of designated health services

to a total of 11 categories of health services. The professional groups with which we are affiliated provide one or more of these designated health services. Persons or entities found to be in violation of the Stark Law are subject to denial of payment for services furnished pursuant to an improper referral, civil monetary penalties, and exclusion from the Medicare and Medicaid programs.

Many states also have enacted laws similar in scope and purpose to the Anti-Kickback Statute and, in more limited instances, the Stark Law, that are not limited to services for which Medicare or Medicaid payment is made. In addition, most states have statutes, regulations, or professional codes that restrict a physician from accepting various kinds of remuneration in exchange for making referrals. These laws vary from state to state and have seldom been interpreted by the courts or regulatory agencies. In states that have enacted these statutes, we believe that regulatory authorities and state courts interpreting these statutes may regard federal law under the Anti-Kickback Statute and the Stark Law as persuasive.

We believe that our operations comply with the Anti-Kickback Statute, the Stark Law, and similar federal or state laws addressing fraud and abuse. These laws are subject to modification and changes in interpretation, and are enforced by authorities vested with broad discretion. We continually monitor developments in this area. If these laws are interpreted in a manner contrary to our interpretation or are reinterpreted or amended, or if new legislation is enacted with respect to healthcare fraud and abuse, illegal remuneration, or similar issues, we may be required to restructure our affected operations to maintain compliance with applicable law. There can be no assurances that any such restructuring will be possible or, if possible, would not have a material adverse effect on our results of operations, financial position, or cash flows.

Environmental

We are subject to various federal, state, and local laws and regulations relating to the protection of human health and the environment. If an environmental regulatory agency finds any of our facilities to be in violation of environmental laws, penalties and fines may be imposed for each day of violation and the affected facility could be forced to cease operations. We could also incur other significant costs, such as cleanup costs or claims by third parties, as a result of violations of, or liabilities under, environmental laws. Although we believe that our environmental practices, including waste handling and disposal practices, are in material compliance with applicable laws, future claims or violations, or changes in environmental laws, could have a material adverse effect on our results of operations, financial position or cash flows.

State Regulation of Insurance-Related Products

Laws in each of the states (and Puerto Rico) in which we operate our HMOs, PPOs and other health insurance-related services regulate our operations including: licensing requirements, policy language describing benefits, mandated benefits and processes, entry, withdrawal or re-entry into a state or market, rate increases, delivery systems, utilization review procedures, quality assurance, complaint systems, enrollment requirements, claim payments, marketing, and advertising. The HMO, PPO, and other health insurance-related products we offer are sold under licenses issued by the applicable insurance regulators.

Our licensed insurance subsidiaries are also subject to regulation under state insurance holding company and Puerto Rico regulations. These regulations generally require, among other things, prior approval and/or notice of new products, rates, benefit changes, and certain material transactions, including dividend payments, purchases or sales of assets, intercompany agreements, and the filing of various financial and operational reports.

Any failure by us to manage acquisitions, divestitures and other significant transactions successfully may have a material adverse effect on our results of operations, financial position, and cash flows.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, divestitures, strategic alliances, joint ventures, and outsourcing transactions and often enter into agreements relating to such transactions in order to further our business objectives. In order to pursue our acquisition

strategy successfully, we must identify suitable candidates for and successfully complete transactions, some of which may be large and complex, and manage post-closing issues such as the integration of acquired companies or employees. Integration and other risks can be more pronounced for larger and more complicated transactions, transactions outside of our core business space, or if multiple transactions are pursued simultaneously. The failure to successfully integrate acquired entities and businesses or failure to produce results consistent with the financial model used in the analysis of our acquisitions may have a material adverse effect on our results of operations, financial position, and cash flows. If we fail to identify and complete successfully transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally. In addition, from time to time, we evaluate alternatives for our businesses that do not meet our strategic, growth or profitability objectives. Among the businesses that we are currently evaluating is our closed block of long-term care insurance policies business. While no decision has been made with respect to any course of action, if we were to divest this business it is reasonably likely that we would have to recognize a material loss that will have a material adverse effect on our results of operations. The divestiture of certain other businesses could also result, individually or in the aggregate, in the recognition of material losses and a material adverse effect on our results of operations. There can be no assurance that we will be able to complete any such divestitures on terms favorable to us.

If we fail to develop and maintain satisfactory relationships with the providers of care to our members, our business may be adversely affected.

We employ or contract with physicians, hospitals and other providers to deliver health care to our members. Our products encourage or require our customers to use these contracted providers. A key component of our integrated care delivery strategy is to increase the number of providers who share medical cost risk with us or have financial incentives to deliver quality medical services in a cost-effective manner.

In any particular market, providers could refuse to contract with us, demand higher payments, or take other actions that could result in higher health care costs for us, less desirable products for customers and members or difficulty meeting regulatory or accreditation requirements. In some markets, some providers, particularly hospitals, physician specialty groups, physician/hospital organizations, or multi-specialty physician groups, may have significant market positions and negotiating power. In addition, physician or practice management companies, which aggregate physician practices for administrative efficiency and marketing leverage, may compete directly with us. If these providers refuse to contract with us, use their market position to negotiate unfavorable contracts with us or place us at a competitive disadvantage, or do not enter into contracts with us that encourage the delivery of quality medical services in a cost-effective manner, our ability to market products or to be profitable in those areas may be adversely affected.

In some situations, we have contracts with individual or groups of primary care providers for an actuarially determined, fixed fee per month to provide a basket of required medical services to our members. This type of contract is referred to as a "capitation" contract. The inability of providers to properly manage costs under these capitation arrangements can result in the financial instability of these providers and the termination of their relationship with us. In addition, payment or other disputes between a primary care provider and specialists with whom the primary care provider contracts can result in a disruption in the provision of services to our members or a reduction in the services available to our members. The financial instability or failure of a primary care provider to pay other providers for services rendered could lead those other providers to demand payment from us even though we have made our regular fixed payments to the primary provider. There can be no assurance that providers with whom we contract will properly manage the costs of services, maintain financial solvency or avoid disputes with other providers. Any of these events may have a material adverse effect on the provision of services to our members and our results of operations, financial position, and cash flows.

Our pharmacy business is highly competitive and subjects us to regulations in addition to those we face with our core health benefits businesses.

Our pharmacy mail order business competes with locally owned drugstores, retail drugstore chains, supermarkets, discount retailers, membership clubs, Internet companies and other mail-order and long-term care pharmacies. Our pharmacy business also subjects us to extensive federal, state, and local regulation. The practice of pharmacy is generally

regulated at the state level by state boards of pharmacy. Many of the states where we deliver pharmaceuticals, including controlled substances, have laws and regulations that require out-of-state mail-order pharmacies to register with that state's board of pharmacy. Federal agencies further regulate our pharmacy operations, requiring registration with the U.S. Drug Enforcement Administration and individual state controlled substance authorities in order to dispense controlled substances. In addition, the FDA inspects facilities in connection with procedures to effect recalls of prescription drugs. The Federal Trade Commission also has requirements for mail-order sellers of goods. The U.S. Postal Service, or USPS, has statutory authority to restrict the transmission of drugs and medicines through the mail to a degree that may have an adverse effect on our mail-order operations. The USPS historically has exercised this statutory authority only with respect to controlled substances. If the USPS restricts our ability to deliver drugs through the mail, alternative means of delivery are available to us. However, alternative means of delivery could be significantly more expensive. The Department of Transportation has regulatory authority to impose restrictions on drugs inserted in the stream of commerce. These regulations generally do not apply to the USPS and its operations. In addition, we are subject to CMS rules regarding the administration of our PDP plans and intercompany pricing between our PDP plans and our pharmacy business.

We are also subject to risks inherent in the packaging and distribution of pharmaceuticals and other health care products, and the application of state laws related to the operation of internet and mail-order pharmacies. The failure to adhere to these laws and regulations may expose us to civil and criminal penalties.

Changes in the prescription drug industry pricing benchmarks may adversely affect our financial performance.

Contracts in the prescription drug industry generally use certain published benchmarks to establish pricing for prescription drugs. These benchmarks include average wholesale price, which is referred to as "AWP," average selling price, which is referred to as "ASP," and wholesale acquisition cost. It is uncertain whether payors, pharmacy providers, pharmacy benefit managers, or PBMs, and others in the prescription drug industry will continue to utilize AWP as it has previously been calculated, or whether other pricing benchmarks will be adopted for establishing prices within the industry. Legislation may lead to changes in the pricing for Medicare and Medicaid programs. Regulators have conducted investigations into the use of AWP for federal program payment, and whether the use of AWP has inflated drug expenditures by the Medicare and Medicaid programs. Federal and state proposals have sought to change the basis for calculating payment of certain drugs by the Medicare and Medicaid programs. Adoption of ASP in lieu of AWP as the measure for determining payment by Medicare or Medicaid programs for the drugs sold in our mail-order pharmacy business may reduce the revenues and gross margins of this business which may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we do not continue to earn and retain purchase discounts and volume rebates from pharmaceutical manufacturers at current levels, our gross margins may decline.

We have contractual relationships with pharmaceutical manufacturers or wholesalers that provide us with purchase discounts and volume rebates on certain prescription drugs dispensed through our mail-order and specialty pharmacies. These discounts and volume rebates are generally passed on to clients in the form of steeper price discounts. Changes in existing federal or state laws or regulations or in their interpretation by courts and agencies or the adoption of new laws or regulations relating to patent term extensions, and purchase discount and volume rebate arrangements with pharmaceutical manufacturers, may reduce the discounts or volume rebates we receive and materially adversely impact our results of operations, financial position, and cash flows.

Our ability to obtain funds from certain of our licensed subsidiaries is restricted by state insurance regulations.

Because we operate as a holding company, we are dependent upon dividends and administrative expense reimbursements from our subsidiaries to fund the obligations of Humana Inc., our parent company. Certain of our insurance subsidiaries operate in states that regulate the payment of dividends, loans, administrative expense reimbursements or other cash transfers to Humana Inc., and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these insurance subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of

statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix. Dividends from our non-insurance companies such as in our Healthcare Services segment are generally not restricted by Departments of Insurance. In the event that we are unable to provide sufficient capital to fund the obligations of Humana Inc., our results of operations, financial position, and cash flows may be materially adversely affected.

Downgrades in our debt ratings, should they occur, may adversely affect our business, results of operations, and financial condition.

Claims paying ability, financial strength, and debt ratings by recognized rating organizations are an increasingly important factor in establishing the competitive position of insurance companies. Ratings information is broadly disseminated and generally used throughout the industry. We believe our claims paying ability and financial strength ratings are an important factor in marketing our products to certain of our customers. In addition, our debt ratings impact both the cost and availability of future borrowings. Each of the rating agencies reviews its ratings periodically and there can be no assurance that current ratings will be maintained in the future. Our ratings reflect each rating agency's opinion of our financial strength, operating performance, and ability to meet our debt obligations or obligations to policyholders, but are not evaluations directed toward the protection of investors in our common stock and should not be relied upon as such.

Historically, rating agencies take action to lower ratings due to, among other things, perceived concerns about liquidity or solvency, the competitive environment in the insurance industry, the inherent uncertainty in determining reserves for future claims, the outcome of pending litigation and regulatory investigations, and possible changes in the methodology or criteria applied by the rating agencies. In addition, rating agencies have come under regulatory and public scrutiny over the ratings assigned to various fixed-income products. As a result, rating agencies may (i) become more conservative in their methodology and criteria, (ii) increase the frequency or scope of their credit reviews, (iii) request additional information from the companies that they rate, or (iv) adjust upward the capital and other requirements employed in the rating agency models for maintenance of certain ratings levels.

We believe that some of our customers place importance on our credit ratings, and we may lose customers and compete less successfully if our ratings were to be downgraded. In addition, our credit ratings affect our ability to obtain investment capital on favorable terms. If our credit ratings were to be lowered, our cost of borrowing likely would increase, our sales and earnings could decrease, and our results of operations, financial position, and cash flows may be materially adversely affected.

The securities and credit markets may experience volatility and disruption, which may adversely affect our business.

Volatility or disruption in the securities and credit markets could impact our investment portfolio. We evaluate our investment securities for impairment on a quarterly basis. This review is subjective and requires a high degree of judgment. For the purpose of determining gross realized gains and losses, the cost of investment securities sold is based upon specific identification. For debt securities held, we recognize an impairment loss in income when the fair value of the debt security is less than the carrying value and we have the intent to sell the debt security or it is more likely than not that we will be required to sell the debt security before recovery of our amortized cost basis, or if a credit loss has occurred. When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairments are considered using variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. We continuously review our investment portfolios and there is a continuing risk that declines in fair value may occur and additional material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

We believe our cash balances, investment securities, operating cash flows, and funds available under our credit agreement or from other public or private financing sources, taken together, provide adequate resources to fund ongoing operating and regulatory requirements, acquisitions, future expansion opportunities, and capital expenditures for at least the next twelve months, as well as to refinance or repay debt, and repurchase shares. However, continuing adverse securities and credit market conditions may significantly affect the availability of credit. While there is no assurance in the current economic environment, we have no reason to believe the lenders participating in our credit agreement will not be willing and able to provide financing in accordance with the terms of the agreement.

Our access to additional credit will depend on a variety of factors such as market conditions, the general availability of credit, both to the overall market and our industry, our credit ratings and debt capacity, as well as the possibility that customers or lenders could develop a negative perception of our long or short-term financial prospects. Similarly, our access to funds could be limited if regulatory authorities or rating agencies were to take negative actions against us. If a combination of these factors were to occur, we may not be able to successfully obtain additional financing on favorable terms or at all.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table lists, by state, the number of medical centers and administrative offices we owned or leased at December 31, 2014:

	Medical Centers		Administrative Offices		
	Owned	Leased	Owned	Leased	Total
Florida	14	125	—	94	233
Texas	4	56	2	44	106
California	—	28	—	18	46
Georgia	1	21	—	15	37
Kentucky	2	10	11	11	34
Arizona	1	20	—	9	30
Illinois	—	17	—	12	29
Colorado	—	20	—	9	29
Michigan	—	23	—	3	26
Ohio	—	10	—	16	26
Pennsylvania		16		8	24
Tennessee	—	11	—	13	24
New Jersey	—	14	—	9	23
Louisiana	—	11	—	11	22
Virginia	—	14	—	8	22
New York	—	4	—	13	17
North Carolina	—	6	—	10	16
Missouri	—	12	—	3	15
Nevada		10		5	15
Wisconsin	—	8	1	6	15
Connecticut	—	10	—	3	13
Indiana	—	7	—	6	13
South Carolina	—	2	4	7	13
Maryland	—	10	—	2	12
Oklahoma	—	7	—	5	12
Mississippi	—	—	—	10	10
Puerto Rico	—	—	—	9	9
Others	—	47	—	41	88
Total	22	519	18	400	959

The medical centers we operate are primarily located in Florida and Texas, including full-service, multi-specialty medical centers staffed by primary care providers and medical specialists, urgent care facilities, and worksite medical facilities. Of the medical centers included in the table above, approximately 54 of these facilities are leased or subleased to our providers to operate.

Our principal executive office is located in the Humana Building, 500 West Main Street, Louisville, Kentucky 40202. In addition to the headquarters in Louisville, Kentucky, we maintain other principal operating facilities used for customer service, enrollment, and/or claims processing and certain other corporate functions in Louisville, Kentucky; Green Bay, Wisconsin; Tampa, Florida; Cincinnati, Ohio; San Antonio, Texas; and San Juan, Puerto Rico.

ITEM 3. LEGAL PROCEEDINGS

We are party to a variety of legal actions in the ordinary course of business, certain of which may be styled as class-action lawsuits. Among other matters, this litigation may include employment matters, claims of medical malpractice, bad faith, nonacceptance or termination of providers, anticompetitive practices, improper rate setting, provider contract rate disputes, failure to disclose network discounts and various other provider arrangements, general contractual matters, intellectual property matters, and challenges to subrogation practices. For a discussion of our material legal actions, including those not in the ordinary course of business, see "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. We cannot predict the outcome of these suits with certainty.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock trades on the New York Stock Exchange under the symbol HUM. The following table shows the range of high and low closing sales prices as reported on the New York Stock Exchange Composite Price for each quarter in the years ended December 31, 2014 and 2013:

	High	Low
Year Ended December 31, 2014		
First quarter	$ 118.78	$ 95.59
Second quarter	$ 128.95	$ 104.74
Third quarter	$ 135.51	$ 115.97
Fourth quarter	$ 149.07	$ 124.17
Year Ended December 31, 2013		
First quarter	$ 81.52	$ 66.01
Second quarter	$ 85.17	$ 72.10
Third quarter	$ 99.60	$ 82.93
Fourth quarter	$ 105.25	$ 91.21

Holders of our Capital Stock

As of January 31, 2015, there were approximately 3,300 holders of record of our common stock and approximately 40,250 beneficial holders of our common stock.

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2013 and 2014:

Record Date	Payment Date	Amount per Share	Total Amount
			(in millions)
2013 payments			
12/31/2012	1/25/2013	$0.26	$42
3/28/2013	4/26/2013	$0.26	$41
6/28/2013	7/26/2013	$0.27	$42
9/30/2013	10/25/2013	$0.27	$42
2014 payments			
12/31/2013	1/31/2014	$0.27	$42
3/31/2014	4/25/2014	$0.27	$42
6/30/2014	7/25/2014	$0.28	$43
9/30/2014	10/31/2014	$0.28	$43

In October 2014, the Board of Directors declared a cash dividend of $0.28 per share that was paid on January 30, 2015 to stockholders of record as of the close of business on December 31, 2014, for an aggregate amount of $42 million. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

Stock Total Return Performance

The following graph compares our total return to stockholders with the returns of the Standard & Poor's Composite 500 Index ("S&P 500") and the Dow Jones US Select Health Care Providers Index ("Peer Group") for the five years ended December 31, 2014. The graph assumes an investment of $100 in each of our common stock, the S&P 500, and the Peer Group on December 31, 2009, and that dividends were reinvested when paid.

	12/31/2009	12/31/2010	12/31/2011	12/31/2012	12/31/2013	12/31/2014
HUM	$ 100	$ 125	$ 201	$ 160	$ 244	$ 342
S&P 500	$ 100	$ 115	$ 117	$ 136	$ 180	$ 205
Peer Group	$ 100	$ 112	$ 123	$ 144	$ 198	$ 252

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Issuer Purchases of Equity Securities

The following table provides information about purchases by us during the three months ended December 31, 2014 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)(2)	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)
October 2014	592,852	$ 128.37	592,852	$ 1,889,450,517
November 2014	3,236,801	130.97	3,236,801	1,365,543,163
December 2014	0	0	0	1,365,543,163
Total	3,829,653	$ 130.56	3,829,653	

(1) In September 2014, the Board of Directors replaced a previous share repurchase authorization of up to $1 billion with a current authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2016. Under the current share repurchase authorization, shares may be purchased from time to time at prevailing prices in the open market, by block purchases, or in privately-negotiated transactions (including pursuant to accelerated share repurchase agreements with investment bankers), subject to certain regulatory restrictions on volume, pricing, and timing. As of February 18, 2015, the remaining authorized amount under the current authorization totaled approximately $1.37 billion, which includes $100 million of stock held back as part of an accelerated share repurchase agreement as more fully described under "Stock Repurchases" in Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

(2) Excludes 0.02 million shares repurchased in connection with employee stock plans.

ITEM 6. SELECTED FINANCIAL DATA

	2014 (a)	2013 (b)	2012 (c)	2011	2010 (d)
	(dollars in millions, except per common share results)				
Summary of Operating Results:					
Revenues:					
Premiums	$ 45,959	$ 38,829	$ 37,009	$ 35,106	$ 32,712
Services	2,164	2,109	1,726	1,360	555
Investment income	377	375	391	366	329
Total revenues	48,500	41,313	39,126	36,832	33,596
Operating expenses:

Key Financial Indicators:					
Benefit ratio	83.0%	83.9%	83.7%	82.1%	82.9%
Operating cost ratio	15.9%	15.5%	15.1%	14.8%	13.2%
Membership by Segment:					
Retail segment:					
Medical membership	7,882,300	6,026,000	5,553,800	4,795,000	3,681,900
Specialty membership	1,165,800	1,042,500	948,700	782,500	510,000
Employer Group segment:					
Medical membership	2,834,000	2,833,100	2,852,400	2,794,900	3,009,500
Specialty membership	6,502,700	6,780,800	7,136,200	6,532,600	6,517,500
Other Businesses:					
Medical membership	3,125,400	3,125,200	3,682,600	3,594,700	3,595,200
Consolidated:					
Total medical membership	13,841,700	11,984,300	12,088,800	11,184,600	10,286,600
Total specialty membership	7,668,500	7,823,300	8,084,900	7,315,100	7,027,500

(a) Includes loss on extinguishment of debt of $37 million ($23 million after tax, or $0.15 per diluted common share) for the redemption of senior notes.

(b) Includes benefits expense of $243 million ($154 million after tax, or $0.99 per diluted common share) for reserve strengthening associated with our non-strategic closed block of long-term care insurance policies.

(c) Includes the acquired operations of Arcadian Management Services, Inc. from March 31, 2012, SeniorBridge Family Companies, Inc. from July 6, 2012, and Metropolitan Health Networks, Inc. from December 21, 2012.

(d) Includes the acquired operations of Concentra Inc. from December 21, 2010. Also includes operating costs of $147 million ($93 million after tax, or $0.55 per diluted common share) for the write-down of deferred acquisition costs associated with our individual commercial medical policies and benefits expense of $139 million ($88 million after tax, or $0.52 per diluted common share) associated with reserve strengthening for our non-strategic closed block of long-term care insurance policies.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Overview

General

Humana Inc., headquartered in Louisville, Ky., is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country.

Our industry relies on two key statistics to measure performance. The benefit ratio, which is computed by taking total benefits expense as a percentage of premiums revenue, represents a statistic used to measure underwriting profitability. The operating cost ratio, which is computed by taking total operating costs, which excludes depreciation and amortization, as a percentage of total revenue less investment income, represents a statistic used to measure administrative spending efficiency.

Business Segments

On January 1, 2014, we reclassified certain of our businesses from our Healthcare Services segment to our Employer Group segment to correspond with internal management reporting changes. Our reportable segments remain the same and prior period segment financial information has been recast to conform to the 2014 presentation. This is further described in Note 2 to the consolidated financial statements included in Item 8. - Financial Statements and Supplementary Data.

We manage our business with three reportable segments: Retail, Employer Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

The Retail segment consists of Medicare and commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and financial protection products, marketed directly to individuals, and includes our contract with CMS to administer the LI-NET prescription drug plan program and contracts with various states to provide Medicaid, dual eligible, and Long-Term Support Services benefits, collectively our state-based contracts. The Employer Group segment consists of Medicare and commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and voluntary benefit products, as well as administrative services only, or ASO, products and our health and wellness products primarily marketed to employer groups. The Healthcare Services segment includes services offered to our health plan members as well as to third parties including pharmacy solutions, provider services, home based services, integrated behavioral health services, and predictive modeling and informatics services. The Other Businesses category consists of our military services, primarily our TRICARE South Region contract, Puerto Rico Medicaid, and closed-block long-term care insurance policies.

The results of each segment are measured by income before income taxes. Transactions between reportable segments consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, home based, and behavioral health, to our Retail and Employer Group customers. Intersegment sales and expenses are recorded at fair value and eliminated in consolidation. Members served by our segments often utilize the same provider networks, enabling us in some instances to obtain more favorable contract terms with providers. Our segments also share indirect costs and assets. As a result, the profitability of each segment is interdependent.

We allocate most operating expenses to our segments. Assets and certain corporate income and expenses are not allocated to the segments, including the portion of investment income not supporting segment operations, interest

expense on corporate debt, and certain other corporate expenses. These items are managed at the corporate level. These corporate amounts are reported separately from our reportable segments and included with intersegment eliminations.

Seasonality

One of the product offerings of our Retail segment is Medicare stand-alone prescription drug plans, or PDPs, under the Medicare Part D program. Our quarterly Retail segment earnings and operating cash flows are impacted by the Medicare Part D benefit design and changes in the composition of our membership. The Medicare Part D benefit design results in coverage that varies as a member's cumulative out-of-pocket costs pass through successive stages of a member's plan period, which begins annually on January 1 for renewals. These plan designs generally result in us sharing a greater portion of the responsibility for total prescription drug costs in the early stages and less in the latter stages. As a result, the PDP benefit ratio generally decreases as the year progresses. In addition, the number of low-income senior members as well as year-over-year changes in the mix of membership in our stand-alone PDP products affects the quarterly benefit ratio pattern.

Our Employer Group segment also experiences seasonality in the benefit ratio pattern. However, the effect is opposite of Medicare stand-alone PDP in the Retail segment, with the Employer Group's benefit ratio increasing as fully-insured members progress through their annual deductible and maximum out-of-pocket expenses. Similarly, certain of our fully-insured individual commercial medical products in our Retail segment experience seasonality in the benefit ratio akin to the Employer Group segment, including the effect of existing members transitioning to policies compliant with the Health Care Reform Law.

In addition, the Retail segment also experiences seasonality in the operating cost ratio as a result of costs incurred in the second half of the year associated with the Medicare and individual health care exchange marketing seasons.

2014 Highlights

Consolidated

- Our 2014 results reflect the continued implementation of our strategy to offer our members affordable health care combined with a positive consumer experience in growing markets. At the core of this strategy is our integrated care delivery model, which unites quality care, high member engagement, and sophisticated data analytics. Our approach to primary, physician-directed care for our members aims to provide quality care that is consistent, integrated, cost-effective, and member-focused, provided by both employed physicians and physicians with network contract arrangements. A core element of the model is to offer assistance to providers in transitioning from a fee-for-service to a value-based arrangement. The model is designed to improve health outcomes and affordability for individuals and for the health system as a whole, while offering our members a simple, seamless healthcare experience. We believe this strategy is positioning us for long-term growth in both membership and earnings. At December 31, 2014, approximately 709,000 members, or 29.0%, of our individual Medicare Advantage membership were in risk arrangements under our integrated care delivery model, as compared to 561,500 members, or 27.1%, at December 31, 2013.

- Year-over-year comparisons of our results were impacted by investments in health care exchanges and state-based contracts as well as higher specialty prescription drug costs associated with a new treatment for Hepatitis C, partially offset by membership growth in our Medicare Advantage, Medicare stand-alone PDP, and individual commercial medical offerings as well as increased membership in our clinical programs.

- In September 2014, we paid the federal government $562 million for the annual health insurance industry fee. This fee is not deductible for tax purposes, which has significantly increased our effective income tax rate in 2014. Year-over-year comparisons of the operating cost ratio are negatively impacted by this and other fees mandated by the Health Care Reform Law beginning in 2014. Likewise, year-over-year comparisons of the benefit ratio reflect the inclusion of these mandated fees in the pricing of our products for 2014. In 2015, the health insurance industry fee increases by 41% for the industry taken as a whole. Accordingly, absent changes in market share, we would expect a 41% increase in our fee in 2015. The health insurance industry fee is further described below under the section titled "Health Care Reform."

- Year-over-year comparisons of diluted earnings per common share are favorably impacted by a lower number of shares used to compute diluted earnings per common share reflecting the impact of share repurchases.

- Our operating cash flow of $1.6 billion for the year ended December 31, 2014 compared to operating cash flow of $1.7 billion for the year ended December 31, 2013. For 2014, the effect of the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law impacted the timing of our operating cash flows, as we built a receivable of $679 million in 2014 that is expected to be collected in 2015.

- Our 2014 financing cash flows have been negatively impacted by the timing of payments to and receipts from CMS associated with Medicare Part D reinsurance subsidies for which we do not assume risk. Claims payments were $945 million higher than receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk during 2014. We are experiencing higher specialty prescription drug costs associated with a new treatment for Hepatitis C than were contemplated in our bids which is resulting in higher reinsurance subsidy receivable balances in 2014 that will be settled in 2015 under the terms of our contracts with CMS.

- We continue to focus on disciplined capital allocation. In 2014, we issued senior notes and received net proceeds of $1.7 billion, redeemed our $500 million 6.45% senior notes for cash totaling approximately $560 million, repurchased 5.7 million shares of our common stock for $730 million in open market transactions (which excludes another $100 million of stock held back pursuant to an accelerated share repurchase program), and paid dividends to stockholders of $172 million.

Retail Segment

- On April 7, 2014, CMS announced final 2015 Medicare benchmark payment rates and related technical factors impacting the bid benchmark premiums, which we refer to as the Final Rate Notice. We believe the Final Rate Notices together with the impact of payment cuts associated with the Health Care Reform Law, quality bonuses, sunset of the Star quality CMS demonstration in 2015, risk coding modifications, the impact of the health insurance industry fee, and other funding formula changes, indicate 2015 Medicare Advantage funding cuts of approximately 2%. We believe we have effectively designed Medicare Advantage products based upon these levels of rate reduction while continuing to remain competitive compared to both the combination of Medicare FFS with a supplement policy as well as Medicare Advantage products offered by our competitors. Failure to execute these strategies may result in a material adverse effect on our results of operations, financial position, and cash flows.

- Medicare Advantage premiums are tied to the achievement of certain quality performance measures (Star Ratings). Beginning in 2015, plans must have a Star Rating of four or higher to qualify for bonus money. Star Ratings issued by CMS in October 2014 indicated that plans covering 92% of our Medicare Advantage membership for the 2015 plan year achieved a Star Rating of 4.0 or higher. We have 23 Medicare Advantage plans that achieved a rating of four or more stars, an increase from 18 the previous year. We are offering one Medicare Advantage plan that achieved a 5.0 Star Rating, our CarePlus Health Plans, Inc. HMO plan in Florida, as well as five Medicare Advantage plans that achieved a 4.5 Star Rating. Plans that earn an overall Star Rating of five become eligible to enroll members year round.

- As discussed in the detailed Retail segment results of operations discussion that follows, for the year ended December 31, 2014, our Retail segment pretax income declined by 14.4% primarily due to the same factors discussed above for our consolidated results.

- Individual Medicare Advantage membership increased 377,500 members, or 18.2%, from December 31, 2013 to December 31, 2014 reflecting net membership additions, particularly for our HMO offerings, for the 2014 plan year as well as dual eligible members from state-based contracts in Virginia and Illinois. January 1, 2015 individual Medicare Advantage membership increased approximately 257,000 members, or 10.5%, from December 31, 2014 reflecting net membership additions for the 2015 enrollment season, primarily in our HMO offerings.

- Medicare stand-alone PDP membership increased 717,800 members, or 21.9%, from December 31, 2013 to December 31, 2014 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2014 plan year. January 1, 2015 Medicare stand-alone PDP membership, excluding the LI-NET prescription drug plan program, increased approximately 230,500 members, or 5.8%, from December 31, 2014 reflecting net membership additions for the 2015 enrollment season.

- Our state-based Medicaid membership as of December 31, 2014 increased 213,000 members from December 31, 2013, primarily due to the addition of members under our Florida Medicaid and Florida Long-Term Support Services contracts.

- Individual commercial medical membership of 1,148,100 at December 31, 2014 increased 548,000 members, or 91.3%, from December 31, 2013 primarily reflecting new sales, both on-exchange and off-exchange, of plans compliant with the Health Care Reform Law. At December 31, 2014, individual commercial medical membership in plans compliant with the Health Care Reform Law, both on-exchange and off-exchange, was 686,300 members. In addition, federal and state regulatory changes in December 2013 allowed certain individuals to remain in their existing underwritten health plans that are not compliant with the Health Care Reform Law, which has led to much higher than previously expected retention of our existing underwritten health plans. We believe that this is occurring at other health insurance issuers as well and will result in an overall deterioration of the risk pool in plans compliant with the Health Care Reform Law, as more previously underwritten members remain with their current health plans rather than enter the exchanges. However, we expect that the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law will mitigate this deterioration to some extent.

Employer Group Segment

- As discussed in the detailed Employer Group segment results of operations discussion that follows, the Employer Group segment pretax income declined 10.3% for the year ended December 31, 2014 primarily reflecting higher utilization, mainly due to higher specialty prescription drug costs associated with a new treatment for Hepatitis C, as well as the continuing impact of transitional policy changes which allowed individuals to remain in plans not compliant with the Health Care Reform Law.

- Fully-insured group Medicare Advantage membership of 489,700 at December 31, 2014 increased 60,600 members, or 14.1%, from 429,100 at December 31, 2013 primarily due to the January 2014 addition of a new large group account.

- Membership in HumanaVitality®, our wellness and loyalty rewards program, rose 36.2% to 3,856,800 at December 31, 2014 from 2,831,000 at December 31, 2013 primarily due to the addition of group Medicare members as well as individual Medicare Advantage and fully-insured individual commercial medical membership growth.

Healthcare Services Segment

- As discussed in the detailed Healthcare Services segment results of operations discussion that follows, our Healthcare Services segment pretax income improved 41.8% for the year ended December 31, 2014 primarily due to a decline in the operating cost ratio in 2014 on a revenue base that reflects growth from our pharmacy solutions and home based services businesses as they serve our growing Medicare membership.

- Programs to enhance the quality of care for members are key elements of our integrated care delivery model. We have accelerated our process for identifying and reaching out to members in need of clinical intervention. At December 31, 2014, we had approximately 420,700 members with complex chronic conditions in the Humana Chronic Care Program, a 50.1% increase compared with approximately 280,200 members at December 31, 2013, reflecting enhanced predictive modeling capabilities and focus on proactive clinical outreach and member engagement, particularly for our Medicare Advantage membership. We believe these initiatives lead to better health outcomes for our members and lower health care costs.

Other Businesses

- Year-over-year comparisons within Other Businesses are impacted by the loss of our Medicaid contracts in Puerto Rico effective September 30, 2013 and a reduction in benefits expense in 2013 related to a favorable settlement of contract claims with the United States Department of Defense, or DoD, associated with previously disclosed litigation. In addition, as discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data, during 2013, we recorded net benefits expense of $243 million ($154 million after-tax, or $0.99 per diluted common share) for reserve strengthening related to our non-strategic closed-block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG.

Health Care Reform

The Health Care Reform Law enacted significant reforms to various aspects of the U.S. health insurance industry. Implementation dates of the Health Care Reform Law began in September 2010 and will continue through 2018, and many aspects of the Health Care Reform Law are already effective and have been implemented by us. Certain significant provisions of the Health Care Reform Law include, among others, mandated coverage requirements, mandated benefits and guarantee issuance associated with commercial medical insurance, rebates to policyholders based on minimum benefit ratios, adjustments to Medicare Advantage premiums, the establishment of federally-facilitated or state-based exchanges coupled with programs designed to spread risk among insurers, an annual insurance industry premium-based assessment, and a three-year commercial reinsurance fee. Certain provisions of the Health Care Reform Law became effective in 2014, including:

- All individual and group health plans must guarantee issuance and renew coverage without pre-existing condition exclusions or health-status rating adjustments;
- The elimination of annual limits on coverage on certain benefits;
- The establishment of federally-facilitated, federal-state partnerships or state-based exchanges for individuals and small employers (with up to 100 employees) coupled with programs designed to spread risk among insurers;
- The introduction of plan designs based on set actuarial values;
- The establishment of a minimum benefit ratio of 85% for Medicare Advantage plans with penalties up to and including termination of Medicare Advantage contracts for continued failure to meet the minimum; and
- Insurance industry assessments, including an annual health insurance industry fee and a three-year $25 billion industry wide commercial reinsurance fee. The annual health insurance industry fee levied on the insurance industry is $8 billion in 2014 with increasing annual amounts thereafter, growing to $14 billion by 2017, and is not deductible for income tax purposes, which significantly increased our effective income tax rate in 2014 to approximately 47.2%. In 2014, we paid the federal government $562 million for the annual health insurance industry fee. In 2015, the health insurance industry fee increases by 41% for the industry taken as a whole. Accordingly, absent changes in market share, we would expect a 41% increase in our fee in 2015. In addition, statutory accounting for the health insurance industry fee required us to restrict surplus in the year preceding payment of the health insurance industry fee beginning in 2014. Accordingly, in addition to recording the full-year 2014 assessment in the first quarter of 2014, we were required to restrict surplus for the 2015 assessment ratably in 2014.

The Health Care Reform Law also specifies benefit design guidelines, limits rating and pricing practices, encourages additional competition (including potential incentives for new market entrants), establishes federally-facilitated or state-based exchanges for individuals and small employers (with up to 100 employees) coupled with programs designed to spread risk among insurers (subject to federal administrative action), and expands eligibility for Medicaid programs (subject to state-by-state implementation of this expansion). In addition, the Health Care Reform Law has increased and will continue to increase federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms comes, in part, from material additional fees and taxes on us (as discussed above) and other health plans and individuals which began in 2014, as well as reductions in certain levels of payments to us and other health plans under Medicare as described in this report.

As discussed above, it is reasonably possible that the Health Care Reform Law and related regulations, as well as future legislative changes, including legislative restrictions on our ability to manage our provider network or otherwise operate our business, or regulatory restrictions on profitability, including by comparison of our Medicare Advantage profitability to our non-Medicare Advantage business profitability and a requirement that they remain within certain ranges of each other, in the aggregate may have a material adverse effect on our results of operations (including restricting revenue, enrollment and premium growth in certain products and market segments, restricting our ability to expand into new markets, increasing our medical and operating costs, further lowering our Medicare payment rates and increasing our expenses associated with the non-deductible health insurance industry fee and other assessments); our financial position (including our ability to maintain the value of our goodwill); and our cash flows (including the receipt of amounts due under the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law in 2015 related to claims paid in 2014, which payments may be subject to federal administrative action).

We intend for the discussion of our financial condition and results of operations that follows to assist in the understanding of our financial statements and related changes in certain key items in those financial statements from year to year, including the primary factors that accounted for those changes. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and behavioral health services, to our Retail and Employer Group customers and are described in Note 17 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Comparison of Results of Operations for 2014 and 2013

Certain financial data on a consolidated basis and for our segments was as follows for the years ended December 31, 2014 and 2013:

Consolidated

	2014	2013	Change	
			Dollars	Percentage
	(dollars in millions, except per common share results)			
Revenues:				
Premiums:				
Retail	$ 33,954	$ 27,204	$ 6,750	24.8 %
Employer Group	11,935	10,930	1,005	9.2 %
Other Businesses	70	695	(625)	(89.9)%
Total premiums	45,959	38,829	7,130	18.4 %
Services:				
Retail	39	16	23	143.8 %
Employer Group	362	359	3	0.8 %
Healthcare Services	1,282	1,280	2	0.2 %
Other Businesses	481	454	27	5.9 %
Total services	2,164	2,109	55	2.6 %
Investment income	377	375	2	0.5 %
Total revenues	48,500	41,313	7,187	17.4 %
Operating expenses:				
Benefits	38,166	32,564	5,602	17.2 %
Operating costs	7,639	6,355	1,284	20.2 %
Depreciation and amortization	333	333	—	— %
Total operating expenses	46,138	39,252	6,886	17.5 %
Income from operations	2,362	2,061	301	14.6 %
Interest expense	192	140	52	37.1 %
Income before income taxes	2,170	1,921	249	13.0 %
Provision for income taxes	1,023	690	333	48.3 %
Net income	$ 1,147	$ 1,231	$ (84)	(6.8)%
Diluted earnings per common share	$ 7.36	$ 7.73	$ (0.37)	(4.8)%
Benefit ratio (a)	83.0%	83.9%		(0.9)%
Operating cost ratio (b)	15.9%	15.5%		0.4 %
Effective tax rate	47.2%	35.9%		11.3 %

(a) Represents total benefits expense as a percentage of premiums revenue.

(b) Represents total operating costs as a percentage of total revenues less investment income.

Summary

Net income was $1.1 billion, or $7.36 per diluted common share, in 2014 compared to $1.2 billion, or $7.73 per diluted common share, in 2013. Net income for 2014 includes expenses of $0.15 per diluted common share associated with a loss on extinguishment of debt for the redemption of certain senior notes in 2014 and net income for 2013

includes benefits expense of $0.99 per diluted common share for reserve strengthening associated with our closed-block of long-term care insurance policies included with Other Businesses as discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data as well as the benefit of a reduction in benefits expense in 2013 related to a favorable settlement of contract claims with the DoD. Excluding these items, the increase in net income primarily resulted from higher pretax income in our Healthcare Services segment substantially offset by lower pretax income in our Retail and Employer Group segments. In addition, 2014 was favorably impacted by a lower number of shares used to compute diluted earnings per common share reflecting the impact of share repurchases.

Premiums Revenue

Consolidated premiums increased $7.1 billion, or 18.4%, from 2013 to $46.0 billion for 2014 primarily due to increases in both Retail and Employer Group segment premiums mainly driven by higher average individual and group Medicare Advantage membership as well as higher individual commercial medical membership. In addition, year-over-year comparisons to the 2013 were negatively impacted by sequestration which became effective April 1, 2013. Premiums revenue for our Other Businesses declined primarily due to the loss of our Puerto Rico Medicaid contracts effective September 30, 2013. Average membership is calculated by summing the ending membership for each month in a period and dividing the result by the number of months in a period. Premiums revenue reflects changes in membership and average per member premiums. Items impacting average per member premiums include changes in premium rates as well as changes in the geographic mix of membership, the mix of product offerings, and the mix of benefit plans selected by our membership.

Services Revenue

Consolidated services revenue increased $55 million, or 2.6%, from 2013 to $2.2 billion for 2014 primarily due to an increase in services revenue in our Retail segment due to the acquisition of American Eldercare in September 2013.

Investment Income

Investment income totaled $377 million for 2014, an increase of $2 million from 2013, as higher average invested balances were partially offset by lower interest rates.

Benefits Expense

Consolidated benefits expense was $38.2 billion for 2014, an increase of $5.6 billion, or 17.2%, from 2013 primarily due to increases in both the Retail and Employer Group segments mainly driven by higher average individual and group Medicare Advantage membership as well as higher individual commercial medical membership. As more fully described herein under the section entitled "Benefits Expense Recognition", actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $518 million in 2014 and $474 million in 2013. These increases in favorable medical claims reserve development primarily resulted from increased membership and better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

The consolidated benefit ratio for 2014 was 83.0%, a decrease of 90 basis points from 2013 primarily due to reserve strengthening in 2013 associated with our closed-block of long-term care insurance policies included with Other Businesses as discussed above, as well as the loss of our Medicaid contracts in Puerto Rico effective September 30, 2013 which more than offset higher ratios year-over-year in the Retail and Employer Group segments.

Operating Costs

Our segments incur both direct and shared indirect operating costs. We allocate the indirect costs shared by the segments primarily as a function of revenues. As a result, the profitability of each segment is interdependent.

Consolidated operating costs increased $1,284 million, or 20.2%, in 2014 compared to 2013 primarily due to costs mandated by the Health Care Reform Law, including the non-deductible health insurance industry fee, and investments in health care exchanges and state-based contracts, partially offset by operating cost efficiencies.

The consolidated operating cost ratio for 2014 was 15.9%, increasing 40 basis points from 2013 primarily due to increases in the operating cost ratios in our Retail and Employer Group segments due to the same factors impacting consolidated operating costs as described above.

Depreciation and Amortization

Depreciation and amortization for 2014 totaled $333 million, unchanged from 2013.

Interest Expense

Interest expense was $192 million for 2014 compared to $140 million for 2013, an increase of $52 million, or 37.1%. In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date. We recognized a loss on extinguishment of debt, included in interest expense, of approximately $37 million in connection with the redemption of these notes.

Income Taxes

Our effective tax rate during 2014 was 47.2% compared to the effective tax rate of 35.9% in 2013. The non-deductible nature of the health insurance industry fee levied on the insurance industry beginning in 2014 as mandated by the Health Care Reform Law increased our effective tax rate by approximately 9.4 percentage points for 2014. See Note 11 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for a complete reconciliation of the federal statutory rate to the effective tax rate.

Retail Segment

	2014	2013	Change Members	Change Percentage
Membership:				
Medical membership:				
Individual Medicare Advantage	2,446,200	2,068,700	377,500	18.2%
Medicare stand-alone PDP	3,989,500	3,271,700	717,800	21.9%

Benefit ratio	84.3%	84.2%		0.1 %
Operating cost ratio	12.4%	10.9%		1.5 %

Pretax Results

- Retail segment pretax income was $1.1 billion in 2014, a decrease of $185 million, or 14.4%, compared to 2013 primarily driven by investment spending for health care exchanges and state-based contracts and higher specialty prescription drug costs associated with a new treatment for Hepatitis C, partially offset by Medicare Advantage and individual commercial medical membership growth as well as increased membership in our clinical programs.

Enrollment

- Individual Medicare Advantage membership increased 377,500 members, or 18.2%, from December 31, 2013 to December 31, 2014 reflecting net membership additions, particularly for our HMO offerings, for the 2014

plan year as well as dual eligible members from state-based contracts in Virginia and Illinois. Individual Medicare Advantage membership at December 31, 2014 includes 18,300 dual eligible members from state-based contracts.

- Medicare stand-alone PDP membership increased 717,800 members, or 21.9%, from December 31, 2013 to December 31, 2014 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2014 plan year.

- Individual commercial medical membership increased 548,000 members, or 91.3%, from December 31, 2013 to December 31, 2014 primarily reflecting new sales, both on-exchange and off-exchange, of plans compliant with the Health Care Reform Law.

- State-based Medicaid membership increased 213,000 members, or 249.1%, from December 31, 2013 to December 31, 2014 primarily driven by the addition of members under our Florida Medicaid and Florida Long-Term Support Services contracts.

- Individual specialty membership increased 123,300 members, or 11.8%, from December 31, 2013 to December 31, 2014 primarily driven by increased membership in dental and vision offerings.

Premiums revenue

- Retail segment premiums increased $6.8 billion, or 24.8%, from 2013 to 2014 primarily due to membership growth across all lines of business, particularly for our individual Medicare Advantage, individual commercial medical, primarily on the health care exchanges, and state-based Medicaid businesses. Individual Medicare Advantage average membership increased 17.0% in 2014. Individual Medicare Advantage per member premiums decreased approximately 1.4% in 2014 compared to 2013, primarily due to Medicare rate reductions and the impact of sequestration which became effective on April 1, 2013.

Benefits expense

- The Retail segment benefit ratio of 84.3% for 2014 increased 10 basis points from 2013 primarily due to higher specialty prescription drug costs associated with a new treatment for Hepatitis C, higher planned clinical investment spending, and higher benefit ratios associated with members from state-based contracts, partially offset by increased membership in our clinical programs and the inclusion of the health insurance industry fee in the pricing of our products.

- The Retail segment's benefits expense for 2014 included the beneficial effect of $385 million in favorable prior-year medical claims reserve development versus $332 million in 2013. This favorable prior-year medical claims reserve development decreased the Retail segment benefit ratio by approximately 110 basis points in 2014 versus approximately 120 basis points in 2013.

Operating costs

- The Retail segment operating cost ratio of 12.4% for 2014 increased 150 basis points from 2013 primarily due to the non-deductible health insurance industry fee mandated by the Health Care Reform Law and investment spending for health care exchanges and state-based contracts, partially offset by scale efficiencies from Medicare and individual commercial medical membership growth.

Employer Group Segment

	2014	2013	Change Members	Change Percentage
Membership:				
Medical membership:

Group specialty	1,098	1,095	3	0.3 %
Total premiums	11,935	10,930	1,005	9.2 %
Services	362	359	3	0.8 %
Total premiums and services revenue	$ 12,297	$ 11,289	$ 1,008	8.9 %
Income before income taxes	$ 314	$ 350	$ (36)	(10.3)%
Benefit ratio	83.9%	83.5%		0.4 %
Operating cost ratio	16.1%	15.9%		0.2 %

Pretax Results

- Employer Group segment pretax income decreased $36 million, or 10.3%, to $314 million in 2014 primarily reflecting higher utilization, mainly due to higher specialty prescription drug costs associated with a new treatment for Hepatitis C, as well as the continuing impact of transitional policy changes which allowed individuals to remain in plans not compliant with the Health Care Reform Law.

Enrollment

- Fully-insured group Medicare Advantage membership increased 60,600 members, or 14.1%, from December 31, 2013 to December 31, 2014 primarily due to the addition of a new large group account.

- Fully-insured commercial group medical membership decreased 1,500 members, or 0.1% from December 31, 2013 as an increase in small group business membership was generally offset by lower membership in large

group accounts. Approximately 65% of our fully-insured commercial group medical membership was in small group accounts at December 31, 2014 compared to 61% at December 31, 2013.

- Group ASO commercial medical membership decreased 58,500 members, or 5.0%, from December 31, 2013 to December 31, 2014 primarily due to continued pricing discipline in a highly competitive environment for self-funded accounts. We expect our group ASO commercial medical membership to decline by approximately 400,000 to 425,000 members January 1, 2015 primarily due to the loss of a few large group accounts.

- Group specialty membership decreased 278,100 members, or 4.1%, from December 31, 2013 to December 31, 2014 primarily due to declines in dental and vision membership related to our planned discontinuance of certain unprofitable product distribution partnerships.

Premiums revenue

- Employer Group segment premiums increased $1.0 billion, or 9.2%, from 2013 to 2014 primarily due to higher average group Medicare Advantage membership as well as an increase in fully-insured commercial group medical premiums per member that more than offset a slight decline in total membership for this segment.

Benefits expense

- The Employer Group segment benefit ratio increased 40 basis points from 83.5% in 2013 to 83.9% in 2014 primarily due to higher utilization, mainly due to higher specialty prescription drug costs associated with a new treatment for Hepatitis C, as well as the continuing impact of transitional policy changes, partially offset by the inclusion of the health insurance industry fee and other fees mandated by the Health Care Reform Law in our pricing.

- The Employer Group segment's benefits expense included the beneficial effect of $132 million in favorable prior-year medical claims reserve development versus $138 million in 2013. This favorable prior-year medical claims reserve development decreased the Employer Group segment benefit ratio by approximately110 basis points in 2014 versus approximately 130 basis points in 2013.

Operating costs

- The Employer Group segment operating cost ratio of 16.1% increased 20 basis points from 2013. This increase primarily reflects the impact of the non-deductible health insurance industry fee and other fees mandated by the Health Care Reform Law as well as a higher percentage of small group commercial business which carries a higher operating cost ratio than large group business. These increases were partially offset by an increase in group Medicare Advantage membership which generally carries a lower operating cost ratio than our commercial group medical membership as well as operating cost efficiencies.

Healthcare Services Segment

	2014	2013	Change	
			Dollars	Percentage

Income before income taxes	$ 739	$ 521	$ 218	41.8 %
Operating cost ratio	95.5%	95.8%		(0.3)%

Pretax results

- Healthcare Services segment pretax income of $739 million for 2014 increased $218 million from 2013. The increase is primarily due to a decline in the operating cost ratio in 2014 on a revenue base that reflects growth from our pharmacy solutions and home based services businesses as they serve our growing Medicare membership.

Script Volume

- Humana Pharmacy Solutions® script volumes for the Retail and Employer Group segment membership increased to approximately 329 million in 2014, up 20% versus scripts of approximately 274 million in 2013. The increase primarily reflects growth associated with higher average medical membership for 2014 than in 2013.

Services revenue

- Services revenue for 2014 were relatively unchanged from 2013, increasing $2 million, or 0.2% , to $1.3 billion for 2014.

Intersegment revenues

- Intersegment revenues increased $4.1 billion, or 28.2%, from 2013 to $18.7 billion for 2014 primarily due to growth in our Medicare membership which resulted in higher utilization of our pharmacy solutions and home based services businesses.

Operating costs

- The Healthcare Services segment operating cost ratio of 95.5% for 2014 decreased 30 basis points from 95.8% for 2013 primarily due to an improvement in the ratio for our pharmacy solutions business partially offset by our investment in home based services and other businesses across the segment.

Other Businesses

Our Other Businesses pretax income of $78 million for 2014 compared to a pretax loss of $193 million for 2013. The pretax loss in 2013 included net expense of $243 million for reserve strengthening for our closed-block of long-term care insurance policies further discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. In addition, from time to time, we evaluate alternatives for our businesses that do not meet our strategic, growth or profitability objectives. Among the businesses that we are currently evaluating is our closed block of long-term care insurance policies business. While no decision has been made with respect to any course of action, if we were to divest this business it is reasonably likely that we would have to recognize a material loss that will have a material adverse effect on our results of operations. Year-over-year comparisons also reflect the loss of our Medicaid contracts in Puerto Rico effective September 30, 2013 as well as a reduction in benefits expense in 2013 related to a favorable settlement of contract claims with the DoD associated with previously disclosed litigation.

Comparison of Results of Operations for 2013 and 2012

Certain financial data on a consolidated basis and for our segments was as follows for the years ended December 31, 2013 and 2012:

Consolidated

	2013	2012	Change	
			Dollars	Percentage
	(dollars in millions, except per common share results)			
Revenues:				
Premiums:				
Retail	$ 27,204	$ 25,001	$ 2,203	8.8 %

Net income	$ 1,231	$ 1,222	$ 9	0.7 %
Diluted earnings per common share	$ 7.73	$ 7.47	$ 0.26	3.5 %
Benefit ratio (a)	83.9%	83.7%		0.2 %
Operating cost ratio (b)	15.5%	15.1%		0.4 %
Effective tax rate	35.9%	36.1%		(0.2)%

(a) Represents total benefits expense as a percentage of premiums revenue.

(b) Represents total operating costs as a percentage of total revenues less investment income.

Summary

Net income was $1.2 billion, or $7.73 per diluted common share, in 2013 compared to $1.2 billion, or $7.47 per diluted common share, in 2012. The increase in net income primarily was driven by improved operating performance across most of our major business lines, including Medicare Advantage membership growth in our Retail and Employer

group segments. These increases were partially offset by benefits expense of $0.99 per diluted common share in 2013 for reserve strengthening associated with our closed-block of long-term care insurance policies included with Other Businesses as discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. Year-over-year comparisons of diluted earnings per common share are favorably impacted by a lower number of shares used to compute diluted earnings per common share in 2013 reflecting the impact of share repurchases.

Premiums Revenue

Consolidated premiums increased $1.8 billion, or 4.9%, from 2012 to $38.8 billion for 2013 primarily due to increases in both Retail and Employer Group segment premiums mainly driven by higher average individual and group Medicare Advantage membership, partially offset by the impact of sequestration which became effective April 1, 2013 as well as a decline in premiums for Other Businesses. The decline in premiums for Other Businesses primarily reflects the transition to the current TRICARE South Region contract effective April 1, 2012, and the termination of the Puerto Rico Medicaid contracts effective September 30, 2013. As discussed in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data, on April 1, 2012, we began delivering services under the current TRICARE South Region contract that the DHA awarded to us on February 25, 2011. We account for revenues under the current contract net of estimated healthcare costs similar to an administrative services fee only agreement, and as such there are no premiums recognized under the current contract. Our previous contract was accounted for similar to our fully-insured products and as such we recognized premiums under the previous contract.

Services Revenue

Consolidated services revenue increased $383 million, or 22.2%, from 2012 to $2.1 billion for 2013 primarily due to an increase in services revenue in our Healthcare Services segment and an increase in services revenue for our Other Businesses due to the transition to the current TRICARE South Region contract on April 1, 2012. The increase in services revenue in our Healthcare Services segment primarily resulted from the acquisitions of Metropolitan on December 21, 2012 and SeniorBridge on July 6, 2012, and growth in our provider services operations.

Investment Income

Investment income totaled $375 million for 2013, a decrease of $16 million from 2012, as higher average invested balances were more than offset by lower interest rates and lower net realized capital gains year-over-year.

Benefits Expense

Consolidated benefits expense was $32.6 billion for 2013, an increase of $1.6 billion, or 5.1%, from 2012 primarily due to a year-over-year increase in the Retail and Employer Group segments benefits expense, mainly driven by an increase in the average number of Medicare members, partially offset by a decrease in benefits expense for Other Businesses in 2013. The decrease in benefits expense for Other Businesses primarily was due to the transition to the current administrative services only TRICARE South Region contract on April 1, 2012 and the termination of the Puerto Rico Medicaid contracts effective September 30, 2013. We do not record benefits expense under the current TRICARE South Region contract. Our previous contract was accounted for similarly to our fully-insured products and as such we recorded benefits expense under the previous contract. Retail segment benefits expense increased $1.9 billion, or 8.9%, from 2012 to 2013 primarily due to membership growth. As more fully described herein under the section entitled "Benefits Expense Recognition", actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $474 million in 2013 and $257 million in 2012. These increases in favorable medical claims reserve development primarily resulted from claims trend for the prior year ultimately developing more favorably than originally expected across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope.

The consolidated benefit ratio for 2013 was 83.9%, an increase of 20 basis points from 2012 primarily due to reserve strengthening associated with our closed-block of long-term care insurance policies included with Other

Businesses as discussed above, partially offset by the increase in favorable prior-year medical claims reserve development of $217 million from 2012 to 2013.

Operating Costs

Our segments incur both direct and shared indirect operating costs. We allocate the indirect costs shared by the segments primarily as a function of revenues. As a result, the profitability of each segment is interdependent.

Consolidated operating costs increased $525 million, or 9.0%, in 2013 compared to 2012 primarily due to an increase in operating costs in our Retail and Healthcare Services segments. The increase in the Retail segment primarily reflects investment spending for exchanges under the Health Care Reform Law and new state-based contracts as well as increased marketing spending for Medicare.

The consolidated operating cost ratio for 2013 was 15.5%, increasing 40 basis points from 2012. The impact of the current TRICARE South Region contract being accounted for as an administrative services fee only arrangement beginning April 1, 2012 was partially offset by improved operating leverage in our Retail and Employer Group segments.

Depreciation and Amortization

Depreciation and amortization for 2013 totaled $333 million, an increase of $38 million, or 12.9%, from 2012 primarily due to capital expenditures and depreciation and amortization associated with 2012 and 2013 acquisitions.

Interest Expense

Interest expense was $140 million for 2013 compared to $105 million for 2012, an increase of $35 million, or 33.3%. In December 2012, we issued $600 million of 3.15% senior notes due December 1, 2022 and $400 million of 4.625% senior notes due December 1, 2042.

Income Taxes

Our effective tax rate during 2013 was 35.9% compared to the effective tax rate of 36.1% in 2012. See Note 11 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for a complete reconciliation of the federal statutory rate to the effective tax rate.

Services	16	24	(8)	(33.3)%
Total premiums and services revenue	$ 27,220	$ 25,025	$ 2,195	8.8 %
Income before income taxes	$ 1,283	$ 1,161	$ 122	10.5 %
Benefit ratio	84.2%	84.2%		— %
Operating cost ratio	10.9%	11.1%		(0.2)%

Pretax Results

- Retail segment pretax income was $1.3 billion in 2013, an increase of $122 million, or 10.5%, compared to 2012 primarily reflecting improved operating performance over the prior year. The improved operating performance primarily was driven by membership growth as well as a decrease in the operating cost ratio.

Enrollment

- Individual Medicare Advantage membership increased 141,100 members, or 7.3%, from December 31, 2012 to December 31, 2013 reflecting net membership additions for the 2013 enrollment season and sales to newly-eligible Medicare beneficiaries throughout the year. Effective January 1, 2013, we divested approximately 12,600 members acquired with Arcadian Management Services, Inc. in accordance with our previously disclosed agreement with the United States Department of Justice.

- Medicare stand-alone PDP membership increased 219,000 members, or 7.2%, from December 31, 2012 to December 31, 2013 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2013 enrollment season.

- Individual commercial medical membership increased 78,700 members, or 15.1%, from December 31, 2012 to December 31, 2013 primarily reflecting net new sales in 2013. On October 1, 2013, the initial open enrollment period began for plans effective January 1, 2014 offered through federally facilitated, federal-state partnerships or state-based exchanges for individuals and small employers (with up to 100 employees), including certain metropolitan areas in the 14 states where Humana has public exchange offerings.

- State-based Medicaid membership increased 33,400 members, or 64.1%, from December 31, 2012 to December 31, 2013, primarily driven by the addition of our Kentucky Medicaid contract and Florida Long-Term Support Services contracts, including American Eldercare.

- Individual specialty membership increased 93,800 members, or 9.9%, from December 31, 2012 to December 31, 2013 primarily driven by increased membership in dental and vision offerings.

Premiums revenue

- Retail segment premiums increased $2.2 billion, or 8.8%, from 2012 to 2013 primarily due to a 7.6% increase in average individual Medicare Advantage membership in 2013. Individual Medicare Advantage per member

premiums increased approximately 0.5% in 2013 compared to 2012, primarily reflecting the impact of sequestration which became effective on April 1, 2013.

Benefits expense

- The Retail segment benefit ratio of 84.2% for 2013 was comparable to that of 2012. The Retail segment's benefits expense for 2013 included the beneficial effect of $332 million in favorable prior-year medical claims reserve development versus $192 million in 2012. This change in favorable prior-year medical claims reserve development primarily was driven by claims trend for the prior year ultimately developing more favorably than originally expected and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. This favorable prior-year medical claims reserve development decreased the Retail segment benefit ratio by approximately 130 basis points in 2013 versus approximately 80 basis points in 2012.

Operating costs

- The Retail segment operating cost ratio of 10.9% for 2013 decreased 20 basis points from 2012. This decrease reflects scale efficiencies associated with servicing higher year-over-year membership together with our continued focus on operating cost efficiencies, partially offset by investment spending for exchanges under the Health Care Reform Law and new state-based contracts as well as increased Medicare marketing spending.

Employer Group Segment

			Change	
	2013	2012	Members	Percentage
Membership:				
Medical membership:				
Fully-insured commercial group	1,237,000	1,211,800	25,200	2.1 %

Services	359	371	(12)	(3.2)%
Total premiums and services revenue	$ 11,289	$ 10,509	$ 780	7.4 %
Income before income taxes	$ 350	$ 312	$ 38	12.2 %
Benefit ratio	83.5%	83.6%		(0.1)%
Operating cost ratio	15.9%	16.2%		(0.3)%

Pretax Results

- Employer Group segment pretax income increased $38 million, or 12.2%, to $350 million in 2013 reflecting improved operating performance primarily due to group Medicare Advantage membership growth and lower benefit and operating cost ratios, as described below.

Enrollment

- Fully-insured commercial group medical membership increased 25,200 members, or 2.1% from December 31, 2012 as higher small group business membership was partially offset by lower membership in large group accounts. Approximately 61% of our fully-insured commercial group medical membership was in small group accounts at December 31, 2013 compared to 59% at December 31, 2012.

- Fully-insured group Medicare Advantage membership increased 58,300 members, or 15.7%, from December 31, 2012 to December 31, 2013 primarily due to the January 2013 addition of a new large group retirement account.

- Effective January 1, 2013 we lost our sole group Medicare Advantage ASO account which had 27,700 members at December 31, 2012.

- Group ASO commercial medical membership decreased 74,900 members, or 6.1%, from December 31, 2012 to December 31, 2013 primarily due to continued pricing discipline in a highly competitive environment for self-funded accounts.

- Group specialty membership decreased 355,400 members, or 5.0%, from December 31, 2012 to December 31, 2013 primarily due to a decline in vision membership related to our planned discontinuance of certain unprofitable product distribution partnerships.

Premiums revenue

- Employer Group segment premiums increased $792 million, or 7.8%, from 2012 to 2013 primarily due to higher average group Medicare Advantage medical membership.

Benefits expense

- The Employer Group segment benefit ratio decreased 10 basis points from 83.6% in 2012 to 83.5% in 2013 primarily due to higher favorable prior-year medical claims reserve development, partially offset by growth

in our group Medicare Advantage products which generally carry a higher benefit ratio than our fully-insured commercial group products. The Employer Group segment's benefits expense included the beneficial effect of $138 million in favorable prior-year medical claims reserve development versus $48 million in 2012. The change in favorable prior-year medical claims reserve development from 2012 to 2013 primarily was driven by claims trend for the prior year ultimately developing more favorably than originally expected and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. This favorable prior-year medical claims reserve development decreased the Employer Group segment benefit ratio by approximately 130 basis points in 2013 versus approximately 50 basis points in 2012.

Operating costs

- The Employer Group segment operating cost ratio of 15.9% decreased 30 basis points from 2012. This decrease primarily reflects continued savings as a result of our operating cost reduction initiatives and growth in our group Medicare Advantage products which generally carry a lower operating cost ratio than our fully-insured commercial group products, partially offset by investment spending in technology capabilities.

Healthcare Services Segment

	2013	2012	Change	
			Dollars	Percentage
		(in millions)

Income before income taxes	$ 521	$ 428	$ 93	21.7 %
Operating cost ratio	95.8%	96.1%		(0.3)%

Pretax results

- Healthcare Services segment pretax income of $521 million for 2013 increased $93 million from 2012 as revenue growth and the pretax income contribution from our home based services and pharmacy solutions businesses, as well as the acquisition of Metropolitan, were partially offset by previously-planned investment spending associated with the integration and build-out of provider practices. The growth in pretax income associated with our home based services business reflects the increase in home health services provided to our Medicare Advantage members.

Script Volume

- Humana Pharmacy Solutions® script volumes for the Retail and Employer Group segment membership increased to approximately 274 million in 2013, up 15% versus scripts of approximately 238 million in 2012.

The increase primarily reflects growth associated with higher average medical membership for 2013 than in 2012.

Services revenue

- Services revenue increased $257 million or 25.1% from 2012 to $1.3 billion for 2013 primarily due to the acquisitions of Metropolitan and SeniorBridge as well as growth in our provider services operations.

Intersegment revenues

- Intersegment revenues increased $2.6 billion, or 21.5%, from 2012 to $14.6 billion for 2013 primarily due to growth in our pharmacy solutions business as it serves our growing membership, particularly Medicare stand-alone PDP, and the acquisition of Metropolitan in the fourth quarter of 2012.

Operating costs

- The Healthcare Services segment operating cost ratio of 95.8% for 2013 decreased 30 basis points from 96.1% for 2012 primarily due to scale efficiencies associated with growth in our pharmacy solutions business.

Other Businesses

Our Other Businesses pretax loss of $193 million for 2013 compared to a pretax loss of $18 million for 2012. The pretax losses in 2013 and 2012 included net expense of $243 million and $29 million, respectively, for reserve strengthening for our closed-block of long-term care insurance policies further discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. In addition, 2013 reflects the loss of our Medicaid contracts in Puerto Rico effective September 30, 2013 offset by the beneficial effect of a favorable settlement of contract claims with the DoD primarily associated with litigation settled in 2012.

Liquidity

Our primary sources of cash include receipts of premiums, services revenue, and investment and other income, as well as proceeds from the sale or maturity of our investment securities and borrowings. Our primary uses of cash include disbursements for claims payments, operating costs, interest on borrowings, taxes, purchases of investment securities, acquisitions, capital expenditures, repayments on borrowings, dividends, and share repurchases. Because premiums generally are collected in advance of claim payments by a period of up to several months, our business normally should produce positive cash flows during periods of increasing premiums and enrollment. Conversely, cash flows would be negatively impacted during periods of decreasing premiums and enrollment. From period to period, our cash flows may also be affected by the timing of working capital items including taxes and assessments. The use of operating cash flows may be limited by regulatory requirements which require, among other items, that our regulated subsidiaries maintain minimum levels of capital and seek approval before paying dividends from the subsidiaries to the parent. Our use of operating cash flows derived from our non-insurance subsidiaries, such as in our Healthcare Services segment, is generally not restricted by Departments of Insurance.

For 2014, the effect of the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law, commonly referred to as the 3Rs, impacted the timing of our operating cash flows, as we built a receivable in 2014 that is expected to be collected in 2015. The net receivable balance associated with the 3Rs was $679 million at December 31, 2014. In addition, our 2014 financing cash flows have been negatively impacted by the timing of payments to and receipts from CMS associated with Medicare Part D reinsurance subsidies for which we do not assume risk. We are experiencing higher specialty prescription drug costs associated with a new treatment for Hepatitis C than were contemplated in our bids which resulted in higher reinsurance subsidy receivables balances in 2014 that will be settled in 2015 under the terms of our contracts with CMS. Any amounts receivable or payable associated with these risk limiting programs and CMS subsidies may have an impact on regulated subsidiary liquidity, with any temporary shortfalls funded by the parent company.

For additional information on our liquidity risk, please refer to Item 1A. – Risk Factors in this 2014 Form 10-K.

Cash and cash equivalents increased to $1.9 billion at December 31, 2014 from $1.1 billion at December 31, 2013. The change in cash and cash equivalents for the years ended December 31, 2014, 2013 and 2012 is summarized as follows:

	2014	2013	2012
		(in millions)	
Net cash provided by operating activities	$ 1,618	$ 1,716	$ 1,923
Net cash used in investing activities	(63)	(1,182)	(1,965)
Net cash used in financing activities	(758)	(702)	(29)
Increase (decrease) in cash and cash equivalents	$ 797	$ (168)	$ (71)

Cash Flow from Operating Activities

The change in operating cash flows over the three year period primarily results from the corresponding change in earnings, enrollment activity, and the timing of working capital items as discussed below. Cash flows were positively impacted by annual Medicare enrollment gains because premiums generally are collected in advance of claim payments by a period of up to several months. In addition, 2014 operating cash flows were impacted by lower earnings and increased receivables associated with the 3Rs, partially offset by an increase in benefits payable from growth in membership.

Comparisons of our operating cash flows also are impacted by other changes in our working capital. The most significant drivers of changes in our working capital are typically the timing of receipts for premiums and payments of benefits expense. We illustrate these changes with the following summaries of receivables and benefits payable.

The detail of total net receivables was as follows at December 31, 2014, 2013 and 2012:

				Change		
	2014	2013	2012	2014	2013	2012
			(in millions)			
Medicare	$ 664	$ 576	$ 422	$ 88	$ 154	$ 86
Commercial and other	535	405	346	130	59	31
Military services	106	87	59	19	28	(409)
Allowance for doubtful accounts	(137)	(118)	(94)	(19)	(24)	(9)
Total net receivables	$ 1,168	$ 950	$ 733	218	217	(301)
Reconciliation to cash flow statement:						
Provision for doubtful accounts				32	37	26
Receivables from disposition (acquisition)				14	(3)	(51)
Change in receivables per cash flow statement resulting in cash from operations				$ 264	$ 251	$ (326)

Medicare receivables are impacted by revenue growth associated with growth in individual and group Medicare membership and the timing of accruals and related collections associated with the CMS risk-adjustment model.

The increases in commercial and other receivables in 2014 and 2013 primarily are due to growth in the business. In addition, the increase in commercial and other receivables in 2014 is primarily due to the commercial risk adjustment provision of the Health Care Reform Law which became effective in 2014.

Military services receivables at December 31, 2014 and 2013 primarily consist of administrative services only fees owed from the federal government for administrative services provided under our current TRICARE South Region contract. The $409 million decrease in military services receivables from December 31, 2011 to December 31, 2012 primarily resulted from the transition to our current TRICARE South Region contract which we account for similar to

an administrative services fee only agreement. As such, beginning April 1, 2012, payments of the federal government's claims and related reimbursements for the current TRICARE South Region contract are classified with receipts (withdrawals) from contract deposits as a financing item in our consolidated statements of cash flows.

The detail of benefits payable was as follows at December 31, 2014, 2013 and 2012:

				Change		
	2014	2013	2012	2014	2013	2012
			(in millions)			
IBNR (1)	$ 3,254	$ 2,586	$ 2,552	$ 668	$ 34	$ 496
Reported claims in process (2)	475	381	315	94	66	(61)
Military services benefits payable (3)	—	—	4	—	(4)	(335)
Other benefits payable (4)	746	926	908	(180)	18	(75)
Total benefits payable	$ 4,475	$ 3,893	$ 3,779	582	114	25
Payables from acquisition				—	(5)	(66)
Change in benefits payable per cash flow statement resulting in cash from operations				$ 582	$ 109	$ (41)

(1) IBNR represents an estimate of benefits payable for claims incurred but not reported (IBNR) and claims received but not processed at the balance sheet date. The level of IBNR is primarily impacted by membership levels, medical claim trends and the receipt cycle time, which represents the length of time between when a claim is initially incurred and when the claim form is received (i.e. a shorter time span results in a lower IBNR).

(2) Reported claims in process represents the estimated valuation of processed claims that are in the post claim adjudication process, which consists of administrative functions such as audit and check batching and handling, as well as amounts owed to our pharmacy benefit administrator which fluctuate due to bi-weekly payments and the month-end cutoff.

(3) Military services benefits payable primarily represents the run-out of the claims liability associated with our previous TRICARE South Region contract that expired on March 31, 2012. A corresponding receivable for reimbursement by the federal government is included in the military services receivable in the previous receivables table.

(4) Other benefits payable include amounts owed to providers under capitated and risk sharing arrangements.

The increase in benefits payable in 2014 primarily was due to an increase in IBNR, primarily as a result of Medicare Advantage and individual commercial membership growth, and an increase in the amount of processed but unpaid claims due to our pharmacy benefit administrator, which fluctuate due to month-end cutoff. These items were partially offset by a decrease in amounts owed to providers under capitated and risk sharing arrangements primarily related to the disbursement of a portion of our Medicare risk adjustment collections under our contractual obligations associated with our risk sharing arrangements. The increase in benefits payable in 2013 primarily was due to an increase in the amount of processed but unpaid claims due to our pharmacy benefit administrator, which fluctuate due to month-end cutoff, and an increase in IBNR, primarily as a result of Medicare Advantage membership growth. The increase in benefits payable in 2012 primarily was due to an increase in IBNR, primarily as a result of Medicare Advantage membership growth, partially offset by a $335 million decrease in the military services benefits payable due to the run-out of claims under the previous TRICARE South Region contract that expired on March 31, 2012, a decrease in the amounts owed to providers under capitated and risk sharing arrangements, and a decrease in the amounts due to our pharmacy benefit administrator which fluctuate due to month-end cutoff. Under the current TRICARE South Region contract effective April 1, 2012, the federal government retains the risk of the cost of health benefits and related benefit obligation as further described in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Many provisions of the Health Care Reform Law became effective in 2014, including the commercial risk adjustment, risk corridor, and reinsurance provisions as well as the non-deductible health insurance industry fee. As discussed previously, the timing of payments and receipts associated with these provisions impacted our operating cash

flows as we built a receivable in 2014 that is expected to be collected in 2015. The net receivable balance associated with the 3Rs was approximately $679 million at December 31, 2014, including certain amounts recorded in receivables as noted above. In September 2014, we paid the federal government $562 million for the annual health insurance industry fee.

In addition to the timing of receipts for premiums and services revenues, payments of benefits expense, and amounts due under the risk limiting and health insurance industry fee provisions of the Health Care Reform Law, other working capital items impacting operating cash flows primarily resulted from the timing of payments for the Medicare Part D risk corridor provisions of our contracts with CMS and changes in the timing of the collection of pharmacy rebates.

Cash Flow from Investing Activities

Our ongoing capital expenditures primarily relate to our information technology initiatives, support of services in our provider services operations including medical and administrative facility improvements necessary for activities such as the provision of care to members, claims processing, billing and collections, wellness solutions, care coordination, regulatory compliance and customer service. Total capital expenditures, excluding acquisitions, were $528 million in 2014, $441 million in 2013, and $410 million in 2012. Excluding acquisitions, we expect total capital expenditures in 2015 to be in a range of approximately $575 million to $625 million primarily reflecting increased spending associated with growth in our provider services and pharmacy businesses in our Healthcare Services segment.

Proceeds from sales and maturities of investment securities exceeded purchases by $411 million in 2014. These net proceeds were used to fund normal working capital needs due to an increase in receivables in 2014 that will be collected in 2015 associated with the 3Rs in addition to the timing of payments to and receipts from CMS associated with Medicare Part D reinsurance subsidies, as discussed below. We reinvested a portion of our operating cash flows in investment securities, primarily investment-grade fixed income securities, totaling $592 million in 2013 and $320 million in 2012.

Cash consideration paid for acquisitions, net of cash acquired, was $18 million in 2014, $187 million in 2013, and $1.2 billion in 2012. Acquisitions in 2014 included health and wellness related acquisitions. Cash paid for acquisitions in 2013 primarily related to the American Eldercare and other health and wellness related acquisitions. In 2012, acquisitions included Metropolitan, Arcadian, SeniorBridge and other health and wellness and technology related acquisitions.

Cash Flow from Financing Activities

Claims payments were $945 million higher than receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk during 2014, $155 million higher during 2013, and $341 million higher during 2012. As discussed previously, our 2014 financing cash flows have been negatively impacted by the timing of payments to and receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk. We experienced higher specialty prescription drug costs associated with a new treatment for Hepatitis C than were contemplated in our bids which is resulting in higher subsidy receivable balances in 2014 that will be settled in 2015 under the terms of our contracts with CMS. Our net receivable for CMS subsidies and brand name prescription drug discounts was $1.7 billion at December 31, 2014 compared to $713 million at December 31, 2013. Refer to Note 6 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Under our current administrative services only TRICARE South Region contract that began April 1, 2012, reimbursements from the federal government equaled health care cost payments for which we do not assume risk in 2014. Health care cost payments were less than reimbursements by $5 million in 2013 and exceeded reimbursements by $56 million in 2012 due to the timing of such receipts. Receipts from HHS associated with cost sharing provisions of the Health Care Reform Law for which we do not assume risk were $26 million higher than claims payments for the year ended 2014. See Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for further description.

We repurchased 5.7 million shares for $730 million in 2014, which excludes another $100 million of stock held back pending final settlement of an accelerated stock repurchase plan, 5.8 million shares for $502 million in 2013, and

6.3 million shares for $460 million in 2012 under share repurchase plans authorized by the Board of Directors. We also acquired common shares in connection with employee stock plans for an aggregate cost of $42 million in 2014, $29 million in 2013, and $58 million in 2012.

As discussed further below, we paid dividends to stockholders of $172 million in 2014, $168 million in 2013, and $165 million in 2012.

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem our $500 million 6.45% senior unsecured notes.

In December 2012, we issued $600 million of 3.15% senior notes due December 1, 2022 and $400 million of 4.625% senior notes due December 1, 2042. Our net proceeds, reduced for the discount and cost of the offering, were $990 million. We used the proceeds from the offering primarily to finance the acquisition of Metropolitan, including the retirement of Metropolitan’s indebtedness, and to pay related fees and expenses.

In March 2012, we repaid, without penalty, junior subordinated long-term debt of $36 million.

The remainder of the cash used in or provided by financing activities in 2014, 2013, and 2012 primarily resulted from proceeds from stock option exercises and the change in book overdraft.

Future Sources and Uses of Liquidity

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2012, 2013, and 2014 under our Board approved quarterly cash dividend policy:

Payment Date	Amount per Share	Total Amount
		(in millions)
2012	$1.02	$ 165
2013	$1.06	$ 167
2014	$1.10	$ 170

In October 2014, the Board declared a cash dividend of $0.28 per share that was paid on January 30, 2015 to stockholders of record on December 31, 2014, for an aggregate amount of $42 million. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

Stock Repurchase Authorization

In September 2014, the Board of Directors replaced its previously approved share repurchase authorization of up to $1 billion (of which $816 million remained unused) with the current authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2016. Under the current share repurchase authorization, shares may be purchased from time to time at prevailing prices in the open market, by block purchases, or in privately-negotiated transactions (including pursuant to an accelerated share repurchase agreement with investment banks), subject to certain regulatory restrictions on volume, pricing, and timing. As of February 18, 2015, the remaining authorized amount under the current authorization totaled approximately $1.37 billion, after giving effect to the $500 million accelerated share repurchase program we entered into in November 2014 with Goldman, Sachs & Co.

Senior Notes

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds,

reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem the $500 million 6.45% senior unsecured notes as discussed below.

In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date, for cash totaling approximately $560 million. We recognized a loss on extinguishment of debt, included in interest expense, of approximately $37 million in connection with the redemption of these notes.

Credit Agreement

Our 5-year $1.0 billion unsecured revolving credit agreement expires July 2018. Under the credit agreement, at our option, we can borrow on either a competitive advance basis or a revolving credit basis. The revolving credit portion bears interest at either LIBOR plus a spread or the base rate plus a spread. The LIBOR spread, currently 110 basis points, varies depending on our credit ratings ranging from 90 to 150 basis points. We also pay an annual facility fee regardless of utilization. This facility fee, currently 15 basis points, may fluctuate between 10 and 25 basis points, depending upon our credit ratings. The competitive advance portion of any borrowings will bear interest at market rates prevailing at the time of borrowing on either a fixed rate or a floating rate based on LIBOR, at our option.

The terms of the credit agreement include standard provisions related to conditions of borrowing, including a customary material adverse effect clause which could limit our ability to borrow additional funds. In addition, the credit agreement contains customary restrictive and financial covenants as well as customary events of default, including financial covenants regarding the maintenance of a minimum level of net worth of $7.8 billion at December 31, 2014 and a maximum leverage ratio of 3.0:1. We are in compliance with the financial covenants, with actual net worth of $9.6 billion and actual leverage ratio of 1.4:1, as measured in accordance with the credit agreement as of December 31, 2014. In addition, the credit agreement includes an uncommitted $250 million incremental loan facility.

At December 31, 2014, we had no borrowings outstanding under the credit agreement. We have outstanding letters of credit of $4 million issued under the credit agreement at December 31, 2014. No amounts have been drawn on these letters of credit. Accordingly, as of December 31, 2014, we had $996 million of remaining borrowing capacity under the credit agreement, none of which would be restricted by our financial covenant compliance requirement. We have other customary, arms-length relationships, including financial advisory and banking, with some parties to the credit agreement.

Commercial Paper

In October 2014, we entered into a commercial paper program pursuant to which we may issue short-term, unsecured commercial paper notes privately placed on a discount basis through certain broker dealers. Amounts available under the program may be borrowed, repaid and re-borrowed from time to time, with the aggregate face or principal amounts outstanding under the program at any time not to exceed $1 billion. The net proceeds of issuances have been and are expected to be used for general corporate purposes, including to repurchase shares of our common stock. The maximum principal amount of commercial paper borrowings outstanding at any one time during the year ended December 31, 2014 was $175 million. There were no outstanding borrowings at December 31, 2014.

Liquidity Requirements

We believe our cash balances, investment securities, operating cash flows, and funds available under our credit agreement and our commercial paper program or from other public or private financing sources, taken together, provide adequate resources to fund ongoing operating and regulatory requirements, acquisitions, future expansion opportunities, and capital expenditures for at least the next twelve months, as well as to refinance or repay debt, and repurchase shares.

Adverse changes in our credit rating may increase the rate of interest we pay and may impact the amount of credit available to us in the future. Our investment-grade credit rating at December 31, 2014 was BBB+ according to Standard & Poor's Rating Services, or S&P, and Baa3 according to Moody's Investors Services, Inc., or Moody's. A downgrade by S&P to BB+ or by Moody's to Ba1 triggers an interest rate increase of 25 basis points with respect to $750 million of our senior notes. Successive one notch downgrades increase the interest rate an additional 25 basis

points, or annual interest expense by $2 million, up to a maximum 100 basis points, or annual interest expense by $8 million.

In addition, we operate as a holding company in a highly regulated industry. Humana Inc., our parent company, is dependent upon dividends and administrative expense reimbursements from our subsidiaries, certain of which are subject to regulatory restrictions. We continue to maintain significant levels of aggregate excess statutory capital and surplus in our state-regulated insurance subsidiaries. Cash, cash equivalents, and short-term investments at the parent company increased to $1.4 billion at December 31, 2014 from $508 million at December 31, 2013 primarily due to net proceeds of $1.73 billion from the September 2014 issuance of senior notes, offset by the $560 million senior note redemption discussed above and share repurchases. Our use of operating cash flows derived from our non-insurance subsidiaries, such as in our Healthcare Services segment, is generally not restricted by Departments of Insurance. Our subsidiaries paid dividends to the parent of $927 million in 2014, $967 million in 2013, and $1.2 billion in 2012. The declines in dividends to the parent in 2013 and 2014 primarily were a result of higher surplus requirements associated with premium growth. Refer to our parent company financial statements and accompanying notes in Schedule I – Parent Company Financial Information. Regulatory requirements, including subsidiary dividends to the parent, are discussed in more detail in the following section. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2015 is approximately $800 million in the aggregate.

In September 2014, we paid the federal government $562 million for the annual health insurance industry fee attributed to calendar year 2014, in accordance with the Health Care Reform Law. In 2015, the health insurance industry fee increases by 41% for the industry taken as a whole. Accordingly, absent changes in market share, we would expect a 41% increase in our fee in 2015.

Regulatory Requirements

For a detailed discussion of our regulatory requirements, including aggregate statutory capital and surplus as well as dividends paid from the subsidiaries to the parent, please refer to Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Contractual Obligations

We are contractually obligated to make payments for years subsequent to December 31, 2014 as follows:

	Payments Due by Period				
	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
			(in millions)		
Debt	$ 3,800	$ —	$ —	$ 1,200	$ 2,600
Interest (1)	2,753	187	369	294	1,903
Operating leases (2)	1,145	232	361	188	364
Purchase obligations (3)	175	95	64	16	—
Future policy benefits payable and other long-term liabilities (4)	2,708	78	398	231	2,001
Total	$ 10,581	$ 592	$ 1,192	$ 1,929	$ 6,868

(1) Interest includes the estimated contractual interest payments under our debt agreements.

(2) We lease facilities, computer hardware, and other furniture and equipment under long-term operating leases that are noncancelable and expire on various dates through 2027. We sublease facilities or partial facilities to third party tenants for space not used in our operations which partially mitigates our operating lease commitments. An operating lease is a type of off-balance sheet arrangement. Assuming we acquired the asset, rather than leased such asset, we would have recognized a liability for the financing of these assets. See also Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

(3) Purchase obligations include agreements to purchase services, primarily information technology related services, or to make improvements to real estate, in each case that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum levels of service to be purchased; fixed, minimum or variable price provisions; and the appropriate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty.

(4) Includes future policy benefits payable ceded to third parties through 100% coinsurance agreements as more fully described in Note 19 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. We expect the assuming reinsurance carriers to fund these obligations and reflected these amounts as reinsurance recoverables included in other long-term assets on our consolidated balance sheet. Amounts payable in less than one year are included in trade accounts payable and accrued expenses in the consolidated balance sheet.

Off-Balance Sheet Arrangements

As of December 31, 2014, we were not involved in any special purpose entity, or SPE, transactions. For a detailed discussion off-balance sheet arrangements, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Guarantees and Indemnifications

For a detailed discussion our guarantees and indemnifications, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Government Contracts

For a detailed discussion of our government contracts, including our Medicare, Military, and Medicaid contracts, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements and accompanying notes, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements and accompanying notes requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We continuously evaluate our estimates and those critical accounting policies related primarily to benefits expense and revenue recognition as well as accounting for impairments related to our investment securities, goodwill, and long-lived assets. These estimates are based on knowledge of current events and anticipated future events and, accordingly, actual results ultimately may differ from those estimates. We believe the following critical accounting policies involve the most significant judgments and estimates used in the preparation of our consolidated financial statements.

Benefits Expense Recognition

Benefits expense is recognized in the period in which services are provided and includes an estimate of the cost of services which have been incurred but not yet reported, or IBNR. IBNR represents a substantial portion of our benefits payable as follows:

	December 31, 2014	Percentage of Total	December 31, 2013	Percentage of Total
	(dollars in millions)			
IBNR	$ 3,254	72.7%	$ 2,586	66.4%
Reported claims in process	475	10.6%	381	9.8%
Other benefits payable	746	16.7%	926	23.8%
Total benefits payable	$ 4,475	100.0%	$ 3,893	100.0%

Our reserving practice is to consistently recognize the actuarial best point estimate within a level of confidence required by actuarial standards. Actuarial standards of practice generally require a level of confidence such that the liabilities established for IBNR have a greater probability of being adequate versus being insufficient, or such that the liabilities established for IBNR are sufficient to cover obligations under an assumption of moderately adverse conditions. Adverse conditions are situations in which the actual claims are expected to be higher than the otherwise estimated value of such claims at the time of the estimate. Therefore, in many situations, the claim amounts ultimately settled will be less than the estimate that satisfies the actuarial standards of practice.

We develop our estimate for IBNR using actuarial methodologies and assumptions, primarily based upon historical claim experience. Depending on the period for which incurred claims are estimated, we apply a different method in determining our estimate. For periods prior to the most recent three months, the key assumption used in estimating our IBNR is that the completion factor pattern remains consistent over a rolling 12-month period after adjusting for known changes in claim inventory levels and known changes in claim payment processes. Completion factors result from the calculation of the percentage of claims incurred during a given period that have historically been adjudicated as of the reporting period. For the most recent three months, the incurred claims are estimated primarily from a trend analysis based upon per member per month claims trends developed from our historical experience in the preceding months, adjusted for known changes in estimates of recent hospital and drug utilization data, provider contracting changes, changes in benefit levels, changes in member cost sharing, changes in medical management processes, product mix, and weekday seasonality.

The completion factor method is used for the months of incurred claims prior to the most recent three months because the historical percentage of claims processed for those months is at a level sufficient to produce a consistently reliable result. Conversely, for the most recent three months of incurred claims, the volume of claims processed historically is not at a level sufficient to produce a reliable result, which therefore requires us to examine historical trend patterns as the primary method of evaluation. Changes in claim processes, including recoveries of overpayments, receipt cycle times, claim inventory levels, outsourcing, system conversions, and processing disruptions due to weather or other events affect views regarding the reasonable choice of completion factors. Claim payments to providers for services rendered are often net of overpayment recoveries for claims paid previously, as contractually allowed. Claim overpayment recoveries can result from many different factors, including retroactive enrollment activity, audits of provider billings, and/or payment errors. Changes in patterns of claim overpayment recoveries can be unpredictable and result in completion factor volatility, as they often impact older dates of service. The receipt cycle time measures the average length of time between when a medical claim was initially incurred and when the claim form was received. Increases in electronic claim submissions from providers decrease the receipt cycle time. If claims are submitted or processed on a faster (slower) pace than prior periods, the actual claim may be more (less) complete than originally estimated using our completion factors, which may result in reserves that are higher (lower) than required.

Medical cost trends potentially are more volatile than other segments of the economy. The drivers of medical cost trends include increases in the utilization of hospital facilities, physician services, new higher priced technologies and medical procedures, and new prescription drugs and therapies, as well as the inflationary effect on the cost per unit of

each of these expense components. Other external factors such as government-mandated benefits or other regulatory changes, the tort liability system, increases in medical services capacity, direct to consumer advertising for prescription drugs and medical services, an aging population, lifestyle changes including diet and smoking, catastrophes, and epidemics also may impact medical cost trends. Internal factors such as system conversions, claims processing cycle times, changes in medical management practices and changes in provider contracts also may impact our ability to accurately predict estimates of historical completion factors or medical cost trends. All of these factors are considered in estimating IBNR and in estimating the per member per month claims trend for purposes of determining the reserve for the most recent three months. Additionally, we continually prepare and review follow-up studies to assess the reasonableness of the estimates generated by our process and methods over time. The results of these studies are also considered in determining the reserve for the most recent three months. Each of these factors requires significant judgment by management.

The completion and claims per member per month trend factors are the most significant factors impacting the IBNR estimate. The portion of IBNR estimated using completion factors for claims incurred prior to the most recent three months is generally less variable than the portion of IBNR estimated using trend factors. The following table illustrates the sensitivity of these factors assuming moderate adverse experience and the estimated potential impact on our operating results caused by reasonably likely changes in these factors based on December 31, 2014 data:

Completion Factor (a):		Claims Trend Factor (b):	
Factor Change (c)	Decrease in Benefits Payable	Factor Change (c)	Decrease in Benefits Payable
	(dollars in millions)		
1.40%	$(357)	(4.00)%	$(381)
1.20%	$(306)	(3.50)%	$(333)
1.00%	$(255)	(3.00)%	$(286)
0.80%	$(204)	(2.50)%	$(238)
0.60%	$(153)	(2.25)%	$(214)
0.40%	$(102)	(2.00)%	$(190)
0.20%	$(51)	(1.50)%	$(143)

(a) Reflects estimated potential changes in benefits payable at December 31, 2014 caused by changes in completion factors for incurred months prior to the most recent three months.

(b) Reflects estimated potential changes in benefits payable at December 31, 2014 caused by changes in annualized claims trend used for the estimation of per member per month incurred claims for the most recent three months.

(c) The factor change indicated represents the percentage point change.

The following table provides a historical perspective regarding the accrual and payment of our benefits payable, excluding military services. Components of the total incurred claims for each year include amounts accrued for current year estimated benefits expense as well as adjustments to prior year estimated accruals.

	2014	2013	2012
		(in millions)	
Balances at January 1	$ 3,893	$ 3,775	$ 3,415
Acquisitions	—	5	66
Incurred related to:			
Current year	38,641	32,711	30,198
Prior years	(518)	(474)	(257)
Total incurred	38,123	32,237	29,941
Paid related to:			
Current year	(34,357)	(29,103)	(26,738)
Prior years	(3,262)	(3,021)	(2,909)
Total paid	(37,619)	(32,124)	(29,647)
Reinsurance recoverable	78	—	—
Balances at December 31	$ 4,475	$ 3,893	$ 3,775

The following table summarizes the changes in estimate for incurred claims related to prior years attributable to our key assumptions. As previously described, our key assumptions consist of trend and completion factors estimated using an assumption of moderately adverse conditions. The amounts below represent the difference between our original estimates and the actual benefits expense ultimately incurred as determined from subsequent claim payments.

	Favorable Development by Changes in Key Assumptions					
	2014		2013		2012	
	Amount	Factor Change (a)	Amount	Factor Change (a)	Amount	Factor Change (a)
			(dollars in millions)			
Trend factors	$ (266)	(3.7)%	$ (233)	(3.4)%	$ (138)	(2.4)%
Completion factors	(252)	1.2 %	(241)	1.2 %	(119)	0.7 %
Total	$ (518)		$ (474)		$ (257)	

(a) The factor change indicated represents the percentage point change.

As previously discussed, our reserving practice is to consistently recognize the actuarial best estimate of our ultimate liability for claims. Actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $518 million in 2014, $474 million in 2013, and $257 million in 2012. The table below details our favorable medical claims reserve development related to prior fiscal years by segment for 2014, 2013, and 2012.

	Favorable Medical Claims Reserve Development			Change	
	2014	2013	2012	2014	2013
			(in millions)		
Retail Segment	$ (385)	$ (332)	$ (192)	$ (53)	$ (140)
Employer Group Segment	(132)	(138)	(48)	6	(90)
Other Businesses	(1)	(4)	(17)	3	13
Total	$ (518)	$ (474)	$ (257)	$ (44)	$ (217)

The favorable medical claims reserve development for 2014, 2013, and 2012 primarily reflects the consistent application of trend and completion factors estimated using an assumption of moderately adverse conditions. In addition, the favorable medical claims reserve development during 2014 and 2013 reflects increased membership and better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

We continually adjust our historical trend and completion factor experience with our knowledge of recent events that may impact current trends and completion factors when establishing our reserves. Because our reserving practice is to consistently recognize the actuarial best point estimate using an assumption of moderately adverse conditions as required by actuarial standards, there is a reasonable possibility that variances between actual trend and completion factors and those assumed in our December 31, 2014 estimates would fall towards the middle of the ranges previously presented in our sensitivity table.

Benefits expense associated with military services and provisions associated with future policy benefits excluded from the previous table was as follows for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
		(in millions)	
Military services	$ 11	$ (27)	$ 908
Future policy benefits	32	354	136
Total	$ 43	$ 327	$ 1,044

Due to the transition to the current TRICARE South Region contract on April 1, 2012, which is accounted for as an administrative services only contract as more fully described in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data, there was no military services benefits payable at December 31, 2014 or 2013. This transition is also the primary reason for the decline in military services benefits expense from 2012 to 2013.

Future policy benefits payable of $2.3 billion and $2.2 billion at December 31, 2014 and 2013, respectively, represent liabilities for long-duration insurance policies including long-term care insurance, life insurance, annuities, and certain health and other supplemental policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Interest rates are based on our expected net investment returns on the investment portfolio supporting the reserves for these blocks of business. Mortality, a measure of expected death, and morbidity, a measure of health status, assumptions are based on published actuarial tables, modified based upon actual experience. The assumptions used to determine the liability for future policy benefits are established and locked in at the time each contract is issued and only change if our expected future experience deteriorates to the point that the level of the liability, together with the present value of future gross premiums, are not adequate to provide for future expected policy benefits and maintenance costs (i.e. the loss recognition date). Because these policies have long-term claim payout periods, there is a greater risk of significant variability in claims costs, either positive or negative. We perform loss recognition tests at least annually in the fourth quarter, and more frequently if adverse events or changes in circumstances indicate that the level of the liability, together with the present value of future gross premiums, may not be adequate to provide for future expected policy benefits and maintenance costs.

Future policy benefits payable include $1.5 billion at December 31, 2014 and $1.4 billion at December 31, 2013 associated with a non-strategic closed block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG. Approximately 32,700 policies remain in force as of December 31, 2014. No new policies have been written since 2005 under this closed block. Future policy benefits payable includes amounts charged to accumulated other comprehensive income for an additional liability that would exist on our closed-block of long-term care insurance policies if unrealized gains on the sale of the investments backing such products had been realized and the proceeds reinvested at then current yields. There was $123 million of additional liability at December 31, 2014 and no additional

liability at December 31, 2013. Amounts charged to accumulated other comprehensive income are net of applicable deferred taxes.

Long-term care insurance policies provide nursing home and home health coverage for which premiums are collected many years in advance of benefits paid, if any. Therefore, our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. A prolonged period during which interest rates remain at levels lower than those anticipated in our reserving would result in shortfalls in investment income on assets supporting our obligation under long term care policies because the long duration of the policy obligations exceeds the duration of the supporting investment assets. Further, we monitor the loss experience of these long-term care insurance policies and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. To the extent premium rate increases and/or loss experience vary from our loss recognition date assumptions, future adjustments to reserves could be required.

During 2013, we recorded a loss for a premium deficiency with respect to our closed block of long-term care insurance policies. The premium deficiency was based on current and anticipated experience that had deteriorated from our locked-in assumptions from the previous December 31, 2010 loss recognition date, particularly as they related to emerging experience due to an increase in life expectancies and utilization of home health care services. Based on this deterioration, and combined with lower interest rates, we determined that our existing future policy benefits payable, together with the present value of future gross premiums, associated with our closed-block of long-term care insurance policies were not adequate to provide for future policy benefits and maintenance costs under these policies; therefore we unlocked and modified our assumptions based on current expectations. Accordingly, during 2013 we recorded $243 million of additional benefits expense, with a corresponding increase in future policy benefits payable of $350 million partially offset by a related reinsurance recoverable of $107 million included in other long-term assets.

During 2012, we recorded a change in estimate associated with future policy benefits payable for our closed-block of long-term care insurance policies resulting in additional benefits expense of $29 million and a corresponding increase in future policy benefits payable. This change in estimate was based on current claim experience demonstrating an increase in the length of the time policyholders already in payment status remained in such status. Future policy benefits payable was increased to cover future payments to policyholders currently in payment status.

For our closed block of long-term care policies, actuarial assumptions used to estimate reserves are inherently uncertain due to the potential changes in trends in mortality, morbidity, persistency (the percentage of policies remaining in-force) and interest rates. As a result, our long term care reserves may be subject to material increases if these trends develop adversely to our expectations. The estimated increase in reserves and additional benefit expense from hypothetically modeling adverse variations in our actuarial assumptions, in the aggregate, could be up to $300 million, net of reinsurance. Although such hypothetical revisions are not currently appropriate, we believe they could occur based on past variances in experience and our expectation of the ranges of future experience that could reasonably occur. Generally accepted accounting principles do not allow us to unlock our assumptions for favorable items. This hypothetical modeling does not contemplate a divestiture situation. We are evaluating alternatives related to our closed block of long term care policies. While no decision has been made with respect to any course of action, if we were to divest this business, it is reasonably likely that we would have to recognize a material loss and that loss could exceed the amount provided above.

In addition, future policy benefits payable includes amounts of $210 million at December 31, 2014, $215 million at December 31, 2013, and $220 million at December 31, 2012 which are subject to 100% coinsurance agreements as more fully described in Note 19 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data, and as such are offset by a related reinsurance recoverable included in other long-term assets.

Revenue Recognition

We generally establish one-year commercial membership contracts with employer groups, subject to cancellation by the employer group on 30-day written notice. Our Medicare contracts with CMS renew annually. Our military services contracts with the federal government and our contracts with various state Medicaid programs generally are multi-year contracts subject to annual renewal provisions.

Our commercial contracts establish rates on a per employee basis for each month of coverage based on the type of coverage purchased (single to family coverage options). Our Medicare and Medicaid contracts also establish monthly rates per member. However, our Medicare contracts also have additional provisions as outlined in the following separate section.

Premiums revenue and administrative services only, or ASO, fees are estimated by multiplying the membership covered under the various contracts by the contractual rates. In addition, we adjust revenues for estimated changes in an employer's enrollment and individuals that ultimately may fail to pay, and for estimated rebates under the minimum benefit ratios required under the Health Care Reform Law. . Enrollment changes not yet processed or not yet reported by an employer group or the government, also known as retroactive membership adjustments, are estimated based on available data and historical trends. We routinely monitor the collectibility of specific accounts, the aging of receivables, historical retroactivity trends, estimated rebates, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in the current period's revenue.

We bill and collect premium remittances from employer groups and members in our Medicare and other individual products monthly. We receive monthly premiums from the federal government and various states according to government specified payment rates and various contractual terms. Changes in revenues from CMS for our Medicare products resulting from the periodic changes in risk-adjustment scores derived from medical diagnoses for our membership are recognized when the amounts become determinable and the collectibility is reasonably assured.

Medicare Risk-Adjustment Provisions

CMS utilizes a risk-adjustment model which apportions premiums paid to Medicare Advantage plans according to health severity. The risk-adjustment model pays more for enrollees with predictably higher costs. Under the risk-adjustment methodology, all Medicare Advantage plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses this diagnosis data to calculate the risk-adjusted premium payment to Medicare Advantage plans. Rates paid to Medicare Advantage plans are established under an actuarial bid model, including a process that bases our payments on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's Medicare FFS program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on providers to appropriately document all medical data, including the diagnosis data submitted with claims. We estimate risk-adjustment revenues based on medical diagnoses for our membership. The risk-adjustment model is more fully described in Item 1. – Business under the section titled "Individual Medicare."

Investment Securities

Investment securities totaled $9.5 billion, or 41% of total assets at December 31, 2014, and $9.8 billion, or 47% of total assets at December 31, 2013. Debt securities, detailed below, comprised this entire investment portfolio at December 31, 2014 and 2013. The fair value of debt securities were as follows at December 31, 2014 and 2013:

	December 31, 2014	Percentage of Total	December 31, 2013	Percentage of Total
		(dollars in millions)		
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 374	3.9%	$ 584	6.0%
Mortgage-backed securities	1,498	15.7%	1,820	18.6%
Tax-exempt municipal securities	3,068	32.1%	2,971	30.3%
Mortgage-backed securities:				
Residential	17	0.2%	22	0.2%
Commercial	843	8.8%	673	6.9%
Asset-backed securities	29	0.3%	63	0.6%
Corporate debt securities	3,718	39.0%	3,667	37.4%
Total debt securities	$ 9,547	100.0%	$ 9,800	100.0%

Approximately 96% of our debt securities were investment-grade quality, with a weighted average credit rating of AA- by S&P at December 31, 2014. Most of the debt securities that were below investment-grade were rated BB, the higher end of the below investment-grade rating scale. Our investment policy limits investments in a single issuer and requires diversification among various asset types.

Tax-exempt municipal securities included pre-refunded bonds of $199 million at December 31, 2014 and $222 million at December 31, 2013. These pre-refunded bonds were secured by an escrow fund consisting of U.S. government obligations sufficient to pay off all amounts outstanding at maturity. The ratings of these pre-refunded bonds generally assume the rating of the government obligations at the time the fund is established. Tax-exempt municipal securities that were not pre-refunded were diversified among general obligation bonds of U.S. states and local municipalities as well as special revenue bonds. General obligation bonds, which are backed by the taxing power and full faith of the issuer, accounted for $1.0 billion of these municipals in the portfolio. Special revenue bonds, issued by a municipality to finance a specific public works project such as utilities, water and sewer, transportation, or education, and supported by the revenues of that project, accounted for $1.8 billion of these municipals. Our general obligation bonds are diversified across the U.S. with no individual state exceeding 11%. In addition, certain monoline insurers guarantee the timely repayment of bond principal and interest when a bond issuer defaults and generally provide credit enhancement for bond issues related to our tax-exempt municipal securities. We have no direct exposure to these monoline insurers. We owned $484 million and $548 million at December 31, 2014 and 2013, respectively, of tax-exempt securities guaranteed by monoline insurers. The equivalent weighted average S&P credit rating of these tax-exempt securities without the guarantee from the monoline insurer was AA.

Our direct exposure to subprime mortgage lending is limited to investment in residential mortgage-backed securities and asset-backed securities backed by home equity loans. The fair value of securities backed by Alt-A and subprime loans was $1 million at December 31, 2014 and 2013. There are no collateralized debt obligations or structured investment vehicles in our investment portfolio. The percentage of corporate securities associated with the financial services industry was 21% at December 31, 2014 and 23% at December 31, 2013.

Gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows at December 31, 2014:

	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in millions)					
December 31, 2014						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 79	$ —	$ 80	$ (1)	$ 159	$ (1)
Mortgage-backed securities	22	—	320	(5)	342	(5)
Tax-exempt municipal securities	131	(1)	118	(2)	249	(3)
Mortgage-backed securities:						
Residential	1	—	4	—	5	—
Commercial	31	(1)	267	(18)	298	(19)
Asset-backed securities	13	—	—	—	13	—
Corporate debt securities	219	(6)	128	(7)	347	(13)
Total debt securities	$ 496	$ (8)	$ 917	$ (33)	$ 1,413	$ (41)

Under the other-than-temporary impairment model for debt securities held, we recognize an impairment loss in income in an amount equal to the full difference between the amortized cost basis and the fair value when we have the intent to sell the debt security or it is more likely than not we will be required to sell the debt security before recovery of our amortized cost basis. However, if we do not intend to sell the debt security, we evaluate the expected cash flows to be received as compared to amortized cost and determine if a credit loss has occurred. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized currently in income with the remainder of the loss recognized in other comprehensive income.

When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairment is considered using a variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. For example, with respect to mortgage and asset-backed securities, such data includes underlying loan level data and structural features such as seniority and other forms of credit enhancements. A decline in fair value is considered other-than-temporary when we do not expect to recover the entire amortized cost basis of the security. We estimate the amount of the credit loss component of a debt security as the difference between the amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate of future cash flows discounted at the implicit interest rate at the date of purchase. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations, facts and circumstances factored into our assessment may change with the passage of time, or we may decide to subsequently sell the investment. The determination of whether a decline in the value of an investment is other than temporary requires us to exercise significant diligence and judgment. The discovery of new information and the passage of time can significantly change these judgments. The status of the general economic environment and significant changes in the national securities markets influence the determination of fair value and the assessment of investment impairment. There is a continuing risk that declines in fair value may occur and additional material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

The recoverability of our non-agency residential and commercial mortgage-backed securities is supported by factors such as seniority, underlying collateral characteristics and credit enhancements. These residential and commercial mortgage-backed securities at December 31, 2014 primarily were composed of senior tranches having high

credit support, with over 99% of the collateral consisting of prime loans. The weighted average credit rating of all commercial mortgage-backed securities was AA+ at December 31, 2014.

All issuers of securities we own that were trading at an unrealized loss at December 31, 2014 remain current on all contractual payments. After taking into account these and other factors previously described, we believe these unrealized losses primarily were caused by an increase in market interest rates in the current markets than when the securities were purchased. At December 31, 2014, we did not intend to sell the securities with an unrealized loss position in accumulated other comprehensive income, and it is not likely that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss were not other-than-temporarily impaired at December 31, 2014. There were no material other-than-temporary impairments in 2014, 2013, or 2012.

Goodwill and Long-lived Assets

At December 31, 2014, goodwill and other long-lived assets represented 24% of total assets and 59% of total stockholders' equity, compared to 27% and 61%, respectively, at December 31, 2013.

We are required to test at least annually for impairment at a level of reporting referred to as the reporting unit, and more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. A reporting unit either is our operating segments or one level below the operating segments, referred to as a component, which comprise our reportable segments. A component is considered a reporting unit if the component constitutes a business for which discrete financial information is available that is regularly reviewed by management. We are required to aggregate the components of an operating segment into one reporting unit if they have similar economic characteristics. Goodwill is assigned to the reporting unit that is expected to benefit from a specific acquisition. The carrying amount of goodwill for our reportable segments has been retrospectively adjusted to conform to the 2014 segment change discussed in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

We use a two-step process to review goodwill for impairment. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any. Our strategy, long-range business plan, and annual planning process support our goodwill impairment tests. These tests are performed, at a minimum, annually in the fourth quarter, and are based on an evaluation of future discounted cash flows. We rely on this discounted cash flow analysis to determine fair value. However outcomes from the discounted cash flow analysis are compared to other market approach valuation methodologies for reasonableness. We use discount rates that correspond to a market-based weighted-average cost of capital and terminal growth rates that correspond to long-term growth prospects, consistent with the long-term inflation rate. Key assumptions in our cash flow projections, including changes in membership, premium yields, medical and operating cost trends, and certain government contract extensions, are consistent with those utilized in our long-range business plan and annual planning process. If these assumptions differ from actual, including the impact of the Health Care Reform Law, the estimates underlying our goodwill impairment tests could be adversely affected. Goodwill impairment tests completed in each of the last three years did not result in an impairment loss. The fair value of our reporting units with significant goodwill exceeded carrying amounts by a substantial margin. A 100 basis point increase in the discount rate would not have a significant impact on the amount of margin for any of our reporting units with significant goodwill.

Long-lived assets consist of property and equipment and other finite-lived intangible assets. These assets are depreciated or amortized over their estimated useful life, and are subject to impairment reviews. We periodically review long-lived assets whenever adverse events or changes in circumstances indicate the carrying value of the asset may not be recoverable. In assessing recoverability, we must make assumptions regarding estimated future cash flows and other factors to determine if an impairment loss may exist, and, if so, estimate fair value. We also must estimate and make assumptions regarding the useful life we assign to our long-lived assets. If these estimates or their related assumptions change in the future, we may be required to record impairment losses or change the useful life, including accelerating depreciation or amortization for these assets. There were no material impairment losses in the last three years.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our earnings and financial position are exposed to financial market risk, including those resulting from changes in interest rates.

The level of our pretax earnings is subject to market risk due to changes in interest rates and the resulting impact on investment income and interest expense. Prior to 2009, under interest rate swap agreements, we exchanged the fixed interest rate under all of our senior notes for a variable interest rate based on LIBOR using interest rate swap agreements. We terminated all of our interest rate swap agreements in 2008. We may re-enter into interest rate swap agreements in the future depending on market conditions and other factors. Amounts borrowed under the revolving credit portion of our $1.0 billion unsecured revolving credit agreement bear interest at either LIBOR plus a spread or the base rate plus a spread. There were no borrowings outstanding under our credit agreement at December 31, 2014 or December 31, 2013.

Interest rate risk also represents a market risk factor affecting our consolidated financial position due to our significant investment portfolio, consisting primarily of fixed maturity securities of investment-grade quality with a weighted average S&P credit rating of AA- at December 31, 2014. Our net unrealized position increased $225 million from a net unrealized gain position of $250 million at December 31, 2013 to a net unrealized gain position of $475 million at December 31, 2014. At December 31, 2014, we had gross unrealized losses of $41 million on our investment portfolio primarily due to an increase in market interest rates in the current markets than when the securities were purchased, and as such, there were no material other-than-temporary impairments during 2014. While we believe that these impairments are temporary and we currently do not have the intent to sell such securities, given the current market conditions and the significant judgments involved, there is a continuing risk that future declines in fair value may occur and material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

Duration is the time-weighted average of the present value of the bond portfolio's cash flow. Duration is indicative of the relationship between changes in fair value and changes in interest rates, providing a general indication of the sensitivity of the fair values of our fixed maturity securities to changes in interest rates. However, actual fair values may differ significantly from estimates based on duration. The average duration of our investment portfolio, including cash and cash equivalents, was approximately 4.1 years as of December 31, 2014 and 4.3 years as of December 31, 2013. Based on the duration including cash equivalents, a 1% increase in interest rates would generally decrease the fair value of our securities by approximately $466 million.

We have also evaluated the impact on our investment income and interest expense resulting from a hypothetical change in interest rates of 100, 200, and 300 basis points over the next twelve-month period, as reflected in the following table. The evaluation was based on our investment portfolio and our outstanding indebtedness at December 31, 2014 and 2013. Our investment portfolio consists of cash, cash equivalents, and investment securities. The modeling technique used to calculate the pro forma net change in pretax earnings considered the cash flows related to fixed income investments and debt, which are subject to interest rate changes during a prospective twelve-month period. This evaluation measures parallel shifts in interest rates and may not account for certain unpredictable events that may affect interest income, including unexpected changes of cash flows into and out of the portfolio, changes in the asset allocation, including shifts between taxable and tax-exempt securities, and spread changes specific to various investment categories. In the past ten years, changes in 3 month LIBOR rates during the year have exceeded 300 basis points once, have not changed between 200 and 300 basis points, have changed between 100 and 200 basis points three times, and have changed by less than 100 basis points six times.

	Increase (decrease) in pretax earnings given an interest rate decrease of X basis points			Increase (decrease) in pretax earnings given an interest rate increase of X basis points		
	(300)	(200)	(100)	100	200	300
	(in millions)					
As of December 31, 2014						
Investment income (a)	$ (20)	$ (15)	$ (9)	$ 42	$ 85	$ 128
Interest expense (b)	—	—	—	—	—	—
Pretax	$ (20)	$ (15)	$ (9)	$ 42	$ 85	$ 128
As of December 31, 2013						
Investment income (a)	$ (24)	$ (16)	$ (8)	$ 26	$ 52	$ 79
Interest expense (b)	—	—	—	—	—	—
Pretax	$ (24)	$ (16)	$ (8)	$ 26	$ 52	$ 79

(a) As of December 31, 2014 and 2013, some of our investments had interest rates below 3% so the assumed hypothetical change in pretax earnings does not reflect the full 3% point reduction.

(b) The interest rate under our senior notes is fixed. There were no borrowings outstanding under the credit agreement at December 31, 2014 or December 31, 2013 or under our commercial paper program (commenced in October 2014) at December 31, 2014.

Humana, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. REPORTING ENTITY

Nature of Operations

Humana Inc., headquartered in Louisville, Kentucky, is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. The company's strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country. References throughout these notes to consolidated financial statements to "we," "us," "our," "Company," and "Humana," mean Humana Inc. and its subsidiaries. We derived approximately 73% of our total premiums and services revenue from contracts with the federal government in 2014, including 15% related to our federal government contracts with the Centers for Medicare and Medicaid Services, or CMS, to provide health insurance coverage for individual Medicare Advantage members in Florida. CMS is the federal government's agency responsible for administering the Medicare program.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Our financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America. Our consolidated financial statements include the accounts of Humana Inc. and subsidiaries that the Company controls, including variable interest entities associated with medical practices for which we are the primary beneficiary. We do not own many of our medical practices but instead enter into exclusive long-term management agreements with the affiliated Professional Associations, or P.A.s, that operate these medical practices. Based upon the provisions of these agreements, these affiliated P.A.s are variable interest entities and we are the primary beneficiary, and accordingly we consolidated the affiliated P.A.s. All significant intercompany balances and transactions have been eliminated.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The areas involving the most significant use of estimates are the estimation of benefits payable, future policy benefits payable, the impact of risk adjustment provisions related to our Medicare contracts, the valuation and related impairment recognition of investment securities, and the valuation and related impairment recognition of long-lived assets, including goodwill. These estimates are based on knowledge of current events and anticipated future events, and accordingly, actual results may ultimately differ materially from those estimates.

Business Segment Reclassifications

On January 1, 2014, we reclassified certain of our businesses from our Healthcare Services segment to our Employer Group segment to correspond with internal management reporting changes. Our reportable segments remain the same and prior period segment financial information has been recast to conform to the 2014 presentation. See Note 17 for segment financial information.

Health Care Reform

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. Certain of these reforms became effective January 1, 2014, including an annual insurance industry premium-based fee and the establishment of federally-facilitated or state-based exchanges coupled with three premium stabilization programs, as described more fully below.

The Health Care Reform Law imposes an annual premium-based fee on health insurers for each calendar year beginning on or after January 1, 2014 which is not deductible for tax purposes. We are required to estimate a liability for the health insurer fee and record it in full once qualifying insurance coverage is provided in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized ratably to expense over the same calendar year. We record the liability for the health insurer fee in trade accounts payable and accrued expenses and record the deferred cost in other current assets in our consolidated financial statements. We pay the health insurer fee in September of each year. In September 2014, we paid the federal government $562 million for the annual health insurance industry fee attributed to calendar year 2014, in accordance with the Health Care Reform Law.

The Health Care Reform Law also establishes risk spreading premium stabilization programs effective January 1, 2014. The risk spreading programs are applicable to certain of our commercial medical insurance products. In the aggregate, our commercial medical insurance products represented approximately 18% of our total premiums and services revenue for the year ended December 31, 2014. These programs, commonly referred to as the 3Rs, include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridors program designed to more evenly spread the financial risk borne by issuers and to mitigate the risk that issuers would have mispriced products. The transitional reinsurance and temporary risk corridors programs are for years 2014 through 2016, with potential for additional reinsurance recoveries through 2018 to the extent funds are available. Policies issued prior to March 23, 2010 are considered grandfathered policies and are exempt from the 3Rs. Certain states have allowed non-grandfathered policies issued prior to January 1, 2014 to extend the date of required transition to policies compliant with the Health Care Reform Law to as late as 2017. Accordingly, such policies are exempt from the 3Rs until they transition to policies compliant with the Health Care Reform Law.

The permanent risk adjustment program adjusts the premiums that commercial individual and small group health insurance issuers receive based on the demographic factors and health status of each member as derived from current year medical diagnosis as reported throughout the year. This program transfers funds from lower risk plans to higher risk plans within similar plans in the same state. The risk adjustment program is applicable to commercial individual and small group health plans (except certain exempt and grandfathered plans as discussed above) operating both inside and outside of the health insurance exchanges established under the Health Care Reform Law. Under the risk adjustment program, a risk score is assigned to each covered member to determine an average risk score at the individual and small group level by legal entity in a particular market in a state. Additionally, an average risk score is determined for the entire subject population for each market in each state. Settlements are determined on a net basis by legal entity and state. Each health insurance issuer's average risk score is compared to the state's average risk score. Plans with an average risk score below the state average will pay into a pool and health insurance issuers with an average risk score that is greater than the state average risk score will receive money from that pool. We generally rely on providers, including certain network providers who are our employees, to appropriately document all medical data, including the diagnosis codes submitted with claims, as the basis for our risk scores under the program. Our estimate of amounts receivable and/or payable under the risk adjustment program is based on our estimate of both our own and the state average risk scores. Assumptions used in these estimates include but are not limited to geographic considerations including our historical experience in markets we have participated in over a long period of time, member demographics (including age and gender for our members and other health insurance issuers), our pricing model, sales data for each metal tier (different metal tiers yield different risk scores), the mix of previously underwritten membership as compared to new members in plans compliant with the Health Care Reform Law, published third party studies, and other publicly available data including regulatory plan filings. We expect to refine our estimates as new information becomes available, including additional data released by the Department of Health and Human Services, or HHS, regarding estimates of state average risk scores. Risk adjustment is subject to audit by HHS, however, there will be no payments associated with these audits for 2014 or 2015, the first two years of the program.

The temporary risk corridor program applies to individual and small group Qualified Health Plans (or substantially equivalent plans), or QHPs, as defined by HHS, operating both inside and outside of the exchanges. Accordingly, plans subject to risk adjustment that are not QHPs, including our small group health plans, will not be subject to the risk corridor program. The risk corridor provisions limit issuer gains and losses by comparing allowable medical costs to a target amount, each defined/prescribed by HHS, and sharing the risk for allowable costs with the federal government. Allowable medical costs are adjusted for risk adjustment settlements, transitional reinsurance recoveries, and cost sharing reductions received from HHS. Variances from the target exceeding certain thresholds may result in HHS

making additional payments to us or require us to refund HHS a portion of the premiums we received. HHS guidance provides that risk corridor collections over the life of the three year program will first be applied to any shortfalls from previous benefit years before application to current year obligations.

We estimate and recognize adjustments to premiums revenue for the risk adjustment and risk corridor provisions by projecting our ultimate premium for the calendar year separately for individual and group plans by state and legal entity. Estimated calendar year settlement amounts are recognized ratably during the year and are revised each period to reflect current experience, including changes in risk scores derived from medical diagnoses submitted by providers. We record receivables or payables at the individual or group level within each state and legal entity and classify the amounts as current or long-term in our consolidated balance sheets based on the timing of expected settlement.

The transitional reinsurance program requires us to make reinsurance contributions for calendar years 2014 through 2016 to a state or HHS established reinsurance entity based on a national contribution rate per covered member as determined by HHS. While all commercial medical plans, including self-funded plans, are required to fund the reinsurance entity, only fully-insured non-grandfathered plans compliant with the Health Care Reform Law in the individual commercial market will be eligible for recoveries if individual claims exceed a specified threshold. Accordingly, we account for transitional reinsurance contributions associated with all commercial medical health plans other than these non-grandfathered individual plans as an assessment in operating costs in our consolidated statements of income. We account for contributions made by individual commercial plans compliant with the Health Care Reform Law, which are subject to recoveries, as ceded premiums (a reduction of premiums) and similarly we account for any recoveries as ceded benefits (a reduction of benefits expense) in our consolidated statements of income.

We are required to remit payment for our per member reinsurance contribution, exclusive of the portion payable to the U.S. Treasury, by January 15 of the year following the benefit year, or January 15, 2015 for the 2014 benefit year. The portion of the reinsurance contribution due to the U.S. Treasury must be paid by November 15 of the year following the benefit year, or November 15, 2015 for the 2014 benefit year. Risk adjustment calculations will be completed and HHS will notify us of recoveries due or payments owed to/from us under the risk adjustment and reinsurance programs by June 30 of the year following the benefit year. Following this notification, risk corridor calculations are then due by July 31 of the year following the benefit year. Payments due to HHS under the risk adjustment and risk corridor programs must be remitted within 30 days of notification for each program and will be collected prior to the distribution of recoveries by HHS under each program. Payment and recovery amounts will be settled with HHS annually in the second half of the year following the benefit year. Accordingly, for the 2014 benefit year, we expect to receive recoveries and/or pay amounts due under these programs in the second half of 2015.

In addition to the provisions discussed above, beginning in 2014, HHS pays us a portion of the health care costs for low-income individual members for which we assume no risk in accordance with the Health Care Reform Law. We account for these subsidies as a deposit in our consolidated balance sheets and as a financing activity in our consolidated statements of cash flows. We do not recognize premiums revenue or benefits expense for these subsidies. Receipt and payment activity is accumulated at the state and legal entity level and recorded in our consolidated balance sheets in other current assets or trade accounts payable and accrued expenses depending on the state and legal entity balance at the end of the reporting period. We will be notified of final settlement amounts by June 30 of the year following the benefit year. Receipts from HHS associated with cost sharing subsidies for which we do not assume risk were approximately $281 million, exceeding payments of $255 million by $26 million for the year ended December 31, 2014. See Note 7 for detail regarding amounts recorded to the consolidated balance sheets related to the 3Rs.

Cash and Cash Equivalents

Cash and cash equivalents include cash, time deposits, money market funds, commercial paper, other money market instruments, and certain U.S. Government securities with an original maturity of three months or less. Carrying value approximates fair value due to the short-term maturity of the investments.

Investment Securities

Investment securities, which consist entirely of debt securities, have been categorized as available for sale and, as a result, are stated at fair value. Investment securities available for current operations are classified as current assets.

Investment securities available for our long-term insurance products and professional liability funding requirements, as well as restricted statutory deposits, are classified as long-term assets. For the purpose of determining gross realized gains and losses, which are included as a component of investment income in the consolidated statements of income, the cost of investment securities sold is based upon specific identification. Unrealized holding gains and losses, net of applicable deferred taxes, are included as a component of stockholders' equity and comprehensive income until realized from a sale or other-than-temporary impairment.

Under the other-than-temporary impairment model for debt securities held, we recognize an impairment loss in income in an amount equal to the full difference between the amortized cost basis and the fair value when we have the intent to sell the debt security or it is more likely than not we will be required to sell the debt security before recovery of our amortized cost basis. However, if we do not intend to sell the debt security, we evaluate the expected cash flows to be received as compared to amortized cost and determine if a credit loss has occurred. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized currently in income with the remainder of the loss recognized in other comprehensive income.

When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairment is considered using a variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. For example, with respect to mortgage and asset-backed securities, such data includes underlying loan level data and structural features such as seniority and other forms of credit enhancements. A decline in fair value is considered other-than-temporary when we do not expect to recover the entire amortized cost basis of the security. We estimate the amount of the credit loss component of a debt security as the difference between the amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate of future cash flows discounted at the implicit interest rate at the date of purchase.

Receivables and Revenue Recognition

We generally establish one-year commercial membership contracts with employer groups, subject to cancellation by the employer group on 30-day written notice. Our Medicare contracts with CMS renew annually. Our military services contracts with the federal government and our contracts with various state Medicaid programs generally are multi-year contracts subject to annual renewal provisions. Individual polices are subject to the requirements of the Health Care Reform Law as discussed previously.

Premiums Revenue

We bill and collect premium remittances from employer groups and members in our Medicare and other individual products monthly. We receive monthly premiums from the federal government and various states according to government specified payment rates and various contractual terms. Changes in revenues from CMS for our Medicare products resulting from the periodic changes in risk-adjustment scores derived from medical diagnoses for our membership are recognized when the amounts become determinable and the collectibility is reasonably assured.

Premiums revenue is estimated by multiplying the membership covered under the various contracts by the contractual rates. Premiums revenue is recognized as income in the period members are entitled to receive services, and is net of estimated uncollectible amounts, retroactive membership adjustments, and adjustments to recognize rebates under the minimum benefit ratios required under the Health Care Reform Law. We estimate policyholder rebates by projecting calendar year minimum benefit ratios for the individual, small group, and large group markets, as defined by the Health Care Reform Law using a methodology prescribed by HHS, separately by state and legal entity. Beginning in 2014, Medicare Advantage products were also subject to minimum benefit ratio requirements under the Health Care Reform Law. Estimated calendar year rebates recognized ratably during the year are revised each period to reflect current experience. Retroactive membership adjustments result from enrollment changes not yet processed, or not yet reported by an employer group or the government. We routinely monitor the collectibility of specific accounts, the aging of receivables, historical retroactivity trends, estimated rebates, as well as prevailing and anticipated economic

conditions, and reflect any required adjustments in current operations. Premiums received prior to the service period are recorded as unearned revenues.

Medicare Part D

We cover prescription drug benefits in accordance with Medicare Part D under multiple contracts with CMS. The payments we receive monthly from CMS and members, which are determined from our annual bid, represent amounts for providing prescription drug insurance coverage. We recognize premiums revenue for providing this insurance coverage ratably over the term of our annual contract. Our CMS payment is subject to risk sharing through the Medicare Part D risk corridor provisions. In addition, receipts for reinsurance and low-income cost subsidies as well as receipts for certain discounts on brand name prescription drugs in the coverage gap represent payments for prescription drug costs for which we are not at risk.

The risk corridor provisions compare costs targeted in our bids to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to us or require us to refund to CMS a portion of the premiums we received. As risk corridor provisions are considered in our overall annual bid process, we estimate and recognize an adjustment to premiums revenue related to these provisions based upon pharmacy claims experience. We record a receivable or payable at the contract level and classify the amount as current or long-term in our consolidated balance sheets based on the timing of expected settlement.

Reinsurance and low-income cost subsidies represent funding from CMS in connection with the Medicare Part D program for which we assume no risk. Reinsurance subsidies represent funding from CMS for its portion of prescription drug costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage level. Low-income cost subsidies represent funding from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts above the out-of-pocket threshold for low-income beneficiaries. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. A reconciliation and related settlement of CMS's prospective subsidies against actual prescription drug costs we paid is made after the end of the year. The Health Care Reform Law mandates consumer discounts of 50% on brand name prescription drugs for Part D plan participants in the coverage gap. These discounts are funded by CMS and pharmaceutical manufacturers while we administer the application of these funds. We account for these subsidies and discounts as a deposit in our consolidated balance sheets and as a financing activity under receipts (withdrawals) from contract deposits in our consolidated statements of cash flows. For 2014, subsidy and discount payments of $6.7 billion exceeded reimbursements of $5.8 billion by $945 million. For 2013, subsidy and discount payments of $4.8 billion exceeded reimbursements of $4.6 billion by $154 million. We do not recognize premiums revenue or benefit expenses for these subsidies or discounts. Receipt and payment activity is accumulated at the contract level and recorded in our consolidated balance sheets in other current assets or trade accounts payable and accrued expenses depending on the contract balance at the end of the reporting period.

Settlement of the reinsurance and low-income cost subsidies as well as the risk corridor payment is based on a reconciliation made approximately 9 months after the close of each calendar year. Settlement with CMS for brand name prescription drug discounts is based on a reconciliation made approximately 14 to 18 months after the close of each calendar year. We continue to revise our estimates with respect to the risk corridor provisions based on subsequent period pharmacy claims data. See Note 6 for detail regarding amounts recorded to our consolidated balance sheets related to the risk corridor settlement and subsidies from CMS.

Military Services

On April 1, 2012, we began delivering services under our current TRICARE South Region contract with the DoD. Under the terms of the current TRICARE South Region contract, the federal government retains all of the risk of the cost of health benefits and we do not record premiums revenue or benefits expense in our consolidated statements of income related to these health care costs and related reimbursements. Instead, we account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement as discussed further under our description of services revenue that follows. Our previous TRICARE South Region contract that expired on March 31, 2012 provided a financial interest in the underlying health care cost; therefore, we reported revenues on a

gross basis. We shared the risk with the federal government for the cost of health benefits incurred under our previous contract, earning more revenue or incurring additional cost based on the variance of actual health care costs from an annually negotiated target health care cost. TRICARE revenues under the previous contract consisted generally of (1) an insurance premium for assuming underwriting risk for the cost of civilian health care services delivered to eligible beneficiaries; (2) health care services provided to beneficiaries which were in turn reimbursed by the federal government; and (3) administrative services fees related to claim processing, customer service, enrollment, and other services. We recognized the insurance premium as revenue ratably over the period coverage was provided. Health care services reimbursements were recognized as revenue in the period health services were provided. Administrative services fees were recognized as revenue in the period services were performed. We deferred the recognition of any contingent revenues for favorable variances until the end of the contract period when the amount was determinable and the collectibility was reasonably assured. We estimated and recognized contingent benefits expense for unfavorable variances currently in our results of operations.

Services Revenue

Patient services revenue

Patient services include injury and illness care and related services as well as other healthcare services related to employer needs or as required by law. Patient services revenues are recognized in the period services are provided to the customer when the sales price is fixed or determinable, and are net of contractual allowances.

Administrative services fees

Administrative services fees cover the processing of claims, offering access to our provider networks and clinical programs, and responding to customer service inquiries from members of self-funded groups. Revenues from providing administration services, also known as administrative services only, or ASO, are recognized in the period services are performed and are net of estimated uncollectible amounts. ASO fees are estimated by multiplying the membership covered under the various contracts by the contractual rates. Under ASO contracts, self-funded employers retain the risk of financing substantially all of the cost of health benefits. However, many ASO customers purchase stop loss insurance coverage from us to cover catastrophic claims or to limit aggregate annual costs. Accordingly, we have recorded premiums revenue and benefits expense related to these stop loss insurance contracts. We routinely monitor the collectibility of specific accounts, the aging of receivables, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in current operations. ASO fees received prior to the service period are recorded as unearned revenues.

On April 1, 2012, we began delivering services under our current TRICARE South Region contract with the DoD. Under the current contract, we provide administrative services, including offering access to our provider networks and clinical programs, claim processing, customer service, enrollment, and other services, while the federal government retains all of the risk of the cost of health benefits. We account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement. The current contract includes fixed administrative services fees and incentive fees and penalties. Administrative services fees are recognized as services are performed.

Our TRICARE members are served by both in-network and out-of-network providers in accordance with the current contract. We pay health care costs related to these services to the providers and are subsequently reimbursed by the DoD for such payments. We account for the payments of the federal government's claims and the related reimbursements under deposit accounting in our consolidated balance sheets and as a financing activity under receipts (withdrawals) from contract deposits in our consolidated statements of cash flows. For 2014, health care cost reimbursements and payments were each approximately $3.2 billion for the year. For 2013, health care cost reimbursements were $3.2 billion, exceeding payments of $3.2 billion by $5 million. For the first nine months of the current contract, April 1, 2012 to December 31, 2012, health care cost payments were $2.1 billion, exceeding reimbursements of $2.0 billion by $56 million.

Receivables

Receivables, including premium receivables, patient services revenue receivables, and ASO fee receivables, are shown net of allowances for estimated uncollectible accounts, retroactive membership adjustments, and contractual allowances.

Policy Acquisition Costs

Policy acquisition costs are those costs that relate directly to the successful acquisition of new and renewal insurance policies. Such costs include commissions, costs of policy issuance and underwriting, and other costs we incur to acquire new business or renew existing business. We expense policy acquisition costs related to our employer-group prepaid health services policies as incurred. These short-duration employer-group prepaid health services policies typically have a 1-year term and may be cancelled upon 30 days notice by the employer group.

Life insurance, annuities, and certain health and other supplemental policies sold to individuals are accounted for as long-duration insurance products because they are expected to remain in force for an extended period beyond one year and premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. As a result, we defer policy acquisition costs, primarily consisting of commissions, and amortize them over the estimated life of the policies in proportion to premiums earned. Deferred acquisition costs are reviewed to determine if they are recoverable from future income. See Note 18.

Beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model and accordingly policy acquisition costs are expensed as incurred because premiums received in the current year are intended to pay anticipated benefits in that year.

Long-Lived Assets

Property and equipment is recorded at cost. Gains and losses on sales or disposals of property and equipment are included in operating costs. Certain costs related to the development or purchase of internal-use software are capitalized. Depreciation is computed using the straight-line method over estimated useful lives ranging from 3 to 10 years for equipment, 3 to 7 years for computer software, and 20 to 40 years for buildings. Improvements to leased facilities are depreciated over the shorter of the remaining lease term or the anticipated life of the improvement.

We periodically review long-lived assets, including property and equipment and other intangible assets, for impairment whenever adverse events or changes in circumstances indicate the carrying value of the asset may not be recoverable. Losses are recognized for a long-lived asset to be held and used in our operations when the undiscounted future cash flows expected to result from the use of the asset are less than its carrying value. We recognize an impairment loss based on the excess of the carrying value over the fair value of the asset. A long-lived asset held for sale is reported at the lower of the carrying amount or fair value less costs to sell. Depreciation expense is not recognized on assets held for sale. Losses are recognized for a long-lived asset to be abandoned when the asset ceases to be used. In addition, we periodically review the estimated lives of all long-lived assets for reasonableness.

Goodwill and Other Intangible Assets

Goodwill represents the unamortized excess of cost over the fair value of the net tangible and other intangible assets acquired. We are required to test at least annually for impairment at a level of reporting referred to as the reporting unit, and more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. A reporting unit either is our operating segments or one level below the operating segments, referred to as a component, which comprise our reportable segments. A component is considered a reporting unit if the component constitutes a business for which discrete financial information is available that is regularly reviewed by management. We aggregate the components of an operating segment into one reporting unit if they have similar economic characteristics. Goodwill is assigned to the reporting unit that is expected to benefit from a specific acquisition.

We use a two-step process to review goodwill for impairment. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any. Impairment tests are performed, at a minimum, in the fourth quarter of each year supported by our long-range business plan and annual planning process. We rely on an

evaluation of future discounted cash flows to determine fair value of our reporting units. Impairment tests completed for 2014, 2013, and 2012 did not result in an impairment loss.

Other intangible assets primarily relate to acquired customer contracts/relationships and are included with other long-term assets in the consolidated balance sheets. Other intangible assets are amortized over the useful life, based upon the pattern of future cash flows attributable to the asset. This sometimes results in an accelerated method of amortization for customer contracts because the asset tends to dissipate at a more rapid rate in earlier periods. Other than customer contracts, other intangible assets generally are amortized using the straight-line method. We review other finite-lived intangible assets for impairment under our long-lived asset policy.

Benefits Payable and Benefits Expense Recognition

Benefits expense includes claim payments, capitation payments, pharmacy costs net of rebates, allocations of certain centralized expenses and various other costs incurred to provide health insurance coverage to members, as well as estimates of future payments to hospitals and others for medical care and other supplemental benefits provided prior to the balance sheet date. Capitation payments represent monthly contractual fees disbursed to primary care and other providers who are responsible for providing medical care to members. Pharmacy costs represent payments for members' prescription drug benefits, net of rebates from drug manufacturers. Receivables for such pharmacy rebates are included in other current assets in our consolidated balance sheets. Other supplemental benefits include dental, vision, and other supplemental health and financial protection products.

We estimate the costs of our benefits expense payments using actuarial methods and assumptions based upon claim payment patterns, medical cost inflation, historical developments such as claim inventory levels and claim receipt patterns, and other relevant factors, and record benefit reserves for future payments. We continually review estimates of future payments relating to claims costs for services incurred in the current and prior periods and make necessary adjustments to our reserves.

We reassess the profitability of our contracts for providing insurance coverage to our members when current operating results or forecasts indicate probable future losses. We establish a premium deficiency liability in current operations to the extent that the sum of expected future costs, claim adjustment expenses, and maintenance costs exceeds related future premiums under contracts without consideration of investment income. For purposes of determining premium deficiencies, contracts are grouped in a manner consistent with our method of acquiring, servicing, and measuring the profitability of such contracts. Losses recognized as a premium deficiency result in a beneficial effect in subsequent periods as operating losses under these contracts are charged to the liability previously established. Because the majority of our member contracts renew annually, we do not anticipate recording a material premium deficiency liability, except when unanticipated adverse events or changes in circumstances indicate otherwise.

We believe our benefits payable are adequate to cover future claims payments required. However, such estimates are based on knowledge of current events and anticipated future events. Therefore, the actual liability could differ materially from the amounts provided.

Future policy benefits payable

Future policy benefits payable include liabilities for long-duration insurance policies including long-term care, life insurance, annuities, and certain health and other supplemental policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Interest rates are based on our expected net investment returns on the investment portfolio supporting the reserves for these blocks of business. Mortality, a measure of expected death, and morbidity, a measure of health status, assumptions are based on published actuarial tables, modified based upon actual experience. Changes in estimates of these reserves are recognized as an adjustment to benefits expense in the period the changes occur. We perform loss recognition tests at least annually in the fourth quarter, and more frequently if adverse events or changes in circumstances indicate that the level of the liability, together with the present value of future gross premiums, may not be adequate to provide for future expected policy benefits and maintenance costs. We adjust future policy benefits payable for the additional liability that would have been recorded if investment securities backing the

liability had been sold at their stated aggregate fair value and the proceeds reinvested at current yields. We include the impact of this adjustment, if any, net of applicable deferred taxes, with the change in unrealized investment gain (loss) in accumulated other comprehensive income in stockholders' equity. As discussed above, beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model under which policy reserves are not established because premiums received in the current year are intended to pay anticipated benefits in that year.

Book Overdraft

Under our cash management system, checks issued but not yet presented to banks that would result in negative bank balances when presented are classified as a current liability in the consolidated balance sheets. Changes in book overdrafts from period to period are reported in the consolidated statement of cash flows as a financing activity.

Income Taxes

We recognize an asset or liability for the deferred tax consequences of temporary differences between the tax bases of assets or liabilities and their reported amounts in the consolidated financial statements. These temporary differences will result in taxable or deductible amounts in future years when the reported amounts of the assets or liabilities are recovered or settled. We also recognize the future tax benefits such as net operating and capital loss carryforwards as deferred tax assets. A valuation allowance is provided against these deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. Future years' tax expense may be increased or decreased by adjustments to the valuation allowance or to the estimated accrual for income taxes.

We record tax benefits when it is more likely than not that the tax return position taken with respect to a particular transaction will be sustained. A liability, if recorded, is not considered resolved until the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired, or the tax position is ultimately settled through examination, negotiation, or litigation. We classify interest and penalties associated with uncertain tax positions in our provision for income taxes.

Derivative Financial Instruments

On October 29, 2012, we acquired a noncontrolling equity interest in MCCI Holdings, LLC, or MCCI, a privately held Medical Services Organization, or MSO, headquartered in Miami, Florida that coordinates medical care for Medicare Advantage and Medicaid beneficiaries primarily in Florida and Texas. Our agreement with MCCI includes a put option that would allow the controlling interest holder to put their interest to us after a specified date as well as a call option that would allow us to purchase the controlling interest after a specified date. Accordingly, we recorded, at fair value, a liability and an asset associated with the put and call, respectively. Changes in the fair value of the liability and asset during the years ended December 31, 2014, 2013, and 2012 were not material to our results of operations, financial condition, or cash flows.

At times, we may use interest-rate swap agreements to manage our exposure to interest rate risk. The differential between fixed and variable rates to be paid or received is accrued and recognized over the life of the agreements as adjustments to interest expense in the consolidated statements of income. We were not party to any interest-rate swap agreements in 2014, 2013, or 2012.

Stock-Based Compensation

We generally recognize stock-based compensation expense, as determined on the date of grant at fair value, on a straight-line basis over the period during which an employee is required to provide service in exchange for the award (the vesting period). However, for awards granted to retirement eligible employees, the compensation expense is recognized on a straight-line basis over the shorter of the requisite service period or the period from the date of grant to an employee's eligible retirement date. We estimate expected forfeitures and recognize compensation expense only for those awards which are expected to vest. We estimate the grant-date fair value of stock options using the Black-Scholes option-pricing model. In addition, we report certain tax effects of stock-based compensation as a financing activity rather than an operating activity in the consolidated statement of cash flows. Additional detail regarding our stock-based compensation plans is included in Note 13.

Earnings Per Common Share

We compute basic earnings per common share on the basis of the weighted-average number of unrestricted common shares outstanding. Diluted earnings per common share is computed on the basis of the weighted-average number of unrestricted common shares outstanding plus the dilutive effect of outstanding employee stock options and restricted shares, or units, using the treasury stock method.

Fair Value

Assets and liabilities measured at fair value are categorized into a fair value hierarchy based on whether the inputs to valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our own assumptions about the assumptions market participants would use. The fair value hierarchy includes three levels of inputs that may be used to measure fair value as described below.

Level 1 – Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt securities that are traded in an active exchange market.

Level 2 – Observable inputs other than Level 1 prices such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments as well as debt securities whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Level 3 – Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 includes assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques reflecting our own assumptions about the assumptions market participants would use as well as those requiring significant management judgment.

Fair value of actively traded debt securities are based on quoted market prices. Fair value of other debt securities are based on quoted market prices of identical or similar securities or based on observable inputs like interest rates generally using a market valuation approach, or, less frequently, an income valuation approach and are generally classified as Level 2. We obtain at least one price for each security from a third party pricing service. These prices are generally derived from recently reported trades for identical or similar securities, including adjustments through the reporting date based upon observable market information. When quoted prices are not available, the third party pricing service may use quoted market prices of comparable securities or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include benchmark yields, reported trades, credit spreads, broker quotes, default rates, and prepayment speeds. We are responsible for the determination of fair value and as such we perform analysis on the prices received from the third party pricing service to determine whether the prices are reasonable estimates of fair value. Our analysis includes a review of monthly price fluctuations as well as a quarterly comparison of the prices received from the pricing service to prices reported by our third party investment advisor. In addition, on a quarterly basis we examine the underlying inputs and assumptions for a sample of individual securities across asset classes, credit rating levels, and various durations.

Fair value of privately held debt securities, as well as auction rate securities, are estimated using a variety of valuation methodologies, including both market and income approaches, where an observable quoted market does not exist and are generally classified as Level 3. For privately-held debt securities, such methodologies include reviewing the value ascribed to the most recent financing, comparing the security with securities of publicly-traded companies in similar lines of business, and reviewing the underlying financial performance including estimating discounted cash flows. Auction rate securities are debt instruments with interest rates that reset through periodic short-term auctions. From time to time, liquidity issues in the credit markets have led to failed auctions. Given the liquidity issues, fair value could not be estimated based on observable market prices, and as such, unobservable inputs were used. For auction

rate securities, valuation methodologies include consideration of the quality of the sector and issuer, underlying collateral, underlying final maturity dates, and liquidity.

Recently Issued Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board, or FASB, issued new guidance related to discontinued operations which changes the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. The new guidance is effective for us beginning with annual and interim periods in 2015 with early adoption permitted under certain circumstances. Based upon existing facts and circumstances, the adoption of the new guidance is not expected to have a material impact on our results of operations, financial condition, or cash flows.

In May 2014, the FASB issued new guidance that amends the accounting for revenue recognition. The amendments are intended to provide a more robust framework for addressing revenue issues, improve comparability of revenue recognition practices, and improve disclosure requirements. Insurance contracts are not in the scope of this new guidance. The new guidance is effective for us beginning with annual and interim periods in 2017. We are currently evaluating the impact on our results of operations, financial condition, and cash flows.

There are no other recently issued accounting standards that apply to us or that are expected to have a material impact on our results of operations, financial condition, or cash flows.

3. ACQUISITIONS

On September 6, 2013, we acquired American Eldercare Inc., or American Eldercare, the largest provider of nursing home diversion services in the state of Florida, serving frail and elderly individuals in home and community-based settings. American Eldercare complements our core capabilities and strength in serving seniors and disabled individuals with a unique focus on individualized and integrated care, and has contracts to provide Medicaid long-term support services across the entire state of Florida. The enrollment effective dates for the various regions ranged from August 2013 to March 2014. The allocation of the purchase price resulted in goodwill of $76 million and other intangible assets of $75 million. The goodwill was assigned to the Retail segment. The other intangible assets, which primarily consist of customer contracts and technology, have a weighted average useful life of 9.3 years. Goodwill and other intangible assets are amortizable as deductible expenses for tax purposes.

On December 21, 2012, we acquired Metropolitan Health Networks, Inc., or Metropolitan, an MSO that coordinates medical care for Medicare Advantage beneficiaries and Medicaid recipients, primarily in Florida. We acquired all of the outstanding shares of Metropolitan and repaid all outstanding debt of Metropolitan for a transaction value of $851 million, plus transaction expenses. The total consideration of $851 million exceeded our estimated fair value of the net tangible assets acquired by approximately $827 million, of which we allocated $263 million to other intangible assets and $564 million to goodwill. A majority of the goodwill was assigned to the Healthcare Services segment and a portion to our Retail segment. Goodwill and other intangible assets are not amortizable as deductible expenses for tax purposes. The other intangible assets, which primarily consist of customer contracts and trade names, have a weighted average useful life of 8.4 years.

On October 29, 2012, we acquired a noncontrolling equity interest in MCCI, a privately held MSO headquartered in Miami, Florida that coordinates medical care for Medicare Advantage and Medicaid beneficiaries primarily in Florida and Texas.

The Metropolitan and MCCI transactions provide us with components of a successful integrated care delivery model that has demonstrated scalability to new markets. A substantial portion of the revenues for both Metropolitan and MCCI are derived from services provided to Humana Medicare Advantage members under capitation contracts with our health plans. In addition, Metropolitan and MCCI provide services to Medicare Advantage and Medicaid members under capitation contracts with third party health plans. Under these capitation agreements with Humana and third party health plans, Metropolitan and MCCI assume financial risk associated with these Medicare Advantage and Medicaid members.

On July 6, 2012, we acquired Humana At Home, Inc. (formerly known as SeniorBridge Family Companies, Inc.), or Humana At Home, a chronic-care provider of in-home care for seniors, expanding our existing clinical and home health capabilities and strengthening our offerings for members with complex chronic-care needs. The allocation of the purchase price resulted in goodwill of $99 million and other intangible assets of $14 million. The goodwill was assigned to the Healthcare Services segment. Goodwill and other intangible assets are not amortizable as deductible expenses for tax purposes. The other intangible assets, which primarily consist of customer contracts, trade name, and technology, have a weighted average useful life of 5.2 years.

Effective March 31, 2012, we acquired Arcadian Management Services, Inc., or Arcadian, a Medicare Advantage health maintenance organization (HMO) serving members in 15 U.S. states, increasing Medicare membership and expanding our Medicare footprint and future growth opportunities in these areas. The allocation of the purchase price resulted in goodwill of $44 million and other intangible assets of $38 million. The goodwill was assigned to the Retail segment. Goodwill and other intangible assets are not amortizable as deductible expenses for tax purposes. The other intangible assets, which primarily consist of customer contracts and provider contracts, have a weighted average useful life of 9.7 years.

The results of operations and financial condition of American Eldercare, Metropolitan, Humana At Home, and Arcadian have been included in our consolidated statements of income and consolidated balance sheets from the acquisition dates. In addition, during 2014, 2013 and 2012, we acquired other health and wellness and technology related businesses which, individually or in the aggregate, have not had, or are not expected to have, a material impact on our results of operations, financial condition, or cash flows. Acquisition-related costs recognized in each of 2014, 2013, and 2012 were not material to our results of operations. The pro forma financial information assuming the acquisitions had occurred as of the beginning of the calendar year prior to the year of acquisition, as well as the revenues and earnings generated during the current year were not material for disclosure purposes.

4. INVESTMENT SECURITIES

Investment securities classified as current and long-term were as follows at December 31, 2014 and 2013, respectively:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
		(in millions)		
December 31, 2014				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 365	$ 10	$ (1)	$ 374
Mortgage-backed securities	1,453	50	(5)	1,498
Tax-exempt municipal securities	2,931	140	(3)	3,068
Mortgage-backed securities:				
Residential	17	—	—	17
Commercial	846	16	(19)	843
Asset-backed securities	28	1	—	29
Corporate debt securities	3,432	299	(13)	3,718
Total debt securities	$ 9,072	$ 516	$ (41)	$ 9,547
December 31, 2013				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 584	$ 6	$ (6)	$ 584
Mortgage-backed securities	1,834	34	(48)	1,820
Tax-exempt municipal securities	2,911	93	(33)	2,971
Mortgage-backed securities:				
Residential	22	—	—	22
Commercial	662	20	(9)	673
Asset-backed securities	63	1	(1)	63
Corporate debt securities	3,474	223	(30)	3,667
Total debt securities	$ 9,550	$ 377	$ (127)	$ 9,800

Gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows at December 31, 2014 and 2013, respectively:

	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in millions)					
December 31, 2014						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 79	$ —	$ 80	$ (1)	$ 159	$ (1)
Mortgage-backed securities	22	—	320	(5)	342	(5)

Residential	6	—	1	—	7	—
Commercial	270	(8)	40	(1)	310	(9)
Asset-backed securities	35	(1)	—	—	35	(1)
Corporate debt securities	594	(28)	17	(2)	611	(30)
Total debt securities	$ 2,905	$ (118)	$ 141	$ (9)	$ 3,046	$ (127)

Approximately 96% of our debt securities were investment-grade quality, with a weighted average credit rating of AA- by S&P at December 31, 2014. Most of the debt securities that were below investment-grade were rated BB, the higher end of the below investment-grade rating scale. At December 31, 2014, 7% of our tax-exempt municipal securities were pre-refunded, generally with U.S. government and agency securities. Tax-exempt municipal securities that were not pre-refunded were diversified among general obligation bonds of U.S. states and local municipalities as well as special revenue bonds. General obligation bonds, which are backed by the taxing power and full faith of the issuer, accounted for 36% of the tax-exempt municipals that were not pre-refunded in the portfolio. Special revenue bonds, issued by a municipality to finance a specific public works project such as utilities, water and sewer, transportation, or education, and supported by the revenues of that project, accounted for the remaining 64% of these municipals. Our general obligation bonds are diversified across the United States with no individual state exceeding 11%. In addition, 16% of our tax-exempt securities were insured by bond insurers and had an equivalent weighted average S&P credit rating of AA exclusive of the bond insurers' guarantee. Our investment policy limits investments in a single issuer and requires diversification among various asset types.

The recoverability of our non-agency residential and commercial mortgage-backed securities is supported by factors such as seniority, underlying collateral characteristics and credit enhancements. These residential and commercial mortgage-backed securities at December 31, 2014 primarily were composed of senior tranches having high credit support, with over 99% of the collateral consisting of prime loans. The weighted average credit rating of all commercial mortgage-backed securities was AA+ at December 31, 2014.

The percentage of corporate securities associated with the financial services industry was 21% at December 31, 2014 and 23% at December 31, 2013.

All issuers of securities we own that were trading at an unrealized loss at December 31, 2014 remain current on all contractual payments. After taking into account these and other factors previously described, we believe these unrealized losses primarily were caused by an increase in market interest rates in the current markets than when the securities were purchased. At December 31, 2014, we did not intend to sell the securities with an unrealized loss position in accumulated other comprehensive income, and it is not likely that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss were not other-than-temporarily impaired at December 31, 2014.

The detail of realized gains (losses) related to investment securities and included within investment income was as follows for the years ended December 31, 2014, 2013, and 2012:

	2014	2013	2012
		(in millions)	
Gross realized gains	$ 29	$ 33	$ 38
Gross realized losses	(9)	(11)	(5)
Net realized capital gains	$ 20	$ 22	$ 33

There were no material other-than-temporary impairments in 2014, 2013, or 2012.

The contractual maturities of debt securities available for sale at December 31, 2014, regardless of their balance sheet classification, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	(in millions)	
Due within one year	$ 530	$ 534
Due after one year through five years	2,060	2,164
Due after five years through ten years	2,036	2,145
Due after ten years	2,102	2,317
Mortgage and asset-backed securities	2,344	2,387
Total debt securities	$ 9,072	$ 9,547

5. FAIR VALUE

Financial Assets

The following table summarizes our fair value measurements at December 31, 2014 and 2013, respectively, for financial assets measured at fair value on a recurring basis:

	Fair Value	Fair Value Measurements Using		
		Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
		(in millions)		
December 31, 2014				
Cash equivalents	$ 1,712	$ 1,712	$ —	$ —
Debt securities:				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	374	—	374	—
Mortgage-backed securities	1,498	—	1,498	—
Tax-exempt municipal securities	3,068	—	3,060	8
Mortgage-backed securities:				
Residential	17	—	17	—
Commercial	843	—	843	—
Asset-backed securities	29	—	28	1
Corporate debt securities	3,718	—	3,695	23
Total debt securities	9,547	—	9,515	32
Total invested assets	$ 11,259	$ 1,712	$ 9,515	$ 32
December 31, 2013				
Cash equivalents	$ 876	$ 876	$ —	$ —
Debt securities:				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	584	—	584	—
Mortgage-backed securities	1,820	—	1,820	—
Tax-exempt municipal securities	2,971	—	2,958	13
Mortgage-backed securities:				
Residential	22	—	22	—
Commercial	673	—	673	—
Asset-backed securities	63	—	62	1
Corporate debt securities	3,667	—	3,644	23
Total debt securities	9,800	—	9,763	37
Total invested assets	$ 10,676	$ 876	$ 9,763	$ 37

There were no material transfers between Level 1 and Level 2 during 2014 or 2013.

Our Level 3 assets had a fair value of $32 million at December 31, 2014, or 0.3% of our total invested assets. During the years ended December 31, 2014, 2013, and 2012, the changes in the fair value of the assets measured using significant unobservable inputs (Level 3) were comprised of the following:

	For the years ended December 31,								
	2014			2013			2012		
	Private Placements	Auction Rate Securities	Total	Private Placements	Auction Rate Securities	Total	Private Placements	Auction Rate Securities	Total
	(in millions)								
Beginning balance at January 1	$ 24	$ 13	$ 37	$ 25	$ 13	$ 38	$ 25	$ 16	$ 41
Total gains or losses:									
Realized in earnings	—	—	—	—	—	—	—	—	—
Unrealized in other comprehensive income	—	—	—	—	—	—	—	—	—
Purchases	—	—	—	—	—	—	—	—	—

Settlements	—	—	—	(1)	—	(1)	—	—	—
Balance at December 31	$ 24	$ 8	$ 32	$ 24	$ 13	$ 37	$ 25	$ 13	$ 38

Financial Liabilities

Our long-term debt, recorded at carrying value in our consolidated balance sheets, was $3,825 million at December 31, 2014 and $2,600 million at December 31, 2013. The fair value of our long-term debt was $4,102 million at December 31, 2014 and $2,751 million at December 31, 2013. The fair value of our long-term debt is determined based on Level 2 inputs, including quoted market prices for the same or similar debt, or if no quoted market prices are available, on the current prices estimated to be available to us for debt with similar terms and remaining maturities.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

As disclosed in Note 3, we completed our acquisitions of American Eldercare, Metropolitan, SeniorBridge, Arcadian, and other companies during 2014, 2013, and 2012. The values of net tangible assets acquired and the resulting goodwill and other intangible assets were recorded at fair value using Level 3 inputs. The majority of the related tangible assets acquired and liabilities assumed were recorded at their carrying values as of the respective dates of acquisition, as their carrying values approximated their fair values due to their short-term nature. The fair values of goodwill and other intangible assets acquired in these acquisitions were internally estimated primarily based on the income approach. The income approach estimates fair value based on the present value of the cash flows that the assets are expected to generate in the future. We developed internal estimates for the expected cash flows and discount rates in the present value calculations. Other than assets acquired and liabilities assumed in these acquisitions, there were no assets or liabilities measured at fair value on a nonrecurring basis during 2014, 2013, or 2012.

6. MEDICARE PART D

As discussed in Note 2, we cover prescription drug benefits in accordance with Medicare Part D under multiple contracts with CMS. The consolidated balance sheets include the following amounts associated with Medicare Part D as of December 31, 2014 and 2013:

	2014		2013	
	Risk Corridor Settlement	CMS Subsidies/ Discounts	Risk Corridor Settlement	CMS Subsidies/ Discounts
	(in millions)			
Other current assets	$ 105	$ 1,690	$ 45	$ 743
Trade accounts payable and accrued expenses	(36)	(32)	(71)	(30)
Net current asset (liability)	$ 69	$ 1,658	$ (26)	$ 713

7. COMMERCIAL 3Rs

The accompanying consolidated balance sheets include the following amounts associated with the 3Rs at December 31, 2014. No such amounts were recorded in our consolidated balance sheet at December 31, 2013 as the programs were not effective until January 1, 2014.

	2014		
	Risk Adjustment Settlement	Reinsurance Recoverables	Risk Corridor Settlement
		(in millions)	
Premiums receivable	$ 131	$ —	$ —
Other current assets	—	586	55
Trade accounts payable and accrued expenses	(89)	—	(4)
Net current asset	$ 42	$ 586	$ 51

8. PROPERTY AND EQUIPMENT, NET

Property and equipment was comprised of the following at December 31, 2014 and 2013:

	2014	2013
	(in millions)	
Land	$ 20	$ 20
Buildings and leasehold improvements	763	693
Equipment	709	639
Computer software	1,714	1,396
	3,206	2,748
Accumulated depreciation	(1,787)	(1,530)
Property and equipment, net	$ 1,419	$ 1,218

Depreciation expense was $328 million in 2014, $309 million in 2013, and $263 million in 2012, including amortization expense for capitalized internally developed and purchased software of $191 million in 2014, $172 million in 2013, and $151 million in 2012.

9. GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amount of goodwill for our reportable segments has been retrospectively adjusted to conform to the 2014 segment change discussed in Note 2. Changes in the carrying amount of goodwill for our reportable segments for the years ended December 31, 2014 and 2013 were as follows:

	Retail	Employer Group	Healthcare Services	Other Businesses	Total
			(in millions)		
Balance at December 31, 2012	$ 931	$ 363	$ 2,254	$ 92	$ 3,640
Acquisitions	76	—	40	—	116
Dispositions	—	—	(17)	—	(17)
Subsequent payments/adjustments	—	—	(6)	—	(6)
Balance at December 31, 2013	1,007	363	2,271	92	3,733
Acquisitions	—	—	19	—	19
Dispositions	—	—	(40)	—	(40)
Subsequent payments/adjustments	—	—	(1)	—	(1)
Balance at December 31, 2014	$ 1,007	$ 363	$ 2,249	$ 92	$ 3,711

The following table presents details of our other intangible assets included in other long-term assets in the accompanying consolidated balance sheets at December 31, 2014 and 2013:

	Weighted Average Life	2014			2013		
		Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
				(in millions)			
Other intangible assets:							
Customer contracts/relationships	9.8 years	$ 764	$ 368	$ 396	$ 792	$ 310	$ 482
Trade names and technology	13.2 years	198	66	132	200	40	160
Provider contracts	15.0 years	51	21	30	51	23	28
Noncompetes and other	6.5 years	51	37	14	52	29	23
Total other intangible assets	10.5 years	$ 1,064	$ 492	$ 572	$ 1,095	$ 402	$ 693

Amortization expense for other intangible assets was approximately $121 million in 2014, $117 million in 2013, and $75 million in 2012. The following table presents our estimate of amortization expense for each of the five next succeeding fiscal years:

	(in millions)
For the years ending December 31,:	
2015	$ 101
2016	94
2017	85
2018	78
2019	66

10. BENEFITS PAYABLE

Activity in benefits payable, excluding military services, was as follows for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
		(in millions)	
Balances at January 1	$ 3,893	$ 3,775	$ 3,415
Acquisitions	—	5	66
Incurred related to:			
Current year	38,641	32,711	30,198
Prior years	(518)	(474)	(257)
Total incurred	38,123	32,237	29,941
Paid related to:			
Current year	(34,357)	(29,103)	(26,738)
Prior years	(3,262)	(3,021)	(2,909)
Total paid	(37,619)	(32,124)	(29,647)
Reinsurance recoverable	78	—	—
Balances at December 31	$ 4,475	$ 3,893	$ 3,775

Amounts incurred related to prior years vary from previously estimated liabilities as the claims ultimately are settled. Negative amounts reported for incurred related to prior years result from claims being ultimately settled for amounts less than originally estimated (favorable development).

Actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $518 million in 2014, $474 million in 2013, and $257 million in 2012. The favorable medical claims reserve development for 2014, 2013, and 2012 primarily reflects the consistent application of trend and completion factors estimated using an assumption of moderately adverse conditions. The improvements during 2014 and 2013 resulted from increased membership and favorable medical claims reserve development due to better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

Benefits expense associated with military services and provisions associated with future policy benefits excluded from the previous table was as follows for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
		(in millions)	
Military services	$ 11	$ (27)	$ 908
Future policy benefits	32	354	136
Total	$ 43	$ 327	$ 1,044

Military services benefit expense for 2014 reflects expenses associated with our contracts with the Veterans Administration. Military services benefit expense for 2013 reflects the beneficial effect of a favorable settlement of contract claims with the DoD partially offset by expenses associated with our contracts with the Veterans Administration. Due to the transition to the current TRICARE South Region contract on April 1, 2012, which is accounted for as an administrative services only contract as more fully described in Note 2 there was no military services benefits payable at December 31, 2014 or 2013. This transition is also the primary reason for the decline in military services benefits expense from 2012 to 2013.

The higher benefits expense associated with future policy benefits payable during 2013 relates to reserve strengthening for our closed block of long-term care insurance policies acquired in connection with the 2007 KMG America Corporation, or KMG, acquisition more fully described in Note 18.

11. INCOME TAXES

The provision for income taxes consisted of the following for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
		(in millions)	
Current provision:			
Federal	$ 1,006	$ 595	$ 708
States and Puerto Rico	81	53	61
Total current provision	1,087	648	769
Deferred (benefit) provision	(64)	42	(80)
Provision for income taxes	$ 1,023	$ 690	$ 689

The provision for income taxes was different from the amount computed using the federal statutory rate for the years ended December 31, 2014, 2013 and 2012 due to the following:

	2014	2013	2012
		(in millions)	
Income tax provision at federal statutory rate	$ 759	$ 672	$ 669
States, net of federal benefit, and Puerto Rico	48	32	27
Tax exempt investment income	(27)	(26)	(26)
Health insurer fee	204	—	—
Nondeductible executive compensation	22	6	14
Other, net	17	6	5
Provision for income taxes	$ 1,023	$ 690	$ 689

The provision for income taxes for 2014, 2013, and 2012 reflects a $22 million, $6 million, and $14 million, respectively, estimated impact from limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law.

As of December 31, 2014, we do not have material uncertain tax positions reflected in our consolidated balance sheet.

Deferred income tax balances reflect the impact of temporary differences between the tax bases of assets or liabilities and their reported amounts in our consolidated financial statements, and are stated at enacted tax rates expected to be in effect when the reported amounts are actually recovered or settled. Principal components of our net deferred tax balances at December 31, 2014 and 2013 were as follows:

	Assets (Liabilities)	
	2014	2013
	(in millions)	
Future policy benefits payable	$ 320	$ 303
Compensation and other accrued expenses	176	185
Benefits payable	138	111
Net operating loss carryforward	52	51
Deferred acquisition costs	57	46
Unearned premiums	21	10
Other	18	10
Total deferred income tax assets	782	716
Valuation allowance	(48)	(28)
Total deferred income tax assets, net of valuation allowance	734	688
Depreciable property and intangible assets	(410)	(453)
Investment securities	(168)	(78)
Prepaid expenses	(55)	(83)
Total deferred income tax liabilities	(633)	(614)
Total net deferred income tax assets (liabilities)	$ 101	$ 74
Amounts recognized in the consolidated balance sheets:		
Other current assets	$ 87	$ 60
Other long-term assets	14	14
Trade accounts payable and accrued expenses	—	—
Total net deferred income tax assets (liabilities)	$ 101	$ 74

At December 31, 2014, we had approximately $141 million of net operating losses to carry forward related to prior acquisitions and our Puerto Rico subsidiaries. These net operating loss carryforwards, if not used to offset future taxable income, will expire from 2015 through 2033. Due to limitations and uncertainty regarding our ability to use some of the carryforwards, a valuation allowance was established on $108 million of these net operating loss carryforwards and $20 million of other items related to Puerto Rico. For the remainder of the net operating loss carryforwards and other cumulative temporary differences, based on our historical record of producing taxable income and profitability, we have concluded that future operating income will be sufficient to give rise to tax expense to recover all deferred tax assets.

We provide for income taxes on the undistributed earnings of our Puerto Rico operations using that jurisdiction's tax rate, which has been lower historically than the U.S. statutory tax rate. Permanent investment of these earnings has resulted in cumulative unrecognized deferred tax liabilities of approximately $31 million as of December 31, 2014.

We file income tax returns in the United States and certain foreign jurisdictions. The U.S. Internal Revenue Service, or IRS, has completed its examinations of our consolidated income tax returns for 2012 and prior years. Our 2013 tax return is in the post-filing review period under the Compliance Assurance Process (CAP). Our 2014 tax return is under advance review by the IRS under CAP. With few exceptions, which are immaterial in the aggregate, we no longer are

subject to state, local and foreign tax examinations for years before 2011. As of December 31, 2014, we are not aware of any material adjustments that may be proposed.

12. DEBT

The carrying value of long-term debt outstanding was as follows at December 31, 2014 and 2013:

	2014	2013
	(in millions)	
Long-term debt:		
Senior notes:		
$500 million, 6.45% due June 1, 2016	$ —	$ 517
$500 million, 7.20% due June 15, 2018	504	505
$300 million, 6.30% due August 1, 2018	312	314
$400 million, 2.625% due October 1, 2019	400	—
$600 million, 3.15% due December 1, 2022	598	598
$600 million, 3.85% due October 1, 2024	599	—
$250 million, 8.15% due June 15, 2038	266	266
$400 million, 4.625% due December 1, 2042	400	400
$750 million, 4.95% due October 1, 2044	746	—
Total long-term debt	$ 3,825	$ 2,600

Senior Notes

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem the $500 million 6.45% senior unsecured notes as discussed below.

In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date, for cash totaling approximately $560 million. We recognized a loss on extinguishment of debt, included in interest expense, of approximately $37 million for the redemption of these notes.

Our senior notes, which are unsecured, may be redeemed at our option at any time at 100% of the principal amount plus accrued interest and a specified make-whole amount. The 7.20% and 8.15% senior notes are subject to an interest rate adjustment if the debt ratings assigned to the notes are downgraded (or subsequently upgraded). In addition, our senior notes (other than the 6.30% senior notes) contain a change of control provision that may require us to purchase the notes under certain circumstances.

Prior to 2009, we were parties to interest-rate swap agreements that exchanged the fixed interest rate under our senior notes for a variable interest rate based on LIBOR. As a result, the carrying value of the senior notes was adjusted to reflect changes in value caused by an increase or decrease in interest rates. During 2008, we terminated all of our swap agreements. The cumulative adjustment to the carrying value of our senior notes was $103 million as of the termination date which is being amortized as a reduction to interest expense over the remaining term of the senior notes. In October 2014, the redemption of our 6.45% senior notes reduced the unamortized carrying value adjustment by $12 million. The unamortized carrying value adjustment was $32 million as of December 31, 2014 and $54 million as of December 31, 2013.

Credit Agreement

Our 5-year $1.0 billion unsecured revolving credit agreement expires July 2018. Under the credit agreement, at our option, we can borrow on either a competitive advance basis or a revolving credit basis. The revolving credit portion bears interest at either LIBOR plus a spread or the base rate plus a spread. The LIBOR spread, currently 110 basis points, varies depending on our credit ratings ranging from 90 to 150 basis points. We also pay an annual facility fee regardless of utilization. This facility fee, currently 15 basis points, may fluctuate between 10 and 25 basis points, depending upon our credit ratings. The competitive advance portion of any borrowings will bear interest at market rates prevailing at the time of borrowing on either a fixed rate or a floating rate based on LIBOR, at our option.

The terms of the credit agreement include standard provisions related to conditions of borrowing, including a customary material adverse effect clause which could limit our ability to borrow additional funds. In addition, the credit agreement contains customary restrictive and financial covenants as well as customary events of default, including financial covenants regarding the maintenance of a minimum level of net worth of $7.8 billion at December 31, 2014 and a maximum leverage ratio of 3.0:1. We are in compliance with the financial covenants, with actual net worth of $9.6 billion and actual leverage ratio of 1.4:1, as measured in accordance with the credit agreement as of December 31, 2014. In addition, the credit agreement includes an uncommitted $250 million incremental loan facility.

At December 31, 2014, we had no borrowings outstanding under the credit agreement. We have outstanding letters of credit of $4 million issued under the credit agreement at December 31, 2014. No amounts have been drawn on these letters of credit. Accordingly, as of December 31, 2014, we had $996 million of remaining borrowing capacity under the credit agreement, none of which would be restricted by our financial covenant compliance requirement. We have other customary, arms-length relationships, including financial advisory and banking, with some parties to the credit agreement.

Commercial Paper

In October 2014, we entered into a commercial paper program pursuant to which we may issue short-term, unsecured commercial paper notes privately placed on a discount basis through certain broker dealers. Amounts available under the program may be borrowed, repaid and re-borrowed from time to time, with the aggregate face or principal amounts outstanding under the program at any time not to exceed $1 billion. The net proceeds of issuances have been and are expected to be used for general corporate purposes, including to repurchase shares of our common stock. The maximum principal amount of commercial paper borrowings outstanding at any one time during the year ended December 31, 2014 was $175 million. There were no outstanding borrowings at December 31, 2014.

13. EMPLOYEE BENEFIT PLANS

Employee Savings Plan

We have defined contribution retirement savings plans covering eligible employees which include matching contributions based on the amount of our employees' contributions to the plans. The cost of these plans amounted to approximately $176 million in 2014, $155 million in 2013, and $138 million in 2012, all of which was funded currently to the extent it was deductible for federal income tax purposes. The Company's cash match is invested pursuant to the participant's contribution direction. Based on the closing price of our common stock of $143.63 on December 31, 2014, approximately 13% of the retirement and savings plan's assets were invested in our common stock, or approximately 2.8 million shares, representing 2% of the shares outstanding as of December 31, 2014. At December 31, 2014, approximately 4.1 million shares of our common stock were reserved for issuance under our defined contribution retirement savings plans.

Stock-Based Compensation

We have plans under which options to purchase our common stock and restricted stock, including both restricted stock units and restricted stock awards, have been granted to executive officers, directors and key employees. The terms and vesting schedules for stock-based awards vary by type of grant. Generally, the awards vest upon time-based conditions. The stock awards of retirement-eligible participants will continue to vest upon retirement from the Company. Our equity award program includes a retirement provision that generally treats employees with a combination of age and years of services with the Company totaling 65 or greater, with a minimum required age of 55 and a minimum requirement of 5 years of service, as retirement-eligible. Upon exercise, stock-based compensation awards are settled with authorized but unissued company stock or treasury stock. The compensation expense that has been charged against income for these plans was as follows for the years ended December 31, 2014, 2013, and 2012:

	2014	2013	2012
		(in millions)	
Stock-based compensation expense by type:			
Restricted stock	$ 91	$ 84	$ 66
Stock options	7	8	16
Total stock-based compensation expense	98	92	82
Tax benefit recognized	(22)	(22)	(21)
Stock-based compensation expense, net of tax	$ 76	$ 70	$ 61

The tax benefit recognized in our consolidated financial statements is based on the amount of compensation expense recorded for book purposes. The actual tax benefit realized in our tax return is based on the intrinsic value, or the excess of the market value over the exercise or purchase price, of stock options exercised and restricted stock vested during the period. The actual tax benefit realized for the deductions taken on our tax returns from option exercises and restricted stock vesting totaled $30 million in 2014, $20 million in 2013, and $43 million in 2012. There was no capitalized stock-based compensation expense during these years.

At December 31, 2014, there were 19.3 million shares reserved for stock award plans. These reserved shares included giving effect to, under the 2011 Plan, 10.6 million shares of common stock available for future grants assuming all stock options were granted or 4.6 million shares available for future grants assuming all restricted stock were granted. Shares may be issued from authorized but unissued company stock or treasury stock.

Restricted Stock

Restricted stock is granted with a fair value equal to the market price of our common stock on the date of grant and generally vests three years from the date of grant. Certain restricted stock units have forfeitable dividend equivalent rights equal to the dividend paid on common stock. The weighted-average grant date fair value of our restricted stock was $103.57 in 2014, $73.50 in 2013, and $85.29 in 2012. Activity for our restricted stock was as follows for the year ended December 31, 2014:

	Shares	Weighted-Average Grant-Date Fair Value
	(shares in thousands)	
Nonvested restricted stock at December 31, 2013	3,642	$ 71.84
Granted	1,264	103.57
Vested	(972)	62.68
Forfeited	(299)	75.38
Nonvested restricted stock at December 31, 2014	3,635	$ 85.52

The fair value of shares vested was $99 million during 2014, $52 million during 2013, and $75 million during 2012. Total compensation expense not yet recognized related to nonvested restricted stock was $92 million at December 31, 2014. We expect to recognize this compensation expense over a weighted-average period of approximately 1.7 years. There are no other contractual terms covering restricted stock once vested.

Stock Options

Stock options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant. Our stock plans, as approved by the Board of Directors and stockholders, define fair market value as the average of the highest and lowest stock prices reported on the composite tape by the New York Stock Exchange on a given date. Exercise provisions vary, but most options vest in whole or in part 1 to 3 years after grant and expire 7 to 10 years after grant.

The weighted-average fair value of each option granted during 2014, 2013, and 2012 is provided below. The fair value was estimated on the date of grant using the Black-Scholes pricing model with the weighted-average assumptions indicated below:

	2014	2013	2012
Weighted-average fair value at grant date	$ 22.45	$ 21.80	$ 30.15
Expected option life (years)	4.3 years	4.4 years	4.4 years
Expected volatility	27.6%	38.8%	46.3%
Risk-free interest rate at grant date	1.3%	0.8%	0.8%
Dividend yield	1.1%	1.5%	1.2%

When valuing employee stock options, we stratify the employee population into three homogenous groups that historically have exhibited similar exercise behaviors. These groups are executive officers, directors, and all other employees. We value the stock options based on the unique assumptions for each of these employee groups.

We calculate the expected term for our employee stock options based on historical employee exercise behavior and base the risk-free interest rate on a traded zero-coupon U.S. Treasury bond with a term substantially equal to the option's expected term.

The volatility used to value employee stock options is based on historical volatility. We calculate historical volatility using a simple-average calculation methodology based on daily price intervals as measured over the expected term of the option.

Activity for our option plans was as follows for the year ended December 31, 2014:

	Shares Under Option	Weighted-Average Exercise Price
	(shares in thousands)	
Options outstanding at December 31, 2013	1,272	$ 72.81
Granted	244	102.91
Exercised	(715)	72.27
Forfeited	(33)	82.78
Options outstanding at December 31, 2014	768	$ 82.45
Options exercisable at December 31, 2014	179	$ 67.57

As of December 31, 2014, outstanding stock options, substantially all of which are expected to vest, had an aggregate intrinsic value of $49 million, and a weighted-average remaining contractual term of 4.4 years. As of December 31, 2014, exercisable stock options had an aggregate intrinsic value of $14 million, and a weighted-average remaining contractual term of 3.1 years. The total intrinsic value of stock options exercised during 2014 was $32 million, compared

with $39 million during 2013 and $45 million during 2012. Cash received from stock option exercises totaled $52 million in 2014, $67 million in 2013, and $60 million in 2012.

Total compensation expense not yet recognized related to nonvested options was $6 million at December 31, 2014. We expect to recognize this compensation expense over a weighted-average period of approximately 1.6 years.

14. EARNINGS PER COMMON SHARE COMPUTATION

Detail supporting the computation of basic and diluted earnings per common share was as follows for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
	(dollars in millions, except per common share results, number of shares/options in thousands)		
Net income available for common stockholders	$ 1,147	$ 1,231	$ 1,222
Weighted-average outstanding shares of common stock used to compute basic earnings per common share	154,187	157,503	161,484
Dilutive effect of:			
Employee stock options	230	322	576
Restricted stock	1,457	1,326	1,397
Shares used to compute diluted earnings per common share	155,874	159,151	163,457
Basic earnings per common share	$ 7.44	$ 7.81	$ 7.56
Diluted earnings per common share	$ 7.36	$ 7.73	$ 7.47
Number of antidilutive stock options and restricted stock awards excluded from computation	320	704	754

15. STOCKHOLDERS' EQUITY

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2012, 2013, and 2014 under our Board approved quarterly cash dividend policy:

Payment Date	Amount per Share	Total Amount
		(in millions)
2012	$1.02	$165
2013	$1.06	$167
2014	$1.10	$170

In October 2014, the Board declared a cash dividend of $0.28 per share that was paid on January 30, 2015 to stockholders of record on December 31, 2014, for an aggregate amount of $42 million. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

Stock Repurchases

In September 2014, the Board of Directors replaced a previous share repurchase authorization of up to $1 billion (of which $816 million remained unused) with the current authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2016. Under the new share repurchase authorization, shares may be purchased from time to time at prevailing prices in the open market, by block purchases, or in privately-negotiated transactions (including pursuant to accelerated share repurchase agreements with investment banks), subject to certain regulatory restrictions on volume, pricing, and timing. During 2014, we repurchased 1.60 million shares in open market transactions for $195 million at an average price of $121.68 under previous share repurchase authorizations and we repurchased 4.10 million shares in open market transactions for $535 million at an average price of $130.42 under the current authorization, including $400 million of shares repurchased under an accelerated stock repurchase, or ASR, agreement described further below. During 2013, we repurchased 5.77 million shares in open market transactions for $502 million at an average price of $86.97 under previous share repurchase authorizations. During 2012, we repurchased 6.25 million shares in open market transactions for $460 million at an average price of $73.66 under previous share repurchase authorizations. As of February 18, 2015, the remaining authorized amount under the current authorization totaled $1.37 billion, which includes $100 million of stock held back as part of the accelerated share repurchase agreement as more fully described below.

On November 7, 2014, we announced that we had entered into an accelerated share repurchase agreement, or ASR Agreement, with Goldman, Sachs & Co., or Goldman Sachs, to repurchase $500 million of our common stock as part of the $2 billion share repurchase program authorized in September 2014. Under the ASR Agreement, on November 10, 2014, we made a payment of $500 million to Goldman Sachs from available cash on hand and received an initial delivery of 3.06 million shares of our common stock from Goldman Sachs based on the then current market price of Humana common stock. The payment to Goldman Sachs was recorded as a reduction to stockholders' equity, consisting of a $400 million increase in treasury stock, which reflects the value of the initial 3.06 million shares received upon initial settlement, and a $100 million decrease in capital in excess of par value, which reflects the value of stock held back by Goldman Sachs pending final settlement of the ASR Agreement. The final number of shares that we may receive, or be required to remit, under the ASR Agreement will be determined based on the daily volume-weighted average share price of our common stock over the term of the ASR Agreement, less a discount and subject to adjustments pursuant to the terms and conditions of the ASR Agreement. Final settlement under the ASR Agreement will occur by the end of the first quarter of 2015. The ASR agreement contains provisions customary for agreements of this type, including provisions for adjustments to the transaction terms upon certain specified events, the circumstances generally under which final settlement of the ASR Agreement may be accelerated or extended or the ASR agreement may be terminated early by Goldman Sachs or us, and various acknowledgments and representations made by the parties to each other. At final settlement, under certain circumstances, we may be entitled to receive additional shares of our

common stock from Goldman Sachs or we may be required to make a payment. If we are obligated to make a payment, we may elect to satisfy such obligation in cash or shares of our common stock. The obligations of Goldman Sachs under the ASR agreement are guaranteed by The Goldman Sachs Group, Inc.

In connection with employee stock plans, we acquired 0.4 million common shares for $42 million in 2014, 0.3 million common shares for $29 million in 2013, and 0.7 million common shares for $58 million in 2012.

Regulatory Requirements

Certain of our insurance subsidiaries operate in states that regulate the payment of dividends, loans, or other cash transfers to Humana Inc., our parent company, and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these insurance subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

Although minimum required levels of equity are largely based on premium volume, product mix, and the quality of assets held, minimum requirements vary significantly at the state level. Our state regulated insurance subsidiaries had aggregate statutory capital and surplus of approximately $6.0 billion and $5.5 billion as of December 31, 2014 and 2013, respectively, which exceeded aggregate minimum regulatory requirements of $4.1 billion and $3.5 billion, respectively. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2015 is approximately $800 million in the aggregate. This compares to dividends that were paid to our parent company in 2014 of approximately $927 million.

16. COMMITMENTS, GUARANTEES AND CONTINGENCIES

Leases

We lease facilities, computer hardware, and other furniture and equipment under long-term operating leases that are noncancelable and expire on various dates through 2027. We sublease facilities or partial facilities to third party tenants for space not used in our operations. Rent with scheduled escalation terms are accounted for on a straight-line basis over the lease term. Rent expense and sublease rental income, which are recorded net as an operating cost, for all operating leases were as follows for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
		(in millions)	
Rent expense	$ 226	$ 227	$ 218
Sublease rental income	(14)	(11)	(11)
Net rent expense	$ 212	$ 216	$ 207

Future annual minimum payments due subsequent to December 31, 2014 under all of our noncancelable operating leases with initial terms in excess of one year are as follows:

	Minimum Lease Payments	Sublease Rental Receipts	Net Lease Commitments
		(in millions)	
For the years ending December 31,:			
2015	$ 232	$ (17)	$ 215
2016	198	(16)	182
2017	163	(15)	148
2018	110	(13)	97
2019	78	(9)	69
Thereafter	364	(9)	355
Total	$ 1,145	$ (79)	$ 1,066

Purchase Obligations

We have agreements to purchase services, primarily information technology related services, or to make improvements to real estate, in each case that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum levels of service to be purchased; fixed, minimum or variable price provisions; and the appropriate timing of the transaction. We have purchase obligation commitments of $94 million in 2015, $45 million in 2016, $20 million in 2017, $16 million in 2018, and none thereafter. Purchase obligations exclude agreements that are cancelable without penalty.

Off-Balance Sheet Arrangements

As part of our ongoing business, we do not participate or knowingly seek to participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, or SPEs, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of December 31, 2014, we were not involved in any SPE transactions.

Guarantees and Indemnifications

Through indemnity agreements approved by the state regulatory authorities, certain of our regulated subsidiaries generally are guaranteed by Humana Inc., our parent company, in the event of insolvency for (1) member coverage for which premium payment has been made prior to insolvency; (2) benefits for members then hospitalized until discharged; and (3) payment to providers for services rendered prior to insolvency. Our parent also has guaranteed the obligations of our military services subsidiaries.

In the ordinary course of business, we enter into contractual arrangements under which we may agree to indemnify a third party to such arrangement from any losses incurred relating to the services they perform on behalf of us, or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. Such indemnification obligations may not be subject to maximum loss clauses. Historically, payments made related to these indemnifications have been immaterial.

Government Contracts

Our Medicare products, which accounted for approximately 72% of our total premiums and services revenue for the year ended December 31, 2014, primarily consisted of products covered under the Medicare Advantage and Medicare Part D Prescription Drug Plan contracts with the federal government. These contracts are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year

in which the contract would end. All material contracts between Humana and CMS relating to our Medicare products have been renewed for 2015, and all of our product offerings filed with CMS for 2015 have been approved.

CMS uses a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity of covered members. The risk-adjustment model pays more for enrollees with predictably higher costs. Under this model, rates paid to MA plans are based on actuarially determined bids, which include a process whereby our prospective payments are based on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's traditional fee-for-service Medicare program (referred to as "Medicare FFS"). Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses the diagnosis data to calculate the risk-adjusted premium payment to MA plans, which CMS adjusts for coding pattern differences between the health plans and the government fee-for-service program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on these providers to document appropriately all medical data, including the diagnosis data submitted with claims. In addition, we conduct medical record reviews as part of our data and payment accuracy compliance efforts, to more accurately reflect diagnosis conditions under the risk adjustment model. These compliance efforts include the internal contract level audits described in more detail below.

CMS is continuing to perform audits of various companies' selected MA contracts related to this risk adjustment diagnosis data. We refer to these audits as Risk-Adjustment Data Validation Audits, or RADV audits. RADV audits review medical records in an attempt to validate provider medical record documentation and coding practices which influence the calculation of premium payments to MA plans.

In 2012, CMS released a "Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation (RADV) Contract-Level Audits." The payment error calculation methodology provides that, in calculating the economic impact of audit results for an MA contract, if any, the results of the audit sample will be extrapolated to the entire MA contract based upon a comparison to "benchmark" audit data in Medicare FFS (which we refer to as the "FFS Adjuster"). This comparison to the Medicare FFS benchmark audit is necessary to determine the economic impact, if any, of audit results because the government program data set, including any attendant errors that are present in that data set, provides the basis for MA plans' risk adjustment to payment rates. CMS already makes other adjustments to payment rates based on a comparison of coding pattern differences between MA plans and Medicare FFS data (such as for frequency of coding for certain diagnoses in MA plan data versus the government program data set).

The final methodology, including the first application of extrapolated audit results to determine audit settlements, is expected to be applied to the current round of RADV contract level audits being conducted on 2011 premium payments. Selected MA contracts will be notified of an audit at some point after the close of the final reconciliation for the payment year being audited. The final reconciliation occurs in August of the calendar year following the payment year. We have been notified that certain of our Medicare Advantage contracts have been selected for audit for contract year 2011.

Estimated audit settlements are recorded as a reduction of premiums revenue in our consolidated statements of income, based upon available information. We perform internal contract level audits based on the RADV audit methodology prescribed by CMS. Included in these internal contract level audits is an audit of our Private Fee-For-Service business which we used to represent a proxy of the benchmark audit data in Medicare FFS which has not yet been released. We based our accrual of estimated audit settlements for contract years 2011 (the first year that application of extrapolated audit results is applicable) through 2014 on the results of these internal contract level audits and update our estimates as each audit is completed. Estimates derived from these results were not material to our results of operations, financial position, or cash flows. However, as indicated, we are awaiting additional guidance from CMS regarding the benchmark audit data in Medicare FFS. Accordingly, we cannot determine whether such RADV audits will have a material adverse effect on our results of operations, financial position, or cash flows.

In addition, CMS' comments in formalized guidance regarding "overpayments" to MA plans appear to be inconsistent with CMS' prior RADV audit guidance. These statements, contained in the preamble to CMS' final rule release regarding Medicare Advantage and Part D prescription drug benefit program regulations for Contract Year 2015,

appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the FFS Adjuster referenced above. We will continue to work with CMS to ensure that MA plans are paid accurately and that payment model principles are in accordance with the requirements of the Social Security Act, which, if not implemented correctly could have a material adverse effect on our results of operations, financial position, or cash flows.

At December 31, 2014, our military services business, which accounted for approximately 1% of our total premiums and services revenue for the year ended December 31, 2014, primarily consisted of the TRICARE South Region contract. The current five-year South Region contract, which expires March 31, 2017, is subject to annual renewals on April 1 of each year during its term at the government's option. On January 27, 2015, we received notice from the Defense Health Agency, or DHA, of its intent to exercise its option to extend the TRICARE South Region contract through March 31, 2016.

The loss of any of the contracts above or significant changes in these programs as a result of legislative or regulatory action, including reductions in premium payments to us, regulatory restrictions on profitability, including by comparison of our Medicare Advantage profitability to our non-Medicare Advantage business profitability and a requirement that they remain within certain ranges of each other, or increases in member benefits without corresponding increases in premium payments to us, may have a material adverse effect on our results of operations, financial position, and cash flows.

Our state-based Medicaid business accounted for approximately 2% of our total premiums and services revenue for the year ended December 31, 2014. In addition to our state-based Medicaid contracts in Florida and Kentucky, we have contracts in Illinois and Virginia for stand-alone dual eligible demonstration programs serving individuals dually eligible for both the federal Medicare program and the applicable state-based Medicaid program. We began serving members in Illinois in the first quarter of 2014 and in Virginia in the second quarter of 2014. In addition, we began serving members in Long-Term Care Support Services (LTSS) regions in Florida at various effective dates ranging from the second half of 2013 through the first quarter of 2014.

On June 26, 2013, the Puerto Rico Health Insurance Administration notified us of its election not to renew our three-year Medicaid contracts for the East, Southeast, and Southwest regions which ended June 30, 2013. Contractual transition provisions required the continuation of insurance coverage for beneficiaries through September 30, 2013 and also required an additional period of time thereafter to process residual claims.

Legal Proceedings and Certain Regulatory Matters

Florida Matters

On December 16, 2010, an individual filed a qui tam suit captioned *United States of America ex rel. Marc Osheroff v. Humana et al.* in the Southern District of Florida, against us, several of our health plan subsidiaries, and certain other companies that operate medical centers in Miami-Dade County, Florida. After the U.S. government declined to intervene, the Court ordered the complaint unsealed, and the individual plaintiff amended his complaint and served the Company on December 8, 2011. The amended complaint alleged certain civil violations by our CAC Medical Centers in Florida, including offering various amenities such as transportation and meals, to Medicare and dual eligible individuals in our community center settings. The amended complaint also alleged civil violations by our Medicare Advantage health plans in Florida, arising from the alleged activities of our CAC Medical Centers and the codefendants in the complaint. The amended complaint sought damages and penalties on behalf of the United States under the Anti-Inducement and Anti-Kickback Statutes and the False Claims Act. On September 28, 2012, the Court dismissed, with prejudice, all causes of action that were asserted in the amended complaint. On November 19, 2013, the individual plaintiff appealed the dismissal of the amended complaint. On January 16, 2015, the Court of Appeals for the Eleventh Circuit affirmed the dismissal of the amended complaint.

On January 6, 2012, the Civil Division of the United States Attorney's Office for the Southern District of Florida advised us that it is seeking documents and information from us and several of our affiliates relating to several matters including the coding of medical claims by one or more South Florida medical providers, and loans to physician practices. On May 1, 2014, the U.S. Attorney's Office filed a Notice of Non-Intervention in connection with a civil qui tam suit

related to one of these matters captioned *United States of America ex rel. Olivia Graves v. Plaza Medical Centers, et al.*, and the Court ordered the complaint unsealed. Subsequently, the individual plaintiff amended the complaint and served the Company, opting to continue to pursue the action. After the Court dismissed her complaint, the individual plaintiff filed a second amended complaint on October 23, 2014, which all defendants answered and moved to dismiss, which motions are pending with the Court. We continue to cooperate with and respond to information requests from the U.S. Attorney's office. These matters could result in additional qui tam litigation.

Recently, the Civil Division of the United States Department of Justice provided us with an information request, separate from but related to the Plaza Medical matter, concerning our Medicare Part C risk adjustment practices. The request relates to our oversight and submission of risk adjustment data generated by providers in our Medicare Advantage network, including the providers identified in the Plaza Medical matter, as well as to our business and compliance practices related to risk adjustment data generated by our providers and by us, including medical record reviews conducted as part of our data and payment accuracy compliance efforts, the use of health and well-being assessments, and our fraud detection efforts. We continue to cooperate with and voluntarily respond to the information requests from the Department of Justice and the U.S. Attorney's Office.

Other Lawsuits and Regulatory Matters

Our current and past business practices are subject to review or other investigations by various state insurance and health care regulatory authorities and other state and federal regulatory authorities. These authorities regularly scrutinize the business practices of health insurance, health care delivery and benefits companies. These reviews focus on numerous facets of our business, including claims payment practices, provider contracting, risk adjustment, competitive practices, commission payments, privacy issues, utilization management practices, pharmacy benefits, access to care, and sales practices, among others. Some of these reviews have historically resulted in fines imposed on us and some have required changes to some of our practices. We continue to be subject to these reviews, which could result in additional fines or other sanctions being imposed on us or additional changes in some of our practices.

We also are involved in various other lawsuits that arise, for the most part, in the ordinary course of our business operations, certain of which may be styled as class-action lawsuits. Among other matters, this litigation may include employment matters, claims of medical malpractice, bad faith, nonacceptance or termination of providers, anticompetitive practices, improper rate setting, provider contract rate disputes, failure to disclose network discounts and various other provider arrangements, general contractual matters, intellectual property matters, and challenges to subrogation practices. For example, a number of hospitals and other providers have asserted that, under their network provider contracts, we are not entitled to reduce Medicare Advantage payments to these providers in connection with changes in Medicare payment systems and in accordance with the Balanced Budget and Emergency Deficit Control Act of 1985, as amended (commonly referred to as "sequestration"). Those challenges have led and could lead to arbitration demands or other litigation. Also, under state guaranty assessment laws, we may be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of insolvent insurance companies that write the same line or lines of business as we do.

As a government contractor, we may also be subject to qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that the government contractor submitted false claims to the government including, among other allegations, those resulting from coding and review practices under the Medicare risk adjustment model. Qui tam litigation is filed under seal to allow the government an opportunity to investigate and to decide if it wishes to intervene and assume control of the litigation. If the government does not intervene, the lawsuit is unsealed, and the individual may continue to prosecute the action on his or her own, on behalf of the government. We also are subject to other allegations of non-performance of contractual obligations to providers, members, and others, including failure to properly pay claims, improper policy terminations, challenges to our implementation of the Medicare Part D prescription drug program and other litigation.

A limited number of the claims asserted against us are subject to insurance coverage. Personal injury claims, claims for extracontractual damages, care delivery malpractice, and claims arising from medical benefit denials are covered by insurance from our wholly owned captive insurance subsidiary and excess carriers, except to the extent that claimants seek punitive damages, which may not be covered by insurance in certain states in which insurance coverage for punitive

damages is not permitted. In addition, insurance coverage for all or certain forms of liability has become increasingly costly and may become unavailable or prohibitively expensive in the future.

We record accruals for the contingencies discussed in both sections above to the extent that we conclude it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. No estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made at this time regarding the matters specifically described above because of the inherently unpredictable nature of legal proceedings, which also may be exacerbated by various factors, including: (i) the damages sought in the proceedings are unsubstantiated or indeterminate; (ii) discovery is not complete; (iii) the proceeding is in its early stages; (iv) the matters present legal uncertainties; (v) there are significant facts in dispute; (vi) there are a large number of parties (including where it is uncertain how liability, if any, will be shared among multiple defendants); or (vii) there is a wide range of potential outcomes.

The outcome of any current or future litigation or governmental or internal investigations, including the matters described above, cannot be accurately predicted, nor can we predict any resulting judgments, penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities or as a result of actions by third parties. Nevertheless, it is reasonably possible that any such outcome of litigation, judgments, penalties, fines or other sanctions could be substantial, and the outcome of these matters may have a material adverse effect on our results of operations, financial position, and cash flows, and may also affect our reputation.

17. SEGMENT INFORMATION

On January 1, 2014, we reclassified certain of our businesses from our Healthcare Services segment to our Employer Group segment to correspond with internal management reporting changes. Our reportable segments remain the same and prior period segment financial information has been recast to conform to the 2014 presentation.

We manage our business with three reportable segments: Retail, Employer Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

The Retail segment consists of Medicare and commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and financial protection products, marketed directly to individuals, and includes our contract with CMS to administer the LI-NET prescription drug plan program and contracts with various states to provide Medicaid, dual eligible, and Long-Term Support Services benefits, collectively our state-based contracts. The Employer Group segment consists of Medicare and commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and voluntary benefit products, as well as administrative services only, or ASO, products and our health and wellness products primarily marketed to employer groups. The Healthcare Services segment includes services offered to our health plan members as well as to third parties including pharmacy solutions, provider services, home based services, integrated behavioral health services, and predictive modeling and informatics services. The Other Businesses category consists of our military services, primarily our TRICARE South Region contract, Puerto Rico Medicaid, and closed-block long-term care insurance policies.

Our Healthcare Services intersegment revenues primarily relate to managing prescription drug coverage for members of our other segments through Humana Pharmacy Solutions®, or HPS, and includes the operations of *Right*SourceRx®, our mail order pharmacy business. These revenues consist of the prescription price (ingredient cost plus dispensing fee), including the portion to be settled with the member (co-share) or with the government (subsidies), plus any associated administrative fees. Services revenues related to the distribution of prescriptions by third party retail pharmacies in our networks are recognized when the claim is processed and product revenues from dispensing prescriptions from our mail order pharmacies are recorded when the prescription or product is shipped. Our pharmacy operations, which are responsible for designing pharmacy benefits, including defining member co-share responsibilities, determining formulary listings, contracting with retail pharmacies, confirming member eligibility, reviewing drug

utilization, and processing claims, act as a principal in the arrangement on behalf of members in our other segments. As principal, our Healthcare Services segment reports revenues on a gross basis including co-share amounts from members collected by third party retail pharmacies at the point of service.

In addition, our Healthcare Services intersegment revenues include revenues earned by certain owned providers derived from risk-based managed care agreements with our health plans. Under these agreements, the provider receives a monthly capitated fee that varies depending on the demographics and health status of the member, for each member assigned to these owned providers by our health plans. The owned provider assumes the economic risk of funding the assigned members' healthcare services and related administrative costs. Accordingly, our Healthcare Services segment reports provider services related revenues on a gross basis. Capitation fee revenue is recognized in the period in which the assigned members are entitled to receive healthcare services.

We present our consolidated results of operations from the perspective of the health plans. As a result, the cost of providing benefits to our members, whether provided via a third party provider or internally through a stand-alone subsidiary, is classified as benefits expense and excludes the portion of the cost for which the health plans do not bear responsibility, including member co-share amounts and government subsidies of $9.7 billion in 2014, $7.3 billion in 2013, and $6.3 billion in 2012. In addition, depreciation and amortization expense associated with certain businesses in our Healthcare Services segment delivering benefits to our members, primarily associated with our provider services and pharmacy operations, are included with benefits expense. The amount of this expense was $116 million in 2014, $93 million in 2013, and $43 million in 2012. The increase in 2013 primarily was due to amortization expense associated with the December 21, 2012 acquisition of Metropolitan.

Other than those described previously, the accounting policies of each segment are the same and are described in Note 2. Transactions between reportable segments consist of sales of services rendered by our Healthcare Services segment, primarily provider, pharmacy, and behavioral health services, to our Retail and Employer Group customers. Intersegment sales and expenses are recorded at fair value and eliminated in consolidation. Members served by our segments often utilize the same provider networks, enabling us in some instances to obtain more favorable contract terms with providers. Our segments also share indirect costs and assets. As a result, the profitability of each segment is interdependent. We allocate most operating expenses to our segments. Assets and certain corporate income and expenses are not allocated to the segments, including the portion of investment income not supporting segment operations, interest expense on corporate debt, and certain other corporate expenses. These items are managed at a corporate level. These corporate amounts are reported separately from our reportable segments and included with intersegment eliminations in the tables presenting segment results below.

Our segment results were as follows for the years ended December 31, 2014, 2013, and 2012:

	Retail	Employer Group	Healthcare Services	Other Businesses	Eliminations/ Corporate	Consolidated
			(in millions)			
2014

18. EXPENSES ASSOCIATED WITH LONG-DURATION INSURANCE PRODUCTS

Premiums associated with our long-duration insurance products accounted for approximately 2% of our consolidated premiums and services revenue for the year ended December 31, 2014. We use long-duration accounting for products such as long-term care, life insurance, annuities, and certain health and other supplemental policies sold to individuals because they are expected to remain in force for an extended period beyond one year and because premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. As a result, we defer policy acquisition costs, primarily consisting of commissions, and amortize them over the estimated life of the policies in proportion to premiums earned.

In addition, we establish reserves for future policy benefits in recognition of the fact that some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. The assumptions used to determine the liability for future policy benefits are established and locked in at the time each contract is issued and only change if our expected future experience deteriorates to the point that the level of the liability, together with the present value of future gross premiums, are not adequate to provide for future expected policy benefits and maintenance costs (i.e. the loss recognition date). As discussed in Note 2, beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model because premiums received in the current year are intended to pay anticipated benefits in that year.

The table below presents deferred acquisition costs and future policy benefits payable associated with our long-duration insurance products for the years ended December 31, 2014 and 2013.

	2014		2013	
	Deferred acquisition costs	Future policy benefits payable	Deferred acquisition costs	Future policy benefits payable
	(in millions)			
Other long-term assets	$ 167	$ —	$ 166	$ —
Trade accounts payable and accrued expenses	—	(68)	—	(67)
Long-term liabilities	—	(2,349)	—	(2,207)
Total asset (liability)	$ 167	$ (2,417)	$ 166	$ (2,274)

In addition, future policy benefits payable include amounts of $210 million at December 31, 2014 and $215 million at December 31, 2013 which are subject to 100% coinsurance agreements as more fully described in Note 19.

Benefits expense associated with future policy benefits payable was $32 million in 2014, $354 million in 2013, and $136 million in 2012. Benefits expense for 2013 included net charges of $243 million associated with our closed block of long-term care insurance policies discussed further below. Amortization of deferred acquisition costs included in operating costs was $39 million in 2014, $55 million in 2013, and $44 million in 2012.

Future policy benefits payable include $1.5 billion at December 31, 2014 and $1.4 billion at December 31, 2013 associated with a non-strategic closed block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG. Future policy benefits payable includes amounts charged to accumulated other comprehensive income for an additional liability that would exist on our closed-block of long-term care insurance policies if unrealized gains on the sale of the investments backing such products had been realized and the proceeds reinvested at then current yields. There was $123 million of additional liability at December 31, 2014 and no additional liability at December 31, 2013. Amounts charged to accumulated other comprehensive income are net of applicable deferred taxes.

Long-term care insurance policies provide nursing home and home health coverage for which premiums are collected many years in advance of benefits paid, if any. Therefore, our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. We monitor the loss experience of these long-term care insurance policies and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. To the extent premium rate increases and/or loss experience vary from our loss recognition date assumptions, future adjustments to reserves could be required.

During 2013, we recorded a loss for a premium deficiency. The premium deficiency was based on current and anticipated experience that had deteriorated from our locked-in assumptions from the previous December 31, 2010 loss recognition date, particularly as they related to emerging experience due to an increase in life expectancies and utilization of home health care services. Based on this deterioration, and combined with lower interest rates, we determined that

our existing future policy benefits payable, together with the present value of future gross premiums, associated with our closed block of long-term care insurance policies were not adequate to provide for future policy benefits and maintenance costs under these policies; therefore we unlocked and modified our assumptions based on current expectations. Accordingly, during 2013 we recorded $243 million of additional benefits expense, with a corresponding increase in future policy benefits payable of $350 million partially offset by a related reinsurance recoverable of $107 million included in other long-term assets.

During 2012, we recorded a change in estimate associated with future policy benefits payable for our closed-block of long-term care insurance policies resulting in additional benefits expense of $29 million. This change in estimate was based on current claim experience demonstrating an increase in the length of the time policyholders already in payment status remained in such status. Future policy benefits payable was increased to cover future payments to policyholders currently in payment status.

Deferred acquisition costs included $59 million and $66 million associated with our individual commercial medical policies at December 31, 2014 and December 31, 2013, respectively. Future policy benefits payable associated with our individual commercial medical policies were $297 million at December 31, 2014 and $327 million at December 31, 2013.

19. REINSURANCE

Certain blocks of insurance assumed in acquisitions, primarily life, long-term care, and annuities in run-off status, are subject to reinsurance where some or all of the underwriting risk related to these policies has been ceded to a third party. In addition, a large portion of our reinsurance takes the form of 100% coinsurance agreements where, in addition to all of the underwriting risk, all administrative responsibilities, including premium collections and claim payment, have also been ceded to a third party. We acquired these policies and related reinsurance agreements with the purchase of stock of companies in which the policies were originally written. We acquired these companies for business reasons unrelated to these particular policies, including the companies' other products and licenses necessary to fulfill strategic plans.

A reinsurance agreement between two entities transfers the underwriting risk of policyholder liabilities to a reinsurer while the primary insurer retains the contractual relationship with the ultimate insured. As such, these reinsurance agreements do not completely relieve us of our potential liability to the ultimate insured. However, given the transfer of underwriting risk, our potential liability is limited to the credit exposure which exists should the reinsurer be unable to meet its obligations assumed under these reinsurance agreements.

Reinsurance recoverables represent the portion of future policy benefits payable and benefits payable that are covered by reinsurance. Amounts recoverable from reinsurers are estimated in a manner consistent with the methods used to determine future policy benefits payable as detailed in Note 2. Excluding reinsurance associated with the Health Care Reform Law discussed in Note 2, reinsurance recoverables, included in other current and long-term assets, were $646 million at December 31, 2014 and $578 million at December 31, 2013. The percentage of these reinsurance recoverables resulting from 100% coinsurance agreements was approximately 45% at December 31, 2014 and approximately 37% at December 31, 2013. Premiums ceded were $357 million in 2014, $33 million in 2013 and $34 million in 2012. Benefits ceded were $272 million in 2014, $70 million in 2013, and $86 million in 2012. Ceded premium and benefits in 2014 reflect a July 1, 2014 amendment ceding all risk under a Medicaid contract to a third party reinsurer.

We evaluate the financial condition of these reinsurers on a regular basis. These reinsurers are well-known and well-established, as evidenced by the strong financial ratings at December 31, 2014 presented below:

Reinsurer	Total Recoverable (in millions)	A.M. Best Rating at December 31, 2014
Protective Life Insurance Company	$ 188	A+ (superior)
Munich American Reassurance Company	148	A+ (superior)
Employers Reassurance Corporation	90	A- (excellent)
General Re Life Corporation	89	A++ (superior)
All others	131	A+ to B++ (superior to good)
	$ 646	

The all other category represents 16 reinsurers with individual balances less than $80 million. Three of these reinsurers have placed an aggregate of $99 million of cash and securities in trusts and funds withheld accounts, an amount at least equal to the total recoverable from each of these reinsurers.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Humana Inc.:

In our opinion, the consolidated balance sheets and the related consolidated statements of income, of comprehensive income, of stockholders' equity and of cash flows present fairly, in all material respects, the financial position of Humana Inc. and its subsidiaries ("Company") at December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the index appearing under Item 15(a)(2) present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Humana Inc.
QUARTERLY FINANCIAL INFORMATION
(Unaudited)

A summary of our quarterly unaudited results of operations for the years ended December 31, 2014 and 2013 follows:

	2014			
	First	Second	Third	Fourth
	(in millions, except per share results)			
Total revenues	$ 11,712	$ 12,222	$ 12,238	$ 12,328
Income before income taxes	686	646	551	287
Net income	368	344	290	145
Basic earnings per common share	$ 2.37	$ 2.22	$ 1.87	$ 0.96
Diluted earnings per common share (1)	$ 2.35	$ 2.19	$ 1.85	$ 0.94

	2013			
	First	Second	Third	Fourth
	(in millions, except per share results)			
Total revenues	$ 10,486	$ 10,321	$ 10,319	$ 10,187
Income (loss) before income taxes	730	654	586	(49)
Net income (loss)	473	420	368	(30)
Basic earnings (loss) per common share	$ 2.97	$ 2.66	$ 2.34	$ (0.19)
Diluted earnings (loss) per common share (1)	$ 2.95	$ 2.63	$ 2.31	$ (0.19)

(1) The calculation of diluted earnings per common share is based on the weighted average shares outstanding during each quarter and, accordingly, the sum may not equal the total for the year. In addition, for 2013, the sum of quarterly amounts does not equal full year results due to the anti-dilutive impact of a loss in the fourth quarter. The fourth quarter of 2013 includes an expense of $243 million ($154 million after tax, or $0.99 per diluted common share) for reserve strengthening associated with our closed block of long-term care insurance policies.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements and Other Information

We are responsible for the preparation and integrity of the consolidated financial statements appearing in our Annual Report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States and include amounts based on our estimates and judgments. All other financial information in this report has been presented on a basis consistent with the information included in the financial statements.

Our control environment is the foundation for our system of internal control over financial reporting and is embodied in our Code of Ethics and Business Conduct, which we currently refer to as the Humana Inc. Ethics Every Day. It sets the tone of our organization and includes factors such as integrity and ethical values. Our internal control over financial reporting is supported by formal policies and procedures which are reviewed, modified and improved as changes occur in business conditions and operations.

The Audit Committee of the Board of Directors, which is composed solely of independent outside directors, meets periodically with members of management, the internal auditors and our independent registered public accounting firm to review and discuss internal controls over financial reporting and accounting and financial reporting matters. Our independent registered public accounting firm and internal auditors report to the Audit Committee and accordingly have full and free access to the Audit Committee at any time.

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to members of senior management and the Board of Directors.

Based on our evaluation as of December 31, 2014, we as the principal executive officer and the principal financial officer and the principal accounting officer of the Company have concluded that the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as specified in Securities and Exchange Commission rules and forms.

Management's Report on Internal Control Over Financial Reporting

We are responsible for establishing and maintaining effective internal control over financial reporting as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework* (2013). Based on our assessment, we determined that, as of December 31, 2014, the Company's internal control over financial reporting was effective based on those criteria.

The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm, who also audited the Company's consolidated financial statements included in our Annual Report on Form 10-K, as stated in their report which appears on page 126.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Bruce D. Broussard
President and Chief Executive Officer (Principal Executive Officer)

Brian A. Kane
Senior Vice President and Chief Financial Officer (Principal Financial Officer)

Cynthia H. Zipperle
Vice President, Chief Accounting Officer and Controller (Principal Accounting Officer)

(1) Mr. Broussard currently serves as Director, President and Chief Executive Officer (Principal Executive Officer), having held these positions since January 1, 2013. Mr. Broussard was elected President upon joining the Company in December 2011 and served in that capacity through December 2012. Prior to joining the Company, Mr. Broussard was Chief Executive Officer of McKesson Specialty/US Oncology, Inc. US Oncology was purchased by McKesson in December 2010. At US Oncology, Mr. Broussard served in a number of senior executive roles, including Chief Financial Officer, Chief Executive Officer, and Chairman of the Board.

(2) Mr. Murray currently serves as Executive Vice President and Chief Operating Officer, having held this position since December 2011. Mr. Murray has held the position of Chief Operating Officer since February 2006, and was the Chief Operating Officer – Market and Business Segment Operations from September 2002 to February 2006. Mr. Murray joined the Company in December 1989.

(3) Dr. Beveridge currently serves as Senior Vice President and Chief Medical Officer, having held this position since joining the Company in June 2013. Prior to joining the Company, Dr. Beveridge served as Chief Medical Officer for McKesson Specialty Health from December 2010 until June 2013. Prior to McKesson's acquisition of US Oncology, Dr. Beveridge served as the Executive Vice President and Medical Director at US Oncology from September 2009 through December 2010.

(4) Ms. Bilney currently serves as Senior Vice President and Chief Consumer Officer, having held this position since joining the Company in April 2013. Prior to joining the Company, Ms. Bilney served as Executive Vice President and Chief Brand Officer for Bloomin' Brands, Inc. from 2006 until April 2013.

(5) Mr. Hunter currently serves as Senior Vice President and Chief Strategy Officer, having held this position since joining the Company in January 2014. Prior to joining the Company, Mr. Hunter served as President of Provider Markets at The TriZetto Group, Inc. from July 2012 until December 2013, and as Senior Vice President, Emerging Markets at BlueCross BlueShield of Tennessee from 2009 through July 2012. While at BlueCross BlueShield of Tennessee, Mr. Hunter was simultaneously President and Chief Executive Officer of Onlife Health, a national health and wellness subsidiary of BlueCross BlueShield of Tennessee.

(6) Mr. Huval currently serves as Senior Vice President and Chief Human Resources Officer, having been elected to this position in December 2012. Prior to joining the Company, Mr. Huval spent 10 years at Bank of America in multiple senior-level roles, including Human Resources executive and Chief Information Officer for Global Wealth & Investment Management, as well as Human Resources executive for both Global Treasury Services and Technology & Global Operations.

(7) Mr. Kane currently serves as Senior Vice President and Chief Financial Officer, having been elected to this position in June 2014. Prior to joining the Company, Mr. Kane spent nearly 17 years at Goldman, Sachs & Co. As a managing director, he was responsible for client relationships as well as for leading strategic and financing transactions for a number of companies in multiple industries.

(8) Mr. Kay currently serves of Senior Vice President and Chief Innovation Officer, having been elected to this position in March 2014. Prior to joining the Company, Mr. Kay was most recently Managing Director and CEO of Citi Ventures, Citigroup's global corporate venturing arm. Prior to joining Citi in 2007, Mr. Kay held several leadership positions at Target over a 12-year period.

(9) Mr. LeClaire currently serves as Senior Vice President and Chief Information Officer, having held this position since January 2014. Prior to that, he served as Senior Vice President and Chief Service and Information Officer from August 2011 to January 2014, and as Chief Technology Officer from 2002 to August 2011. Mr. LeClaire joined the Company in August 1999.

(10) Ms. Margulis currently serves as Senior Vice President – Corporate Affairs, having held this position since January 2000. Ms. Margulis joined the Company in November 1985.

(11) Mr. Todoroff currently serves as Senior Vice President and General Counsel, having held this position since August 2008. Prior to joining the Company, Mr. Todoroff served as Vice President, Senior Corporate Counsel and Corporate Secretary for Aetna Inc. from 2006 through July 2008. Mr. Todoroff joined Aetna's Legal Department in 1995 and held various positions of increasing responsibility.

(12) Mrs. Zipperle currently serves as Vice President, Chief Accounting Officer and Controller, having held this position since December 2014. Mrs. Zipperle previously served as the Vice President - Finance from January 2013 until her election to her current role, and as the Assistant Controller from January 1998 until January 2013.

Executive officers are elected annually by our Board of Directors and serve until their successors are elected or until resignation or removal. There are no family relationships among any of our executive officers.

Section 16(a) Beneficial Ownership Reporting Compliance

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015 appearing under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" of such Proxy Statement.

Code of Conduct for Chief Executive Officer and Senior Financial Officers

We have adopted a Code of Conduct for the Chief Executive Officer and Senior Financial Officers, violations of which should be reported to the Audit Committee. The code may be viewed through the Investor Relations section of our web site at www.humana.com. Any amendment to or waiver of the application of the Code of Conduct for the Chief Executive Officer and Senior Financial Officers will be promptly disclosed through the Investor Relations section of our web site at www.humana.com.

Code of Business Conduct and Ethics

Since 1995, we have operated under an omnibus Code of Ethics and Business Conduct, currently known as the Humana Inc. Ethics Every Day. All employees and directors are required to annually affirm in writing their acceptance of the code. The Humana Inc. Ethics Every Day was adopted by our Board of Directors in June 2014, replacing a previous iteration of our Code of Ethics and Business Conduct – the Humana Inc. Principles of Business Ethics – as the document to comply with the New York Stock Exchange Corporate Governance Standard 303A.10. The Humana Inc. Ethics Every Day is available on our web site at www.humana.com. Any waiver of the application of the Humana Inc. Principles of Business Ethics to directors or executive officers must be made by the Board of Directors and will be promptly disclosed on our web site at www.humana.com.

Corporate Governance Items

We have made available free of charge on or through the Investor Relations section of our web site at www.humana.com our annual reports on Form 10-K, quarterly reports on Form 10-Q, proxy statements, and all of our other reports, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Also available on our Internet web site is information about our corporate governance, including:

- a determination of independence for each member of our Board of Directors;
- the name, membership, role, and charter of each of the various committees of our Board of Directors;
- the name(s) of the directors designated as a financial expert under rules and regulations promulgated by the SEC;
- the responsibility of the Company's Lead Independent Director, if applicable, to convene, set the agenda for, and lead executive sessions of the non-management directors;
- the pre-approval process of non-audit services provided by our independent accountants;
- our by-laws and Certificate of Incorporation;
- our Majority Vote policy;
- our Related Persons Transaction Policy;
- the process by which interested parties can communicate with directors;
- the process by which stockholders can make director nominations (pursuant to our By-laws);
- our Corporate Governance Guidelines;
- our Policy Regarding Transactions in Company Securities, Inside Information and Confidentiality;

- stock ownership guidelines for directors and for executive officers;
- the Humana Inc. Ethics Every Day and any waivers thereto; and
- the Code of Conduct for the Chief Executive Officer and Senior Financial Officers and any waivers thereto.

Additional information about these items can be found in, and is incorporated by reference to, our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015.

Material Changes to the Procedures by which Security Holders May Recommend Nominees to the Registrant's Board of Directors

None.

Audit Committee Financial Expert

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015 appearing under the caption "Corporate Governance – Audit Committee" of such Proxy Statement.

Audit Committee Composition and Independence

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015 appearing under the caption "Corporate Governance – Committee Membership and Attendance" of such Proxy Statement.

ITEM 11. EXECUTIVE COMPENSATION

Additional information required by this Item is incorporated herein by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015 appearing under the captions "Corporate Governance – Organization & Compensation Committee – Compensation Committee Interlocks and Insider Participation," "Director Compensation," "Compensation Discussion and Analysis," "Organization & Compensation Committee Report," and "Executive Compensation" of such Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Equity compensation plan information

We maintain plans under which options to purchase our common stock and under which awards of restricted stock may be made to officers, directors, key employees, and consultants. Stock options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant. Our stock plans, as approved by the Board of Directors and stockholders, define fair market value as the average of the highest and lowest stock prices reported on the composite tape by the New York Stock Exchange on a given date. Exercise provisions vary, but most options vest in whole or in part 1 to 3 years after grant and expire 7 to 10 years after grant.

Information concerning stock option awards and the number of securities remaining available for future issuance under our equity compensation plans in effect as of December 31, 2014 follows:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column(a))	
Equity compensation plans approved by security holders (1)	767,953	$ 82.452	10,593,382	(2)(3)
Equity compensation plans not approved by security holders	—	—	—	
Total	767,953	$ 82.452	10,593,382	

(1) The above table does not include awards of shares of restricted stock or restricted stock units. For information concerning these awards, see Note 13.

(2) The Humana Inc. 2011 Stock Incentive Plan was approved by stockholders at the Annual Meeting held on April 21, 2011. On July 5, 2011, 18.5 million shares were registered with the Securities and Exchange Commission on Form S-8.

(3) Of the number listed above, 4,625,931 can be issued as restricted stock at December 31, 2014 (giving effect to the provision that one restricted share is equivalent to 2.29 stock options in the 2011 Plan).

The information under the captions "Security Ownership of Certain Beneficial Owners of Company Common Stock" and "Security Ownership of Directors and Executive Officers" in our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015, is herein incorporated by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015 appearing under the captions "Certain Transactions with Management and Others" and "Corporate Governance – Independent Directors" of such Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 16, 2015 appearing under the caption "Audit Committee Report" of such Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The financial statements, financial statement schedules and exhibits set forth below are filed as part of this report.

(1) Financial Statements – The response to this portion of Item 15 is submitted as Item 8 of Part II of this report.

(2) The following Consolidated Financial Statement Schedules are included herein:

Schedule I	Parent Company Financial Information
Schedule II	Valuation and Qualifying Accounts

All other schedules have been omitted because they are not applicable.

(3) Exhibits:

3(a) Restated Certificate of Incorporation of Humana Inc. filed with the Secretary of State of Delaware on November 9, 1989, as restated to incorporate the amendment of January 9, 1992, and the correction of March 23, 1992 (incorporated herein by reference to Exhibit 4(i) to Humana Inc.'s Post-Effective Amendment No.1 to the Registration Statement on Form S-8 (Reg. No. 33-49305) filed February 2, 1994).

(b) By-Laws of Humana Inc., as amended on January 4, 2007 (incorporated herein by reference to Exhibit 3 to Humana Inc.'s Annual Report on Form 10-K for the year ended December 31, 2006).

4(a) Indenture, dated as of August 5, 2003, by and between Humana Inc. and The Bank of New York, as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).

(b) First Supplemental Indenture, dated as of August 5, 2003, by and between Humana Inc. and The Bank of New York, as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).

(c) Second Supplemental Indenture, dated as of May 31, 2006, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on May 31, 2006).

(d) Third Supplemental Indenture, dated as of June 5, 2008, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on June 5, 2008).

(e) Fourth Supplemental Indenture, dated as of June 5, 2008, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.3 to Humana Inc.'s Current Report on Form 8-K filed on June 5, 2008).

(f) Indenture, dated as of March 30, 2006, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Registration Statement on Form S-3 filed on March 31, 2006).

(g) There are no instruments defining the rights of holders with respect to long-term debt in excess of 10 percent of the total assets of Humana Inc. on a consolidated basis. Other long-term indebtedness of Humana Inc. is described herein in Note 12 to Consolidated Financial Statements. Humana Inc. agrees to furnish copies of all such instruments defining the rights of the holders of such indebtedness not otherwise filed as an Exhibit to this Annual Report on Form 10-K to the Commission upon request.

(h) Fifth Supplemental Indenture, dated as of December 10, 2012, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on December 10, 2012).

(i) Sixth Supplemental Indenture, dated as of December 10, 2012, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.3 to Humana Inc.'s Current Report on Form 8-K filed on December 10, 2012).

(j) Seventh Supplemental Indenture, dated as of September 19, 2014, by and between Humana Inc. and The Bank of New York, Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Current Report on Form 8-K filed on September 19, 2014).

(k) Eighth Supplemental Indenture, dated as of September 19, 2014, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.4 to Humana Inc.'s Current Report on Form 8-K filed on September 19, 2014).

(l) Ninth Supplemental Indenture, dated as of September 19, 2014, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.6 to Humana Inc.'s Current Report on Form 8-K filed on September 19, 2014).

10(a)* Form of Company's Stock Option Agreement under the Amended and Restated 2003 Stock Incentive Plan (Non-Qualified Stock Options with Non-Compete/Non-Solicit) (incorporated herein by reference to Exhibit 10(f) to Humana Inc.'s Annual Report on Form 10-K filed on February 19, 2010).

(b)* Form of Company's Stock Option Agreement under the Amended and Restated 2003 Stock Incentive Plan (Incentive Stock Options with Non-Compete/Non-Solicit) (incorporated herein by reference to Exhibit 10(g) to Humana Inc.'s Annual Report on Form 10-K filed on February 19, 2010).

(c)* Humana Inc. Amended and Restated 2003 Stock Incentive Plan (incorporated herein by reference to Appendix A to Humana Inc.'s Proxy Statement with respect to the Annual Meeting of Stockholders held on April 27, 2006).

Humana Inc.

SCHEDULE I—PARENT COMPANY FINANCIAL INFORMATION
NOTES TO CONDENSED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

Parent company financial information has been derived from our consolidated financial statements and excludes the accounts of all operating subsidiaries. This information should be read in conjunction with our consolidated financial statements.

2. TRANSACTIONS WITH SUBSIDIARIES

Management Fee

Through intercompany service agreements approved, if required, by state regulatory authorities, Humana Inc., our parent company, charges a management fee for reimbursement of certain centralized services provided to its subsidiaries including information systems, disbursement, investment and cash administration, marketing, legal, finance, and medical and executive management oversight.

Dividends

Cash dividends received from subsidiaries and included as a component of net cash provided by operating activities were $927 million in 2014, $967 million in 2013, and $1.2 billion in 2012.

Guarantee

Through indemnity agreements approved by state regulatory authorities, certain of our regulated subsidiaries generally are guaranteed by our parent company in the event of insolvency for; (1) member coverage for which premium payment has been made prior to insolvency; (2) benefits for members then hospitalized until discharged; and (3) payment to providers for services rendered prior to insolvency. Our parent has also guaranteed the obligations of our military services subsidiaries.

Notes Receivables from Operating Subsidiaries

We funded certain subsidiaries with surplus note agreements. These notes are generally non-interest bearing and may not be entered into or repaid without the prior approval of the applicable Departments of Insurance.

Notes Payable to Operating Subsidiaries

We borrowed funds from certain subsidiaries with notes generally collateralized by real estate. These notes, which have various payment and maturity terms, bear interest ranging from 0.98% to 6.65% and are payable in 2015 and 2018. We recorded interest expense of $1 million related to these notes for each of the years ended December 31, 2014, 2013 and 2012.

3. REGULATORY REQUIREMENTS

Certain of our insurance subsidiaries operate in states that regulate the payment of dividends, loans, or other cash transfers to Humana Inc., our parent company, and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these insurance subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

Although minimum required levels of equity are largely based on premium volume, product mix, and the quality of assets held, minimum requirements vary significantly at the state level. Our state regulated insurance subsidiaries

had aggregate statutory capital and surplus of approximately $6.0 billion and $5.5 billion as of December 31, 2014 and 2013, respectively, which exceeded aggregate minimum regulatory requirements of $4.1 billion and $3.5 billion, respectively. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2015 is approximately $800 million in the aggregate. This compares to dividends that were paid to our parent company in 2014 of approximately $927 million.

4. ACQUISITIONS

Refer to Note 3 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of acquisitions. During 2014 and 2013, we funded certain non-regulated subsidiary acquisitions, including the acquisition of American Eldercare Inc., with contributions from Humana Inc., our parent company, included in capital contributions in the condensed statement of cash flows.

5. INCOME TAXES

Refer to Note 11 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of income taxes.

6. DEBT

Refer to Note 12 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of debt.

7. STOCKHOLDER'S EQUITY

Refer to Note 15 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of stockholders' equity, including stock repurchases and stockholder dividends.

Humana Inc.
SCHEDULE II—VALUATION AND QUALIFYING ACCOUNTS

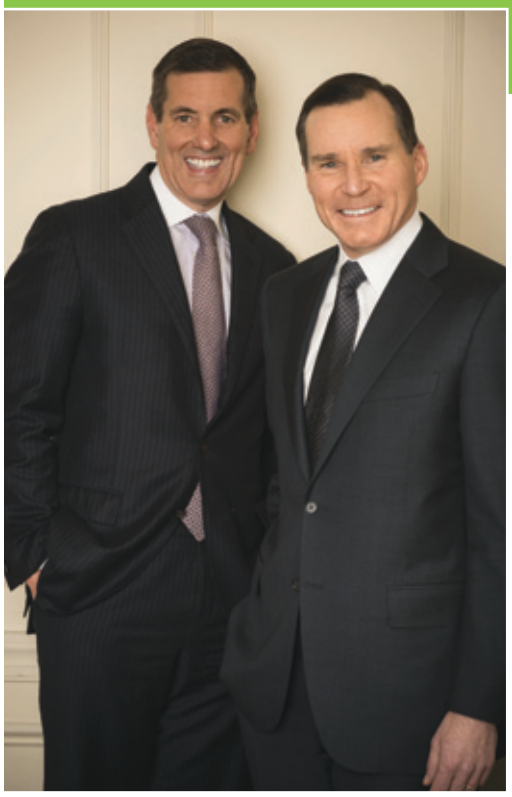
Dear Fellow Stockholders,



Bruce D. Broussard, President and Chief Executive Officer, and Kurt J. Hilzinger, Chairman of the Board

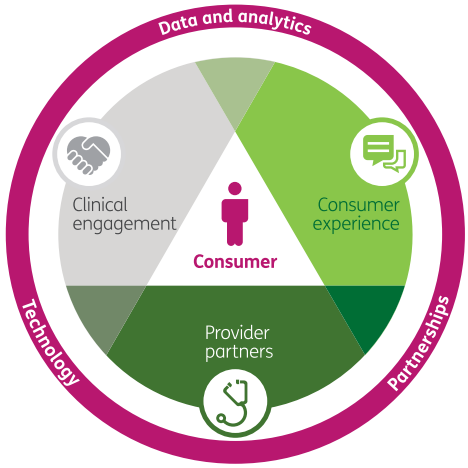
The consumer has been and continues to be at the center of Humana's integrated care delivery strategy, which is based on simplifying and personalizing the consumer experience, ultimately increasing our members' engagement in clinical and wellness programs. The other major element of our strategy is to build strong partnerships with providers to assist their transition to value-based payments by providing them with technology, expertise and resources.

Although we faced some headwinds in 2015, we believe our strategy remains sound. Our financial results did not fully reflect the strength of our integrated care model, and the progress we have made toward our vision of consumer-centric healthcare, but they did reflect the many changing variables in the industry.

As healthcare costs continue to grow and the prevalence of chronic conditions steadily increases, we must create a sustainable model that emphasizes quality of care while slowing disease progression, lowering medical costs and improving people's health. Integrated care delivery is the most effective way to accomplish these goals, by creating a personalized and integrated experience for each of our members through our growing consumer and clinical capabilities. We have enhanced these capabilities further this year, and they serve as the engine that enables us to personalize interactions and engagement with our members to provide the right care at the right time through the most effective channel.

To accelerate our health-focused efforts, last year we launched a multi-year commitment, which we call our Bold Goal: to improve the health of the communities we serve 20 percent by 2020 by making it easy for people to achieve their best health. To keep us on track, we are using the Healthy Days measurement, developed by the Centers for Disease Control and Prevention, which measures population health and health-related quality of life.

Our Integrated Care Delivery Model



We made progress

Consumer experience

2.5 million
members in Star quality plans rated 4 or above (scale of 5)

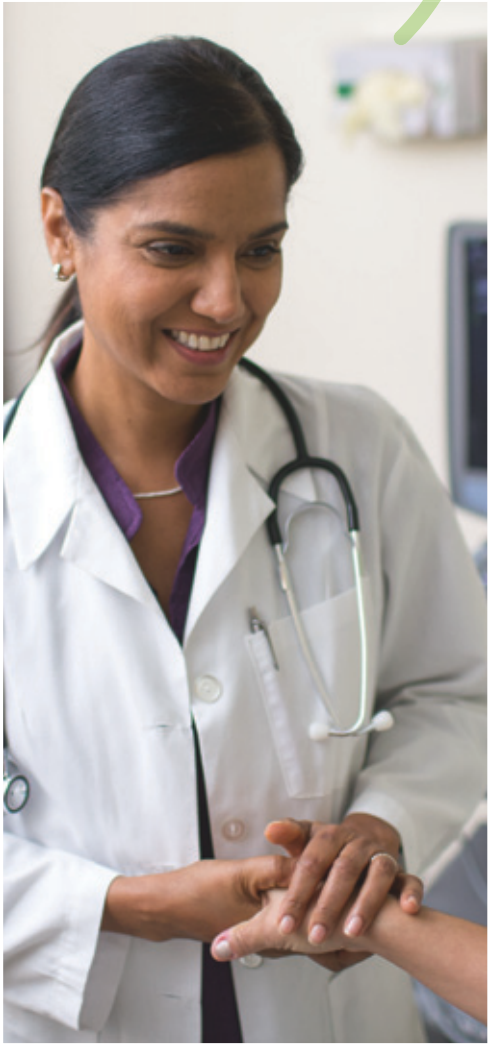
Increased transactional Net Promoter Scores (a standard measurement of the consumer experience) across our Medicare Advantage, stand-alone Prescription Drug Plans, individual and group commercial and pharmacy businesses

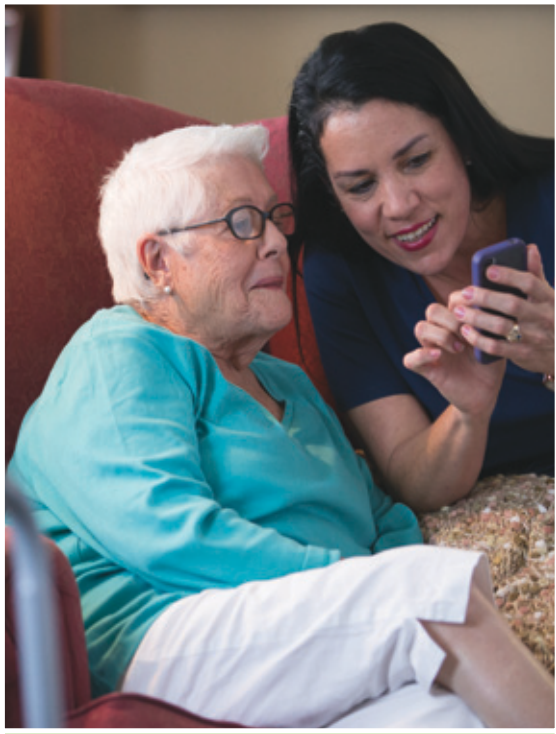
We were rated **Highest in Customer Satisfaction with Mail Order Pharmacies** in the J.D. Power 2015 U.S. Pharmacy Study

Clinical engagement

3.9 million
gaps in care closed for our members

314,000
drug safety alerts resulting in discontinued scripts





Continued success in helping people to have more days in their homes, approximately **44% fewer hospital admissions** among people living with multiple chronic conditions receiving Humana At Home care-management services

1.1 million
engaged in clinical programs identified through health risk assessments and predictive modeling capabilities

in 2015

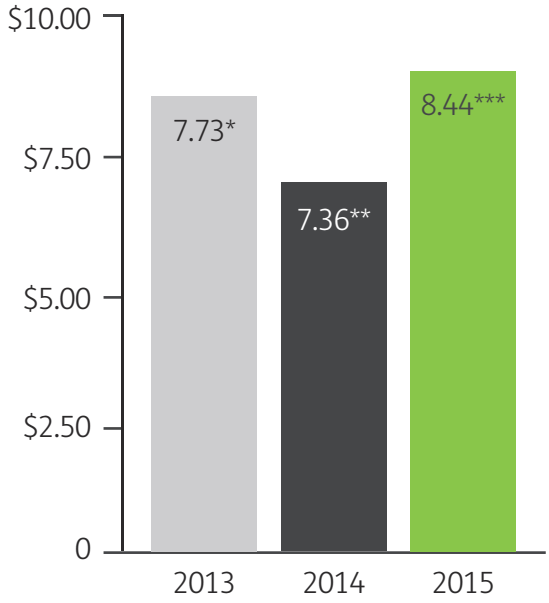
Provider partnerships

45,500
providers in value-based relationships. Providers in these types of relationships demonstrate 21 percent higher quality ratings – as measured by Healthcare Effectiveness Data and Information Set (HEDIS) scores – versus providers in standard Medicare Advantage settings

Humana Medicare Advantage members in value-based reimbursement model relationships experienced
7% fewer inpatient admissions per thousand.
In addition, screening rates for these members were 7% higher for colorectal cancer and 6 percent higher for breast cancer

Although we were pleased with the progress we made last year on the consumer front, at the same time we had to address certain challenges in our Medicare Advantage operations in 2015. Additionally, complexities associated with the healthcare exchange businesses – including unanticipated, government-mandated rule changes – are having lingering effects on pricing assumptions, including volatility in the population covered. In the second half of 2015, we took significant steps to address these issues and to provide a solid trajectory to achieve our target margins for each of our core businesses over the long term.
We also redoubled our efforts to engage our members and drive quality health outcomes for them and for our network physicians who care for them. That commitment to the consumer, combined with the operational corrections we made in 2015, provides us a solid trajectory for meaningful margin improvement as well as attractive growth in both revenues and earnings per share (EPS) in future years.

Humana believes all Americans should have access to high-quality healthcare.



Diluted Earnings per Common Share

** Includes $0.99 per share of benefits expense for our closed block long-term care insurance policies reserve strengthening.*

*** Includes $0.15 per share of expense related to early retirement of debt.*

**** Includes a gain of $1.57 per share associated with the completion of the sale of the company's wholly-owned subsidiary, Concentra Inc. on June 1, 2015, $0.14 per share of expense associated with the pending transaction with Aetna Inc., and $0.74 per share of expense related to a premium deficiency reserve (PDR) associated with certain of the company's 2016 individual commercial policies.*

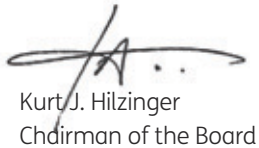
Humana believes all Americans should have access to high-quality healthcare. While we appreciate the consumer orientation of the Affordable Care Act's healthcare exchange program, it requires certain changes to make it viable in the long term. We are encouraged by CMS' recognition of the need for changes and its willingness to take steps in that direction. We will continue to partner with the government and work toward further enhancements as we evaluate our future participation in this program.

In July 2015, we signed a definitive merger agreement with Aetna Inc. We believe Aetna is the ideal business partner to accelerate our strategy and to bring the benefits of integrated care – including clinical capabilities and data analytics – to millions more Americans.

Like Humana, Aetna has a strong focus on partnering with consumers to improve their health and well-being and a distinguished history as a leading FORTUNE 100 enterprise. The transaction has already been approved by our stockholders, but it is still subject to various regulatory approvals. We continue to anticipate that the transaction will close in the latter half of 2016.

In summary, we are firmly committed to our strategy of integrated care delivery. Our value proposition is strong, and we remain dedicated to our goal of enabling better health outcomes at lower costs for our members. We would like to express our thanks to Humana's associates who, in a period of transition for our company, have continued to display resilience, compassion, skill and energy on behalf of our members, our partners and our stockholders.

Sincerely,



Kurt J. Hilzinger
Chairman of the Board

Bruce D. Broussard
President, Chief Executive Officer
and Board member

We have redoubled our efforts to engage our members and drive quality health outcomes for them and for our network physicians who care for them.

Forward-Looking Statements

Some of the statements under "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this report may contain forward-looking statements which reflect our current views with respect to future events and financial performance. These forward-looking statements are made within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, or the Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. We have based these forward-looking statements on our current expectations and projections about future events, trends and uncertainties. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions, including the information discussed under the section entitled "Risk Factors" in this report. In making these statements, we are not undertaking to address or update them in future filings or communications regarding our business or results. Our business is highly complicated, regulated and competitive with many different factors affecting results.

PART I

ITEM 1. BUSINESS

General

Headquartered in Louisville, Kentucky, Humana Inc. and its subsidiaries, referred to throughout this document as "we," "us," "our," the "Company" or "Humana," is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country. As of December 31, 2015, we had approximately 14.2 million members in our medical benefit plans, as well as approximately 7.2 million members in our specialty products. During 2015, 73% of our total premiums and services revenue were derived from contracts with the federal government, including 14% derived from our individual Medicare Advantage contracts in Florida with the Centers for Medicare and Medicaid Services, or CMS, under which we provide health insurance coverage to approximately 587,400 members as of December 31, 2015.

Humana Inc. was organized as a Delaware corporation in 1964. Our principal executive offices are located at 500 West Main Street, Louisville, Kentucky 40202, the telephone number at that address is (502) 580-1000, and our website address is www.humana.com. We have made available free of charge through the Investor Relations section of our web site our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

This Annual Report on Form 10-K, or 2015 Form 10-K, contains both historical and forward-looking information. See Item 1A. – Risk Factors in this 2015 Form 10-K for a description of a number of factors that may adversely affect our results or business.

Aetna Merger

On July 2, 2015, we entered into an Agreement and Plan of Merger, which we refer to in this report as the Merger Agreement, with Aetna Inc. and certain wholly owned subsidiaries of Aetna Inc., which we refer to collectively as Aetna, which sets forth the terms and conditions under which we will merge with, and become a wholly owned subsidiary of Aetna, a transaction we refer to in this report as the Merger. Under the terms of the Merger Agreement, at the closing of the Merger, each outstanding share of our common stock will be converted into the right to receive (i) 0.8375 of a share of Aetna common stock and (ii) $125 in cash. The total transaction was estimated at approximately $37 billion including the assumption of Humana debt, based on the closing price of Aetna common shares on July 2, 2015. The Merger Agreement includes customary restrictions on the conduct of our business prior to the completion of the Merger,

generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of customary specified limitations absent Aetna's prior written consent, including, for example, limitations on dividends (we agreed that our quarterly dividend will not exceed $0.29 per share) and repurchases of our securities (we agreed to suspend our share repurchase program), restrictions on our ability to enter into material contracts, and negotiated thresholds for capital expenditures, capital contributions, acquisitions and divestitures of businesses.

On October 19, 2015, our stockholders approved the adoption of the Merger Agreement at a special stockholder meeting. Also on October 19, 2015, the holders of Aetna outstanding shares approved the issuance of Aetna common stock in the Merger at a special meeting of Aetna shareholders.

The Merger is subject to customary closing conditions, including, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, (ii) the absence of legal restraints and prohibitions on the consummation of the Merger, (iii) listing of the Aetna common stock to be issued in the Merger on the New York Stock Exchange, (iv) subject to the relevant standards set forth in the Merger Agreement, the accuracy of the representations and warranties made by each party, (v) material compliance by each party with its covenants in the Merger Agreement, and (vi) no "Company Material Adverse Effect" with respect to us and no "Parent Material Adverse Effect" with respect to Aetna, in each case since the execution of and as defined in the Merger Agreement. In addition, Aetna's obligation to consummate the Merger is subject to (a) the condition that the required regulatory approvals do not impose any condition that, individually or in the aggregate, would reasonably be expected to have a "Regulatory Material Adverse Effect" (as such term is defined in the Merger Agreement), and (b) CMS has not imposed any sanctions with respect to our Medicare Advantage, or MA, business that, individually or in the aggregate, is or would reasonably be expected to be material and adverse to us and our subsidiaries, taken as a whole. The Merger is currently expected to close in the second half of 2016.

Health Care Reform

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. Certain significant provisions of the Health Care Reform Law include, among others, mandated coverage requirements, mandated benefits and guarantee issuance associated with commercial medical insurance, rebates to policyholders based on minimum benefit ratios, adjustments to Medicare Advantage premiums, the establishment of federally-facilitated or state-based exchanges coupled with programs designed to spread risk among insurers, and the introduction of plan designs based on set actuarial values. In addition, the Health Care Reform Law established insurance industry assessments, including an annual health insurance industry fee and a three-year industry wide commercial reinsurance fee. The Health Care Reform Law is discussed more fully in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations under the section titled "Health Care Reform" in this 2015 Form 10-K.

Business Segments

On January 1, 2015, we realigned certain of our businesses among our reportable segments to correspond with internal management reporting changes and renamed our Employer Group segment to the Group segment. Our three reportable segments remain Retail, Group, and Healthcare Services. The more significant realignments included reclassifying Medicare benefits offered to groups to the Retail segment from the Group segment, bringing all of our Medicare offerings, which are now managed collectively, together in one segment, recognizing that in some instances we market directly to individuals that are part of a group Medicare account. In addition, we realigned our military services business, primarily consisting of our TRICARE South Region contract previously included in the Other Businesses category, to our Group segment as we consider this contract with the government to be a group account. Prior period segment financial information has been recast to conform to the 2015 presentation. See Note 17 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data in this 2015 Form 10-K for segment financial information.

We manage our business with three reportable segments: Retail, Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

Our Products

Our medical and specialty insurance products allow members to access health care services primarily through our networks of health care providers with whom we have contracted. These products may vary in the degree to which members have coverage. Health maintenance organizations, or HMOs, generally require a referral from the member's primary care provider before seeing certain specialty physicians. Preferred provider organizations, or PPOs, provide members the freedom to choose a health care provider without requiring a referral. However PPOs generally require the member to pay a greater portion of the provider's fee in the event the member chooses not to use a provider participating in the PPO's network. Point of Service, or POS, plans combine the advantages of HMO plans with the flexibility of PPO plans. In general, POS plans allow members to choose, at the time medical services are needed, to seek care from a provider within the plan's network or outside the network. In addition, we offer services to our health plan members as well as to third parties that promote health and wellness, including pharmacy solutions, provider, home based, and clinical programs, as well as services and capabilities to advance population health. At the core of our strategy is our integrated care delivery model, which unites quality care, high member engagement, and sophisticated data analytics. Three core elements of the model are to improve the consumer experience by simplifying the interaction with us, engaging members in clinical programs, and offering assistance to providers in transitioning from a fee-for-service to a value-based arrangement. Our approach to primary, physician-directed care for our members aims to provide quality care that is consistent, integrated, cost-effective, and member-focused. The model is designed to improve health outcomes and affordability for individuals and for the health system as a whole, while offering our members a simple, seamless healthcare experience. The discussion that follows describes the products offered by each of our segments.

Our Retail Segment Products

This segment is comprised of products sold on a retail basis to individuals including medical and supplemental benefit plans described in the discussion that follows. The following table presents our premiums and services revenue for the Retail segment by product for the year ended December 31, 2015:

	Retail Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Premiums:		
Individual Medicare Advantage	$ 29,526	54.9%
Group Medicare Advantage	5,588	10.4%
Medicare stand-alone PDP	3,846	7.1%
Total Medicare	38,960	72.4%
Individual commercial	4,243	7.9%
State-based Medicaid	2,341	4.3%
Individual specialty	261	0.5%
Total premiums	45,805	85.1%
Services	9	—%
Total premiums and services revenue	$ 45,814	85.1%

Medicare

We have participated in the Medicare program for private health plans for over 30 years and have established a national presence, offering at least one type of Medicare plan in all 50 states. We have a geographically diverse membership base that we believe provides us with greater ability to expand our network of PPO and HMO providers. We employ strategies including health assessments and clinical guidance programs such as lifestyle and fitness programs for seniors to guide Medicare beneficiaries in making cost-effective decisions with respect to their health care. We believe these strategies result in cost savings that occur from making positive behavior changes.

Medicare is a federal program that provides persons age 65 and over and some disabled persons under the age of 65 certain hospital and medical insurance benefits. CMS, an agency of the United States Department of Health and Human Services, administers the Medicare program. Hospitalization benefits are provided under Part A, without the payment of any premium, for up to 90 days per incident of illness plus a lifetime reserve aggregating 60 days. Eligible beneficiaries are required to pay an annually adjusted premium to the federal government to be eligible for physician care and other services under Part B. Beneficiaries eligible for Part A and Part B coverage under traditional fee-for-service Medicare are still required to pay out-of-pocket deductibles and coinsurance. Throughout this document this program is referred to as Medicare FFS. As an alternative to Medicare FFS, in geographic areas where a managed care organization has contracted with CMS pursuant to the Medicare Advantage program, Medicare beneficiaries may choose to receive benefits from a Medicare Advantage organization under Medicare Part C. Pursuant to Medicare Part C, Medicare Advantage organizations contract with CMS to offer Medicare Advantage plans to provide benefits at least comparable to those offered under Medicare FFS. Our Medicare Advantage plans are discussed more fully below. Prescription drug benefits are provided under Part D.

Individual Medicare Advantage Products

We contract with CMS under the Medicare Advantage program to provide a comprehensive array of health insurance benefits, including wellness programs, chronic care management, and care coordination, to Medicare eligible persons under HMO, PPO, and Private Fee-For-Service, or PFFS, plans in exchange for contractual payments received from CMS, usually a fixed payment per member per month. With each of these products, the beneficiary receives benefits in excess of Medicare FFS, typically including reduced cost sharing, enhanced prescription drug benefits, care coordination, data analysis techniques to help identify member needs, complex case management, tools to guide members in their health care decisions, care management programs, wellness and prevention programs and, in some instances, a reduced monthly Part B premium. Most Medicare Advantage plans offer the prescription drug benefit under Part D as part of the basic plan, subject to cost sharing and other limitations. Accordingly, all of the provisions of the Medicare Part D program described in connection with our stand-alone prescription drug plans in the following section also are applicable to most of our Medicare Advantage plans. Medicare Advantage plans may charge beneficiaries monthly premiums and other copayments for Medicare-covered services or for certain extra benefits. Generally, Medicare-eligible individuals enroll in one of our plan choices between October 15 and December 7 for coverage that begins on the following January 1.

Our Medicare HMO and PPO plans, which cover Medicare-eligible individuals residing in certain counties, may eliminate or reduce coinsurance or the level of deductibles on many other medical services while seeking care from participating in-network providers or in emergency situations. Except in emergency situations or as specified by the plan, most HMO plans provide no out-of-network benefits. PPO plans carry an out-of network benefit that is subject to higher member cost-sharing. In some cases, these beneficiaries are required to pay a monthly premium to the HMO or PPO plan in addition to the monthly Part B premium they are required to pay the Medicare program.

Most of our Medicare PFFS plans are network-based products with in and out of network benefits due to a requirement that Medicare Advantage organizations establish adequate provider networks, except in geographic areas that CMS determines have fewer than two network-based Medicare Advantage plans. In these areas, we offer Medicare PFFS plans that have no preferred network. Individuals in these plans pay us a monthly premium to receive typical Medicare Advantage benefits along with the freedom to choose any health care provider that accepts individuals at rates equivalent to Medicare FFS payment rates.

CMS uses monthly rates per person for each county to determine the fixed monthly payments per member to pay to health benefit plans. These rates are adjusted under CMS's risk-adjustment model which uses health status indicators, or risk scores, to improve the accuracy of payment. The risk-adjustment model, which CMS implemented pursuant to the Balanced Budget Act of 1997 (BBA) and the Benefits and Improvement Protection Act of 2000 (BIPA), generally pays more for members with predictably higher costs and uses principal hospital inpatient diagnoses as well as diagnosis data from ambulatory treatment settings (hospital outpatient department and physician visits) to establish the risk-adjustment payments. Under the risk-adjustment methodology, all health benefit organizations must collect from providers and submit the necessary diagnosis code information to CMS within prescribed deadlines.

At December 31, 2015, we provided health insurance coverage under CMS contracts to approximately 2,753,400 individual Medicare Advantage members, including approximately 587,400 members in Florida. These Florida contracts accounted for premiums revenue of approximately $7.8 billion, which represented approximately 26.3% of our individual Medicare Advantage premiums revenue, or 14.5% of our consolidated premiums and services revenue for the year ended December 31, 2015.

Our HMO, PPO, and PFFS products covered under Medicare Advantage contracts with CMS are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare Advantage products have been renewed for 2016, and all of our product offerings filed with CMS for 2016 have been approved.

Individual Medicare Stand-Alone Prescription Drug Products

We offer stand-alone prescription drug plans, or PDPs, under Medicare Part D, including a PDP offering co-branded with Wal-Mart Stores, Inc., or the Humana-Walmart plan. Generally, Medicare-eligible individuals enroll in one of our plan choices between October 15 and December 7 for coverage that begins on the following January 1. Our stand-alone PDP offerings consist of plans offering basic coverage with benefits mandated by Congress, as well as plans providing enhanced coverage with varying degrees of out-of-pocket costs for premiums, deductibles, and co-insurance. Our revenues from CMS and the beneficiary are determined from our PDP bids submitted annually to CMS. These revenues also reflect the health status of the beneficiary and risk sharing provisions as more fully described in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations under the section titled "Medicare Part D Provisions." Our stand-alone PDP contracts with CMS are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare stand-alone PDP products have been renewed for 2016, and all of our product offerings filed with CMS for 2016 have been approved.

We have administered CMS's Limited Income Newly Eligible Transition, or LI-NET, prescription drug plan program since 2010. This program allows individuals who receive Medicare's low-income subsidy to also receive immediate prescription drug coverage at the point of sale if they are not already enrolled in a Medicare Part D plan. CMS temporarily enrolls newly identified individuals with both Medicare and Medicaid into the LI-NET prescription drug plan program, and subsequently transitions each member into a Medicare Part D plan that may or may not be a Humana Medicare plan.

Group Medicare Advantage and Medicare stand-alone PDP

We offer products that enable employers that provide post-retirement health care benefits to replace Medicare wrap or Medicare supplement products with Medicare Advantage or stand-alone PDPs from Humana. These products offer the same types of benefits and services available to members in our individual Medicare plans discussed previously and can be tailored to closely match an employer's post-retirement benefit structure.

State-based Medicaid Contracts

Our state-based contracts allow us to serve members enrolled in state-based Medicaid programs including Temporary Assistance to Needy Families, or TANF, Long-Term Support Services, or LTSS, and dual eligible demonstration programs. TANF is a state and federally funded program that provides cash assistance and supportive services to assist families with children under age 18, helping them achieve economic self-sufficiency. LTSS is a state and federally funded program that offers states a broad and flexible set of program design options and refers to the delivery of long-term support services for our members who receive home and community or institution-based services for long-term care. Our American Eldercare Inc., or American Eldercare, acquisition in 2013 expanded our LTSS footprint in Florida. Our contracts are generally for three to five year terms.

Medicare beneficiaries who also qualify for Medicaid due to low income or special needs are known as dual eligible beneficiaries, or dual eligibles. The dual eligible population represents a disproportionate share of Medicaid and Medicare costs. There were approximately 10.2 million dual eligible individuals in the United States in 2015, trending upward due to Medicaid eligibility expansions and individuals aging into the Medicare program. Since the enactment of the Health Care Reform Law, states are pursuing stand-alone dual eligible CMS demonstration programs in which Medicare, Medicaid, and LTSS benefits are more tightly integrated. Eligibility for participation in these stand-alone dual eligible demonstration programs may require state-based contractual relationships in existing Medicaid programs.

We have contracts to serve Medicaid eligible members in Florida under the TANF and LTSS programs. Our contracts in Virginia and Illinois serve members under each state's stand-alone dual eligible demonstration program. In addition, in Illinois we have an Integrated Care Program, or ICP, Medicaid contract. Our Kentucky Medicaid contract is subject to a 100% coinsurance contract with CareSource Management Group Company, ceding all the risk to CareSource.

In addition to the dual eligible members we serve under the Virginia and Illinois demonstration program, we serve other dual eligible members enrolled in our Medicare Advantage and stand-alone prescription drug plans. As of December 31, 2015, we served approximately 440,000 dual eligible members in our Medicare Advantage plans and approximately 1,070,000 dual eligible members in our stand-alone prescription drug plans.

Individual Commercial Coverage

Our individual health plans are marketed under the HumanaOne® brand. We offer products both on and off of the public exchange. We offer products on exchanges where we can achieve an affordable cost of care, including HMO offerings and select networks in most markets. Our off-exchange products are primarily PPO and POS offerings, including plans issued prior to 2014 that were previously underwritten. Policies issued prior to the enactment of the Health Care Reform Law on March 23, 2010 are grandfathered policies. Grandfathered policies are exempt from most of the requirements of the Health Care Reform Law, including mandated benefits. However, our grandfathered plans include provisions that guarantee renewal of coverage for as long as the plan is continued and the individual chooses to renew. Policies issued between March 23, 2010 and December 31, 2013 are required to conform to the Health Care Reform Law, including mandated benefits, upon renewal at various transition dates between 2016 and 2017 depending on the state.

Prior to 2014, our HumanaOne® plans primarily were offered as PPO plans where we could generally underwrite risk and utilize our existing networks and distribution channels.

Rewards-based wellness programs are included with many individual products. We also offer optional benefits such as dental, vision, life, and a portfolio of financial protection products.

Group Segment Products

This segment is comprised of products sold to employer groups including medical and supplemental benefit plans as well as health and wellness products as described in the discussion that follows. The following table presents our premiums and services revenue for the Group segment by product for the year ended December 31, 2015:

	Group Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
External Revenue:		
Premiums:		
Fully-insured commercial group	$ 5,493	10.2%
Group specialty	1,055	2.0%
Military services	21	—%
Total premiums	6,569	12.2%
Services	698	1.3%
Total premiums and services revenue	$ 7,267	13.5%
Intersegment services revenue:		
Wellness	$ 93	n/a
Total intersegment services revenue	$ 93	

n/a – not applicable

Group Commercial Coverage

Our commercial products sold to employer groups include a broad spectrum of major medical benefits with multiple in-network coinsurance levels and annual deductible choices that employers of all sizes can offer to their employees on either a fully-insured, through HMO, PPO, or POS plans, or self-funded basis. Our plans integrate clinical programs, plan designs, communication tools, and spending accounts. We participate in the Federal Employee Health Benefits Program, or FEHBP, primarily with our HMO offering in certain markets. FEHBP is the government's health insurance program for Federal employees, retirees, former employees, family members, and spouses. As with our individual commercial products, the employer group offerings include HumanaVitality®, our wellness and loyalty reward program.

Our administrative services only, or ASO, products are offered to employers who self-insure their employee health plans. We receive fees to provide administrative services which generally include the processing of claims, offering access to our provider networks and clinical programs, and responding to customer service inquiries from members of self-funded employers. These products may include all of the same benefit and product design characteristics of our fully-insured HMO, PPO, or POS products described previously. Under ASO contracts, self-funded employers generally retain the risk of financing substantially all of the cost of health benefits. However, more than half of our ASO customers purchase stop loss insurance coverage from us to cover catastrophic claims or to limit aggregate annual costs.

As with individual commercial policies, employers can customize their offerings with optional benefits such as dental, vision, life, and a portfolio of voluntary benefit products.

Military Services

Under our TRICARE South Region contract with the United States Department of Defense, or DoD, we provide administrative services to arrange health care services for the dependents of active duty military personnel and for retired military personnel and their dependents. We have participated in the TRICARE program since 1996 under contracts with the DoD. On April 1, 2012, we began delivering services under our current TRICARE South Region contract that the Defense Health Agency, or DHA (formerly known as the TRICARE Management Activity), awarded to us on February 25, 2011. Under the current contract, we provide administrative services while the federal government

retains all of the risk of the cost of health benefits. Accordingly, we account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement.

Wellness

We offer wellness solutions including our Humana Vitality® wellness and loyalty rewards program, health coaching, and clinical programs. These programs, when offered collectively to employer customers as our Total Health product, turn any standard plan of the employer's choosing into an integrated health and well-being solution that encourages participation in these programs.

Our Humana Vitality® program provides our members with access to a science-based, actuarially driven wellness and loyalty program that features a wide range of well-being tools and rewards that are customized to an individual's needs and wants. A key element of the program includes a sophisticated health-behavior-change model supported by an incentive program.

We also provide employee assistance programs and coaching services including a comprehensive turn-key coaching program, an enhancement to a medically based coaching protocol and a platform that makes coaching programs more efficient.

Our Healthcare Services Segment Products

The products offered by our Healthcare Services segment are key to our integrated care delivery model. This segment is comprised of stand-alone businesses that offer services including pharmacy solutions, provider services, home based services, clinical programs, and predictive modeling and informatics services to other Humana businesses, as well as external health plan members, external health plans, and other employers or individuals and are described in the discussion that follows. Our intersegment revenue is described in Note 17 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. The following table presents our services revenue for the Healthcare Services segment by line of business for the year ended December 31, 2015:

	Healthcare Services Segment Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Intersegment revenue:		
Pharmacy solutions	$ 20,551	n/a
Provider services	1,291	n/a
Home based services	875	n/a
Clinical programs	203	n/a
Total intersegment revenue	$ 22,920	
External services revenue:		
Provider services	$ 515	0.9%
Home based services	140	0.3%
Pharmacy solutions	30	0.1%
Total external services revenue	$ 685	1.3%

n/a – not applicable

Pharmacy solutions

Humana Pharmacy Solutions®, or HPS, manages traditional prescription drug coverage for both individuals and employer groups in addition to providing a broad array of pharmacy solutions. HPS also operates prescription mail order services for brand, generic, and specialty drugs and diabetic supplies through Humana Pharmacy, Inc., as well as research services.

Provider services

We operate full-service, multi-specialty medical centers, primarily in Florida, staffed by primary care providers and medical specialists practicing cardiology, endocrinology, geriatric medicine, internal medicine, ophthalmology, neurology, and podiatry.

We also operate Transcend, a Medical Services Organization, or MSO, that coordinates medical care for Medicare Advantage beneficiaries primarily in Florida, Arkansas, Alabama and Kansas. Transcend provides resources in care coordination, financial risk management, clinical integration and patient engagement that help physicians improve the patient experience as well as care outcomes. Transcend collaborates with physicians, medical groups and integrated delivery systems to successfully transition to value-based care by engaging, partnering and offering practical services and solutions. Transcend represents a key component of our integrated care delivery model which we believe is scalable to new markets. In addition, we own a noncontrolling equity interest in MCCI Holdings, LLC, a privately held MSO headquartered in Miami, Florida, that primarily coordinates medical care for Medicare Advantage beneficiaries in Florida, Texas and Georgia.

Programs to enhance the quality of care for members are key elements of our integrated care delivery model. We believe that technology represents a significant opportunity in health care that positively impacts our members. Our Transcend Insights business focuses on population health and wellness capabilities across the sector and serves health care systems, physicians and care teams by leveraging actionable data to help improve patient care. We help care teams and patients transition from a reactive approach to care to one that proactively promotes health and long-term wellness. We have enhanced our health information technology capabilities enabling us to create a more complete view of an individual's health, designed to connect, coordinate and simplify health care while reducing costs. These capabilities include our health care analytics engine, which reviews billions of clinical data points on millions of patients each day to provide members, providers, and payers real-time clinical insights to identify evidence-based gaps-in-care, drug safety alerts and other critical health concerns to improve outcomes. Additionally, our technology connects Humana and disparate electronic health record systems to enable the exchange of essential health information in real-time to provide physicians and care teams with a single, comprehensive patient view.

On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc., or Concentra, that delivered occupational medicine, urgent care, physical therapy, and wellness services to employees and the general public through its operation of medical centers and worksite medical facilities.

Home based services

Via in-home care, telephonic health counseling/coaching, and remote monitoring, we are actively involved in the care management of our customers with the greatest needs. Home based services include the operations of Humana At Home, Inc., or Humana At Home®. As a chronic-care provider of in-home care for seniors, we provide innovative and holistic care coordination services for individuals living with multiple chronic conditions, individuals with disabilities, fragile and aging-in-place members and their care givers. We focus our deployment of these services in geographies, such as Florida, with a high concentration of members living with multiple chronic conditions. The clinical support and care provided by Humana At Home® is designed to improve health outcomes and result in a higher number of days members can spend at their homes instead of in an acute care facility. To that end, we have accelerated our process for identifying and reaching out to members in need of clinical intervention. At December 31, 2015, we enrolled approximately 590,300 members with complex chronic conditions in the Humana Chronic Care Program, a 40.3% increase compared with approximately 420,700 members at December 31, 2014, reflecting enhanced predictive modeling capabilities and focus on proactive clinical outreach and member engagement, particularly for our Medicare Advantage membership. We believe these initiatives lead to better health outcomes for our members and lower health care costs.

Clinical programs

We are committed to the integrated physical and mental health of our members. Accordingly, we take a holistic approach to healthcare, offering care management, behavioral health services and wellness programs.

Our care management programs take full advantage of the population health, wellness and clinical applications offered by Transcend Insights and CareHub, our clinical management tool used by providers and care managers across the company to help our members achieve their best health, to offer various levels of support, matching the intensity of the support to the needs of members with ongoing health challenges through telephonic and onsite programs. These programs include Personal Nurse, chronic condition management, and case management as well as programs supporting maternity, cancer, neonatal intensive care unit, and transplant services.

In addition, we focus on the behavioral aspects of a members' health such as managing stress and work/life balance. Humana Behavioral Health takes a holistic, mind-and-body approach to behavioral healthcare to address the whole person, encouraging faster recovery and improving clinical outcomes while reducing costs for both the member and employer.

Other Businesses

Other Businesses primarily includes our closed block of long-term care insurance policies described below. Total premiums and services revenue for our Other Businesses was $49 million, or 0.1% of consolidated premiums and services revenue for the year ended December 31, 2015.

We have a non-strategic closed block of approximately 31,800 long-term care insurance policies associated with our acquisition of KMG America Corporation in 2007. Long-term care insurance policies are intended to protect the insured from the cost of long-term care services including those provided by nursing homes, assisted living facilities, and adult day care as well as home health care services. No new policies have been written since 2005 under this closed block.

Membership

The following table summarizes our total medical membership at December 31, 2015, by market and product:

	Retail Segment					Group Segment					
	(in thousands)										
	Individual Medicare Advantage	Group Medicare Advantage	Medicare stand-alone PDP	Individual Commercial	State-based contracts	Fully-insured commercial Group	ASO	Military services	Other Businesses	Total	Percent of Total
Florida	587.4	19.9	320.5	288.4	351.9	168.4	33.8	—	—	1,770.3	12.5%
Texas	215.6	68.8	281.4	163.8	—	217.3	107.2	—	—	1,054.1	7.4%
Georgia	105.2	2.5	115.0	270.2	—	155.3	18.6	—	—	666.8	4.7%
Kentucky	69.9	56.1	203.8	17.6	—	109.3	195.5	—	—	652.2	4.6%
Ohio	105.8	155.6	143.5	20.8	—	46.3	70.1	—	—	542.1	3.8%
California	64.9	0.1	420.7	13.3	—	—	—	—	—	499.0	3.5%
Illinois	81.7	20.8	154.1	11.3	12.0	82.4	95.0	—	—	457.3	3.2%

Provider Arrangements

We provide our members with access to health care services through our networks of health care providers whom we employ or with whom we have contracted, including hospitals and other independent facilities such as outpatient surgery centers, primary care providers, specialist physicians, dentists, and providers of ancillary health care services and facilities. These ancillary services and facilities include laboratories, ambulance services, medical equipment services, home health agencies, mental health providers, rehabilitation facilities, nursing homes, optical services, and pharmacies. Our membership base and the ability to influence where our members seek care generally enable us to obtain contractual discounts with providers.

We use a variety of techniques to provide access to effective and efficient use of health care services for our members. These techniques include the coordination of care for our members, product and benefit designs, hospital inpatient management systems, the use of sophisticated analytics, and enrolling members into various care management programs. The focal point for health care services in many of our HMO networks is the primary care provider who, under contract with us, provides services to our members, and may control utilization of appropriate services by directing or approving hospitalization and referrals to specialists and other providers. Some physicians may have arrangements under which they can earn bonuses when certain target goals relating to the provision of quality patient care are met. We have available care management programs related to complex chronic conditions such as congestive heart failure and coronary artery disease. We also have programs for prenatal and premature infant care, asthma related illness, end stage renal disease, diabetes, cancer, and certain other conditions.

We typically contract with hospitals on either (1) a per diem rate, which is an all-inclusive rate per day, (2) a case rate or diagnosis-related groups (DRG), which is an all-inclusive rate per admission, or (3) a discounted charge for inpatient hospital services. Outpatient hospital services generally are contracted at a flat rate by type of service, ambulatory payment classifications, or APCs, or at a discounted charge. APCs are similar to flat rates except multiple services and procedures may be aggregated into one fixed payment. These contracts are often multi-year agreements, with rates that are adjusted for inflation annually based on the consumer price index, other nationally recognized inflation indexes, or specific negotiations with the provider. Outpatient surgery centers and other ancillary providers typically are contracted at flat rates per service provided or are reimbursed based upon a nationally recognized fee schedule such as the Medicare allowable fee schedule.

Our contracts with physicians typically are renewed automatically each year, unless either party gives written notice, generally ranging from 90 to 120 days, to the other party of its intent to terminate the arrangement. Most of the physicians in our PPO networks and some of our physicians in our HMO networks are reimbursed based upon a fixed fee schedule, which typically provides for reimbursement based upon a percentage of the standard Medicare allowable fee schedule.

The terms of our contracts with hospitals and physicians may also vary between Medicare and commercial business. A significant portion of our Medicare network contracts, including those with both hospitals and physicians, are tied to Medicare reimbursement levels and methodologies.

Automatic reductions to the federal budget, known as sequestration, took effect on April 1, 2013, including aggregate reductions to Medicare payments to providers of up to 2% per fiscal year. Due to the uncertainty around the application of these reductions, there can be no assurances that we can completely offset any reductions to the Medicare healthcare programs. See "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Capitation

We offer providers a continuum of opportunities to increase the integration of care and offer assistance to providers in transitioning from a fee-for-service to a value-based arrangement. These include performance bonuses, shared savings and shared risk relationships. For some of our medical membership, we share risk with providers under capitation contracts where physicians and hospitals accept varying levels of financial risk for a defined set of membership, primarily HMO membership. Under the typical capitation arrangement, we prepay these providers a monthly fixed-fee per

member, known as a capitation (per capita) payment, to cover all or a defined portion of the benefits provided to the capitated member.

We believe these risk-based models represent a key element of our integrated care delivery model at the core of our strategy. Our health plan subsidiaries may enter into these risk-based contracts with third party providers or our owned provider subsidiaries.

At December 31, 2015, approximately 1,100,000 members, or 7.7% of our medical membership, were covered under risk-based contracts, including 863,000 individual Medicare Advantage members, or 31.3% of our total individual Medicare Advantage membership.

Physicians under capitation arrangements typically have stop loss coverage so that a physician's financial risk for any single member is limited to a maximum amount on an annual basis. We typically process all claims and monitor the financial performance and solvency of our capitated providers. However, we delegated claim processing functions under capitation arrangements covering approximately 196,600 HMO members, including 172,000 individual Medicare Advantage members, or 19.9% of the 863,000 individual Medicare Advantage members covered under risk-based contracts at December 31, 2015, with the provider assuming substantially all the risk of coordinating the members' health care benefits. Capitation expense under delegated arrangements for which we have a limited view of the underlying claims experience was approximately $768 million, or 1.7% of total benefits expense, for the year ended December 31, 2015. We remain financially responsible for health care services to our members in the event our providers fail to provide such services.

Accreditation Assessment

Our accreditation assessment program consists of several internal programs, including those that credential providers and those designed to meet the audit standards of federal and state agencies as well as external accreditation standards. We also offer quality and outcome measurement and improvement programs such as the Health Care Effectiveness Data and Information Sets, or HEDIS, which is used by employers, government purchasers and the National Committee for Quality Assurance, or NCQA, to evaluate health plans based on various criteria, including effectiveness of care and member satisfaction.

Providers participating in our networks must satisfy specific criteria, including licensing, patient access, office standards, after-hours coverage, and other factors. Most participating hospitals also meet accreditation criteria established by CMS and/or the Joint Commission on Accreditation of Healthcare Organizations.

Recredentialing of participating providers occurs every two to three years, depending on applicable state laws. Recredentialing of participating providers includes verification of their medical licenses, review of their malpractice liability claims histories, review of their board certifications, if applicable, and review of applicable quality information. A committee, composed of a peer group of providers, reviews the applications of providers being considered for credentialing and recredentialing.

We request accreditation for certain of our health plans and/or departments from NCQA, the Accreditation Association for Ambulatory Health Care, and URAC. Accreditation or external review by an approved organization is mandatory in the states of Florida and Kansas for licensure as an HMO. Additionally, all products sold on the federal and state marketplaces are required to be accredited. Certain commercial businesses, like those impacted by a third-party labor agreement or those where a request is made by the employer, may require or prefer accredited health plans.

NCQA reviews our compliance based on standards for quality improvement, credentialing, utilization management, member connections, and member rights and responsibilities. We have achieved and maintained NCQA accreditation in most of our commercial, Medicare and Medicaid HMO/POS markets with enough history and membership, and for many of our PPO markets.

Sales and Marketing

We use various methods to market our products, including television, radio, the Internet, telemarketing, and direct mailings.

At December 31, 2015, we employed approximately 1,600 sales representatives, as well as approximately 1,400 telemarketing representatives who assisted in the marketing of Medicare and individual commercial health insurance and specialty products in our Retail segment, including making appointments for sales representatives with prospective members. We have a marketing arrangement with Wal-Mart Stores, Inc., or Wal-Mart, for our individual Medicare stand-alone PDP offering. We also sell group Medicare Advantage products through large employers. In addition, we market our Medicare and individual commercial health insurance and specialty products through licensed independent brokers and agents. For our Medicare products, commissions paid to employed sales representatives and independent brokers and agents are based on a per unit commission structure, regulated in structure and amount by CMS. For our individual commercial health insurance and specialty products, we generally pay brokers a commission based on premiums, with commissions varying by market and premium volume. In addition to a commission based directly on premium volume for sales to particular customers, we also have programs that pay brokers and agents based on other metrics. These include commission bonuses based on sales that attain certain levels or involve particular products. We also pay additional commissions based on aggregate volumes of sales involving multiple customers.

In our Group segment, individuals may become members of our commercial HMOs and PPOs through their employers or other groups, which typically offer employees or members a selection of health insurance products, pay for all or part of the premiums, and make payroll deductions for any premiums payable by the employees. We attempt to become an employer's or group's exclusive source of health insurance benefits by offering a variety of HMO, PPO, and specialty products that provide cost-effective quality health care coverage consistent with the needs and expectations of their employees or members. In addition, we have begun to offer plans to employer groups through private exchanges. Employers can give their employees a set amount of money and then direct them to a private exchange. There, employees can shop for a health plan and other benefits based on what the employer has selected as options. We use licensed independent brokers, independent agents, and employees to sell our group products. Many of our larger employer group customers are represented by insurance brokers and consultants who assist these groups in the design and purchase of health care products. We pay brokers and agents using the same commission structure described above for our individual commercial health insurance and specialty products.

Underwriting

Beginning in 2014, the Health Care Reform Law requires all individual and certain group health plans to guarantee issuance and renew coverage without pre-existing condition exclusions or health-status rating adjustments. Accordingly, newly issued individual and certain group health plans are not subject to underwriting in 2014 and beyond. Further, underwriting techniques are not employed in connection with our Medicare, military services, or Medicaid products because government regulations require us to accept all eligible applicants regardless of their health or prior medical history.

Prior to 2014, through the use of internally developed underwriting criteria, we determined the risk we were willing to assume and the amount of premium to charge for our commercial products. In most instances, employer and other groups had to meet our underwriting standards in order to qualify to contract with us for coverage.

Competition

The health benefits industry is highly competitive. Our competitors vary by local market and include other managed care companies, national insurance companies, and other HMOs and PPOs. Many of our competitors have a larger membership base and/or greater financial resources than our health plans in the markets in which we compete. Our ability to sell our products and to retain customers may be influenced by such factors as those described in Item 1A. – Risk Factors in this 2015 Form 10-K.

Government Regulation

Diverse legislative and regulatory initiatives at both the federal and state levels continue to affect aspects of the nation's health care system.

Our management works proactively to ensure compliance with all governmental laws and regulations affecting our business. We are unable to predict how existing federal or state laws and regulations may be changed or interpreted, what additional laws or regulations affecting our businesses may be enacted or proposed, when and which of the proposed laws will be adopted or what effect any such new laws and regulations will have on our results of operations, financial position, or cash flows.

For a description of certain material current activities in the federal and state legislative areas, see Item 1A. – Risk Factors in this 2015 Form 10-K.

Certain Other Services

Captive Insurance Company

We bear general business risks associated with operating our Company such as professional and general liability, employee workers' compensation, and officer and director errors and omissions risks. Professional and general liability risks may include, for example, medical malpractice claims and disputes with members regarding benefit coverage. We retain certain of these risks through our wholly-owned, captive insurance subsidiary. We reduce exposure to these risks by insuring levels of coverage for losses in excess of our retained limits with a number of third-party insurance companies. We remain liable in the event these insurance companies are unable to pay their portion of the losses.

Centralized Management Services

We provide centralized management services to each of our health plans and to our business segments from our headquarters and service centers. These services include management information systems, product development and administration, finance, human resources, accounting, law, public relations, marketing, insurance, purchasing, risk management, internal audit, actuarial, underwriting, claims processing, billing/enrollment, and customer service. Through intercompany service agreements approved, if required, by state regulatory authorities, Humana Inc., our parent company, charges a management fee for reimbursement of certain centralized services provided to its subsidiaries.

Employees

As of December 31, 2015, we had approximately 50,100 employees and approximately 1,600 additional medical professionals working under management agreements primarily between us and affiliated physician-owned associations. We believe we have good relations with our employees and have not experienced any work stoppages.

ITEM 1A. RISK FACTORS

Risks Relating to the Merger with Aetna

The merger with Aetna is subject to various closing conditions, including governmental and regulatory approvals as well as other uncertainties and there can be no assurances as to whether and when it may be completed.

On July 2, 2015, we entered into an Agreement and Plan of Merger (which we refer to as the "Merger Agreement"), with Aetna Inc. (or "Aetna"), Echo Merger Sub, Inc. (or "Sub 1") and Echo Merger Sub, LLC (or "Sub 2"), each a wholly owned subsidiary of Aetna. Under the terms and subject to the conditions set forth in the Merger Agreement, Sub 1 will merge with and into us (the "Merger"). In the Merger, each outstanding share of our common stock will be converted into the right to receive (i) 0.8375 of a share of Aetna common stock and (ii) $125 in cash without interest, subject to any required withholding taxes. Immediately after the Merger, we (as the surviving corporation in the Merger) will be merged with and into Sub 2, with Sub 2 remaining as the surviving entity of that merger and as a wholly owned subsidiary of Aetna, to be renamed Humana LLC. The Merger is expected to close in the second half of 2016.

On October 19, 2015, at separate meetings, our stockholders approved the adoption of the Merger Agreement, and Aetna's shareholders approved the issuance of Aetna common stock in the Merger. Consummation of the Merger remains subject to other customary closing conditions, however, a number of which are not within our or Aetna's control, and it is possible that such conditions may prevent, delay or otherwise materially adversely affect the completion of the Merger. These conditions include, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, (ii) the absence of legal restraints and prohibitions on the consummation of the Merger, (iii) listing of the Aetna common stock to be issued in the Merger on the New York Stock Exchange, (iv) subject to the relevant standards set forth in the Merger Agreement, the accuracy of the representations and warranties made by each party, (v) material compliance by each party with its covenants in the Merger Agreement, and (vi) no "Company Material Adverse Effect" with respect to us and no "Parent Material Adverse Effect" with respect to Aetna, in each case since the execution of and as defined in the Merger Agreement. In addition, Aetna's obligation to consummate the Merger is subject to (a) the condition that the required regulatory approvals do not impose any condition that, individually or in the aggregate, would reasonably be expected to have a "Regulatory Material Adverse Effect" (as such term is defined in the Merger Agreement), and (b) CMS has not imposed any sanctions with respect to our Medicare Advantage business that, individually or in the aggregate, is or would reasonably be expected to be material and adverse to us and its subsidiaries, taken as a whole. We cannot predict with certainty whether and when any of the required closing conditions will be satisfied or if another uncertainty may arise.

If the Merger does not receive, or timely receive, the required regulatory approvals and clearances, or if any regulatory agencies impose certain conditions relating to the required regulatory approvals that would reasonably be expected to have a "Regulatory Material Adverse Effect", or if an event occurs that delays or prevents the Merger, such failure or delay to complete the Merger may cause uncertainty or other negative consequences that may materially and adversely affect our results of operations, financial position, cash flows and the price per share for our common stock.

The Merger Agreement prohibits us from pursuing alternative transactions to the Merger.

Following the receipt of approval by our stockholders and Aetna's shareholders (with respect to the Aetna stock to be issued in the transaction) on October 19, 2015, the Merger Agreement is binding on the parties, subject to customary closing conditions. The Merger Agreement prohibits us from initiating, soliciting, knowingly encouraging, knowingly facilitating or entering into discussions or negotiations with any third party regarding alternative acquisition proposals. This provision prevents us from affirmatively seeking offers from other possible acquirers that may be superior to the pending Merger. We do not have the ability to terminate the Merger Agreement in order to accept a superior proposal since our stockholders have voted to approve the adoption of the Merger Agreement.

The number of shares of Aetna common stock that our stockholders will receive in the Merger is based on a fixed exchange ratio. Because the market price of Aetna's common stock will fluctuate, our stockholders cannot be certain of the value of the portion of the merger consideration to be paid in Aetna common stock.

Upon completion of the Merger, each outstanding share of our common stock will be converted into the right to receive (i) 0.8375 of a share of Aetna common stock and (ii) $125 in cash without interest, subject to any required withholding taxes. The exchange ratio for determining the number of shares of Aetna common stock that our stockholders will receive in the Merger is fixed and will not be adjusted for changes in the market price of Aetna's common stock, which will likely fluctuate before and after the completion of the Merger. Fluctuations in the value of Aetna's common stock could result from changes in the business, operations or prospects of Aetna prior to or following the closing of the Merger, regulatory considerations, general market and economic conditions and other factors both within and beyond the control of us or Aetna.

While the Merger is pending, we are subject to business uncertainties and contractual restrictions that could materially adversely affect our results of operations, financial position and cash flows or result in a loss of employees, customers, members or suppliers.

The Merger Agreement includes restrictions on the conduct of our business prior to the completion or termination of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of specified limitations absent Aetna's prior written consent. We may find that these and other contractual restrictions in the Merger Agreement may delay or prevent us from responding, or limit our ability to respond, effectively to competitive pressures, industry developments and future business opportunities that may arise during such period, even if our management believes they may be advisable. The pendency of the Merger may also divert management's attention and our resources from ongoing business and operations.

Our employees, customers, members and suppliers may experience uncertainties about the effects of the Merger. In connection with the pending Merger, it is possible that some customers, members, suppliers and other parties with whom we have a business relationship may delay or defer certain business decisions or might decide to seek to terminate, change or renegotiate their relationship with us as a result of the Merger. Similarly, current and prospective employees may experience uncertainty about their future roles with us following completion of the Merger, which may materially adversely affect our ability to attract and retain key employees. If any of these effects were to occur, it could materially and adversely impact our results of operations, financial position, cash flows and the price per share for our common stock.

Failure to consummate the Merger could negatively impact our results of operations, financial position, cash flows and the price per share for our common stock.

If the Merger is not consummated, our ongoing businesses may be materially and adversely affected and, we will not have realized any of the potential benefits of having consummated the transaction, and we will be subject to a number of risks, including the following:

- matters relating to the Merger (including integration planning) may require substantial commitments of time and resources by our management, which could otherwise have been devoted to other opportunities that may have been beneficial to us;
- the Merger Agreement includes restrictions on the conduct of our business prior to the completion or termination of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of specified limitations absent Aetna's prior written consent. We may find that these and other contractual restrictions in the Merger Agreement may delay or prevent us from responding, or limit our ability to respond, effectively to competitive pressures, industry developments and future business opportunities that may arise during such period, even if our management believes they may be advisable. The pendency of the Merger may also divert management's attention and our resources from ongoing business and operations;
- we may be required to pay a termination fee to Aetna and would have incurred expenses relating to the Merger; and

- we also could be subject to litigation related to our failure to consummate the Merger or to perform our obligations under the Merger Agreement.

If the Merger is not consummated, these risks may materially and adversely affect our results of operations, financial position, cash flows and the price per share for our common stock.

Risks Relating to Our Business

If we do not design and price our products properly and competitively, if the premiums we charge are insufficient to cover the cost of health care services delivered to our members, if we are unable to implement clinical initiatives to provide a better health care experience for our members, lower costs and appropriately document the risk profile of our members, or if our estimates of benefits expense are inadequate, our profitability may be materially adversely affected. We estimate the costs of our benefits expense payments, and design and price our products accordingly, using actuarial methods and assumptions based upon, among other relevant factors, claim payment patterns, medical cost inflation, and historical developments such as claim inventory levels and claim receipt patterns. We continually review these estimates, however these estimates involve extensive judgment, and have considerable inherent variability because they are extremely sensitive to changes in claim payment patterns and medical cost trends. Any reserve, including a premium deficiency reserve, may be insufficient.

We use a substantial portion of our revenues to pay the costs of health care services delivered to our members. These costs include claims payments, capitation payments to providers (predetermined amounts paid to cover services), and various other costs incurred to provide health insurance coverage to our members. These costs also include estimates of future payments to hospitals and others for medical care provided to our members. Generally, premiums in the health care business are fixed for one-year periods. Accordingly, costs we incur in excess of our benefit cost projections generally are not recovered in the contract year through higher premiums. We estimate the costs of our future benefit claims and other expenses using actuarial methods and assumptions based upon claim payment patterns, medical inflation, historical developments, including claim inventory levels and claim receipt patterns, and other relevant factors. We also record benefits payable for future payments. We continually review estimates of future payments relating to benefit claims costs for services incurred in the current and prior periods and make necessary adjustments to our reserves, including premium deficiency reserves where appropriate. However, these estimates involve extensive judgment, and have considerable inherent variability that is sensitive to claim payment patterns and medical cost trends. Many factors may and often do cause actual health care costs to exceed what was estimated and used to set our premiums. These factors may include:

- increased use of medical facilities and services;
- increased cost of such services;
- increased use or cost of prescription drugs, including specialty prescription drugs;
- the introduction of new or costly treatments, including new technologies;
- our membership mix;
- variances in actual versus estimated levels of cost associated with new products, benefits or lines of business, product changes or benefit level changes;
- changes in the demographic characteristics of an account or market;
- changes or reductions of our utilization management functions such as preauthorization of services, concurrent review or requirements for physician referrals;
- changes in our pharmacy volume rebates received from drug manufacturers;
- catastrophes, including acts of terrorism, public health epidemics, or severe weather (e.g. hurricanes and earthquakes);
- medical cost inflation; and
- government mandated benefits or other regulatory changes, including any that result from the Health Care Reform Law.

Key to our operational strategy is the implementation of clinical initiatives that we believe provide a better health care experience for our members, lower the cost of healthcare services delivered to our members, and appropriately document the risk profile of our members. Our profitability and competitiveness depend in large part on our ability to appropriately manage health care costs through, among other things, the application of medical management programs such as our chronic care management program.

In addition, we also estimate costs associated with long-duration insurance policies including long-term care, life insurance, annuities, and certain health and other supplemental insurance policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these future policy benefit reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Because these policies have long-term claim payout periods, there is a greater risk of significant variability in claims costs, either positive or negative. Our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. We monitor the loss experience of these long-term care insurance policies, and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. However, to the extent premium rate increases or loss experience vary from the assumptions we have locked in, additional future adjustments to reserves could be required.

While we proactively attempt to effectively manage our operating expenses, increases or decreases in staff-related expenses, additional investment in new products (including our opportunities in the Medicare programs, state-based contracts, participation in health insurance exchanges, and expansion of clinical capabilities as part of our integrated care delivery model), investments in health and well-being product offerings, acquisitions, new taxes and assessments (including the non-deductible health insurance industry fee and other assessments under the Health Care Reform Law), and implementation of regulatory requirements may increase our operating expenses.

Failure to adequately price our products or estimate sufficient benefits payable or future policy benefits payable, or effectively manage our operating expenses, may result in a material adverse effect on our results of operations, financial position, and cash flows.

We are in a highly competitive industry. Some of our competitors are more established in the health care industry in terms of a larger market share and have greater financial resources than we do in some markets. In addition, other companies may enter our markets in the future, including emerging competitors in the Medicare program or competitors in the delivery of health care services. We may also face increased competition due to participation by other insurers in the health insurance exchanges implemented under the Health Care Reform Law. We believe that barriers to entry in our markets are not substantial, so the addition of new competitors can occur relatively easily, and customers enjoy significant flexibility in moving between competitors. Contracts for the sale of commercial products are generally bid upon or renewed annually. While health plans compete on the basis of many factors, including service and the quality and depth of provider networks, we expect that price will continue to be a significant basis of competition. In addition to the challenge of controlling health care costs, we face intense competitive pressure to contain premium prices. Factors such as business consolidations, strategic alliances, legislative reform, and marketing practices create pressure to contain premium price increases, despite being faced with increasing medical costs.

The policies and decisions of the federal and state governments regarding the Medicare, military, Medicaid and health insurance exchange programs in which we participate have a substantial impact on our profitability. These governmental policies and decisions, which we cannot predict with certainty, directly shape the premiums or other revenues to us under the programs, the eligibility and enrollment of our members, the services we provide to our members, and our administrative, health care services, and other costs associated with these programs. Legislative or regulatory actions, such as those resulting in a reduction in premium payments to us, an increase in our cost of administrative and health care services, or additional fees, taxes or assessments, may have a material adverse effect on our results of operations, financial position, and cash flows.

Premium increases, introduction of new product designs, and our relationships with our providers in various markets, among other issues, could also affect our membership levels. Other actions that could affect membership levels include our possible exit from or entrance into Medicare or commercial markets, or the termination of a large contract.

If we do not compete effectively in our markets, if we set rates too high or too low in highly competitive markets to keep or increase our market share, if membership does not increase as we expect, if membership declines, or if we lose membership with favorable medical cost experience while retaining or increasing membership with unfavorable medical cost experience, our results of operations, financial position, and cash flows may be materially adversely affected.

If we fail to effectively implement our operational and strategic initiatives, including our Medicare initiatives, our state-based contracts strategy, and our participation in the new health insurance exchanges, our business may be materially adversely affected, which is of particular importance given the concentration of our revenues in these products.

Our future performance depends in large part upon our ability to execute our strategy, including opportunities created by the expansion of our Medicare programs, the successful implementation of our integrated care delivery model, our strategy with respect to state-based contracts, including those covering members dually eligible for the Medicare and Medicaid programs, and our participation in health insurance exchanges.

We have made substantial investments in the Medicare program to enhance our ability to participate in these programs. We have increased the size of our Medicare geographic reach through expanded Medicare product offerings. We offer both stand-alone Medicare prescription drug coverage and Medicare Advantage health plans with prescription drug coverage in addition to our other product offerings. We offer a Medicare prescription drug plan in 50 states as well as Puerto Rico and the District of Columbia. The growth of our Medicare products is an important part of our business strategy. Any failure to achieve this growth may have a material adverse effect on our results of operations, financial position, or cash flows. In addition, the expansion of our Medicare products in relation to our other businesses may intensify the risks to us inherent in Medicare products. There is significant concentration of our revenues in Medicare products, with approximately 72% of our total premiums and services revenue for the year ended December 31, 2015 generated from our Medicare products, including 14% derived from our individual Medicare Advantage contracts with CMS in Florida. These expansion efforts may result in less diversification of our revenue stream and increased risks associated with operating in a highly regulated industry, as discussed further below.

The recently implemented Health Care Reform Law created a federal Medicare-Medicaid Coordination Office to serve dual eligibles. This Medicare-Medicaid Coordination Office has initiated a series of state demonstration projects to experiment with better coordination of care between Medicare and Medicaid. Depending upon the results of those demonstration projects, CMS may change the way in which dual eligibles are serviced. If we are unable to implement our strategic initiatives to address the dual eligibles opportunity, including our participation in state-based contracts, or if our initiatives are not successful at attracting or retaining dual eligible members, our business may be materially adversely affected.

Additionally, our strategy includes the growth of our commercial products, including participation in certain health insurance exchanges, introduction of new products and benefit designs, including HumanaVitality and other wellness products, growth of our specialty products such as dental, vision and other supplemental products, the adoption of new technologies, development of adjacent businesses, and the integration of acquired businesses and contracts.

There can be no assurance that we will be able to successfully implement our operational and strategic initiatives, including implementing our integrated care delivery model, that are intended to position us for future growth or that the products we design will be accepted or adopted in the time periods assumed. Failure to implement this strategy may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we fail to properly maintain the integrity of our data, to strategically implement new information systems, or to protect our proprietary rights to our systems, our business may be materially adversely affected.

Our business depends significantly on effective information systems and the integrity and timeliness of the data we use to run our business. Our business strategy involves providing members and providers with easy to use products that leverage our information to meet their needs. Our ability to adequately price our products and services, provide effective and efficient service to our customers, and to timely and accurately report our financial results depends significantly on the integrity of the data in our information systems. As a result of our past and on-going acquisition activities, we have acquired additional information systems. We have reduced the number of systems we operate, have upgraded and expanded our information systems capabilities, and are gradually migrating existing business to fewer systems. Our information systems require an ongoing commitment of significant resources to maintain, protect, and enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving industry and regulatory standards, and changing customer preferences. If the information we rely upon to run our businesses was found to be inaccurate or unreliable or if we fail to maintain effectively our information systems and data integrity, we could have operational disruptions, have problems in determining medical cost estimates and establishing appropriate pricing, have customer and physician and other health care provider disputes, have regulatory or other legal problems, have increases in operating expenses, lose existing customers, have difficulty in attracting new customers, or suffer other adverse consequences.

We depend on independent third parties for significant portions of our systems-related support, equipment, facilities, and certain data, including data center operations, data network, voice communication services and pharmacy data processing. This dependence makes our operations vulnerable to such third parties' failure to perform adequately under the contract, due to internal or external factors. A change in service providers could result in a decline in service quality and effectiveness or less favorable contract terms which may adversely affect our operating results.

We rely on our agreements with customers, confidentiality agreements with employees, and our trade secrets and copyrights to protect our proprietary rights. These legal protections and precautions may not prevent misappropriation of our proprietary information. In addition, substantial litigation regarding intellectual property rights exists in the software industry, including litigation involving end users of software products. We expect software products to be increasingly subject to third-party infringement claims as the number of products and competitors in this area grows.

There can be no assurance that our information technology, or IT, process will successfully improve existing systems, develop new systems to support our expanding operations, integrate new systems, protect our proprietary information, defend against cybersecurity attacks, or improve service levels. In addition, there can be no assurance that additional systems issues will not arise in the future. Failure to adequately protect and maintain the integrity of our information systems and data, or to defend against cybersecurity attacks, may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we are unable to defend our information technology security systems against cybersecurity attacks or prevent other privacy or data security incidents that result in security breaches that disrupt our operations or in the unintended dissemination of sensitive personal information or proprietary or confidential information, we could be exposed to significant regulatory fines or penalties, liability or reputational damage, or experience a material adverse effect on our results of operations, financial position, and cash flows.

In the ordinary course of our business, we process, store and transmit large amounts of data, including sensitive personal information as well as proprietary or confidential information relating to our business or a third-party. A cybersecurity attack may penetrate our layered security controls and misappropriate or compromise sensitive personal information or proprietary or confidential information or that of third-parties, create system disruptions, cause shutdowns, or deploy viruses, worms, and other malicious software programs that attack our systems. A cybersecurity attack that bypasses our IT security systems successfully could materially affect us due to the theft, destruction, loss, misappropriation or release of confidential data or intellectual property, operational or business delays resulting from the disruption of our IT systems, or negative publicity resulting in reputation or brand damage with our members, customers, providers, and other stakeholders.

The costs to eliminate or address cybersecurity threats and vulnerabilities before or after an incident could be substantial. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service, and loss of existing or potential members. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary or confidential information about us or our members or other third-parties, could expose our members' private information and result in the risk of financial or medical identity theft, or expose us or other third-parties to a risk of loss or misuse of this information, result in significant regulatory fines or penalties, litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

Our business may be materially adversely impacted by the adoption of a new coding set for diagnoses.

Federal regulations related to the Health Insurance Portability and Accountability Act of 1996, as amended (HIPAA), contain minimum standards for electronic transactions and code sets, and for the privacy and security of protected health information. On October 1, 2015, ICD-10, the current system of assigning codes to diagnoses and procedures associated with hospital utilization in the United States, replaced the prior set of codes. For dates of service on or after October 1, 2015, health plans and providers are required to use ICD-10 codes for such diagnoses and procedures. While we prepared for the transition to ICD-10, if unforeseen circumstances arise, it is possible that we could be exposed to investigations and allegations of noncompliance, which could have a material adverse effect on our results of operations, financial position and cash flows. In addition, if some providers continue to use ICD-9 codes on claims after October 1, 2015, including providers in our network who are employees, we will have to reject such claims, which may lead to claim resubmissions, increased call volume and provider and customer dissatisfaction. Further, providers may use ICD-10 codes differently than they used ICD-9 codes in the past, which could result in increased claim submissions or lost revenues under risk adjustment. During the transition to ICD-10, certain claims processing and payment information we have historically used to establish our reserves may not be reliable or available in a timely manner. If we do not adequately implement the new ICD-10 coding set, or if providers in our network do not adequately transition to the new ICD-10 coding set, our results of operations, financial position and cash flows may be materially adversely affected.

We are involved in various legal actions and governmental and internal investigations, any of which, if resolved unfavorably to us, could result in substantial monetary damages or changes in our business practices. Increased litigation and negative publicity could increase our cost of doing business.

We are or may become a party to a variety of legal actions that affect our business, including breach of contract actions, employment and employment discrimination-related suits, employee benefit claims, stockholder suits and other securities laws claims, and tort claims.

In addition, because of the nature of the health care business, we are subject to a variety of legal actions relating to our business operations, including the design, management, and offering of products and services. These include and could include in the future:

- claims relating to the methodologies for calculating premiums;
- claims relating to the denial of health care benefit payments;
- claims relating to the denial or rescission of insurance coverage;
- challenges to the use of some software products used in administering claims;
- claims relating to our administration of our Medicare Part D offerings;
- medical malpractice actions based on our medical necessity decisions or brought against us on the theory that we are liable for providers' alleged malpractice;
- claims arising from any adverse medical consequences resulting from our recommendations about the appropriateness of providers' proposed medical treatment plans for patients;
- allegations of anti-competitive and unfair business activities;

- provider disputes over compensation or non-acceptance or termination of provider contracts or provider contract disputes relating to rate adjustments resulting from the Balance Budget and Emergency Deficit Control Act of 1985, as amended (commonly referred to as "sequestration");
- disputes related to ASO business, including actions alleging claim administration errors;
- qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that we, as a government contractor, submitted false claims to the government including, among other allegations, resulting from coding and review practices under the Medicare risk-adjustment model;
- claims related to the failure to disclose some business practices;
- claims relating to customer audits and contract performance;
- claims relating to dispensing of drugs associated with our in-house mail-order pharmacy; and
- professional liability claims arising out of the delivery of healthcare and related services to the public.

In some cases, substantial non-economic or punitive damages as well as treble damages under the federal False Claims Act, Racketeer Influenced and Corrupt Organizations Act and other statutes may be sought.

While we currently have insurance coverage for some of these potential liabilities, other potential liabilities may not be covered by insurance, insurers may dispute coverage, or the amount of our insurance may not be enough to cover the damages awarded. In addition, some types of damages, like punitive damages, may not be covered by insurance. In some jurisdictions, coverage of punitive damages is prohibited. Insurance coverage for all or some forms of liability may become unavailable or prohibitively expensive in the future.

The health benefits industry continues to receive significant negative publicity reflecting the public perception of the industry. This publicity and perception have been accompanied by increased litigation, including some large jury awards, legislative activity, regulation, and governmental review of industry practices. These factors may materially adversely affect our ability to market our products or services, may require us to change our products or services or otherwise change our business practices, may increase the regulatory burdens under which we operate, and may require us to pay large judgments or fines. Any combination of these factors could further increase our cost of doing business and adversely affect our results of operations, financial position, and cash flows.

See "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. - Financial Statements and Supplementary Data. We cannot predict the outcome of these matters with certainty.

As a government contractor, we are exposed to risks that may materially adversely affect our business or our willingness or ability to participate in government health care programs.

A significant portion of our revenues relates to federal and state government health care coverage programs, including the Medicare, military, and Medicaid programs. These programs accounted for approximately 73% of our total premiums and services revenue for the year ended December 31, 2015. These programs involve various risks, as described further below.

- At December 31, 2015, under our contracts with CMS we provided health insurance coverage to approximately 587,400 individual Medicare Advantage members in Florida. These contracts accounted for approximately 14% of our total premiums and services revenue for the year ended December 31, 2015. The loss of these and other CMS contracts or significant changes in the Medicare program as a result of legislative or regulatory action, including reductions in premium payments to us or increases in member benefits without corresponding increases in premium payments to us, may have a material adverse effect on our results of operations, financial position, and cash flows.
- At December 31, 2015, our military services business primarily consisted of the TRICARE South Region contract which covers approximately 3,074,400 beneficiaries. For the year ended December 31, 2015,

premiums and services revenue associated with the TRICARE South Region contract accounted for approximately 1% of our total premiums and services revenue. On April 1, 2012, we began delivering services under the current TRICARE South Region contract that the Defense Health Agency, or DHA (formerly known as the TRICARE Management Activity), awarded to us on February 25, 2011. The current 5-year South Region contract, which expires March 31, 2017, is subject to annual renewals on April 1 of each year during its term at the government's option. On January 22, 2016, we received notice from the DHA of its intent to exercise its option to extend the TRICARE South Region contract through March 31, 2017. The loss of the TRICARE South Region contract, should it occur, may have a material adverse effect on our results of operations, financial position, and cash flows.

- There is a possibility of temporary or permanent suspension from participating in government health care programs, including Medicare and Medicaid, if we are convicted of fraud or other criminal conduct in the performance of a health care program or if there is an adverse decision against us under the federal False Claims Act. As a government contractor, we may be subject to qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that the government contractor submitted false claims to the government. Litigation of this nature is filed under seal to allow the government an opportunity to investigate and to decide if it wishes to intervene and assume control of the litigation. If the government does not intervene, the lawsuit is unsealed, and the individual may continue to prosecute the action on his or her own.

- CMS uses a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity of covered members. The risk-adjustment model pays more for enrollees with predictably higher costs. Under this model, rates paid to MA plans are based on actuarially determined bids, which include a process whereby our prospective payments are based on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's traditional fee-for-service Medicare program (referred to as "Medicare FFS"). Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses the diagnosis data to calculate the risk-adjusted premium payment to MA plans, which CMS adjusts for coding pattern differences between the health plans and the government fee-for-service program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on these providers to document appropriately all medical data, including the diagnosis data submitted with claims. In addition, we conduct medical record reviews as part of our data and payment accuracy compliance efforts, to more accurately reflect diagnosis conditions under the risk adjustment model. These compliance efforts include the internal contract level audits described in more detail below.

  CMS is continuing to perform audits of various companies' selected MA contracts related to this risk adjustment diagnosis data. We refer to these audits as Risk-Adjustment Data Validation Audits, or RADV audits. RADV audits review medical records in an attempt to validate provider medical record documentation and coding practices which influence the calculation of premium payments to MA plans.

  In 2012, CMS released a "Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation (RADV) Contract-Level Audits." The payment error calculation methodology provides that, in calculating the economic impact of audit results for an MA contract, if any, the results of the audit sample will be extrapolated to the entire MA contract based upon a comparison to "benchmark" audit data in Medicare FFS (which we refer to as the "FFS Adjuster"). This comparison to the FFS Adjuster is necessary to determine the economic impact, if any, of audit results because the government program data set, including any attendant errors that are present in that data set, provides the basis for MA plans' risk adjustment to payment rates. CMS already makes other adjustments to payment rates based on a comparison of coding pattern differences between MA plans and Medicare FFS data (such as for frequency of coding for certain diagnoses in MA plan data versus the government program data set).

The final methodology, including the first application of extrapolated audit results to determine audit settlements, is expected to be applied to RADV contract level audits currently being conducted for contract year 2011 in which two of our Medicare Advantage plans are being audited. Per CMS guidance, selected MA contracts will be notified of an audit at some point after the close of the final reconciliation for the payment year being audited. The final reconciliation occurs in August of the calendar year following the payment year. We were notified on September 15, 2015, that five of our Medicare Advantage contracts have been selected for audit for contract year 2012.

Estimated audit settlements are recorded as a reduction of premiums revenue in our consolidated statements of income, based upon available information. We perform internal contract level audits based on the RADV audit methodology prescribed by CMS. Included in these internal contract level audits is an audit of our Private Fee-For-Service business which we used to represent a proxy of the FFS Adjuster which has not yet been released. We based our accrual of estimated audit settlements for each contract year on the results of these internal contract level audits and update our estimates as each audit is completed. Estimates derived from these results were not material to our results of operations, financial position, or cash flows. However, as indicated, we are awaiting additional guidance from CMS regarding the FFS Adjuster. Accordingly, we cannot determine whether such RADV audits will have a material adverse effect on our results of operations, financial position, or cash flows.

In addition, CMS' comments in formalized guidance regarding "overpayments" to MA plans appear to be inconsistent with CMS' prior RADV audit guidance. These statements, contained in the preamble to CMS' final rule release regarding Medicare Advantage and Part D prescription drug benefit program regulations for Contract Year 2015, appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the FFS Adjuster referenced above. We will continue to work with CMS to ensure that MA plans are paid accurately and that payment model principles are in accordance with the requirements of the Social Security Act, which, if not implemented correctly could have a material adverse effect on our results of operations, financial position, or cash flows.

- Our CMS contracts which cover members' prescription drugs under Medicare Part D contain provisions for risk sharing and certain payments for prescription drug costs for which we are not at risk. These provisions, certain of which are described below, affect our ultimate payments from CMS.

  The premiums from CMS are subject to risk corridor provisions which compare costs targeted in our annual bids to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to us or require us to refund to CMS a portion of the premiums we received (known as a "risk corridor"). We estimate and recognize an adjustment to premiums revenue related to the risk corridor payment settlement based upon pharmacy claims experience. The estimate of the settlement associated with these risk corridor provisions requires us to consider factors that may not be certain, including member eligibility differences with CMS. Our estimate of the settlement associated with the Medicare Part D risk corridor provisions was a net payable of $22 million at December 31, 2015.

  Reinsurance and low-income cost subsidies represent payments from CMS in connection with the Medicare Part D program for which we assume no risk. Reinsurance subsidies represent payments for CMS's portion of claims costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage level. Low-income cost subsidies represent payments from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts above the out-of-pocket threshold for low-income beneficiaries. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. A reconciliation and settlement of CMS's prospective subsidies against actual prescription drug costs we paid is made after the end of the year.

  Settlement of the reinsurance and low-income cost subsidies as well as the risk corridor payment is based on a reconciliation made approximately 9 months after the close of each calendar year. This reconciliation process requires us to submit claims data necessary for CMS to administer the program. Our claims data may not pass CMS's claims edit processes due to various reasons, including discrepancies in eligibility or classification of low-income members. To the extent our data does not pass CMS's claim edit processes,

we may bear the risk for all or a portion of the claim which otherwise may have been subject to the risk corridor provision or payment which we would have otherwise received as a low-income subsidy or reinsurance claim. In addition, in the event the settlement represents an amount CMS owes us, there is a negative impact on our cash flows and financial condition as a result of financing CMS's share of the risk. The opposite is true in the event the settlement represents an amount we owe CMS.

- The Budget Control Act of 2011 increased the United States debt ceiling conditioned on deficit reductions to be achieved over the next ten years. The Budget Control Act of 2011 also established a twelve-member joint committee of Congress known as the Joint Select Committee on Deficit Reduction to propose legislation to reduce the United States federal deficit by $1.5 trillion for fiscal years 2012-2021. The failure of the Joint Select Committee on Deficit Reduction to achieve a targeted deficit reduction by December 23, 2011 triggered an automatic reduction, including aggregate reductions to Medicare payments to providers of up to 2 percent per fiscal year. These reductions took effect on April 1, 2013, and the Bipartisan Budget Act of 2013, enacted on December 26, 2013, extended the reductions for two years. We expect a corresponding substantial reduction in our obligations to providers. Due to the uncertainty around the application of any such reductions, there can be no assurances that we can completely offset any reductions to the Medicare healthcare programs applied by the Budget Control Act of 2011.
- We are also subject to various other governmental audits and investigations. Under state laws, our HMOs and health insurance companies are audited by state departments of insurance for financial and contractual compliance. Our HMOs are audited for compliance with health services by state departments of health. Audits and investigations are also conducted by state attorneys general, CMS, the Office of the Inspector General of Health and Human Services, the Office of Personnel Management, the Department of Justice, the Department of Labor, and the Defense Contract Audit Agency. All of these activities could result in the loss of licensure or the right to participate in various programs, including a limitation on our ability to market or sell products, the imposition of fines, penalties and other civil and criminal sanctions, or changes in our business practices. The outcome of any current or future governmental or internal investigations cannot be accurately predicted, nor can we predict any resulting penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities. Nevertheless, it is reasonably possible that any such outcome of litigation, penalties, fines or other sanctions could be substantial, and the outcome of these matters may have a material adverse effect on our results of operations, financial position, and cash flows. Certain of these matters could also affect our reputation. In addition, disclosure of any adverse investigation or audit results or sanctions could negatively affect our industry or our reputation in various markets and make it more difficult for us to sell our products and services.

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 could have a material adverse effect on our results of operations (including restricting revenue, enrollment and premium growth in certain products and market segments, restricting our ability to expand into new markets, increasing our medical and operating costs by, among other things, requiring a minimum benefit ratio on insured products, lowering our Medicare payment rates and increasing our expenses associated with a non-deductible health insurance industry fee and other assessments); our financial position (including our ability to maintain the value of our goodwill); and our cash flows.

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. The provisions of the Health Care Reform Law include, among others, imposing a significant new non-deductible health insurance industry fee and other assessments on health insurers, limiting Medicare Advantage payment rates, stipulating a prescribed minimum ratio for the amount of premiums revenue to be expended on medical costs for insured products, additional mandated benefits and guarantee issuance associated with commercial medical insurance, requirements that limit the ability of health plans to vary premiums based on assessments of underlying risk, and heightened scrutiny by state and federal regulators of our business practices, including our Medicare bid and pricing practices. The Health Care Reform Law also specifies benefit design guidelines, limits rating and pricing practices, encourages additional competition (including potential incentives for new market entrants), establishes federally-facilitated or state-based exchanges for individuals and small employers (with up to 100 employees) coupled

with programs designed to spread risk among insurers (subject to federal administrative action), and expands eligibility for Medicaid programs (subject to state-by-state implementation of this expansion). In addition, the Health Care Reform Law has increased and will continue to increase federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms will come, in part, from material additional fees and taxes on us and other health plans and individuals which began in 2014, as well as reductions in certain levels of payments to us and other health plans under Medicare. If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. For additional information, please refer to the section entitled, "Health Care Reform" in "Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing in this annual report.

Our participation in the new federal and state health insurance exchanges, which entail uncertainties associated with mix, volume of business and the operation of premium stabilization programs, which are subject to federal administrative action, could adversely affect our results of operations, financial position, and cash flows.

The Health Care Reform Law required the establishment of health insurance exchanges for individuals and small employers to purchase health insurance that became effective January 1, 2014, with an annual open enrollment period. Insurers participating on the health insurance exchanges must offer a minimum level of benefits and are subject to guidelines on setting premium rates and coverage limitations. We may be adversely selected by individuals who have a higher acuity level than the anticipated pool of participants in this market. In addition, the risk corridor, reinsurance, and risk adjustment provisions of the Health Care Reform Law, established to apportion risk for insurers, may not be effective in appropriately mitigating the financial risks related to our products. During 2015, we received our interim settlement associated with our risk corridor receivables for the 2014 coverage year. The interim settlement, representing only 12.6% of risk corridor receivables for the 2014 coverage year, was funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 risk corridor program. HHS provided guidance under the three year risk corridor program that future collections will first be applied to any shortfalls from previous coverage years before application to current year obligations. Risk corridor payables to issuers are obligations of the United States Government under the Health Care Reform law which requires the Secretary of HHS to make full payments to issuers. In the event of a shortfall at the end of the three year program, HHS has asserted it will explore other sources of funding for risk corridor payments, subject to the availability of appropriations. In addition, regulatory changes to the implementation of the Health Care Reform Law that allowed individuals to remain in plans that are not compliant with the Health Care Reform Law or to enroll outside of the annual enrollment period may have an adverse effect on our pool of participants in the health insurance exchange. All of these factors may have a material adverse effect on our results of operations, financial position, or cash flows if our premiums are not adequate or do not appropriately reflect the acuity of these individuals. Any variation from our expectations regarding acuity, enrollment levels, adverse selection, or other assumptions used in setting premium rates could have a material adverse effect on our results of operations, financial position, and cash flows.

Our business activities are subject to substantial government regulation. New laws or regulations, or changes in existing laws or regulations or their manner of application, including reductions in Medicare Advantage payment rates, could increase our cost of doing business and may adversely affect our business, profitability, financial condition, and cash flows.

In addition to the Health Care Reform Law, the health care industry in general and health insurance are subject to substantial federal and state government regulation:

Health Insurance Portability and Accountability Act (HIPAA) and the Health Information Technology for Economic and Clinical Health Act (HITECH Act)

The use of individually identifiable health data by our business is regulated at federal and state levels. These laws and rules are changed frequently by legislation or administrative interpretation. Various state laws address the use and maintenance of individually identifiable health data. Most are derived from the privacy provisions in the federal Gramm-Leach-Bliley Act and the Health Insurance Portability and Accountability Act, or HIPAA. HIPAA includes

administrative provisions directed at simplifying electronic data interchange through standardizing transactions, establishing uniform health care provider, payer, and employer identifiers, and seeking protections for confidentiality and security of patient data. The rules do not provide for complete federal preemption of state laws, but rather preempt all inconsistent state laws unless the state law is more stringent.

These regulations set standards for the security of electronic health information. Violations of these rules could subject us to significant criminal and civil penalties, including significant monetary penalties. Compliance with HIPAA regulations requires significant systems enhancements, training and administrative effort. HIPAA can also expose us to additional liability for violations by our business associates (e.g., entities that provide services to health plans and providers).

The HITECH Act, one part of the American Recovery and Reinvestment Act of 2009, significantly broadened the scope of the privacy and security regulations of HIPAA. Among other requirements, the HITECH Act and HIPAA mandate individual notification in the event of a breach of unsecured, individually identifiable health information, provides enhanced penalties for HIPAA violations, requires business associates to comply with certain provisions of the HIPAA privacy and security rule, and grants enforcement authority to state attorneys general in addition to the HHS Office of Civil Rights.

In addition, there are numerous federal and state laws and regulations addressing patient and consumer privacy concerns, including unauthorized access or theft of personal information. State statutes and regulations vary from state to state and could impose additional penalties. Violations of HIPAA or applicable federal or state laws or regulations could subject us to significant criminal or civil penalties, including significant monetary penalties. Compliance with HIPAA and other privacy regulations requires significant systems enhancements, training and administrative effort.

American Recovery and Reinvestment Act of 2009 (ARRA)

On February 17, 2009, the American Recovery and Reinvestment Act of 2009, or ARRA, was enacted into law. In addition to including a temporary subsidy for health care continuation coverage issued pursuant to the Consolidated Omnibus Budget Reconciliation Act, or COBRA, ARRA also expands and strengthens the privacy and security provisions of HIPAA and imposes additional limits on the use and disclosure of protected health information, or PHI. Among other things, ARRA requires us and other covered entities to report any unauthorized release or use of or access to PHI to any impacted individuals and to the U.S. Department of Health and Human Services in those instances where the unauthorized activity poses a significant risk of financial, reputational or other harm to the individuals, and to notify the media in any states where 500 or more people are impacted by any unauthorized release or use of or access to PHI. ARRA also requires business associates to comply with certain HIPAA provisions. ARRA also establishes higher civil and criminal penalties for covered entities and business associates who fail to comply with HIPAA's provisions and requires the U.S. Department of Health and Human Services to issue regulations implementing its privacy and security enhancements.

Corporate Practice of Medicine and Other Laws

As a corporate entity, Humana Inc. is not licensed to practice medicine. Many states in which we operate through our subsidiaries limit the practice of medicine to licensed individuals or professional organizations comprised of licensed individuals, and business corporations generally may not exercise control over the medical decisions of physicians. Statutes and regulations relating to the practice of medicine, fee-splitting between physicians and referral sources, and similar issues vary widely from state to state. Under management agreements between certain of our subsidiaries and affiliated physician-owned professional groups, these groups retain sole responsibility for all medical decisions, as well as for hiring and managing physicians and other licensed healthcare providers, developing operating policies and procedures, implementing professional standards and controls, and maintaining malpractice insurance. We believe that our health services operations comply with applicable state statutes regarding corporate practice of medicine, fee-splitting, and similar issues. However, any enforcement actions by governmental officials alleging non-compliance with these statutes, which could subject us to penalties or restructuring or reorganization of our business, may result in a material adverse effect on our results of operations, financial position, or cash flows.

Anti-Kickback, Physician Self-Referral, and Other Fraud and Abuse Laws

A federal law commonly referred to as the "Anti-Kickback Statute" prohibits the offer, payment, solicitation, or receipt of any form of remuneration to induce, or in return for, the referral of Medicare or other governmental health program patients or patient care opportunities, or in return for the purchase, lease, or order of items or services that are covered by Medicare or other federal governmental health programs. Because the prohibitions contained in the Anti-Kickback Statute apply to the furnishing of items or services for which payment is made in "whole or in part," the Anti-Kickback Statute could be implicated if any portion of an item or service we provide is covered by any of the state or federal health benefit programs described above. Violation of these provisions constitutes a felony criminal offense and applicable sanctions could include exclusion from the Medicare and Medicaid programs.

Section 1877 of the Social Security Act, commonly known as the "Stark Law," prohibits physicians, subject to certain exceptions described below, from referring Medicare or Medicaid patients to an entity providing "designated health services" in which the physician, or an immediate family member, has an ownership or investment interest or with which the physician, or an immediate family member, has entered into a compensation arrangement. These prohibitions, contained in the Omnibus Budget Reconciliation Act of 1993, commonly known as "Stark II," amended prior federal physician self-referral legislation known as "Stark I" by expanding the list of designated health services to a total of 11 categories of health services. The professional groups with which we are affiliated provide one or more of these designated health services. Persons or entities found to be in violation of the Stark Law are subject to denial of payment for services furnished pursuant to an improper referral, civil monetary penalties, and exclusion from the Medicare and Medicaid programs.

Many states also have enacted laws similar in scope and purpose to the Anti-Kickback Statute and, in more limited instances, the Stark Law, that are not limited to services for which Medicare or Medicaid payment is made. In addition, most states have statutes, regulations, or professional codes that restrict a physician from accepting various kinds of remuneration in exchange for making referrals. These laws vary from state to state and have seldom been interpreted by the courts or regulatory agencies. In states that have enacted these statutes, we believe that regulatory authorities and state courts interpreting these statutes may regard federal law under the Anti-Kickback Statute and the Stark Law as persuasive.

We believe that our operations comply with the Anti-Kickback Statute, the Stark Law, and similar federal or state laws addressing fraud and abuse. These laws are subject to modification and changes in interpretation, and are enforced by authorities vested with broad discretion. We continually monitor developments in this area. If these laws are interpreted in a manner contrary to our interpretation or are reinterpreted or amended, or if new legislation is enacted with respect to healthcare fraud and abuse, illegal remuneration, or similar issues, we may be required to restructure our affected operations to maintain compliance with applicable law. There can be no assurances that any such restructuring will be possible or, if possible, would not have a material adverse effect on our results of operations, financial position, or cash flows.

Environmental

We are subject to various federal, state, and local laws and regulations relating to the protection of human health and the environment. If an environmental regulatory agency finds any of our facilities to be in violation of environmental laws, penalties and fines may be imposed for each day of violation and the affected facility could be forced to cease operations. We could also incur other significant costs, such as cleanup costs or claims by third parties, as a result of violations of, or liabilities under, environmental laws. Although we believe that our environmental practices, including waste handling and disposal practices, are in material compliance with applicable laws, future claims or violations, or changes in environmental laws, could have a material adverse effect on our results of operations, financial position or cash flows.

State Regulation of Insurance-Related Products

Laws in each of the states (and Puerto Rico) in which we operate our HMOs, PPOs and other health insurance-related services regulate our operations including: capital adequacy and other licensing requirements, policy language describing benefits, mandated benefits and processes, entry, withdrawal or re-entry into a state or market, rate increases, delivery systems, utilization review procedures, quality assurance, complaint systems, enrollment requirements, claim payments, marketing, and advertising. The HMO, PPO, and other health insurance-related products we offer are sold under licenses issued by the applicable insurance regulators.

Our licensed insurance subsidiaries are also subject to regulation under state insurance holding company and Puerto Rico regulations. These regulations generally require, among other things, prior approval and/or notice of new products, rates, benefit changes, and certain material transactions, including dividend payments, purchases or sales of assets, intercompany agreements, and the filing of various financial and operational reports.

Any failure by us to manage acquisitions, divestitures and other significant transactions successfully may have a material adverse effect on our results of operations, financial position, and cash flows.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, divestitures, strategic alliances, joint ventures, and outsourcing transactions and often enter into agreements relating to such transactions in order to further our business objectives. In order to pursue our acquisition strategy successfully, we must identify suitable candidates for and successfully complete transactions, some of which may be large and complex, and manage post-closing issues such as the integration of acquired companies or employees. Integration and other risks can be more pronounced for larger and more complicated transactions, transactions outside of our core business space, or if multiple transactions are pursued simultaneously. The failure to successfully integrate acquired entities and businesses or failure to produce results consistent with the financial model used in the analysis of our acquisitions may have a material adverse effect on our results of operations, financial position, and cash flows. If we fail to identify and complete successfully transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally. In addition, from time to time, we evaluate alternatives for our businesses that do not meet our strategic, growth or profitability objectives. The divestiture of certain businesses could result, individually or in the aggregate, in the recognition of material losses and a material adverse effect on our results of operations. There can be no assurance that we will be able to complete any such divestitures on terms favorable to us.

If we fail to develop and maintain satisfactory relationships with the providers of care to our members, our business may be adversely affected.

We employ or contract with physicians, hospitals and other providers to deliver health care to our members. Our products encourage or require our customers to use these contracted providers. A key component of our integrated care delivery strategy is to increase the number of providers who share medical cost risk with us or have financial incentives to deliver quality medical services in a cost-effective manner.

In any particular market, providers could refuse to contract with us, demand higher payments, or take other actions that could result in higher health care costs for us, less desirable products for customers and members or difficulty meeting regulatory or accreditation requirements. In some markets, some providers, particularly hospitals, physician specialty groups, physician/hospital organizations, or multi-specialty physician groups, may have significant market positions and negotiating power. In addition, physician or practice management companies, which aggregate physician practices for administrative efficiency and marketing leverage, may compete directly with us. If these providers refuse to contract with us, use their market position to negotiate unfavorable contracts with us or place us at a competitive disadvantage, or do not enter into contracts with us that encourage the delivery of quality medical services in a cost-effective manner, our ability to market products or to be profitable in those areas may be adversely affected.

In some situations, we have contracts with individual or groups of primary care providers for an actuarially determined, fixed fee per month to provide a basket of required medical services to our members. This type of contract

is referred to as a "capitation" contract. The inability of providers to properly manage costs under these capitation arrangements can result in the financial instability of these providers and the termination of their relationship with us. In addition, payment or other disputes between a primary care provider and specialists with whom the primary care provider contracts can result in a disruption in the provision of services to our members or a reduction in the services available to our members. The financial instability or failure of a primary care provider to pay other providers for services rendered could lead those other providers to demand payment from us even though we have made our regular fixed payments to the primary provider. There can be no assurance that providers with whom we contract will properly manage the costs of services, maintain financial solvency or avoid disputes with other providers. Any of these events may have a material adverse effect on the provision of services to our members and our results of operations, financial position, and cash flows.

Our pharmacy business is highly competitive and subjects us to regulations in addition to those we face with our core health benefits businesses.

Our pharmacy mail order business competes with locally owned drugstores, retail drugstore chains, supermarkets, discount retailers, membership clubs, internet companies and other mail-order and long-term care pharmacies. Our pharmacy business also subjects us to extensive federal, state, and local regulation. The practice of pharmacy is generally regulated at the state level by state boards of pharmacy. Many of the states where we deliver pharmaceuticals, including controlled substances, have laws and regulations that require out-of-state mail-order pharmacies to register with that state's board of pharmacy. Federal agencies further regulate our pharmacy operations, requiring registration with the U.S. Drug Enforcement Administration and individual state controlled substance authorities in order to dispense controlled substances. In addition, the FDA inspects facilities in connection with procedures to effect recalls of prescription drugs. The Federal Trade Commission also has requirements for mail-order sellers of goods. The U.S. Postal Service, or USPS, has statutory authority to restrict the transmission of drugs and medicines through the mail to a degree that may have an adverse effect on our mail-order operations. The USPS historically has exercised this statutory authority only with respect to controlled substances. If the USPS restricts our ability to deliver drugs through the mail, alternative means of delivery are available to us. However, alternative means of delivery could be significantly more expensive. The Department of Transportation has regulatory authority to impose restrictions on drugs inserted in the stream of commerce. These regulations generally do not apply to the USPS and its operations. In addition, we are subject to CMS rules regarding the administration of our PDP plans and intercompany pricing between our PDP plans and our pharmacy business.

We are also subject to risks inherent in the packaging and distribution of pharmaceuticals and other health care products, and the application of state laws related to the operation of internet and mail-order pharmacies. The failure to adhere to these laws and regulations may expose us to civil and criminal penalties.

Changes in the prescription drug industry pricing benchmarks may adversely affect our financial performance.

Contracts in the prescription drug industry generally use certain published benchmarks to establish pricing for prescription drugs. These benchmarks include average wholesale price, which is referred to as "AWP," average selling price, which is referred to as "ASP," and wholesale acquisition cost. It is uncertain whether payors, pharmacy providers, pharmacy benefit managers, or PBMs, and others in the prescription drug industry will continue to utilize AWP as it has previously been calculated, or whether other pricing benchmarks will be adopted for establishing prices within the industry. Legislation may lead to changes in the pricing for Medicare and Medicaid programs. Regulators have conducted investigations into the use of AWP for federal program payment, and whether the use of AWP has inflated drug expenditures by the Medicare and Medicaid programs. Federal and state proposals have sought to change the basis for calculating payment of certain drugs by the Medicare and Medicaid programs. Adoption of ASP in lieu of AWP as the measure for determining payment by Medicare or Medicaid programs for the drugs sold in our mail-order pharmacy business may reduce the revenues and gross margins of this business which may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we do not continue to earn and retain purchase discounts and volume rebates from pharmaceutical manufacturers at current levels, our gross margins may decline.

We have contractual relationships with pharmaceutical manufacturers or wholesalers that provide us with purchase discounts and volume rebates on certain prescription drugs dispensed through our mail-order and specialty pharmacies. These discounts and volume rebates are generally passed on to clients in the form of steeper price discounts. Changes in existing federal or state laws or regulations or in their interpretation by courts and agencies or the adoption of new laws or regulations relating to patent term extensions, and purchase discount and volume rebate arrangements with pharmaceutical manufacturers, may reduce the discounts or volume rebates we receive and materially adversely impact our results of operations, financial position, and cash flows.

Our ability to obtain funds from certain of our licensed subsidiaries is restricted by state insurance regulations.

Because we operate as a holding company, we are dependent upon dividends and administrative expense reimbursements from our subsidiaries to fund the obligations of Humana Inc., our parent company. Certain of our insurance subsidiaries operate in states that regulate the payment of dividends, loans, administrative expense reimbursements or other cash transfers to Humana Inc., and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these insurance subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix. Dividends from our non-insurance companies such as in our Healthcare Services segment are generally not restricted by Departments of Insurance. In the event that we are unable to provide sufficient capital to fund the obligations of Humana Inc., our results of operations, financial position, and cash flows may be materially adversely affected.

Downgrades in our debt ratings, should they occur, may adversely affect our business, results of operations, and financial condition.

Claims paying ability, financial strength, and debt ratings by recognized rating organizations are an increasingly important factor in establishing the competitive position of insurance companies. Ratings information is broadly disseminated and generally used throughout the industry. We believe our claims paying ability and financial strength ratings are an important factor in marketing our products to certain of our customers. In addition, our debt ratings impact both the cost and availability of future borrowings. Each of the rating agencies reviews its ratings periodically and there can be no assurance that current ratings will be maintained in the future. Our ratings reflect each rating agency's opinion of our financial strength, operating performance, and ability to meet our debt obligations or obligations to policyholders, but are not evaluations directed toward the protection of investors in our common stock and should not be relied upon as such.

Historically, rating agencies take action to lower ratings due to, among other things, perceived concerns about liquidity or solvency, the competitive environment in the insurance industry, the inherent uncertainty in determining reserves for future claims, the outcome of pending litigation and regulatory investigations, and possible changes in the methodology or criteria applied by the rating agencies. In addition, rating agencies have come under regulatory and public scrutiny over the ratings assigned to various fixed-income products. As a result, rating agencies may (i) become more conservative in their methodology and criteria, (ii) increase the frequency or scope of their credit reviews, (iii) request additional information from the companies that they rate, or (iv) adjust upward the capital and other requirements employed in the rating agency models for maintenance of certain ratings levels.

We believe that some of our customers place importance on our credit ratings, and we may lose customers and compete less successfully if our ratings were to be downgraded. In addition, our credit ratings affect our ability to obtain investment capital on favorable terms. If our credit ratings were to be lowered, our cost of borrowing likely would increase, our sales and earnings could decrease, and our results of operations, financial position, and cash flows may be materially adversely affected.

The securities and credit markets may experience volatility and disruption, which may adversely affect our business.

Volatility or disruption in the securities and credit markets could impact our investment portfolio. We evaluate our investment securities for impairment on a quarterly basis. This review is subjective and requires a high degree of judgment. For the purpose of determining gross realized gains and losses, the cost of investment securities sold is based upon specific identification. For debt securities held, we recognize an impairment loss in income when the fair value of the debt security is less than the carrying value and we have the intent to sell the debt security or it is more likely than not that we will be required to sell the debt security before recovery of our amortized cost basis, or if a credit loss has occurred. When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairments are considered using variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. We continuously review our investment portfolios and there is a continuing risk that declines in fair value may occur and additional material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

We believe our cash balances, investment securities, operating cash flows, and funds available under our credit agreement or from other public or private financing sources, taken together, provide adequate resources to fund ongoing operating and regulatory requirements, acquisitions, future expansion opportunities, and capital expenditures for at least the next twelve months, as well as to refinance or repay debt, and repurchase shares. However, continuing adverse securities and credit market conditions may significantly affect the availability of credit. While there is no assurance in the current economic environment, we have no reason to believe the lenders participating in our credit agreement will not be willing and able to provide financing in accordance with the terms of the agreement.

Our access to additional credit will depend on a variety of factors such as market conditions, the general availability of credit, both to the overall market and our industry, our credit ratings and debt capacity, as well as the possibility that customers or lenders could develop a negative perception of our long or short-term financial prospects. Similarly, our access to funds could be limited if regulatory authorities or rating agencies were to take negative actions against us. If a combination of these factors were to occur, we may not be able to successfully obtain additional financing on favorable terms or at all.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table lists, by state, the number of medical centers and administrative offices we owned or leased at December 31, 2015:

	Medical Centers		Administrative Offices		
	Owned	Leased	Owned	Leased	Total
Florida	11	123	1	96	231
Texas	—	15	2	24	41
Kentucky	2	1	11	12	26
Virginia	—	8	—	8	16
California	—	2	—	13	15
Arizona	—	8	—	7	15
Louisiana	—	4	—	10	14
Ohio	—	1	—	13	14
Illinois	—	5	—	8	13
New York	—	—	—	13	13
Georgia	—	7	—	3	10
Tennessee	—	—	—	10	10
North Carolina	—	—	—	10	10
Nevada	—	5	—	5	10
South Carolina	—	—	4	6	10
Indiana	—	2	—	7	9
Puerto Rico	—	—	—	9	9
New Jersey	—	—	—	8	8
Colorado	—	3	—	4	7
Pennsylvania	—	—	—	6	6
Wisconsin	—	—	1	5	6
Others	—	3	—	47	50
Total	13	187	19	324	543

The medical centers we operate are primarily located in Florida and Texas, including full-service, multi-specialty medical centers staffed by primary care providers and medical specialists, urgent care facilities, and worksite medical facilities. Of the medical centers included in the table above, approximately 64 of these facilities are leased or subleased to our contracted providers to operate.

Our principal executive office is located in the Humana Building, 500 West Main Street, Louisville, Kentucky 40202. In addition to the headquarters in Louisville, Kentucky, we maintain other principal operating facilities used for customer service, enrollment, and/or claims processing and certain other corporate functions in Louisville, Kentucky; Green Bay, Wisconsin; Tampa, Florida; Cincinnati, Ohio; San Antonio, Texas; and San Juan, Puerto Rico.

ITEM 3. LEGAL PROCEEDINGS

We are party to a variety of legal actions in the ordinary course of business, certain of which may be styled as class-action lawsuits. Among other matters, this litigation may include employment matters, claims of medical malpractice, bad faith, nonacceptance or termination of providers, anticompetitive practices, improper rate setting, provider contract rate disputes, failure to disclose network discounts and various other provider arrangements, general contractual matters, intellectual property matters, and challenges to subrogation practices. For a discussion of our material legal actions, including those not in the ordinary course of business, see "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. We cannot predict the outcome of these suits with certainty.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock trades on the New York Stock Exchange under the symbol HUM. The following table shows the range of high and low closing sales prices as reported on the New York Stock Exchange Composite Price for each quarter in the years ended December 31, 2015 and 2014:

	High	Low
Year Ended December 31, 2015		
First quarter	$ 182.79	$ 139.09
Second quarter	$ 214.92	$ 163.07
Third quarter	$ 193.14	$ 174.16
Fourth quarter	$ 186.67	$ 164.25
Year Ended December 31, 2014		
First quarter	$ 118.78	$ 95.59
Second quarter	$ 128.95	$ 104.74
Third quarter	$ 135.51	$ 115.97
Fourth quarter	$ 149.07	$ 124.17

Holders of our Capital Stock

As of January 31, 2016, there were approximately 2,900 holders of record of our common stock and approximately 41,200 beneficial holders of our common stock.

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2014 and 2015, under our Board approved quarterly cash dividend policy:

Record Date	Payment Date	Amount per Share	Total Amount
			(in millions)
2014 payments			
12/31/2013	1/31/2014	$0.27	$42
3/31/2014	4/25/2014	$0.27	$42
6/30/2014	7/25/2014	$0.28	$43
9/30/2014	10/31/2014	$0.28	$43
2015 payments			
12/31/2014	1/30/2015	$0.28	$42
3/31/2015	4/24/2015	$0.28	$42
6/30/2015	7/31/2015	$0.29	$43
9/30/2105	10/30/2015	$0.29	$43

The Merger discussed in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data does not impact our ability and intent to continue quarterly dividend payments prior to the closing of the Merger consistent with our historical dividend payments. Under the terms of the Merger Agreement, we have agreed with Aetna that our quarterly dividend will not exceed $0.29 per share prior to the closing of the Merger.

Declaration and payment of future quarterly dividends is at the discretion of our Board and may be adjusted as business needs or market conditions change. In addition, under the terms of the Merger Agreement, we have agreed with Aetna to coordinate the declaration and payment of dividends so that our stockholders do not fail to receive a quarterly dividend around the time of the closing of the Merger.

On October 29, 2015, the Board declared a cash dividend of $0.29 per share that was paid on January 29, 2016 to stockholders of record on December 30, 2015, for an aggregate amount of $43 million.

Stock Total Return Performance

The following graph compares our total return to stockholders with the returns of the Standard & Poor's Composite 500 Index ("S&P 500") and the Dow Jones US Select Health Care Providers Index ("Peer Group") for the five years ended December 31, 2015. The graph assumes an investment of $100 in each of our common stock, the S&P 500, and the Peer Group on December 31, 2010, and that dividends were reinvested when paid.

	12/31/2010	12/31/2011	12/31/2012	12/31/2013	12/31/2014	12/31/2015
HUM	$ 100	$ 162	$ 128	$ 195	$ 274	$ 343
S&P 500	$ 100	$ 102	$ 118	$ 157	$ 178	$ 181
Peer Group	$ 100	$ 110	$ 129	$ 177	$ 226	$ 239

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Issuer Purchases of Equity Securities

The following table provides information about purchases by us during the three months ended December 31, 2015 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)(2)	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)
October 2015	—	$ —	—	$ —
November 2015	—	—	—	—
December 2015	—	—	—	—
Total	—	$ —	—	

(1) In September 2014, the Board of Directors replaced a previous share repurchase authorization of up to $1 billion with a current authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2016. Pursuant to the Merger Agreement, after July 2, 2015, we are prohibited from repurchasing any of our outstanding securities without the prior written consent of Aetna, other than repurchases of shares of our common stock in connection with the exercise of outstanding stock options or the vesting or settlement of outstanding restricted stock awards. Accordingly, as announced on July 3, 2015, we have suspended our share repurchase program. Our remaining repurchase authorization was $1.04 billion as of July 3, 2015.

(2) Excludes 0.3 million shares repurchased in connection with employee stock plans.

The Merger Agreement includes customary restrictions on the conduct of our business prior to the completion of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of customary specified limitations absent Aetna's prior written consent, including, for example, limitations on dividends (we agreed that our quarterly dividend will not exceed $0.29 per share) and repurchases of our securities (we agreed to suspend our share repurchase program), restrictions on our ability to enter into material contracts, and negotiated thresholds for capital expenditures, capital contributions, acquisitions and divestitures of businesses.

ITEM 6. SELECTED FINANCIAL DATA

	2015 (a)	2014 (b)	2013 (c)	2012 (d)	2011
	(dollars in millions, except per common share results)				
Summary of Operating Results:					
Revenues:					
Premiums	$ 52,409	$ 45,959	$ 38,829	$ 37,009	$ 35,106
Services	1,406	2,164	2,109	1,726	1,360
Investment income	474	377	375	391	366
Total revenues	54,289	48,500	41,313	39,126	36,832
Operating expenses:					
Benefits	44,269	38,166	32,564	30,985	28,823
Operating costs	7,318	7,639	6,355	5,830	5,395

Medical membership	32,600	35,000	23,400	558,700	566,600
Consolidated:					
Total medical membership	14,222,800	13,841,700	11,984,300	12,088,800	11,184,600
Total specialty membership	7,221,800	7,668,500	7,823,300	8,084,900	7,315,100

(a) Includes a gain on the sale of Concentra Inc., net of transaction costs, of $270 million ($238 million after tax, or $1.57 per diluted common share). Also includes benefits expense of $176 million ($112 million after tax, or $0.74 per diluted common share) for a provision for probable future losses (premium deficiency) for individual commercial medical business compliant with the Health Care Reform Law for the 2016 coverage year.

(b) Includes loss on extinguishment of debt of $37 million ($23 million after tax, or $0.15 per diluted common share) for the redemption of senior notes.

(c) Includes benefits expense of $243 million ($154 million after tax, or $0.99 per diluted common share) for reserve strengthening associated with our non-strategic closed block of long-term care insurance policies.

(d) Includes the acquired operations of Arcadian Management Services, Inc. from March 31, 2012, SeniorBridge Family Companies, Inc. from July 6, 2012, and Metropolitan Health Networks, Inc. from December 21, 2012.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Overview

General

Humana Inc., headquartered in Louisville, Kentucky, is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country.

Our industry relies on two key statistics to measure performance. The benefit ratio, which is computed by taking total benefits expense as a percentage of premiums revenue, represents a statistic used to measure underwriting profitability. The operating cost ratio, which is computed by taking total operating costs, excluding depreciation and amortization, as a percentage of total revenue less investment income, represents a statistic used to measure administrative spending efficiency.

Aetna Merger

On July 2, 2015, we entered into an Agreement and Plan of Merger, which we refer to in this report as the Merger Agreement, with Aetna Inc. and certain wholly owned subsidiaries of Aetna Inc., which we refer to collectively as Aetna, which sets forth the terms and conditions under which we will merge with, and become a wholly owned subsidiary of Aetna, a transaction we refer to in this report as the Merger. A copy of the Merger Agreement was filed as Exhibit 2.1 to our Current Report on Form 8-K filed with the U.S. Securities and Exchange Commission on July 7, 2015. Under the terms of the Merger Agreement, at the closing of the Merger, each outstanding share of our common stock will be converted into the right to receive (i) 0.8375 of a share of Aetna common stock and (ii) $125 in cash. The total transaction was estimated at approximately $37 billion including the assumption of Humana debt, based on the closing price of Aetna common shares on July 2, 2015. The Merger Agreement includes customary restrictions on the conduct of our business prior to the completion of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of customary specified limitations absent Aetna's prior written consent, including, for example, limitations on dividends (we agreed that our quarterly dividend will not exceed $0.29 per share) and repurchases of our securities (we agreed to suspend our share repurchase program), restrictions on our ability to enter into material contracts, and negotiated thresholds for capital expenditures, capital contributions, acquisitions and divestitures of businesses.

On October 19, 2015, our stockholders approved the adoption of the Merger Agreement at a special stockholder meeting. Of the 129,240,721 shares voting at the meeting, more than 99% voted in favor of the adoption of the Merger Agreement, which represented approximately 87% of our total outstanding shares of common stock as of the September 16, 2015 record date. Also on October 19, 2015, the holders of Aetna outstanding shares approved the issuance of Aetna common stock in the Merger at a special meeting of Aetna shareholders.

The Merger is subject to customary closing conditions, including, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, (ii) the absence of legal restraints and prohibitions on the consummation of the Merger, (iii) listing of the Aetna common stock to be issued in the Merger on the New York Stock Exchange, (iv) subject to the relevant standards set forth in the Merger Agreement, the accuracy of the representations and warranties made by each party, (v) material compliance by each party with its covenants in the Merger Agreement, and (vi) no "Company Material Adverse Effect" with respect to us and no "Parent Material Adverse Effect" with respect to Aetna, in each case since the execution of and as defined in the Merger Agreement. In addition, Aetna's obligation to consummate the Merger is subject to (a) the condition that the required regulatory approvals do not impose any condition that, individually or in the aggregate, would reasonably be expected to have a "Regulatory Material Adverse Effect" (as such term is defined in the Merger Agreement), and (b) CMS has not imposed any sanctions with respect

to our Medicare Advantage, or MA, business that, individually or in the aggregate, is or would reasonably be expected to be material and adverse to us and our subsidiaries, taken as a whole. The Merger is currently expected to close in the second half of 2016.

Business Segments

On January 1, 2015, we realigned certain of our businesses among our reportable segments to correspond with internal management reporting changes and renamed our Employer Group segment to the Group segment. Our three reportable segments remain Retail, Group, and Healthcare Services. The more significant realignments included reclassifying Medicare benefits offered to groups to the Retail segment from the Group segment, bringing all of our Medicare offerings, which are now managed collectively, together in one segment, recognizing that in some instances we market directly to individuals that are part of a group Medicare account. In addition, we realigned our military services business, primarily consisting of our TRICARE South Region contract previously included in the Other Businesses category, to our Group segment as we consider this contract with the government to be a group account. Prior period segment financial information has been recast to conform to the 2015 presentation. This is further described in Note 2 to the consolidated financial statements included in Item 8. - Financial Statements and Supplementary Data.

We manage our business with three reportable segments: Retail, Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

The Retail segment consists of Medicare benefits, marketed to individuals or directly via group accounts, as well as individual commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and financial protection products. In addition, the Retail segment also includes our contract with CMS to administer the LI-NET prescription drug plan program and contracts with various states to provide Medicaid, dual eligible, and Long-Term Support Services benefits, collectively our state-based contracts. The Group segment consists of employer group commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and voluntary insurance benefits, as well as administrative services only, or ASO products. In addition, our Group segment includes our health and wellness products (primarily marketed to employer groups) and military services business, primarily our TRICARE South Region contract. The Healthcare Services segment includes services offered to our health plan members as well as to third parties, including pharmacy solutions, provider services, home based services, and clinical programs, as well as services and capabilities to advance population health. We will continue to report under the category of Other Businesses those businesses which do not align with the reportable segments described above, primarily our closed-block long-term care insurance policies.

The results of each segment are measured by income before income taxes. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and home based services as well as clinical programs, to our Retail and Group customers. Intersegment sales and expenses are recorded at fair value and eliminated in consolidation. Members served by our segments often use the same provider networks, enabling us in some instances to obtain more favorable contract terms with providers. Our segments also share indirect costs and assets. As a result, the profitability of each segment is interdependent. We allocate most operating expenses to our segments. Assets and certain corporate income and expenses are not allocated to the segments, including the portion of investment income not supporting segment operations, interest expense on corporate debt, and certain other corporate expenses. These items are managed at a corporate level. These corporate amounts are reported separately from our reportable segments and are included with intersegment eliminations.

Seasonality

One of the product offerings of our Retail segment is Medicare stand-alone prescription drug plans, or PDPs, under the Medicare Part D program. Our quarterly Retail segment earnings and operating cash flows are impacted by the Medicare Part D benefit design and changes in the composition of our membership. The Medicare Part D benefit design results in coverage that varies as a member's cumulative out-of-pocket costs pass through successive stages of a member's plan period, which begins annually on January 1 for renewals. These plan designs generally result in us sharing a greater portion of the responsibility for total prescription drug costs in the early stages and less in the latter stages. As a result, the PDP benefit ratio generally decreases as the year progresses. In addition, the number of low-income senior members as well as year-over-year changes in the mix of membership in our stand-alone PDP products affects the quarterly benefit ratio pattern.

Our Group segment also experiences seasonality in the benefit ratio pattern. However, the effect is opposite of Medicare stand-alone PDP in the Retail segment, with the Group segment's benefit ratio increasing as fully-insured members progress through their annual deductible and maximum out-of-pocket expenses. Similarly, certain of our fully-insured individual commercial medical products in our Retail segment experience seasonality in the benefit ratio akin to the Group segment, including the effect of existing previously underwritten members transitioning to policies compliant with the Health Care Reform Law with us and other carriers. As previously underwritten members transition, it results in policy lapses and the release of reserves for future policy benefits partially offset by the recognition of previously deferred acquisition costs. These policy lapses generally occur during the first quarter of the new coverage year following the open enrollment period reducing the benefit ratio in the first quarter. The recognition of a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law in the fourth quarter of 2015, discussed in more detail in the highlights that follow, negatively impacted the benefit ratio pattern in 2015 and conversely is expected to favorably impact the benefit ratio in 2016 for this business. The quarterly benefit ratio pattern for our individual commercial medical business compliant with the Health Care Reform Law will be relatively flat throughout 2016 as opposed to the increasing benefit ratio pattern exhibited in prior years.

In addition, the Retail segment also experiences seasonality in the operating cost ratio as a result of costs incurred in the second half of the year associated with the Medicare and individual health care exchange marketing seasons.

2015 Highlights

Consolidated

- Our 2015 results reflect the continued implementation of our strategy to offer our members affordable health care combined with a positive consumer experience in growing markets. At the core of this strategy is our integrated care delivery model, which unites quality care, high member engagement, and sophisticated data analytics. Our approach to primary, physician-directed care for our members aims to provide quality care that is consistent, integrated, cost-effective, and member-focused, provided by both employed physicians and physicians with network contract arrangements. The model is designed to improve health outcomes and affordability for individuals and for the health system as a whole, while offering our members a simple, seamless healthcare experience. We believe this strategy is positioning us for long-term growth in both membership and earnings. We offer providers a continuum of opportunities to increase the integration of care and offer assistance to providers in transitioning from a fee-for-service to a value-based arrangement. These include performance bonuses, shared savings and shared risk relationships. At December 31, 2015, approximately 1,633,100 members, or 59.3%, of our individual Medicare Advantage members were in value-based relationships under our integrated care delivery model, as compared to 1,301,000 members, or 53.6%, at December 31, 2014.

- On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc., or Concentra, to MJ Acquisition Corporation, a joint venture between Select Medical Holdings Corporation and Welsh, Carson, Anderson & Stowe XII, L.P., a private equity fund, for approximately $1,055 million in cash, excluding approximately $22 million of transaction costs. In connection with the sale, we recognized a pre-tax gain, net of transaction costs, of $270 million, or $1.57 per diluted common share in 2015.

- During 2015, we recorded transaction costs in connection with the Merger of approximately $23.1 million, or $0.14 per diluted common share. Certain costs associated with the transaction are not deductible for tax purposes.

- Excluding the impact of the sale of Concentra and transaction costs associated with the Merger, our pretax results for 2015 as compared to 2014 reflect year-over-year improvement in the Group and Healthcare Services segment pretax results and higher investment income, partially offset by a year-over-year decline in Retail segment pretax results as discussed in the detailed segment results discussion that follows.

- Year-over-year comparisons of the operating cost ratio are impacted by an increase in 2015 of the non-deductible health insurance industry fee mandated by the Health Care Reform Law. Likewise, year-over-year comparisons of the benefit ratio reflect the increase in this fee in the pricing of our products for 2015 which reduces our benefit ratio.

- Investment income increased $97 million in 2015, primarily due to higher realized capital gains in 2015 as a result of the repositioning of our portfolio given recent market volatility and anticipated changes to interest rates.

- Year-over-year comparisons of diluted earnings per common share are favorably impacted by a lower number of shares used to compute diluted earnings per common share reflecting the impact of share repurchases.

- Operating cash flow provided by operations was $868 million for the year ended December 31, 2015 as compared to operating cash flow of $1.6 billion for the year ended December 31, 2014. The decrease in our operating cash flows primarily reflects the effect of significant growth in individual commercial medical and group Medicare Advantage membership in the prior year and changes in the timing of other working capital items related to the growth in our pharmacy business and growth in net receivables under the commercial risk adjustment, reinsurance, and risk corridor programs under the Health Care Reform Law, commonly referred to as the 3Rs. Prior year cash flows were favorably impacted from the typical pattern of claim payments that lagged premium receipts related to new membership. Individual commercial medical added 548,000 new members in 2014 compared to a decline of 90,400 members in 2015. Likewise, group Medicare Advantage added 60,600 new members in 2014 compared to a decline of 5,600 members in 2015.

- In 2015, we paid the federal government $867 million for the annual non-deductible health insurance industry fee compared to our payment of $562 million in 2014. This fee is not deductible for tax purposes, which significantly increased our effective income tax rate beginning in 2014. The health insurance industry fee is further described below under the section titled "Health Care Reform." The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee. This will significantly reduce our effective tax rate in 2017.

- During 2015, we repurchased 1.85 million shares in open market transactions for $329 million and paid dividends to stockholders of $172 million. Pursuant to the Merger Agreement, after July 2, 2015, we are prohibited from repurchasing any of our outstanding securities without the prior written consent of Aetna, other than repurchases of shares of our common stock in connection with the exercise of outstanding stock options or the vesting or settlement of outstanding restricted stock awards. Accordingly, as announced on July 3, 2015, we have suspended our share repurchase program. Our remaining repurchase authorization was $1.04 billion as of July 3, 2015. The Merger does not impact our ability and intent to continue quarterly dividend payments prior to the closing of the Merger consistent with our historical dividend payments. Under the terms of the Merger Agreement, we have agreed with Aetna that our quarterly dividend will not exceed $0.29 per share prior to the closing of the Merger.

Retail Segment

- On April 6, 2015, CMS announced final 2016 Medicare benchmark payment rates and related technical factors impacting the bid benchmark premiums, which we refer to as the Final Rate Notice. We believe the Final Rate Notice, together with the impact of payment cuts associated with the Health Care Reform Law, quality bonuses,

risk coding modifications, and other funding formula changes, indicated 2016 Medicare Advantage funding increases for us of approximately 1.0% on average. Although the overall rate adjustment is positive, geographic-specific impacts may vary significantly from this average, particularly in Florida. We believe we have effectively designed Medicare Advantage products based upon the applicable level of rate changes while continuing to remain competitive compared to both the combination of original Medicare with a supplement policy and Medicare Advantage products offered by our competitors. Failure to execute these strategies may result in a material adverse effect on our results of operations, financial position, and cash flows.

- In 2015, our Retail segment pretax income decreased by $409 million, or 30.5%, from 2014 primarily due to higher Medicare Advantage and individual commercial medical benefit ratios year-over-year, including the impact of benefits expense associated with a premium deficiency reserve for certain of our individual commercial products for the 2016 coverage year as described further below and in the results of operations discussion that follows. The higher benefit ratios were partially offset by declines in the Retail segment operating cost ratios, Medicare membership growth, and higher investment income year-over-year.

- Individual Medicare Advantage operating results for 2015 included significant membership growth but were negatively impacted by certain developments related to our product pricing assumptions for 2015. These developments primarily related to lower-than-expected 2015 financial claim recovery levels (included in medical claims reserve development) and lower-than-anticipated reductions in inpatient admissions. Claims data from the fourth quarter of 2015 and early 2016 indicate that inpatient admissions continue to develop favorably versus expectations and claim recoveries have stabilized. We are closely monitoring these favorable trends.

- Operating results for our individual commercial medical business compliant with the Health Care Reform Law have been challenged primarily due to unanticipated modifications in the program subsequent to the passing of the Health Care Reform Law, resulting in higher covered population morbidity and the ensuing enrollment and claims issues causing volatility in claims experience. The benefit ratios associated with many of our individual commercial medical products, in particular Health Care Reform Law compliant offerings, significantly exceeded prior expectations for fiscal year 2015, driven primarily by the on-going impact of the transitional policies, special enrollment period exemptions associated with the program, and government-mandated product designs that attracted higher-utilizing members . Additionally, on June 30, 2015, CMS issued data with respect to the reinsurance and risk adjustment premium stabilization programs for the 2014 plan year which indicated a healthier risk profile comparison for our membership relative to state averages than had been previously anticipated. This resulted in adjustments to certain of the 3Rs during 2015.

  We took a number of actions in 2015 to improve the profitability of our individual commercial medical business in 2016.These actions were subject to regulatory restrictions in certain geographies and included premium increases for the 2016 coverage year related generally to the first half of 2015 claims experience, the discontinuation of certain products as well as exit of certain markets for 2016, network improvements, enhancements to claims and clinical processes and administrative cost control. Despite these actions, the deterioration in the second half of 2015 claims experience together with 2016 open enrollment results indicating the retention of many high-utilizing members for 2016 resulted in a probable future loss. As a result of our assessment of the profitability of our individual medical policies compliant with the Health Care Reform Law, in the fourth quarter of 2015, we recorded a provision for probable future losses (premium deficiency reserve) for the 2016 coverage year of $176 million, or $0.74 per diluted common share. The premium deficiency reserve includes the estimated benefit of approximately $340 million associated with risk corridor provisions expected for the 2016 coverage year.

  In light of the premium deficiency reserve recognized in the fourth quarter of 2015 for the 2016 coverage year, results for this business for 2016 are expected to primarily include results associated with the wind-down of plans that are not compliant with the Health Care Reform Law, including the related release of policy reserves, as well as indirect administrative costs associated with plans that are compliant with the Health Care Reform Law. We are continuing to evaluate our participation in the individual commercial medical line of business for 2017.

- Individual Medicare Advantage membership of 2,753,400 at December 31, 2015 increased 325,500 members, or 13.4%, from 2,427,900 at December 31, 2014 reflecting net membership additions, particularly for our Health Maintenance Organization, or HMO, offerings, for the 2015 plan year. January 2016 individual Medicare Advantage membership approximated 2,811,000, increasing approximately 57,600 members, or 2%, from December 31, 2015 reflecting net membership additions during the recently completed 2016 annual election period for Medicare beneficiaries. For full year 2016, we anticipate net membership growth in our individual Medicare Advantage offerings of 100,000 to 120,000.

- Group Medicare Advantage membership of 484,100 at December 31, 2015 decreased 5,600 members, or 1.1%, from 489,700 at December 31, 2014. For full year 2016, we expect a net membership decline in our Group Medicare Advantage offerings of 120,000 to 125,000 members primarily due to the loss of a large account that converted to a private exchange offering. Approximately 50% of members from that account selected an individual Humana offering for 2016, with the majority enrolling in a Medicare supplement plan.

- Medicare stand-alone PDP membership of 4,557,900 at December 31, 2015 increased 563,900 members, or 14.1%, from 3,994,000 at December 31, 2014 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2015 plan year. January 2016 Medicare stand-alone PDP membership (excluding transitional growth from the LI-NET prescription drug plan program) increased approximately 240,000 members, or 5%, from December 31, 2015 reflecting net membership additions, primarily for our Humana-Walmart plan offering, during the recently completed 2016 annual election period for Medicare beneficiaries. For full year 2016, we anticipate net membership growth in our Medicare stand-alone PDP offerings of 300,000 to 330,000.

- Our state-based Medicaid membership of 373,700 at December 31, 2015 increased 56,900 members, or 18.0%, from 316,800 at December 31, 2014 primarily driven by the addition of members under our Florida Medicaid contract.

- Individual commercial medical membership of 1,057,700 at December 31, 2015 decreased 90,400 members, or 7.9%, from 1,148,100 at December 31, 2014 primarily reflecting the loss of approximately 150,000 members due to termination by CMS for lack of proper eligibility documentation from the member as well as the loss of members who had subscribed to plans that were not compliant with the Health Care Reform Law. These declines were partially offset by an increase in membership in plans that are compliant with the Health Care Reform Law, primarily off-exchange. Individual commercial medical membership in plans compliant with the Health Care Reform Law experienced growth in 2015, but at a lesser rate than in 2014. At December 31, 2015, individual commercial medical membership in plans compliant with the Health Care Reform Law, both on-exchange and off-exchange, was 757,900 members, an increase of 71,600 members or 10.4% from December 31, 2014.

  We expect a net decline in individual commercial medical membership (excluding Medicare Supplement) for full year 2016 of 200,000 to 300,000, primarily reflecting increases in premiums as well as benefit redesigns that took effect on January 1, 2016. This membership expectation takes into account plans compliant with the Health Care Reform Law, both on and off exchange, and legacy plans that are not compliant with the Health Care Reform Law. Membership estimates for 2016 include the expectation of coverage termination by 50% to 60% of the approximately 100,000 members impacted by plan discontinuances.

Group Segment

- Group segment pretax income grew $107 million, or 70.9%, for the year ended December 31, 2015 primarily due to improvement in the operating cost ratio partially offset by an increase in the benefit ratio as discussed in the results of operations discussion that follows.

- Membership in HumanaVitality®, our wellness and loyalty rewards program, rose 2.0% to 3,932,300 at December 31, 2015 from 3,856,800 at December 31, 2014.

Healthcare Services Segment

- Year-over-year comparisons of results of operations are impacted by the completion of the sale of Concentra on June 1, 2015.

- As discussed in the detailed Healthcare Services segment results of operations discussion that follows, our Healthcare Services segment pretax income increased $243 million, or 32.9%, for the year ended December 31, 2015. This increase was primarily due to higher earnings from our pharmacy solutions and home based services businesses as they serve our growing Medicare membership. High levels of Medicare membership growth as well as increased engagement of members in clinical programs have resulted in higher usage of services across this segment. In addition, improved operating efficiency in the pharmacy business primarily was driven by lower cost of goods associated with increased purchasing scale and lower cost-to-fill primarily due to improvements in technology.

- Programs to enhance the quality of care for members are key elements of our integrated care delivery model. We have expanded our identification of and outreach to members in need of clinical intervention. At December 31, 2015, we enrolled approximately 590,300 Medicare Advantage members with complex chronic conditions in the Humana Chronic Care Program, a 40.3% increase compared with approximately 420,700 members at December 31, 2014, reflecting enhanced predictive modeling capabilities and focus on proactive clinical outreach and member engagement. We believe these initiatives lead to better health outcomes for our members and lower health care costs.

Health Care Reform

The Health Care Reform Law enacted significant reforms to various aspects of the U.S. health insurance industry. Certain significant provisions of the Health Care Reform Law include, among others, mandated coverage requirements, mandated benefits and guarantee issuance associated with commercial medical insurance, rebates to policyholders based on minimum benefit ratios, adjustments to Medicare Advantage premiums, the establishment of federally-facilitated or state-based exchanges coupled with programs designed to spread risk among insurers, and the introduction of plan designs based on set actuarial values. In addition, the Health Care Reform Law established insurance industry assessments, including an annual health insurance industry fee and a three-year $25 billion industry wide commercial reinsurance fee. The annual health insurance industry fee levied on the insurance industry was $8 billion in 2014 and $11.3 billion in each of 2015 and 2016, with increasing annual amounts thereafter, and is not deductible for income tax purposes, which significantly increased our effective income tax rate. Our effective tax rate for 2015 was approximately 47.5%, including the favorable impact of the sale of Concentra on June 1, 2015. Our effective tax rate for 2016 is expected to be approximately 49% to 51%, excluding the impact of transaction costs associated with the Merger. In 2015, we paid the federal government $867 million for the annual health insurance industry fee, a 54.3% increase from $562 million in 2014, primarily reflecting an increase in the total industry fee. We expect our portion of the annual health insurance industry fee for 2016 to be higher than in 2015 given growth in our market share. The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee. This will significantly reduce our effective tax rate in 2017. The health insurance industry fee levied on the insurance industry was previously expected to be $14 billion in 2017.

In addition, the Health Care Reform Law expands federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms comes, in part, from material additional fees and taxes on us (as discussed above) and other health plans and individuals which began in 2014, as well as reductions in certain levels of payments to us and other health plans under Medicare as described in this 2015 10-K.

As noted above, the Health Care Reform Law required the establishment of health insurance exchanges for individuals and small employers to purchase health insurance that became effective January 1, 2014, with an annual open enrollment period. Insurers participating on the health insurance exchanges must offer a minimum level of benefits and are subject to guidelines on setting premium rates and coverage limitations. We may be adversely selected by individuals who have a higher acuity level than the anticipated pool of participants in this market. In addition, the risk

corridor, reinsurance, and risk adjustment provisions of the Health Care Reform Law, established to apportion risk for insurers, may not be effective in appropriately mitigating the financial risks related to our products. In addition, regulatory changes to the implementation of the Health Care Reform Law that allowed individuals to remain in plans that are not compliant with the Health Care Reform Law or to enroll outside of the annual enrollment period may have an adverse effect on our pool of participants in the health insurance exchange. In addition, states may impose restrictions on our ability to increase rates. All of these factors may have a material adverse effect on our results of operations, financial position, or cash flows if our premiums are not adequate or do not appropriately reflect the acuity of these individuals. Any variation from our expectations regarding acuity, enrollment levels, adverse selection, or other assumptions used in setting premium rates could have a material adverse effect on our results of operations, financial position, and cash flows and could impact our decision to participate or continue in the program in certain states.

As discussed above, it is reasonably possible that the Health Care Reform Law and related regulations, as well as future legislative changes, including legislative restrictions on our ability to manage our provider network or otherwise operate our business, or regulatory restrictions on profitability, including by comparison of our Medicare Advantage profitability to our non-Medicare Advantage business profitability and a requirement that they remain within certain ranges of each other, in the aggregate may have a material adverse effect on our results of operations (including restricting revenue, enrollment and premium growth in certain products and market segments, restricting our ability to expand into new markets, increasing our medical and operating costs, further lowering our Medicare payment rates and increasing our expenses associated with the non-deductible health insurance industry fee and other assessments); our financial position (including our ability to maintain the value of our goodwill); and our cash flows (including the delayed receipt of amounts due under the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law). During 2015, we received our interim settlement associated with our risk corridor receivables for the 2014 coverage year. The interim settlement, representing only 12.6% of risk corridor receivables for the 2014 coverage year, was funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 risk corridor program. The risk corridor program is a three year program and HHS guidance provides that risk corridor collections over the life of the three year program will first be applied to any shortfalls from previous benefit years before application to current year obligations. Risk corridor payables to issuers are obligations of the United States Government under the Health Care Reform law which requires the Secretary of HHS to make full payments to issuers. In the event of a shortfall at the end of the three year program, HHS has asserted it will explore other sources of funding for risk corridor payments, subject to the availability of appropriations.

We intend for the discussion of our financial condition and results of operations that follows to assist in the understanding of our financial statements and related changes in certain key items in those financial statements from year to year, including the primary factors that accounted for those changes. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and home based services as well as clinical programs, to our Retail and Group customers and are described in Note 17 to the consolidated financial statements included in Item 8. Financial Statements and Supplementary Data in this 2015 10-K.

Comparison of Results of Operations for 2015 and 2014

Certain financial data on a consolidated basis and for our segments was as follows for the years ended December 31, 2015 and 2014:

Consolidated

	2015	2014	Change Dollars	Change Percentage
	(dollars in millions, except per common share results)			
Revenues:				
Premiums:				
Retail	$ 45,805	$ 39,452	$ 6,353	16.1 %
Group	6,569	6,456	113	1.8 %
Other Businesses	35	51	(16)	(31.4)%
Total premiums	52,409	45,959	6,450	14.0 %
Services:

Group	698	763	(65)	(8.5)%
Healthcare Services	685	1,353	(668)	(49.4)%
Other Businesses	14	9	5	55.6 %
Total services	1,406	2,164	(758)	(35.0)%
Investment income	474	377	97	25.7 %
Total revenues	54,289	48,500	5,789	11.9 %
Operating expenses:				
Benefits	44,269	38,166	6,103	16.0 %
Operating costs	7,318	7,639	(321)	(4.2)%
Depreciation and amortization	355	333	22	6.6 %
Total operating expenses	51,942	46,138	5,804	12.6 %
Income from operations	2,347	2,362	(15)	(0.6)%
Gain on sale of business	270	—	270	100.0 %
Interest expense	186	192	(6)	(3.1)%
Income before income taxes	2,431	2,170	261	12.0 %
Provision for income taxes	1,155	1,023	132	12.9 %
Net income	$ 1,276	$ 1,147	$ 129	11.2 %
Diluted earnings per common share	$ 8.44	$ 7.36	$ 1.08	14.7 %
Benefit ratio (a)	84.5%	83.0%		1.5 %
Operating cost ratio (b)	13.6%	15.9%		(2.3)%
Effective tax rate	47.5%	47.2%		0.3 %

(a) Represents total benefits expense as a percentage of premiums revenue.

(b) Represents total operating costs, excluding depreciation and amortization, as a percentage of total revenues less investment income.

Summary

Net income was $1.3 billion, or $8.44 per diluted common share, in 2015 compared to $1.1 billion, or $7.36 per diluted common share, in 2014. The completion of the sale of Concentra on June 1, 2015 resulted in an after-tax gain

of $1.57 per diluted common share in 2015. Excluding the impact of the sale of Concentra, the decrease primarily was due to a decline in Retail segment pretax results, including expense of $0.74 per diluted common share for a premium deficiency reserve for certain of our individual commercial medical products for the 2016 coverage year, and an increase in the effective tax rate as discussed below. These items were partially offset by year-over-year improvement in the Group and Healthcare Services segment pretax results and higher investment income. In addition, 2015 includes expenses of $0.14 per diluted common share for transaction costs associated with the Merger, certain of which are not deductible for tax purposes. Net income for 2014 includes expenses of $0.15 per diluted common share associated with a loss on extinguishment of debt for the redemption of certain senior notes in 2014. Year-over-year comparisons of diluted earnings per common share are also favorably impacted by a lower number of shares used to compute diluted earnings per common share in 2015 reflecting the impact of share repurchases.

Premiums Revenue

Consolidated premiums increased $6.5 billion, or 14.0%, from 2014 to $52.4 billion for 2015 primarily reflecting higher premiums in both the Retail and Group segments. These higher premiums were primarily driven by average membership growth in the Retail segment and an increase in fully-insured group commercial medical per member premiums in the Group segment. Average membership is calculated by summing the ending membership for each month in a period and dividing the result by the number of months in a period. Premiums revenue reflects changes in membership and average per member premiums. Items impacting average per member premiums include changes in premium rates as well as changes in the geographic mix of membership, the mix of product offerings, and the mix of benefit plans selected by our membership.

Services Revenue

Consolidated services revenue decreased $758 million, or 35.0%, from 2014 to $1.4 billion for 2015 primarily due to the completion of the sale of Concentra on June 1, 2015 as well as the loss of certain large group ASO accounts as a result of continued discipline in pricing of services for self-funded accounts amid a highly competitive environment.

Investment Income

Investment income totaled $474 million for 2015, an increase of $97 million, or 25.7%, from 2014, primarily due to higher realized capital gains in 2015 as a result of the repositioning of our portfolio given recent market volatility and anticipated changes to interest rates, with higher average invested balances being substantially offset by lower interest rates.

Benefits Expense

Consolidated benefits expense was $44.3 billion for 2015, an increase of $6.1 billion, or 16.0%, from 2014 primarily due to an increase in the Retail segment mainly driven by higher average Medicare Advantage membership and individual commercial medical on-exchange and off-exchange membership in plans compliant with the Health Care Reform Law. As more fully described herein under the section entitled “Benefits Expense Recognition”, actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $236 million in 2015 and $518 million in 2014. The decline in prior-period medical claims reserve development year over-year primarily was due to Medicare Advantage and individual commercial medical claims development in the Retail segment as discussed further in the segment results of operations discussion that follows.

The consolidated benefit ratio for 2015 was 84.5%, an increase of 150 basis points from 2014 primarily due to increases in the Retail segment, including the impact of a recognizing a premium deficiency reserve for certain of our individual commercial medical products for the 2016 coverage year, and Group segment ratios as discussed in the segment results of operations discussions that follows. The increase in benefits expense associated with the recognition of the premium deficiency reserve increased the consolidated benefit ratio by approximately 30 basis points in 2015. Favorable prior-period medical claims reserve development decreased the consolidated benefit ratio by approximately 50 basis points in 2015 versus approximately 110 basis points in 2014.

Operating Costs

Our segments incur both direct and shared indirect operating costs. We allocate the indirect costs shared by the segments primarily as a function of revenues. As a result, the profitability of each segment is interdependent.

Consolidated operating costs decreased $321 million, or 4.2%, from 2014 to $7.3 billion in 2015 primarily due to cost management initiatives across all lines of business as well as the completion of the sale of Concentra on June 1, 2015, partially offset by increases in costs mandated by the Health Care Reform Law, including the non-deductible health insurance industry fee.

The consolidated operating cost ratio for 2015 was 13.6%, decreasing 230 basis points from 2014 primarily due to decreases in the operating cost ratios in the Group and Retail segments reflecting cost management initiatives, as well as the completion of the sale of Concentra on June 1, 2015. Concentra carried a higher operating cost ratio.

Depreciation and Amortization

Depreciation and amortization for 2015 totaled $355 million, increasing $22 million, or 6.6% from 2014 reflecting higher depreciation expense from capital expenditures.

Interest Expense

Interest expense was $186 million for 2015 compared to $192 million for 2014, a decrease of $6 million, or 3.1%, primarily reflecting a higher average long-term debt balance due to the issuance of senior notes in September 2014, partially offset by the recognition of a loss on extinguishment of debt of approximately $37 million in October 2014 for the redemption of our $500 million 6.45% senior unsecured notes due June 1, 2016.

Income Taxes

Our effective tax rate during 2015 was 47.5% compared to the effective tax rate of 47.2% in 2014. The increase in the effective tax rate primarily was due to an increase in the non-deductible health insurance industry fee from 2014, substantially offset by the favorable tax effect of the gain on the sale of Concentra. See Note 11 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for a complete reconciliation of the federal statutory rate to the effective tax rate. Our effective tax rate for 2016 is expected to be approximately 49% to 51%, excluding the impact of any non-deductible transaction costs associated with the Merger.

Retail Segment

	2015	2014	Change Members	Change Percentage
Membership:				
Medical membership:				
Individual Medicare Advantage	2,753,400	2,427,900	325,500	13.4 %
Group Medicare Advantage	484,100	489,700	(5,600)	(1.1)%
Medicare stand-alone PDP	4,557,900	3,994,000	563,900	14.1 %
Total Retail Medicare	7,795,400	6,911,600	883,800	12.8 %
Individual commercial (a)	1,057,700	1,148,100	(90,400)	(7.9)%
State-based Medicaid	373,700	316,800	56,900	18.0 %
Total Retail medical members	9,226,800	8,376,500	850,300	10.2 %
Individual specialty membership (b)	1,153,100	1,165,800	(12,700)	(1.1)%

(a) Individual commercial medical membership includes Medicare Supplement members.

(b) Specialty products include dental, vision, and other supplemental health and financial protection products. Members included in these products may not be unique to each product since members have the ability to enroll in multiple products.

Benefit ratio	86.7%	84.9%		1.8 %
Operating cost ratio	11.2%	11.6%		(0.4)%

Pretax Results

- Retail segment pretax income was $930 million in 2015, a decrease of $409 million, or 30.5%, compared to 2014 primarily driven by an increase in the benefit ratio for 2015, including the impact of recognizing a premium deficiency reserve of approximately $176 million for certain of our individual commercial medical products for the 2016 coverage year, partially offset by a decline in the operating cost ratio, Medicare Advantage membership growth, and higher investment income year-over-year.

Enrollment

- Individual Medicare Advantage membership increased 325,500 members, or 13.4%, from December 31, 2014 to December 31, 2015 reflecting net membership additions, particularly for our HMO offerings, for the 2015 plan year.

- Group Medicare Advantage membership decreased 5,600 members, or 1.1%, from December 31, 2014 to December 31, 2015.

- Medicare stand-alone PDP membership increased 563,900 members, or 14.1%, from December 31, 2014 to December 31, 2015 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2015 plan year.

- Individual commercial medical membership decreased 90,400 members, or 7.9%, from December 31, 2014 to December 31, 2015 primarily reflecting the loss of approximately 150,000 members due to termination by CMS for lack of proper eligibility documentation from the member as well as the loss of members who had subscribed to plans that were not compliant with the Health Care Reform Law. These declines were partially offset by an increase in membership in plans that are compliant with the Health Care Reform Law, primarily off-exchange.

- State-based Medicaid membership increased 56,900 members, or 18.0%, from December 31, 2014 to December 31, 2015 primarily driven by the addition of members under our Florida Medicaid contract.

- Individual specialty membership decreased 12,700 members, or 1.1%, from December 31, 2014 to December 31, 2015 primarily driven by a membership decline in supplemental health and financial protection product and vision offerings.

Premiums revenue

- Retail segment premiums increased $6.4 billion, or 16.1%, from 2014 to 2015 primarily due to membership growth across our Medicare Advantage, state-based Medicaid, and Medicare stand-alone PDP lines of business, as well as a heavier percentage of individual commercial medical business in higher premium plans compliant with the Health Care Reform Law. Average Medicare Advantage membership increased 11.8% in 2015.

Benefits expense

- The Retail segment benefit ratio of 86.7% for 2015 increased 180 basis points from 2014 primarily due to higher than expected medical costs as compared to the assumptions used in our pricing, the recognition of a premium deficiency reserve in the fourth quarter of 2015 for certain of our individual commercial medical products for the 2016 coverage year, and unfavorable year-over-year comparisons of prior-period medical claims reserve development as discussed below. In addition, the increase reflects higher benefit ratios associated with a greater number of members from state-based contracts and the impact of the change in estimate for the 2014 net 3Rs receivables in 2015. These items were partially offset by the impact of the increase in the health insurance industry fee included in the pricing of our products. In addition, the 2015 period was favorably impacted by the release of reserves for future policy benefits as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law.

  We experienced higher than expected medical costs as compared to the assumptions used in our pricing for 2015 primarily due to lower-than-expected 2015 Medicare Advantage financial claim recovery levels and lower-than-anticipated reductions in inpatient admissions. In addition, medical claims associated with certain individual commercial medical products, in particular products compliant with the Health Care Reform Law, exceeded the assumptions used when we set pricing for 2015. We took a number of actions in 2015 to improve the profitability of our individual commercial medical business in 2016. These actions were subject to regulatory restrictions in certain geographies and included premium increases for the 2016 coverage year related generally to the first half of 2015 claims experience, the discontinuation of certain products as well as exit of certain markets for 2016, network improvements, enhancements to claims and clinical processes and

administrative cost control. Despite these actions, the deterioration in the second half of 2015 claims experience together with 2016 open enrollment results indicating the retention of many high-utilizing members for 2016 resulted in a probable future loss. As a result of our assessment of the profitability of our individual medical policies compliant with the Health Care Reform Law, in the fourth quarter of 2015, we recorded a provision for probable future losses (premium deficiency reserve) for the 2016 coverage year of $176 million. The increase in benefits expense associated with the recognition of the premium deficiency reserve increased the Retail segment benefit ratio by approximately 40 basis points in 2015.

- The Retail segment's benefits expense for 2015 included the beneficial effect of $228 million in favorable prior-year medical claims reserve development versus $488 million in 2014. This favorable prior-year medical claims reserve development decreased the Retail segment benefit ratio by approximately 50 basis points in 2015 versus approximately 120 basis points in 2014. The year-over-year decline in prior-period medical claims reserve development primarily was due to the impact of lower financial claim recoveries due in part to our gradual implementation during 2014 of inpatient authorization review prior to admission as opposed to post adjudication, as well as higher than expected flu associated claims from the fourth quarter of 2014 and continued volatility in claims associated with individual commercial medical products.

Operating costs

- The Retail segment operating cost ratio of 11.2% for 2015 decreased 40 basis points from 2014 primarily reflecting administrative cost efficiencies associated with medical membership growth in the segment and other discretionary cost reductions, partially offset by the increase in the non-deductible health insurance industry fee. The non-deductible health insurance industry fee increased the operating cost ratio by approximately 160 basis points in 2015 as compared to 120 basis points in 2014.

Group Segment

			Change	
	2015	2014	Members	Percentage
Membership:				
Medical membership:				
Fully-insured commercial group	1,178,300	1,235,500	(57,200)	(4.6)%
ASO	710,700	1,104,300	(393,600)	(35.6)%
Military services	3,074,400	3,090,400	(16,000)	(0.5)%
Total group medical members	4,963,400	5,430,200	(466,800)	(8.6)%
Group specialty membership (a)	6,068,700	6,502,700	(434,000)	(6.7)%

(a) Specialty products include dental, vision, and other voluntary benefit products. Members included in these products may not be unique to each product since members have the ability to enroll in multiple products.

	2015	2014	Change	
			Dollars	Percentage
		(in millions)		
Premiums and Services Revenue:				
Premiums:				
Fully-insured commercial group	$ 5,493	$ 5,339	$ 154	2.9 %
Group specialty	1,055	1,098	(43)	(3.9)%
Military services	21	19	2	10.5 %
Total premiums	6,569	6,456	113	1.8 %
Services	698	763	(65)	(8.5)%
Total premiums and services revenue	$ 7,267	$ 7,219	$ 48	0.7 %
Income before income taxes	$ 258	$ 151	$ 107	70.9 %
Benefit ratio	80.2%	79.5%		0.7 %
Operating cost ratio	24.0%	26.5%		(2.5)%

Pretax Results

- Group segment pretax income increased $107 million, or 70.9%, to $258 million in 2015 primarily reflecting improvement in the operating cost ratio partially offset by an increase in the benefit ratio as discussed below.

Enrollment

- Fully-insured commercial group medical membership decreased 57,200 members, or 4.6% from December 31, 2014 reflecting lower membership in both large and small group accounts.

- Group ASO commercial medical membership decreased 393,600 members, or 35.6%, from December 31, 2014 to December 31, 2015 primarily due to the loss of certain large group accounts as a result of continued discipline in pricing of services for self-funded accounts amid a highly competitive environment.

- Group specialty membership decreased 434,000 members, or 6.7%, from December 31, 2014 to December 31, 2015 primarily due to the loss of certain fully-insured group medical accounts that also had specialty coverage.

Premiums revenue

- Group segment premiums increased $113 million, or 1.8%, from 2014 to 2015 primarily due to an increase in fully-insured commercial medical per member premiums partially offset by a net decline in fully-insured commercial medical membership.

Services revenue

- Group segment services revenue decreased $65 million, or 8.5%, from 2014 to 2015 primarily due to a decline in group ASO commercial medical membership.

Benefits expense

- The Group segment benefit ratio increased 70 basis points from 79.5% in 2014 to 80.2% in 2015 primarily reflecting the impact of higher specialty drug costs, net of rebates, as well as higher outpatient costs and lower prior-period medical claims reserve development, partially offset by an increase in the non-deductible health insurance industry fee included in the pricing of our products.

- The Group segment's benefits expense included the beneficial effect of $7 million in favorable prior-year medical claims reserve development versus $29 million in 2014. This favorable prior-year medical claims reserve development decreased the Group segment benefit ratio by approximately 10 basis points in 2015 versus approximately 40 basis points in 2014. The year-over-year decline in favorable prior-period medical

claims reserve development primarily was due to a relatively small number of higher severity claims in the 2015 period associated with prior periods.

Operating costs

- The Group segment operating cost ratio of 24.0% for 2015 decreased 250 basis points from 26.5% for 2014, reflecting a decline in our group ASO commercial medical membership which carries a higher operating cost ratio than our fully-insured commercial medical membership, as well as operating cost efficiencies associated with our fully-insured business. Operating cost efficiencies were the result of both sustainable cost reduction initiatives and discretionary reductions. These declines were partially offset by the impact of an increase in the non-deductible health insurance industry fee. The non-deductible health insurance industry fee increased the operating cost ratio by approximately 140 basis points in 2015 as compared to 100 basis points in 2014.

Healthcare Services Segment

			Change

Home based services	875	585	290	49.6 %
Clinical programs	203	208	(5)	(2.4)%
Total intersegment revenues	22,920	18,847	4,073	21.6 %
Total services and intersegment revenues	$ 23,605	$ 20,200	$ 3,405	16.9 %
Income before income taxes	$ 981	$ 738	$ 243	32.9 %
Operating cost ratio	95.2%	95.6%		(0.4)%

Pretax results

- Healthcare Services segment pretax income of $981 million for 2015 increased $243 million, or 32.9%, from 2014 primarily due to higher earnings from our pharmacy solutions and home based services businesses as they serve our growing Medicare membership.

Script Volume

- Humana Pharmacy Solutions® script volumes for the Retail and Group segment membership increased to approximately 398 million in 2015, up 21% versus scripts of approximately 329 million in 2014. The increase primarily reflects growth associated with higher average medical membership for 2015 than in 2014.

Services revenue

- Services revenue decreased $668 million, or 49.4%, from 2014 to $685 million for 2015 primarily due to the completion of the sale of Concentra on June 1, 2015.

Intersegment revenues

- Intersegment revenues increased $4.1 billion, or 21.6%, from 2014 to $22.9 billion for 2015 primarily due to growth in our Medicare membership which resulted in higher utilization of our Healthcare Services segment businesses.

Operating costs

- The Healthcare Services segment operating cost ratio of 95.2% for 2015 decreased 40 basis points from 95.6% for 2014 primarily due to lower operating costs in our pharmacy business together with discretionary cost reductions across the segment, partially offset by the increasing percentage of pharmacy business associated with lower margin specialty drugs. Improving operating efficiency in the pharmacy business was primarily driven by lower cost of goods associated with increased purchasing scale and lower cost-to-fill primarily due to improvements in technology.

Comparison of Results of Operations for 2014 and 2013

Certain financial data on a consolidated basis and for our segments was as follows for the years ended December 31, 2014 and 2013:

Consolidated

Operating cost ratio (b)	15.9%	15.5%		0.4 %
Effective tax rate	47.2%	35.9%		11.3 %

(a) Represents total benefits expense as a percentage of premiums revenue.

(b) Represents total operating costs, excluding depreciation and amortization, as a percentage of total revenues less investment income.

Summary

Net income was $1.1 billion, or $7.36 per diluted common share, in 2014 compared to $1.2 billion, or $7.73 per diluted common share, in 2013. Net income for 2014 includes expenses of $0.15 per diluted common share associated with a loss on extinguishment of debt for the redemption of certain senior notes in 2014 and net income for 2013 includes benefits expense of $0.99 per diluted common share for reserve strengthening associated with our closed-

block of long-term care insurance policies included with Other Businesses as discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data as well as the benefit of a reduction in benefits expense in 2013 related to a favorable settlement of contract claims with the DoD. Excluding these items, the increase in net income primarily resulted from higher pretax income in our Healthcare Services segment substantially offset by lower pretax income in our Retail and Group segments. In addition, 2014 was favorably impacted by a lower number of shares used to compute diluted earnings per common share reflecting the impact of share repurchases.

Premiums Revenue

Consolidated premiums increased $7.1 billion, or 18.4%, from 2013 to $46.0 billion for 2014 primarily due to increases in both Retail and Group segment premiums mainly driven by higher average individual and group Medicare Advantage membership as well as higher individual commercial medical membership. In addition, year-over-year comparisons to 2013 were negatively impacted by sequestration which became effective April 1, 2013. Premiums revenue for our Other Businesses declined primarily due to the loss of our Puerto Rico Medicaid contracts effective September 30, 2013.

Services Revenue

Consolidated services revenue increased $55 million, or 2.6%, from 2013 to $2.2 billion for 2014 primarily due to an increase in services revenue in our Retail segment due to the acquisition of American Eldercare in September 2013.

Investment Income

Investment income totaled $377 million for 2014, an increase of $2 million from 2013, as higher average invested balances were partially offset by lower interest rates.

Benefits Expense

Consolidated benefits expense was $38.2 billion for 2014, an increase of $5.6 billion, or 17.2%, from 2013 primarily due to increases in both the Retail and Group segments mainly driven by higher average individual and group Medicare Advantage membership as well as higher individual commercial medical membership. We experienced favorable medical claims reserve development related to prior fiscal years of $518 million in 2014 and $474 million in 2013. These increases in favorable medical claims reserve development primarily resulted from increased membership and better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

The consolidated benefit ratio for 2014 was 83.0%, a decrease of 90 basis points from 2013 primarily due to reserve strengthening in 2013 associated with our closed-block of long-term care insurance policies included with Other Businesses as discussed above, as well as the loss of our Medicaid contracts in Puerto Rico effective September 30, 2013 which more than offset higher ratios year-over-year in the Retail and Group segments.

Operating Costs

Our segments incur both direct and shared indirect operating costs. We allocate the indirect costs shared by the segments primarily as a function of revenues. As a result, the profitability of each segment is interdependent.

Consolidated operating costs increased $1,284 million, or 20.2%, in 2014 compared to 2013 primarily due to costs mandated by the Health Care Reform Law, including the non-deductible health insurance industry fee, and investments in health care exchanges and state-based contracts, partially offset by operating cost efficiencies.

The consolidated operating cost ratio for 2014 was 15.9%, increasing 40 basis points from 2013 primarily due to increases in the operating cost ratios in our Retail and Group segments due to the same factors impacting consolidated operating costs as described above.

Depreciation and Amortization

Depreciation and amortization for 2014 totaled $333 million, unchanged from 2013.

Interest Expense

Interest expense was $192 million for 2014 compared to $140 million for 2013, an increase of $52 million, or 37.1%. In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date, We recognized a loss on extinguishment of debt of approximately $37 million in October 2014 for the redemption of these notes.

Income Taxes

Our effective tax rate during 2014 was 47.2% compared to the effective tax rate of 35.9% in 2013. The non-deductible nature of the health insurance industry fee levied on the insurance industry beginning in 2014 as mandated by the Health Care Reform Law increased our effective tax rate by approximately 9.4 percentage points for 2014.

Retail Segment

			Change	
	2014	2013	Members	Percentage
Membership:				
Medical membership:				
Individual Medicare Advantage	2,427,900	2,068,700	359,200	17.4%

Benefit ratio	84.9%	85.1%		(0.2)%
Operating cost ratio	11.6%	10.1%		1.5 %

Pretax Results

- Retail segment pretax income was $1.3 billion in 2014, a decrease of $151 million, or 10.1%, compared to 2013 primarily driven by investment spending for health care exchanges and state-based contracts and higher specialty prescription drug costs associated with a new treatment for Hepatitis C, partially offset by Medicare Advantage and individual commercial medical membership growth as well as increased membership in our clinical programs.

Enrollment

- Individual Medicare Advantage membership increased 359,200 members, or 17.4%, from December 31, 2013 to December 31, 2014 reflecting net membership additions, particularly for our HMO offerings, for the 2014 plan year.
- Fully-insured group Medicare Advantage membership increased 60,600 members, or 14.1%, from December 31, 2013 to December 31, 2014 primarily due to the addition of a new large group account.
- Medicare stand-alone PDP membership increased 718,100 members, or 21.9%, from December 31, 2013 to December 31, 2014 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2014 plan year.
- Individual commercial medical membership increased 548,000 members, or 91.3%, from December 31, 2013 to December 31, 2014 primarily reflecting new sales, both on-exchange and off-exchange, of plans compliant with the Health Care Reform Law.
- State-based Medicaid membership increased 231,300 members, or 270.5%, from December 31, 2013 to December 31, 2014 primarily driven by the addition of members under our Florida Medicaid and Florida Long-Term Support Services contracts as well as 18,300 dual eligible members from state-based contracts in Virginia and Illinois.
- Individual specialty membership increased 123,300 members, or 11.8%, from December 31, 2013 to December 31, 2014 primarily driven by increased membership in dental and vision offerings.

Premiums revenue

- Retail segment premiums increased $7.5 billion, or 23.6%, from 2013 to 2014 primarily due to membership growth across all lines of business, particularly for our Medicare Advantage, individual commercial medical, primarily on the health care exchanges, and state-based Medicaid businesses. Individual Medicare Advantage average membership increased 16.6% in 2014. Individual Medicare Advantage per member premiums decreased approximately 1.7% in 2014 compared to 2013, primarily due to Medicare rate reductions and the impact of sequestration which became effective on April 1, 2013.

Benefits expense

- The Retail segment benefit ratio of 84.9% for 2014 decreased 20 basis points from 2013 primarily due to increased membership in our clinical programs and the inclusion of the health insurance industry fee in the pricing of our products, partially offset by higher specialty prescription drug costs associated with a new treatment for Hepatitis C, higher planned clinical investment spending, and higher benefit ratios associated with members from state-based contracts.

- The Retail segment's benefits expense for 2014 included the beneficial effect of $488 million in favorable prior-year medical claims reserve development versus $428 million in 2013. This favorable prior-year medical claims reserve development decreased the Retail segment benefit ratio by approximately 120 basis points in 2014 versus approximately 130 basis points in 2013.

Operating costs

- The Retail segment operating cost ratio of 11.6% for 2014 increased 150 basis points from 2013 primarily due to the non-deductible health insurance industry fee mandated by the Health Care Reform Law and investment spending for health care exchanges and state-based contracts, partially offset by scale efficiencies from Medicare and individual commercial medical membership growth.

Income before income taxes	$ 151	$ 240	$ (89)	(37.1)%
Benefit ratio	79.5%	77.7%		1.8 %
Operating cost ratio	26.5%	26.5%		— %

Pretax Results

- Group segment pretax income decreased $89 million, or 37.1%, to $151 million in 2014 primarily reflecting higher utilization, mainly due to higher specialty prescription drug costs associated with a new treatment for Hepatitis C, as well as the continuing impact of transitional policy changes which allowed individuals to remain in plans not compliant with the Health Care Reform Law.

Enrollment

- Fully-insured commercial group medical membership decreased 1,500 members, or 0.1% from December 31, 2013 as an increase in small group business membership was generally offset by lower membership in large group accounts. Approximately 65% of our fully-insured commercial group medical membership was in small group accounts at December 31, 2014 compared to 61% at December 31, 2013.

- Group ASO commercial medical membership decreased 58,500 members, or 5.0%, from December 31, 2013 to December 31, 2014 primarily due to continued pricing discipline in a highly competitive environment for self-funded accounts.

- Group specialty membership decreased 278,100 members, or 4.1%, from December 31, 2013 to December 31, 2014 primarily due to declines in dental and vision membership related to our planned discontinuance of certain unprofitable product distribution partnerships.

Premiums revenue

- Group segment premiums increased $219.0 million, or 3.5%, from 2013 to 2014 primarily due to higher fully-insured commercial group medical premiums per member that more than offset a slight decline in total membership for this segment.

Benefits expense

- The Group segment benefit ratio increased 180 basis points from 77.7% in 2013 to 79.5% in 2014 primarily due to higher utilization, mainly due to higher specialty prescription drug costs associated with a new treatment for Hepatitis C, as well as the continuing impact of transitional policy changes, partially offset by the inclusion of the health insurance industry fee and other fees mandated by the Health Care Reform Law in our pricing.

- The Group segment's benefits expense included the beneficial effect of $29 million in favorable prior-year medical claims reserve development versus $42 million in 2013. This favorable prior-year medical claims reserve development decreased the Group segment benefit ratio by approximately 40 basis points in 2014 versus approximately 70 basis points in 2013.

Operating costs

- The Group segment operating cost ratio of 26.5% was unchanged from 2013, reflecting the impact of the non-deductible health insurance industry fee and other fees mandated by the Health Care Reform Law as well as a higher percentage of small group commercial business which carries a higher operating cost ratio than large group business, offset by operating cost efficiencies.

Income before income taxes	$ 738	$ 520	$ 218	41.9 %
Operating cost ratio	95.6%	95.8%		(0.2)%

Pretax results

- Healthcare Services segment pretax income of $738 million for 2014 increased $218 million from 2013. The increase is primarily due to a decline in the operating cost ratio in 2014 on a revenue base that reflects growth from our pharmacy solutions and home based services businesses as they serve our growing Medicare membership.

Script Volume

- Humana Pharmacy Solutions® script volumes for the Retail and Group segment membership increased to approximately 329 million in 2014, up 20% versus scripts of approximately 274 million in 2013. The increase primarily reflects growth associated with higher average medical membership for 2014 than in 2013.

Services revenue

- Services revenue for 2014 were relatively unchanged from 2013, increasing $3 million, or 0.2%, to $1.4 billion for 2014.

Intersegment revenues

- Intersegment revenues increased $4.2 billion, or 28.3%, from 2013 to $18.8 billion for 2014 primarily due to growth in our Medicare membership which resulted in higher utilization of our pharmacy solutions and home based services businesses.

Operating costs

- The Healthcare Services segment operating cost ratio of 95.6% for 2014 decreased 20 basis points from 95.8% for 2013 primarily due to an improvement in the ratio for our pharmacy solutions business partially offset by our investment in home based services and other businesses across the segment.

Other Businesses

Our Other Businesses pretax income of $1 million for 2014 compared to a pretax loss of $289 million for 2013. The pretax loss in 2013 included net expense of $243 million for reserve strengthening for our closed-block of long-term care insurance policies further discussed in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. Year-over-year comparisons also reflect the loss of our Medicaid contracts in Puerto Rico effective September 30, 2013.

Liquidity

The Merger Agreement includes customary restrictions on the conduct of our business prior to the completion of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of specified limitations absent Aetna's prior written consent. Historically, our primary sources of cash have included receipts of premiums, services revenue, and investment and other income, as well as proceeds from the sale or maturity of our investment securities, borrowings, and proceeds from sales of businesses. Our primary uses of cash historically have included disbursements for claims payments, operating costs, interest on borrowings, taxes, purchases of investment securities, acquisitions, capital expenditures, repayments on borrowings, dividends, and share repurchases. Because premiums generally are collected in advance of claim payments by a period of up to several months, our business normally should produce positive cash flows during periods of increasing premiums and enrollment. Conversely, cash flows would be negatively impacted during periods of decreasing premiums and enrollment. From period to period, our cash flows may also be affected by the timing of working capital items including premiums receivable, benefits payable, and other receivables and payables. Our cash flows are impacted by the timing of payments to and receipts from CMS associated with Medicare Part D subsidies for which we do not assume risk. The use of operating cash flows may be limited by regulatory requirements of state departments of insurance (or comparable state regulators) which require, among other items, that our regulated subsidiaries maintain minimum levels of capital and seek approval before paying dividends from the subsidiaries to the parent. Our use of operating cash flows derived from our non-insurance subsidiaries, such as in our Healthcare Services segment, is generally not restricted by state departments of insurance (or comparable state regulators).

The effect of the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law impact the timing of our operating cash flows, as we build receivables for each coverage year that are expected to be collected in subsequent coverage years. On June 30, 2015 we received notification from CMS of risk adjustment and reinsurance settlement amounts for 2014. During 2015, we collected $392 million net for risk adjustment and reinsurance recoverable settlements associated with the 2014 coverage year. In addition, during 2015, we received our interim settlement associated with our risk corridor receivables for the 2014 coverage year. The interim settlement, representing only 12.6% of risk corridor receivables for the 2014 coverage year, was funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 risk corridor program. We collected $25 million net of payments for risk corridor associated with the 2014 coverage year during 2015. HHS provided guidance under the three year risk corridor program that future collections will first be applied to any shortfalls from previous coverage years before application to current year obligations. Risk corridor payables to issuers are obligations of the United States Government under the Health Care Reform law which requires the Secretary of HHS to make full payments to issuers. In the event of a shortfall at the end of the three year program, HHS has asserted it will explore other sources of funding for risk corridor payments, subject to the availability of appropriations. The

remaining net receivable balance associated with the 3Rs was approximately $982 million at December 31, 2015, including $219 million related to the 2014 coverage year, and $679 million at December 31, 2014. Any amounts receivable or payable associated with these risk limiting programs may have an impact on subsidiary liquidity, with any temporary shortfalls funded by the parent company.

For additional information on our liquidity risk, please refer to Item 1A. – Risk Factors in this 2015 Form 10-K.

Cash and cash equivalents increased to $2.6 billion at December 31, 2015 from $1.9 billion at December 31, 2014. The change in cash and cash equivalents for the years ended December 31, 2015, 2014 and 2013 is summarized as follows:

	2015	2014	2013
		(in millions)	
Net cash provided by operating activities	$ 868	$ 1,618	$ 1,716
Net cash provided by (used in) investing activities	320	(63)	(1,182)
Net cash used in financing activities	(552)	(758)	(702)
Increase (decrease) in cash and cash equivalents	$ 636	$ 797	$ (168)

Cash Flow from Operating Activities

The change in operating cash flows over the three year period primarily results from the corresponding change in earnings, enrollment activity, and the timing of working capital items as discussed below. The lower operating cash flows in 2015 primarily reflect the effect of significant growth in individual commercial medical and group Medicare Advantage membership in 2014 and changes in the timing of working capital items related to the growth in our pharmacy business. Operating cash flows for 2014 were favorably impacted and conversely operating cash flows for 2015 were negatively impacted from the typical pattern of claim payments that lagged premium receipts related to new membership in 2014. Individual commercial medical added 548,000 new members in 2014 compared to a decline of 90,400 members in 2015. Likewise, group Medicare Advantage added 60,600 new members in 2014 compared to a decline of 5,600 members in 2015. In addition, 2015 and 2014 operating cash flows were impacted by increased receivables associated with the 3Rs.

The most significant drivers of changes in our working capital are typically the timing of payments of benefits expense and receipts for premiums. We illustrate these changes with the following summaries of benefits payable and receivables.

The detail of benefits payable was as follows at December 31, 2015, 2014 and 2013:

	2015	2014	2013	Change 2015	Change 2014	Change 2013
			(in millions)			
IBNR (1)	$ 3,730	$ 3,254	$ 2,586	$ 476	$ 668	$ 34
Reported claims in process (2)	600	475	381	125	94	66
Premium deficiency reserve (3)	176	—	—	176	—	—
Other benefits payable (4)	470	746	926	(276)	(180)	14
Total benefits payable	$ 4,976	$ 4,475	$ 3,893	501	582	114
Payables from acquisition				—	—	(5)
Change in benefits payable per cash flow statement resulting in cash from operations				$ 501	$ 582	$ 109

(1) IBNR represents an estimate of benefits payable for claims incurred but not reported (IBNR) at the balance sheet date and includes unprocessed claim inventories. The level of IBNR is primarily impacted by membership levels, medical claim trends and the receipt cycle time, which represents the length of time between when a claim is initially incurred and when the claim form is received (i.e. a shorter time span results in a lower IBNR).

(2) Reported claims in process represents the estimated valuation of processed claims that are in the post claim adjudication process, which consists of administrative functions such as audit and check batching and handling, as well as amounts owed to our pharmacy benefit administrator which fluctuate due to bi-weekly payments and the month-end cutoff.

(3) Premium deficiency reserve recognized in 2015 for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year.

(4) Other benefits payable include amounts owed to providers under capitated and risk sharing arrangements.

The increases in benefits payable in 2015 and 2014 largely were due to an increase in IBNR. IBNR increased during 2015 primarily as a result of individual Medicare Advantage membership growth while during 2014 IBNR also increased as a result of individual Medicare Advantage membership growth as well as significant growth in individual commercial medical and group Medicare Advantage membership. As discussed previously, our cash flows are impacted by changes in enrollment. In 2014 (the first year plans compliant with the Health Care Reform Law were effective), membership in new fully-insured individual commercial medical plans compliant with the Health Care Reform Law grew as compared with a decline in membership in these plans in 2015. Similarly, growth in group Medicare Advantage membership in 2014 favorably impacted the 2014 cash flows while a decline in group Medicare Advantage membership in 2015 negatively impacted the 2015 cash flows.

In addition, the increase in benefits payable in 2015 reflects the recognition of a premium deficiency reserve associated with our individual commercial medical products compliant with the Health Care Reform Law for the 2016 coverage year. An increase in the amount of processed but unpaid claims due to our pharmacy benefit administrator, which fluctuates due to month-end cutoff, also contributed to the benefits payable increase in each of 2015 and 2014. These items were partially offset by a decrease in amounts owed to providers under capitated and risk sharing arrangements in both 2015 and 2014, including the disbursement of a portion of our Medicare risk adjustment collections under our contractual obligations associated with our risk sharing arrangements. The increase in benefits payable in 2013 primarily was due to an increase in the amount of processed but unpaid claims due to our pharmacy benefit administrator and an increase in IBNR, primarily as a result of Medicare Advantage membership growth.

The detail of total net receivables was as follows at December 31, 2015, 2014 and 2013:

	2015	2014	2013	Change 2015	Change 2014	Change 2013
			(in millions)			
Medicare	$ 765	$ 664	$ 576	$ 101	$ 88	$ 154
Commercial and other	420	381	219	39	162	59
Military services	77	106	87	(29)	19	28
Allowance for doubtful accounts	(101)	(98)	(71)	(3)	(27)	(24)
Total net receivables	$ 1,161	$ 1,053	$ 811	108	242	217
Reconciliation to cash flow statement:						
Provision for doubtful accounts				61	32	37
Change in receivables acquired, held-for-sale, or disposed from sale of business				11	(10)	(3)
Change in receivables per cash flow statement resulting in cash from operations				$ 180	$ 264	$ 251

As disclosed previously, on June 1, 2015, we completed the sale of our wholly owned subsidiary Concentra. Net receivables associated with Concentra were classified as held-for-sale at December 31, 2014 and December 31, 2013 and excluded from the table above for comparative purposes.

Medicare receivables are impacted by revenue growth associated with growth in individual and group Medicare membership and the timing of accruals and related collections associated with the CMS risk-adjustment model.

The increases in commercial and other receivables in each of 2015, 2014, and 2013 primarily are due to growth in the business. Excluding the effect of classifying Concentra receivables as held-for-sale at December 31, 2014, the increase in commercial and other receivables from 2013 to 2014 is primarily due to the commercial risk adjustment provision of the Health Care Reform Law which became effective in 2014.

Military services receivables at December 31, 2015, 2014, and 2013 primarily consist of administrative services only fees owed from the federal government for administrative services provided under our current TRICARE South Region contract.

Many provisions of the Health Care Reform Law became effective in 2014, including the commercial risk adjustment, risk corridor, and reinsurance provisions as well as the non-deductible health insurance industry fee. As discussed previously, the timing of payments and receipts associated with these provisions impact our operating cash flows as we build receivables for each coverage year that are expected to be collected in subsequent coverage years. The net receivable balance associated with the 3Rs was approximately $982 million at December 31, 2015 and $679 million at December 31, 2014, including certain amounts recorded in receivables as noted above. In 2015, we paid the federal government $867 million for the annual health insurance industry fee compared to our payment of $562 million in 2014.

In addition to the timing of payments of benefits expense, receipts for premiums and services revenues, and amounts due under the risk limiting and health insurance industry fee provisions of the Health Care Reform Law, other items impacting operating cash flows primarily resulted from the timing of working capital related to the growth in our pharmacy and payments for the Medicare Part D risk corridor provisions of our contracts with CMS.

Cash Flow from Investing Activities

On June 1, 2015, we completed the sale of Concentra for approximately $1,055 million in cash, excluding approximately $22 million of transaction costs.

Our ongoing capital expenditures primarily relate to our information technology initiatives, support of services in our provider services operations including medical and administrative facility improvements necessary for activities such as the provision of care to members, claims processing, billing and collections, wellness solutions, care coordination, regulatory compliance and customer service. Total capital expenditures, excluding acquisitions, were $523 million in 2015, $528 million in 2014, and $441 million in 2013.

In 2015, we purchased a $284 million note receivable directly from a third-party bank syndicate related to the financing of MCCI Holdings, LLC's business as described in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. The purchase of this note is included with purchases of investment securities in our consolidated statement of cash flows.

Proceeds from sales and maturities of investment securities exceeded purchases by $103 million in 2015 and $411 million in 2014. These net proceeds were used to fund normal working capital needs due to an increase in receivables associated with the 3Rs in addition to the timing of payments to and receipts from CMS associated with Medicare Part D reinsurance subsidies, as discussed below. We reinvested a portion of our operating cash flows in investment securities, primarily investment-grade fixed income securities, totaling $592 million in 2013.

Cash consideration paid for acquisitions, net of cash acquired, was $38 million in 2015, $18 million in 2014, and $187 million in 2013. Acquisitions in 2015 and 2014 included health and wellness related acquisitions. Cash paid for acquisitions in 2013 primarily related to the American Eldercare and other health and wellness related acquisitions.

Cash Flow from Financing Activities

Claims payments were $361 million higher than receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk during 2015, $945 million higher during 2014, and $155 million higher during 2013. Our 2014 financing cash flows were negatively impacted by the timing of payments to and receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk. We experienced higher specialty prescription drug costs associated with a new treatment for Hepatitis C than were contemplated in our bids which resulted in higher subsidy receivable balances in 2014 that were settled in 2015 under the terms of our contracts with CMS. Our net receivable for CMS subsidies and brand name prescription drug discounts was $2.0 billion at December 31, 2015 compared to $1.7 billion at December 31, 2014. Refer to Note 6 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Under our administrative services only TRICARE South Region contract, health care cost payments for which we do not assume risk exceeded reimbursements from the federal government by $4 million in 2015 and were less than reimbursements from the federal government by $5 million in 2013. Reimbursements from the federal government equaled health care cost payments for which we do not assume risk in 2014. Receipts from HHS associated with cost sharing provisions of the Health Care Reform Law for which we do not assume risk were higher than claims payments by $69 million in 2015 and $26 million in 2014. See Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for further description.

We repurchased 1.9 million shares for $329 million in 2015, 5.7 million shares for $730 million in 2014 (excludes another $100 million held back pending final settlement of an accelerated stock repurchase plan in March 2015), and 5.8 million shares for $502 million in 2013 under share repurchase plans authorized by the Board of Directors. We also acquired common shares in connection with employee stock plans for an aggregate cost of $56 million in 2015, $42 million in 2014, and $29 million in 2013.

As discussed further below, we paid dividends to stockholders of $172 million in each of 2015 and 2014 and $168 million in 2013.

We entered into a commercial paper program in October 2014. Net proceeds from the issuance of commercial paper were $298 million 2015 and the maximum principal amount outstanding at any one time during 2015 was $414 million. There were no net proceeds from the issuance of commercial paper in 2014 and the maximum principal amount outstanding at any one time during 2014 was $175 million.

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem our $500 million 6.45% senior unsecured notes.

The remainder of the cash used in or provided by financing activities in 2015, 2014, and 2013 primarily resulted from proceeds from stock option exercises and the change in book overdraft.

Future Sources and Uses of Liquidity

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2013, 2014, and 2015 under our Board approved quarterly cash dividend policy:

Payment Date	Amount per Share	Total Amount
		(in millions)
2013	$1.06	$ 167
2014	$1.10	$ 170
2015	$1.14	$ 170

The Merger discussed in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data does not impact our ability and intent to continue quarterly dividend payments prior to the closing of the Merger consistent with our historical dividend payments. Under the terms of the Merger Agreement, we have agreed with Aetna that our quarterly dividend will not exceed $0.29 per share prior to the closing of the Merger. Declaration and payment of future quarterly dividends is at the discretion of our Board and may be adjusted as business needs or market conditions change. In addition, under the terms of the Merger Agreement, we have agreed with Aetna to coordinate the declaration and payment of dividends so that our stockholders do not fail to receive a quarterly dividend around the time of the closing of the Merger.

On October 29, 2015, the Board declared a cash dividend of $0.29 per share that was paid on January 29, 2016 to stockholders of record on December 30, 2015, for an aggregate amount of $43 million.

Stock Repurchases

In September 2014, our Board of Directors replaced a previous share repurchase authorization of up to $1 billion (of which $816 million remained unused) with a new current authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2016. Under the share repurchase authorization, shares may be purchased from time to time at prevailing prices in the open market, by block purchases, through plans designed to comply with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended, or in privately-negotiated transactions (including pursuant to accelerated share repurchase agreements with investment banks), subject to certain regulatory restrictions on volume, pricing, and timing. Pursuant to the Merger Agreement, after July 2, 2015, we are prohibited from repurchasing any of our outstanding securities without the prior written consent of Aetna, other than repurchases of shares of our common stock in connection with the exercise of outstanding stock options or the vesting or settlement of outstanding restricted stock awards. Accordingly, as announced on July 3, 2015, we have suspended our share repurchase program. Our remaining repurchase authorization was $1.04 billion as of July 3, 2015.

Senior Notes

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem the 6.45% senior unsecured notes as discussed below. We previously issued $500 million of 6.45% senior notes due June 1, 2016 that were redeemed in October 2014, $500 million of 7.20% senior notes due June 15, 2018, $300 million of 6.30% senior notes due August 1, 2018, $600 million of 3.15% senior notes due December 1, 2022, $250 million of 8.15% senior notes due June 15, 2038, and $400 million of 4.625% senior notes due December 1, 2042.

In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date, for cash totaling approximately $560 million. We recognized a loss on extinguishment of debt of approximately $37 million in October 2014 in connection with the redemption of these notes.

Our senior notes, which are unsecured, may be redeemed at our option at any time at 100% of the principal amount plus accrued interest and a specified make-whole amount. The 7.20% and 8.15% senior notes are subject to an interest rate adjustment if the debt ratings assigned to the notes are downgraded (or subsequently upgraded). In addition, each series of our senior notes (other than the 6.30% senior notes) contain a change of control provision that may require us to purchase the notes under certain circumstances. On July 2, 2015 we entered into a Merger Agreement with Aetna that, when closed, may require redemption of the notes if the notes are downgraded below investment grade by both Standard & Poor's Rating Services, or S&P and Moody's Investors Services, Inc., or Moody's.

Credit Agreement

Our 5-year $1.0 billion unsecured revolving credit agreement expires July 2018. Under the credit agreement, at our option, we can borrow on either a competitive advance basis or a revolving credit basis. The revolving credit portion bears interest at either LIBOR plus a spread or the base rate plus a spread. The LIBOR spread, currently 110 basis points, varies depending on our credit ratings ranging from 90 to 150 basis points. We also pay an annual facility fee regardless of utilization. This facility fee, currently 15 basis points, may fluctuate between 10 and 25 basis points, depending upon our credit ratings. The competitive advance portion of any borrowings will bear interest at market rates prevailing at the time of borrowing on either a fixed rate or a floating rate based on LIBOR, at our option.

The terms of the credit agreement include standard provisions related to conditions of borrowing, including a customary material adverse effect clause which could limit our ability to borrow additional funds. In addition, the credit agreement contains customary restrictive and financial covenants as well as customary events of default, including financial covenants regarding the maintenance of a minimum level of net worth of $8.5 billion at December 31, 2015 and a maximum leverage ratio of 3.0:1. We are in compliance with the financial covenants, with actual net worth of $10.3 billion and an actual leverage ratio of 1.3:1, as measured in accordance with the credit agreement as of December 31, 2015. In addition, the credit agreement includes an uncommitted $250 million incremental loan facility.

At December 31, 2015, we had no borrowings outstanding under the credit agreement and we had outstanding letters of credit of $1 million secured under the credit agreement. No amounts have been drawn on these letters of credit. Accordingly, as of December 31, 2015, we had $999 million of remaining borrowing capacity under the credit agreement, none of which would be restricted by our financial covenant compliance requirement. We have other customary, arms-length relationships, including financial advisory and banking, with some parties to the credit agreement.

Commercial Paper

In October 2014, we entered into a commercial paper program pursuant to which we may issue short-term, unsecured commercial paper notes privately placed on a discount basis through certain broker dealers. Amounts available under the program may be borrowed, repaid and re-borrowed from time to time, with the aggregate face or principal amount outstanding under the program at any time not to exceed $1 billion. The net proceeds of issuances have been and are

expected to be used for general corporate purposes. The maximum principal amount outstanding at any one time during the year ended December 31, 2015 was $414 million. There was $299 million outstanding at December 31, 2015.

Liquidity Requirements

We believe our cash balances, investment securities, operating cash flows, and funds available under our credit agreement and our commercial paper program or from other public or private financing sources, taken together, provide adequate resources to fund ongoing operating and regulatory requirements, acquisitions, future expansion opportunities, and capital expenditures for at least the next twelve months, as well as to refinance or repay debt, and repurchase shares.

Adverse changes in our credit rating may increase the rate of interest we pay and may impact the amount of credit available to us in the future. Our investment-grade credit rating at December 31, 2015 was BBB+ according to Standard & Poor's Rating Services, or S&P, and Baa3 according to Moody's Investors Services, Inc., or Moody's. A downgrade by S&P to BB+ or by Moody's to Ba1 triggers an interest rate increase of 25 basis points with respect to $750 million of our senior notes. Successive one notch downgrades increase the interest rate an additional 25 basis points, or annual interest expense by $2 million, up to a maximum 100 basis points, or annual interest expense by $8 million.

In addition, we operate as a holding company in a highly regulated industry. Humana Inc., our parent company, is dependent upon dividends and administrative expense reimbursements from our subsidiaries, most of which are subject to regulatory restrictions. We continue to maintain significant levels of aggregate excess statutory capital and surplus in our state-regulated operating subsidiaries. Cash, cash equivalents, and short-term investments at the parent company increased to $1.6 billion at December 31, 2015 from $1.4 billion at December 31, 2014. This increase primarily reflects proceeds from the sale of Concentra on June 1, 2015, proceeds from issuance of commercial paper and subsidiary dividends to the parent company, partially offset by funding of subsidiary working capital requirements, common stock repurchases, capital expenditures, and payment of stockholder dividends. Our use of operating cash derived from our non-insurance subsidiaries, such as our Healthcare Services segment, is generally not restricted by Departments of Insurance. Our regulated subsidiaries paid dividends to the parent of $493 million in 2015, $927 million in 2014, and $967 million in 2013. Subsidiary dividends in 2015 reflect the impact of losses for our individual commercial medical business compliant with the Health Care Reform Law and the November 5, 2015 revised statutory accounting guidance requiring the exclusion of risk corridor receivables from related statutory surplus described below. Refer to our parent company financial statements and accompanying notes in Schedule I - Parent Company Financial Information. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2016 is approximately $900 million, in the aggregate. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

On November 5, 2015, the National Association of Insurance Commissioners, or NAIC, issued statutory accounting guidance for receivables associated with the risk corridor provisions under the Health Care Reform Law, which requires the receivables to be excluded from subsidiary surplus. This accounting guidance required additional capital contributions into certain subsidiaries during 2015. This statutory accounting guidance does not affect our financial statements prepared in accordance with generally accepted accounting principles, under which we have recorded a receivable for risk corridor amounts due to us as an obligation of the United States Government under the Health Care Reform Law. At December 31, 2015, our gross risk corridor receivable for the 2014 and 2015 coverage years in the aggregate was $459 million. We expect to record a risk corridor receivable of approximately $340 million in 2016 for the 2016 coverage year.

Certain regulated subsidiaries recognized premium deficiency reserves for our individual commercial medical policies compliant with the Health Care Reform Law for the 2016 coverage year in the fourth quarter of 2015. Further, the statutory-based premium deficiency excludes the estimated benefit associated with the risk corridor provisions as a reduction in subsidiary surplus in accordance with the previously discussed November 5, 2015 statutory accounting guidance requiring the exclusion of risk corridor amounts from subsidiary surplus. As a result of the statutory-based premium deficiency, we will fund capital contributions into certain regulated subsidiaries of $450 million during the first quarter of 2016.

In 2015, we paid the federal government $867 million for the annual health insurance industry fee and expect to pay a higher amount in 2016 given an increase in market share. The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee.

Regulatory Requirements

For a detailed discussion of our regulatory requirements, including aggregate statutory capital and surplus as well as dividends paid from the subsidiaries to the parent, please refer to Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Contractual Obligations

We are contractually obligated to make payments for years subsequent to December 31, 2015 as follows:

	Payments Due by Period				
	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
			(in millions)		
Debt	$ 4,099	$ 299	$ 800	$ 400	$ 2,600
Interest (1)	2,539	188	342	244	1,765
Operating leases (2)	697	173	286	148	90
Purchase obligations (3)	150	74	74	2	—
Future policy benefits payable and other long-term liabilities (4)	2,578	79	462	204	1,833
Total	$ 10,063	$ 813	$ 1,964	$ 998	$ 6,288

(1) Interest includes the estimated contractual interest payments under our debt agreements.

(2) We lease facilities, computer hardware, and other furniture and equipment under long-term operating leases that are noncancelable and expire on various dates through 2026. We sublease facilities or partial facilities to third party tenants for space not used in our operations which partially mitigates our operating lease commitments. An operating lease is a type of off-balance sheet arrangement. Assuming we acquired the asset, rather than leased such asset, we would have recognized a liability for the financing of these assets. See also Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

(3) Purchase obligations include agreements to purchase services, primarily information technology related services, or to make improvements to real estate, in each case that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum levels of service to be purchased; fixed, minimum or variable price provisions; and the appropriate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty.

(4) Includes future policy benefits payable ceded to third parties through 100% coinsurance agreements as more fully described in Note 19 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. We expect the assuming reinsurance carriers to fund these obligations and reflected these amounts as reinsurance recoverables included in other long-term assets on our consolidated balance sheet. Amounts payable in less than one year are included in trade accounts payable and accrued expenses in the consolidated balance sheet.

Off-Balance Sheet Arrangements

As of December 31, 2015, we were not involved in any special purpose entity, or SPE, transactions. For a detailed discussion off-balance sheet arrangements, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Guarantees and Indemnifications

For a detailed discussion our guarantees and indemnifications, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Government Contracts

For a detailed discussion of our government contracts, including our Medicare, Military, and Medicaid contracts, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements and accompanying notes, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements and accompanying notes requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We continuously evaluate our estimates and those critical accounting policies primarily related to benefits expense and revenue recognition as well as accounting for impairments related to our investment securities, goodwill, and long-lived assets. These estimates are based on knowledge of current events and anticipated future events and, accordingly, actual results ultimately may differ from those estimates. We believe the following critical accounting policies involve the most significant judgments and estimates used in the preparation of our consolidated financial statements.

Benefits Expense Recognition

Benefits expense is recognized in the period in which services are provided and includes an estimate of the cost of services which have been incurred but not yet reported, or IBNR. IBNR represents a substantial portion of our benefits payable as follows:

	December 31, 2015	Percentage of Total	December 31, 2014	Percentage of Total
	(dollars in millions)			
IBNR	$ 3,730	75.0%	$ 3,254	72.7%
Reported claims in process	600	12.1%	475	10.6%
Premium deficiency reserve	176	3.5%	—	—%
Other benefits payable	470	9.4%	746	16.7%
Total benefits payable	$ 4,976	100.0%	$ 4,475	100.0%

Our reserving practice is to consistently recognize the actuarial best point estimate within a level of confidence required by actuarial standards. Actuarial standards of practice generally require a level of confidence such that the liabilities established for IBNR have a greater probability of being adequate versus being insufficient, or such that the liabilities established for IBNR are sufficient to cover obligations under an assumption of moderately adverse conditions. Adverse conditions are situations in which the actual claims are expected to be higher than the otherwise estimated value of such claims at the time of the estimate. Therefore, in many situations, the claim amounts ultimately settled will be less than the estimate that satisfies the actuarial standards of practice.

We develop our estimate for IBNR using actuarial methodologies and assumptions, primarily based upon historical claim experience. Depending on the period for which incurred claims are estimated, we apply a different method in determining our estimate. For periods prior to the most recent two months, the key assumption used in estimating our IBNR is that the completion factor pattern remains consistent over a rolling 12-month period after adjusting for known changes in claim inventory levels and known changes in claim payment processes. Completion factors result from the calculation of the percentage of claims incurred during a given period that have historically been adjudicated as of the reporting period. For the most recent two months, the incurred claims are estimated primarily from a trend analysis

based upon per member per month claims trends developed from our historical experience in the preceding months, adjusted for known changes in estimates of recent hospital and drug utilization data, provider contracting changes, changes in benefit levels, changes in member cost sharing, changes in medical management processes, product mix, and weekday seasonality.

The completion factor method is used for the months of incurred claims prior to the most recent two months because the historical percentage of claims processed for those months is at a level sufficient to produce a consistently reliable result. Conversely, for the most recent two months of incurred claims, the volume of claims processed historically is not at a level sufficient to produce a reliable result, which therefore requires us to examine historical trend patterns as the primary method of evaluation. Changes in claim processes, including recoveries of overpayments, receipt cycle times, claim inventory levels, outsourcing, system conversions, and processing disruptions due to weather or other events affect views regarding the reasonable choice of completion factors. Claim payments to providers for services rendered are often net of overpayment recoveries for claims paid previously, as contractually allowed. Claim overpayment recoveries can result from many different factors, including retroactive enrollment activity, audits of provider billings, and/or payment errors. Changes in patterns of claim overpayment recoveries can be unpredictable and result in completion factor volatility, as they often impact older dates of service. The receipt cycle time measures the average length of time between when a medical claim was initially incurred and when the claim form was received. Increases in electronic claim submissions from providers decrease the receipt cycle time. If claims are submitted or processed on a faster (slower) pace than prior periods, the actual claim may be more (less) complete than originally estimated using our completion factors, which may result in reserves that are higher (lower) than required.

Medical cost trends potentially are more volatile than other segments of the economy. The drivers of medical cost trends include increases in the utilization of hospital facilities, physician services, new higher priced technologies and medical procedures, and new prescription drugs and therapies, as well as the inflationary effect on the cost per unit of each of these expense components. Other external factors such as government-mandated benefits or other regulatory changes, the tort liability system, increases in medical services capacity, direct to consumer advertising for prescription drugs and medical services, an aging population, lifestyle changes including diet and smoking, catastrophes, and epidemics also may impact medical cost trends. Internal factors such as system conversions, claims processing cycle times, changes in medical management practices and changes in provider contracts also may impact our ability to accurately predict estimates of historical completion factors or medical cost trends. All of these factors are considered in estimating IBNR and in estimating the per member per month claims trend for purposes of determining the reserve for the most recent two months. Additionally, we continually prepare and review follow-up studies to assess the reasonableness of the estimates generated by our process and methods over time. The results of these studies are also considered in determining the reserve for the most recent two months. Each of these factors requires significant judgment by management.

The completion and claims per member per month trend factors are the most significant factors impacting the IBNR estimate. The portion of IBNR estimated using completion factors for claims incurred prior to the most recent two months is generally less variable than the portion of IBNR estimated using trend factors. The following table illustrates the sensitivity of these factors assuming moderate adverse experience and the estimated potential impact on our operating results caused by reasonably likely changes in these factors based on December 31, 2015 data:

Completion Factor (a):		Claims Trend Factor (b):	
Factor Change (c)	Decrease in Benefits Payable	Factor Change (c)	Decrease in Benefits Payable
	(dollars in millions)		
0.60%	$(181)	(2.75)%	$(298)
0.50%	$(151)	(2.50)%	$(271)
0.40%	$(120)	(2.25)%	$(244)
0.30%	$(90)	(2.00)%	$(217)
0.20%	$(60)	(1.75)%	$(190)
0.10%	$(30)	(1.50)%	$(162)
—%	$—	(1.25)%	$(135)

(a) Reflects estimated potential changes in benefits payable at December 31, 2015 caused by changes in completion factors for incurred months prior to the most recent two months.

(b) Reflects estimated potential changes in benefits payable at December 31, 2015 caused by changes in annualized claims trend used for the estimation of per member per month incurred claims for the most recent two months.

(c) The factor change indicated represents the percentage point change.

The following table provides a historical perspective regarding the accrual and payment of our benefits payable, excluding military services. Components of the total incurred claims for each year include amounts accrued for current year estimated benefits expense as well as adjustments to prior year estimated accruals.

	2015	2014	2013
		(in millions)	
Balances at January 1	$ 4,475	$ 3,893	$ 3,775
Less: Reinsurance recoverables	(78)	—	—
Balances at January 1, net	4,397	3,893	3,775
Acquisitions	—	—	5
Incurred related to:			
Current year	44,397	38,641	32,711
Prior years	(236)	(518)	(474)
Total incurred	44,161	38,123	32,237
Paid related to:			
Current year	(39,802)	(34,357)	(29,103)
Prior years	(4,041)	(3,262)	(3,021)
Total paid	(43,843)	(37,619)	(32,124)
Premium deficiency reserve	176	—	—
Reinsurance recoverable	85	78	—
Balances at December 31	$ 4,976	$ 4,475	$ 3,893

The following table summarizes the changes in estimate for incurred claims related to prior years attributable to our key assumptions. As previously described, our key assumptions consist of trend and completion factors estimated using an assumption of moderately adverse conditions. The amounts below represent the difference between our original estimates and the actual benefits expense ultimately incurred as determined from subsequent claim payments.

	Favorable Development by Changes in Key Assumptions					
	2015		2014		2013	
	Amount	Factor Change (a)	Amount	Factor Change (a)	Amount	Factor Change (a)
	(dollars in millions)					
Trend factors	$ (145)	(1.5)%	$ (266)	(3.7)%	$ (233)	(3.4)%
Completion factors	(91)	0.4 %	(252)	1.2 %	(241)	1.2 %
Total	$ (236)		$ (518)		$ (474)	

(a) The factor change indicated represents the percentage point change.

As previously discussed, our reserving practice is to consistently recognize the actuarial best estimate of our ultimate liability for claims. Actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $236 million in 2015, $518 million in 2014, and $474 million in 2013. The table below details our favorable medical claims reserve development related to prior fiscal years by segment for 2015, 2014, and 2013.

	Favorable Medical Claims Reserve Development			Change	
	2015	2014	2013	2015	2014
	(in millions)				
Retail Segment	$ (228)	$ (488)	$ (428)	$ 260	$ (60)
Group Segment	(7)	(29)	(42)	22	13
Other Businesses	(1)	(1)	(4)	—	3
Total	$ (236)	$ (518)	$ (474)	$ 282	$ (44)

The favorable medical claims reserve development for 2015, 2014, and 2013 primarily reflects the consistent application of trend and completion factors estimated using an assumption of moderately adverse conditions. The decline in favorable prior period development in 2015 primarily was due to the impact of lower financial claim recoveries due in part to our gradual implementation during 2014 of inpatient authorization review prior to admission as opposed to post adjudication, as well as higher than expected flu associated claims from the fourth quarter of 2014 and continued volatility in claims associated with individual commercial medical products. The higher favorable prior period development during 2014 and 2013 resulted from increased membership, better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

We continually adjust our historical trend and completion factor experience with our knowledge of recent events that may impact current trends and completion factors when establishing our reserves. Because our reserving practice is to consistently recognize the actuarial best point estimate using an assumption of moderately adverse conditions as required by actuarial standards, there is a reasonable possibility that variances between actual trend and completion factors and those assumed in our December 31, 2015 estimates would fall towards the middle of the ranges previously presented in our sensitivity table.

Benefits expense excluded from the previous table was as follows for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013
		(in millions)	
Premium deficiency reserve for short-duration policies	$ 176	$ —	$ —
Military services	12	11	(27)
Future policy benefits	(80)	32	354
Total	$ 108	$ 43	$ 327

In the fourth quarter of 2015, we recognized a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year as discussed in more detail in Note 7 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Military services benefits expense for 2015 and 2014 reflect expenses associated with our contracts with the Veterans Administration. Military services benefits expense for 2013 reflects the beneficial effect of a favorable settlement of contract claims with the DoD partially offset by expenses associated with our contracts with the Veterans Administration.

Certain health policies sold to individuals prior to 2014 (the first year plans compliant with the Health Care Reform Law were effective) are accounted for as long-duration as more fully described below. The reduction in future policy benefits in 2015 reflects the release of reserves as individual commercial medical members transition to plans compliant with the Health Care Reform Law.

Future policy benefits payable of $2.2 billion and $2.3 billion at December 31, 2015 and 2014, respectively, represent liabilities for long-duration insurance policies including long-term care insurance, life insurance, annuities, and certain health and other supplemental policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on premium rate increase, interest rate, mortality, morbidity, persistency (the percentage of policies remaining in-force), and maintenance expense assumptions. Interest rates are based on our expected net investment returns on the investment portfolio supporting the reserves for these blocks of business. Mortality, a measure of expected death, and morbidity, a measure of health status, assumptions are based on published actuarial tables, modified based upon actual experience. The assumptions used to determine the liability for future policy benefits are established and locked in at the time each contract is issued and only change if our expected future experience deteriorates to the point that the level of the liability, together with the present value of future gross premiums, are not adequate to provide for future expected policy benefits and maintenance costs (i.e. the loss recognition date). Because these policies have long-term claim payout periods, there is a greater risk of significant variability in claims costs, either positive or negative. We perform loss recognition tests at least annually in the fourth quarter, and more frequently if adverse events or changes in circumstances indicate that the level of the liability, together with the present value of future gross premiums, may not be adequate to provide for future expected policy benefits and maintenance costs.

Future policy benefits payable include $1.5 billion at December 31, 2015 and 2014 associated with a non-strategic closed block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG. Approximately 31,800 policies remain in force as of December 31, 2015. No new policies have been written since 2005 under this closed block. Future policy benefits payable includes amounts charged to accumulated other comprehensive income for an additional liability that would exist on our closed-block of long-term care insurance policies if unrealized gains on the sale of the investments backing such products had been realized and the proceeds reinvested at then current yields. There was no additional liability at December 31, 2015 and $123 million of additional liability at December 31, 2014. Amounts charged to accumulated other comprehensive income are net of applicable deferred taxes.

Long-term care insurance policies provide nursing home and home health coverage for which premiums are collected many years in advance of benefits paid, if any. Therefore, our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. A prolonged period during which interest rates remain at levels lower than those anticipated in our reserving would result in shortfalls in investment income on assets supporting our obligation under long term care policies because the long duration of the policy obligations exceeds the duration of the supporting investment assets. Further, we monitor the loss experience of these long-term care insurance policies and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. To the extent premium rate increases, interest rates, and/or loss experience vary from our loss recognition date assumptions, future material adjustments to reserves could be required.

During 2013, we recorded a loss for a premium deficiency. The premium deficiency was based on current and anticipated experience that had deteriorated from our locked-in assumptions from the previous December 31, 2010 loss recognition date, particularly as they related to emerging experience due to an increase in life expectancies and utilization of home health care services. Based on this deterioration, and combined with lower interest rates, we determined that our existing future policy benefits payable, together with the present value of future gross premiums, associated with our closed block of long-term care insurance policies were not adequate to provide for future policy benefits and maintenance costs under these policies; therefore we unlocked and modified our assumptions based on current expectations. Accordingly, during 2013 we recorded $243 million of additional benefits expense, with a corresponding increase in future policy benefits payable of $350 million partially offset by a related reinsurance recoverable of $107 million included in other long-term assets.

For our closed block of long-term care policies, actuarial assumptions used to estimate reserves are inherently uncertain due to the potential changes in trends in mortality, morbidity, persistency and interest rates as well as premium rate increases. As a result, our long term care reserves may be subject to material increases if these trends develop adversely to our expectations. The estimated increase in reserves and additional benefit expense from hypothetically modeling adverse variations in our actuarial assumptions, in the aggregate, could be up to $400 million, net of reinsurance. Although such hypothetical revisions are not currently appropriate, we believe they could occur based on past variances in experience and our expectation of the ranges of future experience that could reasonably occur, and any such revision could be material. Generally accepted accounting principles do not allow us to unlock our assumptions for favorable items.

In addition, future policy benefits payable includes amounts of $205 million at December 31, 2015, $210 million at December 31, 2014, and $215 million at December 31, 2013 which are subject to 100% coinsurance agreements as more fully described in Note 19 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data, and as such are offset by a related reinsurance recoverable included in other long-term assets.

Revenue Recognition

We generally establish one-year commercial membership contracts with employer groups, subject to cancellation by the employer group on 30-day written notice. Our Medicare contracts with CMS renew annually. Our military services contracts with the federal government and our contracts with various state Medicaid programs generally are multi-year contracts subject to annual renewal provisions.

Our commercial contracts establish rates on a per employee basis for each month of coverage based on the type of coverage purchased (single to family coverage options). Our Medicare and Medicaid contracts also establish monthly rates per member. However, our Medicare contracts also have additional provisions as outlined in the following separate section.

Premiums revenue and administrative services only, or ASO, fees are estimated by multiplying the membership covered under the various contracts by the contractual rates. In addition, we adjust revenues for estimated changes in an employer's enrollment and individuals that ultimately may fail to pay, and for estimated rebates under the minimum benefit ratios required under the Health Care Reform Law. Enrollment changes not yet processed or not yet reported by an employer group or the government, also known as retroactive membership adjustments, are estimated based on

available data and historical trends. We routinely monitor the collectibility of specific accounts, the aging of receivables, historical retroactivity trends, estimated rebates, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in the current period's revenue.

We bill and collect premium from employer groups and members in our Medicare and other individual products monthly. We receive monthly premiums from the federal government and various states according to government specified payment rates and various contractual terms. Changes in revenues from for our Medicare and individual commercial medical products resulting from the periodic changes in risk-adjustment scores derived from medical diagnoses for our membership are recognized when the amounts become determinable and the collectibility is reasonably assured.

Medicare Risk-Adjustment Provisions

CMS utilizes a risk-adjustment model which apportions premiums paid to Medicare Advantage plans according to health severity. The risk-adjustment model pays more for enrollees with predictably higher costs. Under the risk-adjustment methodology, all Medicare Advantage plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses this diagnosis data to calculate the risk-adjusted premium payment to Medicare Advantage plans. Rates paid to Medicare Advantage plans are established under an actuarial bid model, including a process that bases our payments on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's Medicare FFS program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on providers to appropriately document all medical data, including the diagnosis data submitted with claims. We estimate risk-adjustment revenues based on medical diagnoses for our membership. The risk-adjustment model is more fully described in Item 1. – Business under the section titled "Individual Medicare."

Investment Securities

Investment securities totaled $9.1 billion, or 37% of total assets at December 31, 2015, and $9.5 billion, or 41% of total assets at December 31, 2014. Debt securities, detailed below, comprised this entire investment portfolio at December 31, 2015 and 2014. The fair value of debt securities were as follows at December 31, 2015 and 2014:

	December 31, 2015	Percentage of Total	December 31, 2014	Percentage of Total
	(dollars in millions)			
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 332	3.6%	$ 374	3.9%
Mortgage-backed securities	1,891	20.8%	1,498	15.7%
Tax-exempt municipal securities	2,668	29.3%	3,068	32.1%
Mortgage-backed securities:				
Residential	13	0.1%	17	0.2%
Commercial	985	10.8%	843	8.8%
Asset-backed securities	263	2.9%	29	0.3%
Corporate debt securities	2,958	32.5%	3,718	39.0%
Total debt securities	$ 9,110	100.0%	$ 9,547	100.0%

Approximately 98% of our debt securities were investment-grade quality, with a weighted average credit rating of AA by S&P at December 31, 2015. Most of the debt securities that were below investment-grade were rated BB, the

higher end of the below investment-grade rating scale. Our investment policy limits investments in a single issuer and requires diversification among various asset types.

Tax-exempt municipal securities included pre-refunded bonds of $178 million at December 31, 2015 and $199 million at December 31, 2014. These pre-refunded bonds were secured by an escrow fund consisting of U.S. government obligations sufficient to pay off all amounts outstanding at maturity. The ratings of these pre-refunded bonds generally assume the rating of the government obligations at the time the fund is established. Tax-exempt municipal securities that were not pre-refunded were diversified among general obligation bonds of U.S. states and local municipalities as well as special revenue bonds. General obligation bonds, which are backed by the taxing power and full faith of the issuer, accounted for $1.0 billion of these municipals in the portfolio. Special revenue bonds, issued by a municipality to finance a specific public works project such as utilities, water and sewer, transportation, or education, and supported by the revenues of that project, accounted for $1.4 billion of these municipals. Our general obligation bonds are diversified across the U.S. with no individual state exceeding 11%. In addition, certain monoline insurers guarantee the timely repayment of bond principal and interest when a bond issuer defaults and generally provide credit enhancement for bond issues related to our tax-exempt municipal securities. We have no direct exposure to these monoline insurers. We owned $173 million and $484 million at December 31, 2015 and 2014, respectively, of tax-exempt securities guaranteed by monoline insurers. The equivalent weighted average S&P credit rating of these tax-exempt securities without the guarantee from the monoline insurer was AA.

Our direct exposure to subprime mortgage lending is limited to investment in residential mortgage-backed securities and asset-backed securities backed by home equity loans. The fair value of securities backed by Alt-A and subprime loans was $1 million at December 31, 2015 and 2014. There are no collateralized debt obligations or structured investment vehicles in our investment portfolio. The percentage of corporate securities associated with the financial services industry was 25% at December 31, 2015 and 21% at December 31, 2014.

Gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows at December 31, 2015:

	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in millions)					
December 31, 2015						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 195	$ (1)	$ 14	$ —	$ 209	$ (1)
Mortgage-backed securities	1,484	(20)	86	(3)	1,570	(23)
Tax-exempt municipal securities	843	(3)	52	(1)	895	(4)
Mortgage-backed securities:						
Residential	2	—	4	—	6	—
Commercial	626	(13)	265	(28)	891	(41)
Asset-backed securities	258	(2)	—	—	258	(2)
Corporate debt securities	918	(45)	63	(10)	981	(55)
Total debt securities	$ 4,326	$ (84)	$ 484	$ (42)	$ 4,810	$ (126)

Under the other-than-temporary impairment model for debt securities held, we recognize an impairment loss in income in an amount equal to the full difference between the amortized cost basis and the fair value when we have the intent to sell the debt security or it is more likely than not we will be required to sell the debt security before recovery of our amortized cost basis. However, if we do not intend to sell the debt security, we evaluate the expected cash flows

to be received as compared to amortized cost and determine if a credit loss has occurred. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized currently in income with the remainder of the loss recognized in other comprehensive income.

When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairment is considered using a variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. For example, with respect to mortgage and asset-backed securities, such data includes underlying loan level data and structural features such as seniority and other forms of credit enhancements. A decline in fair value is considered other-than-temporary when we do not expect to recover the entire amortized cost basis of the security. We estimate the amount of the credit loss component of a debt security as the difference between the amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate of future cash flows discounted at the implicit interest rate at the date of purchase. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations, facts and circumstances factored into our assessment may change with the passage of time, or we may decide to subsequently sell the investment. The determination of whether a decline in the value of an investment is other than temporary requires us to exercise significant diligence and judgment. The discovery of new information and the passage of time can significantly change these judgments. The status of the general economic environment and significant changes in the national securities markets influence the determination of fair value and the assessment of investment impairment. There is a continuing risk that declines in fair value may occur and additional material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

The recoverability of our non-agency residential and commercial mortgage-backed securities is supported by factors such as seniority, underlying collateral characteristics and credit enhancements. These residential and commercial mortgage-backed securities at December 31, 2015 primarily were composed of senior tranches having high credit support, with over 99% of the collateral consisting of prime loans. The weighted average credit rating of all commercial mortgage-backed securities was AA+ at December 31, 2015.

All issuers of securities we own that were trading at an unrealized loss at December 31, 2015 remain current on all contractual payments. After taking into account these and other factors previously described, we believe these unrealized losses primarily were caused by an increase in market interest rates in the current markets than when the securities were purchased. At December 31, 2015, we did not intend to sell the securities with an unrealized loss position in accumulated other comprehensive income, and it is not likely that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss were not other-than-temporarily impaired at December 31, 2015. There were no material other-than-temporary impairments in 2015, 2014, or 2013.

Goodwill and Long-lived Assets

At December 31, 2015, goodwill and other long-lived assets represented 20% of total assets and 48% of total stockholders' equity, compared to 24% and 59%, respectively, at December 31, 2014.

We are required to test at least annually for impairment at a level of reporting referred to as the reporting unit, and more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. A reporting unit either is our operating segments or one level below the operating segments, referred to as a component, which comprise our reportable segments. A component is considered a reporting unit if the component constitutes a business for which discrete financial information is available that is regularly reviewed by management. We are required to aggregate the components of an operating segment into one reporting unit if they have similar economic characteristics. Goodwill is assigned to the reporting unit that is expected to benefit from a specific acquisition. The carrying amount of goodwill for our reportable segments has been retrospectively adjusted to conform to the 2015 segment change discussed in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

We use a two-step process to review goodwill for impairment. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any. Our strategy, long-range business plan, and annual planning process support our goodwill impairment tests. These tests are performed, at a minimum, annually in the fourth quarter, and are based on an evaluation of future discounted cash flows. We rely on this discounted cash flow analysis to determine fair value. However outcomes from the discounted cash flow analysis are compared to other market approach valuation methodologies for reasonableness. We use discount rates that correspond to a market-based weighted-average cost of capital and terminal growth rates that correspond to long-term growth prospects, consistent with the long-term inflation rate. Key assumptions in our cash flow projections, including changes in membership, premium yields, medical and operating cost trends, and certain government contract extensions, are consistent with those utilized in our long-range business plan and annual planning process. If these assumptions differ from actual, including the impact of the Health Care Reform Law, the estimates underlying our goodwill impairment tests could be adversely affected. Goodwill impairment tests completed in each of the last three years did not result in an impairment loss. The fair value of our reporting units with significant goodwill exceeded carrying amounts by a substantial margin. A 100 basis point increase in the discount rate would not have a significant impact on the amount of margin for any of our reporting units with significant goodwill, with the exception of our provider services reporting unit in our Healthcare Services segment. The provider services reporting unit would decline to approximately 10% margin after factoring in a 100 basis point increase in the discount rate.

Long-lived assets consist of property and equipment and other finite-lived intangible assets. These assets are depreciated or amortized over their estimated useful life, and are subject to impairment reviews. We periodically review long-lived assets whenever adverse events or changes in circumstances indicate the carrying value of the asset may not be recoverable. In assessing recoverability, we must make assumptions regarding estimated future cash flows and other factors to determine if an impairment loss may exist, and, if so, estimate fair value. We also must estimate and make assumptions regarding the useful life we assign to our long-lived assets. If these estimates or their related assumptions change in the future, we may be required to record impairment losses or change the useful life, including accelerating depreciation or amortization for these assets. There were no material impairment losses in the last three years.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our earnings and financial position are exposed to financial market risk, including those resulting from changes in interest rates.

The level of our pretax earnings is subject to market risk due to changes in interest rates and the resulting impact on investment income and interest expense. Prior to 2009, under interest rate swap agreements, we exchanged the fixed interest rate under all of our senior notes for a variable interest rate based on LIBOR using interest rate swap agreements. We terminated all of our interest rate swap agreements in 2008. We may re-enter into interest rate swap agreements in the future depending on market conditions and other factors. Amounts borrowed under the revolving credit portion of our $1.0 billion unsecured revolving credit agreement bear interest at either LIBOR plus a spread or the base rate plus a spread. There were no borrowings outstanding under our credit agreement at December 31, 2015 or December 31, 2014.

Interest rate risk also represents a market risk factor affecting our consolidated financial position due to our significant investment portfolio, consisting primarily of fixed maturity securities of investment-grade quality with a weighted average S&P credit rating of AA at December 31, 2015. Our net unrealized position decreased $383 million from a net unrealized gain position of $475 million at December 31, 2014 to a net unrealized gain position of $92 million at December 31, 2015. At December 31, 2015, we had gross unrealized losses of $126 million on our investment portfolio primarily due to an increase in market interest rates since the time the securities were purchased. There were no material other-than-temporary impairments during 2015. While we believe that these impairments are temporary and we currently do not have the intent to sell such securities, given the current market conditions and the significant judgments involved, there is a continuing risk that future declines in fair value may occur and material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

Duration is the time-weighted average of the present value of the bond portfolio's cash flow. Duration is indicative of the relationship between changes in fair value and changes in interest rates, providing a general indication of the

sensitivity of the fair values of our fixed maturity securities to changes in interest rates. However, actual fair values may differ significantly from estimates based on duration. The average duration of our investment portfolio, including cash and cash equivalents, was approximately 4.1 years as of December 31, 2015 and 4.1 years as of December 31, 2014. Based on the duration including cash equivalents, a 1% increase in interest rates would generally decrease the fair value of our securities by approximately $459 million.

We have also evaluated the impact on our investment income and interest expense resulting from a hypothetical change in interest rates of 100, 200, and 300 basis points over the next twelve-month period, as reflected in the following table. The evaluation was based on our investment portfolio and our outstanding indebtedness at December 31, 2015 and 2014. Our investment portfolio consists of cash, cash equivalents, and investment securities. The modeling technique used to calculate the pro forma net change in pretax earnings considered the cash flows related to fixed income investments and debt, which are subject to interest rate changes during a prospective twelve-month period. This evaluation measures parallel shifts in interest rates and may not account for certain unpredictable events that may affect interest income, including unexpected changes of cash flows into and out of the portfolio, changes in the asset allocation, including shifts between taxable and tax-exempt securities, and spread changes specific to various investment categories. In the past ten years, changes in 3 month LIBOR rates during the year have exceeded 300 basis points once, have not changed between 200 and 300 basis points, have changed between 100 and 200 basis points two times, and have changed by less than 100 basis points seven times.

	Increase (decrease) in pretax earnings given an interest rate decrease of X basis points			Increase (decrease) in pretax earnings given an interest rate increase of X basis points		
	(300)	(200)	(100)	100	200	300
	(in millions)					
As of December 31, 2015						
Investment income (a)	$ (33)	$ (27)	$ (21)	$ 41	$ 82	$ 124
Interest expense (b)	3	3	3	(3)	(6)	(9)
Pretax	$ (30)	$ (24)	$ (18)	$ 38	$ 76	$ 115
As of December 31, 2014						
Investment income (a)	$ (20)	$ (15)	$ (9)	$ 42	$ 85	$ 128
Interest expense (b)	—	—	—	—	—	—
Pretax	$ (20)	$ (15)	$ (9)	$ 42	$ 85	$ 128

(a) As of December 31, 2015 and 2014, some of our investments had interest rates below 3% so the assumed hypothetical change in pretax earnings does not reflect the full 3% point reduction.

(b) The interest rate under our senior notes is fixed. There were no borrowings outstanding under the credit agreement at December 31, 2015 or December 31, 2014. There was $299 million outstanding under our commercial paper program at December 31, 2015. As of December 31, 2015, our interest rate under our commercial paper program was less than 1% so the assumed hypothetical change in pretax earnings does not reflect the full 1% point reduction. There were no borrowings outstanding under our commercial paper program at December 31, 2014.

1. REPORTING ENTITY

Nature of Operations

Humana Inc., headquartered in Louisville, Kentucky, is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country. References throughout these notes to consolidated financial statements to "we," "us," "our," "Company," and "Humana," mean Humana Inc. and its subsidiaries. We derived approximately 73% of our total premiums and services revenue from contracts with the federal government in 2015, including 14% related to our federal government contracts with the Centers for Medicare and Medicaid Services, or CMS, to provide health insurance coverage for individual Medicare Advantage members in Florida. CMS is the federal government's agency responsible for administering the Medicare program.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Our financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America. Our consolidated financial statements include the accounts of Humana Inc. and subsidiaries that the Company controls, including variable interest entities associated with medical practices for which we are the primary beneficiary. We do not own many of our medical practices but instead enter into exclusive management agreements with the affiliated Professional Associations, or P.A.s, that operate these medical practices. Based upon the provisions of these agreements, these affiliated P.A.s are variable interest entities and we are the primary beneficiary, and accordingly we consolidated the affiliated P.A.s. All significant intercompany balances and transactions have been eliminated.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The areas involving the most significant use of estimates are the estimation of benefits payable, future policy benefits payable, the impact of risk adjustment provisions related to our Medicare contracts, the valuation and related impairment recognition of investment securities, and the valuation and related impairment recognition of long-lived assets, including goodwill. These estimates are based on knowledge of current events and anticipated future events, and accordingly, actual results may ultimately differ materially from those estimates.

Certain amounts have been reclassified to conform to the current year presentation, including business segment reclassifications discussed below and the reclassification of Concentra Inc. assets and liabilities as held-for-sale in our December 31, 2014 balance sheet for comparative purposes. Refer to Note 3 for a discussion of the sale of Concentra in June 2015.

Aetna Merger

On July 2, 2015, we entered into an Agreement and Plan of Merger, which we refer to in this report as the Merger Agreement, with Aetna Inc. and certain wholly owned subsidiaries of Aetna Inc., which we refer to collectively as Aetna, which sets forth the terms and conditions under which we will merge with, and become a wholly owned subsidiary of Aetna, a transaction we refer to in this report as the Merger. Under the terms of the Merger Agreement, at the closing of the Merger, each outstanding share of our common stock will be converted into the right to receive (i) 0.8375 of a share of Aetna common stock and (ii) $125 in cash. The total transaction was estimated at approximately $37 billion including the assumption of Humana debt, based on the closing price of Aetna common shares on July 2, 2015. The Merger Agreement includes customary restrictions on the conduct of our business prior to the completion of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of customary specified limitations absent Aetna's prior written consent, including, for example, limitations on dividends (we agreed that our

quarterly dividend will not exceed $0.29 per share) and repurchases of our securities (we agreed to suspend our share repurchase program), restrictions on our ability to enter into material contracts, and negotiated thresholds for capital expenditures, capital contributions, acquisitions and divestitures of businesses.

On October 19, 2015, our stockholders approved the adoption of the Merger Agreement at a special stockholder meeting. Also on October 19, 2015, the holders of Aetna outstanding shares approved the issuance of Aetna common stock in the Merger at a special meeting of Aetna shareholders.

The Merger is subject to customary closing conditions, including, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, (ii) the absence of legal restraints and prohibitions on the consummation of the Merger, (iii) listing of the Aetna common stock to be issued in the Merger on the New York Stock Exchange, (iv) subject to the relevant standards set forth in the Merger Agreement, the accuracy of the representations and warranties made by each party, (v) material compliance by each party with its covenants in the Merger Agreement, and (vi) no "Company Material Adverse Effect" with respect to us and no "Parent Material Adverse Effect" with respect to Aetna, in each case since the execution of and as defined in the Merger Agreement. In addition, Aetna's obligation to consummate the Merger is subject to (a) the condition that the required regulatory approvals do not impose any condition that, individually or in the aggregate, would reasonably be expected to have a "Regulatory Material Adverse Effect" (as such term is defined in the Merger Agreement), and (b) CMS has not imposed any sanctions with respect to our Medicare Advantage, or MA, business that, individually or in the aggregate, is or would reasonably be expected to be material and adverse to us and our subsidiaries, taken as a whole. The Merger is currently expected to close in the second half of 2016.

Business Segment Reclassifications

On January 1, 2015, we realigned certain of our businesses among our reportable segments to correspond with internal management reporting changes and renamed our Employer Group segment to the Group segment. Our three reportable segments remain Retail, Group, and Healthcare Services. The more significant realignments included reclassifying Medicare benefits offered to groups to the Retail segment from the Group segment, bringing all of our Medicare offerings, which are now managed collectively, together in one segment, recognizing that in some instances we market directly to individuals that are part of a group Medicare account. In addition, we realigned our military services business, primarily consisting of our TRICARE South Region contract previously included in the Other Businesses category, to our Group segment as we consider this contract with the government to be a group account. Prior period segment financial information has been recast to conform to the 2015 presentation. See Note 17 for segment financial information and Note 9 for goodwill information by segment.

Health Care Reform

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. Certain of these reforms became effective January 1, 2014, including an annual insurance industry premium-based fee and the establishment of federally-facilitated or state-based exchanges coupled with three premium stabilization programs, as described more fully below.

The Health Care Reform Law imposes an annual premium-based fee on health insurers for each calendar year beginning on or after January 1, 2014 which is not deductible for tax purposes. We are required to estimate a liability for the health insurer fee and record it in full once qualifying insurance coverage is provided in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized ratably to expense over the same calendar year. We record the liability for the health insurer fee in trade accounts payable and accrued expenses and record the deferred cost in other current assets in our consolidated financial statements. We pay the health insurer fee in September of each year. The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee. See Note 7 for detail regarding amounts paid for the annual health insurer fee.

The Health Care Reform Law also establishes risk spreading premium stabilization programs effective January 1, 2014. The risk spreading programs are applicable to certain of our commercial medical insurance products. In the aggregate, our commercial medical insurance products represented approximately 18% of our total premiums and services revenue for the year ended December 31, 2015, a subset of which is subject to these programs. These programs, commonly referred to as the 3Rs, include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridors program designed to more evenly spread the financial risk borne by issuers and to mitigate the risk that issuers would have mispriced products. The transitional reinsurance and temporary risk corridors programs are for years 2014 through 2016, with potential for additional reinsurance recoveries through 2018 to the extent funds are available. Policies issued prior to March 23, 2010 are considered grandfathered policies and are exempt from the 3Rs. Certain states have allowed non-grandfathered policies issued prior to January 1, 2014 to extend the date of required transition to policies compliant with the Health Care Reform Law to as late as 2017. Accordingly, such policies are exempt from the 3Rs until they transition to policies compliant with the Health Care Reform Law.

The permanent risk adjustment program adjusts the premiums that commercial individual and small group health insurance issuers receive based on the demographic factors and health status of each member as derived from current year medical diagnosis as reported throughout the year. This program transfers funds from lower risk plans to higher risk plans within similar plans in the same state. The risk adjustment program is applicable to commercial individual and small group health plans (except certain exempt and grandfathered plans as discussed above) operating both inside and outside of the health insurance exchanges established under the Health Care Reform Law. Under the risk adjustment program, a risk score is assigned to each covered member to determine an average risk score at the individual and small group level by legal entity in a particular market in a state. Additionally, an average risk score is determined for the entire subject population for each market in each state. Settlements are determined on a net basis by legal entity and state. Each health insurance issuer's average risk score is compared to the state's average risk score. Plans with an average risk score below the state average will pay into a pool and health insurance issuers with an average risk score that is greater than the state average risk score will receive money from that pool. We generally rely on providers, including certain network providers who are our employees, to appropriately document all medical data, including the diagnosis codes submitted with claims, as the basis for our risk scores under the program. Our estimate of amounts receivable and/or payable under the risk adjustment program is based on our estimate of both our own and the state average risk scores. Assumptions used in these estimates include but are not limited to published third party studies and other publicly available data including regulatory plan filings, geographic considerations including our historical experience in markets we have participated in over a long period of time, member demographics (including age and gender for our members and other health insurance issuers), our pricing model, sales data for each metal tier (different metal tiers yield different risk scores), and the mix of previously underwritten membership as compared to new members in plans compliant with the Health Care Reform Law. We refine our estimates as new information becomes available, including additional data released by the Department of Health and Human Services, or HHS, regarding estimates of state average risk scores. Risk adjustment is subject to audit by HHS beginning with the 2015 coverage year, however, there will be no payments associated with these audits for 2015, the pilot year for the audits.

The temporary risk corridor program applies to individual and small group Qualified Health Plans (or substantially equivalent plans), or QHPs, as defined by HHS, operating both inside and outside of the exchanges. Accordingly, plans subject to risk adjustment that are not QHPs, including our small group health plans, were not subject to the risk corridor program in 2014 or 2015. The risk corridor provisions limit issuer gains and losses by comparing allowable medical costs to a target amount, each defined/prescribed by HHS, and sharing the risk for allowable costs with the federal government. Allowable medical costs are adjusted for risk adjustment settlements, transitional reinsurance recoveries, and cost sharing reductions received from HHS. Variances from the target exceeding certain thresholds may result in HHS making additional payments to us or require us to refund HHS a portion of the premiums we received.

We estimate and recognize adjustments to premiums revenue for the risk adjustment and risk corridor provisions by projecting our ultimate premium for the calendar year separately for individual and group plans by state and legal entity. Estimated calendar year settlement amounts are recognized ratably during the year and are revised each period to reflect current experience, including changes in risk scores derived from medical diagnoses submitted by providers. We record receivables or payables at the individual or group level within each state and legal entity and classify the amounts as current or long-term in our consolidated balance sheets based on the timing of expected settlement.

The transitional reinsurance program requires us to make reinsurance contributions for calendar years 2014 through 2016 to a state or HHS established reinsurance entity based on a national contribution rate per covered member as determined by HHS. While all commercial medical plans, including self-funded plans, are required to fund the reinsurance entity, only fully-insured non-grandfathered plans compliant with the Health Care Reform Law in the individual commercial market will be eligible for recoveries if individual claims exceed a specified threshold. Accordingly, we account for transitional reinsurance contributions associated with all commercial medical health plans other than these non-grandfathered individual plans as an assessment in operating costs in our consolidated statements of income. We account for contributions made by individual commercial plans compliant with the Health Care Reform Law, which are subject to recoveries, as ceded premiums (a reduction of premiums) and similarly we account for any recoveries as ceded benefits (a reduction of benefits expense) in our consolidated statements of income.

We are required to remit payment for our per member reinsurance contribution, exclusive of the portion payable to the U.S. Treasury, by January 15 of the year following the coverage year, or January 15, 2016 for the 2015 coverage year. The portion of the reinsurance contribution due to the U.S. Treasury must be paid by November 15 of the year following the coverage year, or November 15, 2016 for the 2015 coverage year. Risk adjustment calculations will be completed and HHS will notify us of recoveries due or payments owed to/from us under the risk adjustment and reinsurance programs by June 30 of the year following the coverage year. Following this notification, risk corridor calculations are then due by July 31 of the year following the coverage year. Payments due to HHS under the risk adjustment and risk corridor programs must be remitted within 30 days of notification for each program and will be collected prior to the distribution of recoveries by HHS under each program. Payment and recovery amounts associated with reinsurance and risk adjustment will generally be settled with HHS annually in the year following the coverage year. Accordingly, for the 2015 coverage year, we expect to receive recoveries and/or pay amounts due under these programs in 2016. The risk corridor program is a three year program. We are required to pay gross risk corridor payables in the second half of the year following the coverage year. Interim settlements of risk corridor receivables in the year following the coverage year are limited to risk corridor amounts collected by HHS and available for distribution in the year following the coverage year. HHS guidance provides that risk corridor collections over the life of the three year program will first be applied to any shortfalls from previous coverage years before application to current year obligations. Risk corridor payables to issuers are obligations of the United States Government under the Health Care Reform law which requires the Secretary of HHS to make full payments to issuers. In the event of a shortfall at the end of the three year program, HHS has asserted it will explore other sources of funding for risk corridor payments, subject to the availability of appropriations.

See Note 7 for detail regarding amounts recorded to the consolidated balance sheets related to the 3Rs.

In addition to the provisions discussed above, beginning in 2014, HHS pays us a portion of the health care costs for low-income individual members for which we assume no risk in accordance with the Health Care Reform Law. We account for these subsidies as a deposit in our consolidated balance sheets and as a financing activity in our consolidated statements of cash flows. We do not recognize premiums revenue or benefits expense for these subsidies. Receipt and payment activity is accumulated at the state and legal entity level and recorded in our consolidated balance sheet in other current assets or trade accounts payable and accrued expenses depending on the state and legal entity balance at the end of the reporting period. We will be notified of final settlement amounts by June 30 of the year following the coverage year. Receipts from HHS associated with cost sharing subsidies for which we do not assume risk were approximately $478 million, exceeding payments of $409 million by $69 million for the year ended December 31, 2015. For the year ended December 31, 2014, receipts from HHS associated with cost sharing subsidies for which we do not assume risk were approximately $281 million, exceeding payments of $255 million by $26 million. The program began in 2014, and as such, there were no receipts or payments from HHS for cost sharing subsidies in 2013.

Cash and Cash Equivalents

Cash and cash equivalents include cash, time deposits, money market funds, commercial paper, other money market instruments, and certain U.S. Government securities with an original maturity of three months or less. Carrying value approximates fair value due to the short-term maturity of the investments.

Investment Securities

Investment securities, which consist entirely of debt securities, have been categorized as available for sale and, as a result, are stated at fair value. Investment securities available for current operations are classified as current assets. Investment securities available for our long-term insurance products and professional liability funding requirements, as well as restricted statutory deposits, are classified as long-term assets. For the purpose of determining gross realized gains and losses, which are included as a component of investment income in the consolidated statements of income, the cost of investment securities sold is based upon specific identification. Unrealized holding gains and losses, net of applicable deferred taxes, are included as a component of stockholders' equity and comprehensive income until realized from a sale or other-than-temporary impairment.

Under the other-than-temporary impairment model for debt securities held, we recognize an impairment loss in income in an amount equal to the full difference between the amortized cost basis and the fair value when we have the intent to sell the debt security or it is more likely than not we will be required to sell the debt security before recovery of our amortized cost basis. However, if we do not intend to sell the debt security, we evaluate the expected cash flows to be received as compared to amortized cost and determine if a credit loss has occurred. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized currently in income with the remainder of the loss recognized in other comprehensive income.

When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairment is considered using a variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. For example, with respect to mortgage and asset-backed securities, such data includes underlying loan level data and structural features such as seniority and other forms of credit enhancements. A decline in fair value is considered other-than-temporary when we do not expect to recover the entire amortized cost basis of the security. We estimate the amount of the credit loss component of a debt security as the difference between the amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate of future cash flows discounted at the implicit interest rate at the date of purchase.

Receivables and Revenue Recognition

We generally establish one-year commercial membership contracts with employer groups, subject to cancellation by the employer group on 30-day written notice. Our Medicare contracts with CMS renew annually. Our military services contracts with the federal government and our contracts with various state Medicaid programs generally are multi-year contracts subject to annual renewal provisions. Individual polices are subject to the requirements of the Health Care Reform Law as discussed previously.

Premiums Revenue

We bill and collect premium from employer groups and members in our Medicare and other individual products monthly. We receive monthly premiums from the federal government and various states according to government specified payment rates and various contractual terms. Changes in revenues for our Medicare and individual commercial medical products resulting from the periodic changes in risk-adjustment scores derived from medical diagnoses for our membership and changes in risk corridor estimates are recognized when the amounts become determinable and the collectibility is reasonably assured.

Premiums revenue is estimated by multiplying the membership covered under the various contracts by the contractual rates. Premiums revenue is recognized as income in the period members are entitled to receive services, and is net of estimated uncollectible amounts, retroactive membership adjustments, and adjustments to recognize rebates under the minimum benefit ratios required under the Health Care Reform Law. We estimate policyholder rebates by projecting calendar year minimum benefit ratios for the individual, small group, and large group markets, as defined by the Health Care Reform Law using a methodology prescribed by HHS, separately by state and legal entity. Beginning

in 2014, Medicare Advantage products were also subject to minimum benefit ratio requirements under the Health Care Reform Law. Estimated calendar year rebates recognized ratably during the year are revised each period to reflect current experience. Retroactive membership adjustments result from enrollment changes not yet processed, or not yet reported by an employer group or the government. We routinely monitor the collectibility of specific accounts, the aging of receivables, historical retroactivity trends, estimated rebates, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in current operations. Premiums received prior to the service period are recorded as unearned revenues.

Medicare Part D

We cover prescription drug benefits in accordance with Medicare Part D under multiple contracts with CMS. The payments we receive monthly from CMS and members, which are determined from our annual bid, represent amounts for providing prescription drug insurance coverage. We recognize premiums revenue for providing this insurance coverage ratably over the term of our annual contract. Our CMS payment is subject to risk sharing through the Medicare Part D risk corridor provisions. In addition, receipts for reinsurance and low-income cost subsidies as well as receipts for certain discounts on brand name prescription drugs in the coverage gap represent payments for prescription drug costs for which we are not at risk.

The risk corridor provisions compare costs targeted in our bids to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to us or require us to refund to CMS a portion of the premiums we received. As risk corridor provisions are considered in our overall annual bid process, we estimate and recognize an adjustment to premiums revenue related to these provisions based upon pharmacy claims experience. We record a receivable or payable at the contract level and classify the amount as current or long-term in our consolidated balance sheets based on the timing of expected settlement.

Reinsurance and low-income cost subsidies represent funding from CMS in connection with the Medicare Part D program for which we assume no risk. Reinsurance subsidies represent funding from CMS for its portion of prescription drug costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage level. Low-income cost subsidies represent funding from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts above the out-of-pocket threshold for low-income beneficiaries. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. A reconciliation and related settlement of CMS's prospective subsidies against actual prescription drug costs we paid is made after the end of the year. The Health Care Reform Law mandates consumer discounts of 50% on brand name prescription drugs for Part D plan participants in the coverage gap. These discounts are funded by CMS and pharmaceutical manufacturers while we administer the application of these funds. We account for these subsidies and discounts as a deposit in our consolidated balance sheets and as a financing activity under receipts (withdrawals) from contract deposits in our consolidated statements of cash flows. For 2015, subsidy and discount payments of $8.9 billion exceeded reimbursements of $8.6 billion by $361 million. For 2014, subsidy and discount payments of $6.7 billion exceeded reimbursements of $5.8 billion by $945 million. For 2013, subsidy and discount payments of $4.8 billion exceeded reimbursements of $4.6 billion by $154 million. We do not recognize premiums revenue or benefit expenses for these subsidies or discounts. Receipt and payment activity is accumulated at the contract level and recorded in our consolidated balance sheets in other current assets or trade accounts payable and accrued expenses depending on the contract balance at the end of the reporting period.

Settlement of the reinsurance and low-income cost subsidies as well as the risk corridor payment is based on a reconciliation made approximately 9 months after the close of each calendar year. Settlement with CMS for brand name prescription drug discounts is based on a reconciliation made approximately 14 to 18 months after the close of each calendar year. We continue to revise our estimates with respect to the risk corridor provisions based on subsequent period pharmacy claims data. See Note 6 for detail regarding amounts recorded to our consolidated balance sheets related to the risk corridor settlement and subsidies from CMS.

Services Revenue

Patient services revenue

Patient services include injury and illness care and related services as well as other healthcare services related to employer needs or as required by law. Patient services revenues are recognized in the period services are provided to the customer when the sales price is fixed or determinable, and are net of contractual allowances.

Administrative services fees

Administrative services fees cover the processing of claims, offering access to our provider networks and clinical programs, and responding to customer service inquiries from members of self-funded groups. Revenues from providing administration services, also known as administrative services only, or ASO, are recognized in the period services are performed and are net of estimated uncollectible amounts. ASO fees are estimated by multiplying the membership covered under the various contracts by the contractual rates. Under ASO contracts, self-funded employers retain the risk of financing substantially all of the cost of health benefits. However, many ASO customers purchase stop loss insurance coverage from us to cover catastrophic claims or to limit aggregate annual costs. Accordingly, we have recorded premiums revenue and benefits expense related to these stop loss insurance contracts. We routinely monitor the collectibility of specific accounts, the aging of receivables, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in current operations. ASO fees received prior to the service period are recorded as unearned revenues.

Under our current TRICARE South Region contract with the Department of Defense, we provide administrative services, including offering access to our provider networks and clinical programs, claim processing, customer service, enrollment, and other services, while the federal government retains all of the risk of the cost of health benefits. We account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement. The current contract includes fixed administrative services fees and incentive fees and penalties. Administrative services fees are recognized as services are performed.

Our TRICARE members are served by both in-network and out-of-network providers in accordance with the current contract. We pay health care costs related to these services to the providers and are subsequently reimbursed by the DoD for such payments. We account for the payments of the federal government's claims and the related reimbursements under deposit accounting in our consolidated balance sheets and as a financing activity under receipts (withdrawals) from contract deposits in our consolidated statements of cash flows. For 2015, health care cost reimbursements and payments were each approximately $3.3 billion, with payments exceeding reimbursements by $4 million for the year. For 2014, health care cost reimbursements and payments were each $3.2 billion. For 2013, health care cost reimbursements and payments were each approximately $3.2 billion, with reimbursements exceeding payments by $5 million for the year.

Receivables

Receivables, including premium receivables, patient services revenue receivables, and ASO fee receivables, are shown net of allowances for estimated uncollectible accounts, retroactive membership adjustments, and contractual allowances.

Policy Acquisition Costs

Policy acquisition costs are those costs that relate directly to the successful acquisition of new and renewal insurance policies. Such costs include commissions, costs of policy issuance and underwriting, and other costs we incur to acquire new business or renew existing business. We expense policy acquisition costs related to our employer-group prepaid health services policies as incurred. These short-duration employer-group prepaid health services policies typically have a 1-year term and may be cancelled upon 30 days notice by the employer group.

Life insurance, annuities, and certain health and other supplemental policies sold to individuals are accounted for as long-duration insurance products because they are expected to remain in force for an extended period beyond one year and premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. As

a result, we defer policy acquisition costs, primarily consisting of commissions, and amortize them over the estimated life of the policies in proportion to premiums earned. Deferred acquisition costs are reviewed to determine if they are recoverable from future income. See Note 18.

Beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model and accordingly policy acquisition costs are expensed as incurred because premiums received in the current year are intended to pay anticipated benefits in that year. In addition, as previously underwritten members transition to plans compliant with the Health Care Reform Law, it results in policy lapses and the recognition of previously deferred acquisition costs.

Long-Lived Assets

Property and equipment is recorded at cost. Gains and losses on sales or disposals of property and equipment are included in operating costs. Certain costs related to the development or purchase of internal-use software are capitalized. Depreciation is computed using the straight-line method over estimated useful lives ranging from 3 to 10 years for equipment, 3 to 7 years for computer software, and 20 to 40 years for buildings. Improvements to leased facilities are depreciated over the shorter of the remaining lease term or the anticipated life of the improvement.

We periodically review long-lived assets, including property and equipment and other intangible assets, for impairment whenever adverse events or changes in circumstances indicate the carrying value of the asset may not be recoverable. Losses are recognized for a long-lived asset to be held and used in our operations when the undiscounted future cash flows expected to result from the use of the asset are less than its carrying value. We recognize an impairment loss based on the excess of the carrying value over the fair value of the asset. A long-lived asset held for sale is reported at the lower of the carrying amount or fair value less costs to sell. Depreciation expense is not recognized on assets held for sale. Losses are recognized for a long-lived asset to be abandoned when the asset ceases to be used. In addition, we periodically review the estimated lives of all long-lived assets for reasonableness.

Goodwill and Other Intangible Assets

Goodwill represents the unamortized excess of cost over the fair value of the net tangible and other intangible assets acquired. We are required to test at least annually for impairment at a level of reporting referred to as the reporting unit, and more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. A reporting unit either is our operating segments or one level below the operating segments, referred to as a component, which comprise our reportable segments. A component is considered a reporting unit if the component constitutes a business for which discrete financial information is available that is regularly reviewed by management. We aggregate the components of an operating segment into one reporting unit if they have similar economic characteristics. Goodwill is assigned to the reporting unit that is expected to benefit from a specific acquisition.

We use a two-step process to review goodwill for impairment. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any. Impairment tests are performed, at a minimum, in the fourth quarter of each year supported by our long-range business plan and annual planning process. We rely on an evaluation of future discounted cash flows to determine fair value of our reporting units. Impairment tests completed for 2015, 2014, and 2013 did not result in an impairment loss.

Other intangible assets primarily relate to acquired customer contracts/relationships and are included with other long-term assets in the consolidated balance sheets. Other intangible assets are amortized over the useful life, based upon the pattern of future cash flows attributable to the asset. This sometimes results in an accelerated method of amortization for customer contracts because the asset tends to dissipate at a more rapid rate in earlier periods. Other than customer contracts, other intangible assets generally are amortized using the straight-line method. We review other finite-lived intangible assets for impairment under our long-lived asset policy.

Benefits Payable and Benefits Expense Recognition

Benefits expense includes claim payments, capitation payments, pharmacy costs net of rebates, allocations of certain centralized expenses and various other costs incurred to provide health insurance coverage to members, as well as estimates of future payments to hospitals and others for medical care and other supplemental benefits provided on

or prior to the balance sheet date. Capitation payments represent monthly contractual fees disbursed to primary care and other providers who are responsible for providing medical care to members. Pharmacy costs represent payments for members' prescription drug benefits, net of rebates from drug manufacturers. Receivables for such pharmacy rebates are included in other current assets in our consolidated balance sheets. Other supplemental benefits include dental, vision, and other supplemental health and financial protection products.

We estimate the costs of our benefits expense payments using actuarial methods and assumptions based upon claim payment patterns, medical cost inflation, historical developments such as claim inventory levels and claim receipt patterns, and other relevant factors, and record benefit reserves for future payments. We continually review estimates of future payments relating to claims costs for services incurred in the current and prior periods and make necessary adjustments to our reserves.

We reassess the profitability of our contracts for providing insurance coverage to our members when current operating results or forecasts indicate probable future losses. We establish a premium deficiency reserve in current operations to the extent that the sum of expected future costs, claim adjustment expenses, and maintenance costs exceeds related future premiums under contracts without consideration of investment income. For purposes of determining premium deficiencies, contracts are grouped in a manner consistent with our method of acquiring, servicing, and measuring the profitability of such contracts. Losses recognized as a premium deficiency result in a beneficial effect in subsequent periods as operating losses under these contracts are charged to the liability previously established. Because the majority of our member contracts renew annually, we would not record a material premium deficiency reserve, except when unanticipated adverse events or changes in circumstances indicate otherwise. In the fourth quarter of 2015, we recognized a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year as discussed in more detail in Note 7.

We believe our benefits payable are adequate to cover future claims payments required. However, such estimates are based on knowledge of current events and anticipated future events. Therefore, the actual liability could differ materially from the amounts provided.

Future policy benefits payable

Future policy benefits payable include liabilities for long-duration insurance policies including long-term care, life insurance, annuities, and certain health and other supplemental policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Interest rates are based on our expected net investment returns on the investment portfolio supporting the reserves for these blocks of business. Mortality, a measure of expected death, and morbidity, a measure of health status, assumptions are based on published actuarial tables, modified based upon actual experience. Changes in estimates of these reserves are recognized as an adjustment to benefits expense in the period the changes occur. We perform loss recognition tests at least annually in the fourth quarter, and more frequently if adverse events or changes in circumstances indicate that the level of the liability, together with the present value of future gross premiums, may not be adequate to provide for future expected policy benefits and maintenance costs. We adjust future policy benefits payable for the additional liability that would have been recorded if investment securities backing the liability had been sold at their stated aggregate fair value and the proceeds reinvested at current yields. We include the impact of this adjustment, if any, net of applicable deferred taxes, with the change in unrealized investment gain (loss) in accumulated other comprehensive income in stockholders' equity. As discussed previously, beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model under which policy reserves are not established because premiums received in the current year are intended to pay anticipated benefits in that year. In addition, as previously underwritten members transition to plans compliant with the Health Care Reform Law, it results in policy lapses and the release of reserves for future policy benefits.

Book Overdraft

Under our cash management system, checks issued but not yet presented to banks that would result in negative bank balances when presented are classified as a current liability in the consolidated balance sheets. Changes in book overdrafts from period to period are reported in the consolidated statement of cash flows as a financing activity.

Income Taxes

We recognize an asset or liability for the deferred tax consequences of temporary differences between the tax bases of assets or liabilities and their reported amounts in the consolidated financial statements. These temporary differences will result in taxable or deductible amounts in future years when the reported amounts of the assets or liabilities are recovered or settled. We also recognize the future tax benefits such as net operating and capital loss carryforwards as deferred tax assets. A valuation allowance is provided against these deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. Future years' tax expense may be increased or decreased by adjustments to the valuation allowance or to the estimated accrual for income taxes.

We record tax benefits when it is more likely than not that the tax return position taken with respect to a particular transaction will be sustained. A liability, if recorded, is not considered resolved until the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired, or the tax position is ultimately settled through examination, negotiation, or litigation. We classify interest and penalties associated with uncertain tax positions in our provision for income taxes.

Derivative Financial Instruments

On October 29, 2012, we acquired a noncontrolling equity interest in MCCI Holdings, LLC, or MCCI, a privately held Medical Services Organization, or MSO, headquartered in Miami, Florida, that primarily coordinates medical care for Medicare Advantage beneficiaries in Florida, Texas and Georgia. Our agreement with MCCI includes a put option that would allow the controlling interest holder to put their interest to us beginning in 2018 as well as a call option that would allow us to purchase the controlling interest beginning in 2021. Accordingly, we recorded, at fair value, a liability and an asset associated with the put and call, respectively. Changes in the fair value of the liability and asset during the years ended December 31, 2015, 2014, and 2013 were not material to our results of operations, financial condition, or cash flows.

At times, we may use interest-rate swap agreements to manage our exposure to interest rate risk. The differential between fixed and variable rates to be paid or received is accrued and recognized over the life of the agreements as adjustments to interest expense in the consolidated statements of income. We were not party to any interest-rate swap agreements in 2015, 2014, or 2013.

Related Party

As noted above, MCCI is a related party to Humana. In December 2015, we purchased a note receivable directly from a third-party bank syndicate related to the financing of MCCI's business and extended the exercise date of the put option to 2018 and the call option to 2021 as previously discussed. The $284 million note receivable bears interest at 10% annually, payable in quarterly installments, and matures in December 2020. We have also entered into a revolving note agreement providing a line of credit up to $55 million under which no amounts have been drawn. The note receivable is included with other long-term assets in our consolidated balance sheet and with purchases of investment securities in our consolidated statement of cash flows. The related interest income is included in investment income in our consolidated statement of income. MCCI provides services to Humana Medicare Advantage members under capitation contracts with our health plans. Under these capitation agreements with Humana, MCCI assumes the financial risk associated with these Medicare Advantage members. We also advanced MCCI $9 million, with repayment terms tied to the performance under the capitation agreements. We recognized benefits expense of approximately $1.0 billion in 2015, $962 million in 2014 and $873 million in 2013 under these capitation agreements with MCCI.

Stock-Based Compensation

We generally recognize stock-based compensation expense, as determined on the date of grant at fair value, on a straight-line basis over the period during which an employee is required to provide service in exchange for the award (the vesting period). In addition, for awards with both time and performance-based conditions, we generally recognize compensation expense on a straight line basis over the vesting period when it is probable that the performance condition will be achieved. However, prior to July 2, 2015, for awards granted to retirement eligible employees, compensation expense is recognized on a straight-line basis over the shorter of the requisite service period or the period from the date

of grant to an employee's eligible retirement date. For awards granted on or after July 2, 2015 to retirement eligible employees, we recognize expense on a straight-line basis over the service period (the vesting period). We estimate expected forfeitures and recognize compensation expense only for those awards which are expected to vest. We estimate the grant-date fair value of stock options using the Black-Scholes option-pricing model. In addition, we report certain tax effects of stock-based compensation as a financing activity rather than an operating activity in the consolidated statement of cash flows. Additional detail regarding our stock-based compensation plans is included in Note 13.

Earnings Per Common Share

We compute basic earnings per common share on the basis of the weighted-average number of unrestricted common shares outstanding. Diluted earnings per common share is computed on the basis of the weighted-average number of unrestricted common shares outstanding plus the dilutive effect of outstanding employee stock options and restricted shares, or units, using the treasury stock method.

Fair Value

Assets and liabilities measured at fair value are categorized into a fair value hierarchy based on whether the inputs to valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our own assumptions about the assumptions market participants would use. The fair value hierarchy includes three levels of inputs that may be used to measure fair value as described below.

Level 1 – Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt securities that are traded in an active exchange market.

Level 2 – Observable inputs other than Level 1 prices such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments as well as debt securities whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Level 3 – Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 includes assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques reflecting our own assumptions about the assumptions market participants would use as well as those requiring significant management judgment.

Fair value of actively traded debt securities are based on quoted market prices. Fair value of other debt securities are based on quoted market prices of identical or similar securities or based on observable inputs like interest rates generally using a market valuation approach, or, less frequently, an income valuation approach and are generally classified as Level 2. We obtain at least one price for each security from a third party pricing service. These prices are generally derived from recently reported trades for identical or similar securities, including adjustments through the reporting date based upon observable market information. When quoted prices are not available, the third party pricing service may use quoted market prices of comparable securities or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include benchmark yields, reported trades, credit spreads, broker quotes, default rates, and prepayment speeds. We are responsible for the determination of fair value and as such we perform analysis on the prices received from the third party pricing service to determine whether the prices are reasonable estimates of fair value. Our analysis includes a review of monthly price fluctuations as well as a quarterly comparison of the prices received from the pricing service to prices reported by our third party investment advisor. In addition, on a quarterly basis we examine the underlying inputs and assumptions for a sample of individual securities across asset classes, credit rating levels, and various durations.

Fair value of privately held debt securities, as well as auction rate securities, are estimated using a variety of valuation methodologies, including both market and income approaches, where an observable quoted market does not

exist and are generally classified as Level 3. For privately-held debt securities, such methodologies include reviewing the value ascribed to the most recent financing, comparing the security with securities of publicly-traded companies in similar lines of business, and reviewing the underlying financial performance including estimating discounted cash flows. Auction rate securities are debt instruments with interest rates that reset through periodic short-term auctions. From time to time, liquidity issues in the credit markets have led to failed auctions. Given the liquidity issues, fair value could not be estimated based on observable market prices, and as such, unobservable inputs were used. For auction rate securities, valuation methodologies include consideration of the quality of the sector and issuer, underlying collateral, underlying final maturity dates, and liquidity.

Recently Issued Accounting Pronouncements

In January 2016, the Financial Accounting Standards Board, or FASB, issued new guidance related to classification and measurement of financial instruments which requires equity securities that are not accounted for using the equity method or that do not result in consolidation, to be accounted for at fair value with changes in fair value recognized through net income. The new guidance is effective for us beginning with annual and interim periods in 2018 with early adoption permitted under certain circumstances. We are currently evaluating the impact, if any, on our results of operations, financial position, and cash flows.

In November 2015, the FASB issued new guidance related to accounting for income taxes which changes the balance sheet classification of deferred taxes, requiring deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The new guidance is effective for us beginning with annual and interim periods in 2017, with early adoption permitted. We elected to early adopt the guidance and have classified all deferred tax liabilities and assets as noncurrent in our consolidated balance sheet at December 31, 2015 to simplify their presentation. Prior periods were not retrospectively adjusted. The adoption of the new guidance did not have any impact on our results of operations or cash flows.

In May 2015, the FASB issued new guidance requiring insurance entities to provide additional disclosures about claim liabilities including paid claims development information by accident year and claim frequency data and related methodologies. The guidance is effective for us beginning with the 2016 annual reporting period and interim periods beginning in 2017. We are currently evaluating the impact the new guidance will have on our disclosures.

In April 2015, the FASB issued new guidance to help entities determine whether a cloud computing arrangement contains a software license that should be accounted for as internal-use software or as a service contract. The guidance is effective for us beginning with interim and annual reporting periods in 2016, with early adoption permitted. Upon adoption, an entity has the option to apply the provisions either prospectively to all arrangements entered into or materially modified, or retrospectively. We are currently evaluating the impact, if any, on our results of operations, financial position, and cash flows.

In March 2015, the FASB issued new guidance which changes the presentation of debt issuance costs from an asset to a direct reduction of the related debt liability. The new guidance is effective for us beginning with annual and interim periods in 2016 with early adoption permitted. The adoption of the new guidance will not have a material impact on our results of operations, financial condition, or cash flows.

In February 2015, the FASB issued an amendment to current consolidation guidance that modifies the evaluation of whether limited partnerships and similar legal entities are variable interest entities or voting interest entities, eliminating the presumption that a general partner should consolidate a limited partnership, and affects the consolidation analysis of reporting entities that are involved with variable interest entities. The new guidance is effective for us beginning with interim and annual reporting periods in 2016, with early adoption permitted. All legal entities are subject to reevaluation under the revised consolidation model. We are currently evaluating the impact, if any, on our results of operations, financial position, and cash flows.

In May 2014, the FASB issued new guidance that amends the accounting for revenue recognition. The amendments are intended to provide a more robust framework for addressing revenue issues, improve comparability of revenue recognition practices, and improve disclosure requirements. Insurance contracts are not included in the scope of this new guidance. In July 2015, the FASB decided to defer the effective date provided in the new revenue guidance by

one year. Giving effect to this deferral, the new guidance is effective for us beginning with annual and interim periods in 2018. We are currently evaluating the impact on our results of operations, financial condition, and cash flows.

There are no other recently issued accounting standards that apply to us or that are expected to have a material impact on our results of operations, financial condition, or cash flows.

3. ACQUISITIONS AND DIVESTITURES

On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc., or Concentra, to MJ Acquisition Corporation, a joint venture between Select Medical Holdings Corporation and Welsh, Carson, Anderson & Stowe XII, L.P., a private equity fund, for approximately $1,055 million in cash, excluding approximately $22 million of transaction costs. In connection with the sale, we recognized a pre-tax gain, net of transaction costs, of $270 million which is reported as gain on sale of business in the accompanying condensed consolidated statements of income for the year ended December 31, 2015.

In March 2015, we classified Concentra as held-for-sale and aggregated Concentra's assets and liabilities separately on the balance sheet, including a reclassification of the December 31, 2014 balance sheet for comparative purposes. The assets and liabilities of Concentra that were disposed of on June 1, 2015 and classified as held-for-sale as of December 31, 2014 were as follows:

	June 1, 2015	December 31, 2014
Assets	(in millions)	
Receivables, net	$ 130	$ 115
Property and equipment, net	197	191
Goodwill	480	480
Other intangible assets, net	124	132
Other assets	27	25
Total assets disposed/held-for-sale	$ 958	$ 943
Liabilities		
Trade accounts payable and accrued expenses	81	90
Other liabilities	114	116
Total liabilities disposed/held-for-sale	$ 195	$ 206
Net assets disposed	$ 763	$ 737

For the year ended December 31, 2015, the accompanying condensed consolidated statements of income include revenues related to Concentra of $411 million in 2015, $998 million in 2014, and $981 million in 2013.

On September 6, 2013, we acquired American Eldercare Inc., or American Eldercare, the largest provider of nursing home diversion services in the state of Florida, serving frail and elderly individuals in home and community-based settings. American Eldercare complements our core capabilities and strength in serving seniors and disabled individuals with a unique focus on individualized and integrated care, and has contracts to provide Medicaid long-term support services across the entire state of Florida. The enrollment effective dates for the various regions ranged from August 2013 to March 2014. The allocation of the purchase price resulted in goodwill of $76 million and other intangible assets of $75 million. The goodwill was assigned to the Retail segment. The other intangible assets, which primarily consist of customer contracts and technology, have a weighted average useful life of 9.3 years. Goodwill and other intangible assets are amortizable as deductible expenses for tax purposes.

The results of operations and financial condition of American Eldercare has been included in our consolidated statements of income and consolidated balance sheets from the acquisition date. In addition, during 2015, 2014 and

2013, we acquired other health and wellness and technology related businesses which, individually or in the aggregate, have not had a material impact on our results of operations, financial condition, or cash flows. The results of operations and financial condition of these businesses have been included in our condensed consolidated statements of income and condensed consolidated balance sheets from the respective acquisition dates. Acquisition-related costs recognized in each of 2015, 2014, and 2013 were not material to our results of operations. The pro forma financial information assuming the acquisitions had occurred as of the beginning of the calendar year prior to the year of acquisition, as well as the revenues and earnings generated during the year of acquisition, were not material for disclosure purposes.

4. INVESTMENT SECURITIES

Investment securities classified as current and long-term were as follows at December 31, 2015 and 2014, respectively:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
		(in millions)		
December 31, 2015				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 331	$ 2	$ (1)	$ 332
Mortgage-backed securities	1,902	12	(23)	1,891
Tax-exempt municipal securities	2,611	61	(4)	2,668
Mortgage-backed securities:				
Residential	13	—	—	13
Commercial	1,024	2	(41)	985
Asset-backed securities	264	1	(2)	263
Corporate debt securities	2,873	140	(55)	2,958
Total debt securities	$ 9,018	$ 218	$ (126)	$ 9,110
December 31, 2014				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 365	$ 10	$ (1)	$ 374
Mortgage-backed securities	1,453	50	(5)	1,498
Tax-exempt municipal securities	2,931	140	(3)	3,068
Mortgage-backed securities:				
Residential	17	—	—	17
Commercial	846	16	(19)	843
Asset-backed securities	28	1	—	29
Corporate debt securities	3,432	299	(13)	3,718
Total debt securities	$ 9,072	$ 516	$ (41)	$ 9,547

Gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows at December 31, 2015 and 2014, respectively:

	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in millions)					
December 31, 2015						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 195	$ (1)	$ 14	$ —	$ 209	$ (1)
Mortgage-backed securities	1,484	(20)	86	(3)	1,570	(23)
Tax-exempt municipal securities	843	(3)	52	(1)	895	(4)
Mortgage-backed securities:						
Residential	2	—	4	—	6	—
Commercial	626	(13)	265	(28)	891	(41)
Asset-backed securities	258	(2)	—	—	258	(2)
Corporate debt securities	918	(45)	63	(10)	981	(55)
Total debt securities	$ 4,326	$ (84)	$ 484	$ (42)	$ 4,810	$ (126)
December 31, 2014						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 79	$ —	$ 80	$ (1)	$ 159	$ (1)
Mortgage-backed securities	22	—	320	(5)	342	(5)
Tax-exempt municipal securities	131	(1)	118	(2)	249	(3)
Mortgage-backed securities:						
Residential	1	—	4	—	5	—
Commercial	31	(1)	267	(18)	298	(19)
Asset-backed securities	13	—	—	—	13	—
Corporate debt securities	219	(6)	128	(7)	347	(13)
Total debt securities	$ 496	$ (8)	$ 917	$ (33)	$ 1,413	$ (41)

Approximately 98% of our debt securities were investment-grade quality, with a weighted average credit rating of AA by S&P at December 31, 2015. Most of the debt securities that were below investment-grade were rated BB, the higher end of the below investment-grade rating scale. At December 31, 2015, 7% of our tax-exempt municipal securities were pre-refunded, generally with U.S. government and agency securities. Tax-exempt municipal securities that were not pre-refunded were diversified among general obligation bonds of U.S. states and local municipalities as well as special revenue bonds. General obligation bonds, which are backed by the taxing power and full faith of the issuer, accounted for 42% of the tax-exempt municipals that were not pre-refunded in the portfolio. Special revenue bonds, issued by a municipality to finance a specific public works project such as utilities, water and sewer, transportation, or education, and supported by the revenues of that project, accounted for the remaining 58% of these municipals. Our general obligation bonds are diversified across the United States with no individual state exceeding 11%. In addition, 6% of our tax-exempt securities were insured by bond insurers and had an equivalent weighted average S&P credit rating of AA exclusive of the bond insurers' guarantee. Our investment policy limits investments in a single issuer and requires diversification among various asset types.

Residential mortgage back securities comprised approximately 98% of our agency mortgage-backed securities at December 31, 2015 and 99% at December 31, 2014.

The recoverability of our non-agency residential and commercial mortgage-backed securities is supported by factors such as seniority, underlying collateral characteristics and credit enhancements. These residential and commercial mortgage-backed securities at December 31, 2015 primarily were composed of senior tranches having high credit support, with over 99% of the collateral consisting of prime loans. The weighted average credit rating of all commercial mortgage-backed securities was AA+ at December 31, 2015.

The percentage of corporate securities associated with the financial services industry was 25% at December 31, 2015 and 21% at December 31, 2014.

Our unrealized loss from all securities was generated from approximately 690 positions out of a total of approximately 2,000 positions at December 31, 2015. All issuers of securities we own that were trading at an unrealized loss at December 31, 2015 remain current on all contractual payments. After taking into account these and other factors previously described, we believe these unrealized losses primarily were caused by an increase in market interest rates in the current markets than when the securities were purchased. At December 31, 2015, we did not intend to sell the securities with an unrealized loss position in accumulated other comprehensive income, and it is not likely that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss were not other-than-temporarily impaired at December 31, 2015.

The detail of realized gains (losses) related to investment securities and included within investment income was as follows for the years ended December 31, 2015, 2014, and 2013:

	2015	2014	2013
		(in millions)	
Gross realized gains	$ 179	$ 29	$ 33
Gross realized losses	(33)	(9)	(11)
Net realized capital gains	$ 146	$ 20	$ 22

There were no material other-than-temporary impairments in 2015, 2014, or 2013.

The contractual maturities of debt securities available for sale at December 31, 2015, regardless of their balance sheet classification, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	(in millions)	
Due within one year	$ 438	$ 439
Due after one year through five years	1,829	1,871
Due after five years through ten years	1,244	1,264
Due after ten years	2,304	2,384
Mortgage and asset-backed securities	3,203	3,152
Total debt securities	$ 9,018	$ 9,110

5. FAIR VALUE

Financial Assets

The following table summarizes our fair value measurements at December 31, 2015 and 2014, respectively, for financial assets measured at fair value on a recurring basis:

		Fair Value Measurements Using		
	Fair Value	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
		(in millions)		
December 31, 2015				
Cash equivalents	$ 2,229	$ 2,229	$ —	$ —
Debt securities:				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	332	—	332	—
Mortgage-backed securities	1,891	—	1,891	—
Tax-exempt municipal securities	2,668	—	2,663	5
Mortgage-backed securities:				
Residential	13	—	13	—
Commercial	985	—	985	—
Asset-backed securities	263	—	263	—
Corporate debt securities	2,958	—	2,952	6
Total debt securities	9,110	—	9,099	11
Total invested assets	$ 11,339	$ 2,229	$ 9,099	$ 11
December 31, 2014				
Cash equivalents	$ 1,712	$ 1,712	$ —	$ —
Debt securities:				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	374	—	374	—
Mortgage-backed securities	1,498	—	1,498	—
Tax-exempt municipal securities	3,068	—	3,060	8
Mortgage-backed securities:				
Residential	17	—	17	—

Asset-backed securities	29	—	28	1
Corporate debt securities	3,718	—	3,695	23
Total debt securities	9,547	—	9,515	32
Total invested assets	$ 11,259	$ 1,712	$ 9,515	$ 32

There were no material transfers between Level 1 and Level 2 during 2015 or 2014.

Our Level 3 assets had a fair value of $11 million at December 31, 2015, or 0.1% of our total invested assets. During the years ended December 31, 2015, 2014, and 2013, the changes in the fair value of the assets measured using significant unobservable inputs (Level 3) were comprised of the following:

	For the years ended December 31,								
	2015			2014			2013

Balance at December 31	$ 6	$ 5	$ 11	$ 24	$ 8	$ 32	$ 24	$ 13	$ 37

Financial Liabilities

Our long-term debt, recorded at carrying value in our consolidated balance sheets, was $3,821 million at December 31, 2015 and $3,825 million at December 31, 2014. The fair value of our long-term debt was $3,986 million at December 31, 2015 and $4,102 million at December 31, 2014. The fair value of our long-term debt is determined based on Level 2 inputs, including quoted market prices for the same or similar debt, or if no quoted market prices are available, on the current prices estimated to be available to us for debt with similar terms and remaining maturities.

Due to the short-term nature, carrying value approximates fair value for our commercial paper borrowings.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

As disclosed in Note 3, we completed our acquisition of American Eldercare and other companies during 2015, 2014, and 2013. The values of net tangible assets acquired and the resulting goodwill and other intangible assets were recorded at fair value using Level 3 inputs. The majority of the related tangible assets acquired and liabilities assumed were recorded at their carrying values as of the respective dates of acquisition, as their carrying values approximated their fair values due to their short-term nature. The fair values of goodwill and other intangible assets acquired in these acquisitions were internally estimated primarily based on the income approach. The income approach estimates fair value based on the present value of the cash flows that the assets are expected to generate in the future. We developed internal estimates for the expected cash flows and discount rates in the present value calculations. Other than assets acquired and liabilities assumed in these acquisitions, there were no material assets or liabilities measured at fair value on a nonrecurring basis during 2015, 2014, or 2013.

6. MEDICARE PART D

As discussed in Note 2, we cover prescription drug benefits in accordance with Medicare Part D under multiple contracts with CMS. The accompanying consolidated balance sheets include the following amounts associated with Medicare Part D as of December 31, 2015 and 2014. CMS subsidies/discounts in the table below include the reinsurance and low-income cost subsidies funded by CMS for which we assume no risk as well as brand name prescription drug discounts for Part D plan participants in the coverage gap funded by CMS and pharmaceutical manufacturers.

	2015		2014	
	Risk Corridor Settlement	CMS Subsidies/ Discounts	Risk Corridor Settlement	CMS Subsidies/ Discounts
	(in millions)			
Other current assets	$ 25	$ 2,082	$ 105	$ 1,690
Trade accounts payable and accrued expenses	(47)	(63)	(36)	(32)
Net current (liability) asset	$ (22)	$ 2,019	$ 69	$ 1,658

7. HEALTH CARE REFORM

Operating results for our individual commercial medical business compliant with the Health Care Reform Law have been challenged primarily due to unanticipated modifications in the program subsequent to the passing of the Health Care Reform Law, resulting in higher covered population morbidity and the ensuing enrollment and claims issues causing volatility in claims experience. We took a number of actions in 2015 to improve the profitability of our individual commercial medical business in 2016. These actions were subject to regulatory restrictions in certain geographies and included premium increases for the 2016 coverage year related generally to the first half of 2015 claims experience, the discontinuation of certain products as well as exit of certain markets for 2016, network improvements, enhancements to claims and clinical processes and administrative cost control. Despite these actions, the deterioration in the second half of 2015 claims experience together with 2016 open enrollment results indicating the retention of many high-utilizing members for 2016 resulted in a probable future loss. As a result of our assessment of the profitability of our individual medical policies compliant with the Health Care Reform Law, in the fourth quarter of 2015, we recorded a provision for probable future losses (premium deficiency reserve) for the 2016 coverage year of $176 million in benefits payable in our consolidated balance sheet with a corresponding increase in benefits expense in our consolidated statement of income. The premium deficiency reserve includes the estimated benefit of approximately $340 million associated with risk corridor provisions expected for the 2016 coverage year.

On June 30, 2015 we received notification from CMS of risk adjustment and reinsurance settlement amounts for 2014. We revised our 2014 coverage year estimates to reflect actual amounts and also made a corresponding adjustment to our risk corridor estimate based on these results. The change in estimate for risk adjustment was substantially offset by the corresponding change in estimate for risk corridor, both of which are reflected as changes in premiums revenue in our consolidated statements of income. The change in estimate related to the 3Rs for the 2014 coverage year was a decline in the estimated net receivable of approximately $43 million for the year ended December 31, 2015. In addition, we revised our 3Rs estimates for the 2015 coverage year based on the data from CMS for 2014.

During the year ended December 31, 2015, we paid $186 million in risk adjustment charges and $1 million in risk corridor charges associated with the 2014 coverage year. We received payments of $521 million for reinsurance recoverables, $57 million for risk adjustment settlements, and $26 million for risk corridor settlements associated with the 2014 coverage year during the year ended December 31, 2015. We expect to collect the remaining risk adjustment receivable for the 2014 coverage year of approximately $4 million in 2016.

During 2015, we received our interim settlement associated with our risk corridor receivables for the 2014 coverage year. The interim settlement, representing only 12.6% of risk corridor receivables for the 2014 coverage year, was funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 risk corridor program. As discussed in Note 2, HHS provided guidance under the three year risk corridor program that future collections will first be applied to any shortfalls from previous coverage years before application

to current year obligations. Risk corridor payables to issuers are obligations of the United States Government under the Health Care Reform law which requires the Secretary of HHS to make full payments to issuers. In the event of a shortfall at the end of the three year program, HHS has asserted it will explore other sources of funding for risk corridor payments, subject to the availability of appropriations. Based on the notice from CMS and collections in the fourth quarter of 2015, we classified our remaining gross risk corridor receivables for both the 2014 and 2015 coverage years as long-term because settlement is expected to exceed 12 months at December 31, 2015.

The accompanying consolidated balance sheets include the following amounts associated with the 3Rs at December 31, 2015 and December 31, 2014. Amounts classified as long-term represent settlements that we expect to exceed 12 months at December 31, 2015.

	2015			2014		
	Risk Adjustment Settlement	Reinsurance Recoverables	Risk Corridor Settlement	Risk Adjustment Settlement	Reinsurance Recoverables	Risk Corridor Settlement
	(in millions)

Total net (liability) asset	$ (87)	$ 610	$ 459	$ 42	$ 586	$ 51

In 2015, we paid the federal government $867 million for the annual health insurance industry fee attributed to calendar year 2015, in accordance with the Health Care Reform Law. In 2014, we paid the federal government $562 million for the annual health insurance industry fee attributed to calendar year 2014. This fee is not deductible for tax purposes.

8. PROPERTY AND EQUIPMENT, NET

Property and equipment was comprised of the following at December 31, 2015 and 2014, excluding Concentra amounts classified as held-for-sale at December 31, 2014 for comparative purposes. Net property and equipment associated with Concentra and classified as held-for sale at December 31, 2014 was $191 million.

	2015	2014
	(in millions)	
Land	$ 20	$ 18
Buildings and leasehold improvements	633	602
Equipment	645	631
Computer software	1,424	1,656
	2,722	2,907
Accumulated depreciation	(1,338)	(1,679)
Property and equipment, net	$ 1,384	$ 1,228

Depreciation expense was $354 million in 2015, $328 million in 2014, and $309 million in 2013, including amortization expense for capitalized internally developed and purchased software of $220 million in 2015, $191 million in 2014, and $172 million in 2013.

9. GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amounts of goodwill for our reportable segments have been retrospectively adjusted as of January 1, 2014 to conform to the 2015 segment change discussed in Note 2. Changes in the carrying amount of goodwill for our reportable segments for the years ended December 31, 2015 and 2014 were as follows:

	Retail	Group	Healthcare Services	Total
		(in millions)		
Balance at January 1, 2014	$ 1,069	$ 385	$ 1,799	$ 3,253
Acquisitions	—	—	19	19
Dispositions	—	—	(40)	(40)
Subsequent payments/adjustments	—	—	(1)	(1)
Balance at December 31, 2014	1,069	385	1,777	3,231
Acquisitions	—	—	35	35
Dispositions	—	—	(1)	(1)
Balance at December 31, 2015	$ 1,069	$ 385	$ 1,811	$ 3,265

Healthcare Services segment goodwill of $480 million associated with the sale of Concentra was reclassified to assets held-for-sale as of January 1, 2014 for comparative purposes and excluded from the table above. This $480 million of goodwill was disposed of on June 1, 2015 with the completion of the sale of Concentra.

The following table presents details of our other intangible assets included in other long-term assets in the accompanying consolidated balance sheets at December 31, 2015 and 2014 and excludes Concentra amounts classified as held-for-sale as of December 31, 2014 for comparative purposes. Net other intangible assets associated with Concentra and classified as held-for-sale at December 31, 2014 were $132 million.

	Weighted Average Life	2015			2014		
		Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
				(in millions)			
Other intangible assets:							
Customer contracts/relationships	9.8 years	$ 566	$ 292	$ 274	$ 657	$ 326	$ 331
Trade names and technology	8.3 years	104	54	50	115	50	65
Provider contracts	14.6 years	51	24	27	52	21	31
Noncompetes and other	8.2 years	32	26	6	41	28	13
Total other intangible assets	9.8 years	$ 753	$ 396	$ 357	$ 865	$ 425	$ 440

Amortization expense for other intangible assets was approximately $93 million in 2015, $121 million in 2014, and $117 million in 2013. The following table presents our estimate of amortization expense for each of the five next succeeding fiscal years:

	(in millions)
For the years ending December 31,:	
2016	$ 78
2017	71
2018	62
2019	51
2020	47

10. BENEFITS PAYABLE

Activity in benefits payable, excluding military services, was as follows for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013
		(in millions)	
Balances at January 1	$ 4,475	$ 3,893	$ 3,775
Less: Reinsurance recoverables	(78)	—	—
Balances at January 1, net	4,397	3,893	3,775
Acquisitions	—	—	5
Incurred related to:			
Current year	44,397	38,641	32,711
Prior years	(236)	(518)	(474)
Total incurred	44,161	38,123	32,237
Paid related to:			
Current year	(39,802)	(34,357)	(29,103)
Prior years	(4,041)	(3,262)	(3,021)
Total paid	(43,843)	(37,619)	(32,124)
Premium deficiency reserve	176	—	—
Reinsurance recoverable	85	78	—
Balances at December 31	$ 4,976	$ 4,475	$ 3,893

Amounts incurred related to prior years vary from previously estimated liabilities as the claims ultimately are settled. Negative amounts reported for incurred related to prior years result from claims being ultimately settled for amounts less than originally estimated (favorable development).

Actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $236 million in 2015, $518 million in 2014, and $474 million in 2013. The favorable medical claims reserve development for 2015, 2014, and 2013 primarily reflects the consistent application of trend and completion factors estimated using an assumption of moderately adverse conditions. The decline in favorable prior period development in 2015 primarily was due to the impact of lower financial claim recoveries due in part to our gradual implementation during 2014 of inpatient authorization review prior to admission as opposed to post adjudication, as well as higher than expected flu associated claims from the fourth quarter of 2014 and continued volatility in claims associated with individual commercial medical products. The higher favorable prior period development during 2014 and 2013 resulted from increased membership, better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

Benefits expense excluded from the previous table was as follows for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013
		(in millions)	
Premium deficiency reserve for short-duration policies	$ 176	$ —	$ —
Military services	12	11	(27)
Future policy benefits	(80)	32	354
Total	$ 108	$ 43	$ 327

In the fourth quarter of 2015, we recognized a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year as discussed in more detail in Note 7.

Military services benefits expense for 2015 and 2014 reflect expenses associated with our contracts with the Veterans Administration. Military services benefits expense for 2013 reflects the beneficial effect of a favorable settlement of contract claims with the DoD partially offset by expenses associated with our contracts with the Veterans Administration.

The decrease in benefits expense associated with future policy benefits payable in 2015 primarily reflects the release of reserves as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law. The higher benefits expense associated with future policy benefits payable during 2013 relates to reserve strengthening for our closed block of long-term care insurance policies acquired in connection with the 2007 KMG America Corporation, or KMG, acquisition more fully described in Note 18.

11. INCOME TAXES

The provision for income taxes consisted of the following for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013
		(in millions)	
Current provision:			
Federal	$ 1,067	$ 1,006	$ 595
States and Puerto Rico	90	81	53
Total current provision	1,157	1,087	648
Deferred (benefit) provision	(2)	(64)	42
Provision for income taxes	$ 1,155	$ 1,023	$ 690

The provision for income taxes was different from the amount computed using the federal statutory rate for the years ended December 31, 2015, 2014 and 2013 due to the following:

	2015	2014	2013
		(in millions)	
Income tax provision at federal statutory rate	$ 851	$ 759	$ 672
States, net of federal benefit, and Puerto Rico	44	48	32
Tax exempt investment income	(24)	(27)	(26)
Health insurer fee	314	204	—
Nondeductible executive compensation	18	22	6
Concentra sale	(67)	—	—
Other, net	19	17	6
Provision for income taxes	$ 1,155	$ 1,023	$ 690

The provision for income taxes for 2015, 2014, and 2013 reflects an $18 million, $22 million, and $6 million, respectively, estimated impact from limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law. As of December 31, 2015, we do not have material uncertain tax positions reflected in our consolidated balance sheet.

Deferred income tax balances reflect the impact of temporary differences between the tax bases of assets or liabilities and their reported amounts in our consolidated financial statements, and are stated at enacted tax rates expected to be in effect when the reported amounts are actually recovered or settled. Principal components of our net deferred tax balances at December 31, 2015 and 2014 were as follows, excluding Concentra amounts classified as held-for-sale at December 31, 2014 for comparative purposes. The net deferred tax liability associated with Concentra and classified as held-for sale at December 31, 2014 was $55 million.

	Assets (Liabilities)	
	2015	2014
	(in millions)	
Future policy benefits payable	$ 200	$ 320
Compensation and other accrued expenses	130	168
Benefits payable	267	138
Net operating loss carryforward	47	52
Deferred acquisition costs	64	57
Unearned revenues	22	21
Other	13	17
Total deferred income tax assets	743	773
Valuation allowance	(42)	(48)
Total deferred income tax assets, net of valuation allowance	701	725
Depreciable property and intangible assets	(363)	(346)
Investment securities	(37)	(168)
Prepaid expenses	(45)	(55)
Total deferred income tax liabilities	(445)	(569)
Total net deferred income tax assets	$ 256	$ 156
Amounts recognized in the consolidated balance sheets:		
Other current assets	$ —	$ 79
Other long-term assets	256	77
Total net deferred income tax assets	$ 256	$ 156

In November 2015, the FASB issued new guidance related to accounting for income taxes which changes the balance sheet classification of deferred taxes, requiring deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. We elected to early adopt the guidance and have classified all deferred tax liabilities and assets as noncurrent in our consolidated balance sheet at December 31, 2015 to simplify their presentation. Prior periods were not retrospectively adjusted. If we had retrospectively adjusted our consolidated balance sheet, our other current assets would have declined by $79 million and, similarly, our other long-term assets would have increased by $79 million at December 31, 2014.

At December 31, 2015, we had approximately $126 million of net operating losses to carry forward related to prior acquisitions and our Puerto Rico subsidiaries. These net operating loss carryforwards, if not used to offset future taxable income, will expire from 2016 through 2033. Due to limitations and uncertainty regarding our ability to use some of the carryforwards, a valuation allowance was established on $105 million of these net operating loss carryforwards and $7 million of other items related to Puerto Rico. For the remainder of the net operating loss carryforwards and other cumulative temporary differences, based on our historical record of producing taxable income and profitability, we have concluded that future operating income will be sufficient to give rise to tax expense to recover all deferred tax assets.

We provide for income taxes on the undistributed earnings of our Puerto Rico operations using that jurisdiction's tax rate, which has been lower historically than the U.S. statutory tax rate. Permanent investment of these earnings has resulted in cumulative unrecognized deferred tax liabilities of approximately $30 million as of December 31, 2015.

We file income tax returns in the United States and certain foreign jurisdictions. The U.S. Internal Revenue Service, or IRS, has completed its examinations of our consolidated income tax returns for 2013 and prior years. Our 2014 tax return is in the post-filing review period under the Compliance Assurance Process (CAP). Our 2015 tax return is under advance review by the IRS under CAP. With few exceptions, which are immaterial in the aggregate, we no longer are subject to state, local and foreign tax examinations for years before 2012. As of December 31, 2015, we are not aware of any material adjustments that may be proposed.

12. DEBT

The carrying value of long-term debt outstanding was as follows at December 31, 2015 and 2014:

	2015	2014
	(in millions)	
Long-term debt:		
Senior notes:		
$500 million, 7.20% due June 15, 2018	$ 503	$ 504
$300 million, 6.30% due August 1, 2018	309	312
$400 million, 2.625% due October 1, 2019	400	400
$600 million, 3.15% due December 1, 2022	598	598
$600 million, 3.85% due October 1, 2024	599	599
$250 million, 8.15% due June 15, 2038	266	266
$400 million, 4.625% due December 1, 2042	400	400
$750 million, 4.95% due October 1, 2044	746	746
Total long-term debt	$ 3,821	$ 3,825

Senior Notes

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem the $500 million 6.45% senior unsecured notes as discussed below.

In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date, for cash totaling approximately $560 million. We recognized a loss on extinguishment of debt of approximately $37 million in October 2014 for the redemption of these notes.

Our senior notes, which are unsecured, may be redeemed at our option at any time at 100% of the principal amount plus accrued interest and a specified make-whole amount. The 7.20% and 8.15% senior notes are subject to an interest rate adjustment if the debt ratings assigned to the notes are downgraded (or subsequently upgraded). In addition, our senior notes (other than the 6.30% senior notes) contain a change of control provision that may require us to purchase the notes under certain circumstances. On July 2, 2015 we entered into a Merger Agreement with Aetna that, when closed, may require redemption of the notes if the notes are downgraded below investment grade by both Standard & Poor's Rating Services, or S&P and Moody's Investors Services, Inc., or Moody's.

Prior to 2009, we were parties to interest-rate swap agreements that exchanged the fixed interest rate under our senior notes for a variable interest rate based on LIBOR. As a result, the carrying value of the senior notes was adjusted to reflect changes in value caused by an increase or decrease in interest rates. During 2008, we terminated all of our swap agreements. The cumulative adjustment to the carrying value of our senior notes was $103 million as of the termination date which is being amortized as a reduction to interest expense over the remaining term of the senior notes. In October 2014, the redemption of our 6.45% senior notes reduced the unamortized carrying value adjustment by $12 million. The unamortized carrying value adjustment was $28 million as of December 31, 2015 and $32 million as of December 31, 2014.

Credit Agreement

Our 5-year $1.0 billion unsecured revolving credit agreement expires July 2018. Under the credit agreement, at our option, we can borrow on either a competitive advance basis or a revolving credit basis. The revolving credit portion bears interest at either LIBOR plus a spread or the base rate plus a spread. The LIBOR spread, currently 110 basis points, varies depending on our credit ratings ranging from 90 to 150 basis points. We also pay an annual facility fee regardless of utilization. This facility fee, currently 15 basis points, may fluctuate between 10 and 25 basis points, depending upon our credit ratings. The competitive advance portion of any borrowings will bear interest at market rates prevailing at the time of borrowing on either a fixed rate or a floating rate based on LIBOR, at our option.

The terms of the credit agreement include standard provisions related to conditions of borrowing, including a customary material adverse effect clause which could limit our ability to borrow additional funds. In addition, the credit agreement contains customary restrictive and financial covenants as well as customary events of default, including financial covenants regarding the maintenance of a minimum level of net worth of $8.5 billion at December 31, 2015 and a maximum leverage ratio of 3.0:1. We are in compliance with the financial covenants, with actual net worth of $10.3 billion and an actual leverage ratio of 1.3:1, as measured in accordance with the credit agreement as of December 31, 2015. In addition, the credit agreement includes an uncommitted $250 million incremental loan facility.

At December 31, 2015, we had no borrowings outstanding under the credit agreement and we had outstanding letters of credit of $1 million secured under the credit agreement. No amounts have been drawn on these letters of credit. Accordingly, as of December 31, 2015, we had $999 million of remaining borrowing capacity under the credit agreement, none of which would be restricted by our financial covenant compliance requirement. We have other customary, arms-length relationships, including financial advisory and banking, with some parties to the credit agreement.

Commercial Paper

In October 2014, we entered into a commercial paper program pursuant to which we may issue short-term, unsecured commercial paper notes privately placed on a discount basis through certain broker dealers. Amounts available under the program may be borrowed, repaid and re-borrowed from time to time, with the aggregate face or principal amount outstanding under the program at any time not to exceed $1 billion. The net proceeds of issuances have been and are expected to be used for general corporate purposes. The maximum principal amount outstanding at any one time during

the year ended December 31, 2015 was $414 million, with $299 million outstanding at December 31, 2015. There were no outstanding borrowings at December 31, 2014.

13. EMPLOYEE BENEFIT PLANS

Employee Savings Plan

We have defined contribution retirement savings plans covering eligible employees which include matching contributions based on the amount of our employees' contributions to the plans. The cost of these plans amounted to approximately $188 million in 2015, $176 million in 2014, and $155 million in 2013. The Company's cash match is invested pursuant to the participant's contribution direction. Based on the closing price of our common stock of $178.51 on December 31, 2015, approximately 13% of the retirement and savings plan's assets were invested in our common stock, or approximately 2.5 million shares, representing 2% of the shares outstanding as of December 31, 2015. At December 31, 2015, approximately 3.4 million shares of our common stock were reserved for issuance under our defined contribution retirement savings plans.

Stock-Based Compensation

We have plans under which options to purchase our common stock and restricted stock units have been granted to executive officers, directors and key employees. For awards granted prior to July 2, 2015, our equity award agreements generally contain provisions whereby the awards automatically accelerate and vest upon change in control, including those granted to retirement-eligible participants described below. The Merger discussed in Note 2 qualifies as a change in control event under our equity award agreements. Awards granted on or after July 2, 2015 would generally require both a change in control and termination of employment within 2 years of the date of the change in control to accelerate the vesting, including those granted to retirement-eligible participants.

The terms and vesting schedules for stock-based awards vary by type of grant. Generally, the awards vest upon time-based conditions. We have also granted awards to certain employees that vest upon a combination of time and performance-based conditions. The stock awards of retirement-eligible participants granted prior to July 2, 2015 generally will continue to fully vest on the originally scheduled vest date upon retirement from the Company. For stock awards of retirement-eligible employees granted on or after July 2, 2015, awards are generally earned ratably over the service period for each tranche. Accordingly, upon retirement the earned portion of the current tranche will continue to vest on the originally scheduled vest date and any remaining unearned portion of the award will be forfeited. Our equity award program includes a retirement provision that generally treats employees with a combination of age and years of services with the Company totaling 65 or greater, with a minimum required age of 55 and a minimum requirement of 5 years of service, as retirement-eligible. Upon exercise, stock-based compensation awards are settled with authorized but unissued company stock or treasury stock.

The compensation expense that has been charged against income for these plans was as follows for the years ended December 31, 2015, 2014, and 2013:

	2015	2014	2013
		(in millions)	
Stock-based compensation expense by type:			
Restricted stock	$ 99	$ 91	$ 84
Stock options	10	7	8
Total stock-based compensation expense	109	98	92
Tax benefit recognized	(26)	(22)	(22)
Stock-based compensation expense, net of tax	$ 83	$ 76	$ 70

The tax benefit recognized in our consolidated financial statements is based on the amount of compensation expense recorded for book purposes, subject to limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law. The actual tax benefit realized in our tax return is based

on the intrinsic value, or the excess of the market value over the exercise or purchase price, of stock options exercised and restricted stock vested during the period, subject to limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law. The actual tax benefit realized for the deductions taken on our tax returns from option exercises and restricted stock vesting totaled $34 million in 2015, $30 million in 2014, and $20 million in 2013. There was no capitalized stock-based compensation expense during these years.

At December 31, 2015, there were 18.1 million shares reserved for stock award plans. These reserved shares included giving effect to, under the 2011 Plan, 8.7 million shares of common stock available for future grants assuming all stock options were granted or 3.8 million shares available for future grants assuming all restricted stock were granted. Shares may be issued from authorized but unissued company stock or treasury stock.

Restricted Stock

Restricted stock is granted with a fair value equal to the market price of our common stock on the date of grant and generally vests three years from the date of grant. Restricted stock granted on or after July 2, 2015, generally vests in equal annual tranches over a three year period from the date of grant. Certain of our restricted stock units also include performance-based conditions generally associated with strategic membership growth and return on invested capital. Restricted stock units have forfeitable dividend equivalent rights equal to the dividend paid on common stock. The weighted-average grant date fair value of our restricted stock was $165.26 in 2015, $103.57 in 2014, and $73.50 in 2013. Activity for our restricted stock was as follows for the year ended December 31, 2015:

	Shares	Weighted-Average Grant-Date Fair Value
	(shares in thousands)	
Nonvested restricted stock at December 31, 2014	3,635	$ 85.52
Granted	837	165.26
Vested	(919)	84.95
Forfeited	(188)	98.92
Nonvested restricted stock at December 31, 2015	3,365	$ 104.58

Approximately 30% of the nonvested restricted stock at December 31, 2015 included performance-based conditions.

The fair value of shares vested was $153 million during 2015, $99 million during 2014, and $52 million during 2013. Total compensation expense not yet recognized related to nonvested restricted stock was $88 million at December 31, 2015. We expect to recognize this compensation expense over a weighted-average period of approximately 1.4 years. There are no other contractual terms covering restricted stock once vested.

Stock Options

Stock options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant. Our stock plans, as approved by the Board of Directors and stockholders, define fair market value as the average of the highest and lowest stock prices reported on the composite tape by the New York Stock Exchange on a given date. Exercise provisions vary, but most options vest in whole or in part 1 to 3 years after grant and expire 7 years after grant.

The weighted-average fair value of each option granted during 2015, 2014, and 2013 is provided below. The fair value was estimated on the date of grant using the Black-Scholes pricing model with the weighted-average assumptions indicated below:

	2015	2014	2013
Weighted-average fair value at grant date	$ 36.91	$ 22.45	$ 21.80
Expected option life (years)	4.2 years	4.3 years	4.4 years
Expected volatility	27.4%	27.6%	38.8%
Risk-free interest rate at grant date	1.4%	1.3%	0.8%
Dividend yield	0.7%	1.1%	1.5%

When valuing employee stock options, we stratify the employee population into three homogenous groups that historically have exhibited similar exercise behaviors. These groups are executive officers, directors, and all other employees. We value the stock options based on the unique assumptions for each of these employee groups.

We calculate the expected term for our employee stock options based on historical employee exercise behavior and base the risk-free interest rate on a traded zero-coupon U.S. Treasury bond with a term substantially equal to the option's expected term.

The volatility used to value employee stock options is based on historical volatility. We calculate historical volatility using a simple-average calculation methodology based on daily price intervals as measured over the expected term of the option.

Activity for our option plans was as follows for the year ended December 31, 2015:

	Shares Under Option	Weighted-Average Exercise Price
	(shares in thousands)	
Options outstanding at December 31, 2014	768	$ 82.45
Granted	377	164.80
Exercised	(304)	76.25
Forfeited	(6)	83.58
Options outstanding at December 31, 2015	835	$ 121.89
Options exercisable at December 31, 2015	203	$ 78.30

As of December 31, 2015, outstanding stock options, substantially all of which are expected to vest, had an aggregate intrinsic value of $48 million, and a weighted-average remaining contractual term of 5.0 years. As of December 31, 2015, exercisable stock options had an aggregate intrinsic value of $20 million, and a weighted-average remaining contractual term of 3.5 years. The total intrinsic value of stock options exercised during 2015 was $28 million, compared with $32 million during 2014 and $39 million during 2013. Cash received from stock option exercises totaled $23 million in 2015, $52 million in 2014, and $67 million in 2013.

Total compensation expense not yet recognized related to nonvested options was $10 million at December 31, 2015. We expect to recognize this compensation expense over a weighted-average period of approximately 1.9 years.

14. EARNINGS PER COMMON SHARE COMPUTATION

Detail supporting the computation of basic and diluted earnings per common share was as follows for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013
	(dollars in millions, except per common share results, number of shares/options in thousands)		
Net income available for common stockholders	$ 1,276	$ 1,147	$ 1,231
Weighted-average outstanding shares of common stock used to compute basic earnings per common share	149,455	154,187	157,503
Dilutive effect of:			
Employee stock options	192	230	322
Restricted stock	1,495	1,457	1,326
Shares used to compute diluted earnings per common share	151,142	155,874	159,151
Basic earnings per common share	$ 8.54	$ 7.44	$ 7.81
Diluted earnings per common share	$ 8.44	$ 7.36	$ 7.73
Number of antidilutive stock options and restricted stock awards excluded from computation	415	320	704

15. STOCKHOLDERS' EQUITY

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2013, 2014, and 2015 under our Board approved quarterly cash dividend policy:

Payment Date	Amount per Share	Total Amount
		(in millions)
2013	$1.06	$167
2014	$1.10	$170
2015	$1.14	$170

The Merger Agreement discussed in Note 2 does not impact our ability and intent to continue quarterly dividend payments prior to the closing of the Merger consistent with our historical dividend payments. Under the terms of the Merger Agreement, we have agreed with Aetna that our quarterly dividend will not exceed $0.29 per share prior to the closing of the Merger. Declaration and payment of future quarterly dividends is at the discretion of our Board and may be adjusted as business needs or market conditions change. In addition, under the terms of the Merger Agreement, we have agreed with Aetna to coordinate the declaration and payment of dividends so that our stockholders do not fail to receive a quarterly dividend around the time of the closing of the Merger.

On October 29, 2015, the Board declared a cash dividend of $0.29 per share that was paid on January 29, 2016 to stockholders of record on December 30, 2015, for an aggregate amount of $43 million.

Stock Repurchases

In September 2014, our Board of Directors replaced a previous share repurchase authorization of up to $1 billion (of which $816 million remained unused) with a new current authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2016. Under the share repurchase authorization, shares may be purchased from time to time at prevailing prices in the

open market, by block purchases, through plans designed to comply with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended, or in privately-negotiated transactions (including pursuant to accelerated share repurchase agreements with investment banks), subject to certain regulatory restrictions on volume, pricing, and timing. Pursuant to the Merger Agreement, after July 2, 2015, we are prohibited from repurchasing any of our outstanding securities without the prior written consent of Aetna, other than repurchases of shares of our common stock in connection with the exercise of outstanding stock options or the vesting or settlement of outstanding restricted stock awards. Accordingly, as announced on July 3, 2015, we have suspended our share repurchase program. Our remaining repurchase authorization was $1.04 billion as of July 3, 2015.

Excluding shares acquired in connection with employee stock plans as well as 0.36 million shares received in March 2015 upon final settlement of our accelerated share repurchase agreement, or ASR Agreement, described below for which no cash was paid during the period, share repurchases were as follows during the years ended December 31, 2015, 2014 and 2013:

		Year Ended December 31,					
		2015		2014		2013	
Authorization Date	Purchase Not to Exceed	Shares	Cost	Shares	Cost	Shares	Cost
		(in millions)					
September 2014	$ 2,000	1.85	$ 329	4.10	$ 635 (a)	—	$ —
April 2014	1,000	—	—	1.50	184	—	—
April 2013	1,000	—	—	0.10	11	4.55	420
April 2012	1,000	—	—	—	—	1.22	82
Total repurchases		1.85	$ 329	5.70	$ 830	5.77	$ 502

(a) Includes $100 million held back by Goldman Sachs pending final settlement of the ASR Agreement in March 2015 at which time we received an additional 0.36 million shares which are excluded from the table above.

On November 7, 2014, we announced that we had entered into an accelerated share repurchase agreement, or ASR Agreement, with Goldman, Sachs & Co., or Goldman Sachs, to repurchase $500 million of our common stock as part of the $2 billion share repurchase program authorized in September 2014. Under the ASR Agreement, on November 10, 2014, we made a payment of $500 million to Goldman Sachs from available cash on hand and received an initial delivery of 3.06 million shares of our common stock from Goldman Sachs based on the then current market price of Humana common stock. The payment to Goldman Sachs was recorded as a reduction to stockholders' equity, consisting of a $400 million increase in treasury stock, which reflected the value of the initial 3.06 million shares received upon initial settlement, and a $100 million decrease in capital in excess of par value, which reflected the value of stock held back by Goldman Sachs pending final settlement of the ASR Agreement. Upon settlement of the ASR on March 13, 2015, we received an additional 0.36 million shares as determined by the average daily volume weighted-average share price of our common stock during the term of the ASR Agreement of $146.21, bringing the total shares received under this program to 3.42 million. In addition, upon settlement we reclassified the $100 million value of stock initially held back by Goldman Sachs from capital in excess of par value to treasury stock.

In connection with employee stock plans, we acquired 0.3 million common shares for $56 million in 2015, 0.4 million common shares for $42 million in 2014, and 0.3 million common shares for $29 million in 2013.

Regulatory Requirements

Certain of our subsidiaries operate in states that regulate the payment of dividends, loans, or other cash transfers to Humana Inc., our parent company, and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required.

Although minimum required levels of equity are largely based on premium volume, product mix, and the quality of assets held, minimum requirements vary significantly at the state level. Our state regulated insurances subsidiaries had aggregate statutory capital and surplus of approximately $6.6 billion and $6.0 billion as of December 31, 2015 and 2014, respectively, which exceeded aggregate minimum regulatory requirements of $4.6 billion and $4.1 billion, respectively. Subsidiary dividends are subject to state regulatory approval, the amount and timing of which could be reduced or delayed. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2016 is approximately $900 million in the aggregate. This compares to dividends that were paid to our parent company in 2015 of approximately $493 million. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

16. COMMITMENTS, GUARANTEES AND CONTINGENCIES

Leases

We lease facilities, computer hardware, and other furniture and equipment under long-term operating leases that are noncancelable and expire on various dates through 2026. We sublease facilities or partial facilities to third party tenants for space not used in our operations. Rent with scheduled escalation terms are accounted for on a straight-line basis over the lease term. Rent expense and sublease rental income, which are recorded net as an operating cost, for all operating leases were as follows for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013
		(in millions)	
Rent expense	$ 201	$ 226	$ 227
Sublease rental income	(25)	(14)	(11)
Net rent expense	$ 176	$ 212	$ 216

Future annual minimum payments due subsequent to December 31, 2015 under all of our noncancelable operating leases with initial terms in excess of one year are as follows:

	Minimum Lease Payments	Sublease Rental Receipts	Net Lease Commitments
		(in millions)	
For the years ending December 31,:			
2016	$ 173	$ (16)	$ 157
2017	159	(16)	143
2018	127	(14)	113
2019	94	(11)	83
2020	54	(7)	47
Thereafter	90	(45)	45
Total	$ 697	$ (109)	$ 588

Purchase Obligations

We have agreements to purchase services, primarily information technology related services, or to make improvements to real estate, in each case that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum levels of service to be purchased; fixed, minimum or variable price provisions; and the appropriate timing of the transaction. We have purchase obligation commitments of $74 million in 2016, $44 million in 2017, $30 million in 2018, $1 million in 2019, and $1 million thereafter. Purchase obligations exclude agreements that are cancelable without penalty.

Off-Balance Sheet Arrangements

As part of our ongoing business, we do not participate or knowingly seek to participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, or SPEs, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of December 31, 2015, we were not involved in any SPE transactions.

Guarantees and Indemnifications

Through indemnity agreements approved by the state regulatory authorities, certain of our regulated subsidiaries generally are guaranteed by Humana Inc., our parent company, in the event of insolvency for (1) member coverage for which premium payment has been made prior to insolvency; (2) benefits for members then hospitalized until discharged; and (3) payment to providers for services rendered prior to insolvency. Our parent also has guaranteed the obligations of our military services subsidiaries.

In the ordinary course of business, we enter into contractual arrangements under which we may agree to indemnify a third party to such arrangement from any losses incurred relating to the services they perform on behalf of us, or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. Such indemnification obligations may not be subject to maximum loss clauses. Historically, payments made related to these indemnifications have been immaterial.

Government Contracts

Our Medicare products, which accounted for approximately 72% of our total premiums and services revenue for the year ended December 31, 2015, primarily consisted of products covered under the Medicare Advantage and Medicare Part D Prescription Drug Plan contracts with the federal government. These contracts are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare products have been renewed for 2016, and all of our product offerings filed with CMS for 2016 have been approved.

CMS uses a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity of covered members. The risk-adjustment model pays more for enrollees with predictably higher costs. Under this model, rates paid to MA plans are based on actuarially determined bids, which include a process whereby our prospective payments are based on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's traditional fee-for-service Medicare program (referred to as "Medicare FFS"). Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses the diagnosis data to calculate the risk-adjusted premium payment to MA plans, which CMS adjusts for coding pattern differences between the health plans and the government fee-for-service program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on these providers to document appropriately all medical data, including the diagnosis data submitted with claims. In addition, we conduct medical record reviews as part of our data

and payment accuracy compliance efforts, to more accurately reflect diagnosis conditions under the risk adjustment model. These compliance efforts include the internal contract level audits described in more detail below.

CMS is continuing to perform audits of various companies' selected MA contracts related to this risk adjustment diagnosis data. We refer to these audits as Risk-Adjustment Data Validation Audits, or RADV audits. RADV audits review medical records in an attempt to validate provider medical record documentation and coding practices which influence the calculation of premium payments to MA plans.

In 2012, CMS released a "Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation (RADV) Contract-Level Audits." The payment error calculation methodology provides that, in calculating the economic impact of audit results for an MA contract, if any, the results of the audit sample will be extrapolated to the entire MA contract based upon a comparison to "benchmark" audit data in Medicare FFS (which we refer to as the "FFS Adjuster"). This comparison to the FFS Adjuster is necessary to determine the economic impact, if any, of audit results because the government program data set, including any attendant errors that are present in that data set, provides the basis for MA plans' risk adjustment to payment rates. CMS already makes other adjustments to payment rates based on a comparison of coding pattern differences between MA plans and Medicare FFS data (such as for frequency of coding for certain diagnoses in MA plan data versus the government program data set).

The final methodology, including the first application of extrapolated audit results to determine audit settlements, is expected to be applied to RADV contract level audits currently being conducted for contract year 2011 in which two of our Medicare Advantage plans are being audited. Per CMS guidance, selected MA contracts will be notified of an audit at some point after the close of the final reconciliation for the payment year being audited. The final reconciliation occurs in August of the calendar year following the payment year. We were notified on September 15, 2015, that five of our Medicare Advantage contracts have been selected for audit for contract year 2012.

Estimated audit settlements are recorded as a reduction of premiums revenue in our consolidated statements of income, based upon available information. We perform internal contract level audits based on the RADV audit methodology prescribed by CMS. Included in these internal contract level audits is an audit of our Private Fee-For-Service business which we used to represent a proxy of the FFS Adjuster which has not yet been released. We based our accrual of estimated audit settlements for each contract year on the results of these internal contract level audits and update our estimates as each audit is completed. Estimates derived from these results were not material to our results of operations, financial position, or cash flows. However, as indicated, we are awaiting additional guidance from CMS regarding the FFS Adjuster. Accordingly, we cannot determine whether such RADV audits will have a material adverse effect on our results of operations, financial position, or cash flows.

In addition, CMS' comments in formalized guidance regarding "overpayments" to MA plans appear to be inconsistent with CMS' prior RADV audit guidance. These statements, contained in the preamble to CMS' final rule release regarding Medicare Advantage and Part D prescription drug benefit program regulations for Contract Year 2015, appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the FFS Adjuster referenced above. We will continue to work with CMS to ensure that MA plans are paid accurately and that payment model principles are in accordance with the requirements of the Social Security Act, which, if not implemented correctly could have a material adverse effect on our results of operations, financial position, or cash flows.

At December 31, 2015, our military services business, which accounted for approximately 1% of our total premiums and services revenue for the year ended December 31, 2015, primarily consisted of the TRICARE South Region contract. The current 5-year South Region contract, which expires March 31, 2017, is subject to annual renewals on April 1 of each year during its term at the government's option. On January 22, 2016, we received notice from the Defense Health Agency, or DHA, of its intent to exercise its option to extend the TRICARE South Region contract through March 31, 2017. On April 24, 2015, a request for proposal was issued for the next generation of TRICARE contracts for the period beginning April 1, 2017. The request for proposal provides for the consolidation of three regions into two - East and West. The current North Region and South Region are to be combined to form the East Region. We responded to the request for proposal on July 22, 2015. On January 15, 2016, we received a request for Final Proposal Revisions that we responded to on February 16, 2016.

Our state-based Medicaid business accounted for approximately 4% of our total premiums and services revenue for the year ended December 31, 2015. In addition to our state-based Temporary Assistance for Needy Families, or TANF, Medicaid contracts in Florida and Kentucky, we have contracts in Illinois and Virginia for stand-alone dual eligible demonstration programs serving individuals dually eligible for both the federal Medicare program and the applicable state-based Medicaid program as well as an Integrated Care Program, or ICP, Medicaid contract in Illinois. We began serving members in Illinois in the first quarter of 2014 and in Virginia in the second quarter of 2014. In addition, we began serving members in Long-Term Support Services (LTSS) regions in Florida at various effective dates ranging from the second half of 2013 through the first quarter of 2014.

The loss of any of the contracts above or significant changes in these programs as a result of legislative or regulatory action, including reductions in premium payments to us, regulatory restrictions on profitability, including by comparison of our Medicare Advantage profitability to our non-Medicare Advantage business profitability and a requirement that they remain within certain ranges of each other, or increases in member benefits without corresponding increases in premium payments to us, may have a material adverse effect on our results of operations, financial position, and cash flows.

Legal Proceedings and Certain Regulatory Matters

Florida Matters

On January 6, 2012, the Civil Division of the United States Attorney's Office for the Southern District of Florida advised us that it is seeking documents and information from us and several of our affiliates relating to several matters including the coding of medical claims by one or more South Florida medical providers, and loans to physician practices. On May 1, 2014, the U.S. Attorney's Office filed a Notice of Non-Intervention in connection with a civil qui tam suit related to one of these matters captioned *United States of America ex rel. Olivia Graves v. Plaza Medical Centers, et al.*, and the Court ordered the complaint unsealed. Subsequently, the individual plaintiff amended the complaint and served the Company, opting to continue to pursue the action. The individual plaintiff has filed a third amended complaint which we answered on October 16, 2015. The Court has ordered trial to commence on October 3, 2016 if the matter is not resolved prior to trial. We continue to cooperate with and respond to information requests from the U.S. Attorney's office. These matters could result in additional qui tam litigation.

As previously disclosed, the Civil Division of the United States Department of Justice had provided us with an information request, separate from but related to the Plaza Medical matter, concerning our Medicare Part C risk adjustment practices. The request relates to our oversight and submission of risk adjustment data generated by providers in our Medicare Advantage network, including the providers identified in the Plaza Medical matter, as well as to our business and compliance practices related to risk adjustment data generated by our providers and by us, including medical record reviews conducted as part of our data and payment accuracy compliance efforts, the use of health and well-being assessments, and our fraud detection efforts. We believe that this request for information is in connection with a wider review of Medicare Risk Adjustment generally that includes a number of Medicare Advantage plans, providers and vendors. We continue to cooperate with and voluntarily respond to the information requests from the Department of Justice and the U.S. Attorney's Office. These matters are expected to result in additional qui tam litigation.

On June 16, 2015, the U.S. Attorney's Office filed a Declination Notice, indicating its intent not to intervene, in connection with a civil qui tam suit captioned *U.S. ex rel. Ramsey-Ledesma v. Censeo, et al.*, and the Court ordered the complaint unsealed. Subsequently, the individual plaintiff filed a second amended complaint and served the Company, opting to continue to pursue the action. The plaintiff's second amended complaint names several other defendants, including CenseoHealth. On January 8, 2016, we and the other defendants each filed a motion to dismiss the second amended complaint.

Litigation Related to the Merger

In connection with the Merger, three putative class action complaints were filed by purported Humana stockholders challenging the Merger, two in the Circuit Court of Jefferson County, Kentucky and one in the Court of Chancery of the State of Delaware. The complaints are captioned Solak v. Broussard et al., Civ. Act. No. 15CI03374 (Kentucky

state court), Litwin v. Broussard et al., Civ. Act. No. 15CI04054 (Kentucky state court) and Scott v. Humana Inc. et al., C.A. No. 11323-VCL (Delaware state court). The complaints name as defendants each member of Humana's board of directors, Aetna, and, in the case of the Delaware complaint, Humana. The complaints generally allege, among other things, that the individual members of our board of directors breached their fiduciary duties owed to our stockholders by entering into the Merger Agreement, approving the mergers as contemplated by the Merger Agreement, and failing to take steps to maximize the value of Humana to our stockholders, and that Aetna, and, in the case of the Delaware complaint, Humana aided and abetted such breaches of fiduciary duties. In addition, the complaints allege that the merger undervalues Humana, that the process leading up to the execution of the Merger Agreement was flawed, that the members of our board of directors improperly placed their own financial interests ahead of those of our stockholders, and that certain provisions of the Merger Agreement improperly favor Aetna and impede a potential alternative transaction. Among other remedies, the complaints seek equitable relief rescinding the Merger Agreement and enjoining the defendants from completing the mergers as well as costs and attorneys' fees. We refer to all these cases collectively in this report as the Merger Litigation. On August 20, 2015, the parties in the Kentucky state cases filed a stipulation and proposed order with the court to consolidate these cases into a single action captioned In re Humana Inc. Shareholder Litigation, Civ. Act. No. 15CI03374.

On October 9, 2015, solely to avoid the costs, risks, and uncertainties inherent in litigation, and without admitting any liability or wrongdoing, we and the other named defendants in the Merger Litigation signed a memorandum of understanding, which we refer to as the MOU, to settle the Merger Litigation. Subject to court approval and further definitive documentation in a stipulation of settlement that will be subject to customary conditions, the MOU resolved the claims brought in the Merger Litigation and provided that we would make certain additional disclosures related to the proposed mergers. The MOU further provided for, among other things, dismissal of the Merger Litigation with prejudice and a release and settlement by the purported class of our stockholders of all claims against the defendants and their affiliates and agents in connection with the Merger Agreement and transactions and disclosures related to the Merger Agreement. The asserted claims will not be released until such stipulation of settlement receives court approval. The foregoing terms and conditions will be defined by the stipulation of settlement, and class members will receive a separate notice describing the settlement terms and their rights in connection with the approval of the settlement. In connection with the settlement, the parties contemplate that plaintiffs' counsel will file a petition for an award of attorneys' fees and expenses. We will pay or cause to be paid any court awarded attorneys' fees and expenses. There can be no assurance that the parties will ultimately enter into a stipulation of settlement or that a court will approve such settlement even if the parties were to enter into such stipulation. In such event, the proposed settlement as contemplated by the MOU may be terminated. Because the MOU contemplates that the Kentucky court will be asked to approve the settlement, the plaintiffs have already withdrawn the Delaware case.

Other Lawsuits and Regulatory Matters

Our current and past business practices are subject to review or other investigations by various state insurance and health care regulatory authorities and other state and federal regulatory authorities. These authorities regularly scrutinize the business practices of health insurance, health care delivery and benefits companies. These reviews focus on numerous facets of our business, including claims payment practices, statutory capital requirements, provider contracting, risk adjustment, competitive practices, commission payments, privacy issues, utilization management practices, pharmacy benefits, access to care, and sales practices, among others. Some of these reviews have historically resulted in fines imposed on us and some have required changes to some of our practices. We continue to be subject to these reviews, which could result in additional fines or other sanctions being imposed on us or additional changes in some of our practices.

We also are involved in various other lawsuits that arise, for the most part, in the ordinary course of our business operations, certain of which may be styled as class-action lawsuits. Among other matters, this litigation may include employment matters, claims of medical malpractice, bad faith, nonacceptance or termination of providers, anticompetitive practices, improper rate setting, provider contract rate disputes, failure to disclose network discounts and various other provider arrangements, general contractual matters, intellectual property matters, and challenges to subrogation practices. For example, a number of hospitals and other providers have asserted that, under their network provider contracts, we are not entitled to reduce Medicare Advantage payments to these providers in connection with changes in Medicare payment systems and in accordance with the Balanced Budget and Emergency Deficit Control

Act of 1985, as amended (commonly referred to as "sequestration"). Those challenges have led and could lead to arbitration demands or other litigation. Also, under state guaranty assessment laws, including those related to state cooperative failures in the industry, we may be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of insolvent insurance companies that write the same line or lines of business as we do.

As a government contractor, we may also be subject to qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that the government contractor submitted false claims to the government including, among other allegations, those resulting from coding and review practices under the Medicare risk adjustment model. Qui tam litigation is filed under seal to allow the government an opportunity to investigate and to decide if it wishes to intervene and assume control of the litigation. If the government does not intervene, the lawsuit is unsealed, and the individual may continue to prosecute the action on his or her own, on behalf of the government. We also are subject to other allegations of non-performance of contractual obligations to providers, members, and others, including failure to properly pay claims, improper policy terminations, challenges to our implementation of the Medicare Part D prescription drug program and other litigation.

A limited number of the claims asserted against us are subject to insurance coverage. Personal injury claims, claims for extracontractual damages, care delivery malpractice, and claims arising from medical benefit denials are covered by insurance from our wholly owned captive insurance subsidiary and excess carriers, except to the extent that claimants seek punitive damages, which may not be covered by insurance in certain states in which insurance coverage for punitive damages is not permitted. In addition, insurance coverage for all or certain forms of liability has become increasingly costly and may become unavailable or prohibitively expensive in the future.

We record accruals for the contingencies discussed in the sections above to the extent that we conclude it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. No estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made at this time regarding the matters specifically described above because of the inherently unpredictable nature of legal proceedings, which also may be exacerbated by various factors, including: (i) the damages sought in the proceedings are unsubstantiated or indeterminate; (ii) discovery is not complete; (iii) the proceeding is in its early stages; (iv) the matters present legal uncertainties; (v) there are significant facts in dispute; (vi) there are a large number of parties (including where it is uncertain how liability, if any, will be shared among multiple defendants); or (vii) there is a wide range of potential outcomes.

The outcome of any current or future litigation or governmental or internal investigations, including the matters described above, cannot be accurately predicted, nor can we predict any resulting judgments, penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities or as a result of actions by third parties. Nevertheless, it is reasonably possible that any such outcome of litigation, judgments, penalties, fines or other sanctions could be substantial, and the outcome of these matters may have a material adverse effect on our results of operations, financial position, and cash flows, and may also affect our reputation.

17. SEGMENT INFORMATION

On January 1, 2015, we realigned certain of our businesses among our reportable segments to correspond with internal management reporting changes and renamed our Employer Group segment to the Group segment. Our three reportable segments remain Retail, Group, and Healthcare Services. The more significant realignments included reclassifying Medicare benefits offered to groups to the Retail segment from the Group segment, bringing all of our Medicare offerings, which are now managed collectively, together in one segment, recognizing that in some instances we market directly to individuals that are part of a group Medicare account. In addition, we realigned our military services business, primarily consisting of our TRICARE South Region contract previously included in the Other Businesses category, to our Group segment as we consider this contract with the government to be a group account. Prior period segment financial information has been recast to conform to the 2015 presentation.

We manage our business with three reportable segments: Retail, Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

The Retail segment consists of Medicare benefits, marketed to individuals or directly via group accounts, as well as individual commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and financial protection products. In addition, the Retail segment also includes our contract with CMS to administer the LI-NET prescription drug plan program and contracts with various states to provide Medicaid, dual eligible, and Long-Term Support Services benefits, collectively our state-based contracts. The Group segment consists of employer group commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and voluntary insurance benefits, as well as administrative services only, or ASO products. In addition, our Group segment includes our health and wellness products (primarily marketed to employer groups) and military services business, primarily our TRICARE South Region contract. The Healthcare Services segment includes services offered to our health plan members as well as to third parties, including pharmacy solutions, provider services, home based services, and clinical programs, as well as services and capabilities to advance population health. We will continue to report under the category of Other Businesses those businesses which do not align with the reportable segments described above, primarily our closed-block long-term care insurance policies.

Our Healthcare Services intersegment revenues primarily relate to managing prescription drug coverage for members of our other segments through Humana Pharmacy Solutions®, or HPS, and includes the operations of Humana Pharmacy, Inc., our mail order pharmacy business. These revenues consist of the prescription price (ingredient cost plus dispensing fee), including the portion to be settled with the member (co-share) or with the government (subsidies), plus any associated administrative fees. Services revenues related to the distribution of prescriptions by third party retail pharmacies in our networks are recognized when the claim is processed and product revenues from dispensing prescriptions from our mail order pharmacies are recorded when the prescription or product is shipped. Our pharmacy operations, which are responsible for designing pharmacy benefits, including defining member co-share responsibilities, determining formulary listings, contracting with retail pharmacies, confirming member eligibility, reviewing drug utilization, and processing claims, act as a principal in the arrangement on behalf of members in our other segments. As principal, our Healthcare Services segment reports revenues on a gross basis including co-share amounts from members collected by third party retail pharmacies at the point of service.

In addition, our Healthcare Services intersegment revenues include revenues earned by certain owned providers derived from risk-based and non risk-based managed care agreements with our health plans. Under risk based agreements, the provider receives a monthly capitated fee that varies depending on the demographics and health status of the member, for each member assigned to these owned providers by our health plans. The owned provider assumes the economic risk of funding the assigned members' healthcare services. Under non risk-based agreements, our health plans retain the economic risk of funding the assigned members' healthcare services. Our Healthcare Services segment reports provider services revenues associated with risk-based agreements on a gross basis, whereby capitation fee

revenue is recognized in the period in which the assigned members are entitled to receive healthcare services. Provider services revenues associated with non risk-based agreements are presented net of associated healthcare costs.

We present our consolidated results of operations from the perspective of the health plans. As a result, the cost of providing benefits to our members, whether provided via a third party provider or internally through a stand-alone subsidiary, is classified as benefits expense and excludes the portion of the cost for which the health plans do not bear responsibility, including member co-share amounts and government subsidies of $12.3 billion in 2015, $9.7 billion in 2014, and $7.3 billion in 2013. In addition, depreciation and amortization expense associated with certain businesses in our Healthcare Services segment delivering benefits to our members, primarily associated with our provider services and pharmacy operations, are included with benefits expense. The amount of this expense was $92 million in 2015, $116 million in 2014, and $93 million in 2013.

Other than those described previously, the accounting policies of each segment are the same and are described in Note 2. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and home based services as well as clinical programs, to our Retail and Group customers. Intersegment sales and expenses are recorded at fair value and eliminated in consolidation. Members served by our segments often use the same provider networks, enabling us in some instances to obtain more favorable contract terms with providers. Our segments also share indirect costs and assets. As a result, the profitability of each segment is interdependent. We allocate most operating expenses to our segments. Assets and certain corporate income and expenses are not allocated to the segments, including the portion of investment income not supporting segment operations, interest expense on corporate debt, and certain other corporate expenses. These items are managed at a corporate level. These corporate amounts are reported separately from our reportable segments and are included with intersegment eliminations in the tables presenting segment results below.

Our segment results were as follows for the years ended December 31, 2015, 2014, and 2013:

	Retail	Group	Healthcare Services	Other Businesses	Eliminations/ Corporate	Consolidated
			(in millions)			
2015

Benefits expense for Other Businesses for 2013 includes $243 million for reserve strengthening associated with our closed block of long-term care insurance policies as discussed more fully in Note 18.

18. EXPENSES ASSOCIATED WITH LONG-DURATION INSURANCE PRODUCTS

Premiums associated with our long-duration insurance products accounted for approximately 1% of our consolidated premiums and services revenue for the year ended December 31, 2015. We use long-duration accounting for products such as long-term care, life insurance, annuities, and certain health and other supplemental policies sold to individuals because they are expected to remain in force for an extended period beyond one year and because premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. As a result, we defer policy acquisition costs, primarily consisting of commissions, and amortize them over the estimated life of the policies in proportion to premiums earned.

In addition, we establish reserves for future policy benefits in recognition of the fact that some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on premium rate increase, interest rate, mortality, morbidity, persistency (the percentage of policies remaining in-force), and maintenance expense assumptions. The assumptions used to determine the liability for future policy benefits are established and locked in at the time each contract is issued and only change if our expected future experience deteriorates to the point that the level of the liability, together with the present value of future gross premiums, are not adequate to provide for future expected policy benefits and maintenance costs (i.e. the loss recognition date). As discussed in Note 2, beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model because premiums received in the current year are intended to pay anticipated benefits in that year.

The table below presents deferred acquisition costs and future policy benefits payable associated with our long-duration insurance products for the years ended December 31, 2015 and 2014.

	2015		2014	
	Deferred acquisition costs	Future policy benefits payable	Deferred acquisition costs	Future policy benefits payable
	(in millions)			
Other long-term assets	$ 135	$ —	$ 167	$ —
Trade accounts payable and accrued expenses	—	(64)	—	(68)
Long-term liabilities	—	(2,151)	—	(2,349)
Total asset (liability)	$ 135	$ (2,215)	$ 167	$ (2,417)

In addition, future policy benefits payable include amounts of $205 million at December 31, 2015 and $210 million at December 31, 2014 which are subject to 100% coinsurance agreements as more fully described in Note 19.

In 2015, we recorded a net reduction in benefits expense of $80 million associated with future policy benefits primarily due to the release of reserves as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law. Benefits expense associated with future policy benefits payable was $32 million in 2014 and $354 million in 2013. Benefits expense for 2013 included net charges of $243 million associated with our closed block of long-term care insurance policies discussed further below. Amortization of deferred acquisition costs included in operating costs was $63 million in 2015, $39 million in 2014, and $55 million in 2013. The increase in amortization in 2015 primarily reflects the effect of existing previously underwritten members transitioning to policies compliant with the Health Care Reform Law with us and other carriers.

Future policy benefits payable include $1.5 billion at December 31, 2015 and 2014 associated with a non-strategic closed block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG. Future policy benefits payable includes amounts charged to accumulated other comprehensive income for an additional liability that would exist on our closed-block of long-term care insurance policies if unrealized gains on the sale of the investments backing such products had been realized and the proceeds reinvested at then current yields. There was no additional liability at December 31, 2015 and $123 million of additional liability at December 31, 2014. Amounts charged to accumulated other comprehensive income are net of applicable deferred taxes.

Long-term care insurance policies provide nursing home and home health coverage for which premiums are collected many years in advance of benefits paid, if any. Therefore, our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual premium rate increase, interest, morbidity, mortality, persistency, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. We monitor the loss experience of these long-term care insurance policies and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. To the extent premium rate increases, interest rates, and/or loss experience vary from our loss recognition date assumptions, material future adjustments to reserves could be required.

During 2013, we recorded a loss for a premium deficiency. The premium deficiency was based on current and anticipated experience that had deteriorated from our locked-in assumptions from the previous December 31, 2010 loss recognition date, particularly as they related to emerging experience due to an increase in life expectancies and utilization of home health care services. Based on this deterioration, and combined with lower interest rates, we determined that our existing future policy benefits payable, together with the present value of future gross premiums, associated with our closed block of long-term care insurance policies were not adequate to provide for future policy benefits and maintenance costs under these policies; therefore we unlocked and modified our assumptions based on current expectations. Accordingly, during 2013 we recorded $243 million of additional benefits expense, with a corresponding increase in future policy benefits payable of $350 million partially offset by a related reinsurance recoverable of $107 million included in other long-term assets.

Deferred acquisition costs included $26 million and $59 million associated with our individual commercial medical policies at December 31, 2015 and December 31, 2014, respectively. Future policy benefits payable associated with our individual commercial medical policies were $180 million at December 31, 2015 and $297 million at December 31, 2014. The decline in deferred acquisition costs and future policy benefits payable primarily reflects the effect of existing previously underwritten members transitioning to policies compliant with the Health Care Reform Law with us and other carriers.

19. REINSURANCE

Certain blocks of insurance assumed in acquisitions, primarily life, long-term care, and annuities in run-off status, are subject to reinsurance where some or all of the underwriting risk related to these policies has been ceded to a third party. In addition, a large portion of our reinsurance takes the form of 100% coinsurance agreements where, in addition to all of the underwriting risk, all administrative responsibilities, including premium collections and claim payment, have also been ceded to a third party. We acquired these policies and related reinsurance agreements with the purchase of stock of companies in which the policies were originally written. We acquired these companies for business reasons unrelated to these particular policies, including the companies' other products and licenses necessary to fulfill strategic plans.

A reinsurance agreement between two entities transfers the underwriting risk of policyholder liabilities to a reinsurer while the primary insurer retains the contractual relationship with the ultimate insured. As such, these reinsurance agreements do not completely relieve us of our potential liability to the ultimate insured. However, given the transfer of underwriting risk, our potential liability is limited to the credit exposure which exists should the reinsurer be unable to meet its obligations assumed under these reinsurance agreements.

Reinsurance recoverables represent the portion of future policy benefits payable and benefits payable that are covered by reinsurance. Amounts recoverable from reinsurers are estimated in a manner consistent with the methods used to determine future policy benefits payable as detailed in Note 2. Excluding reinsurance associated with the Health Care Reform Law discussed in Note 2, reinsurance recoverables, included in other current and long-term assets, were $668 million at December 31, 2015 and $646 million at December 31, 2014. The percentage of these reinsurance recoverables resulting from 100% coinsurance agreements was approximately 43% at December 31, 2015 and approximately 45% at December 31, 2014. Premiums ceded were $821 million in 2015, $357 million in 2014 and $33 million in 2013. Benefits ceded were $666 million in 2015, $272 million in 2014, and $70 million in 2013. Ceded premium and benefits reflect a July 1, 2014 amendment ceding all risk under a Medicaid contract to a third party reinsurer.

We evaluate the financial condition of these reinsurers on a regular basis. These reinsurers are well-known and well-established, as evidenced by the strong financial ratings at December 31, 2015 presented below:

Reinsurer	Total Recoverable	A.M. Best Rating at December 31, 2015
	(in millions)	
Protective Life Insurance Company	$ 184	A+ (superior)
Munich American Reassurance Company	155	A+ (superior
Employers Reassurance Corporation	91	A- (excellent)
General Re Life Corporation	90	A++ (superior)
All others	148	A+ to B++ (superior to good)
	$ 668	

The all other category represents 18 reinsurers with individual balances less than $85 million. Three of these reinsurers with recoverables of $104 million are subject to trust or funds withheld accounts, requiring amounts at least equal to the total recoverable from each of these reinsurers.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Humana Inc.:

In our opinion, the consolidated balance sheets and the related consolidated statements of income, of comprehensive income, of stockholders' equity and of cash flows present fairly, in all material respects, the financial position of Humana Inc. and its subsidiaries at December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the index appearing under Item 15(a)(2) present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Louisville, Kentucky
February 18, 2016

Humana Inc.
QUARTERLY FINANCIAL INFORMATION
(Unaudited)

A summary of our quarterly unaudited results of operations for the years ended December 31, 2015 and 2014 follows:

	2015			
	First	Second	Third	Fourth (2)
	(in millions, except per share results)			
Total revenues	$ 13,833	$ 13,732	$ 13,363	$ 13,361
Income before income taxes	744	793	648	246
Net income	430	431	314	101
Basic earnings per common share	$ 2.86	$ 2.88	$ 2.11	$ 0.68
Diluted earnings per common share (1)	$ 2.82	$ 2.85	$ 2.09	$ 0.67

	2014			
	First	Second	Third	Fourth
	(in millions, except per share results)			
Total revenues	$ 11,712	$ 12,222	$ 12,238	$ 12,328
Income before income taxes	686	646	551	287
Net income	368	344	290	145
Basic earnings per common share	$ 2.37	$ 2.22	$ 1.87	$ 0.96
Diluted earnings per common share (1)	$ 2.35	$ 2.19	$ 1.85	$ 0.94

(1) The calculation of diluted earnings per common share is based on the weighted average shares outstanding during each quarter and, accordingly, the sum may not equal the total for the year.

(2) The fourth quarter of 2015 includes an expense of $176 million ($112 million after tax, or $0.74 per diluted common share) for a premium deficiency reserve associated with our individual commercial medical policies compliant with the Health Care Reform Law associated with the 2016 coverage year.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements and Other Information

We are responsible for the preparation and integrity of the consolidated financial statements appearing in our Annual Report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States and include amounts based on our estimates and judgments. All other financial information in this report has been presented on a basis consistent with the information included in the financial statements.

Our control environment is the foundation for our system of internal control over financial reporting and is embodied in our Code of Ethics and Business Conduct, which we currently refer to as the Humana Inc. Ethics Every Day. It sets the tone of our organization and includes factors such as integrity and ethical values. Our internal control over financial reporting is supported by formal policies and procedures which are reviewed, modified and improved as changes occur in business conditions and operations.

The Audit Committee of the Board of Directors, which is composed solely of independent outside directors, meets periodically with members of management, the internal auditors and our independent registered public accounting firm to review and discuss internal controls over financial reporting and accounting and financial reporting matters. Our independent registered public accounting firm and internal auditors report to the Audit Committee and accordingly have full and free access to the Audit Committee at any time.

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to members of senior management and the Board of Directors.

Based on our evaluation as of December 31, 2015, we as the principal executive officer and the principal financial officer and the principal accounting officer of the Company have concluded that the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as specified in Securities and Exchange Commission rules and forms.

Management's Report on Internal Control Over Financial Reporting

We are responsible for establishing and maintaining effective internal control over financial reporting as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2015. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework* (2013). Based on our assessment, we determined that, as of December 31, 2015, the Company's internal control over financial reporting was effective based on those criteria.

The effectiveness of our internal control over financial reporting as of December 31, 2015 has been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm, who also audited the Company's consolidated financial statements included in our Annual Report on Form 10-K, as stated in their report which appears on page 136.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Bruce D. Broussard
President and Chief Executive Officer (Principal Executive Officer)

Brian A. Kane
Senior Vice President and Chief Financial Officer (Principal Financial Officer)

Cynthia H. Zipperle

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the caption "Proposal One: Election of Directors" in such Proxy Statement.

Executive Officers of the Registrant

Set forth below are names and ages of all of our current executive officers as of February 1, 2016, their positions, and the date first elected an officer:

Name	Age	Position	First Elected Officer	
Bruce D. Broussard	53	President and Chief Executive Officer, Director	12/11	(1)
James E. Murray	62	Executive Vice President and Chief Operating Officer	08/90	(2)
Roy A. Beveridge, M.D.	58	Senior Vice President and Chief Medical Officer	06/13	(3)
Jody L. Bilney	54	Senior Vice President and Chief Consumer Officer	04/13	(4)
Christopher H. Hunter	47	Senior Vice President and Chief Strategy Officer	01/14	(5)
Timothy S. Huval	49	Senior Vice President and Chief Human Resources Officer	12/12	(6)
Brian A. Kane	43	Senior Vice President and Chief Financial Officer	06/14	(7)
Christopher Kay	50	Senior Vice President and Chief Innovation Officer	03/14	(8)
Brian P. LeClaire	55	Senior Vice President and Chief Information Officer	08/11	(9)
Heidi S. Margulis	62	Senior Vice President – Corporate Affairs	12/95	(10)
Christopher M. Todoroff	53	Senior Vice President and General Counsel	08/08	(11)
Cynthia H. Zipperle	53	Vice President, Chief Accounting Officer and Controller	12/14	(12)

(1) Mr. Broussard currently serves as Director, President and Chief Executive Officer (Principal Executive Officer), having held these positions since January 1, 2013. Mr. Broussard was elected President upon joining the Company in December 2011 and served in that capacity through December 2012. Prior to joining the Company, Mr. Broussard was Chief Executive Officer of McKesson Specialty/US Oncology, Inc. US Oncology was purchased by McKesson in December 2010. At US Oncology, Mr. Broussard served in a number of senior executive roles, including Chief Financial Officer, Chief Executive Officer, and Chairman of the Board.

(2) Mr. Murray currently serves as Executive Vice President and Chief Operating Officer, having held this position since December 2011. Mr. Murray has held the position of Chief Operating Officer since February 2006, and was the Chief Operating Officer – Market and Business Segment Operations from September 2002 to February 2006. Mr. Murray joined the Company in December 1989.

(3) Dr. Beveridge currently serves as Senior Vice President and Chief Medical Officer, having held this position since joining the Company in June 2013. Prior to joining the Company, Dr. Beveridge served as Chief Medical Officer for McKesson Specialty Health from December 2010 until June 2013. Prior to McKesson's acquisition

of US Oncology, Dr. Beveridge served as the Executive Vice President and Medical Director at US Oncology from September 2009 through December 2010.

(4) Ms. Bilney currently serves as Senior Vice President and Chief Consumer Officer, having held this position since joining the Company in April 2013. Prior to joining the Company, Ms. Bilney served as Executive Vice President and Chief Brand Officer for Bloomin' Brands, Inc. from 2006 until April 2013.

(5) Mr. Hunter currently serves as Senior Vice President and Chief Strategy Officer, having held this position since joining the Company in January 2014. Prior to joining the Company, Mr. Hunter served as President of Provider Markets at The TriZetto Group, Inc. from July 2012 until December 2013, and as Senior Vice President, Emerging Markets at BlueCross BlueShield of Tennessee from 2009 through July 2012. While at BlueCross BlueShield of Tennessee, Mr. Hunter was simultaneously President and Chief Executive Officer of Onlife Health, a national health and wellness subsidiary of BlueCross BlueShield of Tennessee.

(6) Mr. Huval currently serves as Senior Vice President and Chief Human Resources Officer, having been elected to this position in December 2012. Prior to joining the Company, Mr. Huval spent 10 years at Bank of America in multiple senior-level roles, including Human Resources executive and Chief Information Officer for Global Wealth & Investment Management, as well as Human Resources executive for both Global Treasury Services and Technology & Global Operations.

(7) Mr. Kane currently serves as Senior Vice President and Chief Financial Officer, having been elected to this position in June 2014. Prior to joining the Company, Mr. Kane spent nearly 17 years at Goldman, Sachs & Co. As a managing director, he was responsible for client relationships as well as for leading strategic and financing transactions for a number of companies in multiple industries.

(8) Mr. Kay currently serves of Senior Vice President and Chief Innovation Officer, having been elected to this position in March 2014. Prior to joining the Company, Mr. Kay was most recently Managing Director and CEO of Citi Ventures, Citigroup's global corporate venturing arm. Prior to joining Citi in 2007, Mr. Kay held several leadership positions at Target over a 12-year period.

(9) Mr. LeClaire currently serves as Senior Vice President and Chief Information Officer, having held this position since January 2014. Prior to that, he served as Senior Vice President and Chief Service and Information Officer from August 2011 to January 2014, and as Chief Technology Officer from 2002 to August 2011. Mr. LeClaire joined the Company in August 1999.

(10) Ms. Margulis currently serves as Senior Vice President – Corporate Affairs, having held this position since January 2000. Ms. Margulis joined the Company in November 1985.

(11) Mr. Todoroff currently serves as Senior Vice President and General Counsel, having held this position since August 2008. Prior to joining the Company, Mr. Todoroff served as Vice President, Senior Corporate Counsel and Corporate Secretary for Aetna Inc. from 2006 through July 2008. Mr. Todoroff joined Aetna's Legal Department in 1995 and held various positions of increasing responsibility.

(12) Mrs. Zipperle currently serves as Vice President, Chief Accounting Officer and Controller, having held this position since December 2014. Mrs. Zipperle previously served as the Vice President - Finance from January 2013 until her election to her current role, and as the Assistant Controller from January 1998 until January 2013.

Executive officers are elected annually by our Board of Directors and serve until their successors are elected or until resignation or removal. There are no family relationships among any of our executive officers.

Section 16(a) Beneficial Ownership Reporting Compliance

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" of such Proxy Statement.

Code of Conduct for Chief Executive Officer and Senior Financial Officers

We have adopted a Code of Conduct for the Chief Executive Officer and Senior Financial Officers, violations of which should be reported to the Audit Committee. The code may be viewed through the Investor Relations section of our web site at www.humana.com. Any amendment to or waiver of the application of the Code of Conduct for the Chief Executive Officer and Senior Financial Officers will be promptly disclosed through the Investor Relations section of our web site at www.humana.com.

Code of Business Conduct and Ethics

Since 1995, we have operated under an omnibus Code of Ethics and Business Conduct, currently known as the Humana Inc. Ethics Every Day. All employees and directors are required to annually affirm in writing their acceptance of the code. The Humana Inc. Ethics Every Day was adopted by our Board of Directors in June 2014, replacing a previous iteration of our Code of Ethics and Business Conduct – the Humana Inc. Principles of Business Ethics – as the document to comply with the New York Stock Exchange Corporate Governance Standard 303A.10. The Humana Inc. Ethics Every Day is available on our web site at www.humana.com. Any waiver of the application of the Humana Inc. Principles of Business Ethics to directors or executive officers must be made by the Board of Directors and will be promptly disclosed on our web site at www.humana.com.

Corporate Governance Items

We have made available free of charge on or through the Investor Relations section of our web site at www.humana.com our annual reports on Form 10-K, quarterly reports on Form 10-Q, proxy statements, and all of our other reports, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Also available on our Internet web site is information about our corporate governance, including:

- a determination of independence for each member of our Board of Directors;
- the name, membership, role, and charter of each of the various committees of our Board of Directors;
- the name(s) of the directors designated as a financial expert under rules and regulations promulgated by the SEC;
- the responsibility of the Company's Lead Independent Director, if applicable, to convene, set the agenda for, and lead executive sessions of the non-management directors;
- the pre-approval process of non-audit services provided by our independent accountants;
- our by-laws and Certificate of Incorporation;
- our Majority Vote policy;
- our Related Persons Transaction Policy;
- the process by which interested parties can communicate with directors;
- the process by which stockholders can make director nominations (pursuant to our By-laws);
- our Corporate Governance Guidelines;
- our Policy Regarding Transactions in Company Securities, Inside Information and Confidentiality;
- Stock Ownership Guidelines for directors and for executive officers;
- the Humana Inc. Ethics Every Day and any waivers thereto; and
- the Code of Conduct for the Chief Executive Officer and Senior Financial Officers and any waivers thereto.

Additional information about these items can be found in, and is incorporated by reference to, our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016.

Material Changes to the Procedures by which Security Holders May Recommend Nominees to the Registrant's Board of Directors

None.

Audit Committee Financial Expert

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the caption "Corporate Governance – Audit Committee" of such Proxy Statement.

Audit Committee Composition and Independence

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the caption "Corporate Governance – Committee Membership and Attendance" of such Proxy Statement.

ITEM 11. EXECUTIVE COMPENSATION

Additional information required by this Item is incorporated herein by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the captions "Corporate Governance – Organization & Compensation Committee – Compensation Committee Interlocks and Insider Participation," "Director Compensation," "Compensation Discussion and Analysis," "Organization & Compensation Committee Report," and "Executive Compensation" of such Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Equity compensation plan information

We maintain plans under which options to purchase our common stock and awards of restricted stock may be made to officers, directors, key employees, and consultants. Stock options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant. Our stock plans, as approved by the Board of Directors and stockholders, define fair market value as the average of the highest and lowest stock prices reported on the composite tape by the New York Stock Exchange on a given date. Exercise provisions vary, but most options vest in whole or in part 1 to 3 years after grant and expire up to 7 years after grant.

Information concerning stock option awards and the number of securities remaining available for future issuance under our equity compensation plans in effect as of December 31, 2015 follows:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column(a))	
Equity compensation plans approved by security holders (1)	835,123	$ 121.889	8,734,399	(2)(3)
Equity compensation plans not approved by security holders	—	—	—	
Total	835,123	$ 121.889	8,734,399	

(1) The above table does not include awards of shares of restricted stock or restricted stock units. For information concerning these awards, see Note 13.

(2) The Humana Inc. 2011 Stock Incentive Plan was approved by stockholders at the Annual Meeting held on April 21, 2011. On July 5, 2011, 18.5 million shares were registered with the Securities and Exchange Commission on Form S-8.

(3) Of the number listed above, 3,814,148 can be issued as restricted stock at December 31, 2015 (giving effect to the provision that one restricted share is equivalent to 2.29 stock options in the 2011 Plan).

The information under the captions "Security Ownership of Certain Beneficial Owners of Company Common Stock" and "Security Ownership of Directors and Executive Officers" in our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016, is herein incorporated by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the captions "Certain Transactions with Management and Others" and "Corporate Governance – Independent Directors" of such Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 21, 2016 appearing under the caption "Audit Committee Report" of such Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The financial statements, financial statement schedules and exhibits set forth below are filed as part of this report.

(1) Financial Statements – The response to this portion of Item 15 is submitted as Item 8 of Part II of this report.

(2) The following Consolidated Financial Statement Schedules are included herein:

Schedule I	Parent Company Financial Information
Schedule II	Valuation and Qualifying Accounts

All other schedules have been omitted because they are not applicable.

(3) Exhibits:

2.1 Agreement and Plan of Merger, dated as of July 2, 2015 among Aetna Inc., Echo Merger Sub, Inc., Echo Merger Sub, LLC and Humana Inc. (incorporated herein by reference to Exhibit 2.1 to Humana Inc.'s Current Report on Form 8-K filed on July 7, 2015).

3(a) Restated Certificate of Incorporation of Humana Inc. filed with the Secretary of State of Delaware on November 9, 1989, as restated to incorporate the amendment of January 9, 1992, and the correction of March 23, 1992 (incorporated herein by reference to Exhibit 4(i) to Humana Inc.'s Post-Effective Amendment No.1 to the Registration Statement on Form S-8 (Reg. No. 33-49305) filed February 2, 1994).

(b) By-Laws of Humana Inc., as amended on January 4, 2007 (incorporated herein by reference to Exhibit 3 to Humana Inc.'s Annual Report on Form 10-K for the year ended December 31, 2006).

4(a) Indenture, dated as of August 5, 2003, by and between Humana Inc. and The Bank of New York, as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).

(b) First Supplemental Indenture, dated as of August 5, 2003, by and between Humana Inc. and The Bank of New York, as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).

(c) Second Supplemental Indenture, dated as of May 31, 2006, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on May 31, 2006).

(d) Third Supplemental Indenture, dated as of June 5, 2008, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on June 5, 2008).

(e) Fourth Supplemental Indenture, dated as of June 5, 2008, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.3 to Humana Inc.'s Current Report on Form 8-K filed on June 5, 2008).

(f) Indenture, dated as of March 30, 2006, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Registration Statement on Form S-3 filed on March 31, 2006).

(g) There are no instruments defining the rights of holders with respect to long-term debt in excess of 10 percent of the total assets of Humana Inc. on a consolidated basis. Other long-term indebtedness of Humana Inc. is described herein in Note 12 to Consolidated Financial Statements. Humana Inc. agrees to furnish copies of all such instruments defining the rights of the holders of such indebtedness not otherwise filed as an Exhibit to this Annual Report on Form 10-K to the Commission upon request.

(h) Fifth Supplemental Indenture, dated as of December 10, 2012, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on December 10, 2012).

(i) Sixth Supplemental Indenture, dated as of December 10, 2012, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.3 to Humana Inc.'s Current Report on Form 8-K filed on December 10, 2012).

(j) Seventh Supplemental Indenture, dated as of September 19, 2014, by and between Humana Inc. and The Bank of New York, Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Current Report on Form 8-K filed on September 19, 2014).

(k) Eighth Supplemental Indenture, dated as of September 19, 2014, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.4 to Humana Inc.'s Current Report on Form 8-K filed on September 19, 2014).

(l) Ninth Supplemental Indenture, dated as of September 19, 2014, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.6 to Humana Inc.'s Current Report on Form 8-K filed on September 19, 2014).

Humana Inc.

SCHEDULE I—PARENT COMPANY FINANCIAL INFORMATION
NOTES TO CONDENSED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

Parent company financial information has been derived from our consolidated financial statements and excludes the accounts of all operating subsidiaries. This information should be read in conjunction with our consolidated financial statements.

Related Party

Refer to Note 2 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of our related party transactions. A related party note receivable in the amount of $284 million is included with other long-term assets in our condensed balance sheet at December 31, 2015 and with purchases of investment securities in our condensed statement of cash flows. The related interest income is included in investment income in our consolidated statement of income.

2. TRANSACTIONS WITH SUBSIDIARIES

Management Fee

Through intercompany service agreements approved, if required, by state regulatory authorities, Humana Inc., our parent company, charges a management fee for reimbursement of certain centralized services provided to its subsidiaries including information systems, disbursement, investment and cash administration, marketing, legal, finance, and medical and executive management oversight.

Dividends

Cash dividends received from subsidiaries and included as a component of net cash provided by operating activities were $493 million in 2015, $927 million in 2014, and $967 million in 2013. Subsidiary dividends in 2015 reflect the impact of losses for our individual commercial medical business compliant with the Health Care Reform Law and the November 5, 2015 revised statutory accounting guidance requiring the exclusion of risk corridor receivables from related statutory surplus discussed in Note 3 below.

Guarantee

Through indemnity agreements approved by state regulatory authorities, certain of our regulated subsidiaries generally are guaranteed by our parent company in the event of insolvency for: (1) member coverage for which premium payment has been made prior to insolvency; (2) benefits for members then hospitalized until discharged; and (3) payment to providers for services rendered prior to insolvency. Our parent has also guaranteed the obligations of our military services subsidiaries.

Notes Receivables from Operating Subsidiaries

We funded certain subsidiaries with surplus note agreements. These notes are generally non-interest bearing and may not be entered into or repaid without the prior approval of the applicable Departments of Insurance or other state regulatory authorities.

Notes Payable to Operating Subsidiaries

We borrowed funds from certain subsidiaries with notes generally collateralized by real estate. These notes, which have various payment and maturity terms, bear interest ranging from 1.51% to 6.65% and are payable in 2016 and 2019. We recorded interest expense of $1 million related to these notes for each of the years ended December 31, 2015, 2014 and 2013.

3. REGULATORY REQUIREMENTS

Certain of our insurance subsidiaries operate in states that regulate the payment of dividends, loans, or other cash transfers to Humana Inc., our parent company, and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these insurance subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required.

Although minimum required levels of equity are largely based on premium volume, product mix, and the quality of assets held, minimum requirements vary significantly at the state level. Our state regulated insurances subsidiaries had aggregate statutory capital and surplus of approximately $6.6 billion and $6.0 billion as of December 31, 2015 and 2014, respectively, which exceeded aggregate minimum regulatory requirements of $4.6 billion and $4.1 billion, respectively. Subsidiary dividends are subject to state regulatory approval, the amount and timing of which could be reduced or delayed. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2016 is approximately $900 million in the aggregate. This compares to dividends that were paid to our parent company in 2015 of approximately $493 million. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

On November 5, 2015, the National Association of Insurance Commissioners, or NAIC, issued statutory accounting guidance for receivables associated with the risk corridor provisions under the Health Care Reform Law, which requires the receivables to be excluded from subsidiary surplus. This accounting guidance required additional capital contributions into certain subsidiaries during 2015.

Certain regulated subsidiaries recognized premium deficiency reserves for our individual commercial medical policies compliant with the Health Care Reform Law for the 2016 coverage year in the fourth quarter of 2015. Further, the statutory-based premium deficiency excludes the estimated benefit associated with the risk corridor provisions as a reduction in subsidiary surplus in accordance with the previously discussed November 5, 2015 statutory accounting guidance requiring the exclusion of risk corridor amounts from subsidiary surplus. As a result of the statutory-based premium deficiency, we will fund capital contributions into certain regulated subsidiaries of $450 million during the first quarter of 2016.

Our use of operating cash flows derived from our non-insurance subsidiaries, such as in our Healthcare Services segment, is generally not restricted by state departments of insurance (or comparable state regulators).

4. ACQUISITIONS AND DIVESTITURES

Refer to Note 3 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of certain acquisitions and divestitures. On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc. During 2015, 2014 and 2013, we funded certain non-regulated subsidiary acquisitions, including the acquisition of American Eldercare Inc., with contributions from Humana Inc., our parent company, included in capital contributions in the condensed statement of cash flows.

5. INCOME TAXES

Refer to Note 11 of the notes to consolidated financial statements included in this Annual Report on Form 10-K for a description of income taxes.

6. DEBT

Refer to Note 12 of the notes to consolidated financial statements included in this Annual Report on Form 10-K for a description of debt.

7. STOCKHOLDER'S EQUITY

Refer to Note 15 of the notes to consolidated financial statements included in this Annual Report on Form 10-K for a description of stockholders' equity, including stock repurchases and stockholder dividends.

Humana Inc.

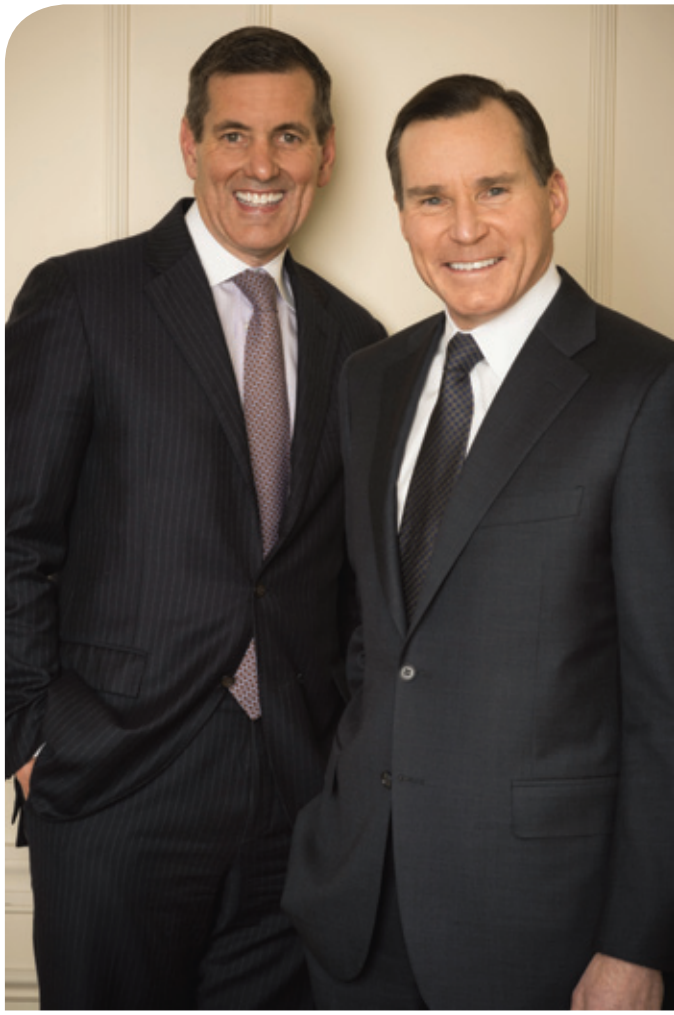
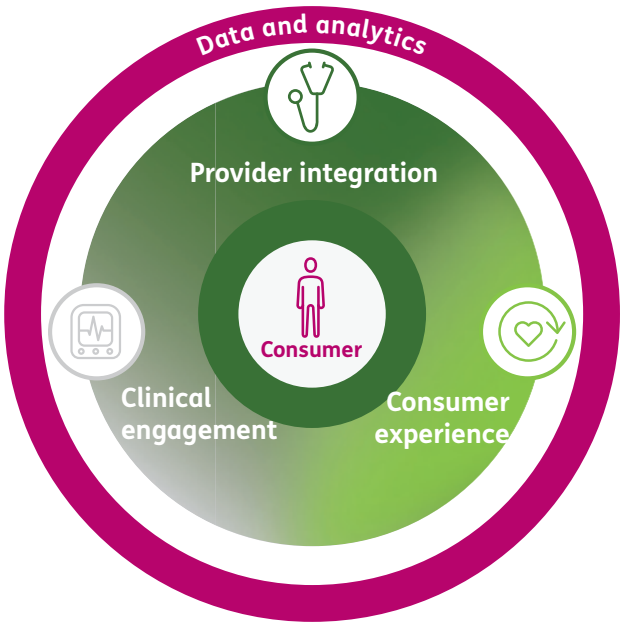
DEAR FELLOW STOCKHOLDERS,

Healthcare is in a dynamic state, and the public is looking to companies like Humana to make health benefits more affordable while improving the overall cost of care and consumer experience. To that end, Humana's innovative strategy continues to capitalize on industry changes to progress toward these goals through our ***integrated care delivery model.***

We understand that healthcare is complicated, and dealing with multiple physicians and other healthcare professionals can be a confusing and daunting task. That is one of the principal reasons why Humana will enhance its integrated care delivery strategy in key areas to enable a better and more seamless locally delivered health care experience for our members.



Bruce Broussard, President and Chief Executive Officer, and Kurt Hilzinger, Chairman of the Board



Our integrated care delivery model

As we have entered 2017, WE ARE PROUD OF OUR ACCOMPLISHMENTS during 2016. Some of our more notable achievements included:

18% GROWTH RATE

in our Adjusted earnings per share, accompanied by cash flows from operations that more than doubled.

Strong growth in our stand-alone PDP membership with the beneficial impact of this **HIGHER GROWTH** realized across the enterprise.

Distinct progress in our trend-bender activities **REDUCING THE COST OF CARE** without sacrificing quality. Metrics of note included:

11% INCREASE

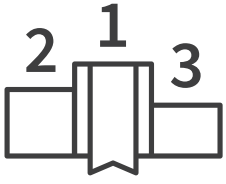
in the number of physicians in value-based arrangements.

7% INCREASE

in the number of high-risk discharges enrolled in the Humana Transitions program.

250 BASIS POINT INCREASE

in Humana Pharmacy Solutions' mail-order penetration.

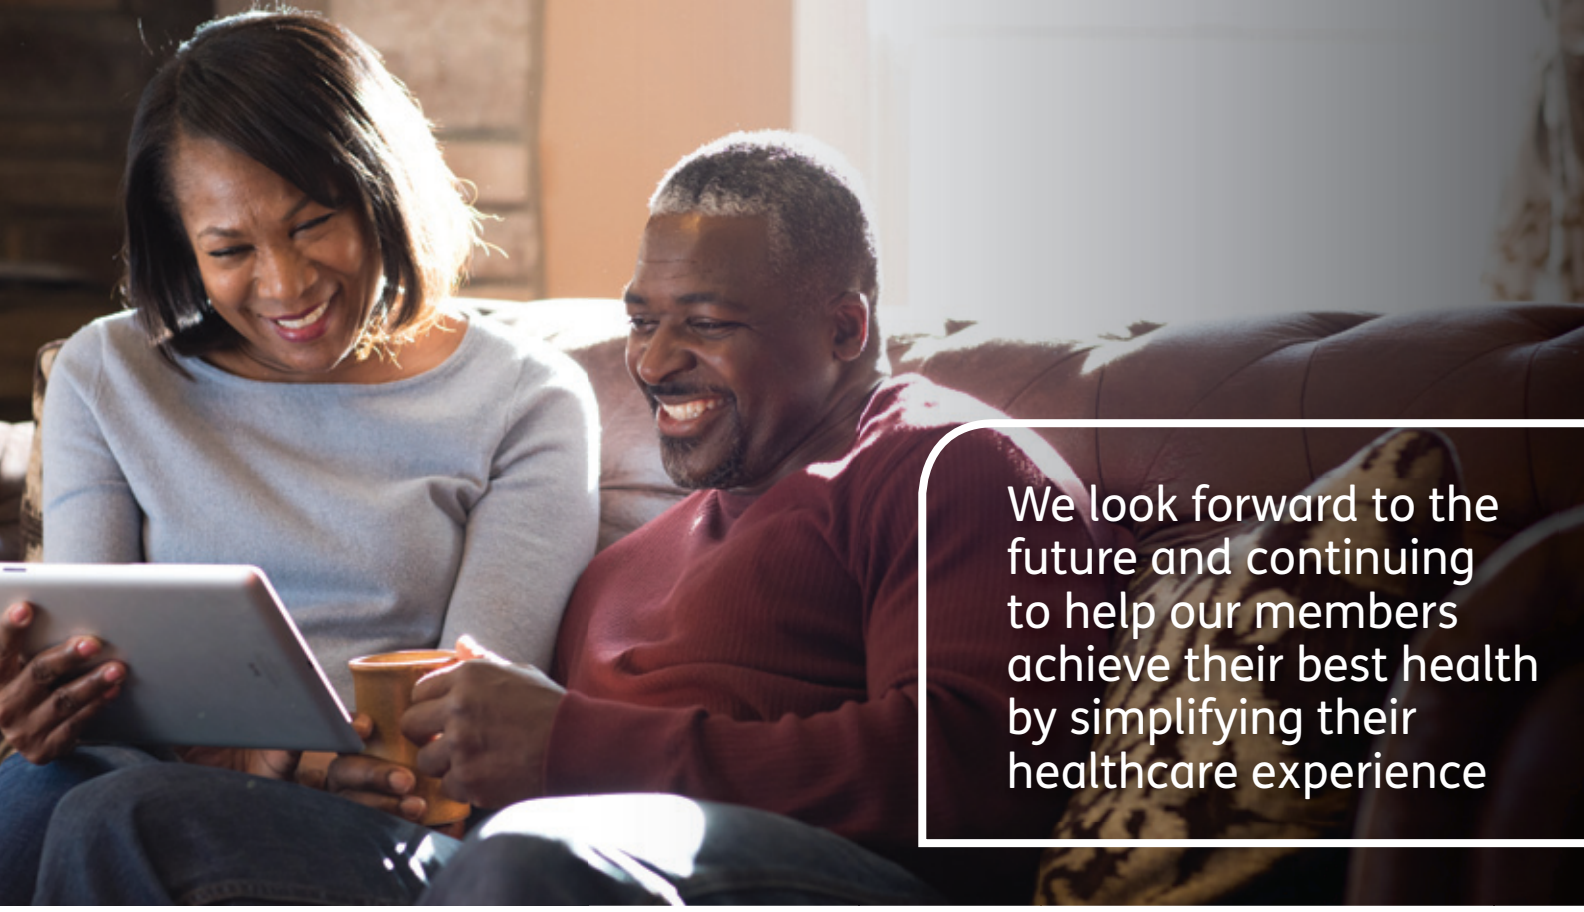


WINNING THE TRICARE East Region contract, a testament to our dedication to serving those in the military and their dependents.

Achieving associate engagement scores in the

90th PERCENTILE

a rarity in the circumstances we have navigated over the past year.

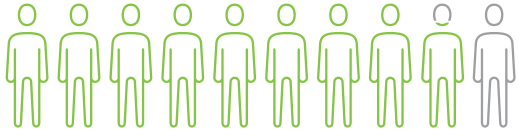


We look forward to the future and continuing to help our members achieve their best health by simplifying their healthcare experience

Our 2016 operating results are strong, particularly given the complex operating environment during the extended transaction process that was terminated by mutual agreement on February 14, 2017.

As we **renew and enhance** as an independent company, we are continuing to build on our integrated care delivery strategy by intensifying our focus on the cohort of people living with chronic conditions—particularly those who are aging into or are already in Medicare Advantage plans. This population is fast-growing, with more than 85 percent of seniors having at least one chronic condition and 65 percent having multiple chronic conditions.[A]

MORE THAN 85 PERCENT
of seniors have at least one chronic condition



65 PERCENT
have multiple chronic conditions

[A]Chronic condition charts 2014, https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/Chronic-Conditions/Chartbook_Charts.html

Humana is enhancing its integrated care delivery strategy in several key areas to further enable a rich, LOCALLY DELIVERED HEALTHCARE experience for all our members, by doing the following:

Increasing risk-based arrangements through expanding partnerships with physicians, offering sophisticated population health technology and services, and expanding primary care clinics.

Expanding complementary clinical capabilities that assist members outside of doctors' offices and institutions, with a focus on home health services, local pharmacy access and behavioral health.

Integrating technology among healthcare professionals, members and Humana together with advanced analytics to simplify the experience, eliminate "friction points," increase transparency and make access to care more convenient.

We believe by extending and expanding the local capabilities of our Healthcare Services businesses and supporting doctors and other healthcare professionals with unsurpassed population-health tools, we can remove barriers for our members. This will better help them achieve their best health by enabling both members and healthcare professionals easier engagement in more holistic health—engagement that brings together the lifestyle and clinical factors so critical to improving lifelong health and well-being. We expect this will, in turn, continue to drive growth across the enterprise as growth in our health plans furthers growth in our Healthcare Services businesses. We believe this will, in turn, lead to favorable returns for our stockholders.

We will continue our practice of evaluating our portfolio of businesses to ensure focus on those lines of business where our integrated care delivery strategy can add value for health plan members, healthcare professionals and our government program and employer group customers.

Over the past few years, we also have attempted to bring accessible, quality healthcare to individuals in a number of state markets across the U.S. through our Affordable Care Act healthcare exchange offerings and have worked diligently to maintain the viability of the product and continued availability across most parts of the country.

However, due to a persistently unbalanced risk pool in this market driven by programmatic factors, we will not continue to offer this coverage for 2018.

Turning to other elements of our strategy for 2017 and beyond, we have established a thoughtful capital deployment plan to raise our cash dividend and to implement a strategic share repurchase program. These efforts should jump start activities such as these that were frozen while the proposed merger was pending. Additionally, we will focus our mergers and acquisitions efforts on capabilities that enhance the clinical and consumer experience for our members. We believe our strategic, operating and capital deployment plans not only improve the value Humana brings to members and healthcare providers, they also enhance the growth platform for both our health plans and our Healthcare Services businesses, positioning us well for long-term, sustainable growth.

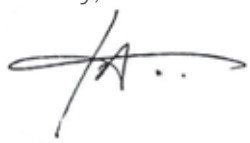
036
119
097

We look forward to the future with confidence, while gratefully acknowledging the enormous contributions to our success over the past quarter-century of Jim Murray, our retiring Executive Vice President and Chief Operating Officer. Jim's exceptional mentoring for many of our leaders, particularly those in segment president roles, has positioned us well for the future as our segment presidents are ready for broader responsibilities within the organization.

Throughout its history, **Humana has been dedicated to improving people's health**, from our start as a nursing home company more than 50 years ago through our transition to a hospital company and today as a health and wellness enterprise.

We look forward to continuing to help our members achieve their best health by simplifying their healthcare experience—one that combines their unique needs with the clinical aspects critical to improving their lifelong health and well-being.

Sincerely,



Kurt J. Hilzinger
Chairman of the Board
Humana Inc.

Bruce D. Broussard

DILUTED EARNINGS PER COMMON SHARE	2016[B]	2015[C]
Generally Accepted Accounting Principles (GAAP)	$4.07	$8.44
Transaction and integration costs associated with then-pending transaction	0.64	0.14
Amortization associated with identifiable intangibles	0.32	0.39
Write-off of risk corridor receivables	2.43	–
Reserve strengthening for the company's non-strategic closed block of long-term care insurance business	2.11	–
Premium deficiency reserve for certain 2016 individual commercial medical policies	–	0.74
Gain related to sale of Concentra Inc.	–	(1.57)
Adjusted (non-GAAP)	$9.57	$8.14

The company has included financial measures herein that are not in accordance with GAAP. Management believes that these measures, when presented in conjunction with the comparable GAAP measures, are useful to both management and its investors in analyzing the company's ongoing business and operating performance. Consequently, management uses these non-GAAP financial measures as indicators of the company's business performance, as well as for operational planning and decision making purposes. Non-GAAP financial measures should be considered in addition to, but not as a substitute for, or superior to, financial measures prepared in accordance with GAAP. All financial measures herein are in accordance with GAAP unless otherwise indicated.

[B] 2016 Adjusted results exclude the following:

- *Pretax transaction and integration costs of $104 million, or $0.64 per diluted common share, associated with the then-pending transaction.*
- *Pretax amortization expense associated with identifiable intangibles of $77 million, or $0.32 per diluted common share.*
- *The pretax write-off of approximately $583 million, or $2.43 per diluted common share, in receivables associated with the risk corridor premium stabilization program for the Affordable Care Act (ACA) healthcare exchanges.*
- *Pretax expenses of $505 million, or $2.11 per diluted common share, of reserve strengthening related to the company's non-strategic closed block of long-term care insurance business.*

[C] 2015 Adjusted results exclude the following:

- *Pretax transaction and integration costs of $23 million, or $0.14 per diluted common share, associated with the then-pending transaction.*
- *Pretax amortization expense associated with identifiable intangibles of $93 million, or $0.39 per diluted common share.*
- *A premium deficiency reserve of $176 million, or $0.74 per diluted common share, related to the company's 2016 ACA-compliant individual commercial medical offerings.*
- *A pretax gain of $270 million, or approximately $1.57 per diluted common share, associated with the completion of the company's sale of its wholly-owned subsidiary, Concentra Inc. on June 1, 2015.*

Forward-Looking Statements

Some of the statements under "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this report may contain forward-looking statements which reflect our current views with respect to future events and financial performance. These forward-looking statements are made within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, or the Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of complying with these safe harbor provisions. We have based these forward-looking statements on our current expectations and projections about future events, trends and uncertainties. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions, including the information discussed under the section entitled "Risk Factors" in this report. In making these statements, we are not undertaking to address or update them in future filings or communications regarding our business or results. Our business is highly complicated, regulated and competitive with many different factors affecting results.

PART I

ITEM 1. BUSINESS

General

Headquartered in Louisville, Kentucky, Humana Inc. and its subsidiaries, referred to throughout this document as "we," "us," "our," the "Company" or "Humana," is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country. As of December 31, 2016, we had approximately 14.2 million members in our medical benefit plans, as well as approximately 7.0 million members in our specialty products. During 2016, 75% of our total premiums and services revenue were derived from contracts with the federal government, including 14% derived from our individual Medicare Advantage contracts in Florida with the Centers for Medicare and Medicaid Services, or CMS, under which we provide health insurance coverage to approximately 598,100 members as of December 31, 2016.

Humana Inc. was organized as a Delaware corporation in 1964. Our principal executive offices are located at 500 West Main Street, Louisville, Kentucky 40202, the telephone number at that address is (502) 580-1000, and our website address is www.humana.com. We have made available free of charge through the Investor Relations section of our web site our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

This Annual Report on Form 10-K, or 2016 Form 10-K, contains both historical and forward-looking information. See Item 1A. – Risk Factors in this 2016 Form 10-K for a description of a number of factors that may adversely affect our results or business.

Aetna Merger

On July 2, 2015, we entered into an Agreement and Plan of Merger, which we refer to in this report as the Merger Agreement, with Aetna Inc. and certain wholly owned subsidiaries of Aetna Inc., which we refer to collectively as Aetna, which sets forth the terms and conditions under which we agreed to merge with, and become a wholly owned subsidiary of Aetna, a transaction we refer to in this report as the Merger.

The Merger was subject to customary closing conditions, including, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, and (ii) the absence of legal restraints and prohibitions on the consummation of the Merger.

On December 22, 2016, in order to extend the "End Date" (as defined in the Merger Agreement), Aetna and Humana each agreed to waive until 11:59 p.m. (Eastern time) on February 15, 2017 its right to terminate the Merger Agreement due to a failure of the Mergers to have been completed on or before December 31, 2016.

On July 21, 2016, the U.S. Department of Justice and the attorneys general of certain U.S. jurisdictions filed a civil antitrust complaint in the U.S. District Court for the District of Columbia against us and Aetna, alleging that the Merger would violate Section 7 of the Clayton Antitrust Act and seeking a permanent injunction to prevent the Merger from being completed. On January 23, 2017, the Court ruled in favor of the DOJ and granted a permanent injunction of the proposed transaction. On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement, as our Board determined that an appeal of the Court's ruling would not be in the best interest of our stockholders.Under terms of the Merger Agreement, we are entitled to a breakup fee of $1 billion.

Health Care Reform

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. Certain significant provisions of the Health Care Reform Law include, among others, mandated coverage requirements, mandated benefits and guarantee issuance associated with commercial medical insurance, rebates to policyholders based on minimum benefit ratios, adjustments to Medicare Advantage premiums, the establishment of federally-facilitated or state-based exchanges coupled with programs designed to spread risk among insurers, and the introduction of plan designs based on set actuarial values. In addition, the Health Care Reform Law established insurance industry assessments, including an annual health insurance industry fee and a three-year industry wide commercial reinsurance fee. The Health Care Reform Law is discussed more fully in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations under the section titled "Health Care Reform" in this 2016 Form 10-K.

If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. Additionally, potential legislative changes, including activities to repeal or replace the Health Care Reform Law, creates uncertainty for our business, and we cannot predict when, or in what form, such legislative changes may occur.

Business Segments

We manage our business with three reportable segments: Retail, Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

Our Products

Our medical and specialty insurance products allow members to access health care services primarily through our networks of health care providers with whom we have contracted. These products may vary in the degree to which members have coverage. Health maintenance organizations, or HMOs, generally require a referral from the member's primary care provider before seeing certain specialty physicians. Preferred provider organizations, or PPOs, provide members the freedom to choose a health care provider without requiring a referral. However PPOs generally require the member to pay a greater portion of the provider's fee in the event the member chooses not to use a provider participating in the PPO's network. Point of Service, or POS, plans combine the advantages of HMO plans with the

flexibility of PPO plans. In general, POS plans allow members to choose, at the time medical services are needed, to seek care from a provider within the plan's network or outside the network. In addition, we offer services to our health plan members as well as to third parties that promote health and wellness, including pharmacy solutions, provider, home based, and clinical programs, as well as services and capabilities to advance population health. At the core of our strategy is our integrated care delivery model, which unites quality care, high member engagement, and sophisticated data analytics. Three core elements of the model are to improve the consumer experience by simplifying the interaction with us, engaging members in clinical programs, and offering assistance to providers in transitioning from a fee-for-service to a value-based arrangement. Our approach to primary, physician-directed care for our members aims to provide quality care that is consistent, integrated, cost-effective, and member-focused. The model is designed to improve health outcomes and affordability for individuals and for the health system as a whole, while offering our members a simple, seamless healthcare experience. The discussion that follows describes the products offered by each of our segments.

Our Retail Segment Products

This segment is comprised of products sold on a retail basis to individuals including medical and supplemental benefit plans described in the discussion that follows. The following table presents our premiums and services revenue for the Retail segment by product for the year ended December 31, 2016:

	Retail Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Premiums:		
Individual Medicare Advantage	$ 31,863	59.0%
Group Medicare Advantage	4,283	8.0%
Medicare stand-alone PDP	4,009	7.4%
Total Medicare	40,155	74.4%
Individual commercial	3,492	6.4%
State-based Medicaid	2,640	4.9%
Individual specialty	259	0.5%
Total premiums	46,546	86.2%
Services	8	—%
Total premiums and services revenue	$ 46,554	86.2%

Medicare

We have participated in the Medicare program for private health plans for over 30 years and have established a national presence, offering at least one type of Medicare plan in all 50 states. We have a geographically diverse membership base that we believe provides us with greater ability to expand our network of PPO and HMO providers. We employ strategies including health assessments and clinical guidance programs such as lifestyle and fitness programs for seniors to guide Medicare beneficiaries in making cost-effective decisions with respect to their health care. We believe these strategies result in cost savings that occur from making positive behavior changes.

Medicare is a federal program that provides persons age 65 and over and some disabled persons under the age of 65 certain hospital and medical insurance benefits. CMS, an agency of the United States Department of Health and Human Services, administers the Medicare program. Hospitalization benefits are provided under Part A, without the payment of any premium, for up to 90 days per incident of illness plus a lifetime reserve aggregating 60 days. Eligible beneficiaries are required to pay an annually adjusted premium to the federal government to be eligible for physician care and other services under Part B. Beneficiaries eligible for Part A and Part B coverage under traditional fee-for-service Medicare are still required to pay out-of-pocket deductibles and coinsurance. Throughout this document this program is referred to as Medicare FFS. As an alternative to Medicare FFS, in geographic areas where a managed care organization has contracted with CMS pursuant to the Medicare Advantage program, Medicare beneficiaries may choose to receive benefits from a Medicare Advantage organization under Medicare Part C. Pursuant to Medicare Part

C, Medicare Advantage organizations contract with CMS to offer Medicare Advantage plans to provide benefits at least comparable to those offered under Medicare FFS. Our Medicare Advantage, or MA, plans are discussed more fully below. Prescription drug benefits are provided under Part D.

Individual Medicare Advantage Products

We contract with CMS under the Medicare Advantage program to provide a comprehensive array of health insurance benefits, including wellness programs, chronic care management, and care coordination, to Medicare eligible persons under HMO, PPO, and Private Fee-For-Service, or PFFS, plans in exchange for contractual payments received from CMS, usually a fixed payment per member per month. With each of these products, the beneficiary receives benefits in excess of Medicare FFS, typically including reduced cost sharing, enhanced prescription drug benefits, care coordination, data analysis techniques to help identify member needs, complex case management, tools to guide members in their health care decisions, care management programs, wellness and prevention programs and, in some instances, a reduced monthly Part B premium. Most Medicare Advantage plans offer the prescription drug benefit under Part D as part of the basic plan, subject to cost sharing and other limitations. Accordingly, all of the provisions of the Medicare Part D program described in connection with our stand-alone prescription drug plans in the following section also are applicable to most of our Medicare Advantage plans. Medicare Advantage plans may charge beneficiaries monthly premiums and other copayments for Medicare-covered services or for certain extra benefits. Generally, Medicare-eligible individuals enroll in one of our plan choices between October 15 and December 7 for coverage that begins on the following January 1.

Our Medicare HMO and PPO plans, which cover Medicare-eligible individuals residing in certain counties, may eliminate or reduce coinsurance or the level of deductibles on many other medical services while seeking care from participating in-network providers or in emergency situations. Except in emergency situations or as specified by the plan, most HMO plans provide no out-of-network benefits. PPO plans carry an out-of network benefit that is subject to higher member cost-sharing. In some cases, these beneficiaries are required to pay a monthly premium to the HMO or PPO plan in addition to the monthly Part B premium they are required to pay the Medicare program.

Most of our Medicare PFFS plans are network-based products with in and out of network benefits due to a requirement that Medicare Advantage organizations establish adequate provider networks, except in geographic areas that CMS determines have fewer than two network-based Medicare Advantage plans. In these areas, we offer Medicare PFFS plans that have no preferred network. Individuals in these plans pay us a monthly premium to receive typical Medicare Advantage benefits along with the freedom to choose any health care provider that accepts individuals at rates equivalent to Medicare FFS payment rates.

CMS uses monthly rates per person for each county to determine the fixed monthly payments per member to pay to health benefit plans. These rates are adjusted under CMS's risk-adjustment model which uses health status indicators, or risk scores, to improve the accuracy of payment. The risk-adjustment model, which CMS implemented pursuant to the Balanced Budget Act of 1997 (BBA) and the Benefits and Improvement Protection Act of 2000 (BIPA), generally pays more for members with predictably higher costs and uses principal hospital inpatient diagnoses as well as diagnosis data from ambulatory treatment settings (hospital outpatient department and physician visits) to establish the risk-adjustment payments. Under the risk-adjustment methodology, all health benefit organizations must collect from providers and submit the necessary diagnosis code information to CMS within prescribed deadlines. CMS is phasing-in the process of calculating risk scores using diagnoses data from the Risk Adjustment Processing System, or RAPS, to diagnosis data from the Encounter Data System, or EDS. The RAPS process requires MA plans to apply a filter logic based on CMS guidelines and only submit those claims that pass the filtering logic. For submissions through EDS, CMS requires MA plans to submit all the claims data and CMS will apply the risk adjustment filtering logic to determine the risk adjustment data used to calculate risk scores. For 2016, 10% of the risk score was calculated from claims data submitted through EDS, increasing to 25% of the risk score calculated from claims data through EDS for 2017.

At December 31, 2016, we provided health insurance coverage under CMS contracts to approximately 2,837,600 individual Medicare Advantage members, including approximately 598,100 members in Florida. These Florida contracts accounted for premiums revenue of approximately $7.7 billion, which represented approximately 24.2% of our individual Medicare Advantage premiums revenue, or 14.0% of our consolidated premiums and services revenue for the year ended December 31, 2016.

Our HMO, PPO, and PFFS products covered under Medicare Advantage contracts with CMS are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare Advantage products have been renewed for 2017, and all of our product offerings filed with CMS for 2017 have been approved.

Individual Medicare Stand-Alone Prescription Drug Products

We offer stand-alone prescription drug plans, or PDPs, under Medicare Part D, including a PDP offering co-branded with Wal-Mart Stores, Inc., or the Humana-Walmart plan. Generally, Medicare-eligible individuals enroll in one of our plan choices between October 15 and December 7 for coverage that begins on the following January 1. Our stand-alone PDP offerings consist of plans offering basic coverage with benefits mandated by Congress, as well as plans providing enhanced coverage with varying degrees of out-of-pocket costs for premiums, deductibles, and co-insurance. Our revenues from CMS and the beneficiary are determined from our PDP bids submitted annually to CMS. These revenues also reflect the health status of the beneficiary and risk sharing provisions as more fully described in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations under the section titled "Medicare Part D Provisions." Our stand-alone PDP contracts with CMS are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare stand-alone PDP products have been renewed for 2017, and all of our product offerings filed with CMS for 2017 have been approved.

We have administered CMS's Limited Income Newly Eligible Transition, or LI-NET, prescription drug plan program since 2010. This program allows individuals who receive Medicare's low-income subsidy to also receive immediate prescription drug coverage at the point of sale if they are not already enrolled in a Medicare Part D plan. CMS temporarily enrolls newly identified individuals with both Medicare and Medicaid into the LI-NET prescription drug plan program, and subsequently transitions each member into a Medicare Part D plan that may or may not be a Humana Medicare plan.

Group Medicare Advantage and Medicare stand-alone PDP

We offer products that enable employers that provide post-retirement health care benefits to replace Medicare wrap or Medicare supplement products with Medicare Advantage or stand-alone PDPs from Humana. These products offer the same types of benefits and services available to members in our individual Medicare plans discussed previously and can be tailored to closely match an employer's post-retirement benefit structure.

State-based Medicaid Contracts

Our state-based contracts allow us to serve members enrolled in state-based Medicaid programs including Temporary Assistance to Needy Families, or TANF, Long-Term Support Services, or LTSS, and dual eligible demonstration programs. TANF is a state and federally funded program that provides cash assistance and supportive services to assist families with children under age 18, helping them achieve economic self-sufficiency. LTSS is a state and federally funded program that offers states a broad and flexible set of program design options and refers to the delivery of long-term support services for our members who receive home and community or institution-based services for long-term care. Our contracts are generally for three to five year terms.

Medicare beneficiaries who also qualify for Medicaid due to low income or special needs are known as dual eligible beneficiaries, or dual eligibles. The dual eligible population represents a disproportionate share of Medicaid and Medicare costs. There were approximately 10.4 million dual eligible individuals in the United States in 2016, trending upward due to Medicaid eligibility expansions and individuals aging into the Medicare program. Since the enactment of the Health Care Reform Law, states are pursuing stand-alone dual eligible CMS demonstration programs in which Medicare, Medicaid, and LTSS benefits are more tightly integrated. Eligibility for participation in these stand-alone dual eligible demonstration programs may require state-based contractual relationships in existing Medicaid programs.

We have contracts to serve Medicaid eligible members in Florida under the TANF and LTSS programs. Our contracts in Virginia and Illinois serve members under each state's stand-alone dual eligible demonstration program. In addition, in Illinois we have an Integrated Care Program, or ICP, Medicaid contract. Our Kentucky Medicaid contract is subject to a 100% coinsurance contract with CareSource Management Group Company, ceding all the risk to CareSource.

In addition to the dual eligible members we serve under the Virginia and Illinois demonstration program, we serve other dual eligible members enrolled in our Medicare Advantage and stand-alone prescription drug plans. As of December 31, 2016, we served approximately 486,000 dual eligible members in our Medicare Advantage plans and approximately 1,179,000 dual eligible members in our stand-alone prescription drug plans.

Individual Commercial Coverage

Our individual health plans are marketed under the HumanaOne brand. We offer products both on and off of the public exchange. We offer products on exchanges where we can achieve an affordable cost of care, including HMO offerings and select networks in most markets. Our off-exchange products are primarily PPO and POS offerings, including plans issued prior to 2014 that were previously underwritten. For 2017, we discontinued substantially all Health Care Reform Law compliant off-exchange individual commercial medical plans effective January 1, 2017. Policies issued prior to the enactment of the Health Care Reform Law on March 23, 2010 are grandfathered policies. Grandfathered policies are exempt from most of the requirements of the Health Care Reform Law, including mandated benefits. However, our grandfathered plans include provisions that guarantee renewal of coverage for as long as the plan is continued and the individual chooses to renew. Policies issued between March 23, 2010 and December 31, 2013 are required to conform to the Health Care Reform Law, including mandated benefits, upon renewal at various transition dates between 2016 and 2017 depending on the state.

On February 14, 2017, we announced we are exiting our individual commercial medical businesses January 1, 2018 as more fully described in Note 7 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Rewards-based wellness programs are included with many individual products. We also offer optional benefits such as dental, vision, life, and a portfolio of financial protection products.

Group Segment Products

This segment is comprised of products sold to employer groups including medical and supplemental benefit plans as well as health and wellness products as described in the discussion that follows. The following table presents our premiums and services revenue for the Group segment by product for the year ended December 31, 2016:

	Group Segment Premiums and Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
External Revenue:		
Premiums:		
Fully-insured commercial group	$ 5,405	10.0%
Group specialty	1,020	1.9%
Military services	12	—%
Total premiums	6,437	11.9%
Services	694	1.3%
Total premiums and services revenue	$ 7,131	13.2%
Intersegment services revenue:		
Wellness	$ 99	n/a
Total intersegment services revenue	$ 99	

n/a – not applicable

Group Commercial Coverage

Our commercial products sold to employer groups include a broad spectrum of major medical benefits with multiple in-network coinsurance levels and annual deductible choices that employers of all sizes can offer to their employees on either a fully-insured, through HMO, PPO, or POS plans, or self-funded basis. Our plans integrate clinical programs, plan designs, communication tools, and spending accounts. We participate in the Federal Employee Health Benefits Program, or FEHBP, primarily with our HMO offering in certain markets. FEHBP is the government's health insurance program for Federal employees, retirees, former employees, family members, and spouses. As with our individual commercial products, the employer group offerings include Go365™, our wellness and loyalty reward program.

Our administrative services only, or ASO, products are offered to employers who self-insure their employee health plans. We receive fees to provide administrative services which generally include the processing of claims, offering access to our provider networks and clinical programs, and responding to customer service inquiries from members of self-funded employers. These products may include all of the same benefit and product design characteristics of our fully-insured HMO, PPO, or POS products described previously. Under ASO contracts, self-funded employers generally retain the risk of financing substantially all of the cost of health benefits. However, more than half of our ASO customers purchase stop loss insurance coverage from us to cover catastrophic claims or to limit aggregate annual costs.

As with individual commercial policies, employers can customize their offerings with optional benefits such as dental, vision, life, and a portfolio of voluntary benefit products.

Military Services

Under our TRICARE South Region contract with the United States Department of Defense, or DoD, we provide administrative services to arrange health care services for the dependents of active duty military personnel and for retired military personnel and their dependents. We have participated in the TRICARE program since 1996 under contracts with the DoD. On April 1, 2012, we began delivering services under our current TRICARE South Region contract that the Defense Health Agency, or DHA (formerly known as the TRICARE Management Activity), awarded to us on February 25, 2011. Under the current contract, we provide administrative services while the federal government

retains all of the risk of the cost of health benefits. Accordingly, we account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement.

Wellness

We offer wellness solutions including our Go365 wellness and loyalty rewards program, health coaching, employee assistance program, and clinical programs. These programs, when offered collectively to employer customers as our Total Health product, turn any standard plan of the employer's choosing into an integrated health and well-being solution that encourages participation in these programs.

Our Go365 program provides our members with access to a science-based, actuarially driven wellness and loyalty program that features a wide range of well-being tools and rewards that are customized to an individual's needs and wants. A key element of the program includes a sophisticated health-behavior-change model supported by an incentive program.

We also provide employee assistance programs and coaching services including a comprehensive turn-key coaching program, an enhancement to a medically based coaching protocol and a platform that makes coaching programs more efficient.

Our Healthcare Services Segment Products

The products offered by our Healthcare Services segment are key to our integrated care delivery model. This segment is comprised of stand-alone businesses that offer services including pharmacy solutions, provider services, home based services, clinical programs, and predictive modeling and informatics services to other Humana businesses, as well as external health plan members, external health plans, and other employers or individuals and are described in the discussion that follows. Our intersegment revenue is described in Note 17 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. The following table presents our services revenue for the Healthcare Services segment by line of business for the year ended December 31, 2016:

	Healthcare Services Segment Services Revenue	Percent of Consolidated Premiums and Services Revenue
	(dollars in millions)	
Intersegment revenue:		
Pharmacy solutions	$ 21,952	n/a
Provider services	1,677	n/a
Home based services	1,026	n/a
Clinical programs	180	n/a
Total intersegment revenue	$ 24,835	
External services revenue:		
Pharmacy solutions	$ 31	0.1%
Provider services	78	0.1%
Home based services	148	0.3%
Total external services revenue	$ 257	0.5%

n/a – not applicable

Pharmacy solutions

Humana Pharmacy Solutions®, or HPS, manages traditional prescription drug coverage for both individuals and employer groups in addition to providing a broad array of pharmacy solutions. HPS also operates prescription mail order services for brand, generic, and specialty drugs and diabetic supplies through Humana Pharmacy, Inc., as well as research services.

Provider services

We operate full-service, multi-specialty medical centers, primarily in Florida, staffed by primary care providers and medical specialists practicing cardiology, endocrinology, geriatric medicine, internal medicine, ophthalmology, neurology, and podiatry.

We also operate Transcend, a Medical Services Organization, or MSO, that coordinates medical care for Medicare Advantage beneficiaries primarily in four states. Transcend provides resources in care coordination, financial risk management, clinical integration and patient engagement that help physicians improve the patient experience as well as care outcomes. Transcend collaborates with physicians, medical groups and integrated delivery systems to successfully transition to value-based care by engaging, partnering and offering practical services and solutions. Transcend represents a key component of our integrated care delivery model which we believe is scalable to new markets. In addition, we own a noncontrolling equity interest in MCCI Holdings, LLC, a privately held MSO headquartered in Miami, Florida, that primarily coordinates medical care for Medicare Advantage beneficiaries in Florida, Texas and Georgia.

Programs to enhance the quality of care for members are key elements of our integrated care delivery model. We believe that technology represents a significant opportunity in health care that positively impacts our members. Our Transcend Insights business focuses on population health and wellness capabilities across the sector and serves health care systems, physicians and care teams by leveraging actionable data to help improve patient care. We help care teams and patients transition from a reactive approach to care to one that proactively promotes health and long-term wellness. We have enhanced our health information technology capabilities enabling us to create a more complete view of an individual's health, designed to connect, coordinate and simplify health care while reducing costs. These capabilities include our health care analytics engine, which reviews billions of clinical data points on millions of patients each day to provide members, providers, and payers real-time clinical insights to identify evidence-based gaps-in-care, drug safety alerts and other critical health concerns to improve outcomes. Additionally, our technology connects Humana and disparate electronic health record systems to enable the exchange of essential health information in real-time to provide physicians and care teams with a single, comprehensive patient view.

On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc., or Concentra, that delivered occupational medicine, urgent care, physical therapy, and wellness services to employees and the general public through its operation of medical centers and worksite medical facilities. See Note 3 to the consolidated financial statements included in Item 8. - Financial Statements and Supplementary Data.

Home based services

Via in-home care, telephonic health counseling/coaching, and remote monitoring, we are actively involved in the care management of our customers with the greatest needs. Home based services include the operations of Humana At Home, Inc., or Humana At Home®. As a chronic-care provider of in-home care for seniors, we provide innovative and holistic care coordination services for individuals living with multiple chronic conditions, individuals with disabilities, fragile and aging-in-place members and their care givers. We focus our deployment of these services in geographies, such as Florida, with a high concentration of members living with multiple chronic conditions. The clinical support and care provided by Humana At Home is designed to improve health outcomes and result in a higher number of days members can spend at their homes instead of in an acute care facility. To that end, we have accelerated our process for identifying and reaching out to members in need of clinical intervention. At December 31, 2016, we enrolled approximately 622,300 members with complex chronic conditions in the Humana Chronic Care Program, a 5.4% increase compared with approximately 590,300 members at December 31, 2015, reflecting enhanced predictive modeling capabilities and focus on proactive clinical outreach and member engagement, particularly for our Medicare Advantage membership. We believe these initiatives lead to better health outcomes for our members and lower health care costs.

Clinical programs

We are committed to the integrated physical and mental health of our members. Accordingly, we take a holistic approach to healthcare, offering care management, behavioral health services and wellness programs.

Our care management programs take full advantage of the population health, wellness and clinical applications offered by Transcend Insights and CareHub, our clinical management tool used by providers and care managers across the company to help our members achieve their best health, to offer various levels of support, matching the intensity of the support to the needs of members with ongoing health challenges through telephonic and onsite programs. These programs include Personal Nurse, chronic condition management, and case management as well as programs supporting maternity, cancer, neonatal intensive care unit, and transplant services.

In addition, we focus on the behavioral aspects of a members' health such as managing stress and work/life balance. Humana Behavioral Health takes a holistic, mind-and-body approach to behavioral healthcare to address the whole person, encouraging faster recovery and improving clinical outcomes while reducing costs for both the member and employer.

Other Businesses

Other Businesses primarily includes our closed block of long-term care insurance policies described below. Total premiums and services revenue for our Other Businesses was $48 million, or 0.1% of consolidated premiums and services revenue for the year ended December 31, 2016.

We have a non-strategic closed block of approximately 30,800 long-term care insurance policies associated with our acquisition of KMG America Corporation in 2007. Long-term care insurance policies are intended to protect the insured from the cost of long-term care services including those provided by nursing homes, assisted living facilities, and adult day care as well as home health care services. No new policies have been written since 2005 under this closed block.

Membership

The following table summarizes our total medical membership at December 31, 2016, by market and product:

	Retail Segment						Group Segment					
	(in thousands)											
	Individual Medicare Advantage	Group Medicare Advantage	Medicare stand-alone PDP	Individual Commercial	Medicare Supplement	State-based contracts	Fully-insured commercial Group	ASO	Military services	Other Businesses	Total	Percent of Total
Florida	598.1	16.0	345.0	194.4	6.7	365.9	140.2	50.7	—	—	1,717.0	12.1%
Texas	222.5	69.9	309.7	101.4	7.5	—	203.1	24.6	—	—	938.7	6.6%

Provider Arrangements

We provide our members with access to health care services through our networks of health care providers whom we employ or with whom we have contracted, including hospitals and other independent facilities such as outpatient surgery centers, primary care providers, specialist physicians, dentists, and providers of ancillary health care services and facilities. These ancillary services and facilities include laboratories, ambulance services, medical equipment services, home health agencies, mental health providers, rehabilitation facilities, nursing homes, optical services, and pharmacies. Our membership base and the ability to influence where our members seek care generally enable us to obtain contractual discounts with providers.

We use a variety of techniques to provide access to effective and efficient use of health care services for our members. These techniques include the coordination of care for our members, product and benefit designs, hospital inpatient management systems, the use of sophisticated analytics, and enrolling members into various care management programs. The focal point for health care services in many of our HMO networks is the primary care provider who, under contract with us, provides services to our members, and may control utilization of appropriate services by directing or approving hospitalization and referrals to specialists and other providers. Some physicians may have arrangements under which they can earn bonuses when certain target goals relating to the provision of quality patient care are met. We have available care management programs related to complex chronic conditions such as congestive heart failure and coronary artery disease. We also have programs for prenatal and premature infant care, asthma related illness, end stage renal disease, diabetes, cancer, and certain other conditions.

We typically contract with hospitals on either (1) a per diem rate, which is an all-inclusive rate per day, (2) a case rate or diagnosis-related groups (DRG), which is an all-inclusive rate per admission, or (3) a discounted charge for inpatient hospital services. Outpatient hospital services generally are contracted at a flat rate by type of service, ambulatory payment classifications, or APCs, or at a discounted charge. APCs are similar to flat rates except multiple services and procedures may be aggregated into one fixed payment. These contracts are often multi-year agreements, with rates that are adjusted for inflation annually based on the consumer price index, other nationally recognized inflation indexes, or specific negotiations with the provider. Outpatient surgery centers and other ancillary providers typically are contracted at flat rates per service provided or are reimbursed based upon a nationally recognized fee schedule such as the Medicare allowable fee schedule.

Our contracts with physicians typically are renewed automatically each year, unless either party gives written notice, generally ranging from 90 to 120 days, to the other party of its intent to terminate the arrangement. Most of the physicians in our PPO networks and some of our physicians in our HMO networks are reimbursed based upon a fixed fee schedule, which typically provides for reimbursement based upon a percentage of the standard Medicare allowable fee schedule.

The terms of our contracts with hospitals and physicians may also vary between Medicare and commercial business. A significant portion of our Medicare network contracts, including those with both hospitals and physicians, are tied to Medicare reimbursement levels and methodologies.

Automatic reductions to the federal budget, known as sequestration, took effect on April 1, 2013, including aggregate reductions to Medicare payments to providers of up to 2% per fiscal year. Due to the uncertainty around the application of these reductions, there can be no assurances that we can completely offset any reductions to the Medicare healthcare programs.

Capitation

We offer providers a continuum of opportunities to increase the integration of care and offer assistance to providers in transitioning from a fee-for-service to a value-based arrangement. These include performance bonuses, shared savings and shared risk relationships. For some of our medical membership, we share risk with providers under capitation contracts where physicians and hospitals accept varying levels of financial risk for a defined set of membership, primarily HMO membership. Under the typical capitation arrangement, we prepay these providers a monthly fixed-fee per member, known as a capitation (per capita) payment, to cover all or a defined portion of the benefits provided to the capitated member.

We believe these risk-based models represent a key element of our integrated care delivery model at the core of our strategy. Our health plan subsidiaries may enter into these risk-based contracts with third party providers or our owned provider subsidiaries.

At December 31, 2016, approximately 1,193,400 members, or 8.4% of our medical membership, were covered under risk-based contracts, including 921,000 individual Medicare Advantage members, or 32.5% of our total individual Medicare Advantage membership.

Physicians under capitation arrangements typically have stop loss coverage so that a physician's financial risk for any single member is limited to a maximum amount on an annual basis. We typically process all claims and monitor the financial performance and solvency of our capitated providers. However, we delegated claim processing functions under capitation arrangements covering approximately 191,300 HMO members, including 170,500 individual Medicare Advantage members, or 18.5% of the 921,000 individual Medicare Advantage members covered under risk-based contracts at December 31, 2016, with the provider assuming substantially all the risk of coordinating the members' health care benefits. Capitation expense under delegated arrangements for which we have a limited view of the underlying claims experience was approximately $1.3 billion, or 2.9% of total benefits expense, for the year ended December 31, 2016. We remain financially responsible for health care services to our members in the event our providers fail to provide such services.

Accreditation Assessment

Our accreditation assessment program consists of several internal programs, including those that credential providers and those designed to meet the audit standards of federal and state agencies as well as external accreditation standards. We also offer quality and outcome measurement and improvement programs such as the Health Care Effectiveness Data and Information Sets, or HEDIS, which is used by employers, government purchasers and the National Committee for Quality Assurance, or NCQA, to evaluate health plans based on various criteria, including effectiveness of care and member satisfaction.

Providers participating in our networks must satisfy specific criteria, including licensing, patient access, office standards, after-hours coverage, and other factors. Most participating hospitals also meet accreditation criteria established by CMS and/or the Joint Commission on Accreditation of Healthcare Organizations.

Recredentialing of participating providers occurs every two to three years, depending on applicable state laws. Recredentialing of participating providers includes verification of their medical licenses, review of their malpractice liability claims histories, review of their board certifications, if applicable, and review of applicable quality information. A committee, composed of a peer group of providers, reviews the applications of providers being considered for credentialing and recredentialing.

We request accreditation for certain of our health plans and/or departments from NCQA, the Accreditation Association for Ambulatory Health Care, and URAC. Accreditation or external review by an approved organization is mandatory in the states of Florida and Kansas for licensure as an HMO. Additionally, all products sold on the federal and state marketplaces are required to be accredited. Certain commercial businesses, like those impacted by a third-party labor agreement or those where a request is made by the employer, may require or prefer accredited health plans.

NCQA reviews our compliance based on standards for quality improvement, credentialing, utilization management, member connections, and member rights and responsibilities. We have achieved and maintained NCQA accreditation in most of our commercial, Medicare and Medicaid HMO/POS markets with enough history and membership, and for many of our PPO markets.

Sales and Marketing

We use various methods to market our products, including television, radio, the Internet, telemarketing, and direct mailings.

At December 31, 2016, we employed approximately 1,500 sales representatives, as well as approximately 1,300 telemarketing representatives who assisted in the marketing of Medicare and individual commercial health insurance

and specialty products in our Retail segment, including making appointments for sales representatives with prospective members. We have a marketing arrangement with Wal-Mart Stores, Inc., or Wal-Mart, for our individual Medicare stand-alone PDP offering. We also sell group Medicare Advantage products through large employers. In addition, we market our Medicare and individual commercial health insurance and specialty products through licensed independent brokers and agents. For our Medicare products, commissions paid to employed sales representatives and independent brokers and agents are based on a per unit commission structure, regulated in structure and amount by CMS. For our individual commercial health insurance and specialty products, we generally pay brokers a commission based on premiums, with commissions varying by market and premium volume. In addition to a commission based directly on premium volume for sales to particular customers, we also have programs that pay brokers and agents based on other metrics. These include commission bonuses based on sales that attain certain levels or involve particular products. We also pay additional commissions based on aggregate volumes of sales involving multiple customers.

In our Group segment, individuals may become members of our commercial HMOs and PPOs through their employers or other groups, which typically offer employees or members a selection of health insurance products, pay for all or part of the premiums, and make payroll deductions for any premiums payable by the employees. We attempt to become an employer's or group's exclusive source of health insurance benefits by offering a variety of HMO, PPO, and specialty products that provide cost-effective quality health care coverage consistent with the needs and expectations of their employees or members. In addition, we have begun to offer plans to employer groups through private exchanges. Employers can give their employees a set amount of money and then direct them to a private exchange where employees can shop for a health plan and other benefits based on what the employer has selected as options. We use licensed independent brokers, independent agents, and employees to sell our group products. Many of our larger employer group customers are represented by insurance brokers and consultants who assist these groups in the design and purchase of health care products. We pay brokers and agents using the same commission structure described above for our individual commercial health insurance and specialty products.

Underwriting

Since 2014, the Health Care Reform Law requires all individual and certain group health plans to guarantee issuance and renew coverage without pre-existing condition exclusions or health-status rating adjustments. Accordingly, newly issued individual and certain group health plans are not subject to underwriting. Further, underwriting techniques are not employed in connection with our Medicare, military services, or Medicaid products because government regulations require us to accept all eligible applicants regardless of their health or prior medical history.

Competition

The health benefits industry is highly competitive. Our competitors vary by local market and include other managed care companies, national insurance companies, and other HMOs and PPOs. Many of our competitors have a larger membership base and/or greater financial resources than our health plans in the markets in which we compete. Our ability to sell our products and to retain customers may be influenced by such factors as those described in Item 1A. – Risk Factors in this 2016 Form 10-K.

Government Regulation

Diverse legislative and regulatory initiatives at both the federal and state levels continue to affect aspects of the nation's health care system.

Our management works proactively to ensure compliance with all governmental laws and regulations affecting our business. We are unable to predict how existing federal or state laws and regulations may be changed or interpreted, what additional laws or regulations affecting our businesses may be enacted or proposed, when and which of the proposed laws will be adopted or what effect any such new laws and regulations will have on our results of operations, financial position, or cash flows.

For a description of certain material current activities in the federal and state legislative areas, see Item 1A. – Risk Factors in this 2016 Form 10-K.

Certain Other Services

Captive Insurance Company

We bear general business risks associated with operating our Company such as professional and general liability, employee workers' compensation, and officer and director errors and omissions risks. Professional and general liability risks may include, for example, medical malpractice claims and disputes with members regarding benefit coverage. We retain certain of these risks through our wholly-owned, captive insurance subsidiary. We reduce exposure to these risks by insuring levels of coverage for losses in excess of our retained limits with a number of third-party insurance companies. We remain liable in the event these insurance companies are unable to pay their portion of the losses.

Centralized Management Services

We provide centralized management services to each of our health plans and to our business segments from our headquarters and service centers. These services include management information systems, product development and administration, finance, human resources, accounting, law, public relations, marketing, insurance, purchasing, risk management, internal audit, actuarial, underwriting, claims processing, billing/enrollment, and customer service. Through intercompany service agreements approved, if required, by state regulatory authorities, Humana Inc., our parent company, charges a management fee for reimbursement of certain centralized services provided to its subsidiaries.

Employees

As of December 31, 2016, we had approximately 51,600 employees and approximately 2,600 additional medical professionals working under management agreements primarily between us and affiliated physician-owned associations. We believe we have good relations with our employees and have not experienced any work stoppages.

ITEM 1A. RISK FACTORS

Risks Relating to the Terminated Merger with Aetna

Our proposed merger with Aetna has affected and may in the future, materially and adversely affect our results of operations and stock price.

On February 14, 2017, we and Aetna agreed to mutually terminate our Merger Agreement, as our Board determined that an appeal of the Court's ruling enjoining the transaction would not be in the best interest of our stockholders. Although difficult to quantify, we believe that the proposed merger with Aetna, and subsequent termination of the Merger Agreement, has affected and may, in the future, materially and adversely affect our results of operations, due to the following:

- continued liability for certain transaction costs, including legal, accounting, financial advisory and other costs relating to the transaction;
- diverted management attention to the transaction and integration planning efforts;
- disruption of our business due to member uncertainty over when or if the acquisition will be completed or members' perception of us as a standalone company, our perception among and activities by external brokers, as well as our ability to negotiate and maintain relationships with certain providers in our network;
- certain restrictions in the Merger Agreement on the conduct of our business prior to its termination; and
- other uncertainties that have impaired our ability to retain, recruit and motivate key personnel.

The occurrence, continuation or exacerbation of any of these events individually or in combination could materially and adversely affect our results of operations.

Risks Relating to Our Business

If we do not design and price our products properly and competitively, if the premiums we charge are insufficient to cover the cost of health care services delivered to our members, if we are unable to implement clinical initiatives to provide a better health care experience for our members, lower costs and appropriately document the risk profile of our members, or if our estimates of benefits expense are inadequate, our profitability may be materially adversely affected. We estimate the costs of our benefits expense payments, and design and price our products accordingly, using actuarial methods and assumptions based upon, among other relevant factors, claim payment patterns, medical cost inflation, and historical developments such as claim inventory levels and claim receipt patterns. We continually review these estimates, however these estimates involve extensive judgment, and have considerable inherent variability because they are extremely sensitive to changes in claim payment patterns and medical cost trends. Any reserve, including a premium deficiency reserve, may be insufficient.

We use a substantial portion of our revenues to pay the costs of health care services delivered to our members. These costs include claims payments, capitation payments to providers (predetermined amounts paid to cover services), and various other costs incurred to provide health insurance coverage to our members. These costs also include estimates of future payments to hospitals and others for medical care provided to our members. Generally, premiums in the health care business are fixed for one-year periods. Accordingly, costs we incur in excess of our benefit cost projections generally are not recovered in the contract year through higher premiums. We estimate the costs of our future benefit claims and other expenses using actuarial methods and assumptions based upon claim payment patterns, medical inflation, historical developments, including claim inventory levels and claim receipt patterns, and other relevant factors. We also record benefits payable for future payments. We continually review estimates of future payments relating to benefit claims costs for services incurred in the current and prior periods and make necessary adjustments to our reserves, including premium deficiency reserves where appropriate. However, these estimates involve extensive judgment, and have considerable inherent variability that is sensitive to claim payment patterns and medical cost trends. Many factors may and often do cause actual health care costs to exceed what was estimated and used to set our premiums. These factors may include:

- increased use of medical facilities and services;

- increased cost of such services;
- increased use or cost of prescription drugs, including specialty prescription drugs;
- the introduction of new or costly treatments, including new technologies;
- our membership mix;
- variances in actual versus estimated levels of cost associated with new products, benefits or lines of business, product changes or benefit level changes;
- changes in the demographic characteristics of an account or market;
- changes or reductions of our utilization management functions such as preauthorization of services, concurrent review or requirements for physician referrals;
- changes in our pharmacy volume rebates received from drug manufacturers;
- catastrophes, including acts of terrorism, public health epidemics, or severe weather (e.g. hurricanes and earthquakes);
- medical cost inflation; and
- government mandated benefits or other regulatory changes, including any that result from the Health Care Reform Law.

Key to our operational strategy is the implementation of clinical initiatives that we believe provide a better health care experience for our members, lower the cost of healthcare services delivered to our members, and appropriately document the risk profile of our members. Our profitability and competitiveness depend in large part on our ability to appropriately manage health care costs through, among other things, the application of medical management programs such as our chronic care management program.

In addition, we also estimate costs associated with long-duration insurance policies including long-term care, life insurance, annuities, and certain health and other supplemental insurance policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these future policy benefit reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Because these policies have long-term claim payout periods, there is a greater risk of significant variability in claims costs, either positive or negative. Our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. We monitor the loss experience of these long-term care insurance policies, and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. However, to the extent premium rate increases or loss experience vary from the assumptions we have locked in, additional future adjustments to reserves could be required.

While we proactively attempt to effectively manage our operating expenses, increases or decreases in staff-related expenses, any costs associated with exiting products, additional investment in new products (including our opportunities in the Medicare programs, state-based contracts, participation in health insurance exchanges, and expansion of clinical capabilities as part of our integrated care delivery model), investments in health and well-being product offerings, acquisitions, new taxes and assessments (including the non-deductible health insurance industry fee and other assessments under the Health Care Reform Law), and implementation of regulatory requirements may increase our operating expenses.

Failure to adequately price our products or estimate sufficient benefits payable or future policy benefits payable, or effectively manage our operating expenses, may result in a material adverse effect on our results of operations, financial position, and cash flows.

We are in a highly competitive industry. Some of our competitors are more established in the health care industry in terms of a larger market share and have greater financial resources than we do in some markets. In addition, other companies may enter our markets in the future, including emerging competitors in the Medicare program or competitors in the delivery of health care services. We may also face increased competition due to participation by other insurers in the health insurance exchanges implemented under the Health Care Reform Law. We believe that barriers to entry

in our markets are not substantial, so the addition of new competitors can occur relatively easily, and customers enjoy significant flexibility in moving between competitors. Contracts for the sale of commercial products are generally bid upon or renewed annually. While health plans compete on the basis of many factors, including service and the quality and depth of provider networks, we expect that price will continue to be a significant basis of competition. In addition to the challenge of controlling health care costs, we face intense competitive pressure to contain premium prices. Factors such as business consolidations, strategic alliances, legislative reform, and marketing practices create pressure to contain premium price increases, despite being faced with increasing medical costs.

The policies and decisions of the federal and state governments regarding the Medicare, military, Medicaid and health insurance exchange programs in which we participate have a substantial impact on our profitability. These governmental policies and decisions, which we cannot predict with certainty, directly shape the premiums or other revenues to us under the programs, the eligibility and enrollment of our members, the services we provide to our members, and our administrative, health care services, and other costs associated with these programs. Legislative or regulatory actions, such as those resulting in a reduction in premium payments to us, an increase in our cost of administrative and health care services, or additional fees, taxes or assessments, may have a material adverse effect on our results of operations, financial position, and cash flows.

Premium increases, introduction of new product designs, and our relationships with our providers in various markets, among other issues, could also affect our membership levels. Other actions that could affect membership levels include our possible exit from or entrance into Medicare or commercial markets, or the termination of a large contract.

If we do not compete effectively in our markets, if we set rates too high or too low in highly competitive markets to keep or increase our market share, if membership does not increase as we expect, if membership declines, or if we lose membership with favorable medical cost experience while retaining or increasing membership with unfavorable medical cost experience, our results of operations, financial position, and cash flows may be materially adversely affected.

If we fail to effectively implement our operational and strategic initiatives, including our Medicare initiatives, our state-based contracts strategy, and our participation in the new health insurance exchanges, our business may be materially adversely affected, which is of particular importance given the concentration of our revenues in these products.

Our future performance depends in large part upon our ability to execute our strategy, including opportunities created by the expansion of our Medicare programs, the successful implementation of our integrated care delivery model, our strategy with respect to state-based contracts, including those covering members dually eligible for the Medicare and Medicaid programs, and our participation in health insurance exchanges.

We have made substantial investments in the Medicare program to enhance our ability to participate in these programs. We have increased the size of our Medicare geographic reach through expanded Medicare product offerings. We offer both stand-alone Medicare prescription drug coverage and Medicare Advantage health plans with prescription drug coverage in addition to our other product offerings. We offer a Medicare prescription drug plan in 50 states as well as Puerto Rico and the District of Columbia. The growth of our Medicare products is an important part of our business strategy. Any failure to achieve this growth may have a material adverse effect on our results of operations, financial position, or cash flows. In addition, the expansion of our Medicare products in relation to our other businesses may intensify the risks to us inherent in Medicare products. There is significant concentration of our revenues in Medicare products, with approximately 74% of our total premiums and services revenue for the year ended December 31, 2016 generated from our Medicare products, including 14% derived from our individual Medicare Advantage contracts with CMS in Florida. These expansion efforts may result in less diversification of our revenue stream and increased risks associated with operating in a highly regulated industry, as discussed further below.

The Health Care Reform Law created a federal Medicare-Medicaid Coordination Office to serve dual eligibles. This Medicare-Medicaid Coordination Office has initiated a series of state demonstration projects to experiment with better coordination of care between Medicare and Medicaid. Depending upon the results of those demonstration projects, CMS may change the way in which dual eligibles are serviced. If we are unable to implement our strategic initiatives

to address the dual eligibles opportunity, including our participation in state-based contracts, or if our initiatives are not successful at attracting or retaining dual eligible members, our business may be materially adversely affected.

Additionally, our strategy includes the growth of our commercial products, including participation in certain health insurance exchanges, introduction of new products and benefit designs, including Go365 and other wellness products, growth of our specialty products such as dental, vision and other supplemental products, the adoption of new technologies, development of adjacent businesses, and the integration of acquired businesses and contracts.

There can be no assurance that we will be able to successfully implement our operational and strategic initiatives, including implementing our integrated care delivery model, that are intended to position us for future growth or that the products we design will be accepted or adopted in the time periods assumed. Failure to implement this strategy may result in a material adverse effect on our results of operations, financial position, and cash flows.

There can be no assurances that we will be successful in maintaining or improving our Star ratings in future years. In addition, there can be no guarantees that the reconsideration that we filed with respect to certain of our Star rating measures for the 2018 bonus year will be successful, that operational measures we may take will successfully mitigate any negative effects of Star quality ratings for the 2018 bonus year or future years, or that we will not experience a decline in membership growth for 2018 as a result of our 2018 bonus year Star ratings.

The achievement of Star ratings of 4-Star or higher qualifies Medicare Advantage plans for premium bonuses. Our Medicare Advantage plans' operating results may be significantly affected by their star ratings. Despite our operational efforts to improve our star ratings, there can be no assurances that we will be successful in maintaining or improving our star ratings in future years. In addition, audits of our performance for past or future periods may result in downgrades to our Star ratings. Accordingly, our plans may not be eligible for full level quality bonuses, which could adversely affect the benefits such plans can offer, reduce membership and/or reduce profit margins.

On October 12, 2016, CMS published updated Star quality ratings for the 2018 bonus year, which showed that the percentage of our July 31, 2016 Medicare Advantage membership in 4-Star plans or higher had declined to approximately 37 percent from approximately 78 percent of our July 31, 2015 Medicare Advantage membership. This decline in membership in 4-Star rated plans does not take into account certain operational actions we intend to take over the coming quarters to mitigate any potential negative impact of these published ratings on Star bonus revenues for 2018. Moreover, we expect the impact of CMS' comprehensive program audit on our Star ratings to be limited to the 2018 bonus year, and Star results for the 2018 bonus year are not expected to materially impact our Medicare revenue for 2017.

We believe that our Star ratings for the 2018 bonus year do not accurately reflect our actual performance under the applicable Star measures. Consequently, we have filed for reconsideration of certain of those ratings by CMS under the appropriate administrative process.

There can be no guarantees, however, that the request for reconsideration that we filed with CMS will be successful, that any operational measures we may take will successfully mitigate all negative effects of our Star quality ratings for the 2018 bonus year, which could be material, or that we will not experience a decline in membership growth for 2018 as a result of our 2018 bonus year Star ratings.

If we fail to properly maintain the integrity of our data, to strategically implement new information systems, or to protect our proprietary rights to our systems, our business may be materially adversely affected.

Our business depends significantly on effective information systems and the integrity and timeliness of the data we use to run our business. Our business strategy involves providing members and providers with easy to use products that leverage our information to meet their needs. Our ability to adequately price our products and services, provide effective and efficient service to our customers, and to timely and accurately report our financial results depends significantly on the integrity of the data in our information systems. As a result of our past and on-going acquisition activities, we have acquired additional information systems. We have reduced the number of systems we operate, have upgraded and expanded our information systems capabilities, and are gradually migrating existing business to fewer systems. Our information systems require an ongoing commitment of significant resources to maintain, protect, and

enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving industry and regulatory standards, and changing customer preferences. If the information we rely upon to run our businesses was found to be inaccurate or unreliable or if we fail to maintain effectively our information systems and data integrity, we could have operational disruptions, have problems in determining medical cost estimates and establishing appropriate pricing, have customer and physician and other health care provider disputes, have regulatory or other legal problems, have increases in operating expenses, lose existing customers, have difficulty in attracting new customers, or suffer other adverse consequences.

We depend on independent third parties for significant portions of our systems-related support, equipment, facilities, and certain data, including data center operations, data network, voice communication services and pharmacy data processing. This dependence makes our operations vulnerable to such third parties' failure to perform adequately under the contract, due to internal or external factors. A change in service providers could result in a decline in service quality and effectiveness or less favorable contract terms which may adversely affect our operating results.

We rely on our agreements with customers, confidentiality agreements with employees, and our trade secrets and copyrights to protect our proprietary rights. These legal protections and precautions may not prevent misappropriation of our proprietary information. In addition, substantial litigation regarding intellectual property rights exists in the software industry, including litigation involving end users of software products. We expect software products to be increasingly subject to third-party infringement claims as the number of products and competitors in this area grows.

There can be no assurance that our information technology, or IT, process will successfully improve existing systems, develop new systems to support our expanding operations, integrate new systems, protect our proprietary information, defend against cybersecurity attacks, or improve service levels. In addition, there can be no assurance that additional systems issues will not arise in the future. Failure to adequately protect and maintain the integrity of our information systems and data, or to defend against cybersecurity attacks, may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we are unable to defend our information technology security systems against cybersecurity attacks or prevent other privacy or data security incidents that result in security breaches that disrupt our operations or in the unintended dissemination of sensitive personal information or proprietary or confidential information, we could be exposed to significant regulatory fines or penalties, liability or reputational damage, or experience a material adverse effect on our results of operations, financial position, and cash flows.

In the ordinary course of our business, we process, store and transmit large amounts of data, including sensitive personal information as well as proprietary or confidential information relating to our business or a third-party. A cybersecurity attack may penetrate our layered security controls and misappropriate or compromise sensitive personal information or proprietary or confidential information or that of third-parties, create system disruptions, cause shutdowns, or deploy viruses, worms, and other malicious software programs that attack our systems. A cybersecurity attack that bypasses our IT security systems successfully could materially affect us due to the theft, destruction, loss, misappropriation or release of confidential data or intellectual property, operational or business delays resulting from the disruption of our IT systems, or negative publicity resulting in reputation or brand damage with our members, customers, providers, and other stakeholders.

The costs to eliminate or address cybersecurity threats and vulnerabilities before or after an incident could be substantial. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service, and loss of existing or potential members. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary or confidential information about us or our members or other third-parties, could expose our members' private information and result in the risk of financial or medical identity theft, or expose us or other third-parties to a risk of loss or misuse of this information, result in significant regulatory fines or penalties, litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

We are involved in various legal actions and governmental and internal investigations, any of which, if resolved unfavorably to us, could result in substantial monetary damages or changes in our business practices. Increased litigation and negative publicity could increase our cost of doing business.

We are or may become a party to a variety of legal actions that affect our business, including breach of contract actions, employment and employment discrimination-related suits, employee benefit claims, stockholder suits and other securities laws claims, and tort claims.

In addition, because of the nature of the health care business, we are subject to a variety of legal actions relating to our business operations, including the design, management, and offering of products and services. These include and could include in the future:

- claims relating to the methodologies for calculating premiums;
- claims relating to the denial of health care benefit payments;
- claims relating to the denial or rescission of insurance coverage;
- challenges to the use of some software products used in administering claims;
- claims relating to our administration of our Medicare Part D offerings;
- medical malpractice actions based on our medical necessity decisions or brought against us on the theory that we are liable for providers' alleged malpractice;
- claims arising from any adverse medical consequences resulting from our recommendations about the appropriateness of providers' proposed medical treatment plans for patients;
- allegations of anti-competitive and unfair business activities;
- provider disputes over compensation or non-acceptance or termination of provider contracts or provider contract disputes relating to rate adjustments resulting from the Balance Budget and Emergency Deficit Control Act of 1985, as amended (commonly referred to as "sequestration");
- disputes related to ASO business, including actions alleging claim administration errors;
- qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that we, as a government contractor, submitted false claims to the government including, among other allegations, resulting from coding and review practices under the Medicare risk-adjustment model;
- claims related to the failure to disclose some business practices;
- claims relating to customer audits and contract performance;
- claims relating to dispensing of drugs associated with our in-house mail-order pharmacy; and
- professional liability claims arising out of the delivery of healthcare and related services to the public.

In some cases, substantial non-economic or punitive damages as well as treble damages under the federal False Claims Act, Racketeer Influenced and Corrupt Organizations Act and other statutes may be sought.

While we currently have insurance coverage for some of these potential liabilities, other potential liabilities may not be covered by insurance, insurers may dispute coverage, or the amount of our insurance may not be enough to cover the damages awarded. In addition, some types of damages, like punitive damages, may not be covered by insurance. In some jurisdictions, coverage of punitive damages is prohibited. Insurance coverage for all or some forms of liability may become unavailable or prohibitively expensive in the future.

The health benefits industry continues to receive significant negative publicity reflecting the public perception of the industry. This publicity and perception have been accompanied by increased litigation, including some large jury awards, legislative activity, regulation, and governmental review of industry practices. These factors may materially adversely affect our ability to market our products or services, may require us to change our products or services or otherwise change our business practices, may increase the regulatory burdens under which we operate, and may require

us to pay large judgments or fines. Any combination of these factors could further increase our cost of doing business and adversely affect our results of operations, financial position, and cash flows.

See "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. - Financial Statements and Supplementary Data. We cannot predict the outcome of these matters with certainty.

As a government contractor, we are exposed to risks that may materially adversely affect our business or our willingness or ability to participate in government health care programs.

A significant portion of our revenues relates to federal and state government health care coverage programs, including the Medicare, military, and Medicaid programs. These programs accounted for approximately 75% of our total premiums and services revenue for the year ended December 31, 2016. These programs involve various risks, as described further below.

- At December 31, 2016, under our contracts with CMS we provided health insurance coverage to approximately 598,100 individual Medicare Advantage members in Florida. These contracts accounted for approximately 14% of our total premiums and services revenue for the year ended December 31, 2016. The loss of these and other CMS contracts or significant changes in the Medicare program as a result of legislative or regulatory action, including reductions in premium payments to us or increases in member benefits without corresponding increases in premium payments to us, may have a material adverse effect on our results of operations, financial position, and cash flows.
- At December 31, 2016, our military services business primarily consisted of the TRICARE South Region contract which covers approximately 3,084,100 beneficiaries. For the year ended December 31, 2016, premiums and services revenue associated with the TRICARE South Region contract accounted for approximately 1% of our total premiums and services revenue. On April 1, 2012, we began delivering services under the current TRICARE South Region contract that the Defense Health Agency, or DHA (formerly known as the TRICARE Management Activity), awarded to us on February 25, 2011. The current 5-year South Region contract, which expires March 31, 2017, is subject to annual renewals on April 1 of each year during its term at the government's option. On March 30, 2016, we received notice that the DHA exercised its option to extend the TRICARE South Region contract through March 31, 2017. On July 21, 2016, we were notified by the DHA that we were awarded the contract for the new TRICARE East Region, which is a consolidation of the former North and South Regions, with delivery of health care services expected to commence on October 1, 2017. The next generation East Region and West Region contract awards are currently subject to protests by unsuccessful bidders in the U.S. Court of Federal Claims and before the DHA. The loss of the TRICARE South Region contract or an overturn of the award of the East Region contract to us, should either occur, may have a material adverse effect on our results of operations, financial position, and cash flows.
- There is a possibility of temporary or permanent suspension from participating in government health care programs, including Medicare and Medicaid, if we are convicted of fraud or other criminal conduct in the performance of a health care program or if there is an adverse decision against us under the federal False Claims Act. As a government contractor, we may be subject to qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that the government contractor submitted false claims to the government. Litigation of this nature is filed under seal to allow the government an opportunity to investigate and to decide if it wishes to intervene and assume control of the litigation. If the government does not intervene, the lawsuit is unsealed, and the individual may continue to prosecute the action on his or her own.
- CMS uses a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity of covered members. The risk-adjustment model, which CMS implemented pursuant to the Balanced Budget Act of 1997(BBA) and the Benefits Improvement and Protection Act of 2000 (BIPA), generally pays more where a plan's membership has higher expected costs. Under this model, rates paid to MA plans are based on actuarially determined bids, which include a process whereby our prospective payments are based on a comparison of our beneficiaries' risk scores, derived from medical

diagnoses, to those enrolled in the government's traditional fee-for-service Medicare program (referred to as "Medicare FFS"). Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses the diagnosis data to calculate the risk-adjusted premium payment to MA plans, which CMS adjusts for coding pattern differences between the health plans and the government fee-for-service program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on these providers to document appropriately all medical data, including the diagnosis data submitted with claims. In addition, we conduct medical record reviews as part of our data and payment accuracy compliance efforts, to more accurately reflect diagnosis conditions under the risk adjustment model. These compliance efforts include the internal contract level audits described in more detail below.

CMS is phasing-in the process of calculating risk scores using diagnoses data from the Risk Adjustment Processing System, or RAPS, to diagnosis data from the Encounter Data System, or EDS. The RAPS process requires MA plans to apply a filter logic based on CMS guidelines and only submit those claims that pass the filtering logic. For submissions through EDS, CMS requires MA plans to submit all the claims data and CMS will apply the risk adjustment filtering logic to determine the risk adjustment data used to calculate risk scores. For 2016, 10% of the risk score was calculated from claims data submitted through EDS, increasing to 25% of the risk score calculated from claims data through EDS for 2017. The phase-in from RAPS to EDS could result in different risk scores from each dataset as a result of plan processing issues, CMS processing issues, or filtering logic differences between RAPS and EDS, and could have a material adverse effect on our results of operations, financial position, or cash flows.

CMS is continuing to perform audits of various companies' selected MA contracts related to this risk adjustment diagnosis data. We refer to these audits as Risk-Adjustment Data Validation Audits, or RADV audits. RADV audits review medical records in an attempt to validate provider medical record documentation and coding practices which influence the calculation of premium payments to MA plans.

In 2012, CMS released a "Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation (RADV) Contract-Level Audits." The payment error calculation methodology provides that, in calculating the economic impact of audit results for an MA contract, if any, the results of the audit sample will be extrapolated to the entire MA contract based upon a comparison to "benchmark" audit data in Medicare FFS (which we refer to as the "FFS Adjuster"). This comparison to the FFS Adjuster is necessary to determine the economic impact, if any, of audit results because the government program data set, including any attendant errors that are present in that data set, provides the basis for MA plans' risk adjustment to payment rates. CMS already makes other adjustments to payment rates based on a comparison of coding pattern differences between MA plans and Medicare FFS data (such as for frequency of coding for certain diagnoses in MA plan data versus the government program data set).

The final methodology, including the first application of extrapolated audit results to determine audit settlements, is expected to be applied to RADV contract level audits conducted for contract year 2011 and subsequent years. CMS is currently conducting RADV contract level audits for contract years 2011, 2012, and 2013, in which two, five, and five of our Medicare Advantage plans are being audited, respectively. Per CMS guidance, selected MA contracts will be notified of an audit at some point after the close of the final reconciliation for the payment year being audited. The final reconciliation occurs in August of the calendar year following the payment year.

Estimated audit settlements are recorded as a reduction of premiums revenue in our consolidated statements of income, based upon available information. We perform internal contract level audits based on the RADV audit methodology prescribed by CMS. Included in these internal contract level audits is an audit of our Private Fee-For-Service business which we used to represent a proxy of the FFS Adjuster which has not yet been released. We based our accrual of estimated audit settlements for each contract year on the results of

these internal contract level audits and update our estimates as each audit is completed. Estimates derived from these results were not material to our results of operations, financial position, or cash flows. However, as indicated, we are awaiting additional guidance from CMS regarding the FFS Adjuster. Accordingly, we cannot determine whether such RADV audits will have a material adverse effect on our results of operations, financial position, or cash flows.

In addition, CMS' comments in formalized guidance regarding "overpayments" to MA plans appear to be inconsistent with CMS' prior RADV audit guidance. These statements, contained in the preamble to CMS' final rule release regarding Medicare Advantage and Part D prescription drug benefit program regulations for Contract Year 2015, appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the FFS Adjuster referenced above. We will continue to work with CMS to ensure that MA plans are paid accurately and that payment model principles are in accordance with the requirements of the Social Security Act, which, if not implemented correctly could have a material adverse effect on our results of operations, financial position, or cash flows.

- Our CMS contracts which cover members' prescription drugs under Medicare Part D contain provisions for risk sharing and certain payments for prescription drug costs for which we are not at risk. These provisions, certain of which are described below, affect our ultimate payments from CMS.

  The premiums from CMS are subject to risk corridor provisions which compare costs targeted in our annual bids to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to us or require us to refund to CMS a portion of the premiums we received (known as a "risk corridor"). We estimate and recognize an adjustment to premiums revenue related to the risk corridor payment settlement based upon pharmacy claims experience. The estimate of the settlement associated with these risk corridor provisions requires us to consider factors that may not be certain, including member eligibility differences with CMS. Our estimate of the settlement associated with the Medicare Part D risk corridor provisions was a net payable of $150 million at December 31, 2016.

  Reinsurance and low-income cost subsidies represent payments from CMS in connection with the Medicare Part D program for which we assume no risk. Reinsurance subsidies represent payments for CMS's portion of claims costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage level. Low-income cost subsidies represent payments from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts above the out-of-pocket threshold for low-income beneficiaries. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. A reconciliation and settlement of CMS's prospective subsidies against actual prescription drug costs we paid is made after the end of the applicable year.

  Settlement of the reinsurance and low-income cost subsidies as well as the risk corridor payment is based on a reconciliation made approximately 9 months after the close of each calendar year. This reconciliation process requires us to submit claims data necessary for CMS to administer the program. Our claims data may not pass CMS's claims edit processes due to various reasons, including discrepancies in eligibility or classification of low-income members. To the extent our data does not pass CMS's claim edit processes, we may bear the risk for all or a portion of the claim which otherwise may have been subject to the risk corridor provision or payment which we would have otherwise received as a low-income subsidy or reinsurance claim. In addition, in the event the settlement represents an amount CMS owes us, there is a negative impact on our cash flows and financial condition as a result of financing CMS's share of the risk. The opposite is true in the event the settlement represents an amount we owe CMS.

- We are also subject to various other governmental audits and investigations. Under state laws, our HMOs and health insurance companies are audited by state departments of insurance for financial and contractual compliance. Our HMOs are audited for compliance with health services by state departments of health. Audits and investigations are also conducted by state attorneys general, CMS, the Office of the Inspector General of Health and Human Services, the Office of Personnel Management, the Department of Justice, the Department of Labor, and the Defense Contract Audit Agency. All of these activities could result in the loss of licensure or the right to participate in various programs, including a limitation on our ability to market

or sell products, the imposition of fines, penalties and other civil and criminal sanctions, or changes in our business practices. The outcome of any current or future governmental or internal investigations cannot be accurately predicted, nor can we predict any resulting penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities. Nevertheless, it is reasonably possible that any such outcome of litigation, penalties, fines or other sanctions could be substantial, and the outcome of these matters may have a material adverse effect on our results of operations, financial position, and cash flows. Certain of these matters could also affect our reputation. In addition, disclosure of any adverse investigation or audit results or sanctions could negatively affect our industry or our reputation in various markets and make it more difficult for us to sell our products and services.

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 could have a material adverse effect on our results of operations (including restricting revenue, enrollment and premium growth in certain products and market segments, restricting our ability to expand into new markets, increasing our medical and operating costs by, among other things, requiring a minimum benefit ratio on insured products, lowering our Medicare payment rates and increasing our expenses associated with a non-deductible health insurance industry fee and other assessments); our financial position (including our ability to maintain the value of our goodwill); and our cash flows.

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. The provisions of the Health Care Reform Law include, among others, imposing a significant new non-deductible health insurance industry fee and other assessments on health insurers, limiting Medicare Advantage payment rates, stipulating a prescribed minimum ratio for the amount of premiums revenue to be expended on medical costs for insured products, additional mandated benefits and guarantee issuance associated with commercial medical insurance, requirements that limit the ability of health plans to vary premiums based on assessments of underlying risk, and heightened scrutiny by state and federal regulators of our business practices, including our Medicare bid and pricing practices. The Health Care Reform Law also specifies benefit design guidelines, limits rating and pricing practices, encourages additional competition (including potential incentives for new market entrants), establishes federally-facilitated or state-based exchanges for individuals and small employers (with up to 100 employees) coupled with programs designed to spread risk among insurers (subject to federal administrative action), and expands eligibility for Medicaid programs (subject to state-by-state implementation of this expansion). In addition, the Health Care Reform Law has increased and will continue to increase federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms will come, in part, from material additional fees and taxes on us and other health plans and individuals which began in 2014, as well as reductions in certain levels of payments to us and other health plans under Medicare. If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. Additionally, potential legislative changes, including activities to repeal or replace the Health Care Reform Law, creates uncertainty for our business, and we cannot predict when, or in what form, such legislative changes may occur.

For additional information, please refer to the section entitled, "Health Care Reform" in "Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing in this annual report.

Our continued participation in the federal and state health insurance exchanges, which entail uncertainties associated with mix, volume of business and the operation of premium stabilization programs, which are subject to federal administrative action, could adversely affect our results of operations, financial position, and cash flows.

The Health Care Reform Law required the establishment of health insurance exchanges for individuals and small employers to purchase health insurance that became effective January 1, 2014, with an annual open enrollment period. Insurers participating on the health insurance exchanges must offer a minimum level of benefits and are subject to guidelines on setting premium rates and coverage limitations. We may be adversely selected by individuals who have a higher acuity level than the anticipated pool of participants in this market. In addition, the risk corridor, reinsurance, and risk adjustment provisions of the Health Care Reform Law, established to apportion risk for insurers, may not be effective in appropriately mitigating the financial risks related to our products. The risk corridor program is a three-

year program, and the Department of Health and Human Services (HHS) guidance provides that risk corridor collections over the life of the three year program will first be applied to any shortfalls from previous benefit years before application to current year obligations. On November 10, 2016, the U.S. Court of Federal Claims ruled in favor of the government in one of a series of cases filed by insurers against HHS to collect risk corridor payments, rejecting all of the insurer's statutory, contract and Constitutional claims for payment. On November 18, 2016, HHS issued a memorandum indicating a significant funding shortfall for the 2015 coverage year, the second consecutive year of significant shortfalls. Given the successful challenge of the risk corridor provisions in court, Congressional inquiries into the funding of the risk corridor program, and significant funding shortfalls under the first two years of the program, during the fourth quarter of 2016 we wrote-off our risk corridor receivables. In addition, other regulatory changes to the implementation of the Health Care Reform Law that allowed individuals to remain in plans that are not compliant with the Health Care Reform Law or to enroll outside of the annual enrollment period may have an adverse effect on our pool of participants in the health insurance exchange.

For 2017, we are offering on-exchange individual commercial medical plans in 11 states, a reduction from the 15 states in which we offered on-exchange coverage in 2016. In addition, we discontinued substantially all Health Care Reform Law compliant off-exchange individual commercial medical plans in 2017. Despite this reduction in our individual commercial membership plans, the above factors, in addition to competitor actions to withdraw from exchanges and/or alter their product offerings, may have a material adverse effect on our results of operations, financial position, or cash flows if our premiums are not adequate or do not appropriately reflect the acuity of these individuals. In addition, audits of our submissions under the risk adjustment program may result in repayment of amounts distributed under the program. Any variation from our expectations regarding acuity, enrollment levels, adverse selection, or other assumptions used in setting premium rates could have a material adverse effect on our results of operations, financial position, and cash flows, and we may be unable to adjust our product offerings, geographic footprint, or pricing during any given year in sufficient time to mitigate any such effects.

Our business activities are subject to substantial government regulation. New laws or regulations, or changes in existing laws or regulations or their manner of application, including reductions in Medicare Advantage payment rates, could increase our cost of doing business and may adversely affect our business, profitability, financial condition, and cash flows.

In addition to the Health Care Reform Law, the health care industry in general and health insurance are subject to substantial federal and state government regulation:

Health Insurance Portability and Accountability Act (HIPAA) and the Health Information Technology for Economic and Clinical Health Act (HITECH Act)

The use of individually identifiable health data by our business is regulated at federal and state levels. These laws and rules are changed frequently by legislation or administrative interpretation. Various state laws address the use and maintenance of individually identifiable health data. Most are derived from the privacy provisions in the federal Gramm-Leach-Bliley Act and the Health Insurance Portability and Accountability Act, or HIPAA. HIPAA includes administrative provisions directed at simplifying electronic data interchange through standardizing transactions, establishing uniform health care provider, payer, and employer identifiers, and seeking protections for confidentiality and security of patient data. The rules do not provide for complete federal preemption of state laws, but rather preempt all inconsistent state laws unless the state law is more stringent.

These regulations set standards for the security of electronic health information. Violations of these rules could subject us to significant criminal and civil penalties, including significant monetary penalties. Compliance with HIPAA regulations requires significant systems enhancements, training and administrative effort. HIPAA can also expose us to additional liability for violations by our business associates (e.g., entities that provide services to health plans and providers).

The HITECH Act, one part of the American Recovery and Reinvestment Act of 2009, significantly broadened the scope of the privacy and security regulations of HIPAA. Among other requirements, the HITECH Act and HIPAA mandate individual notification in the event of a breach of unsecured, individually identifiable health information,

provides enhanced penalties for HIPAA violations, requires business associates to comply with certain provisions of the HIPAA privacy and security rule, and grants enforcement authority to state attorneys general in addition to the HHS Office of Civil Rights.

In addition, there are numerous federal and state laws and regulations addressing patient and consumer privacy concerns, including unauthorized access or theft of personal information. State statutes and regulations vary from state to state and could impose additional penalties. Violations of HIPAA or applicable federal or state laws or regulations could subject us to significant criminal or civil penalties, including significant monetary penalties. Compliance with HIPAA and other privacy regulations requires significant systems enhancements, training and administrative effort.

American Recovery and Reinvestment Act of 2009 (ARRA)

On February 17, 2009, the American Recovery and Reinvestment Act of 2009, or ARRA, was enacted into law. In addition to including a temporary subsidy for health care continuation coverage issued pursuant to the Consolidated Omnibus Budget Reconciliation Act, or COBRA, ARRA also expands and strengthens the privacy and security provisions of HIPAA and imposes additional limits on the use and disclosure of protected health information, or PHI. Among other things, ARRA requires us and other covered entities to report any unauthorized release or use of or access to PHI to any impacted individuals and to HHS in those instances where the unauthorized activity poses a significant risk of financial, reputational or other harm to the individuals, and to notify the media in any states where 500 or more people are impacted by any unauthorized release or use of or access to PHI. ARRA also requires business associates to comply with certain HIPAA provisions. ARRA also establishes higher civil and criminal penalties for covered entities and business associates who fail to comply with HIPAA's provisions and requires HHS to issue regulations implementing its privacy and security enhancements.

Corporate Practice of Medicine and Other Laws

As a corporate entity, Humana Inc. is not licensed to practice medicine. Many states in which we operate through our subsidiaries limit the practice of medicine to licensed individuals or professional organizations comprised of licensed individuals, and business corporations generally may not exercise control over the medical decisions of physicians. Statutes and regulations relating to the practice of medicine, fee-splitting between physicians and referral sources, and similar issues vary widely from state to state. Under management agreements between certain of our subsidiaries and affiliated physician-owned professional groups, these groups retain sole responsibility for all medical decisions, as well as for hiring and managing physicians and other licensed healthcare providers, developing operating policies and procedures, implementing professional standards and controls, and maintaining malpractice insurance. We believe that our health services operations comply with applicable state statutes regarding corporate practice of medicine, fee-splitting, and similar issues. However, any enforcement actions by governmental officials alleging non-compliance with these statutes, which could subject us to penalties or restructuring or reorganization of our business, may result in a material adverse effect on our results of operations, financial position, or cash flows.

Anti-Kickback, Physician Self-Referral, and Other Fraud and Abuse Laws

A federal law commonly referred to as the "Anti-Kickback Statute" prohibits the offer, payment, solicitation, or receipt of any form of remuneration to induce, or in return for, the referral of Medicare or other governmental health program patients or patient care opportunities, or in return for the purchase, lease, or order of items or services that are covered by Medicare or other federal governmental health programs. Because the prohibitions contained in the Anti-Kickback Statute apply to the furnishing of items or services for which payment is made in "whole or in part," the Anti-Kickback Statute could be implicated if any portion of an item or service we provide is covered by any of the state or federal health benefit programs described above. Violation of these provisions constitutes a felony criminal offense and applicable sanctions could include exclusion from the Medicare and Medicaid programs.

Section 1877 of the Social Security Act, commonly known as the "Stark Law," prohibits physicians, subject to certain exceptions described below, from referring Medicare or Medicaid patients to an entity providing "designated health services" in which the physician, or an immediate family member, has an ownership or investment interest or with which the physician, or an immediate family member, has entered into a compensation arrangement. These prohibitions, contained in the Omnibus Budget Reconciliation Act of 1993, commonly known as "Stark II," amended

prior federal physician self-referral legislation known as "Stark I" by expanding the list of designated health services to a total of 11 categories of health services. The professional groups with which we are affiliated provide one or more of these designated health services. Persons or entities found to be in violation of the Stark Law are subject to denial of payment for services furnished pursuant to an improper referral, civil monetary penalties, and exclusion from the Medicare and Medicaid programs.

Many states also have enacted laws similar in scope and purpose to the Anti-Kickback Statute and, in more limited instances, the Stark Law, that are not limited to services for which Medicare or Medicaid payment is made. In addition, most states have statutes, regulations, or professional codes that restrict a physician from accepting various kinds of remuneration in exchange for making referrals. These laws vary from state to state and have seldom been interpreted by the courts or regulatory agencies. In states that have enacted these statutes, we believe that regulatory authorities and state courts interpreting these statutes may regard federal law under the Anti-Kickback Statute and the Stark Law as persuasive.

We believe that our operations comply with the Anti-Kickback Statute, the Stark Law, and similar federal or state laws addressing fraud and abuse. These laws are subject to modification and changes in interpretation, and are enforced by authorities vested with broad discretion. We continually monitor developments in this area. If these laws are interpreted in a manner contrary to our interpretation or are reinterpreted or amended, or if new legislation is enacted with respect to healthcare fraud and abuse, illegal remuneration, or similar issues, we may be required to restructure our affected operations to maintain compliance with applicable law. There can be no assurances that any such restructuring will be possible or, if possible, would not have a material adverse effect on our results of operations, financial position, or cash flows.

Environmental

We are subject to various federal, state, and local laws and regulations relating to the protection of human health and the environment. If an environmental regulatory agency finds any of our facilities to be in violation of environmental laws, penalties and fines may be imposed for each day of violation and the affected facility could be forced to cease operations. We could also incur other significant costs, such as cleanup costs or claims by third parties, as a result of violations of, or liabilities under, environmental laws. Although we believe that our environmental practices, including waste handling and disposal practices, are in material compliance with applicable laws, future claims or violations, or changes in environmental laws, could have a material adverse effect on our results of operations, financial position or cash flows.

State Regulation of Insurance-Related Products

Laws in each of the states (and Puerto Rico) in which we operate our HMOs, PPOs and other health insurance-related services regulate our operations including: capital adequacy and other licensing requirements, policy language describing benefits, mandated benefits and processes, entry, withdrawal or re-entry into a state or market, rate increases, delivery systems, utilization review procedures, quality assurance, complaint systems, enrollment requirements, claim payments, marketing, and advertising. The HMO, PPO, and other health insurance-related products we offer are sold under licenses issued by the applicable insurance regulators.

Our licensed insurance subsidiaries are also subject to regulation under state insurance holding company and Puerto Rico regulations. These regulations generally require, among other things, prior approval and/or notice of new products, rates, benefit changes, and certain material transactions, including dividend payments, purchases or sales of assets, intercompany agreements, and the filing of various financial and operational reports.

Any failure by us to manage acquisitions, divestitures and other significant transactions successfully may have a material adverse effect on our results of operations, financial position, and cash flows.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, divestitures, strategic alliances, joint ventures, and outsourcing transactions and often enter into agreements relating to such transactions in order to further our business objectives. In order to pursue our acquisition strategy successfully, we must identify suitable candidates for and successfully complete transactions, some of which

may be large and complex, and manage post-closing issues such as the integration of acquired companies or employees. Integration and other risks can be more pronounced for larger and more complicated transactions, transactions outside of our core business space, or if multiple transactions are pursued simultaneously. The failure to successfully integrate acquired entities and businesses or failure to produce results consistent with the financial model used in the analysis of our acquisitions may have a material adverse effect on our results of operations, financial position, and cash flows. If we fail to identify and complete successfully transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally. In addition, from time to time, we evaluate alternatives for our businesses that do not meet our strategic, growth or profitability objectives. The divestiture of certain businesses could result, individually or in the aggregate, in the recognition of material losses and a material adverse effect on our results of operations. There can be no assurance that we will be able to complete any such divestitures on terms favorable to us.

If we fail to develop and maintain satisfactory relationships with the providers of care to our members, our business may be adversely affected.

We employ or contract with physicians, hospitals and other providers to deliver health care to our members. Our products encourage or require our customers to use these contracted providers. A key component of our integrated care delivery strategy is to increase the number of providers who share medical cost risk with us or have financial incentives to deliver quality medical services in a cost-effective manner.

In any particular market, providers could refuse to contract with us, demand higher payments, or take other actions that could result in higher health care costs for us, less desirable products for customers and members or difficulty meeting regulatory or accreditation requirements. In some markets, some providers, particularly hospitals, physician specialty groups, physician/hospital organizations, or multi-specialty physician groups, may have significant market positions and negotiating power. In addition, physician or practice management companies, which aggregate physician practices for administrative efficiency and marketing leverage, may compete directly with us. If these providers refuse to contract with us, use their market position to negotiate unfavorable contracts with us or place us at a competitive disadvantage, or do not enter into contracts with us that encourage the delivery of quality medical services in a cost-effective manner, our ability to market products or to be profitable in those areas may be adversely affected.

In some situations, we have contracts with individual or groups of primary care providers for an actuarially determined, fixed fee per month to provide a basket of required medical services to our members. This type of contract is referred to as a "capitation" contract. The inability of providers to properly manage costs under these capitation arrangements can result in the financial instability of these providers and the termination of their relationship with us. In addition, payment or other disputes between a primary care provider and specialists with whom the primary care provider contracts can result in a disruption in the provision of services to our members or a reduction in the services available to our members. The financial instability or failure of a primary care provider to pay other providers for services rendered could lead those other providers to demand payment from us even though we have made our regular fixed payments to the primary provider. There can be no assurance that providers with whom we contract will properly manage the costs of services, maintain financial solvency or avoid disputes with other providers. Any of these events may have a material adverse effect on the provision of services to our members and our results of operations, financial position, and cash flows.

Our pharmacy business is highly competitive and subjects us to regulations in addition to those we face with our core health benefits businesses.

Our pharmacy mail order business competes with locally owned drugstores, retail drugstore chains, supermarkets, discount retailers, membership clubs, internet companies and other mail-order and long-term care pharmacies. Our pharmacy business also subjects us to extensive federal, state, and local regulation. The practice of pharmacy is generally regulated at the state level by state boards of pharmacy. Many of the states where we deliver pharmaceuticals, including controlled substances, have laws and regulations that require out-of-state mail-order pharmacies to register with that state's board of pharmacy. Federal agencies further regulate our pharmacy operations, requiring registration with the U.S. Drug Enforcement Administration and individual state controlled substance authorities in order to dispense controlled substances. In addition, the FDA inspects facilities in connection with procedures to effect recalls of

prescription drugs. The Federal Trade Commission also has requirements for mail-order sellers of goods. The U.S. Postal Service, or USPS, has statutory authority to restrict the transmission of drugs and medicines through the mail to a degree that may have an adverse effect on our mail-order operations. The USPS historically has exercised this statutory authority only with respect to controlled substances. If the USPS restricts our ability to deliver drugs through the mail, alternative means of delivery are available to us. However, alternative means of delivery could be significantly more expensive. The U.S. Department of Transportation has regulatory authority to impose restrictions on drugs inserted in the stream of commerce. These regulations generally do not apply to the USPS and its operations. In addition, we are subject to CMS rules regarding the administration of our PDP plans and intercompany pricing between our PDP plans and our pharmacy business.

We are also subject to risks inherent in the packaging and distribution of pharmaceuticals and other health care products, and the application of state laws related to the operation of internet and mail-order pharmacies. The failure to adhere to these laws and regulations may expose us to civil and criminal penalties.

Changes in the prescription drug industry pricing benchmarks may adversely affect our financial performance.

Contracts in the prescription drug industry generally use certain published benchmarks to establish pricing for prescription drugs. These benchmarks include average wholesale price, which is referred to as "AWP," average selling price, which is referred to as "ASP," and wholesale acquisition cost. It is uncertain whether payors, pharmacy providers, pharmacy benefit managers, or PBMs, and others in the prescription drug industry will continue to utilize AWP as it has previously been calculated, or whether other pricing benchmarks will be adopted for establishing prices within the industry. Legislation may lead to changes in the pricing for Medicare and Medicaid programs. Regulators have conducted investigations into the use of AWP for federal program payment, and whether the use of AWP has inflated drug expenditures by the Medicare and Medicaid programs. Federal and state proposals have sought to change the basis for calculating payment of certain drugs by the Medicare and Medicaid programs. Adoption of ASP in lieu of AWP as the measure for determining payment by Medicare or Medicaid programs for the drugs sold in our mail-order pharmacy business may reduce the revenues and gross margins of this business which may result in a material adverse effect on our results of operations, financial position, and cash flows.

If we do not continue to earn and retain purchase discounts and volume rebates from pharmaceutical manufacturers at current levels, our gross margins may decline.

We have contractual relationships with pharmaceutical manufacturers or wholesalers that provide us with purchase discounts and volume rebates on certain prescription drugs dispensed through our mail-order and specialty pharmacies. These discounts and volume rebates are generally passed on to clients in the form of steeper price discounts. Changes in existing federal or state laws or regulations or in their interpretation by courts and agencies or the adoption of new laws or regulations relating to patent term extensions, and purchase discount and volume rebate arrangements with pharmaceutical manufacturers, may reduce the discounts or volume rebates we receive and materially adversely impact our results of operations, financial position, and cash flows.

Our ability to obtain funds from certain of our licensed subsidiaries is restricted by state insurance regulations.

Because we operate as a holding company, we are dependent upon dividends and administrative expense reimbursements from our subsidiaries to fund the obligations of Humana Inc., our parent company. Certain of our insurance subsidiaries operate in states that regulate the payment of dividends, loans, administrative expense reimbursements or other cash transfers to Humana Inc., and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these insurance subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix. Dividends from our non-insurance companies such as in our Healthcare Services segment are generally not restricted by Departments of Insurance. In the event that we are unable to provide sufficient capital to fund the obligations of Humana Inc., our results of operations, financial position, and cash flows may be materially adversely affected.

Downgrades in our debt ratings, should they occur, may adversely affect our business, results of operations, and financial condition.

Claims paying ability, financial strength, and debt ratings by recognized rating organizations are an increasingly important factor in establishing the competitive position of insurance companies. Ratings information is broadly disseminated and generally used throughout the industry. We believe our claims paying ability and financial strength ratings are an important factor in marketing our products to certain of our customers. In addition, our debt ratings impact both the cost and availability of future borrowings. Each of the rating agencies reviews its ratings periodically and there can be no assurance that current ratings will be maintained in the future. Our ratings reflect each rating agency's opinion of our financial strength, operating performance, and ability to meet our debt obligations or obligations to policyholders, but are not evaluations directed toward the protection of investors in our common stock and should not be relied upon as such.

Historically, rating agencies take action to lower ratings due to, among other things, perceived concerns about liquidity or solvency, the competitive environment in the insurance industry, the inherent uncertainty in determining reserves for future claims, the outcome of pending litigation and regulatory investigations, and possible changes in the methodology or criteria applied by the rating agencies. In addition, rating agencies have come under regulatory and public scrutiny over the ratings assigned to various fixed-income products. As a result, rating agencies may (i) become more conservative in their methodology and criteria, (ii) increase the frequency or scope of their credit reviews, (iii) request additional information from the companies that they rate, or (iv) adjust upward the capital and other requirements employed in the rating agency models for maintenance of certain ratings levels.

We believe that some of our customers place importance on our credit ratings, and we may lose customers and compete less successfully if our ratings were to be downgraded. In addition, our credit ratings affect our ability to obtain investment capital on favorable terms. If our credit ratings were to be lowered, our cost of borrowing likely would increase, our sales and earnings could decrease, and our results of operations, financial position, and cash flows may be materially adversely affected.

The securities and credit markets may experience volatility and disruption, which may adversely affect our business.

Volatility or disruption in the securities and credit markets could impact our investment portfolio. We evaluate our investment securities for impairment on a quarterly basis. This review is subjective and requires a high degree of judgment. For the purpose of determining gross realized gains and losses, the cost of investment securities sold is based upon specific identification. For debt securities held, we recognize an impairment loss in income when the fair value of the debt security is less than the carrying value and we have the intent to sell the debt security or it is more likely than not that we will be required to sell the debt security before recovery of our amortized cost basis, or if a credit loss has occurred. When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairments are considered using variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. We continuously review our investment portfolios and there is a continuing risk that declines in fair value may occur and additional material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

We believe our cash balances, investment securities, operating cash flows, and funds available under our credit agreement or from other public or private financing sources, taken together, provide adequate resources to fund ongoing operating and regulatory requirements, acquisitions, future expansion opportunities, and capital expenditures for at least the next twelve months, as well as to refinance or repay debt, and repurchase shares. However, continuing adverse securities and credit market conditions may significantly affect the availability of credit. While there is no assurance in the current economic environment, we have no reason to believe the lenders participating in our credit agreement will not be willing and able to provide financing in accordance with the terms of the agreement.

Our access to additional credit will depend on a variety of factors such as market conditions, the general availability of credit, both to the overall market and our industry, our credit ratings and debt capacity, as well as the possibility that customers or lenders could develop a negative perception of our long or short-term financial prospects. Similarly, our access to funds could be limited if regulatory authorities or rating agencies were to take negative actions against us. If a combination of these factors were to occur, we may not be able to successfully obtain additional financing on favorable terms or at all.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table lists, by state, the number of medical centers and administrative offices we owned or leased at December 31, 2016:

	Medical Centers		Administrative Offices		
	Owned	Leased	Owned	Leased	Total
Florida	11	129	—	87	227
Texas	—	16	2	17	35
Kentucky	2	1	11	12	26
Arizona	—	10	—	6	16
Virginia	—	8	—	8	16
California	—	2	—	13	15
South Carolina	—	6	4	5	15
Illinois	—	5	—	9	14
Louisiana	—	4	—	10	14
New York	—	—	—	13	13
Ohio	—	1	—	11	12
Indiana	—	4	—	7	11
Nevada	—	6	—	5	11
Tennessee	—	—	—	11	11
Colorado	—	5	—	4	9
Georgia	—	5	—	3	8
New Jersey	—	—	—	8	8
Washington	—	4	—	4	8
Puerto Rico	—	—	—	7	7
Michigan	—	2	—	4	6
North Carolina	—	—	—	6	6
Others	—	—	1	46	47
Total	13	208	18	296	535

The medical centers we operate are primarily located in Florida and Texas, including full-service, multi-specialty medical centers staffed by primary care providers and medical specialists. Of the medical centers included in the table above, approximately 67 of these facilities are leased or subleased to our contracted providers to operate.

Our principal executive office is located in the Humana Building, 500 West Main Street, Louisville, Kentucky 40202. In addition to the headquarters in Louisville, Kentucky, we maintain other principal operating facilities used

for customer service, enrollment, and/or claims processing and certain other corporate functions in Louisville, Kentucky; Green Bay, Wisconsin; Tampa, Florida; Cincinnati, Ohio; San Antonio, Texas; and San Juan, Puerto Rico.

ITEM 3. LEGAL PROCEEDINGS

We are party to a variety of legal actions in the ordinary course of business, certain of which may be styled as class-action lawsuits. Among other matters, this litigation may include employment matters, claims of medical malpractice, bad faith, nonacceptance or termination of providers, anticompetitive practices, improper rate setting, provider contract rate disputes, failure to disclose network discounts and various other provider arrangements, general contractual matters, intellectual property matters, and challenges to subrogation practices. For a discussion of our material legal actions, including those not in the ordinary course of business, see "Legal Proceedings and Certain Regulatory Matters" in Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. We cannot predict the outcome of these suits with certainty.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock trades on the New York Stock Exchange under the symbol HUM. The following table shows the range of high and low closing sales prices as reported on the New York Stock Exchange Composite Price for each quarter in the years ended December 31, 2016 and 2015:

	High	Low
Year Ended December 31, 2016		
First quarter	$ 186.91	$ 156.96
Second quarter	$ 190.07	$ 165.23
Third quarter	$ 180.86	$ 153.38
Fourth quarter	$ 216.76	$ 165.31
Year Ended December 31, 2015		
First quarter	$ 182.79	$ 139.09
Second quarter	$ 214.92	$ 163.07
Third quarter	$ 193.14	$ 174.16
Fourth quarter	$ 186.67	$ 164.25

Holders of our Capital Stock

As of January 31, 2017, there were approximately 2,700 holders of record of our common stock and approximately 92,300 beneficial holders of our common stock.

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2015 and 2016, under our Board approved quarterly cash dividend policy:

Record Date	Payment Date	Amount per Share	Total Amount
			(in millions)
2015 payments			
12/31/2014	1/30/2015	$0.28	$42
3/31/2015	4/24/2015	$0.28	$42
6/30/2015	7/31/2015	$0.29	$43
9/30/2015	10/30/2015	$0.29	$43
2016 payments			
12/30/2015	1/29/2016	$0.29	$43
3/31/2016	4/29/2016	$0.29	$43
6/30/2016	7/29/2016	$0.29	$43
10/13/2016	10/28/2016	$0.29	$43

Under the terms of the Merger Agreement, we agreed with Aetna that our quarterly dividend would not exceed $0.29 per share prior to the closing or termination of the Merger. On October 26, 2016, the Board declared a cash dividend of $0.29 per share that was paid on January 27, 2017 to stockholders of record on January 12, 2017, for an aggregate amount of $43 million.

On February 14, 2017, following the termination of the Merger Agreement, the Board declared a cash dividend of $0.40 per share, to be paid on April 28, 2017, to the stockholders of record on March 31, 2017. Declaration and payment of future quarterly dividends is at the discretion of our Board and may be adjusted as business needs or market conditions change.

Stock Total Return Performance

The following graph compares our total return to stockholders with the returns of the Standard & Poor's Composite 500 Index ("S&P 500") and the Dow Jones US Select Health Care Providers Index ("Peer Group") for the five years ended December 31, 2016. The graph assumes an investment of $100 in each of our common stock, the S&P 500, and the Peer Group on December 31, 2011, and that dividends were reinvested when paid.

	12/31/2011	12/31/2012	12/31/2013	12/31/2014	12/31/2015	12/31/2016
HUM	$ 100	$ 79	$ 121	$ 170	$ 212	$ 244
S&P 500	$ 100	$ 116	$ 154	$ 175	$ 177	$ 198
Peer Group	$ 100	$ 117	$ 161	$ 206	$ 218	$ 220

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Issuer Purchases of Equity Securities

The following table indicates that we made no purchases during the three months ended December 31, 2016 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act:

Period	Total Number of Shares Purchased (1)(2)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)(2)	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)
October 2016	—	$ —	—	$ —
November 2016	—	—	—	—
December 2016	—	—	—	—
Total	—	$ —	—	

(1) In September 2014, the Board of Directors replaced a previous share repurchase authorization of up to $1 billion with an authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, which expired on December 31, 2016. Pursuant to the Merger Agreement, after July 2, 2015, we were prohibited from repurchasing any of our outstanding securities without the prior written consent of Aetna, other than repurchases of shares of our common stock in connection with the exercise of outstanding stock options or the vesting or settlement of outstanding restricted stock awards. Accordingly, as announced on July 3, 2015, we suspended our share repurchase program.

(2) Excludes 0.6 million shares repurchased in connection with employee stock plans.

The Merger Agreement included customary restrictions on the conduct of our business prior to the completion of the Merger, generally requiring us to conduct our business in the ordinary course and subjecting us to a variety of customary specified limitations absent Aetna's prior written consent, including, for example, limitations on dividends (we agreed that our quarterly dividend would not exceed $0.29 per share) and repurchases of our securities (we agreed to suspend our share repurchase program). On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement. We also announced that the Board had approved a new authorization for share repurchases of up to $2.25 billion of our common stock exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2017. Under this new authorization, we expect to complete a $1.5 billion accelerated share repurchase program in the first quarter of 2017.

ITEM 6. SELECTED FINANCIAL DATA

	2016 (a)	2015 (b)(c)	2014 (b)(d)	2013 (b)(e)	2012 (b)(f)
	(dollars in millions, except per common share results)				
Summary of Operating Results:

Consolidated:					
Total medical membership	14,230,200	14,222,800	13,841,700	11,984,300	12,088,800
Total specialty membership	6,961,200	7,221,800	7,668,500	7,823,300	8,084,900

(a) Includes a reduction in premiums revenue of $583 million ($367 million after tax, or $2.43 per diluted common share) associated with the write-off of commercial risk corridor receivables. Also includes benefits expense of $505 million ($318 million after tax, or $2.11 per diluted common share) for reserve strengthening associated with our non-strategic closed block of long-term care insurance policies. In addition, we recorded transaction and integration planning costs in connection with the Merger of approximately $104 million, or $0.64 per diluted common share.

(b) Debt for prior periods has been recast to conform to the 2016 presentation which presents debt issuance cost as a direct reduction of the related liability instead of an asset.

(c) Includes a gain on the sale of Concentra Inc., net of transaction costs, of $270 million ($238 million after tax, or $1.57 per diluted common share). Also includes benefits expense of $176 million ($112 million after tax, or $0.74 per diluted common share) for a provision for probable

future losses (premium deficiency) for individual commercial medical business compliant with the Health Care Reform Law for the 2016 coverage year.

(d) Includes loss on extinguishment of debt of $37 million ($23 million after tax, or $0.15 per diluted common share) for the redemption of senior notes.

(e) Includes benefits expense of $243 million ($154 million after tax, or $0.99 per diluted common share) for reserve strengthening associated with our non-strategic closed block of long-term care insurance policies.

(f) Includes the acquired operations of Arcadian Management Services, Inc. from March 31, 2012, SeniorBridge Family Companies, Inc. from July 6, 2012, and Metropolitan Health Networks, Inc. from December 21, 2012.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Overview

General

Humana Inc., headquartered in Louisville, Kentucky, is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country.

Our industry relies on two key statistics to measure performance. The benefit ratio, which is computed by taking total benefits expense as a percentage of premiums revenue, represents a statistic used to measure underwriting profitability. The operating cost ratio, which is computed by taking total operating costs, excluding depreciation and amortization, as a percentage of total revenue less investment income, represents a statistic used to measure administrative spending efficiency.

Aetna Merger

On July 2, 2015, we entered into an Agreement and Plan of Merger, which we refer to in this report as the Merger Agreement, with Aetna Inc. and certain wholly owned subsidiaries of Aetna Inc., which we refer to collectively as Aetna, which sets forth the terms and conditions under which we agreed to merge with, and become a wholly owned subsidiary of Aetna, a transaction we refer to in this report as the Merger.

The Merger was subject to customary closing conditions, including, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, and (ii) the absence of legal restraints and prohibitions on the consummation of the Merger.

On December 22, 2016, in order to extend the "End Date" (as defined in the Merger Agreement), Aetna and Humana each agreed to waive until 11:59 p.m. (Eastern time) on February 15, 2017 its right to terminate the Merger Agreement due to a failure of the Mergers to have been completed on or before December 31, 2016.

On July 21, 2016, the U.S. Department of Justice and the attorneys general of certain U.S. jurisdictions filed a civil antitrust complaint in the U.S. District Court for the District of Columbia against us and Aetna, alleging that the Merger would violate Section 7 of the Clayton Antitrust Act and seeking a permanent injunction to prevent the Merger from being completed. On January 23, 2017, the Court ruled in favor of the DOJ and granted a permanent injunction of the proposed transaction. On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement, as our Board determined that an appeal of the Court's ruling would not be in the best interest of our stockholders. Under terms of the Merger Agreement, we are entitled to a breakup fee of $1 billion.

Business Segments

We manage our business with three reportable segments: Retail, Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

The Retail segment consists of Medicare benefits, marketed to individuals or directly via group accounts, as well as individual commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and financial protection products. In addition, the Retail segment also includes our contract

with CMS to administer the LI-NET prescription drug plan program and contracts with various states to provide Medicaid, dual eligible, and Long-Term Support Services benefits, collectively our state-based contracts. The Group segment consists of employer group commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and voluntary insurance benefits, as well as administrative services only, or ASO products. In addition, our Group segment includes our health and wellness products (primarily marketed to employer groups) and military services business, primarily our TRICARE South Region contract. The Healthcare Services segment includes services offered to our health plan members as well as to third parties, including pharmacy solutions, provider services, home based services, and clinical programs, as well as services and capabilities to advance population health. We will continue to report under the category of Other Businesses those businesses which do not align with the reportable segments described above, primarily our closed-block long-term care insurance policies.

The results of each segment are measured by income before income taxes. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and home based services as well as clinical programs, to our Retail and Group customers. Intersegment sales and expenses are recorded at fair value and eliminated in consolidation. Members served by our segments often use the same provider networks, enabling us in some instances to obtain more favorable contract terms with providers. Our segments also share indirect costs and assets. As a result, the profitability of each segment is interdependent. We allocate most operating expenses to our segments. Assets and certain corporate income and expenses are not allocated to the segments, including the portion of investment income not supporting segment operations, interest expense on corporate debt, and certain other corporate expenses. These items are managed at a corporate level. These corporate amounts are reported separately from our reportable segments and are included with intersegment eliminations.

Seasonality

One of the product offerings of our Retail segment is Medicare stand-alone prescription drug plans, or PDPs, under the Medicare Part D program. Our quarterly Retail segment earnings and operating cash flows are impacted by the Medicare Part D benefit design and changes in the composition of our membership. The Medicare Part D benefit design results in coverage that varies as a member's cumulative out-of-pocket costs pass through successive stages of a member's plan period, which begins annually on January 1 for renewals. These plan designs generally result in us sharing a greater portion of the responsibility for total prescription drug costs in the early stages and less in the latter stages. As a result, the PDP benefit ratio generally decreases as the year progresses. In addition, the number of low-income senior members as well as year-over-year changes in the mix of membership in our stand-alone PDP products affects the quarterly benefit ratio pattern.

Our Group segment also experiences seasonality in the benefit ratio pattern. However, the effect is opposite of Medicare stand-alone PDP in the Retail segment, with the Group segment's benefit ratio increasing as fully-insured members progress through their annual deductible and maximum out-of-pocket expenses. Similarly, certain of our fully-insured individual commercial medical products in our Retail segment experience seasonality in the benefit ratio akin to the Group segment, including the effect of existing previously underwritten members transitioning to policies compliant with the Health Care Reform Law with us and other carriers. As previously underwritten members transition, it results in policy lapses and the release of reserves for future policy benefits partially offset by the recognition of previously deferred acquisition costs. These policy lapses generally occur during the first quarter of the new coverage year following the open enrollment period reducing the benefit ratio in the first quarter. The recognition of a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law in the fourth quarter of 2015, and subsequent changes in estimates, also impact the quarterly benefit ratio pattern for this business in 2016 and 2015.

In addition, the Retail segment also experiences seasonality in the operating cost ratio as a result of costs incurred in the second half of the year associated with the Medicare and individual health care exchange marketing seasons.

Highlights

Consolidated

- On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement. We also announced that the Board had approved a new authorization for share repurchases of up to $2.25 billion of our common stock exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2017. Under this new authorization, we expect to complete a $1.5 billion accelerated share repurchase program in the first quarter of 2017. Under terms of the Merger Agreement, we are entitled to a breakup fee of $1 billion.

- Our 2016 results reflect the continued implementation of our strategy to offer our members affordable health care combined with a positive consumer experience in growing markets. At the core of this strategy is our integrated care delivery model, which unites quality care, high member engagement, and sophisticated data analytics. Our approach to primary, physician-directed care for our members aims to provide quality care that is consistent, integrated, cost-effective, and member-focused, provided by both employed physicians and physicians with network contract arrangements. The model is designed to improve health outcomes and affordability for individuals and for the health system as a whole, while offering our members a simple, seamless healthcare experience. We believe this strategy is positioning us for long-term growth in both membership and earnings. We offer providers a continuum of opportunities to increase the integration of care and offer assistance to providers in transitioning from a fee-for-service to a value-based arrangement. These include performance bonuses, shared savings and shared risk relationships. At December 31, 2016, approximately 1,816,300 members, or 64.0%, of our individual Medicare Advantage members were in value-based relationships under our integrated care delivery model, as compared to 1,633,100 members, or 59.3%, at December 31, 2015.

- On November 10, 2016, the U.S. Court of Federal Claims ruled in favor of the government in one of a series of cases filed by insurers, unrelated to us, against HHS to collect risk corridor payments, rejecting all of the insurer's statutory, contract and Constitutional claims for payment. On November 18, 2016, HHS issued a memorandum indicating a significant funding shortfall for the 2015 coverage year, the second consecutive year of significant shortfalls. Given the successful challenge of the risk corridor provisions in court, Congressional inquiries into the funding of the risk corridor program, and significant funding shortfalls under the first two years of the program, during the fourth quarter of 2016 we wrote-off $583 million ($367 million after-tax, or $2.43 per diluted common share) in risk corridor receivables outstanding as of September 30, 2016, including $415 million associated with the 2014 and 2015 coverage years. At December 31, 2016, we estimate that we are entitled to collect a total of $619 million from HHS under the commercial risk corridor program for the 2014 through 2016 program years.

- In the fourth quarter of 2016, we increased the future policy benefits expense by approximately $505 million ($318 million after tax, or $2.11 per diluted common share) for reserve strengthening associated with our closed block of long-term care insurance policies. This increase primarily was driven by emerging experience indicating longer claims duration, a prolonged lower interest rate environment, and an increase in policyholder life expectancies.

- As discussed in the Retail segment highlights that follow, during 2015, we recognized a premium deficiency reserve of approximately $176 million for certain of our individual commercial medical products for the 2016 coverage year. During 2016, we increased this premium deficiency reserve associated with the 2016 coverage year by $208 million, or $0.87 per diluted common share.

- During 2016, we recorded transaction and integration planning costs in connection with the Merger of approximately $104 million, or $0.64 per diluted common share. During 2015, we recorded transaction costs in connection with the Merger of approximately $23 million, or $0.14 per diluted common share. Certain costs associated with the transaction were not deductible for tax purposes.

- On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc., or Concentra, to MJ Acquisition Corporation, a joint venture between Select Medical Holdings Corporation and Welsh, Carson, Anderson & Stowe XII, L.P., a private equity fund, for approximately $1,055 million in cash, excluding approximately $22 million of transaction costs. In connection with the sale, we recognized a pre-tax gain, net of transaction costs, of $270 million, or $1.57 per diluted common share in 2015.

- Excluding the impact of the risk corridor receivables write-off, the long-term care reserve strengthening, the premium deficiency reserve recorded for the 2016 coverage year, and the sale of Concentra in 2015, the increase in pretax income primarily was due to year-over-year improvements in results for our individual Medicare Advantage business and Healthcare Services segment as well as increased profitability in our state-based contracts business.

- Year-over-year comparisons of the operating cost ratio are impacted by the completion of the sale of Concentra on June 1, 2015. Concentra carried a higher operating cost ratio than our Group and Retail segments. This was partially offset by the risk corridor receivables write-off.

- Investment income decreased $85 million in 2016, primarily due to lower realized capital gains in 2016 and lower interest rates partially offset by a higher average invested balance.

- As disclosed in Note 2 to the consolidated financial statements included in this report, we elected to early adopt new accounting guidance related to accounting for employee share-based payments, which changes how income tax effects of employee share-based payments are recorded. We adopted this guidance prospectively effective January 1, 2016. The adoption of this new guidance resulted in the recognition of approximately $20 million of tax benefits in net income, or $0.12 per diluted common share, in the first quarter of 2016.

- Operating cash flow provided by operations was $1.9 billion for the year ended December 31, 2016 as compared to operating cash flow provided by operations of $868 million for the year ended December 31, 2015. The increase in operating cash flow primarily was due to significantly favorable working capital items and higher earnings exclusive of the commercial risk corridor receivables write-off and the long-term care reserve strengthening in 2016, as well as the gain on sale of Concentra and the recognition of the premium deficiency reserve in 2015 discussed previously. The working capital changes year-over-year primarily reflect lower income tax payments, changes in the net receivable balance associated with the premium stabilization programs established under health care reform, or the 3R's, and the timing of payroll cycles resulting in one less payroll cycle in 2016, partially offset by the timing of payments for benefits expense.

- In 2016, we paid the federal government $916 million for the annual non-deductible health insurance industry fee compared to our payment of $867 million in 2015. This fee is not deductible for tax purposes, which significantly increased our effective income tax rate beginning in 2014. The health insurance industry fee is further described below under the section titled "Health Care Reform." The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee. This suspension will significantly reduce our operating costs and effective tax rate in 2017. Our effective tax rate for 2017 is expected to be approximately 36% to 37%. The decline in the effective tax rate primarily is due to the suspension of the annual health insurance industry fee in 2017.

- We paid dividends to stockholders of $177 million in 2016 as compared to $172 million in 2015.

Retail Segment

- On February 1, 2017, CMS issued its preliminary 2018 Medicare Advantage and Part D payment rates and proposed policy changes, which we refer to collectively as the Advance Notice. CMS has invited public comment on the Advance Notice before publishing final rates on April 3, 2017 (the Final Notice). In the Advance Notice, CMS estimates Medicare Advantage plans across the sector will, on average, experience a 0.25 percent increase in benchmark funding based on proposals included therein. As indicated by CMS, its estimate excludes the impact of fee-for-service county rebasing/re-pricing since the related impact is dependent upon finalization of certain data, which will be available with the publication of the Final Notice. CMS' estimate

includes 40 basis points of negative impact associated with Star quality bonuses sector-wide. Excluding that item, CMS' estimate would be a 0.65 percent increase. Based on our preliminary analysis using the same factors CMS included in its estimate, the components of which are detailed on CMS' website, we anticipate the proposals in the Advance Notice would result in a change to our benchmark funding relatively in line with CMS' estimate, excluding the impact attributable to Star quality bonuses. We believe we can design our 2018 Medicare Advantage plan filings, including the applicable level of rate changes, to remain competitive compared to both the combination of original Medicare with a supplement policy and Medicare Advantage products offered by our competitors. Failure to execute these strategies may result in a material adverse effect on our results of operations, financial position, and cash flows.

- The achievement of Star Ratings of four or higher qualifies Medicare Advantage plans for premium bonuses. Star Ratings for the 2018 bonus year issued by CMS in October 2016 indicated that the percentage of our July 31, 2016 Medicare Advantage membership in 4-Star plans or higher declined to approximately 37% from approximately 78% of our July 31, 2015 Medicare Advantage membership. The decline in membership in 4-Star rated plans does not take into account certain operational actions discussed below that we have taken and intend to take over the coming months to mitigate any potential negative impact of these published ratings on Star bonus revenues for 2018.

  We believe that the decline is primarily attributable to the impact of lower scores for certain Stars measures as a result of our 2015 comprehensive program audit by CMS. The Civil Monetary Penalty imposed by CMS following the audit resulted in a significant reduction to the Beneficiary Access and Plan Performance, or BAPP, measure. Additionally, an issue with the timeliness of appeal decisions noted in the audit resulted in automatic downgrades to two additional Star measures. Moreover, higher threshold levels for certain individual Star measures as compared to the previous year reduced our ratings on these measures. Thresholds for Star measures are calculated across the sector, without regard to weighted average membership of each plan. Together, these factors more than offset our improved Star rating performance in certain quality measures such as Healthcare Effectiveness Data and Information, or HEDIS.

  Our Healthcare Effectiveness Data and Information Set, or HEDIS, measures, demonstrating the achievement of clinical outcomes, are at record-high results for the company. Accordingly, we believe that our Star ratings for the 2018 bonus year do not accurately reflect our actual performance under certain Star measures. Consequently, we filed for reconsideration of certain of those ratings under the appropriate administrative process. We are also evaluating our contract structures for rationalization to mitigate the negative impact on Star bonus revenues for 2018.

  The ultimate financial impact to us related to 2018 Star bonus revenues is dependent upon multiple variables including, but not limited to, the number of Medicare Advantage members in 4-Star or higher rated plans and the geographic distribution of those members as well as a number of operational initiatives which would serve to mitigate the negative impact of our Star performance. Star results for the 2018 bonus year are not expected to materially impact our Medicare revenue for 2017 but could be material to 2018 Medicare revenues.

- In 2016, our Retail segment pretax income increased by $7 million, or 0.8%, from 2015 primarily driven by the year-over-year improvement in our individual Medicare Advantage and state-based Medicaid businesses along with the impact of the premium deficiency reserve recorded in the fourth quarter of 2015 associated with certain individual commercial medical policies for the 2016 coverage year. These items were substantially offset by the write-off of commercial risk corridor receivables as described further below and in the results of operations discussion that follows.

- Our Medicare Advantage results improved year-over-year primarily due to lower utilization and favorable year-over-year comparisons of prior-period medical claims reserve development. Operational initiatives are centered around optimizing the performance of our clinical programs to reduce medical cost trend. In addition our Medicare Advantage membership increased year-over-year as discussed below.

- Operating results for our individual commercial medical business compliant with the Health Care Reform Law have been challenged primarily due to unanticipated modifications in the program subsequent to the

passing of the Health Care Reform Law, resulting in higher covered population morbidity and the ensuing enrollment and claims issues causing volatility in claims experience. We took a number of actions in 2015 that we believed would improve the profitability of our individual commercial medical business in 2016. These actions were subject to regulatory restrictions in certain geographies and included premium increases for the 2016 coverage year related generally to the first half of 2015 claims experience, the discontinuation of certain products as well as exit of certain markets for 2016, network improvements, enhancements to claims and clinical processes and administrative cost control. Despite these actions, the deterioration in the second half of 2015 claims experience together with 2016 open enrollment results that included the retention of many high-utilizing members for 2016 resulted in a probable future loss. As a result of our assessment in the fourth quarter of 2015 of the profitability of our individual commercial medical policies compliant with the Health Care Reform Law, we recorded in that quarter a provision for probable future losses (premium deficiency reserve) for the 2016 coverage year of $176 million, or $0.74 per diluted common share. In 2016, we increased the premium deficiency reserve for the 2016 coverage year by $208 million, primarily as a result of unfavorable current and projected claims experience at that time. As of December 31, 2016, we had no remaining premium deficiency reserve.

For 2017, we are offering on-exchange individual commercial medical plans in 11 states, a reduction from the 15 states in which we offered on-exchange coverage in 2016. In addition, we discontinued substantially all Health Care Reform Law compliant off-exchange individual commercial medical plans effective January 1, 2017. Our 2017 geographic presence for our individual commercial medical offerings covers 156 counties, down from our 2016 presence in 1,351 counties (covering both on-exchange and off-exchange offerings). Given recent competitor actions, including market exits resulting in the automatic assignment of members to our plans, as well as sales and renewal results from the open enrollment process, we now expect 2017 premiums associated with Health Care Reform Law compliant offerings to be in the range of $850 million to $900 million. By comparison, our full year 2016 premiums associated with Health Care Reform Law compliant offerings were $3.3 billion. The decrease from 2016 results reflects the adjustment to our geographic presence and product discontinuances, erosion of competitive position, partially offset by premium increases as well as the projected impact of certain competitor actions.

On February 14, 2017, we announced we are exiting our individual commercial medical businesses January 1, 2018. As discussed previously, we have worked over the past several years to address market and programmatic challenges in order to keep coverage options available wherever we could offer a viable product. This has included pursuing business changes, such as modifying networks, restructuring product offerings, reducing the company's geographic footprint and increasing premiums. All of these actions were taken with the expectation that our individual commercial medical business would stabilize to the point where we could continue to participate in the program. However, based on our initial analysis of data associated with our healthcare exchange membership following the 2017 open enrollment period, we are seeing further signs of an unbalanced risk pool. Therefore, we have decided that we cannot continue to offer this coverage for 2018.

- Individual Medicare Advantage membership of 2,837,600 at December 31, 2016 increased 84,200 members, or 3.1%, from 2,753,400 at December 31, 2015 reflecting net membership additions, particularly for our Medicare Advantage Health Maintenance Organization, or HMO, offerings. January 2017 individual Medicare Advantage membership approximated 2,848,000, increasing approximately 10,400 members from December 31, 2016 reflecting net membership additions during the recently completed Annual Election Period for Medicare beneficiaries, including the loss of approximately 50,000 members in plans no longer offered for 2017. For full year 2017, we anticipate net membership growth in our individual Medicare Advantage offerings of 30,000 to 40,000.
- Group Medicare Advantage membership of 355,400 at December 31, 2016 decreased 128,700 members, or 26.6%, from 484,100 at December 31, 2015 primarily reflecting the loss of a large account that moved to a private exchange offering on January 1, 2016. January 2017 group Medicare Advantage membership approximated 431,000, increasing approximately 75,600 members, or 21%, from December 31, 2016 reflecting net membership additions during the recently completed Annual Election Period for Medicare beneficiaries.

For full year 2017, we expect net membership growth in our Group Medicare Advantage offerings of 70,000 to 80,000.

- Medicare stand-alone PDP membership of 4,951,400 at December 31, 2016 increased 393,500 members, or 8.6%, from 4,557,900 at December 31, 2015 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2016 plan year. January 2017 Medicare stand-alone PDP membership (excluding transitional growth from the LI-NET prescription drug plan program) increased approximately 222,600 members, or 4%, from December 31, 2016 to 5,174,000 members reflecting net membership additions during the recently completed Annual Election Period for Medicare beneficiaries. For full year 2017, we anticipate net membership growth in our Medicare stand-alone PDP offerings of 320,000 to 340,000.
- Our state-based Medicaid membership of 388,100 at December 31, 2016 increased 14,400 members, or 3.9%, from 373,700 at December 31, 2015 primarily driven by the addition of members under our Florida Medicaid contract.
- Individual commercial medical membership of 654,800 at December 31, 2016 decreased 244,300 members, or 27.2%, from 899,100 at December 31, 2015 primarily reflecting the loss of on-exchange members due to product competitiveness, the loss of membership associated with the discontinuance of certain Health Care Reform Law compliant plans in 2016, the loss of membership associated with non-payment of premiums or termination by CMS due to lack of eligibility documentation, and the loss of members subscribing to plans that are not compliant with the Health Care Reform Law. At December 31, 2016, individual commercial medical membership in plans compliant with the Health Care Reform Law, both on-exchange and off-exchange, was 580,100 members, a decrease of 177,800 members or 23.5% from December 31, 2015.

  January 2017 individual commercial medical membership approximated 204,000, including 152,000 enrolled in plans compliant with the Health Care Reform Law. The decline of approximately 450,800 members, or 69%, from December 31, 2016 reflects net membership declines during the on-going open enrollment period for healthcare exchanges and the impact of product and service area reductions.

Group Segment

- Group segment pretax income for the year ended December 31, 2016 was essentially unchanged from the year ended December 31, 2015 as discussed in the results of operations discussion that follows.
- On July 21, 2016, we were notified by the Defense Health Agency, or DHA, that we were awarded the TRICARE East Region contract, with delivery of health care services expected to commence on October 1, 2017. The new East Region is a combination of the current North Region and South Region. The next generation East Region and West Region contract awards are currently subject to protests by unsuccessful bidders in the U.S. Court of Federal Claims and before the DHA. Our current TRICARE South Region contract expires March 31, 2017.
- Membership in Go365™ (known as HumanaVitality® prior to January 2017), our wellness and loyalty rewards program, declined 7.2% to 3,649,100 at December 31, 2016 from 3,932,300 at December 31, 2015 reflecting a decline in group Medicare Advantage membership from the loss of the large account on January 1, 2016 and a decline in individual commercial medical membership.

Healthcare Services Segment

- Year-over-year comparisons of results of operations are impacted by the completion of the sale of Concentra on June 1, 2015.

- As discussed in the detailed Healthcare Services segment results of operations discussion that follows, our Healthcare Services segment pretax income increased $86 million, or 8.8%, for the year ended December 31, 2016. This increase was primarily due to incremental earnings associated with revenue growth from our pharmacy solutions business as it increased mail-order penetration and served our growing individual Medicare membership, partially offset by ongoing pressures in our provider services business reflecting significantly lower Medicare rates year-over-year associated with CMS' risk coding recalibration for 2016 in geographies where our provider assets are primarily located.
- Programs to enhance the quality of care for members are key elements of our integrated care delivery model. At December 31, 2016, we enrolled approximately 622,300 Medicare Advantage members with complex chronic conditions in the Humana Chronic Care Program, a 5.4% increase compared with approximately 590,300 members at December 31, 2015, reflecting a greater focus on members living with the most chronic conditions. Enhanced predictive modeling capabilities and proactive clinical outreach and engagement of those members helped drive increased clinical program participation, offset by the loss of engaged members associated with the group Medicare Advantage account that termed on January 1, 2016 as discussed previously. We continue to refine our clinical management programs to help optimize the quality of healthcare for our members and ensure appropriate returns on our investments.

Other Businesses

- As previously disclosed, in the fourth quarter of 2016, we increased future policy benefits expense by approximately $505 million for reserve strengthening associated with our closed block of long-term care insurance policies. This increase primarily was driven by emerging experience indicating longer claims duration, a prolonged lower interest rate environment, and an increase in policyholder life expectancies as discussed further in Note 18 to the consolidated financial statements included in Item 8. Financial Statements and Supplementary Data in this 2016 Form 10-K.

Health Care Reform

The Health Care Reform Law enacted significant reforms to various aspects of the U.S. health insurance industry. Certain significant provisions of the Health Care Reform Law include, among others, mandated coverage requirements, mandated benefits and guarantee issuance associated with commercial medical insurance, rebates to policyholders based on minimum benefit ratios, adjustments to Medicare Advantage premiums, the establishment of federally-facilitated or state-based exchanges coupled with programs designed to spread risk among insurers, and the introduction of plan designs based on set actuarial values. In addition, the Health Care Reform Law established insurance industry assessments, including an annual health insurance industry fee and a three-year $25 billion industry wide commercial reinsurance fee. The annual health insurance industry fee levied on the insurance industry was $8 billion in 2014 and $11.3 billion in each of 2015 and 2016, with increasing annual amounts starting in 2018, and is not deductible for income tax purposes, which significantly increased our effective income tax rate. Our effective tax rate for 2016 was approximately 60.5%. The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee. This suspension will significantly reduce our operating costs and effective tax rate in 2017. Our effective tax rate for 2017 is expected to be approximately 36% to 37%. The decline in the effective tax rate primarily is due to the suspension of the annual health insurance industry fee in 2017. The health insurance industry fee levied on the insurance industry was previously expected to be $14 billion in 2017. In 2016, we paid the federal government $916 million for the annual health insurance industry fee, a 5.7% increase from $867 million in 2015, primarily reflecting growth in our market share.

In addition, the Health Care Reform Law expands federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms comes, in part, from material additional fees and taxes on us (as discussed above) and other health plans and individuals which began in 2014, as well as reductions in certain levels of payments to us and other health plans under Medicare as described in this 2016 Form 10-K.

As noted above, the Health Care Reform Law required the establishment of health insurance exchanges for individuals and small employers to purchase health insurance that became effective January 1, 2014, with an annual open enrollment period. Insurers participating on the health insurance exchanges must offer a minimum level of benefits

and are subject to guidelines on setting premium rates and coverage limitations. We may be adversely selected by individuals who have a higher acuity level than the anticipated pool of participants in this market. In addition, the risk corridor, reinsurance, and risk adjustment provisions of the Health Care Reform Law, established to apportion risk for insurers, may not be effective in appropriately mitigating the financial risks related to our products, and audits of our submissions under these programs may result in returns of funds distributed. In addition, regulatory changes to the implementation of the Health Care Reform Law that allowed individuals to remain in plans that are not compliant with the Health Care Reform Law or to enroll outside of the annual enrollment period may have an adverse effect on our pool of participants in the health insurance exchange. In addition, states may impose restrictions on our ability to increase rates. All of these factors may have a material adverse effect on our results of operations, financial position, or cash flows if our premiums are not adequate or do not appropriately reflect the acuity of these individuals. Any variation from our expectations regarding acuity, enrollment levels, adverse selection, or other assumptions used in setting premium rates could have a material adverse effect on our results of operations, financial position, and cash flows and could impact our decision to participate or continue in the program in certain states. For 2017, we are offering on-exchange individual commercial medical plans in 11 states, a reduction from the 15 states in which we offered on-exchange coverage in 2016. In addition, we discontinued substantially all Health Care Reform Law compliant off-exchange individual commercial medical plans effective January 1, 2017.

If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. Additionally, potential legislative changes, including activities to repeal or replace the Health Care Reform Law, creates uncertainty for our business, and we cannot predict when, or in what form, such legislative changes may occur. We may be unable to adjust our product offerings, geographic footprint, or pricing during any given year such legislative changes occur in sufficient time to mitigate any adverse effects.

As discussed above, it is reasonably possible that the Health Care Reform Law and related regulations, as well as future legislative changes, including legislative restrictions on our ability to manage our provider network or otherwise operate our business, or regulatory restrictions on profitability, including by comparison of our Medicare Advantage profitability to our non-Medicare Advantage business profitability and a requirement that they remain within certain ranges of each other, in the aggregate may have a material adverse effect on our results of operations (including restricting revenue, enrollment and premium growth in certain products and market segments, restricting our ability to expand into new markets, increasing our medical and operating costs, further lowering our Medicare payment rates and increasing our expenses associated with the non-deductible health insurance industry fee and other assessments); our financial position (including our ability to maintain the value of our goodwill); and our cash flows (including the delayed receipt of amounts due under the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law).

On November 10, 2016, the U.S. Court of Federal Claims ruled in favor of the government in one of a series of cases filed by insurers, unrelated to us, against HHS to collect risk corridor payments, rejecting all of the insurer's statutory, contract and Constitutional claims for payment. On November 18, 2016, HHS issued a memorandum indicating a significant funding shortfall for the 2015 coverage year, the second consecutive year of significant shortfalls. Given the successful challenge of the risk corridor provisions in court, Congressional inquiries into the funding of the risk corridor program, and significant funding shortfalls under the first two years of the program, during the fourth quarter of 2016 we wrote-off $583 million in risk corridor receivables outstanding as of September 30, 2016, including $415 million associated with the 2014 and 2015 coverage years. From inception of the risk corridor program through December 31, 2016, we collected approximately $36 million from CMS for risk corridor receivables associated with the 2014 coverage year funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 and 2015 risk corridor program.

We intend for the discussion of our financial condition and results of operations that follows to assist in the understanding of our financial statements and related changes in certain key items in those financial statements from year to year, including the primary factors that accounted for those changes. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and home based services as well as clinical programs, to our Retail and Group customers and are described in Note 17 to the consolidated financial statements included in Item 8. Financial Statements and Supplementary Data in this 2016 Form 10-K.

Comparison of Results of Operations for 2016 and 2015

Certain financial data on a consolidated basis and for our segments was as follows for the years ended December 31, 2016 and 2015:

Consolidated

	2016	2015	Change	
			Dollars	Percentage
	(dollars in millions, except per common share results)			
Revenues:				
Premiums:				
Retail	$ 46,546	$ 45,805	$ 741	1.6 %
Group	6,437	6,569	(132)	(2.0)%
Other Businesses	38	35	3	8.6 %
Total premiums	53,021	52,409	612	1.2 %
Services:				
Retail	8	9	(1)	(11.1)%
Group	694	698	(4)	(0.6)%
Healthcare Services	257	685	(428)	(62.5)%
Other Businesses	10	14	(4)	(28.6)%
Total services	969	1,406	(437)	(31.1)%
Investment income	389	474	(85)	(17.9)%
Total revenues	54,379	54,289	90	0.2 %
Operating expenses:				
Benefits	45,007	44,269	738	1.7 %
Operating costs	7,277	7,318	(41)	(0.6)%
Depreciation and amortization	354	355	(1)	(0.3)%
Total operating expenses	52,638	51,942	696	1.3 %
Income from operations	1,741	2,347	(606)	(25.8)%
Gain on sale of business	—	270	(270)	100.0 %
Interest expense	189	186	3	1.6 %
Income before income taxes	1,552	2,431	(879)	(36.2)%
Provision for income taxes	938	1,155	(217)	(18.8)%
Net income	$ 614	$ 1,276	$ (662)	(51.9)%
Diluted earnings per common share	$ 4.07	$ 8.44	$ (4.37)	(51.8)%
Benefit ratio (a)	84.9%	84.5%		0.4 %
Operating cost ratio (b)	13.5%	13.6%		(0.1)%
Effective tax rate	60.5%	47.5%		13.0 %

(a) Represents total benefits expense as a percentage of premiums revenue.

(b) Represents total operating costs, excluding depreciation and amortization, as a percentage of total revenues less investment income.

Summary

Net income for 2016 was $614 million, or $4.07 per diluted common share, in 2016 compared to $1.3 billion, or $8.44 per diluted common share, in 2015. Net income includes a write-off of $2.43 per diluted common share in

receivables associated with the commercial risk corridor premium stabilization program and reserve strengthening for our non-strategic closed block of long-term care insurance business of $2.11 per diluted common share, as discussed below. These items were partially offset by the impact of the premium deficiency reserve of $0.74 per diluted common share recorded in the fourth quarter of 2015 for certain of our individual commercial medical products for the 2016 coverage year. In addition, the completion of the sale of Concentra on June 1, 2015 resulted in an after-tax gain of $1.57 per diluted common share in 2015. Excluding these items, the increase primarily was due to year-over-year improvement in results for our individual Medicare Advantage business and our Healthcare Services segment as well as increased profitability in our state-based Medicaid business, partially offset by an increase in the effective tax rate as discussed below. In addition, 2016 includes expenses of $0.64 per diluted common share and 2015 includes expenses of $0.14 per diluted common share for transaction and integration planning costs associated with the Merger, certain of which were not deductible for tax purposes.

Premiums Revenue

Consolidated premiums increased $612 million, or 1.2%, from 2015 to $53.0 billion for 2016 primarily reflecting higher premiums in the Retail segment mainly driven by average membership growth and per member premium increases for certain of our lines of business. These increases were partially offset by the write-off of $583 million of receivables associated with the commercial risk corridor premium stabilization program, the loss of premiums associated with a large group Medicare account that moved to a private exchange on January 1, 2016, and a decline in premiums revenue associated with fewer individual commercial medical members as discussed in our segment results of operations discussion that follows. Average membership is calculated by summing the ending membership for each month in a period and dividing the result by the number of months in a period. Premiums revenue reflects changes in membership and average per member premiums. Items impacting average per member premiums include changes in premium rates as well as changes in the geographic mix of membership, the mix of product offerings, and the mix of benefit plans selected by our membership.

Services Revenue

Consolidated services revenue decreased $437 million, or 31.1%, from 2015 to $1.0 billion for 2016 primarily due to the completion of the sale of Concentra on June 1, 2015.

Investment Income

Investment income totaled $389 million for 2016, a decrease of $85 million, or 17.9%, from 2015, primarily due to lower realized capital gains in 2016 and lower interest rates partially offset by a higher average invested balance.

Benefits Expense

Consolidated benefits expense was $45.0 billion for 2016, an increase of $738 million, or 1.7%, from 2015 primarily due to $505 million in incremental benefits expense for the reserve strengthening in our non-strategic closed block of long-term care insurance policies partially offset by the premium deficiency reserve recorded in the fourth quarter of 2015 for certain of our individual commercial medical products for the 2016 coverage year. Excluding the long-term care reserve strengthening and impact of the premium deficiency reserve, the increase is primarily due to an increase in the Retail segment mainly driven by higher average individual Medicare Advantage membership. As more fully described herein under the section entitled “Benefits Expense Recognition”, actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $582 million in 2016 and $236 million in 2015. The increase in prior-period medical claims reserve development year over-year primarily was due to favorable year-over-year comparisons for our Medicare Advantage and individual commercial medical businesses.

The consolidated benefit ratio for 2016 was 84.9%, an increase of 40 basis points from 2015 primarily due to the incremental benefits expense for the reserve strengthening in our non-strategic closed block of long-term care insurance policies, the impact on the benefit ratio of lower consolidated premiums associated with the write-off of receivables for the commercial risk corridor premium stabilization program, and the impact of the premium deficiency reserve

recorded in the fourth quarter of 2015 for certain of our individual commercial medical products for the 2016 coverage year. Excluding the impact of the write-off of the commercial risk corridor receivables and the premium deficiency reserve, these items were partially offset by year-over-year improvement in both the Retail and Group segment benefit ratios as discussed in the segment results of operations discussion that follows. Favorable prior-period medical claims reserve development decreased the consolidated benefit ratio by approximately 110 basis points in 2016 versus approximately 50 basis points in 2015.

Operating Costs

Our segments incur both direct and shared indirect operating costs. We allocate the indirect costs shared by the segments primarily as a function of revenues. As a result, the profitability of each segment is interdependent.

Consolidated operating costs decreased $41 million, or 0.6%, from 2015 to $7.3 billion in 2016 primarily due to the completion of the sale of Concentra on June 1, 2015

The consolidated operating cost ratio for 2016 was 13.5%, decreasing 10 basis points from 2015 primarily due to the completion of the sale of Concentra on June 1, 2015. Concentra carried a higher operating cost ratio than our Group and Retail segments. This was partially offset by the unfavorable year-over-year comparison associated with the temporary suspension of certain discretionary administrative costs in the latter half of 2015, along with the impact of the commercial risk corridor receivables write-off in the fourth quarter of 2016. In addition, transaction and integration planning costs associated with the Merger increased the operating cost ratio by 20 basis points in 2016. There was minimal impact for transaction costs to the operating cost ratio in 2015.

Depreciation and Amortization

Depreciation and amortization for 2016 of $354 million was relatively unchanged from 2015.

Interest Expense

Interest expense was $189 million for 2016 compared to $186 million for 2015, an increase of $3 million, or 1.6%.

Income Taxes

Our effective tax rate during 2016 was 60.5% compared to the effective tax rate of 47.5% in 2015 primarily reflecting lower pretax income year-over-year, the beneficial effect of the sale of Concentra on June 1, 2015 and the impact of non-deductible transaction costs associated with the Merger. Non-deductible transaction and integration planning costs associated with the Merger increased our effective tax rate by approximately 3.4 percentage points in 2016 versus approximately 0.4 percentage points in 2015. Conversely, the tax effect of the sale of Concentra reduced our effective tax rate by approximately 4.5 percentage points in 2015. See Note 11 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for a complete reconciliation of the federal statutory rate to the effective tax rate. Our effective tax rate for 2017 is expected to be approximately 36% to 37%. The decline in the effective tax rate primarily is due to the suspension of the annual health insurance industry fee in 2017.

The effective tax rate for 2016 also reflects tax benefits associated with adopting new guidance related to the accounting for employee share-based payments effective January 1, 2016 as described in Note 2 to the condensed consolidated financial statements included in this report, which decreased our effective tax rate by approximately 1.2 percentage points in 2016.

Retail Segment

	2016	2015	Change Members	Change Percentage
Membership:				
Medical membership:				
Individual Medicare Advantage	2,837,600	2,753,400	84,200	3.1 %
Group Medicare Advantage	355,400	484,100	(128,700)	(26.6)%
Medicare stand-alone PDP	4,951,400	4,557,900	393,500	8.6 %
Total Retail Medicare	8,144,400	7,795,400	349,000	4.5 %
Individual commercial	654,800	899,100	(244,300)	(27.2)%
State-based Medicaid	388,100	373,700	14,400	3.9 %

Operating cost ratio	11.5%	11.2%		0.3 %

Pretax Results

- Retail segment pretax income was $937 million in 2016, an increase of $7 million, or 0.8%, compared to 2015 primarily driven by the year-over-year improvement in our individual Medicare Advantage and state-based Medicaid businesses along with the impact of the premium deficiency reserve recorded in the fourth quarter of 2015 associated with certain individual commercial medical policies for the 2016 coverage year. These items were substantially offset by the write-off of commercial risk corridor receivables as discussed below.

Enrollment

- Individual Medicare Advantage membership increased 84,200 members, or 3.1%, from December 31, 2015 to December 31, 2016 reflecting net membership additions, particularly for our HMO offerings, for the 2016 plan year.

- Group Medicare Advantage membership decreased 128,700 members, or 26.6%, from December 31, 2015 to December 31, 2016 reflecting the loss of a large account that moved to a private exchange offering on January 1, 2016.

- Medicare stand-alone PDP membership increased 393,500 members, or 8.6%, from December 31, 2015 to December 31, 2016 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2016 plan year.

- Individual commercial medical membership decreased 244,300 members, or 27.2%, from December 31, 2015 to December 31, 2016 primarily reflecting the loss of on-exchange members due to product competitiveness, the loss of membership associated with the discontinuance of certain Health Care Reform Law compliant plans in 2016, the loss of membership associated with non-payment of premiums or termination by CMS due to lack of eligibility documentation, and the loss of members subscribing to plans that are not compliant with the Health Care Reform Law.

- State-based Medicaid membership increased 14,400 members, or 3.9%, from December 31, 2015 to December 31, 2016 primarily driven by the addition of members under our Florida Medicaid contract.

- Individual specialty membership decreased 65,000 members, or 5.6%, from December 31, 2015 to December 31, 2016 primarily due to the loss of individual commercial medical members that also had specialty coverage.

Premiums revenue

- Retail segment premiums increased $741 million, or 1.6%, from 2015 to 2016 primarily due to higher average membership for our individual Medicare Advantage and state-based Medicaid businesses and per member premium increases for certain lines of business. Average individual Medicare Advantage membership increased 3.9% in 2016. These items were partially offset by the write-off of approximately $583 million of receivables associated with the commercial risk corridor premium stabilization program, and declines in group Medicare Advantage (including the loss of a large group Medicare Advantage account) and individual commercial medical membership.

Benefits expense

- The Retail segment benefit ratio of 86.2% for 2016 decreased 50 basis points from 2015 primarily due to lower year-over-year Medicare Advantage utilization, favorable comparisons of prior-year medical claims reserve development, and the impact of the premium deficiency reserve recorded in the fourth quarter of 2015 for certain of our individual commercial medical products for the 2016 coverage year. These items were partially offset by the reduction of premiums related to the write-off of receivables associated with the commercial risk corridor premium stabilization program which increased the Retail segment benefit ratio by approximately 100 basis points in 2016. As previously disclosed, in the fourth quarter of 2015 we recorded a premium deficiency reserve associated with our 2016 individual commercial offerings compliant with the Health Care Reform Law, increasing our 2015 benefit ratio by 40 basis points. During 2016, we increased the premium deficiency reserve for the 2016 coverage year and recorded a change in estimate of $208 million with a corresponding increase in benefits expense primarily as a result of unfavorable current and projected claims experience.

- The Retail segment's benefits expense for 2016 included the beneficial effect of $535 million in favorable prior-year medical claims reserve development versus $228 million in 2015. This favorable prior-year medical claims reserve development decreased the Retail segment benefit ratio by approximately 110 basis points in

2016 versus approximately 50 basis points in 2015. The year-over-year increase in prior-period medical claims reserve development primarily was due to favorable year-over-year comparisons for our Medicare Advantage and individual commercial medical business.

Operating costs

- The Retail segment operating cost ratio of 11.5% for 2016 increased 30 basis points from 2015 primarily due to the impact on premiums of the write-off of receivables associated with the commercial risk corridor premium stabilization program, the unfavorable comparison to unusually low operating expenses in 2015 resulting from the temporary suspension of certain discretionary administrative costs, and the loss of a large group Medicare Advantage account which carried a lower operating cost ratio than that for our individual Medicare Advantage business. The non-deductible health insurance industry fee increased the operating cost ratio by approximately 170 basis points in 2016 as compared to 160 basis points in 2015.

Benefit ratio	79.6%	80.2%		(0.6)%
Operating cost ratio	24.6%	24.0%		0.6 %

Pretax Results

- Group segment pretax income was relatively unchanged, decreasing $1 million, or 0.4%, to $257 million in 2016 as an increase in the operating cost ratio was substantially offset by improvement in the benefit ratio as discussed below.

Enrollment

- Fully-insured commercial group medical membership decreased 42,300 members, or 3.6% from December 31, 2015 reflecting lower membership in both large and small group accounts.

- Group ASO commercial medical membership decreased 137,500 members, or 19.3%, from December 31, 2015 to December 31, 2016 primarily due to the loss of certain large group accounts as a result of continued discipline in pricing of services for self-funded accounts amid a highly competitive environment.

- Group specialty membership decreased 195,600 members, or 3.2%, from December 31, 2015 to December 31, 2016 primarily due to the loss of several large stand-alone dental and vision accounts as well as the loss of certain fully-insured group medical accounts that also had specialty coverage.

Premiums revenue

- Group segment premiums decreased $132 million, or 2.0%, from 2015 to 2016 primarily due to a decline in fully-insured commercial medical membership as described above, partially offset by an increase in fully-insured commercial medical per member premiums.

Services revenue

- Group segment services revenue decreased $4 million, or 0.6%, from 2015 to 2016 primarily due to a decline in group ASO commercial medical membership.

Benefits expense

- The Group segment benefit ratio decreased 60 basis points from 80.2% in 2015 to 79.6% in 2016 primarily reflecting the beneficial effect of higher prior-year medical claims reserve development in 2016 and lower utilization.

- The Group segment's benefits expense included the beneficial effect of $46 million in favorable prior-year medical claims reserve development in 2016 versus $7 million in 2015. This favorable prior-year medical claims reserve development decreased the Group segment benefit ratio by approximately 70 basis points in 2016 versus approximately 10 basis points in 2015.

Operating costs

- The Group segment operating cost ratio of 24.6% for 2016 increased 60 basis points from 24.0% for 2015 primarily due to the unfavorable comparison to unusually low operating expenses in 2015 resulting from the temporary suspension of certain discretionary administrative costs. The non-deductible health insurance industry fee increased the operating cost ratio by approximately 150 basis points in 2016 as compared to 140 basis points in 2015.

Total services and intersegment revenues	$ 25,092	$ 23,605	$ 1,487	6.3 %
Income before income taxes	$ 1,067	$ 981	$ 86	8.8 %
Operating cost ratio	95.4%	95.2%		0.2 %

Pretax results

- Healthcare Services segment pretax income of $1,067 million for 2016 increased $86 million, or 8.8%, from 2015 primarily due to incremental earnings associated with revenue growth from our pharmacy solutions business as it increased mail-order penetration and served our growing individual Medicare membership. The increase was partially offset by ongoing pressures in our provider services business reflecting significantly lower Medicare rates year-over-year associated with CMS' risk coding recalibration for 2016 in geographies where our provider assets are primarily located.

Script Volume

- Humana Pharmacy Solutions® script volumes for the Retail and Group segment membership increased to approximately 426 million in 2016, up 7% versus scripts of approximately 398 million in 2015. The increase primarily reflects growth associated with higher average medical membership for 2016 than in 2015.

Services revenue

- Services revenue decreased $428 million, or 62.5%, from 2015 to $257 million for 2016 primarily due to the completion of the sale of Concentra on June 1, 2015.

Intersegment revenues

- Intersegment revenues increased $1.9 billion, or 8.4%, from 2015 to $24.8 billion for 2016 primarily due to increased mail order penetration and growth in our individual Medicare Advantage and Medicare stand-alone PDP membership which resulted in increased engagement of members in clinical programs and higher utilization of services across the segment.

Operating costs

- The Healthcare Services segment operating cost ratio of 95.4% for 2016 increased slightly from 2015 primarily due to a higher operating cost ratio for our provider services business reflecting significantly lower Medicare rates year-over-year as discussed above, partially offset by operating cost efficiencies associated with our pharmacy operations.

Other Businesses

As previously disclosed, in the fourth quarter of 2016, we increased future policy benefits expense by approximately $505 million for reserve strengthening associated with our closed block of long-term care insurance policies. This increase primarily was driven by emerging experience indicating longer claims duration, a prolonged lower interest rate environment, and an increase in policyholder life expectancies as discussed further in Note 18 to the consolidated financial statements included in Item 8. Financial Statements and Supplementary Data in this 2016 Form 10-K.

Comparison of Results of Operations for 2015 and 2014

Certain financial data on a consolidated basis and for our segments was as follows for the years ended December 31, 2015 and 2014:

Operating cost ratio (b)	13.6%	15.9%		(2.3)%
Effective tax rate	47.5%	47.2%		0.3 %

(a) Represents total benefits expense as a percentage of premiums revenue.

(b) Represents total operating costs, excluding depreciation and amortization, as a percentage of total revenues less investment income.

Summary

Net income was $1.3 billion, or $8.44 per diluted common share, in 2015 compared to $1.1 billion, or $7.36 per diluted common share, in 2014. The completion of the sale of Concentra on June 1, 2015 resulted in an after-tax gain of $1.57 per diluted common share in 2015. Excluding the impact of the sale of Concentra, the decrease primarily was

due to a decline in Retail segment pretax results, including expense of $0.74 per diluted common share for a premium deficiency reserve for certain of our individual commercial medical products for the 2016 coverage year, and an increase in the effective tax rate as discussed below. These items were partially offset by year-over-year improvement in the Group and Healthcare Services segment pretax results and higher investment income. In addition, 2015 includes expenses of $0.14 per diluted common share for transaction costs associated with the Merger, certain of which were not deductible for tax purposes. Net income for 2014 includes expenses of $0.15 per diluted common share associated with a loss on extinguishment of debt for the redemption of certain senior notes in 2014. Year-over-year comparisons of diluted earnings per common share are also favorably impacted by a lower number of shares used to compute diluted earnings per common share in 2015 reflecting the impact of share repurchases.

Premiums Revenue

Consolidated premiums increased $6.5 billion, or 14.0%, from 2014 to $52.4 billion for 2015 primarily reflecting higher premiums in both the Retail and Group segments. These higher premiums were primarily driven by average membership growth in the Retail segment and an increase in fully-insured group commercial medical per member premiums in the Group segment.

Services Revenue

Consolidated services revenue decreased $758 million, or 35.0%, from 2014 to $1.4 billion for 2015 primarily due to the completion of the sale of Concentra on June 1, 2015 as well as the loss of certain large group ASO accounts as a result of continued discipline in pricing of services for self-funded accounts amid a highly competitive environment.

Investment Income

Investment income totaled $474 million for 2015, an increase of $97 million from 2014, primarily due to higher realized capital gains in 2015 as a result of the repositioning of our portfolio given recent market volatility and anticipated changes to interest rates, with higher average invested balances being substantially offset by lower interest rates.

Benefits Expense

Consolidated benefits expense was $44.3 billion for 2015, an increase of $6.1 billion, or 16.0%, from 2014 primarily due to an increase in the Retail segment mainly driven by higher average Medicare Advantage membership and individual commercial medical on-exchange and off-exchange membership in plans compliant with the Health Care Reform Law. As more fully described herein under the section entitled “Benefits Expense Recognition”, actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $236 million in 2015 and $518 million in 2014. The decline in prior-period medical claims reserve development year over-year primarily was due to Medicare Advantage and individual commercial medical claims development in the Retail segment as discussed further in the segment results of operations discussion that follows.

The consolidated benefit ratio for 2015 was 84.5%, an increase of 150 basis points from 2014 primarily due to increases in the Retail segment, including the impact of recognizing a premium deficiency reserve for certain of our individual commercial medical products for the 2016 coverage year, and Group segment ratios as discussed in the segment results of operations discussion that follows. The increase in benefits expense associated with the recognition of the premium deficiency reserve increased the consolidated benefit ratio by approximately 30 basis points in 2015. Favorable prior-period medical claims reserve development decreased the consolidated benefit ratio by approximately 50 basis points in 2015 versus approximately 110 basis points in 2014.

Operating Costs

Consolidated operating costs decreased $321 million, or 4.2%, in 2015 compared to 2014 primarily due to cost management initiatives across all lines of business as well as the completion of the sale of Concentra on June 1, 2015, partially offset by increases in costs mandated by the Health Care Reform Law, including the non-deductible health insurance industry fee.

The consolidated operating cost ratio for 2015 was 13.6%, decreasing 230 basis points from 2014 primarily due to decreases in the operating cost ratios in the Group and Retail segments reflecting cost management initiatives, as well as the completion of the sale of Concentra on June 1, 2015. Concentra carried a higher operating cost ratio.

Depreciation and Amortization

Depreciation and amortization for 2015 totaled $355 million, increasing $22 million, or 6.6% from 2014, reflecting higher depreciation expense from capital expenditures.

Interest Expense

Interest expense was $186 million for 2015 compared to $192 million for 2014, a decrease of $6 million, or 3.1%, primarily reflecting a higher average long-term debt balance due to the issuance of senior notes in September 2014, partially offset by the recognition of a loss on extinguishment of debt of approximately $37 million in October 2014 for the redemption of our $500 million 6.45% senior unsecured notes due June 1, 2016.

Income Taxes

Our effective tax rate during 2015 was 47.5% compared to the effective tax rate of 47.2% in 2014. The increase in the effective tax rate primarily was due to an increase in the non-deductible health insurance industry fee from 2014, substantially offset by the favorable tax effect of the gain on the sale of Concentra. See Note 11 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for a complete reconciliation of the federal statutory rate to the effective tax rate.

Benefit ratio	86.7%	84.9%		1.8 %
Operating cost ratio	11.2%	11.6%		(0.4)%

Pretax Results

- Retail segment pretax income was $930 million in 2015, a decrease of $409 million, or 30.5%, compared to 2014 primarily driven by an increase in the benefit ratio for 2015, including the impact of recognizing a premium deficiency reserve of approximately $176 million for certain of our individual commercial medical products for the 2016 coverage year, partially offset by a decline in the operating cost ratio, Medicare Advantage membership growth, and higher investment income year-over-year.

Enrollment

- Individual Medicare Advantage membership increased 325,500 members, or 13.4%, from December 31, 2014 to December 31, 2015 reflecting net membership additions, particularly for our HMO offerings, for the 2015 plan year.
- Group Medicare Advantage membership decreased 5,600 members, or 1.1%, from December 31, 2014 to December 31, 2015.
- Medicare stand-alone PDP membership increased 563,900 members, or 14.1%, from December 31, 2014 to December 31, 2015 reflecting net membership additions, primarily for our Humana-Walmart plan offering, for the 2015 plan year.
- Individual commercial medical membership decreased 117,100 members, or 11.5%, from December 31, 2014 to December 31, 2015 primarily reflecting the loss of approximately 150,000 members due to termination by CMS for lack of proper eligibility documentation from the member as well as the loss of members who had subscribed to plans that were not compliant with the Health Care Reform Law. These declines were partially offset by an increase in membership in plans that are compliant with the Health Care Reform Law, primarily off-exchange
- State-based Medicaid membership increased 56,900 members, or 18.0%, from December 31, 2014 to December 31, 2015 primarily driven by the addition of members under our Florida Medicaid contract.

- Individual specialty membership decreased 12,700 members, or 1.1%, from December 31, 2014 to December 31, 2015 primarily driven by a membership decline in supplemental health and financial protection product and vision offerings.

Premiums revenue

- Retail segment premiums increased $6.4 billion, or 16.1%, from 2014 to 2015 primarily due to membership growth across our Medicare Advantage, state-based Medicaid, and Medicare stand-alone PDP lines of business, as well as a heavier percentage of individual commercial medical business in higher premium plans compliant with the Health Care Reform Law. Average Medicare Advantage membership increased 11.8% in 2015.

Benefits expense

- The Retail segment benefit ratio of 86.7% for 2015 increased 180 basis points from 2014 primarily due to higher than expected medical costs as compared to the assumptions used in our pricing, the recognition of a premium deficiency reserve in the fourth quarter of 2015 for certain of our individual commercial medical products for the 2016 coverage year, and unfavorable year-over-year comparisons of prior-period medical claims reserve development as discussed below. In addition, the increase reflects higher benefit ratios associated with a greater number of members from state-based contracts and the impact of the change in estimate for the 2014 net 3Rs receivables in 2015. These items were partially offset by the impact of the increase in the health insurance industry fee included in the pricing of our products. In addition, the 2015 period was favorably impacted by the release of reserves for future policy benefits as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law.

- We experienced higher than expected medical costs as compared to the assumptions used in our pricing for 2015 primarily due to lower-than-expected 2015 Medicare Advantage financial claim recovery levels and lower-than-anticipated reductions in inpatient admissions. In addition, medical claims associated with certain individual commercial medical products, in particular products compliant with the Health Care Reform Law, exceeded the assumptions used when we set pricing for 2015. We took a number of actions in 2015 to improve the profitability of our individual commercial medical business in 2016. These actions were subject to regulatory restrictions in certain geographies and included premium increases for the 2016 coverage year related generally to the first half of 2015 claims experience, the discontinuation of certain products as well as exit of certain markets for 2016, network improvements, enhancements to claims and clinical processes and administrative cost control. Despite these actions, the deterioration in the second half of 2015 claims experience together with 2016 open enrollment results indicating the retention of many high-utilizing members for 2016 resulted in a probable future loss. As a result of our assessment of the profitability of our individual medical policies compliant with the Health Care Reform Law, in the fourth quarter of 2015, we recorded a provision for probable future losses (premium deficiency reserve) for the 2016 coverage year of $176 million. The increase in benefits expense associated with the recognition of the premium deficiency reserve increased the Retail segment benefit ratio by approximately 40 basis points in 2015.

- The Retail segment's benefits expense for 2015 included the beneficial effect of $228 million in favorable prior-year medical claims reserve development versus $488 million in 2014. This favorable prior-year medical claims reserve development decreased the Retail segment benefit ratio by approximately 50 basis points in 2015 versus approximately 120 basis points in 2014. The year-over-year decline in prior-period medical claims reserve development primarily was due to the impact of lower financial claim recoveries due in part to our gradual implementation during 2014 of inpatient authorization review prior to admission as opposed to post adjudication, as well as higher than expected flu associated claims from the fourth quarter of 2014 and continued volatility in claims associated with individual commercial medical products.

Operating costs

- The Retail segment operating cost ratio of 11.2% for 2015 decreased 40 basis points from 2014 primarily reflecting administrative cost efficiencies associated with medical membership growth in the segment and other discretionary cost reductions, partially offset by the increase in the non-deductible health insurance

industry fee. The non-deductible health insurance industry fee increased the operating cost ratio by approximately 160 basis points in 2015 as compared to 120 basis points in 2014.

Group Segment

	2015	2014	Change Members	Change Percentage
Membership:				
Medical membership:				
Fully-insured commercial group	1,178,300	1,235,500	(57,200)	(4.6)%
ASO	710,700	1,104,300	(393,600)	(35.6)%
Military services	3,074,400	3,090,400	(16,000)	(0.5)%
Total group medical members	4,963,400	5,430,200	(466,800)	(8.6)%
Group specialty membership (a)	6,068,700	6,502,700	(434,000)	(6.7)%

(a) Specialty products include dental, vision, and voluntary benefit products. Members included in these products may not be unique to each product since members have the ability to enroll in multiple products.

	2015	2014	Change Dollars	Change Percentage
		(in millions)		
Premiums and Services Revenue:				
Premiums:				
Fully-insured commercial group	$ 5,493	$ 5,339	$ 154	2.9 %
Group specialty	1,055	1,098	(43)	(3.9)%
Military services	21	19	2	10.5 %
Total premiums	6,569	6,456	113	1.8 %
Services	698	763	(65)	(8.5)%
Total premiums and services revenue	$ 7,267	$ 7,219	$ 48	0.7 %
Income before income taxes	$ 258	$ 151	$ 107	70.9 %
Benefit ratio	80.2%	79.5%		0.7 %
Operating cost ratio	24.0%	26.5%		(2.5)%

Pretax Results

- Group segment pretax income increased $107 million, or 70.9%, to $258 million in 2015 primarily reflecting improvement in the operating cost ratio partially offset by an increase in the benefit ratio as discussed below.

Enrollment

- Fully-insured commercial group medical membership decreased 57,200 members, or 4.6% from December 31, 2014 reflecting lower membership in both large and small group accounts.

- Group ASO commercial medical membership decreased 393,600 members, or 35.6%, from December 31, 2014 to December 31, 2015 primarily due to the loss of certain large group accounts as a result of continued discipline in pricing of services for self-funded accounts amid a highly competitive environment.

- Group specialty membership decreased 434,000 members, or 6.7%, from December 31, 2014 to December 31, 2015 primarily due to the loss of certain fully-insured group medical accounts that also had specialty coverage.

Premiums revenue

- Group segment premiums increased $113.0 million, or 1.8%, from 2014 to 2015 primarily due to an increase in fully-insured commercial medical per member premiums partially offset by a net decline in fully-insured commercial medical membership.

Benefits expense

- The Group segment benefit ratio increased 70 basis points from 79.5% in 2014 to 80.2% in 2015 primarily reflecting the impact of higher specialty drug costs, net of rebates, as well as higher outpatient costs and lower prior-period medical claims reserve development, partially offset by an increase in the non-deductible health insurance industry fee included in the pricing of our products.

- The Group segment's benefits expense included the beneficial effect of $7 million in favorable prior-year medical claims reserve development versus $29 million in 2014. This favorable prior-year medical claims reserve development decreased the Group segment benefit ratio by approximately 10 basis points in 2015 versus approximately 40 basis points in 2014. The year-over-year decline in favorable prior-period medical claims reserve development primarily was due to a relatively small number of higher severity claims in the 2015 period associated with prior periods.

Operating costs

- The Group segment operating cost ratio of 24.0% for 2015 decreased 250 basis points from 26.5% for 2014, reflecting a decline in our group ASO commercial medical membership which carries a higher operating cost ratio than our fully-insured commercial medical membership, as well as operating cost efficiencies associated with our fully-insured business. Operating cost efficiencies were the result of both sustainable cost reduction initiatives and discretionary reductions. These declines were partially offset by the impact of an increase in the non-deductible health insurance industry fee. The non-deductible health insurance industry fee increased the operating cost ratio by approximately 140 basis points in 2015 as compared to 100 basis points in 2014.

Healthcare Services Segment

			Change	
	2015	2014	Dollars	Percentage
		(in millions)		
Revenues:				
Services:				
Provider services	$ 515	$ 1,147	$ (632)	(55.1)%
Home based services	140	107	33	30.8 %
Pharmacy solutions	30	99	(69)	(69.7)%
Total services revenues	685	1,353	(668)	(49.4)%
Intersegment revenues:				
Pharmacy solutions	20,551	16,905	3,646	21.6 %
Provider services	1,291	1,149	142	12.4 %
Home based services	875	585	290	49.6 %
Clinical programs	203	208	(5)	(2.4)%
Total intersegment revenues	22,920	18,847	4,073	21.6 %
Total services and intersegment revenues	$ 23,605	$ 20,200	$ 3,405	16.9 %
Income before income taxes	$ 981	$ 738	$ 243	32.9 %
Operating cost ratio	95.2%	95.6%		(0.4)%

Pretax results

- Healthcare Services segment pretax income of $981 million for 2015 increased $243 million, or 32.9%, from 2014 primarily due to higher earnings from our pharmacy solutions and home based services businesses as they serve our growing Medicare membership.

Script Volume

- Humana Pharmacy Solutions® script volumes for the Retail and Group segment membership increased to approximately 398 million in 2015, up 21% versus scripts of approximately 329 million in 2014. The increase primarily reflects growth associated with higher average medical membership for 2015 than in 2014.

Services revenue

- Services revenue for 2015 decreased $668 million, or 49.4% from 2014, to $685 million for 2015, primarily due to the completion of the sale of Concentra on June 1, 2015.

Intersegment revenues

- Intersegment revenues increased $4.1 billion, or 21.6%, from 2014 to $22.9 billion for 2015 primarily due to growth in our Medicare membership which resulted in higher utilization of our Healthcare Services segment businesses.

Operating costs

- The Healthcare Services segment operating cost ratio of 95.2% for 2015 decreased 40 basis points from 95.6% for 2014 primarily due to lower operating costs in our pharmacy business together with discretionary cost reductions across the segment, partially offset by the increasing percentage of pharmacy business associated with lower margin specialty drugs. Improving operating efficiency in the pharmacy business was primarily driven by lower cost of goods associated with increased purchasing scale and lower cost-to-fill primarily due to improvements in technology.

Liquidity

Historically, our primary sources of cash have included receipts of premiums, services revenue, and investment and other income, as well as proceeds from the sale or maturity of our investment securities, borrowings, and proceeds from sales of businesses. Our primary uses of cash historically have included disbursements for claims payments, operating costs, interest on borrowings, taxes, purchases of investment securities, acquisitions, capital expenditures, repayments on borrowings, dividends, and share repurchases. Because premiums generally are collected in advance of claim payments by a period of up to several months, our business normally should produce positive cash flows during periods of increasing premiums and enrollment. Conversely, cash flows would be negatively impacted during periods of decreasing premiums and enrollment. From period to period, our cash flows may also be affected by the timing of working capital items including premiums receivable, benefits payable, and other receivables and payables. Our cash flows are impacted by the timing of payments to and receipts from CMS associated with Medicare Part D subsidies for which we do not assume risk. The use of operating cash flows may be limited by regulatory requirements of state departments of insurance (or comparable state regulators) which require, among other items, that our regulated subsidiaries maintain minimum levels of capital and seek approval before paying dividends from the subsidiaries to the parent. Our use of operating cash flows derived from our non-insurance subsidiaries, such as in our Healthcare Services segment, is generally not restricted by state departments of insurance (or comparable state regulators).

The effect of the commercial risk adjustment, risk corridor, and reinsurance provisions of the Health Care Reform Law impact the timing of our operating cash flows, as we build receivables for each coverage year that are expected to be collected in subsequent coverage years. During 2016, net collections under the 3Rs associated with prior coverage years were $383 million. We expect to collect the remaining $54 million of reinsurance recoverables related to prior coverage years in 2017. On November 10, 2016, the U.S. Court of Federal Claims ruled in favor of the government in one of a series of cases filed by insurers, unrelated to us, against HHS to collect risk corridor payments, rejecting all

of the insurer's statutory, contract and Constitutional claims for payment. On November 18, 2016, HHS issued a memorandum indicating a significant funding shortfall for the 2015 coverage year, the second consecutive year of significant shortfalls. Given the successful challenge of the risk corridor provisions in court, Congressional inquiries into the funding of the risk corridor program, and significant funding shortfalls under the first two years of the program, during the fourth quarter of 2016 we wrote-off $583 million in risk corridor receivables outstanding as of September 30, 2016, including $415 million associated with the 2014 and 2015 coverage years. From inception of the risk corridor program through December 31, 2016, we collected approximately $36 million from CMS for risk corridor receivables associated with the 2014 coverage year funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 and 2015 risk corridor program. The remaining net receivable balance associated with the 3Rs was approximately $456 million at December 31, 2016, including the $54 million related to the 2015 coverage year, as compared to $982 million at December 31, 2015. Any amounts receivable or payable associated with these risk limiting programs may have an impact on subsidiary liquidity, with any temporary shortfalls funded by the parent company.

For additional information on our liquidity risk, please refer to Item 1A. – Risk Factors in this 2016 Form 10-K.

Cash and cash equivalents increased to $3.9 billion at December 31, 2016 from $2.6 billion at December 31, 2015. The change in cash and cash equivalents for the years ended December 31, 2016, 2015 and 2014 is summarized as follows:

	2016	2015	2014
		(in millions)	
Net cash provided by operating activities	$ 1,936	$ 868	$ 1,618
Net cash (used in) provided by investing activities	(1,362)	320	(63)
Net cash provided by (used in) financing activities	732	(552)	(758)
Increase in cash and cash equivalents	$ 1,306	$ 636	$ 797

Cash Flow from Operating Activities

The change in operating cash flows over the three year period primarily results from the corresponding change in the timing of working capital items, earnings, and enrollment activity as discussed below. The increase in operating cash flows in 2016 primarily was due to significantly favorable working capital items and higher earnings exclusive of the commercial risk corridor receivables write-off and the long-term care reserve strengthening in 2016, as well as the gain on sale of Concentra and the recognition of the premium deficiency reserve in 2015 discussed previously. The working capital changes year-over-year primarily reflect lower income tax payments, changes in the net receivable balance associated with the premium stabilization programs established under health care reform, or the 3R's, and the timing of payroll cycles resulting in one less payroll cycle in 2016, partially offset by the timing of payments for benefits expense. The lower operating cash flows in 2015 primarily reflect the effect of significant growth in individual commercial medical and group Medicare Advantage membership in 2014 and changes in the timing of working capital items related to the growth in our pharmacy business.

The most significant drivers of changes in our working capital are typically the timing of payments of benefits expense and receipts for premiums. We illustrate these changes with the following summaries of benefits payable and receivables.

The detail of benefits payable was as follows at December 31, 2016, 2015 and 2014:

	2016	2015	2014	Change 2016	Change 2015	Change 2014
			(in millions)			
IBNR (1)	$ 3,422	$ 3,730	$ 3,254	$ (308)	$ 476	$ 668
Reported claims in process (2)	654	600	475	54	125	94
Premium deficiency reserve (3)	—	176	—	(176)	176	—
Other benefits payable (4)	487	470	746	17	(276)	(180)
Total benefits payable	$ 4,563	$ 4,976	$ 4,475	$ (413)	$ 501	$ 582

(1) IBNR represents an estimate of benefits payable for claims incurred but not reported (IBNR) at the balance sheet date and includes unprocessed claim inventories. The level of IBNR is primarily impacted by membership levels, medical claim trends and the receipt cycle time, which represents the length of time between when a claim is initially incurred and when the claim form is received (i.e. a shorter time span results in a lower IBNR).

(2) Reported claims in process represents the estimated valuation of processed claims that are in the post claim adjudication process, which consists of administrative functions such as audit and check batching and handling, as well as amounts owed to our pharmacy benefit administrator which fluctuate due to bi-weekly payments and the month-end cutoff.

(3) Premium deficiency reserve recognized for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year.

(4) Other benefits payable include amounts owed to providers under capitated and risk sharing arrangements.

The decrease in benefits payable in 2016 largely was due to a decrease in IBNR, discussed further below, as well as the application of 2016 results to the premium deficiency reserve liability recognized in 2015 associated with our individual commercial medical products compliant with the Health Care Reform Law for the 2016 coverage year. There was no premium deficiency reserve liability at December 31, 2016. The increases in benefits payable in 2015 and 2014 largely were due to increases in IBNR as well as an increase in the amount of processed but unpaid claims due to our pharmacy benefit administrator, which fluctuates due to month-end cutoff. These items were partially offset by a decrease in amounts owed to providers under capitated and risk sharing arrangements in both 2015 and 2014, including the disbursement of a portion of our Medicare risk adjustment collections under our contractual obligations associated with our risk sharing arrangements. In addition, benefits payable in 2015 reflects the recognition of the premium deficiency reserve discussed previously.

IBNR decreased during 2016 primarily due to declines in group Medicare Advantage, individual commercial medical, and fully-insured commercial group medical membership in 2016. IBNR increased during 2015 primarily as a result of individual Medicare Advantage membership growth while during 2014 IBNR also increased as a result of individual Medicare Advantage membership growth as well as significant growth in individual commercial medical and group Medicare Advantage membership. As discussed previously, our cash flows are impacted by changes in enrollment. In 2014 (the first year plans compliant with the Health Care Reform Law were effective), membership in new fully-insured individual commercial medical plans compliant with the Health Care Reform Law grew as compared with much lower growth in membership in these plans in 2015 and a decline in membership in these plans in 2016. Similarly, growth in group Medicare Advantage membership in 2014 favorably impacted the 2014 cash flows while a decline in group Medicare Advantage membership in 2015 and more significantly in 2016, negatively impacted the 2015 and 2016 cash flows.

The detail of total net receivables was as follows at December 31, 2016, 2015 and 2014:

	2016	2015	2014	Change 2016	Change 2015	Change 2014
			(in millions)			
Medicare	$ 787	$ 765	$ 664	$ 22	$ 101	$ 88
Commercial and other	579	420	381	159	39	162
Military services	32	77	106	(45)	(29)	19
Allowance for doubtful accounts	(118)	(101)	(98)	(17)	(3)	(27)
Total net receivables	$ 1,280	$ 1,161	$ 1,053	119	108	242
Reconciliation to cash flow statement:						
Provision for doubtful accounts				39	61	32
Change in receivables acquired, held-for-sale, or disposed from sale of business				—	11	(10)
Change in receivables per cash flow statement resulting in cash from operations				$ 158	$ 180	$ 264

As disclosed previously, on June 1, 2015, we completed the sale of our wholly owned subsidiary Concentra. Net receivables associated with Concentra were classified as held-for-sale at December 31, 2014 excluded from the table above for comparative purposes.

Medicare receivables are impacted by changes in revenue associated with individual and group Medicare membership changes as well as the timing of accruals and related collections associated with the CMS risk-adjustment model.

The increases in commercial and other receivables in 2016 as compared to 2015 primarily reflects an increase in our receivable associated with the commercial risk adjustment provision of the Health Care Reform Law. Similarly, excluding the effect of classifying Concentra receivables as held-for-sale at December 31, 2014, the increase in commercial and other receivables in 2014 primarily was due to the commercial risk adjustment provisions of the Health Care Reform Law which became effective in 2014.

Military services receivables at December 31, 2016, 2015, and 2014 primarily consist of administrative services only fees owed from the federal government for administrative services provided under our current TRICARE South Region contract.

Many provisions of the Health Care Reform Law became effective in 2014, including the commercial risk adjustment, risk corridor, and reinsurance provisions as well as the non-deductible health insurance industry fee. As discussed previously, the timing of payments and receipts associated with these provisions impact our operating cash flows as we build receivables for each coverage year that are expected to be collected in subsequent coverage years. During 2016, net collections under the 3Rs associated with prior coverage years were $383 million as compared to net collections of $417 million in 2015. There were no amounts collected in 2014, the first year of the programs. The net receivable balance associated with the 3Rs was approximately $456 million at December 31, 2016, including certain amounts recorded in receivables as noted above. In 2016, we paid the federal government $916 million for the annual health insurance industry fee compared to our payments of $867 million in 2015 and $562 million in 2014.

In addition to the timing of payments of benefits expense, receipts for premiums and services revenues, and amounts due under the risk limiting and health insurance industry fee provisions of the Health Care Reform Law, other items impacting operating cash flows include income tax payments and the timing of payroll cycles resulting in one less payroll cycle in 2016 than in 2015.

Cash Flow from Investing Activities

Our ongoing capital expenditures primarily relate to our information technology initiatives, support of services in our provider services operations including medical and administrative facility improvements necessary for activities such as the provision of care to members, claims processing, billing and collections, wellness solutions, care coordination, regulatory compliance and customer service. Total capital expenditures, excluding acquisitions, were $527 million in 2016, $523 million in 2015, and $528 million in 2014.

We reinvested a portion of our operating cash flows in investment securities, primarily investment-grade fixed income securities, totaling $828 million in 2016. Proceeds from sales and maturities of investment securities exceeded purchases by $103 million in 2015 and $411 million in 2014. These net proceeds were used to fund normal working capital needs due to an increase in receivables associated with the 3Rs in addition to the timing of payments to and receipts from CMS associated with Medicare Part D reinsurance subsidies, as discussed below.

In 2015, we purchased a $284 million note receivable directly from a third-party bank syndicate related to the financing of MCCI Holdings, LLC's business as described in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. The purchase of this note is included with purchases of investment securities in our consolidated statement of cash flows.

On June 1, 2015, we completed the sale of Concentra for approximately $1,055 million in cash, excluding approximately $22 million of transaction costs.

Cash consideration paid for acquisitions, net of cash acquired, was $7 million in 2016, $38 million in 2015, and $18 million in 2014. Acquisitions in each year included health and wellness related acquisitions.

Cash Flow from Financing Activities

Our financing cash flows are significantly impacted by the timing of claims payments and the related receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. Settlement of the reinsurance and low-income cost subsidies is based on a reconciliation made approximately 9 months after the close of each calendar year. Receipts from CMS associated with Medicare Part D claim subsidies for which we do not assume risk were $1.1 billion higher than claims payments during 2016. Conversely, claims payments were $361 million higher than receipts from CMS associated with Medicare Part D claims subsidies for which we do not assume risk during 2015 and $945 million higher during 2014. In 2014 and 2015, we experienced higher specialty prescription drug costs associated with a new treatment for Hepatitis C than were contemplated in our bids which resulted in higher subsidy receivable balances in those years that were settled in 2015 and 2016, respectively, under the terms of our contracts with CMS. Our net receivable for CMS subsidies and brand name prescription drug discounts was $0.9 billion at December 31, 2016 compared to $2.0 billion at December 31, 2015. Refer to Note 6 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Under our administrative services only TRICARE South Region contract, health care cost payments for which we do not assume risk exceeded reimbursements from the federal government by $25 million in 2016 and by $4 million in 2015. Reimbursements from the federal government equaled health care cost payments for which we do not assume risk in 2014.

Claims payments associated with cost sharing provisions of the Health Care Reform Law for which we do not assume risk were higher than reimbursements from HHS by $28 million in 2016 and less than reimbursements by $69 million in 2015 and by $26 million in 2014. See Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for further description.

We repurchased 1.85 million shares for $329 million in 2015 and 5.7 million shares for $730 million in 2014 (excludes another $100 million held back pending final settlement of an accelerated stock repurchase plan in March 2015) under share repurchase plans authorized by the Board of Directors. We did not repurchase shares in 2016 due to restrictions under the Merger Agreement. We also acquired common shares in connection with employee stock plans for an aggregate cost of $104 million in 2016, $56 million in 2015, and $42 million in 2014.

As discussed further below, we paid dividends to stockholders of $177 million in 2016 and $172 million in each of 2015 and 2014.

We entered into a commercial paper program in October 2014. Net repayments of commercial paper were $2 million in 2016 and the maximum principal amount outstanding at any one time during 2016 was $475 million. Net proceeds from the issuance of commercial paper were $298 million in 2015 and the maximum principal amount outstanding at any one time during 2015 was $414 million. There were no net proceeds from the issuance of commercial paper in 2014 and the maximum principal amount outstanding at any one time during 2014 was $175 million.

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem our $500 million 6.45% senior unsecured notes.

The remainder of the cash used in or provided by financing activities in 2016, 2015, and 2014 primarily resulted from proceeds from stock option exercises and the change in book overdraft.

Future Sources and Uses of Liquidity

Dividends

For a detailed discussion of dividends to stockholders, please refer to Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Stock Repurchases

On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement, and also announced that the Board had approved a new authorization for share repurchases of up to $2.25 billion of our common stock exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2017. Under this new authorization, we expect to complete a $1.5 billion accelerated share repurchase program in the first quarter of 2017. For a detailed discussion of stock repurchases, please refer to Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Debt

For a detailed discussion of our debt, including our senior notes, credit agreement and commercial paper program, please refer to Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Liquidity Requirements

We believe our cash balances, investment securities, operating cash flows, and funds available under our credit agreement and our commercial paper program or from other public or private financing sources, taken together, provide adequate resources to fund ongoing operating and regulatory requirements, acquisitions, future expansion opportunities, and capital expenditures for at least the next twelve months, as well as to refinance or repay debt, and repurchase shares.

Adverse changes in our credit rating may increase the rate of interest we pay and may impact the amount of credit available to us in the future. Our investment-grade credit rating at December 31, 2016 was A- according to Standard & Poor's Rating Services, or S&P, and Baa3 according to Moody's Investors Services, Inc., or Moody's. A downgrade by S&P to BB+ or by Moody's to Ba1 triggers an interest rate increase of 25 basis points with respect to $750 million of our senior notes. Successive one notch downgrades increase the interest rate an additional 25 basis points, or annual interest expense by $2 million, up to a maximum 100 basis points, or annual interest expense by $8 million.

In addition, we operate as a holding company in a highly regulated industry. Humana Inc., our parent company, is dependent upon dividends and administrative expense reimbursements from our subsidiaries, most of which are subject to regulatory restrictions. We continue to maintain significant levels of aggregate excess statutory capital and surplus in our state-regulated operating subsidiaries. Cash, cash equivalents, and short-term investments at the parent company

increased to $2.0 billion at December 31, 2016 from $1.6 billion at December 31, 2015. This increase primarily reflects operating cash derived from our non-insurance subsidiaries' profits partially offset by capital expenditures, payment of stockholder dividends, and common stock repurchases. Our use of operating cash derived from our non-insurance subsidiaries, such as our Healthcare Services segment, is generally not restricted by Departments of Insurance (or comparable state regulatory agencies). Our regulated subsidiaries paid dividends to the parent of $763 million in 2016, $493 million in 2015, and $927 million in 2014. Subsidiary dividends in 2015 reflect the impact of losses for our individual commercial medical business compliant with the Health Care Reform Law and the November 5, 2015 revised statutory accounting guidance requiring the exclusion of risk corridor receivables from related statutory surplus. Refer to our parent company financial statements and accompanying notes in Schedule I - Parent Company Financial Information. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2017 is approximately $850 million, in the aggregate. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

Our parent company funded a subsidiary capital contribution of approximately $535 million in the first quarter of 2017 for reserve strengthening associated with our closed block of long-term care insurance policies discussed further in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

In 2016, we paid the federal government $916 million for the annual health insurance industry fee. The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee.

Regulatory Requirements

For a detailed discussion of our regulatory requirements, including aggregate statutory capital and surplus as well as dividends paid from the subsidiaries to the parent, please refer to Note 15 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Contractual Obligations

We are contractually obligated to make payments for years subsequent to December 31, 2016 as follows:

	Payments Due by Period				
	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
			(in millions)		
Debt	$ 4,100	$ 300	$ 1,200	$ —	$ 2,600
Interest (1)	2,354	188	283	236	1,647
Operating leases (2)	697	185	283	134	95
Purchase obligations (3)	348	184	156	7	1
Future policy benefits payable and other long-term liabilities (4)	3,279	93	453	215	2,518
Total	$ 10,778	$ 950	$ 2,375	$ 592	$ 6,861

(1) Interest includes the estimated contractual interest payments under our debt agreements.

(2) We lease facilities, computer hardware, and other furniture and equipment under long-term operating leases that are noncancelable and expire on various dates through 2037. We sublease facilities or partial facilities to third party tenants for space not used in our operations which partially mitigates our operating lease commitments. An operating lease is a type of off-balance sheet arrangement. Assuming we acquired the asset, rather than leased such asset, we would have recognized a liability for the financing of these assets. See also Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

(3) Purchase obligations include agreements to purchase services, primarily information technology related services, or to make improvements to real estate, in each case that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum levels of service to be purchased; fixed, minimum or variable price provisions; and the appropriate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty.

(4) Includes future policy benefits payable ceded to third parties through 100% coinsurance agreements as more fully described in Note 19 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. We expect the assuming reinsurance carriers to fund these obligations and reflected these amounts as reinsurance recoverables included in other long-term assets on our consolidated balance sheet. Amounts payable in less than one year are included in trade accounts payable and accrued expenses in the consolidated balance sheet.

Off-Balance Sheet Arrangements

As of December 31, 2016, we were not involved in any special purpose entity, or SPE, transactions. For a detailed discussion of off-balance sheet arrangements, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Guarantees and Indemnifications

For a detailed discussion of our guarantees and indemnifications, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Government Contracts

For a detailed discussion of our government contracts, including our Medicare, Military, and Medicaid contracts, please refer to Note 16 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Other

On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement, as our Board determined that an appeal of the Court's ruling would not be in the best interest of our stockholders. Under terms of the Merger Agreement, we are entitled to a breakup fee of $1 billion.

Under state guaranty assessment laws, including those related to state cooperative failures in the industry, we may be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of insolvent insurance companies that write the same line or lines of business as we do. Penn Treaty is a financially distressed unaffiliated long-term care insurance company. A final court ruling on Penn Treaty's insolvency would trigger a guarantee fund assessment that would result in expense for us, based on current information, estimated at approximately $30 million.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements and accompanying notes, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements and accompanying notes requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We continuously evaluate our estimates and those critical accounting policies primarily related to benefits expense and revenue recognition as well as accounting for impairments related to our investment securities, goodwill, and long-lived assets. These estimates are based on knowledge of current events and anticipated future events and, accordingly, actual results ultimately may differ from those estimates. We believe the following critical accounting policies involve the most significant judgments and estimates used in the preparation of our consolidated financial statements.

Benefits Expense Recognition

Benefits expense is recognized in the period in which services are provided and includes an estimate of the cost of services which have been incurred but not yet reported, or IBNR. IBNR represents a substantial portion of our benefits payable as follows:

	December 31, 2016	Percentage of Total	December 31, 2015	Percentage of Total
	(dollars in millions)			
IBNR	$ 3,422	75.0%	$ 3,730	75.0%
Reported claims in process	654	14.3%	600	12.1%
Premium deficiency reserve	—	—%	176	3.5%
Other benefits payable	487	10.7%	470	9.4%
Total benefits payable	$ 4,563	100.0%	$ 4,976	100.0%

Our reserving practice is to consistently recognize the actuarial best point estimate within a level of confidence required by actuarial standards. For further discussion of our reserving methodology, including our use of completion and claims per member per month trend factors to estimate IBNR, refer to Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

The completion and claims per member per month trend factors are the most significant factors impacting the IBNR estimate. The portion of IBNR estimated using completion factors for claims incurred prior to the most recent two months is generally less variable than the portion of IBNR estimated using trend factors. The following table illustrates the sensitivity of these factors assuming moderate adverse experience and the estimated potential impact on our operating results caused by reasonably likely changes in these factors based on December 31, 2016 data:

Completion Factor (a):		Claims Trend Factor (b):	
Factor Change (c)	Decrease in Benefits Payable	Factor Change (c)	Decrease in Benefits Payable
	(dollars in millions)		
0.60%	$(186)	(2.75)%	$(296)
0.50%	$(155)	(2.50)%	$(269)
0.40%	$(124)	(2.25)%	$(242)
0.30%	$(93)	(2.00)%	$(215)
0.20%	$(62)	(1.75)%	$(188)
0.10%	$(31)	(1.50)%	$(162)
—%	$—	(1.25)%	$(135)

(a) Reflects estimated potential changes in benefits payable at December 31, 2016 caused by changes in completion factors for incurred months prior to the most recent two months.

(b) Reflects estimated potential changes in benefits payable at December 31, 2016 caused by changes in annualized claims trend used for the estimation of per member per month incurred claims for the most recent two months.

(c) The factor change indicated represents the percentage point change.

The following table provides a historical perspective regarding the accrual and payment of our benefits payable, excluding military services. Components of the total incurred claims for each year include amounts accrued for current year estimated benefits expense as well as adjustments to prior year estimated accruals. Refer to Note 10 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data for Retail and Group segment tables including information about incurred and paid claims development as of December 31, 2016, net of reinsurance, as well as cumulative claim frequency and the total of IBNR included within the net incurred claims amounts.

	2016	2015	2014
		(in millions)	
Balances at January 1	$ 4,976	$ 4,475	$ 3,893
Less: Premium deficiency reserve	(176)	—	—
Less: Reinsurance recoverables	(85)	(78)	—
Balances at January 1, net	4,715	4,397	3,893
Incurred related to:			
Current year	45,318	44,397	38,641
Prior years	(582)	(236)	(518)
Total incurred	44,736	44,161	38,123
Paid related to:			
Current year	(40,852)	(39,802)	(34,357)
Prior years	(4,112)	(4,041)	(3,262)
Total paid	(44,964)	(43,843)	(37,619)
Premium deficiency reserve	—	176	—
Reinsurance recoverable	76	85	78
Balances at December 31	$ 4,563	$ 4,976	$ 4,475

The following table summarizes the changes in estimate for incurred claims related to prior years attributable to our key assumptions. As previously described, our key assumptions consist of trend and completion factors estimated using an assumption of moderately adverse conditions. The amounts below represent the difference between our original estimates and the actual benefits expense ultimately incurred as determined from subsequent claim payments.

	Favorable Development by Changes in Key Assumptions					
	2016		2015		2014	
	Amount	Factor Change (a)	Amount	Factor Change (a)	Amount	Factor Change (a)
			(dollars in millions)			
Trend factors	$ (316)	(2.9)%	$ (145)	(1.5)%	$ (266)	(3.7)%
Completion factors	(266)	0.9 %	(91)	0.4 %	(252)	1.2 %
Total	$ (582)		$ (236)		$ (518)	

(a) The factor change indicated represents the percentage point change.

As previously discussed, our reserving practice is to consistently recognize the actuarial best estimate of our ultimate liability for claims. Actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $582 million in 2016, $236 million in 2015, and $518 million in 2014. The table below details our favorable medical claims reserve development related to prior fiscal years by segment for 2016, 2015, and 2014.

	Favorable Medical Claims Reserve Development			Change	
	2016	2015	2014	2016	2015
			(in millions)		
Retail Segment	$ (535)	$ (228)	$ (488)	$ (307)	$ 260
Group Segment	(46)	(7)	(29)	(39)	22
Other Businesses	(1)	(1)	(1)	—	—
Total	$ (582)	$ (236)	$ (518)	$ (346)	$ 282

The favorable medical claims reserve development for 2016, 2015, and 2014 primarily reflects the consistent application of trend and completion factors estimated using an assumption of moderately adverse conditions. Our favorable development for each of the years presented above is discussed further in Note 10 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

We continually adjust our historical trend and completion factor experience with our knowledge of recent events that may impact current trends and completion factors when establishing our reserves. Because our reserving practice is to consistently recognize the actuarial best point estimate using an assumption of moderately adverse conditions as required by actuarial standards, there is a reasonable possibility that variances between actual trend and completion factors and those assumed in our December 31, 2016 estimates would fall towards the middle of the ranges previously presented in our sensitivity table.

Benefits expense excluded from the previous table was as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Premium deficiency reserve for short-duration policies	$ (176)	$ 176	$ —
Military services	8	12	11
Future policy benefits	439	(80)	32
Total	$ 271	$ 108	$ 43

In the fourth quarter of 2015, we recognized a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year as discussed in more detail in Note 7 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

Military services benefits expense for each year in the table above reflect expenses associated with our contracts with the Veterans Administration.

The higher benefits expense associated with future policy benefits payable during 2016 primarily relates to reserve strengthening for our closed block of long-term care insurance policies acquired in connection with the 2007 KMG America Corporation, or KMG, acquisition more fully described below and in Note 18 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data. Certain health policies sold to individuals prior to 2014 (the first year plans compliant with the Health Care Reform Law were effective) are accounted for as long-duration as more fully described below. The decrease in benefits expense associated with future policy benefits payable in 2015 primarily reflects the release of reserves as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law.

Future policy benefits payable of $2.8 billion and $2.2 billion at December 31, 2016 and 2015, respectively, represent liabilities for long-duration insurance policies including long-term care insurance, life insurance, annuities, and certain health and other supplemental policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on premium rate increase, interest rate, mortality, morbidity, persistency (the percentage of policies remaining in-force), and maintenance expense assumptions. Interest rates are based on our expected net investment returns on the investment portfolio supporting the reserves for these blocks of business. Mortality, a measure of expected death, and morbidity, a measure of health status, assumptions are based on published actuarial tables, modified based upon actual experience. The assumptions used to determine the liability for future policy benefits are established and locked in at the time each contract is issued and only change if our expected future experience deteriorates to the point that the level of the liability, together with the present value of future gross premiums, are not adequate to provide for future expected policy benefits and maintenance costs (i.e. the loss recognition date). Because these policies have long-term claim payout periods, there is a greater risk of significant variability in claims costs, either positive or negative. We perform loss recognition tests at least annually in the fourth quarter, and more frequently if adverse events or changes in circumstances indicate that the level of the liability, together with the present

value of future gross premiums, may not be adequate to provide for future expected policy benefits and maintenance costs.

Future policy benefits payable include $2.2 billion at December 31, 2016 and $1.5 billion at December 31, 2015 associated with a non-strategic closed block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG. Approximately 30,800 policies remain in force as of December 31, 2016. No new policies have been written since 2005 under this closed block. Future policy benefits payable includes amounts charged to accumulated other comprehensive income for an additional liability that would exist on our closed-block of long-term care insurance policies if unrealized gains on the sale of the investments backing such products had been realized and the proceeds reinvested at then current yields. There was a $77 million additional liability at December 31, 2016 and no additional liability at December 31, 2015. Amounts charged to accumulated other comprehensive income are net of applicable deferred taxes.

Long-term care insurance policies provide nursing home and home health coverage for which premiums are collected many years in advance of benefits paid, if any. Therefore, our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual interest, morbidity, mortality, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. A prolonged period during which interest rates remain at levels lower than those anticipated in our reserving would result in shortfalls in investment income on assets supporting our obligation under long term care policies because the long duration of the policy obligations exceeds the duration of the supporting investment assets. Further, we monitor the loss experience of these long-term care insurance policies and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. To the extent premium rate increases, interest rates, and/or loss experience vary from our loss recognition date assumptions, future material adjustments to reserves could be required.

During 2016, we recorded a loss for a premium deficiency. The premium deficiency was based on current and anticipated experience that had deteriorated from our locked-in assumptions from the previous December 31, 2013 loss recognition date, particularly as they related to emerging experience indicating longer claims duration, a prolonged lower interest rate environment, and an increase in policyholder life expectancies. Based on this deterioration, we determined that our existing future policy benefits payable, together with the present value of future gross premiums, associated with our closed block of long-term care insurance policies were not adequate to provide for future policy benefits and maintenance costs under these policies; therefore we unlocked and modified our assumptions based on current expectations. Accordingly, during 2016 we recorded $505 million of additional benefits expense, with a corresponding increase in future policy benefits payable of $659 million partially offset by a related reinsurance recoverable of $154 million included in other long-term assets.

For our closed block of long-term care policies, actuarial assumptions used to estimate reserves are inherently uncertain due to the potential changes in trends in mortality, morbidity, persistency and interest rates as well as premium rate increases. As a result, our long term care reserves may be subject to material increases if these trends develop adversely to our expectations. The estimated increase in reserves and additional benefit expense from hypothetically modeling adverse variations in our actuarial assumptions, in the aggregate, could be up to $250 million, net of reinsurance. Although such hypothetical revisions are not currently appropriate, we believe they could occur based on past variances in experience and our expectation of the ranges of future experience that could reasonably occur, and any such revision could be material. Generally accepted accounting principles do not allow us to unlock our assumptions for favorable items.

In addition, future policy benefits payable includes amounts of $201 million at December 31, 2016, $205 million at December 31, 2015, and $210 million at December 31, 2014 which are subject to 100% coinsurance agreements as more fully described in Note 19 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data, and as such are offset by a related reinsurance recoverable included in other long-term assets.

Revenue Recognition

We generally establish one-year commercial membership contracts with employer groups, subject to cancellation by the employer group on 30-day written notice. Our Medicare contracts with CMS renew annually. Our military services contracts with the federal government and our contracts with various state Medicaid programs generally are multi-year contracts subject to annual renewal provisions.

Our commercial contracts establish rates on a per employee basis for each month of coverage based on the type of coverage purchased (single to family coverage options). Our Medicare and Medicaid contracts also establish monthly rates per member. However, our Medicare contracts also have additional provisions as outlined in the following separate section.

Premiums revenue and administrative services only, or ASO, fees are estimated by multiplying the membership covered under the various contracts by the contractual rates. In addition, we adjust revenues for estimated changes in an employer's enrollment and individuals that ultimately may fail to pay, and for estimated rebates under the minimum benefit ratios required under the Health Care Reform Law. Enrollment changes not yet processed or not yet reported by an employer group or the government, also known as retroactive membership adjustments, are estimated based on available data and historical trends. We routinely monitor the collectibility of specific accounts, the aging of receivables, historical retroactivity trends, estimated rebates, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in the current period's revenue.

We bill and collect premium from employer groups and members in our Medicare and other individual products monthly. We receive monthly premiums from the federal government and various states according to government specified payment rates and various contractual terms. Changes in revenues from for our Medicare and individual commercial medical products resulting from the periodic changes in risk-adjustment scores derived from medical diagnoses for our membership are recognized when the amounts become determinable and the collectibility is reasonably assured.

Medicare Risk-Adjustment Provisions

CMS utilizes a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity. The risk-adjustment model, which CMS implemented pursuant to the Balanced Budget Act of 1997(BBA) and the Benefits and Improvement Protection Act of 2000 (BIPA), generally pays more for enrollees with predictably higher costs. Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses this diagnosis data to calculate the risk-adjusted premium payment to MA plans. Rates paid to MA plans are established under an actuarial bid model, including a process that bases our payments on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's Medicare FFS program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on providers to appropriately document all medical data, including the diagnosis data submitted with claims. CMS is phasing-in the process of calculating risk scores using diagnoses data from the Risk Adjustment Processing System, or RAPS, to diagnosis data from the Encounter Data System, or EDS. The RAPS process requires MA plans to apply a filter logic based on CMS guidelines and only submit those claims that pass the filtering logic. For submissions through EDS, CMS requires MA plans to submit all the claims data and CMS will apply the risk adjustment filtering logic to determine the risk adjustment data used to calculate risk scores. For 2016, 10% of the risk score was calculated from claims data submitted through EDS, increasing to 25% of the risk score calculated from claims data through EDS for 2017. The phase-in from RAPS to EDS could result in different risk scores from each dataset as a result of plan processing issues, CMS processing issues, or filtering logic differences between RAPS and EDS, and could have a material adverse effect on our results of operations, financial position, or cash flows. We estimate risk-adjustment revenues based on medical diagnoses for our membership. The risk-adjustment model, including CMS changes to the submission process, is more fully described in Item 1. – Business under the section titled "Individual Medicare."

Investment Securities

Investment securities totaled $9.8 billion, or 39% of total assets at December 31, 2016, and $9.1 billion, or 37% of total assets at December 31, 2015. Debt securities, detailed below, comprised this entire investment portfolio at December 31, 2016 and 2015. The fair value of debt securities were as follows at December 31, 2016 and 2015:

	December 31, 2016	Percentage of Total	December 31, 2015	Percentage of Total
	(dollars in millions)			
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 786	8.0%	$ 332	3.6%
Mortgage-backed securities	1,637	16.7%	1,891	20.8%
Tax-exempt municipal securities	3,305	33.7%	2,668	29.3%
Mortgage-backed securities:				
Residential	9	0.1%	13	0.1%
Commercial	304	3.1%	985	10.8%
Asset-backed securities	160	1.7%	263	2.9%
Corporate debt securities	3,597	36.7%	2,958	32.5%
Total debt securities	$ 9,798	100.0%	$ 9,110	100.0%

Approximately 98% of our debt securities were investment-grade quality, with a weighted average credit rating of AA by S&P at December 31, 2016. Most of the debt securities that were below investment-grade were rated BB, the higher end of the below investment-grade rating scale. Our investment policy limits investments in a single issuer and requires diversification among various asset types.

Tax-exempt municipal securities included pre-refunded bonds of $276 million at December 31, 2016 and $178 million at December 31, 2015. These pre-refunded bonds were secured by an escrow fund consisting of U.S. government obligations sufficient to pay off all amounts outstanding at maturity. The ratings of these pre-refunded bonds generally assume the rating of the government obligations at the time the fund is established. Tax-exempt municipal securities that were not pre-refunded were diversified among general obligation bonds of U.S. states and local municipalities as well as special revenue bonds. General obligation bonds, which are backed by the taxing power and full faith of the issuer, accounted for $1.4 billion of these municipals in the portfolio. Special revenue bonds, issued by a municipality to finance a specific public works project such as utilities, water and sewer, transportation, or education, and supported by the revenues of that project, accounted for $1.6 billion of these municipals. Our general obligation bonds are diversified across the U.S. with no individual state exceeding 11%. In addition, certain monoline insurers guarantee the timely repayment of bond principal and interest when a bond issuer defaults and generally provide credit enhancement for bond issues related to our tax-exempt municipal securities. We have no direct exposure to these monoline insurers. We owned $132 million and $173 million at December 31, 2016 and 2015, respectively, of tax-exempt securities guaranteed by monoline insurers. The equivalent weighted average S&P credit rating of these tax-exempt securities without the guarantee from the monoline insurer was AA.

Our direct exposure to subprime mortgage lending is limited to investment in residential mortgage-backed securities and asset-backed securities backed by home equity loans. The fair value of securities backed by Alt-A and subprime loans was less than $1 million at December 31, 2016 and $1 million at December 31, 2015. There are no collateralized debt obligations or structured investment vehicles in our investment portfolio. The percentage of corporate securities associated with the financial services industry was 23% at December 31, 2016 and 25% at December 31, 2015.

Gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows at December 31, 2016:

	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in millions)					
December 31, 2016						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 697	$ (15)	$ 3	$ —	$ 700	$ (15)
Mortgage-backed securities	1,528	(31)	3	—	1,531	(31)
Tax-exempt municipal securities	2,756	(67)	43	(1)	2,799	(68)
Mortgage-backed securities:						
Residential	—	—	4	—	4	—
Commercial	182	(3)	24	(1)	206	(4)
Asset-backed securities	51	—	63	—	114	—
Corporate debt securities	1,544	(71)	69	(7)	1,613	(78)
Total debt securities	$ 6,758	$ (187)	$ 209	$ (9)	$ 6,967	$ (196)

Under the other-than-temporary impairment model for debt securities held, we recognize an impairment loss in income in an amount equal to the full difference between the amortized cost basis and the fair value when we have the intent to sell the debt security or it is more likely than not we will be required to sell the debt security before recovery of our amortized cost basis. However, if we do not intend to sell the debt security, we evaluate the expected cash flows to be received as compared to amortized cost and determine if a credit loss has occurred. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized currently in income with the remainder of the loss recognized in other comprehensive income.

When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairment is considered using a variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. For example, with respect to mortgage and asset-backed securities, such data includes underlying loan level data and structural features such as seniority and other forms of credit enhancements. A decline in fair value is considered other-than-temporary when we do not expect to recover the entire amortized cost basis of the security. We estimate the amount of the credit loss component of a debt security as the difference between the amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate of future cash flows discounted at the implicit interest rate at the date of purchase. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations, facts and circumstances factored into our assessment may change with the passage of time, or we may decide to subsequently sell the investment. The determination of whether a decline in the value of an investment is other than temporary requires us to exercise significant diligence and judgment. The discovery of new information and the passage of time can significantly change these judgments. The status of the general economic environment and significant changes in the national securities markets influence the determination of fair value and the assessment of investment impairment. There is a continuing risk that declines in fair value may occur and additional material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

The recoverability of our non-agency residential and commercial mortgage-backed securities is supported by factors such as seniority, underlying collateral characteristics and credit enhancements. These residential and commercial mortgage-backed securities at December 31, 2016 primarily were composed of senior tranches having high

credit support, with over 99% of the collateral consisting of prime loans. The weighted average credit rating of all commercial mortgage-backed securities was AA+ at December 31, 2016.

All issuers of securities we own that were trading at an unrealized loss at December 31, 2016 remain current on all contractual payments. After taking into account these and other factors previously described, we believe these unrealized losses primarily were caused by an increase in market interest rates in the current markets than when the securities were purchased. At December 31, 2016, we did not intend to sell the securities with an unrealized loss position in accumulated other comprehensive income, and it is not likely that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss were not other-than-temporarily impaired at December 31, 2016. There were no material other-than-temporary impairments in 2016, 2015, or 2014.

Goodwill and Long-lived Assets

At December 31, 2016, goodwill and other long-lived assets represented 20% of total assets and 47% of total stockholders' equity, compared to 20% and 48%, respectively, at December 31, 2015.

We are required to test at least annually for impairment at a level of reporting referred to as the reporting unit, and more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. A reporting unit either is our operating segments or one level below the operating segments, referred to as a component, which comprise our reportable segments. A component is considered a reporting unit if the component constitutes a business for which discrete financial information is available that is regularly reviewed by management. We are required to aggregate the components of an operating segment into one reporting unit if they have similar economic characteristics. Goodwill is assigned to the reporting unit that is expected to benefit from a specific acquisition. The carrying amount of goodwill for our reportable segments has been retrospectively adjusted to conform to the 2015 segment change discussed in Note 2 to the consolidated financial statements included in Item 8. – Financial Statements and Supplementary Data.

We use a two-step process to review goodwill for impairment. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any. Our strategy, long-range business plan, and annual planning process support our goodwill impairment tests. These tests are performed, at a minimum, annually in the fourth quarter, and are based on an evaluation of future discounted cash flows. We rely on this discounted cash flow analysis to determine fair value. However outcomes from the discounted cash flow analysis are compared to other market approach valuation methodologies for reasonableness. We use discount rates that correspond to a market-based weighted-average cost of capital and terminal growth rates that correspond to long-term growth prospects, consistent with the long-term inflation rate. Key assumptions in our cash flow projections, including changes in membership, premium yields, medical and operating cost trends, and certain government contract extensions, are consistent with those utilized in our long-range business plan and annual planning process. If these assumptions differ from actual, including the impact of the Health Care Reform Law or changes in Government rates, the estimates underlying our goodwill impairment tests could be adversely affected. Goodwill impairment tests completed in each of the last three years did not result in an impairment loss. The fair value of our reporting units with significant goodwill exceeded carrying amounts by a substantial margin. A 100 basis point increase in the discount rate would not have a significant impact on the amount of margin for any of our reporting units with significant goodwill, with the exception of our provider services reporting unit in our Healthcare Services segment. The provider services reporting unit would decline to less than 10% margin after factoring in a 100 basis point increase in the discount rate.

Long-lived assets consist of property and equipment and other finite-lived intangible assets. These assets are depreciated or amortized over their estimated useful life, and are subject to impairment reviews. We periodically review long-lived assets whenever adverse events or changes in circumstances indicate the carrying value of the asset may not be recoverable. In assessing recoverability, we must make assumptions regarding estimated future cash flows and other factors to determine if an impairment loss may exist, and, if so, estimate fair value. We also must estimate and make assumptions regarding the useful life we assign to our long-lived assets. If these estimates or their related assumptions change in the future, we may be required to record impairment losses or change the useful life, including accelerating depreciation or amortization for these assets. There were no material impairment losses in the last three years.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our earnings and financial position are exposed to financial market risk, including those resulting from changes in interest rates.

The level of our pretax earnings is subject to market risk due to changes in interest rates and the resulting impact on investment income and interest expense. Prior to 2009, under interest rate swap agreements, we exchanged the fixed interest rate under all of our senior notes for a variable interest rate based on LIBOR using interest rate swap agreements. We terminated all of our interest rate swap agreements in 2008. We may re-enter into interest rate swap agreements in the future depending on market conditions and other factors. Amounts borrowed under the revolving credit portion of our $1.0 billion unsecured revolving credit agreement bear interest at either LIBOR plus a spread or the base rate plus a spread. There were no borrowings outstanding under our credit agreement at December 31, 2016 or December 31, 2015.

Interest rate risk also represents a market risk factor affecting our consolidated financial position due to our significant investment portfolio, consisting primarily of fixed maturity securities of investment-grade quality with a weighted average S&P credit rating of AA at December 31, 2016. Our net unrealized position decreased $120 million from a net unrealized gain position of $92 million at December 31, 2015 to a net unrealized loss position of $28 million at December 31, 2016. At December 31, 2016, we had gross unrealized losses of $196 million on our investment portfolio primarily due to an increase in market interest rates since the time the securities were purchased. There were no material other-than-temporary impairments during 2016. While we believe that these impairments are temporary and we currently do not have the intent to sell such securities, given the current market conditions and the significant judgments involved, there is a continuing risk that future declines in fair value may occur and material realized losses from sales or other-than-temporary impairments may be recorded in future periods.

Duration is the time-weighted average of the present value of the bond portfolio's cash flow. Duration is indicative of the relationship between changes in fair value and changes in interest rates, providing a general indication of the sensitivity of the fair values of our fixed maturity securities to changes in interest rates. However, actual fair values may differ significantly from estimates based on duration. The average duration of our investment portfolio, including cash and cash equivalents, was approximately 4.4 years as of December 31, 2016 and 4.1 years as of December 31, 2015. Based on the duration including cash equivalents, a 1% increase in interest rates would generally decrease the fair value of our securities by approximately $590 million.

We have also evaluated the impact on our investment income and interest expense resulting from a hypothetical change in interest rates of 100, 200, and 300 basis points over the next twelve-month period, as reflected in the following table. The evaluation was based on our investment portfolio and our outstanding indebtedness at December 31, 2016 and 2015. Our investment portfolio consists of cash, cash equivalents, and investment securities. The modeling technique used to calculate the pro forma net change in pretax earnings considered the cash flows related to fixed income investments and debt, which are subject to interest rate changes during a prospective twelve-month period. This evaluation measures parallel shifts in interest rates and may not account for certain unpredictable events that may affect interest income, including unexpected changes of cash flows into and out of the portfolio, changes in the asset allocation, including shifts between taxable and tax-exempt securities, and spread changes specific to various investment categories. In the past ten years, changes in 3 month LIBOR rates during the year have exceeded 300 basis points once, have not changed between 200 and 300 basis points, have changed between 100 and 200 basis points two times, and have changed by less than 100 basis points seven times.

	Increase (decrease) in pretax earnings given an interest rate decrease of X basis points			Increase (decrease) in pretax earnings given an interest rate increase of X basis points		
	(300)	(200)	(100)	100	200	300
	(in millions)					
As of December 31, 2016						
Investment income (a)	$ (49)	$ (44)	$ (36)	$ 53	$ 107	$ 162
Interest expense (b)	3	3	3	(2)	(5)	(9)
Pretax	$ (46)	$ (41)	$ (33)	$ 51	$ 102	$ 153
As of December 31, 2015						
Investment income (a)	$ (33)	$ (27)	$ (21)	$ 41	$ 82	$ 124
Interest expense (b)	3	3	3	(3)	(6)	(9)
Pretax	$ (30)	$ (24)	$ (18)	$ 38	$ 76	$ 115

(a) As of December 31, 2016 and 2015, some of our investments had interest rates below 3% so the assumed hypothetical change in pretax earnings does not reflect the full 3% point reduction.

(b) The interest rate under our senior notes is fixed. There were no borrowings outstanding under the credit agreement at December 31, 2016 or December 31, 2015. There was $300 million outstanding under our commercial paper program at December 31, 2016. As of December 31, 2016, our interest rate under our commercial paper program was less than 2% so the assumed hypothetical change in pretax earnings does not reflect the full 2% point reduction.

1. REPORTING ENTITY

Nature of Operations

Humana Inc., headquartered in Louisville, Kentucky, is a leading health and well-being company focused on making it easy for people to achieve their best health with clinical excellence through coordinated care. Our strategy integrates care delivery, the member experience, and clinical and consumer insights to encourage engagement, behavior change, proactive clinical outreach and wellness for the millions of people we serve across the country. References throughout these notes to consolidated financial statements to "we," "us," "our," "Company," and "Humana," mean Humana Inc. and its subsidiaries. We derived approximately 75% of our total premiums and services revenue from contracts with the federal government in 2016, including 14% related to our federal government contracts with the Centers for Medicare and Medicaid Services, or CMS, to provide health insurance coverage for individual Medicare Advantage members in Florida. CMS is the federal government's agency responsible for administering the Medicare program.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Our financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America. Our consolidated financial statements include the accounts of Humana Inc. and subsidiaries that the Company controls, including variable interest entities associated with medical practices for which we are the primary beneficiary. We do not own many of our medical practices but instead enter into exclusive management agreements with the affiliated Professional Associations, or P.A.s, that operate these medical practices. Based upon the provisions of these agreements, these affiliated P.A.s are variable interest entities and we are the primary beneficiary, and accordingly we consolidated the affiliated P.A.s. All significant intercompany balances and transactions have been eliminated.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The areas involving the most significant use of estimates are the estimation of benefits payable, future policy benefits payable, the impact of risk adjustment provisions related to our Medicare contracts, the valuation and related impairment recognition of investment securities, and the valuation and related impairment recognition of long-lived assets, including goodwill. These estimates are based on knowledge of current events and anticipated future events, and accordingly, actual results may ultimately differ materially from those estimates.

Certain amounts have been reclassified to conform to the current year presentation.

Aetna Merger

On July 2, 2015, we entered into an Agreement and Plan of Merger, which we refer to in this report as the Merger Agreement, with Aetna Inc. and certain wholly owned subsidiaries of Aetna Inc., which we refer to collectively as Aetna, which sets forth the terms and conditions under which we agreed to merge with, and become a wholly owned subsidiary of Aetna, a transaction we refer to in this report as the Merger.

The Merger was subject to customary closing conditions, including, among other things, (i) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the receipt of necessary approvals under state insurance and healthcare laws and regulations and pursuant to certain licenses of certain of Humana's subsidiaries, and (ii) the absence of legal restraints and prohibitions on the consummation of the Merger.

On December 22, 2016, in order to extend the "End Date" (as defined in the Merger Agreement), Aetna and Humana each agreed to waive until 11:59 p.m. (Eastern time) on February 15, 2017 its right to terminate the Merger Agreement due to a failure of the Mergers to have been completed on or before December 31, 2016.

On July 21, 2016, the U.S. Department of Justice and the attorneys general of certain U.S. jurisdictions filed a civil antitrust complaint in the U.S. District Court for the District of Columbia against us and Aetna, alleging that the Merger would violate Section 7 of the Clayton Antitrust Act and seeking a permanent injunction to prevent the Merger from being completed. On January 23, 2017, the Court ruled in favor of the DOJ and granted a permanent injunction of the proposed transaction. On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement, as our Board determined that an appeal of the Court's ruling would not be in the best interest of our stockholders. Under terms of the Merger Agreement, we are entitled to a breakup fee of $1 billion.

Health Care Reform

The Patient Protection and Affordable Care Act and The Health Care and Education Reconciliation Act of 2010 (which we collectively refer to as the Health Care Reform Law) enacted significant reforms to various aspects of the U.S. health insurance industry. Certain of these reforms became effective January 1, 2014, including an annual insurance industry premium-based fee and the establishment of federally-facilitated or state-based exchanges coupled with three premium stabilization programs, as described more fully below.

The Health Care Reform Law imposes an annual premium-based fee on health insurers for each calendar year beginning on or after January 1, 2014 which is not deductible for tax purposes. We are required to estimate a liability for the health insurer fee and record it in full once qualifying insurance coverage is provided in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized ratably to expense over the same calendar year. We record the liability for the health insurer fee in trade accounts payable and accrued expenses and record the deferred cost in other current assets in our consolidated financial statements. We pay the health insurer fee in September of each year. The Consolidated Appropriations Act, 2016, enacted on December 18, 2015, included a one-time one year suspension in 2017 of the health insurer fee. See Note 7 for detail regarding amounts paid for the annual health insurer fee.

The Health Care Reform Law also establishes risk spreading premium stabilization programs effective January 1, 2014. The risk spreading programs are applicable to certain of our commercial medical insurance products. In the aggregate, our commercial medical insurance products represented approximately 16% of our total premiums and services revenue for the year ended December 31, 2016, a subset of which is subject to these programs. These programs, commonly referred to as the 3Rs, include a permanent risk adjustment program, a transitional reinsurance program, and a temporary risk corridors program designed to more evenly spread the financial risk borne by issuers and to mitigate the risk that issuers would have mispriced products. The transitional reinsurance and temporary risk corridors programs were for years 2014 through 2016. Policies issued prior to March 23, 2010 are considered grandfathered policies and are exempt from the 3Rs. Certain states have allowed non-grandfathered policies issued prior to January 1, 2014 to extend the date of required transition to policies compliant with the Health Care Reform Law to as late as 2017. Accordingly, such policies are exempt from the 3Rs until they transition to policies compliant with the Health Care Reform Law.

The permanent risk adjustment program adjusts the premiums that commercial individual and small group health insurance issuers receive based on the demographic factors and health status of each member as derived from current year medical diagnosis as reported throughout the year. This program transfers funds from lower risk plans to higher risk plans within similar plans in the same state. The risk adjustment program is applicable to commercial individual and small group health plans (except certain exempt and grandfathered plans as discussed above) operating both inside and outside of the health insurance exchanges established under the Health Care Reform Law. Under the risk adjustment program, a risk score is assigned to each covered member to determine an average risk score at the individual and small group level by legal entity in a particular market in a state. Additionally, an average risk score is determined for the entire subject population for each market in each state. Settlements are determined on a net basis by legal entity and state. Each health insurance issuer’s average risk score is compared to the state’s average risk score. Plans with an average risk score below the state average will pay into a pool and health insurance issuers with an average risk score that is greater than the state average risk score will receive money from that pool. We generally rely on providers, including certain network providers who are our employees, to appropriately document all medical data, including the diagnosis codes submitted with claims, as the basis for our risk scores under the program. Our estimate of amounts receivable and/or payable under the risk adjustment program is based on our estimate of both our own and the state

average risk scores. Assumptions used in these estimates include but are not limited to published third party studies and other publicly available data including regulatory plan filings, geographic considerations including our historical experience in markets we have participated in over a long period of time, member demographics (including age and gender for our members and other health insurance issuers), our pricing model, sales data for each metal tier (different metal tiers yield different risk scores), and the mix of previously underwritten membership as compared to new members in plans compliant with the Health Care Reform Law. We refine our estimates as new information becomes available, including additional data released by the Department of Health and Human Services, or HHS, regarding estimates of state average risk scores. Risk adjustment is subject to audit by HHS beginning with the 2015 coverage year, however, there will be no payments associated with these audits for 2015, the pilot year for the audits.

The temporary risk corridor program applies to individual and small group Qualified Health Plans (or substantially equivalent plans), or QHPs, as defined by HHS, operating both inside and outside of the exchanges. Accordingly, plans subject to risk adjustment that are not QHPs, including our small group health plans, were not subject to the risk corridor program. The risk corridor provisions limit issuer gains and losses by comparing allowable medical costs to a target amount, each defined/prescribed by HHS, and sharing the risk for allowable costs with the federal government. Allowable medical costs are adjusted for risk adjustment settlements, transitional reinsurance recoveries, and cost sharing reductions received from HHS. Variances from the target exceeding certain thresholds may result in HHS making additional payments to us or require us to refund HHS a portion of the premiums we received.

We estimate and recognize adjustments to premiums revenue for the risk adjustment and risk corridor provisions by projecting our ultimate premium for the calendar year separately for individual and group plans by state and legal entity. Estimated calendar year settlement amounts are recognized ratably during the year and are revised each period to reflect current experience, including changes in risk scores derived from medical diagnoses submitted by providers. We record receivables or payables at the individual or group level within each state and legal entity and classify the amounts as current or long-term in our consolidated balance sheets based on the timing of expected settlement. On November 10, 2016, the U.S. Court of Federal Claims ruled in favor of the government in one of a series of cases filed by insurers, unrelated to us, against HHS to collect risk corridor payments, rejecting all of the insurer's statutory, contract and Constitutional claims for payment. On November 18, 2016, HHS issued a memorandum indicating a significant funding shortfall for the 2015 coverage year, the second consecutive year of significant shortfalls. Given the successful challenge of the risk corridor provisions in court, Congressional inquiries into the funding of the risk corridor program, and significant funding shortfalls under the first two years of the program, during the fourth quarter of 2016 we wrote-off $583 million in risk corridor receivables outstanding as of September 30, 2016, and ceased recognizing revenues under the risk corridor program as discussed further in Note 7.

The transitional reinsurance program required us to make reinsurance contributions for calendar years 2014 through 2016 to a state or HHS established reinsurance entity based on a national contribution rate per covered member as determined by HHS. While all commercial medical plans, including self-funded plans, are required to fund the reinsurance entity, only fully-insured non-grandfathered plans compliant with the Health Care Reform Law in the individual commercial market will be eligible for recoveries if individual claims exceed a specified threshold. Accordingly, we account for transitional reinsurance contributions associated with all commercial medical health plans other than these non-grandfathered individual plans as an assessment in operating costs in our consolidated statements of income. We account for contributions made by individual commercial plans compliant with the Health Care Reform Law, which are subject to recoveries, as ceded premiums (a reduction of premiums) and similarly we account for any recoveries as ceded benefits (a reduction of benefits expense) in our consolidated statements of income.

We were required to remit payment for our per member reinsurance contribution, exclusive of the portion payable to the U.S. Treasury, by January 15 of the year following the coverage year, or January 15, 2017 for the 2016 coverage year. The portion of the reinsurance contribution due to the U.S. Treasury must be paid by November 15 of the year following the coverage year, or November 15, 2017 for the 2016 coverage year. Risk adjustment calculations will be completed and HHS will notify us of recoveries due or payments owed to/from us under the risk adjustment and reinsurance programs by June 30 of the year following the coverage year. Following this notification, risk corridor calculations are then due by July 31 of the year following the coverage year. Payments due to HHS under the risk adjustment and risk corridor programs must be remitted within 30 days of notification for each program and will be collected prior to the distribution of recoveries by HHS under each program. Payment and recovery amounts associated

with reinsurance and risk adjustment will generally be settled with HHS annually in the year following the coverage year. Accordingly, for the 2016 coverage year, we expect to receive recoveries and/or pay amounts due under these programs in 2017.

See Note 7 for detail regarding amounts recorded to the consolidated balance sheets related to the 3Rs.

In addition to the provisions discussed above, beginning in 2014, HHS pays us a portion of the health care costs for low-income individual members for which we assume no risk in accordance with the Health Care Reform Law. We account for these subsidies as a deposit in our consolidated balance sheets and as a financing activity in our consolidated statements of cash flows. We do not recognize premiums revenue or benefits expense for these subsidies. Receipt and payment activity is accumulated at the state and legal entity level and recorded in our consolidated balance sheet in other current assets or trade accounts payable and accrued expenses depending on the state and legal entity balance at the end of the reporting period. We will be notified of final settlement amounts by June 30 of the year following the coverage year. For 2016, payments to HHS associated with cost sharing subsidies for which we do not assume risk were approximately $373 million, exceeding receipts of $345 million by $28 million. For 2015, receipts from HHS associated with cost sharing subsidies for which we do not assume risk were approximately $478 million, exceeding payments of $409 million by $69 million. For 2014, receipts from HHS associated with cost sharing subsidies for which we do not assume risk were approximately $281 million, exceeding payments of $255 million by $26 million.

If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. Additionally, potential legislative changes, including activities to repeal or replace the Health Care Reform Law, creates uncertainty for our business, and we cannot predict when, or in what form, such legislative changes may occur.

Cash and Cash Equivalents

Cash and cash equivalents include cash, time deposits, money market funds, commercial paper, other money market instruments, and certain U.S. Government securities with an original maturity of three months or less. Carrying value approximates fair value due to the short-term maturity of the investments.

Investment Securities

Investment securities, which consist entirely of debt securities, have been categorized as available for sale and, as a result, are stated at fair value. Investment securities available for current operations are classified as current assets. Investment securities available for our long-term insurance products and professional liability funding requirements, as well as restricted statutory deposits, are classified as long-term assets. For the purpose of determining gross realized gains and losses, which are included as a component of investment income in the consolidated statements of income, the cost of investment securities sold is based upon specific identification. Unrealized holding gains and losses, net of applicable deferred taxes, are included as a component of stockholders' equity and comprehensive income until realized from a sale or other-than-temporary impairment.

Under the other-than-temporary impairment model for debt securities held, we recognize an impairment loss in income in an amount equal to the full difference between the amortized cost basis and the fair value when we have the intent to sell the debt security or it is more likely than not we will be required to sell the debt security before recovery of our amortized cost basis. However, if we do not intend to sell the debt security, we evaluate the expected cash flows to be received as compared to amortized cost and determine if a credit loss has occurred. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized currently in income with the remainder of the loss recognized in other comprehensive income.

When we do not intend to sell a security in an unrealized loss position, potential other-than-temporary impairment is considered using a variety of factors, including the length of time and extent to which the fair value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes in credit rating of the security by the rating agencies; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For debt securities, we take into account expectations of relevant market and economic data. For example, with

respect to mortgage and asset-backed securities, such data includes underlying loan level data and structural features such as seniority and other forms of credit enhancements. A decline in fair value is considered other-than-temporary when we do not expect to recover the entire amortized cost basis of the security. We estimate the amount of the credit loss component of a debt security as the difference between the amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate of future cash flows discounted at the implicit interest rate at the date of purchase.

Receivables and Revenue Recognition

We generally establish one-year commercial membership contracts with employer groups, subject to cancellation by the employer group on 30-day written notice. Our Medicare contracts with CMS renew annually. Our military services contracts with the federal government and our contracts with various state Medicaid programs generally are multi-year contracts subject to annual renewal provisions. Individual polices are subject to the requirements of the Health Care Reform Law as discussed previously.

Premiums Revenue

We bill and collect premium from employer groups and members in our Medicare and other individual products monthly. We receive monthly premiums from the federal government and various states according to government specified payment rates and various contractual terms. Changes in revenues for our Medicare and individual commercial medical products resulting from the periodic changes in risk-adjustment scores derived from medical diagnoses for our membership and changes in risk corridor estimates are recognized when the amounts become determinable and the collectibility is reasonably assured.

Premiums revenue is estimated by multiplying the membership covered under the various contracts by the contractual rates. Premiums revenue is recognized as income in the period members are entitled to receive services, and is net of estimated uncollectible amounts, retroactive membership adjustments, and adjustments to recognize rebates under the minimum benefit ratios required under the Health Care Reform Law. We estimate policyholder rebates by projecting calendar year minimum benefit ratios for the individual, small group, and large group markets, as defined by the Health Care Reform Law using a methodology prescribed by HHS, separately by state and legal entity. Medicare Advantage products are also subject to minimum benefit ratio requirements under the Health Care Reform Law. Estimated calendar year rebates recognized ratably during the year are revised each period to reflect current experience. Retroactive membership adjustments result from enrollment changes not yet processed, or not yet reported by an employer group or the government. We routinely monitor the collectibility of specific accounts, the aging of receivables, historical retroactivity trends, estimated rebates, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in current operations. Premiums received prior to the service period are recorded as unearned revenues.

Medicare Part D

We cover prescription drug benefits in accordance with Medicare Part D under multiple contracts with CMS. The payments we receive monthly from CMS and members, which are determined from our annual bid, represent amounts for providing prescription drug insurance coverage. We recognize premiums revenue for providing this insurance coverage ratably over the term of our annual contract. Our CMS payment is subject to risk sharing through the Medicare Part D risk corridor provisions. In addition, receipts for reinsurance and low-income cost subsidies as well as receipts for certain discounts on brand name prescription drugs in the coverage gap represent payments for prescription drug costs for which we are not at risk.

The risk corridor provisions compare costs targeted in our bids to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to us or require us to refund to CMS a portion of the premiums we received. As risk corridor provisions are considered in our overall annual bid process, we estimate and recognize an adjustment to premiums revenue related to these provisions based upon pharmacy claims experience. We record a receivable or payable at the contract level and classify the amount as current or long-term in our consolidated balance sheets based on the timing of expected settlement.

Reinsurance and low-income cost subsidies represent funding from CMS in connection with the Medicare Part D program for which we assume no risk. Reinsurance subsidies represent funding from CMS for its portion of prescription drug costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage level. Low-income cost subsidies represent funding from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts above the out-of-pocket threshold for low-income beneficiaries. Monthly prospective payments from CMS for reinsurance and low-income cost subsidies are based on assumptions submitted with our annual bid. A reconciliation and related settlement of CMS's prospective subsidies against actual prescription drug costs we paid is made after the end of the year. The Health Care Reform Law mandates consumer discounts of 50% on brand name prescription drugs for Part D plan participants in the coverage gap. These discounts are funded by CMS and pharmaceutical manufacturers while we administer the application of these funds. We account for these subsidies and discounts as a deposit in our consolidated balance sheets and as a financing activity under receipts (withdrawals) from contract deposits in our consolidated statements of cash flows. For 2016, subsidy and discount reimbursements of $11.1 billion exceeded payments of $10.0 billion by $1.1 billion. For 2015, subsidy and discount payments of $8.9 billion exceeded reimbursements of $8.6 billion by $361 million. For 2014, subsidy and discount payments of $6.7 billion exceeded reimbursements of $5.8 billion by $945 million. We do not recognize premiums revenue or benefit expenses for these subsidies or discounts. Receipt and payment activity is accumulated at the contract level and recorded in our consolidated balance sheets in other current assets or trade accounts payable and accrued expenses depending on the contract balance at the end of the reporting period.

Settlement of the reinsurance and low-income cost subsidies as well as the risk corridor payment is based on a reconciliation made approximately 9 months after the close of each calendar year. Settlement with CMS for brand name prescription drug discounts is based on a reconciliation made approximately 14 to 18 months after the close of each calendar year. We continue to revise our estimates with respect to the risk corridor provisions based on subsequent period pharmacy claims data. See Note 6 for detail regarding amounts recorded to our consolidated balance sheets related to the risk corridor settlement and subsidies from CMS with respect to the Medicare Part D program.

Services Revenue

Patient services revenue

Patient services include injury and illness care and related services as well as other healthcare services related to employer needs or as required by law. Patient services revenues are recognized in the period services are provided to the customer when the sales price is fixed or determinable, and are net of contractual allowances.

Administrative services fees

Administrative services fees cover the processing of claims, offering access to our provider networks and clinical programs, and responding to customer service inquiries from members of self-funded groups. Revenues from providing administration services, also known as administrative services only, or ASO, are recognized in the period services are performed and are net of estimated uncollectible amounts. ASO fees are estimated by multiplying the membership covered under the various contracts by the contractual rates. Under ASO contracts, self-funded employers retain the risk of financing substantially all of the cost of health benefits. However, many ASO customers purchase stop loss insurance coverage from us to cover catastrophic claims or to limit aggregate annual costs. Accordingly, we have recorded premiums revenue and benefits expense related to these stop loss insurance contracts. We routinely monitor the collectibility of specific accounts, the aging of receivables, as well as prevailing and anticipated economic conditions, and reflect any required adjustments in current operations. ASO fees received prior to the service period are recorded as unearned revenues.

Under our current TRICARE South Region contract with the Department of Defense, we provide administrative services, including offering access to our provider networks and clinical programs, claim processing, customer service, enrollment, and other services, while the federal government retains all of the risk of the cost of health benefits. We account for revenues under the current contract net of estimated health care costs similar to an administrative services fee only agreement. The current contract includes fixed administrative services fees and incentive fees and penalties. Administrative services fees are recognized as services are performed.

Our TRICARE members are served by both in-network and out-of-network providers in accordance with the current contract. We pay health care costs related to these services to the providers and are subsequently reimbursed by the DoD for such payments. We account for the payments of the federal government's claims and the related reimbursements under deposit accounting in our consolidated balance sheets and as a financing activity under receipts (withdrawals) from contract deposits in our consolidated statements of cash flows. For 2016, health care cost reimbursements and payments were each approximately $3.3 billion, with payments exceeding reimbursements by $25 million for the year. For 2015, health care cost reimbursements and payments were each approximately $3.3 billion, with payments exceeding reimbursements by $4 million for the year. For 2014, health care cost reimbursements and payments were each $3.2 billion.

Receivables

Receivables, including premium receivables, patient services revenue receivables, and ASO fee receivables, are shown net of allowances for estimated uncollectible accounts, retroactive membership adjustments, and contractual allowances.

Other Current Assets

Other current assets includes amounts associated with Medicare Part D as discussed above and in Note 6, rebates due from pharmaceutical manufacturers and other amounts due within one year. We accrue pharmaceutical rebates as they are earned based on contractual terms and usage of the product. The balance of pharmaceutical rebates was $889 million at December 31, 2016 and $723 million at December 31, 2015.

Policy Acquisition Costs

Policy acquisition costs are those costs that relate directly to the successful acquisition of new and renewal insurance policies. Such costs include commissions, costs of policy issuance and underwriting, and other costs we incur to acquire new business or renew existing business. We expense policy acquisition costs related to our employer-group prepaid health services policies as incurred. These short-duration employer-group prepaid health services policies typically have a 1-year term and may be canceled upon 30 days notice by the employer group.

Life insurance, annuities, and certain health and other supplemental policies sold to individuals are accounted for as long-duration insurance products because they are expected to remain in force for an extended period beyond one year and premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. As a result, we defer policy acquisition costs, primarily consisting of commissions, and amortize them over the estimated life of the policies in proportion to premiums earned. Deferred acquisition costs are reviewed to determine if they are recoverable from future income. See Note 18.

Beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model and accordingly policy acquisition costs are expensed as incurred because premiums received in the current year are intended to pay anticipated benefits in that year. In addition, as previously underwritten members transition to plans compliant with the Health Care Reform Law, it results in policy lapses and the recognition of previously deferred acquisition costs.

Long-Lived Assets

Property and equipment is recorded at cost. Gains and losses on sales or disposals of property and equipment are included in operating costs. Certain costs related to the development or purchase of internal-use software are capitalized. Depreciation is computed using the straight-line method over estimated useful lives ranging from 3 to 10 years for equipment, 3 to 5 years for computer software, and 10 to 20 years for buildings. Improvements to leased facilities are depreciated over the shorter of the remaining lease term or the anticipated life of the improvement.

We periodically review long-lived assets, including property and equipment and other intangible assets, for impairment whenever adverse events or changes in circumstances indicate the carrying value of the asset may not be recoverable. Losses are recognized for a long-lived asset to be held and used in our operations when the undiscounted

future cash flows expected to result from the use of the asset are less than its carrying value. We recognize an impairment loss based on the excess of the carrying value over the fair value of the asset. A long-lived asset held for sale is reported at the lower of the carrying amount or fair value less costs to sell. Depreciation expense is not recognized on assets held for sale. Losses are recognized for a long-lived asset to be abandoned when the asset ceases to be used. In addition, we periodically review the estimated lives of all long-lived assets for reasonableness.

Goodwill and Other Intangible Assets

Goodwill represents the unamortized excess of cost over the fair value of the net tangible and other intangible assets acquired. We are required to test at least annually for impairment at a level of reporting referred to as the reporting unit, and more frequently if adverse events or changes in circumstances indicate that the asset may be impaired. A reporting unit either is our operating segments or one level below the operating segments, referred to as a component, which comprise our reportable segments. A component is considered a reporting unit if the component constitutes a business for which discrete financial information is available that is regularly reviewed by management. We aggregate the components of an operating segment into one reporting unit if they have similar economic characteristics. Goodwill is assigned to the reporting unit that is expected to benefit from a specific acquisition.

We use a two-step process to review goodwill for impairment. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any. Impairment tests are performed, at a minimum, in the fourth quarter of each year supported by our long-range business plan and annual planning process. We rely on an evaluation of future discounted cash flows to determine fair value of our reporting units. Impairment tests completed for 2016, 2015, and 2014 did not result in an impairment loss.

Other intangible assets primarily relate to acquired customer contracts/relationships and are included with other long-term assets in the consolidated balance sheets. Other intangible assets are amortized over the useful life, based upon the pattern of future cash flows attributable to the asset. This sometimes results in an accelerated method of amortization for customer contracts because the asset tends to dissipate at a more rapid rate in earlier periods. Other than customer contracts, other intangible assets generally are amortized using the straight-line method. We review other finite-lived intangible assets for impairment under our long-lived asset policy.

Benefits Payable and Benefits Expense Recognition

Benefits expense includes claim payments, capitation payments, pharmacy costs net of rebates, allocations of certain centralized expenses and various other costs incurred to provide health insurance coverage to members, as well as estimates of future payments to hospitals and others for medical care and other supplemental benefits provided on or prior to the balance sheet date. Capitation payments represent monthly contractual fees disbursed to primary care and other providers who are responsible for providing medical care to members. Pharmacy costs represent payments for members' prescription drug benefits, net of rebates from drug manufacturers. Receivables for such pharmacy rebates are included in other current assets in our consolidated balance sheets. Other supplemental benefits include dental, vision, and other supplemental health and financial protection products.

We estimate the costs of our benefits expense payments using actuarial methods and assumptions based upon claim payment patterns, medical cost inflation, historical developments such as claim inventory levels and claim receipt patterns, and other relevant factors, and record benefit reserves for future payments. We continually review estimates of future payments relating to claims costs for services incurred in the current and prior periods and make necessary adjustments to our reserves.

Benefits expense is recognized in the period in which services are provided and includes an estimate of the cost of services which have been incurred but not yet reported, or IBNR. Our reserving practice is to consistently recognize the actuarial best point estimate within a level of confidence required by actuarial standards. Actuarial standards of practice generally require a level of confidence such that the liabilities established for IBNR have a greater probability of being adequate versus being insufficient, or such that the liabilities established for IBNR are sufficient to cover obligations under an assumption of moderately adverse conditions. Adverse conditions are situations in which the actual claims are expected to be higher than the otherwise estimated value of such claims at the time of the estimate. Therefore, in many situations, the claim amounts ultimately settled will be less than the estimate that satisfies the actuarial standards of practice.

We develop our estimate for IBNR using actuarial methodologies and assumptions, primarily based upon historical claim experience. Depending on the period for which incurred claims are estimated, we apply a different method in determining our estimate. For periods prior to the most recent two months, the key assumption used in estimating our IBNR is that the completion factor pattern remains consistent over a rolling 12-month period after adjusting for known changes in claim inventory levels and known changes in claim payment processes. Completion factors result from the calculation of the percentage of claims incurred during a given period that have historically been adjudicated as of the reporting period. For the most recent two months, the incurred claims are estimated primarily from a trend analysis based upon per member per month claims trends developed from our historical experience in the preceding months, adjusted for known changes in estimates of recent hospital and drug utilization data, provider contracting changes, changes in benefit levels, changes in member cost sharing, changes in medical management processes, product mix, and weekday seasonality.

The completion factor method is used for the months of incurred claims prior to the most recent two months because the historical percentage of claims processed for those months is at a level sufficient to produce a consistently reliable result. Conversely, for the most recent two months of incurred claims, the volume of claims processed historically is not at a level sufficient to produce a reliable result, which therefore requires us to examine historical trend patterns as the primary method of evaluation. Changes in claim processes, including recoveries of overpayments, receipt cycle times, claim inventory levels, outsourcing, system conversions, and processing disruptions due to weather or other events affect views regarding the reasonable choice of completion factors. Claim payments to providers for services rendered are often net of overpayment recoveries for claims paid previously, as contractually allowed. Claim overpayment recoveries can result from many different factors, including retroactive enrollment activity, audits of provider billings, and/or payment errors. Changes in patterns of claim overpayment recoveries can be unpredictable and result in completion factor volatility, as they often impact older dates of service. The receipt cycle time measures the average length of time between when a medical claim was initially incurred and when the claim form was received. Increases in electronic claim submissions from providers decrease the receipt cycle time. If claims are submitted or processed on a faster (slower) pace than prior periods, the actual claim may be more (less) complete than originally estimated using our completion factors, which may result in reserves that are higher (lower) than required.

Medical cost trends potentially are more volatile than other segments of the economy. The drivers of medical cost trends include increases in the utilization of hospital facilities, physician services, new higher priced technologies and medical procedures, and new prescription drugs and therapies, as well as the inflationary effect on the cost per unit of each of these expense components. Other external factors such as government-mandated benefits or other regulatory changes, the tort liability system, increases in medical services capacity, direct to consumer advertising for prescription drugs and medical services, an aging population, lifestyle changes including diet and smoking, catastrophes, and epidemics also may impact medical cost trends. Internal factors such as system conversions, claims processing cycle times, changes in medical management practices and changes in provider contracts also may impact our ability to accurately predict estimates of historical completion factors or medical cost trends. All of these factors are considered in estimating IBNR and in estimating the per member per month claims trend for purposes of determining the reserve for the most recent two months. Additionally, we continually prepare and review follow-up studies to assess the reasonableness of the estimates generated by our process and methods over time. The results of these studies are also considered in determining the reserve for the most recent two months. Each of these factors requires significant judgment by management.

We reassess the profitability of our contracts for providing insurance coverage to our members when current operating results or forecasts indicate probable future losses. We establish a premium deficiency reserve in current operations to the extent that the sum of expected future costs, claim adjustment expenses, and maintenance costs exceeds related future premiums under contracts without consideration of investment income. For purposes of determining premium deficiencies, contracts are grouped in a manner consistent with our method of acquiring, servicing, and measuring the profitability of such contracts. Losses recognized as a premium deficiency result in a beneficial effect in subsequent periods as operating losses under these contracts are charged to the liability previously established. Because the majority of our member contracts renew annually, we would not record a material premium deficiency reserve, except when unanticipated adverse events or changes in circumstances indicate otherwise. In the fourth quarter of 2015, we recognized a premium deficiency reserve of $176 million for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year and recorded a change in estimate of $208 million in the second quarter of 2016 associated with the 2016 coverage year as discussed in more detail in Note 7. As of December 31, 2016, we had no remaining premium deficiency reserve.

We believe our benefits payable are adequate to cover future claims payments required. However, such estimates are based on knowledge of current events and anticipated future events. Therefore, the actual liability could differ materially from the amounts provided.

Future policy benefits payable

Future policy benefits payable include liabilities for long-duration insurance policies including long-term care, life insurance, annuities, and certain health and other supplemental policies sold to individuals for which some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on interest rates, mortality, morbidity, and maintenance expense assumptions. Interest rates are based on our expected net investment returns on the investment portfolio supporting the reserves for these blocks of business. Mortality, a measure of expected death, and morbidity, a measure of health status, assumptions are based on published actuarial tables, modified based upon actual experience. Changes in estimates of these reserves are recognized as an adjustment to benefits expense in the period the changes occur. We perform loss recognition tests at least annually in the fourth quarter, and more frequently if adverse events or changes in circumstances indicate that the level of the liability, together with the present value of future gross premiums, may not be adequate to provide for future expected policy benefits and maintenance costs. During 2016, we recorded a loss for a premium deficiency as discussed further in Note 18.

We adjust future policy benefits payable for the additional liability that would have been recorded if investment securities backing the liability had been sold at their stated aggregate fair value and the proceeds reinvested at current yields. We include the impact of this adjustment, if any, net of applicable deferred taxes, with the change in unrealized investment gain (loss) in accumulated other comprehensive income in stockholders' equity. As discussed previously, beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model under which policy reserves are not established because premiums received in the current year are intended to pay anticipated benefits in that year. In addition, as previously underwritten members transition to plans compliant with the Health Care Reform Law, it results in policy lapses and the release of reserves for future policy benefits.

Book Overdraft

Under our cash management system, checks issued but not yet presented to banks that would result in negative bank balances when presented are classified as a current liability in the consolidated balance sheets. Changes in book overdrafts from period to period are reported in the consolidated statement of cash flows as a financing activity.

Income Taxes

We recognize an asset or liability for the deferred tax consequences of temporary differences between the tax bases of assets or liabilities and their reported amounts in the consolidated financial statements. These temporary differences will result in taxable or deductible amounts in future years when the reported amounts of the assets or liabilities are recovered or settled. We also recognize the future tax benefits such as net operating and capital loss carryforwards as

deferred tax assets. A valuation allowance is provided against these deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. Future years' tax expense may be increased or decreased by adjustments to the valuation allowance or to the estimated accrual for income taxes.

We record tax benefits when it is more likely than not that the tax return position taken with respect to a particular transaction will be sustained. A liability, if recorded, is not considered resolved until the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired, or the tax position is ultimately settled through examination, negotiation, or litigation. We classify interest and penalties associated with uncertain tax positions in our provision for income taxes.

Derivative Financial Instruments

On October 29, 2012, we acquired a noncontrolling equity interest in MCCI Holdings, LLC, or MCCI, a privately held Medical Services Organization, or MSO, headquartered in Miami, Florida, that primarily coordinates medical care for Medicare Advantage beneficiaries in Florida, Texas and Georgia. Our agreement with MCCI includes a put option that would allow the controlling interest holder to put their interest to us beginning in 2018 as well as a call option that would allow us to purchase the controlling interest beginning in 2021. Accordingly, we recorded, at fair value, a liability and an asset associated with the put and call, respectively. Changes in the fair value of the liability and asset during the years ended December 31, 2016, 2015, and 2014 were not material to our results of operations, financial condition, or cash flows.

At times, we may use interest-rate swap agreements to manage our exposure to interest rate risk. The differential between fixed and variable rates to be paid or received is accrued and recognized over the life of the agreements as adjustments to interest expense in the consolidated statements of income. We were not party to any interest-rate swap agreements in 2016, 2015, or 2014.

Related Party

As noted above, MCCI is a related party to Humana. In December 2015, we purchased a note receivable directly from a third-party bank syndicate related to the financing of MCCI's business and extended the exercise date of the put option to 2018 and the call option to 2021. The note balance was $314 million at December 31, 2016 and $284 million at December 31, 2015. The note receivable bears interest at 10% annually, payable in quarterly installments, and matures in December 2020. We have also entered into a revolving note agreement providing a line of credit up to $55 million under which no balance is outstanding at December 31, 2016. The note receivable is included with other long-term assets in our consolidated balance sheet and with purchases of investment securities in our consolidated statement of cash flows. The related interest income of $30 million for 2016 is included in investment income in our consolidated statement of income. The interest was accrued to the loan balance during 2016 pursuant to the terms of the note. MCCI provides services to Humana Medicare Advantage members under capitation contracts with our health plans. Under these capitation agreements with Humana, MCCI assumes the financial risk associated with these Medicare Advantage members. We also have an outstanding advance to MCCI of approximately $6 million at December 31, 2016, with repayment terms tied to the performance under the capitation agreements. We recognized benefits expense of approximately $1.1 billion in 2016, $1.0 billion in 2015 and $962 million in 2014 under these capitation agreements with MCCI.

Stock-Based Compensation

We generally recognize stock-based compensation expense, as determined on the date of grant at fair value, on a straight-line basis over the period during which an employee is required to provide service in exchange for the award (the vesting period). In addition, for awards with both time and performance-based conditions, we generally recognize compensation expense on a straight line basis over the vesting period when it is probable that the performance condition will be achieved. However, prior to July 2, 2015, for awards granted to retirement eligible employees, compensation expense is recognized on a straight-line basis over the shorter of the requisite service period or the period from the date of grant to an employee's eligible retirement date. For awards granted on or after July 2, 2015 to retirement eligible employees, we recognize expense on a straight-line basis over the service period (the vesting period). We estimate expected forfeitures and recognize compensation expense only for those awards which are expected to vest. We estimate

the grant-date fair value of stock options using the Black-Scholes option-pricing model. Prior to 2016 we reported certain tax effects of stock-based compensation as a financing activity rather than an operating activity in the consolidated statement of cash flows. In 2016, we prospectively applied the provisions of new guidance issued by the Financial Accounting Standards Board, or FASB, related to the presentation of windfall tax benefits as cash flows from operating activities which resulted in reclassifying $20 million of cash flows from financing activities to operating activities for the three months ended March 31, 2016. We elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period.

Additional detail regarding our stock-based compensation plans is included in Note 13.

Earnings Per Common Share

We compute basic earnings per common share on the basis of the weighted-average number of unrestricted common shares outstanding. Diluted earnings per common share is computed on the basis of the weighted-average number of unrestricted common shares outstanding plus the dilutive effect of outstanding employee stock options and restricted shares, or units, using the treasury stock method.

Fair Value

Assets and liabilities measured at fair value are categorized into a fair value hierarchy based on whether the inputs to valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our own assumptions about the assumptions market participants would use. The fair value hierarchy includes three levels of inputs that may be used to measure fair value as described below.

Level 1 – Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt securities that are traded in an active exchange market.

Level 2 – Observable inputs other than Level 1 prices such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments as well as debt securities whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Level 3 – Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 includes assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques reflecting our own assumptions about the assumptions market participants would use as well as those requiring significant management judgment.

Fair value of actively traded debt securities are based on quoted market prices. Fair value of other debt securities are based on quoted market prices of identical or similar securities or based on observable inputs like interest rates generally using a market valuation approach, or, less frequently, an income valuation approach and are generally classified as Level 2. We obtain at least one price for each security from a third party pricing service. These prices are generally derived from recently reported trades for identical or similar securities, including adjustments through the reporting date based upon observable market information. When quoted prices are not available, the third party pricing service may use quoted market prices of comparable securities or discounted cash flow analysis, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include benchmark yields, reported trades, credit spreads, broker quotes, default rates, and prepayment speeds. We are responsible for the determination of fair value and as such we perform analysis on the prices received from the third party pricing service to determine whether the prices are reasonable estimates of fair value. Our analysis includes a review of monthly price fluctuations as well as a quarterly comparison of the prices received from the pricing service to prices reported by our third party investment advisor. In addition, on a quarterly basis we examine the underlying inputs and assumptions for a sample of individual securities across asset classes, credit rating levels, and various durations.

Fair value of privately held debt securities, as well as auction rate securities, are estimated using a variety of valuation methodologies, including both market and income approaches, where an observable quoted market does not exist and are generally classified as Level 3. For privately-held debt securities, such methodologies include reviewing the value ascribed to the most recent financing, comparing the security with securities of publicly-traded companies in similar lines of business, and reviewing the underlying financial performance including estimating discounted cash flows. Auction rate securities are debt instruments with interest rates that reset through periodic short-term auctions. From time to time, liquidity issues in the credit markets have led to failed auctions. Given the liquidity issues, fair value could not be estimated based on observable market prices, and as such, unobservable inputs were used. For auction rate securities, valuation methodologies include consideration of the quality of the sector and issuer, underlying collateral, underlying final maturity dates, and liquidity.

Recently Issued Accounting Pronouncements

Recently Adopted Accounting Pronouncements

In March 2016, the FASB issued new guidance related to accounting for employee share-based payments, which changes how income tax effects of share-based payments are recorded as well as the minimum statutory tax withholding requirements and allows an accounting policy election to recognize forfeitures when they occur. As permitted, we elected to early adopt this new guidance during the second quarter of 2016 prospectively effective January 1, 2016. The adoption of this new guidance resulted in the recognition of approximately $20 million, or $0.12 per diluted common share, of tax benefits in net income in our consolidated statement of income for the three months ended March 31, 2016 that had previously been recorded as additional paid-in capital in our condensed consolidated balance sheet. We also prospectively applied the provisions of the new guidance related to the presentation of windfall tax benefits as cash flows from operating activities which resulted in reclassifying $20 million of cash flows from financing activities to operating activities for the three months ended March 31, 2016. We elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period.

In November 2015, the FASB issued new guidance related to accounting for income taxes which changes the balance sheet classification of deferred taxes, requiring deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The new guidance is effective for us beginning with annual and interim periods in 2017, with early adoption permitted. We elected to early adopt the guidance and have classified all deferred tax liabilities and assets as noncurrent in our consolidated balance sheet at December 31, 2015 to simplify their presentation. The adoption of the new guidance did not have any impact on our results of operations or cash flows.

In May 2015, the FASB issued new guidance requiring insurance entities to provide additional disclosures about claim liabilities including paid claims development information by accident year and claim frequency data and related methodologies. We adopted this new guidance in this 2016 Form 10-K. The applicable disclosures are included in this Note 2 and Note 10.

In March 2015, the FASB issued new guidance which changes the presentation of debt issuance costs from an asset to a direct reduction of the related debt liability. We adopted this new guidance on January 1, 2016 on a retrospective basis by directly deducting unamortized debt issuance costs from long-term debt on our balance sheet for all periods presented. Debt issuance costs had previously been classified in our balance sheet as other long-term assets.

Accounting Pronouncements Effective in Future Periods

In June 2016, the FASB issued guidance introducing a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses. The guidance is effective for us beginning January 1, 2019. The new current expected credit losses (CECL) model generally calls for the immediate recognition of all expected credit losses and applies to loans, accounts and trade receivables as well as other financial assets measured at amortized cost, loan commitments and off-balance sheet credit exposures, debt securities and other financial assets measured at fair value through other comprehensive income, and beneficial interests in securitized financial assets. The new guidance replaces the current incurred loss model for measuring expected credit losses, requires expected losses on available-for-sale debt securities to be recognized through an allowance for credit losses rather than as reductions in the amortized cost of the securities, and provides for additional disclosure requirements. Our investment portfolio

consists of available for sale debt securities. We are currently evaluating the impact on our results of operations, financial condition, or cash flows.

In February 2016, the FASB issued new guidance related to accounting for leases which requires lessees to record assets and liabilities reflecting the leased assets and lease obligations, respectively, while following the dual model for recognition in statements of income requiring leases to be classified as either operating or finance. Operating leases will result in straight-line expense (similar to current operating leases) while finance leases will result in a front-loaded expense pattern (similar to current capital leases). The new guidance is effective for us beginning with annual and interim periods in 2019, with earlier adoption permitted, and requires retrospective application to previously issued annual and interim financial statements. We have begun the process of identifying the population of lease agreements and other arrangements that may contain embedded leases for purposes of adopting the new standard. While we expect to record significant leased assets and corresponding lease obligations based on our existing population of individual leases, we continue to evaluate the impact on our results of operations, financial position and cash flows.

In May 2014, the FASB issued new guidance that amends the accounting for revenue recognition. The amendments are intended to provide a more robust framework for addressing revenue issues, improve comparability of revenue recognition practices, and improve disclosure requirements. Insurance contracts are not included in the scope of this new guidance. Accordingly, our premiums revenue and investment income, collectively representing approximately 98% of our consolidated external revenues for 2016, are not included in the scope of the new guidance. We are analyzing how we may recognize revenue under the new guidance by reviewing selected sample contracts presently in place. The new guidance is effective for us beginning with annual and interim periods in 2018. While we expect revenue related to our Pharmacy, Provider Services, ASO and other services businesses to remain primarily unchanged, we are still evaluating the impact of the new guidance on the customer arrangements for these businesses. Accordingly, we continue to evaluate the impact of the new standard on our results of operations, financial condition and cash flows.

There are no other recently issued accounting standards that apply to us or that are expected to have a material impact on our results of operations, financial condition, or cash flows.

3. ACQUISITIONS AND DIVESTITURES

On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc., or Concentra, to MJ Acquisition Corporation, a joint venture between Select Medical Holdings Corporation and Welsh, Carson, Anderson & Stowe XII, L.P., a private equity fund, for approximately $1,055 million in cash, excluding approximately $22 million of transaction costs. In connection with the sale, we recognized a pre-tax gain, net of transaction costs, of $270 million which is reported as gain on sale of business in the accompanying consolidated statements of income for the year ended December 31, 2015. The accompanying consolidated statements of income include revenues related to Concentra of $411 million in 2015 and $998 million in 2014.

During 2016, 2015 and 2014, we acquired health and wellness related businesses which, individually or in the aggregate, have not had a material impact on our results of operations, financial condition, or cash flows. The results of operations and financial condition of these businesses have been included in our condensed consolidated statements of income and condensed consolidated balance sheets from the respective acquisition dates. Acquisition-related costs recognized in each of 2016, 2015, and 2014 were not material to our results of operations. The pro forma financial information assuming the acquisitions had occurred as of the beginning of the calendar year prior to the year of acquisition, as well as the revenues and earnings generated during the year of acquisition, were not material for disclosure purposes.

4. INVESTMENT SECURITIES

Investment securities classified as current and long-term were as follows at December 31, 2016 and 2015, respectively:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
		(in millions)		
December 31, 2016				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 800	$ 1	$ (15)	$ 786
Mortgage-backed securities	1,662	6	(31)	1,637
Tax-exempt municipal securities	3,358	15	(68)	3,305
Mortgage-backed securities:				
Residential	9	—	—	9
Commercial	307	1	(4)	304
Asset-backed securities	160	—	—	160
Corporate debt securities	3,530	145	(78)	3,597
Total debt securities	$ 9,826	$ 168	$ (196)	$ 9,798
December 31, 2015				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	$ 331	$ 2	$ (1)	$ 332
Mortgage-backed securities	1,902	12	(23)	1,891
Tax-exempt municipal securities	2,611	61	(4)	2,668
Mortgage-backed securities:				
Residential	13	—	—	13
Commercial	1,024	2	(41)	985
Asset-backed securities	264	1	(2)	263
Corporate debt securities	2,873	140	(55)	2,958
Total debt securities	$ 9,018	$ 218	$ (126)	$ 9,110

Gross unrealized losses and fair values aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows at December 31, 2016 and 2015, respectively:

	Less than 12 months		12 months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in millions)					
December 31, 2016						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 697	$ (15)	$ 3	$ —	$ 700	$ (15)
Mortgage-backed securities	1,528	(31)	3	—	1,531	(31)
Tax-exempt municipal securities	2,756	(67)	43	(1)	2,799	(68)
Mortgage-backed securities:						
Residential	—	—	4	—	4	—
Commercial	182	(3)	24	(1)	206	(4)
Asset-backed securities	51	—	63	—	114	—
Corporate debt securities	1,544	(71)	69	(7)	1,613	(78)
Total debt securities	$ 6,758	$ (187)	$ 209	$ (9)	$ 6,967	$ (196)
December 31, 2015						
U.S. Treasury and other U.S. government corporations and agencies:						
U.S. Treasury and agency obligations	$ 195	$ (1)	$ 14	$ —	$ 209	$ (1)
Mortgage-backed securities	1,484	(20)	86	(3)	1,570	(23)
Tax-exempt municipal securities	843	(3)	52	(1)	895	(4)
Mortgage-backed securities:						
Residential	2	—	4	—	6	—
Commercial	626	(13)	265	(28)	891	(41)
Asset-backed securities	258	(2)	—	—	258	(2)
Corporate debt securities	918	(45)	63	(10)	981	(55)
Total debt securities	$ 4,326	$ (84)	$ 484	$ (42)	$ 4,810	$ (126)

Approximately 98% of our debt securities were investment-grade quality, with a weighted average credit rating of AA by S&P at December 31, 2016. Most of the debt securities that were below investment-grade were rated BB, the higher end of the below investment-grade rating scale. At December 31, 2016, 8% of our tax-exempt municipal securities were pre-refunded, generally with U.S. government and agency securities. Tax-exempt municipal securities that were not pre-refunded were diversified among general obligation bonds of U.S. states and local municipalities as well as special revenue bonds. General obligation bonds, which are backed by the taxing power and full faith of the issuer, accounted for 46% of the tax-exempt municipals that were not pre-refunded in the portfolio. Special revenue bonds, issued by a municipality to finance a specific public works project such as utilities, water and sewer, transportation, or education, and supported by the revenues of that project, accounted for the remaining 54% of these municipals. Our general obligation bonds are diversified across the United States with no individual state exceeding 11%. In addition, 4% of our tax-exempt securities were insured by bond insurers and had an equivalent weighted average S&P credit rating of AA exclusive of the bond insurers' guarantee. Our investment policy limits investments in a single issuer and requires diversification among various asset types.

Residential mortgage back securities comprised approximately 99% of our agency mortgage-backed securities at December 31, 2016 and 98% at December 31, 2015.

The recoverability of our non-agency residential and commercial mortgage-backed securities is supported by factors such as seniority, underlying collateral characteristics and credit enhancements. These residential and commercial mortgage-backed securities at December 31, 2016 primarily were composed of senior tranches having high credit support, with over 99% of the collateral consisting of prime loans. The weighted average credit rating of all commercial mortgage-backed securities was AA+ at December 31, 2016.

The percentage of corporate securities associated with the financial services industry was 23% at December 31, 2016 and 25% at December 31, 2015.

Our unrealized loss from all securities was generated from approximately 990 positions out of a total of approximately 2,140 positions at December 31, 2016. All issuers of securities we own that were trading at an unrealized loss at December 31, 2016 remain current on all contractual payments. After taking into account these and other factors previously described, we believe these unrealized losses primarily were caused by an increase in market interest rates in the current markets than when the securities were purchased. At December 31, 2016, we did not intend to sell the securities with an unrealized loss position in accumulated other comprehensive income, and it is not likely that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss were not other-than-temporarily impaired at December 31, 2016.

The detail of realized gains (losses) related to investment securities and included within investment income was as follows for the years ended December 31, 2016, 2015, and 2014:

	2016	2015	2014
		(in millions)	
Gross realized gains	$ 120	$ 179	$ 29
Gross realized losses	(24)	(33)	(9)
Net realized capital gains	$ 96	$ 146	$ 20

There were no material other-than-temporary impairments in 2016, 2015, or 2014.

The contractual maturities of debt securities available for sale at December 31, 2016, regardless of their balance sheet classification, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	(in millions)	
Due within one year	$ 635	$ 635
Due after one year through five years	2,424	2,426
Due after five years through ten years	1,938	1,893
Due after ten years	2,691	2,734
Mortgage and asset-backed securities	2,138	2,110
Total debt securities	$ 9,826	$ 9,798

5. FAIR VALUE

Financial Assets

The following table summarizes our fair value measurements at December 31, 2016 and 2015, respectively, for financial assets measured at fair value on a recurring basis:

	Fair Value	Fair Value Measurements Using		
		Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
		(in millions)		
December 31, 2016				
Cash equivalents	$ 3,654	$ 3,654	$ —	$ —
Debt securities:				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	786	—	786	—
Mortgage-backed securities	1,637	—	1,637	—
Tax-exempt municipal securities	3,305	—	3,302	3
Mortgage-backed securities:				
Residential	9	—	9	—
Commercial	304	—	304	—
Asset-backed securities	160	—	160	—
Corporate debt securities	3,597	—	3,593	4
Total debt securities	9,798	—	9,791	7
Total invested assets	$ 13,452	$ 3,654	$ 9,791	$ 7
December 31, 2015				
Cash equivalents	$ 2,229	$ 2,229	$ —	$ —
Debt securities:				
U.S. Treasury and other U.S. government corporations and agencies:				
U.S. Treasury and agency obligations	332	—	332	—
Mortgage-backed securities	1,891	—	1,891	—
Tax-exempt municipal securities	2,668	—	2,663	5
Mortgage-backed securities:				
Residential	13	—	13	—
Commercial	985	—	985	—
Asset-backed securities	263	—	263	—
Corporate debt securities	2,958	—	2,952	6
Total debt securities	9,110	—	9,099	11
Total invested assets	$ 11,339	$ 2,229	$ 9,099	$ 11

There were no material transfers between Level 1 and Level 2 during 2016 or 2015.

Our Level 3 assets had a fair value of $7 million at December 31, 2016, or 0.1% of our total invested assets. During the years ended December 31, 2016, 2015, and 2014, the changes in the fair value of the assets measured using significant unobservable inputs (Level 3) were comprised of the following:

	For the years ended December 31,								
	2016			2015			2014		
	Private Placements	Auction Rate Securities	Total	Private Placements	Auction Rate Securities	Total	Private Placements	Auction Rate Securities	Total
	(in millions)								
Beginning balance at January 1	$ 6	$ 5	$ 11	$ 24	$ 8	$ 32	$ 24	$ 13	$ 37
Total gains or losses:									
Realized in earnings	—	—	—	(1)	—	(1)	—	—	—
Unrealized in other comprehensive income	—	—	—	—	—	—	—	—	—
Purchases	—	—	—	—	—	—	—	—	—
Sales	—	—	—	(17)	(3)	(20)	—	(5)	(5)
Settlements	(2)	(2)	(4)	—	—	—	—	—	—
Balance at December 31	$ 4	$ 3	$ 7	$ 6	$ 5	$ 11	$ 24	$ 8	$ 32

Financial Liabilities

Our long-term debt, recorded at carrying value in our consolidated balance sheets, was $3,792 million at December 31, 2016 and $3,794 million at December 31, 2015. The fair value of our long-term debt was $4,004 million at December 31, 2016 and $3,986 million at December 31, 2015. The fair value of our long-term debt is determined based on Level 2 inputs, including quoted market prices for the same or similar debt, or if no quoted market prices are available, on the current prices estimated to be available to us for debt with similar terms and remaining maturities.

Due to the short-term nature, carrying value approximates fair value for our commercial paper borrowings.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

As disclosed in Note 3, we completed our acquisition of certain health and wellness related businesses during 2016, 2015, and 2014. The values of net tangible assets acquired and the resulting goodwill and other intangible assets were recorded at fair value using Level 3 inputs. The majority of the related tangible assets acquired and liabilities assumed were recorded at their carrying values as of the respective dates of acquisition, as their carrying values approximated their fair values due to their short-term nature. The fair values of goodwill and other intangible assets acquired in these acquisitions were internally estimated primarily based on the income approach. The income approach estimates fair value based on the present value of the cash flows that the assets are expected to generate in the future. We developed internal estimates for the expected cash flows and discount rates in the present value calculations. Other than assets acquired and liabilities assumed in these acquisitions, there were no material assets or liabilities measured at fair value on a nonrecurring basis during 2016, 2015, or 2014.

6. MEDICARE PART D

As discussed in Note 2, we cover prescription drug benefits in accordance with Medicare Part D under multiple contracts with CMS. The accompanying consolidated balance sheets include the following amounts associated with Medicare Part D as of December 31, 2016 and 2015. CMS subsidies/discounts in the table below include the reinsurance and low-income cost subsidies funded by CMS for which we assume no risk as well as brand name prescription drug discounts for Part D plan participants in the coverage gap funded by CMS and pharmaceutical manufacturers.

	2016		2015	
	Risk Corridor Settlement	CMS Subsidies/ Discounts	Risk Corridor Settlement	CMS Subsidies/ Discounts
	(in millions)			
Other current assets	$ 8	$ 1,001	$ 25	$ 2,082
Trade accounts payable and accrued expenses	(158)	(128)	(47)	(63)
Net current (liability) asset	$ (150)	$ 873	$ (22)	$ 2,019

7. HEALTH CARE REFORM

Operating results for our individual commercial medical business compliant with the Health Care Reform Law have been challenged primarily due to unanticipated modifications in the program subsequent to the passing of the Health Care Reform Law, resulting in higher covered population morbidity and the ensuing enrollment and claims issues causing volatility in claims experience. We took a number of actions in 2015 that we believed would improve the profitability of our individual commercial medical business in 2016. These actions were subject to regulatory restrictions in certain geographies and included premium increases for the 2016 coverage year related generally to the first half of 2015 claims experience, the discontinuation of certain products as well as exit of certain markets for 2016, network improvements, enhancements to claims and clinical processes and administrative cost control. Despite these actions, the deterioration in the second half of 2015 claims experience together with 2016 open enrollment results that included the retention of many high-utilizing members for 2016 resulted in a probable future loss. As a result of our assessment in the fourth quarter of 2015 of the profitability of our individual commercial medical policies compliant with the Health Care Reform Law, we recorded in that quarter a provision for probable future losses (premium deficiency reserve) for the 2016 coverage year of $176 million in benefits payable in our consolidated balance sheet with a corresponding increase in benefits expense in our consolidated statement of income. As noted in the table below, in the second quarter of 2016, we increased the premium deficiency reserve for the 2016 coverage year and recorded a change in estimate of $208 million with a corresponding increase in benefits expense in our condensed consolidated statement of income primarily as a result of currently and projected unfavorable claims experience.

Changes in the premium deficiency reserve for the 2016 coverage year for the years ended December 31, 2016 and 2015 were as follows. There was no premium deficiency reserve in 2014.

	Premium Deficiency Reserve For the years ended December 31,	
	2016	2015
	(in millions)	
Balance at January 1	176	$ —
Current period results applied to the PDR liability for the 2016 coverage year	(384)	—
Change in full year estimate recorded in benefits expense	208	176
Balance at December 31	$ —	$ 176

On November 10, 2016, the U.S. Court of Federal Claims ruled in favor of the government in one of a series of cases filed by insurers, unrelated to us, against HHS to collect risk corridor payments, rejecting all of the insurer's statutory, contract and Constitutional claims for payment. On November 18, 2016, HHS issued a memorandum indicating a significant funding shortfall for the 2015 coverage year, the second consecutive year of significant shortfalls. Given the successful challenge of the risk corridor provisions in court, Congressional inquiries into the funding of the risk corridor program, and significant funding shortfalls under the first two years of the program, during the fourth quarter of 2016 we wrote-off $583 million in risk corridor receivables outstanding as of September 30, 2016, including $415 million associated with the 2014 and 2015 coverage years. From inception of the risk corridor program through December 31, 2016, we collected approximately $36 million from CMS for risk corridor receivables associated with

the 2014 coverage year funded by HHS in accordance with previous guidance, utilizing funds HHS collected from us and other carriers under the 2014 and 2015 risk corridor program.

On February 14, 2017, we announced we are exiting our individual commercial medical businesses January 1, 2018. As discussed previously, we have worked over the past several years to address market and programmatic challenges in order to keep coverage options available wherever we could offer a viable product. This has included pursuing business changes, such as modifying networks, restructuring product offerings, reducing the company's geographic footprint and increasing premiums. All of these actions were taken with the expectation that our individual commercial medical business would stabilize to the point where we could continue to participate in the program. However, based on our initial analysis of data associated with our healthcare exchange membership following the 2017 open enrollment period, we are seeing further signs of an unbalanced risk pool. Therefore, we have decided that we cannot continue to offer this coverage for 2018.

The accompanying consolidated balance sheets include the following amounts associated with the 3Rs at December 31, 2016 and December 31, 2015. Amounts classified as long-term represent settlements that we expect to exceed 12 months at December 31, 2016.

	2016			2015		
	Risk Adjustment Settlement	Reinsurance Recoverables	Risk Corridor Settlement	Risk Adjustment Settlement	Reinsurance Recoverables	Risk Corridor Settlement
	(in millions)					
Prior Coverage Years						
Premiums receivable	$ —	$ —	$ —	$ 126	$ —	$ —

Trade accounts payable and accrued expenses	—	—	—	(223)	—	—
Net current asset (liability)	—	54	—	(97)	610	—
Other long-term assets	—	—	—	10	—	459
Total prior coverage years' net asset (liability)	—	54	—	(87)	610	459
Current Coverage Year						
Premiums receivable	307	—	—	—	—	—
Other current assets	—	206	—	—	—	—
Trade accounts payable and accrued expenses	(117)	—	—	—	—	—
Net current asset	190	206	—	—	—	—
Other long-term assets	6	—	—	—	—	—
Total current coverage year net asset	196	206	—	—	—	—
Total net asset (liability)	$ 196	$ 260	$ —	$ (87)	$ 610	$ 459

Changes in estimate of the risk adjustment and reinsurance receivables and payables for prior coverage years primarily result from the annual June 30 notification from CMS of risk adjustment and reinsurance settlement amounts. These changes in estimate were substantially offset by changes in estimate of risk corridor receivables that were subsequently written off in the fourth quarter of 2016 as discussed above. During 2016, net collections under the 3Rs associated with prior coverage years were $383 million. We expect to collect the remaining $54 million of reinsurance recoverables related to prior coverage years in 2017.

To the extent certain provisions of the Health Care Reform Law are successfully challenged in court or there are changes in legislation or the application of legislation, there can be no guarantee that receivables established under the reinsurance or risk adjustment provisions of the Health Care Reform Law will ultimately be collected. If we fail to effectively implement our operational and strategic initiatives with respect to the implementation of the Health Care Reform Law, our business may be materially adversely affected. Additionally, potential legislative changes, including activities to repeal or replace the Health Care Reform Law, creates uncertainty for our business, and we cannot predict when, or in what form, such legislative changes may occur.

In 2016, we paid the federal government $916 million for the annual health insurance industry fee attributed to calendar year 2016, compared to $867 million in 2015 and $562 million in 2014, in accordance with the Health Care Reform Law. This fee is not deductible for tax purposes. The annual health insurance industry fee has been suspended for calendar year 2017 but is scheduled to resume in calendar year 2018.

8. PROPERTY AND EQUIPMENT, NET

Property and equipment was comprised of the following at December 31, 2016 and 2015.

	2016	2015
	(in millions)	
Land	$ 20	$ 20
Buildings and leasehold improvements	681	633
Equipment	750	645
Computer software	1,744	1,424
	3,195	2,722
Accumulated depreciation	(1,690)	(1,338)
Property and equipment, net	$ 1,505	$ 1,384

Depreciation expense was $388 million in 2016, $354 million in 2015, and $328 million in 2014, including amortization expense for capitalized internally developed and purchased software of $255 million in 2016, $220 million in 2015, and $191 million in 2014.

9. GOODWILL AND OTHER INTANGIBLE ASSETS

Changes in the carrying amount of goodwill for our reportable segments for the years ended December 31, 2016 and 2015 were as follows:

	Retail	Group	Healthcare Services	Total
		(in millions)		
Balance at January 1, 2015	$ 1,069	$ 385	$ 1,777	$ 3,231
Acquisitions	—	—	35	35
Dispositions	—	—	(1)	(1)
Balance at December 31, 2015	1,069	385	1,811	3,265
Acquisitions	—	—	7	7
Balance at December 31, 2016	$ 1,069	$ 385	$ 1,818	$ 3,272

Healthcare Services segment goodwill of $480 million associated with the sale of Concentra was included with assets-held-for sale as of January 1, 2015 and is excluded from the table above. This $480 million of goodwill was disposed of on June 1, 2015 with the completion of the sale of Concentra.

The following table presents details of our other intangible assets included in other long-term assets in the accompanying consolidated balance sheets at December 31, 2016 and 2015.

	Weighted Average Life	2016			2015		
		Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
				(in millions)			
Other intangible assets:							
Customer contracts/relationships	9.8 years	$ 566	$ 347	$ 219	$ 566	$ 292	$ 274
Trade names and technology	8.3 years	104	69	35	104	54	50
Provider contracts	14.7 years	51	29	22	51	24	27
Noncompetes and other	8.2 years	32	28	4	32	26	6
Total other intangible assets	9.9 years	$ 753	$ 473	$ 280	$ 753	$ 396	$ 357

Amortization expense for other intangible assets was approximately $77 million in 2016, $93 million in 2015, and $121 million in 2014. The following table presents our estimate of amortization expense for each of the five next succeeding fiscal years:

	(in millions)
For the years ending December 31,	
2017	$ 71
2018	63
2019	52
2020	48
2021	14

10. BENEFITS PAYABLE

On a consolidated basis, activity in benefits payable, excluding military services, was as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Balances at January 1	$ 4,976	$ 4,475	$ 3,893
Less: Premium deficiency reserve	(176)	—	—
Less: Reinsurance recoverables	(85)	(78)	—
Balances at January 1, net	4,715	4,397	3,893
Incurred related to:			
Current year	45,318	44,397	38,641
Prior years	(582)	(236)	(518)
Total incurred	44,736	44,161	38,123
Paid related to:			
Current year	(40,852)	(39,802)	(34,357)
Prior years	(4,112)	(4,041)	(3,262)
Total paid	(44,964)	(43,843)	(37,619)
Premium deficiency reserve	—	176	—
Reinsurance recoverable	76	85	78
Balances at December 31	$ 4,563	$ 4,976	$ 4,475

Amounts incurred related to prior years vary from previously estimated liabilities as the claims ultimately are settled. Negative amounts reported for incurred related to prior years result from claims being ultimately settled for amounts less than originally estimated (favorable development).

As previously discussed, our reserving practice is to consistently recognize the actuarial best estimate of our ultimate liability for claims. Actuarial standards require the use of assumptions based on moderately adverse experience, which generally results in favorable reserve development, or reserves that are considered redundant. We experienced favorable medical claims reserve development related to prior fiscal years of $582 million in 2016, $236 million in 2015, and $518 million in 2014. The table below details our favorable medical claims reserve development related to prior fiscal years by segment for 2016, 2015, and 2014.

	Favorable Medical Claims Reserve Development		
	2016	2015	2014
Retail Segment	$ (535)	$ (228)	$ (488)
Group Segment	(46)	(7)	(29)
Other Businesses	(1)	(1)	(1)
Total	$ (582)	$ (236)	$ (518)

The favorable medical claims reserve development for 2016, 2015, and 2014 primarily reflects the consistent application of trend and completion factors estimated using an assumption of moderately adverse conditions. Favorable prior period development in 2016 primarily resulted from our Medicare Advantage and individual commercial medical businesses. The decline in favorable prior period development in 2015 primarily was due to the impact of lower financial claim recoveries due in part to our gradual implementation during 2014 of inpatient authorization review prior to admission as opposed to post adjudication, as well as higher than expected flu associated claims from the fourth quarter of 2014 and continued volatility in claims associated with individual commercial medical products. The favorable prior

period development during 2014 resulted from increased membership, better than originally expected utilization across most of our major business lines and increased financial recoveries. The increase in financial recoveries primarily resulted from claim audit process enhancements as well as increased volume of claim audits and expanded audit scope. All lines of business benefited from these improvements.

Benefits expense excluded from the previous table was as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Premium deficiency reserve for short-duration policies	$ (176)	$ 176	$ —
Military services	8	12	11
Future policy benefits	439	(80)	32
Total	$ 271	$ 108	$ 43

In the fourth quarter of 2015, we recognized a premium deficiency reserve for our individual commercial medical business compliant with the Health Care Reform Law associated with the 2016 coverage year as discussed in more detail in Note 7.

Military services benefits expense for each year in the table above reflect expenses associated with our contracts with the Veterans Administration.

The higher benefits expense associated with future policy benefits payable during 2016 primarily relates to reserve strengthening for our closed block of long-term care insurance policies acquired in connection with the 2007 KMG America Corporation, or KMG, acquisition more fully described in Note 18. The decrease in benefits expense associated with future policy benefits payable in 2015 primarily reflects the release of reserves as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law.

Incurred and Paid Claims Development

The following discussion provides information about incurred and paid claims development for our Retail and Group segments as of December 31, 2016, net of reinsurance, as well as cumulative claim frequency and the total of IBNR included within the net incurred claims amounts. The information about incurred and paid claims development for the years ended December 31, 2014 and 2015 is presented as supplementary information.

For both our Retail and Group segments, claims frequency is measured as medical fee-for-service claims for each service encounter with a unique provider identification number. Our claims frequency measure includes claims covered by deductibles as well as claims under capitated arrangements. Claim counts may vary based on product mix and the percentage of delegated capitation arrangements.

Retail Segment

Activity in benefits payable for our Retail segment was as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Balances at January 1	$ 4,296	$ 3,879	$ 3,268
Less: Premium deficiency reserve	(176)	—	—
Less: Reinsurance recoverables	(85)	(78)	—
Balances at January 1, net	4,035	3,801	3,268
Incurred related to:			
Current year	40,854	39,760	33,996
Prior years	(535)	(228)	(488)
Total incurred	40,319	39,532	33,508
Paid related to:			
Current year	(36,967)	(35,835)	(30,305)
Prior years	(3,487)	(3,463)	(2,670)
Total paid	(40,454)	(39,298)	(32,975)
Premium deficiency reserve	—	176	—
Reinsurance recoverable	76	85	78
Balances at December 31	$ 3,976	$ 4,296	$ 3,879

At December 31, 2016, benefits payable for our Retail segment included IBNR of approximately $2.9 billion, primarily associated with claims incurred in 2016. The cumulative number of reported claims as of December 31, 2016 was approximately 87.7 million for claims incurred in 2016, 88.8 million for claims incurred in 2015, and 74.3 million for claims incurred in 2014.

The following tables provide information about incurred and paid claims development for the Retail segment as of December 31, 2016, net of reinsurance.

	Incurred Claims, Net of Reinsurance		
	For the Years Ended December 31,		
Claims Incurred Year	2014 Unaudited	2015 Unaudited	2016
		(in millions)	
2014	$ 33,996	$ 33,800	$ 33,749
2015	—	39,760	39,289
2016	—	—	40,854
Total			$ 113,892

Claims Incurred Year	Cumulative Paid Claims, Net of Reinsurance For the Years Ended December 31, 2014 Unaudited	2015 Unaudited	2016
		(in millions)	
2014	$ 30,305	$ 33,704	$ 33,740
2015		35,835	39,285
2016			36,967
Total			$ 109,992
All outstanding benefit liabilities before 2014, net of reinsurance			N/A
Benefits payable, net of reinsurance			$ 3,900

Group Segment

Activity in benefits payable for our Group segment, excluding military services, was as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Balances at January 1	$ 600	$ 578	$ 577
Less: Reinsurance recoverables	—	—	—
Balances at January 1, net	600	578	577
Incurred related to:			
Current year	5,160	5,261	5,148
Prior years	(46)	(7)	(29)
Total incurred	5,114	5,254	5,119
Paid related to:			
Current year	(4,605)	(4,671)	(4,574)
Prior years	(546)	(561)	(544)
Total paid	(5,151)	(5,232)	(5,118)
Balances at December 31	$ 563	$ 600	$ 578

At December 31, 2016, benefits payable for our Group segment included IBNR of approximately $468 million, primarily associated with claims incurred in 2016. The cumulative number of reported claims as of December 31, 2016 was approximately 23.3 million for claims incurred in 2016, 29.1 million for claims incurred in 2015, and 27.3 million for claims incurred in 2014.

The following tables provide information about incurred and paid claims development for the Group segment as of December 31, 2016, net of reinsurance.

	Incurred Claims, Net of Reinsurance		
	For the Years Ended December 31,		
Claims Incurred Year	2014 Unaudited	2015 Unaudited	2016
		(in millions)	
2014	$ 5,148	$ 5,135	$ 5,135
2015	—	5,261	5,217
2016	—	—	5,160
Total			$ 15,512

	Cumulative Paid Claims, Net of Reinsurance		
	For the Years Ended December 31,		
Claims Incurred Year	2014 Unaudited	2015 Unaudited	2016
		(in millions)	
2014	$ 4,574	$ 5,126	$ 5,134
2015		4,671	5,210
2016			4,605
Total			$ 14,949
All outstanding benefit liabilities before 2014, net of reinsurance			N/A
Benefits payable, net of reinsurance			$ 563

Reconciliation to Consolidated

The reconciliation of the net incurred and paid claims development tables to benefits payable in the consolidated statement of financial position is as follows:

	December 31, 2016
Net outstanding liabilities	
Retail	$ 3,900
Group	563
Other insurance lines	24
Benefits payable, net of reinsurance	4,487
Reinsurance recoverable on unpaid claims	
Retail	76
Group	—
Other insurance lines	—
Total reinsurance recoverable on unpaid claims	76
Total benefits payable, gross	$ 4,563

11. INCOME TAXES

The provision for income taxes consisted of the following for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Current provision:			
Federal	$ 921	$ 1,067	$ 1,006
States and Puerto Rico	88	90	81
Total current provision	1,009	1,157	1,087
Deferred benefit	(71)	(2)	(64)
Provision for income taxes	$ 938	$ 1,155	$ 1,023

The provision for income taxes was different from the amount computed using the federal statutory rate for the years ended December 31, 2016, 2015 and 2014 due to the following:

	2016	2015	2014
		(in millions)	
Income tax provision at federal statutory rate	$ 543	$ 851	$ 759
States, net of federal benefit, and Puerto Rico	41	44	48
Tax exempt investment income	(20)	(24)	(27)
Health insurer fee	336	314	204
Nondeductible executive compensation	30	18	22
Concentra sale	—	(67)	—
Other, net	8	19	17
Provision for income taxes	$ 938	$ 1,155	$ 1,023

The provision for income taxes for 2016, 2015, and 2014 reflects a $30 million, $18 million, and $22 million, respectively, estimated impact from limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law. We do not have material uncertain tax positions reflected in our consolidated balance sheets.

Deferred income tax balances reflect the impact of temporary differences between the tax bases of assets or liabilities and their reported amounts in our consolidated financial statements, and are stated at enacted tax rates expected to be in effect when the reported amounts are actually recovered or settled. Principal components of our net deferred tax balances at December 31, 2016 and 2015 were as follows.

	Assets (Liabilities)	
	2016	2015
	(in millions)	
Future policy benefits payable	$ 355	$ 200
Benefits payable	196	267
Compensation and other accrued expenses	153	130
Net operating loss carryforward	52	47
Deferred acquisition costs	72	64
Unearned revenues	18	22
Investment securities	12	—
Other	6	13
Total deferred income tax assets	864	743
Valuation allowance	(49)	(42)
Total deferred income tax assets, net of valuation allowance	815	701
Depreciable property and intangible assets	(363)	(363)
Prepaid expenses	(53)	(45)
Investment securities	—	(37)
Total deferred income tax liabilities	(416)	(445)
Total net deferred income tax assets	$ 399	$ 256
Amounts recognized in the consolidated balance sheets:		
Other long-term assets	$ 399	$ 256

In November 2015, the FASB issued new guidance related to accounting for income taxes which changes the balance sheet classification of deferred taxes, requiring deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. We elected to early adopt the guidance and have classified all deferred tax liabilities and assets as noncurrent in our consolidated balance sheets at December 31, 2016 and 2015 to simplify their presentation.

At December 31, 2016, we had approximately $138 million of net operating losses to carry forward related to prior acquisitions and our Puerto Rico subsidiaries. These net operating loss carryforwards, if not used to offset future taxable income, will expire from 2017 through 2033. Due to limitations and uncertainty regarding our ability to use some of the carryforwards, a valuation allowance was established on $126 million of these net operating loss carryforwards and $4 million of other items related to Puerto Rico. For the remainder of the net operating loss carryforwards and other cumulative temporary differences, based on our historical record of producing taxable income and profitability, we have concluded that future operating income will be sufficient to give rise to tax expense to recover all deferred tax assets.

We provide for income taxes on the undistributed earnings of our Puerto Rico operations using that jurisdiction's tax rate, which has been lower historically than the U.S. statutory tax rate. Permanent investment of these earnings has resulted in cumulative unrecognized deferred tax liabilities of approximately $30 million as of December 31, 2016.

We file income tax returns in the United States and certain foreign jurisdictions. The U.S. Internal Revenue Service, or IRS, has completed its examinations of our consolidated income tax returns for 2014 and prior years. Our 2015 tax return is in the post-filing review period under the Compliance Assurance Process (CAP). Our 2016 tax return is under advance review by the IRS under CAP. With few exceptions, which are immaterial in the aggregate, we no longer are subject to state, local and foreign tax examinations for years before 2013. We are not aware of any material adjustments that may be proposed.

12. DEBT

The carrying value of long-term debt outstanding was as follows at December 31, 2016 and 2015:

	2016	2015
	(in millions)	
Long-term debt:		
Senior notes:		
$500 million, 7.20% due June 15, 2018	$ 501	$ 502
$300 million, 6.30% due August 1, 2018	304	307
$400 million, 2.625% due October 1, 2019	398	398
$600 million, 3.15% due December 1, 2022	595	595
$600 million, 3.85% due October 1, 2024	595	595
$250 million, 8.15% due June 15, 2038	264	263
$400 million, 4.625% due December 1, 2042	396	396
$750 million, 4.95% due October 1, 2044	739	738
Total long-term debt	$ 3,792	$ 3,794

Senior Notes

In September 2014, we issued $400 million of 2.625% senior notes due October 1, 2019, $600 million of 3.85% senior notes due October 1, 2024 and $750 million of 4.95% senior notes due October 1, 2044. Our net proceeds, reduced for the underwriters' discount and commission and offering expenses, were $1.73 billion. We used a portion of the net proceeds to redeem the $500 million 6.45% senior unsecured notes as discussed below.

In October 2014, we redeemed the $500 million 6.45% senior unsecured notes due June 1, 2016, at 100% of the principal amount plus applicable premium for early redemption and accrued and unpaid interest to the redemption date, for cash totaling approximately $560 million. We recognized a loss on extinguishment of debt of approximately $37 million in October 2014 for the redemption of these notes which is included in interest expense in the consolidated statement of income.

Our senior notes, which are unsecured, may be redeemed at our option at any time at 100% of the principal amount plus accrued interest and a specified make-whole amount. The 7.20% and 8.15% senior notes are subject to an interest rate adjustment if the debt ratings assigned to the notes are downgraded (or subsequently upgraded). In addition, our senior notes (other than the 6.30% senior notes) contain a change of control provision that may require us to purchase the notes under certain circumstances.

Prior to 2009, we were parties to interest-rate swap agreements that exchanged the fixed interest rate under our senior notes for a variable interest rate based on LIBOR. As a result, the carrying value of the senior notes was adjusted to reflect changes in value caused by an increase or decrease in interest rates. During 2008, we terminated all of our swap agreements. The cumulative adjustment to the carrying value of our senior notes was $103 million as of the termination date which is being amortized as a reduction to interest expense over the remaining term of the senior notes. In October 2014, the redemption of our 6.45% senior notes reduced the unamortized carrying value adjustment by $12 million. The unamortized carrying value adjustment was $23 million as of December 31, 2016 and $28 million as of December 31, 2015.

Credit Agreement

Our 5-year $1.0 billion unsecured revolving credit agreement expires July 2018. Under the credit agreement, at our option, we can borrow on either a competitive advance basis or a revolving credit basis. The revolving credit portion bears interest at either LIBOR plus a spread or the base rate plus a spread. The LIBOR spread, currently 100 basis points, varies depending on our credit ratings ranging from 90 to 150 basis points. We also pay an annual facility fee regardless of utilization. This facility fee, currently 12.5 basis points, may fluctuate between 10 and 25 basis points, depending upon our credit ratings. The competitive advance portion of any borrowings will bear interest at market rates prevailing at the time of borrowing on either a fixed rate or a floating rate based on LIBOR, at our option.

The terms of the credit agreement include standard provisions related to conditions of borrowing, including a customary material adverse effect clause which could limit our ability to borrow additional funds. In addition, the credit agreement contains customary restrictive and financial covenants as well as customary events of default, including financial covenants regarding the maintenance of a minimum level of net worth of $9.0 billion at December 31, 2016 and a maximum leverage ratio of 3.0:1. We are in compliance with the financial covenants, with actual net worth of $10.7 billion and an actual leverage ratio of 1.4:1, as measured in accordance with the credit agreement as of December 31, 2016. In addition, the credit agreement includes an uncommitted $250 million incremental loan facility.

At December 31, 2016, we had no borrowings outstanding under the credit agreement and no letters of credit outstanding under the credit agreement. Accordingly, as of December 31, 2016, we had $1 billion of remaining borrowing capacity under the credit agreement, none of which would be restricted by our financial covenant compliance requirement. We have other customary, arms-length relationships, including financial advisory and banking, with some parties to the credit agreement.

Commercial Paper

In October 2014, we entered into a commercial paper program pursuant to which we may issue short-term, unsecured commercial paper notes privately placed on a discount basis through certain broker dealers. Amounts available under the program may be borrowed, repaid and re-borrowed from time to time, with the aggregate face or principal amount outstanding under the program at any time not to exceed $1 billion. The net proceeds of issuances have been and are expected to be used for general corporate purposes. The maximum principal amount outstanding at any one time during the year ended December 31, 2016 was $475 million, with $300 million outstanding at December 31, 2016, compared to $299 million outstanding at December 31, 2015.

13. EMPLOYEE BENEFIT PLANS

Employee Savings Plan

We have defined contribution retirement savings plans covering eligible employees which include matching contributions based on the amount of our employees' contributions to the plans. The cost of these plans amounted to approximately $196 million in 2016, $188 million in 2015, and $176 million in 2014. The Company's cash match is invested pursuant to the participant's contribution direction. Based on the closing price of our common stock of $204.03 on December 31, 2016, approximately 13% of the retirement and savings plan's assets were invested in our common stock, or approximately 2.5 million shares, representing 2% of the shares outstanding as of December 31, 2016. At December 31, 2016, approximately 2.8 million shares of our common stock were reserved for issuance under our defined contribution retirement savings plans.

Stock-Based Compensation

We have plans under which options to purchase our common stock and restricted stock units have been granted to executive officers, directors and key employees. For awards granted prior to July 2, 2015, our equity award agreements generally contain provisions whereby the awards automatically accelerate and vest upon change in control, including those granted to retirement-eligible participants described below. Awards granted on or after July 2, 2015 would generally require both a change in control and termination of employment within 2 years of the date of the change in control to accelerate the vesting, including those granted to retirement-eligible participants.

The terms and vesting schedules for stock-based awards vary by type of grant. Generally, the awards vest upon time-based conditions. We have also granted awards to certain employees that vest upon a combination of time and performance-based conditions. The stock awards of retirement-eligible participants granted prior to July 2, 2015 generally will continue to fully vest on the originally scheduled vest date upon retirement from the Company. For stock awards of retirement-eligible employees granted on or after July 2, 2015, awards are generally earned ratably over the service period for each tranche. Accordingly, upon retirement the earned portion of the current tranche will continue to vest on the originally scheduled vest date and any remaining unearned portion of the award will be forfeited. Our equity award program includes a retirement provision that generally treats employees with a combination of age and years of services with the Company totaling 65 or greater, with a minimum required age of 55 and a minimum requirement of 5 years of service, as retirement-eligible. Upon exercise, stock-based compensation awards are settled with authorized but unissued company stock or treasury stock.

The compensation expense that has been charged against income for these plans was as follows for the years ended December 31, 2016, 2015, and 2014:

	2016	2015	2014
		(in millions)	
Stock-based compensation expense by type:			
Restricted stock	$ 106	$ 99	$ 91
Stock options	9	10	7
Total stock-based compensation expense	115	109	98
Tax benefit recognized	(20)	(26)	(22)
Stock-based compensation expense, net of tax	$ 95	$ 83	$ 76

The tax benefit recognized in our consolidated financial statements is based on the amount of compensation expense recorded for book purposes, subject to limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law. The actual tax benefit realized in our tax return is based on the intrinsic value, or the excess of the market value over the exercise or purchase price, of stock options exercised and restricted stock vested during the period, subject to limitations on the deductibility of annual compensation in excess of $500,000 per employee as mandated by the Health Care Reform Law. The actual tax benefit realized for the deductions taken on our tax returns from option exercises and restricted stock vesting totaled $53 million in 2016, $34 million in 2015, and $30 million in 2014. There was no capitalized stock-based compensation expense during these years.

At December 31, 2016, there were 16.4 million shares reserved for stock award plans. These reserved shares included giving effect to, under the 2011 Plan, 7.1 million shares of common stock available for future grants assuming all stock options were granted or 3.1 million shares available for future grants assuming all restricted stock were granted. Shares may be issued from authorized but unissued company stock or treasury stock.

Restricted Stock

Restricted stock is granted with a fair value equal to the market price of our common stock on the date of grant and generally vests three years from the date of grant. Restricted stock granted on or after July 2, 2015, generally vests in equal annual tranches over a three year period from the date of grant. Certain of our restricted stock units also include performance-based conditions generally associated with strategic membership growth and return on invested capital. Restricted stock units have forfeitable dividend equivalent rights equal to the dividend paid on common stock. The weighted-average grant date fair value of our restricted stock was $168.12 in 2016, $165.26 in 2015, and $103.57 in 2014. Activity for our restricted stock was as follows for the year ended December 31, 2016:

	Shares	Weighted-Average Grant-Date Fair Value
	(shares in thousands)	
Nonvested restricted stock at December 31, 2015	3,365	$ 104.58
Granted	656	168.12
Vested	(1,455)	87.77
Forfeited	(74)	135.32
Nonvested restricted stock at December 31, 2016	2,492	$ 121.94

Approximately 27% of the nonvested restricted stock at December 31, 2016 included performance-based conditions.

The fair value of shares vested was $253 million during 2016, $153 million during 2015, and $99 million during 2014. Total compensation expense not yet recognized related to nonvested restricted stock was $97 million at December 31, 2016. We expect to recognize this compensation expense over a weighted-average period of approximately 1.7 years. There are no other contractual terms covering restricted stock once vested.

Stock Options

Stock options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant. Our stock plans, as approved by the Board of Directors and stockholders, define fair market value as the average of the highest and lowest stock prices reported on the composite tape by the New York Stock Exchange on a given date. Exercise provisions vary, but most options vest in whole or in part 1 to 3 years after grant and expire 7 years after grant.

The weighted-average fair value of each option granted during 2016, 2015, and 2014 is provided below. The fair value was estimated on the date of grant using the Black-Scholes pricing model with the weighted-average assumptions indicated below:

	2016	2015	2014
Weighted-average fair value at grant date	$ 37.12	$ 36.91	$ 22.45
Expected option life (years)	4.2 years	4.2 years	4.3 years
Expected volatility	27.6%	27.4%	27.6%
Risk-free interest rate at grant date	1.1%	1.4%	1.3%
Dividend yield	0.7%	0.7%	1.1%

When valuing employee stock options, we stratify the employee population into three homogeneous groups that historically have exhibited similar exercise behaviors. These groups are executive officers, directors, and all other employees. We value the stock options based on the unique assumptions for each of these employee groups.

We calculate the expected term for our employee stock options based on historical employee exercise behavior and base the risk-free interest rate on a traded zero-coupon U.S. Treasury bond with a term substantially equal to the option's expected term.

The volatility used to value employee stock options is based on historical volatility. We calculate historical volatility using a simple-average calculation methodology based on daily price intervals as measured over the expected term of the option.

Activity for our option plans was as follows for the year ended December 31, 2016:

	Shares Under Option	Weighted-Average Exercise Price
	(shares in thousands)	
Options outstanding at December 31, 2015	835	$ 121.89
Granted	362	167.81
Exercised	(161)	86.86
Forfeited	(14)	163.94
Options outstanding at December 31, 2016	1,022	$ 143.04
Options exercisable at December 31, 2016	342	$ 111.28

As of December 31, 2016, outstanding stock options, substantially all of which are expected to vest, had an aggregate intrinsic value of $62 million, and a weighted-average remaining contractual term of 4.9 years. As of December 31, 2016, exercisable stock options had an aggregate intrinsic value of $32 million, and a weighted-average remaining contractual term of 3.8 years. The total intrinsic value of stock options exercised during 2016 was $18 million, compared with $28 million during 2015 and $32 million during 2014. Cash received from stock option exercises totaled $14 million in 2016, $23 million in 2015, and $52 million in 2014.

Total compensation expense not yet recognized related to nonvested options was $14 million at December 31, 2016. We expect to recognize this compensation expense over a weighted-average period of approximately 1.7 years.

14. EARNINGS PER COMMON SHARE COMPUTATION

Detail supporting the computation of basic and diluted earnings per common share was as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
	(dollars in millions, except per common share results, number of shares/options in thousands)		
Net income available for common stockholders	$ 614	$ 1,276	$ 1,147
Weighted-average outstanding shares of common stock used to compute basic earnings per common share	149,375	149,455	154,187
Dilutive effect of:			
Employee stock options	219	192	230
Restricted stock	1,323	1,495	1,457
Shares used to compute diluted earnings per common share	150,917	151,142	155,874
Basic earnings per common share	$ 4.11	$ 8.54	$ 7.44
Diluted earnings per common share	$ 4.07	$ 8.44	$ 7.36
Number of antidilutive stock options and restricted stock awards excluded from computation	748	415	320

15. STOCKHOLDERS' EQUITY

As discussed in Note 2, we elected to early adopt new guidance related to accounting for employee share-based payments prospectively effective January 1, 2016. The adoption of this new guidance resulted in the recognition of approximately $20 million of tax benefits in net income in our consolidated statement of income for the three months ended March 31, 2016 that had previously been recorded as additional paid-in capital in our consolidated balance sheet.

Dividends

The following table provides details of dividend payments, excluding dividend equivalent rights, in 2014, 2015, and 2016 under our Board approved quarterly cash dividend policy:

Payment Date	Amount per Share	Total Amount
		(in millions)
2014	$1.10	$170
2015	$1.14	$170
2016	$1.16	$172

Under the terms of the Merger Agreement, we agreed with Aetna that our quarterly dividend would not exceed $0.29 per share prior to the closing or termination of the Merger. On October 26, 2016, the Board declared a cash dividend of $0.29 per share that was paid on January 27, 2017 to stockholders of record on January 12, 2017, for an aggregate amount of $43 million.

On February 14, 2017, following the termination of the Merger Agreement, the Board declared a cash dividend of $0.40 per share, to be paid on April 28, 2017, to the stockholders of record on March 31, 2017. Declaration and payment of future quarterly dividends is at the discretion of our Board and may be adjusted as business needs or market conditions change.

Stock Repurchases

In September 2014, our Board of Directors replaced a previous share repurchase authorization of up to $1 billion (of which $816 million remained unused) with an authorization for repurchases of up to $2 billion of our common shares exclusive of shares repurchased in connection with employee stock plans, which expired on December 31, 2016. Under the share repurchase authorization, shares may have been purchased from time to time at prevailing prices in the open market, by block purchases, through plans designed to comply with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended, or in privately-negotiated transactions (including pursuant to accelerated share repurchase agreements with investment banks), subject to certain regulatory restrictions on volume, pricing, and timing. Pursuant to the Merger Agreement, after July 2, 2015, we were prohibited from repurchasing any of our outstanding securities without the prior written consent of Aetna, other than repurchases of shares of our common stock in connection with the exercise of outstanding stock options or the vesting or settlement of outstanding restricted stock awards. Accordingly, as announced on July 3, 2015, we suspended our share repurchase program.

On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement. We also announced that the Board had approved a new authorization for share repurchases of up to $2.25 billion of our common stock exclusive of shares repurchased in connection with employee stock plans, expiring on December 31, 2017.

Excluding shares acquired in connection with employee stock plans as well as 0.36 million shares received in March 2015 upon final settlement of our accelerated share repurchase agreement, or ASR Agreement, described below, for which no cash was paid during the period, share repurchases were as follows during the years ended December 31, 2015 and 2014. Excluding shares acquired in connection with employee stock plans, there were no share repurchases in 2016.

		Year Ended December 31,			
		2015		2014	
Authorization Date	Purchase Not to Exceed	Shares	Cost	Shares	Cost
		(in millions)			
September 2014	$ 2,000	1.85	$ 329	4.10	$ 635 (a)
April 2014	1,000	—	—	1.50	184
April 2013	1,000	—	—	0.10	11
Total repurchases		1.85	$ 329	5.70	$ 830

(a) Includes $100 million held back by Goldman Sachs pending final settlement of the ASR Agreement in March 2015 at which time we received an additional 0.36 million shares which are excluded from the table above.

On November 7, 2014, we announced that we had entered into an accelerated share repurchase agreement, or ASR Agreement, with Goldman, Sachs & Co., or Goldman Sachs, to repurchase $500 million of our common stock as part of the $2 billion share repurchase program authorized in September 2014. Under the ASR Agreement, on November 10, 2014, we made a payment of $500 million to Goldman Sachs from available cash on hand and received an initial delivery of 3.06 million shares of our common stock from Goldman Sachs based on the then current market price of Humana common stock. The payment to Goldman Sachs was recorded as a reduction to stockholders' equity, consisting of a $400 million increase in treasury stock, which reflected the value of the initial 3.06 million shares received upon initial settlement, and a $100 million decrease in capital in excess of par value, which reflected the value of stock held back by Goldman Sachs pending final settlement of the ASR Agreement. Upon settlement of the ASR on March 13, 2015, we received an additional 0.36 million shares as determined by the average daily volume weighted-average share price of our common stock during the term of the ASR Agreement of $146.21, bringing the total shares received under this program to 3.42 million. In addition, upon settlement we reclassified the $100 million value of stock initially held back by Goldman Sachs from capital in excess of par value to treasury stock.

In connection with employee stock plans, we acquired 0.6 million common shares for $104 million in 2016, 0.3 million common shares for $56 million in 2015, and 0.4 million common shares for $42 million in 2014.

Regulatory Requirements

Certain of our subsidiaries operate in states that regulate the payment of dividends, loans, or other cash transfers to Humana Inc., our parent company, and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required.

Although minimum required levels of equity are largely based on premium volume, product mix, and the quality of assets held, minimum requirements vary significantly at the state level. Our state regulated insurances subsidiaries had aggregate statutory capital and surplus of approximately $7.7 billion and $6.6 billion as of December 31, 2016 and 2015, respectively, which exceeded aggregate minimum regulatory requirements of $4.8 billion and $4.6 billion, respectively. Subsidiary dividends are subject to state regulatory approval, the amount and timing of which could be

reduced or delayed. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2017 is approximately $850 million in the aggregate. This compares to dividends that were paid to our parent company in 2016 of approximately $763 million. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

16. COMMITMENTS, GUARANTEES AND CONTINGENCIES

Leases

We lease facilities, computer hardware, and other furniture and equipment under long-term operating leases that are noncancelable and expire on various dates through 2037. We sublease facilities or partial facilities to third party tenants for space not used in our operations. Rent with scheduled escalation terms are accounted for on a straight-line basis over the lease term. Rent expense and sublease rental income, which are recorded net as an operating cost, for all operating leases were as follows for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
		(in millions)	
Rent expense	$ 179	$ 201	$ 226
Sublease rental income	(26)	(25)	(14)
Net rent expense	$ 153	$ 176	$ 212

Future annual minimum payments due subsequent to December 31, 2016 under all of our noncancelable operating leases with initial terms in excess of one year are as follows:

	Minimum Lease Payments	Sublease Rental Receipts	Net Lease Commitments
		(in millions)	
For the years ending December 31,:			
2017	$ 185	$ (19)	$ 166
2018	157	(18)	139
2019	126	(14)	112
2020	81	(11)	70
2021	53	(8)	45
Thereafter	95	(17)	78
Total	$ 697	$ (87)	$ 610

Purchase Obligations

We have agreements to purchase services, primarily information technology related services, or to make improvements to real estate, in each case that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum levels of service to be purchased; fixed, minimum or variable price provisions; and the appropriate timing of the transaction. We have purchase obligation commitments of $184 million in 2017, $108 million in 2018, $48 million in 2019, $5 million in 2020, and $3 million thereafter. Purchase obligations exclude agreements that are cancelable without penalty.

Off-Balance Sheet Arrangements

As part of our ongoing business, we do not participate or knowingly seek to participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, or SPEs, which would have been established for the purpose of facilitating off-balance sheet

arrangements or other contractually narrow or limited purposes. As of December 31, 2016, we were not involved in any SPE transactions.

Guarantees and Indemnifications

Through indemnity agreements approved by the state regulatory authorities, certain of our regulated subsidiaries generally are guaranteed by Humana Inc., our parent company, in the event of insolvency for (1) member coverage for which premium payment has been made prior to insolvency; (2) benefits for members then hospitalized until discharged; and (3) payment to providers for services rendered prior to insolvency. Our parent also has guaranteed the obligations of our military services subsidiaries.

In the ordinary course of business, we enter into contractual arrangements under which we may agree to indemnify a third party to such arrangement from any losses incurred relating to the services they perform on behalf of us, or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. Such indemnification obligations may not be subject to maximum loss clauses. Historically, payments made related to these indemnifications have been immaterial.

Government Contracts

Our Medicare products, which accounted for approximately 74% of our total premiums and services revenue for the year ended December 31, 2016, primarily consisted of products covered under the Medicare Advantage and Medicare Part D Prescription Drug Plan contracts with the federal government. These contracts are renewed generally for a calendar year term unless CMS notifies us of its decision not to renew by May 1 of the calendar year in which the contract would end, or we notify CMS of our decision not to renew by the first Monday in June of the calendar year in which the contract would end. All material contracts between Humana and CMS relating to our Medicare products have been renewed for 2017, and all of our product offerings filed with CMS for 2017 have been approved.

CMS uses a risk-adjustment model which apportions premiums paid to Medicare Advantage, or MA, plans according to health severity of covered members. The risk-adjustment model, which CMS implemented pursuant to the Balanced Budget Act of 1997(BBA) and the Benefits Improvement and Protection Act of 2000 (BIPA), generally pays more where a plan's membership has higher expected costs. Under this model, rates paid to MA plans are based on actuarially determined bids, which include a process whereby our prospective payments are based on a comparison of our beneficiaries' risk scores, derived from medical diagnoses, to those enrolled in the government's traditional fee-for-service Medicare program (referred to as "Medicare FFS"). Under the risk-adjustment methodology, all MA plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses the diagnosis data to calculate the risk-adjusted premium payment to MA plans, which CMS adjusts for coding pattern differences between the health plans and the government fee-for-service program. We generally rely on providers, including certain providers in our network who are our employees, to code their claim submissions with appropriate diagnoses, which we send to CMS as the basis for our payment received from CMS under the actuarial risk-adjustment model. We also rely on these providers to document appropriately all medical data, including the diagnosis data submitted with claims. In addition, we conduct medical record reviews as part of our data and payment accuracy compliance efforts, to more accurately reflect diagnosis conditions under the risk adjustment model. These compliance efforts include the internal contract level audits described in more detail below.

CMS is phasing-in the process of calculating risk scores using diagnoses data from the Risk Adjustment Processing System, or RAPS, to diagnosis data from the Encounter Data System, or EDS. The RAPS process requires MA plans to apply a filter logic based on CMS guidelines and only submit those claims that pass the filtering logic. For submissions through EDS, CMS requires MA plans to submit all the claims data and CMS will apply the risk adjustment filtering logic to determine the risk adjustment data used to calculate risk scores. For 2016, 10% of the risk score was calculated from claims data submitted through EDS, increasing to 25% of the risk score calculated from claims data through EDS for 2017. The phase-in from RAPS to EDS could result in different risk scores from each dataset as a result of plan processing issues, CMS processing issues, or filtering logic differences between RAPS and EDS, and could have a material adverse effect on our results of operations, financial position, or cash flows.

CMS is continuing to perform audits of various companies' selected MA contracts related to this risk adjustment diagnosis data. We refer to these audits as Risk-Adjustment Data Validation Audits, or RADV audits. RADV audits review medical records in an attempt to validate provider medical record documentation and coding practices which influence the calculation of premium payments to MA plans.

In 2012, CMS released a "Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation (RADV) Contract-Level Audits." The payment error calculation methodology provides that, in calculating the economic impact of audit results for an MA contract, if any, the results of the audit sample will be extrapolated to the entire MA contract based upon a comparison to "benchmark" audit data in Medicare FFS (which we refer to as the "FFS Adjuster"). This comparison to the FFS Adjuster is necessary to determine the economic impact, if any, of audit results because the government program data set, including any attendant errors that are present in that data set, provides the basis for MA plans' risk adjustment to payment rates. CMS already makes other adjustments to payment rates based on a comparison of coding pattern differences between MA plans and Medicare FFS data (such as for frequency of coding for certain diagnoses in MA plan data versus the government program data set).

The final methodology, including the first application of extrapolated audit results to determine audit settlements, is expected to be applied to RADV contract level audits conducted for contract year 2011 and subsequent years. CMS is currently conducting RADV contract level audits for contract years 2011, 2012, and 2013, in which two, five, and five of our Medicare Advantage plans are being audited, respectively. Per CMS guidance, selected MA contracts will be notified of an audit at some point after the close of the final reconciliation for the payment year being audited. The final reconciliation occurs in August of the calendar year following the payment year.

Estimated audit settlements are recorded as a reduction of premiums revenue in our consolidated statements of income, based upon available information. We perform internal contract level audits based on the RADV audit methodology prescribed by CMS. Included in these internal contract level audits is an audit of our Private Fee-For-Service business which we used to represent a proxy of the FFS Adjuster which has not yet been released. We based our accrual of estimated audit settlements for each contract year on the results of these internal contract level audits and update our estimates as each audit is completed. Estimates derived from these results were not material to our results of operations, financial position, or cash flows. However, as indicated, we are awaiting additional guidance from CMS regarding the FFS Adjuster. Accordingly, we cannot determine whether such RADV audits will have a material adverse effect on our results of operations, financial position, or cash flows.

In addition, CMS' comments in formalized guidance regarding "overpayments" to MA plans appear to be inconsistent with CMS' prior RADV audit guidance. These statements, contained in the preamble to CMS' final rule release regarding Medicare Advantage and Part D prescription drug benefit program regulations for Contract Year 2015, appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the FFS Adjuster referenced above. We will continue to work with CMS to ensure that MA plans are paid accurately and that payment model principles are in accordance with the requirements of the Social Security Act, which, if not implemented correctly could have a material adverse effect on our results of operations, financial position, or cash flows.

At December 31, 2016, our military services business, which accounted for approximately 1% of our total premiums and services revenue for the year ended December 31, 2016, primarily consisted of the TRICARE South Region contract. The current 5-year South Region contract, which expires March 31, 2017, is subject to annual renewals on April 1 of each year during its term at the government's option. On March 30, 2016, we received notice the Defense Health Agency, or DHA, exercised its option to extend the TRICARE South Region contract through March 31, 2017. On July 21, 2016, we were notified by the DHA that we were awarded the contract for the new TRICARE East Region, which is a consolidation of the former North and South Regions, with delivery of health care services expected to commence on October 1, 2017. The next generation East Region and West Region contract awards are currently subject to protests by unsuccessful bidders in the U.S. Court of Federal Claims and before the DHA.

Our state-based Medicaid business accounted for approximately 5% of our total premiums and services revenue for the year ended December 31, 2016. In addition to our state-based Temporary Assistance for Needy Families, or TANF, Medicaid contracts in Florida and Kentucky, we have contracts in Florida for Long Term Support Services

(LTSS), in Illinois and Virginia for stand-alone dual eligible demonstration programs serving individuals dually eligible for both the federal Medicare program and the applicable state-based Medicaid program as well as an Integrated Care Program, or ICP, Medicaid contract in Illinois.

The loss of any of the contracts above or significant changes in these programs as a result of legislative or regulatory action, including reductions in premium payments to us, regulatory restrictions on profitability, including by comparison of our Medicare Advantage profitability to our non-Medicare Advantage business profitability and a requirement that they remain within certain ranges of each other, or increases in member benefits without corresponding increases in premium payments to us, may have a material adverse effect on our results of operations, financial position, and cash flows.

Legal Proceedings and Certain Regulatory Matters

Florida Matters

On January 6, 2012, the Civil Division of the United States Attorney's Office for the Southern District of Florida advised us that it is seeking documents and information from us and several of our affiliates relating to several matters including the coding of medical claims by one or more South Florida medical providers, and loans to physician practices. On May 1, 2014, the U.S. Attorney's Office filed a Notice of Non-Intervention in connection with a civil qui tam suit related to one of these matters captioned *United States of America ex rel. Olivia Graves v. Plaza Medical Centers, et al.*, and the Court ordered the complaint unsealed. Subsequently, the individual plaintiff amended the complaint and served the Company, opting to continue to pursue the action. The individual plaintiff has filed a fourth amended complaint which we answered on February 19, 2016. The Court has ordered trial to commence on March 6, 2017 if the matter is not resolved prior to trial. We continue to cooperate with and respond to information requests from the U.S. Attorney's office. These matters could result in additional qui tam litigation.

As previously disclosed, the Civil Division of the United States Department of Justice had provided us with an information request, separate from but related to the Plaza Medical matter, concerning our Medicare Part C risk adjustment practices. The request relates to our oversight and submission of risk adjustment data generated by providers in our Medicare Advantage network, including the providers identified in the Plaza Medical matter, as well as to our business and compliance practices related to risk adjustment data generated by our providers and by us, including medical record reviews conducted as part of our data and payment accuracy compliance efforts, the use of health and well-being assessments, and our fraud detection efforts. We believe that this request for information is in connection with a wider review of Medicare Risk Adjustment generally that includes a number of Medicare Advantage plans, providers and vendors. We continue to cooperate with and voluntarily respond to the information requests from the Department of Justice and the U.S. Attorney's Office. These matters are expected to result in additional qui tam litigation.

Litigation Related to the Merger

DOJ Action

On July 21, 2016, the United States government (acting under the U.S. Attorney General), along with the states of Delaware, Florida, Georgia, Illinois, Iowa and Ohio, the commonwealths of Pennsylvania and Virginia, and the District of Columbia, acting by and through their respective attorneys general, filed a civil complaint against us and Aetna in the U.S. District Court for the District of Columbia (we refer to this as the DOJ Action). The complaint alleges, among other things, that the proposed Merger would violate Section 7 of the Clayton Antitrust Act and seeks a permanent injunction to prevent the Merger. The trial commenced on December 5, 2016 and concluded on December 30, 2016. On January 23, 2017, the Court ruled in favor of the DOJ and granted a permanent injunction of the proposed transaction. On February 14, 2017, we and Aetna agreed to mutually terminate the Merger Agreement.

Shareholder Action

In connection with the Merger, three putative class action complaints were filed by purported Humana stockholders challenging the Merger, two in the Circuit Court of Jefferson County, Kentucky and one in the Court of Chancery of the State of Delaware. The complaints are captioned Solak v. Broussard et al., Civ. Act. No. 15CI03374 (Kentucky

state court), Litwin v. Broussard et al., Civ. Act. No. 15CI04054 (Kentucky state court) and Scott v. Humana Inc. et al., C.A. No. 11323-VCL (Delaware state court). The complaints named as defendants each member of Humana's board of directors, Aetna, and, in the case of the Delaware complaint, Humana. The complaints generally alleged, among other things, that the individual members of our board of directors breached their fiduciary duties owed to our stockholders by entering into the Merger Agreement, approving the mergers as contemplated by the Merger Agreement, and failing to take steps to maximize the value of Humana to our stockholders, and that Aetna, and, in the case of the Delaware complaint, Humana aided and abetted such breaches of fiduciary duties. In addition, the complaints alleged that the merger undervalues Humana, that the process leading up to the execution of the Merger Agreement was flawed, that the members of our board of directors improperly placed their own financial interests ahead of those of our stockholders, and that certain provisions of the Merger Agreement improperly favor Aetna and impede a potential alternative transaction. Among other remedies, the complaints sought equitable relief rescinding the Merger Agreement and enjoining the defendants from completing the mergers as well as costs and attorneys' fees. We refer to all these cases collectively in this report as the Merger Litigation. On August 20, 2015, the parties in the Kentucky state cases filed a stipulation and proposed order with the court to consolidate these cases into a single action captioned In re Humana Inc. Shareholder Litigation, Civ. Act. No. 15CI03374.

On October 9, 2015, solely to avoid the costs, risks, and uncertainties inherent in litigation, and without admitting any liability or wrongdoing, we and the other named defendants in the Merger Litigation signed a memorandum of understanding, which we refer to as the MOU, to settle the Merger Litigation. Subject to court approval and further definitive documentation in a stipulation of settlement that will be subject to customary conditions, the MOU resolved the claims brought in the Merger Litigation and provided that we would make certain additional disclosures related to the proposed mergers. The MOU further provided for, among other things, dismissal of the Merger Litigation with prejudice and a release and settlement by the purported class of our stockholders of all claims against the defendants and their affiliates and agents in connection with the Merger Agreement and transactions and disclosures related to the Merger Agreement. The asserted claims will not be released until such stipulation of settlement receives court approval. The foregoing terms and conditions will be defined by the stipulation of settlement, and class members will receive a separate notice describing the settlement terms and their rights in connection with the approval of the settlement. In connection with the settlement, the parties contemplate that plaintiffs' counsel will file a petition for an award of attorneys' fees and expenses. We will pay or cause to be paid any court awarded attorneys' fees and expenses. There can be no assurance that the parties will ultimately enter into a stipulation of settlement or that a court will approve such settlement even if the parties were to enter into such stipulation. In such event, the proposed settlement as contemplated by the MOU may be terminated. Because the MOU contemplates that the Kentucky court will be asked to approve the settlement, the plaintiffs have already withdrawn the Delaware case.

Other Lawsuits and Regulatory Matters

Our current and past business practices are subject to review or other investigations by various state insurance and health care regulatory authorities and other state and federal regulatory authorities. These authorities regularly scrutinize the business practices of health insurance, health care delivery and benefits companies. These reviews focus on numerous facets of our business, including claims payment practices, statutory capital requirements, provider contracting, risk adjustment, competitive practices, commission payments, privacy issues, utilization management practices, pharmacy benefits, access to care, and sales practices, among others. Some of these reviews have historically resulted in fines imposed on us and some have required changes to some of our practices. We continue to be subject to these reviews, which could result in additional fines or other sanctions being imposed on us or additional changes in some of our practices.

We also are involved in various other lawsuits that arise, for the most part, in the ordinary course of our business operations, certain of which may be styled as class-action lawsuits. Among other matters, this litigation may include employment matters, claims of medical malpractice, bad faith, nonacceptance or termination of providers, anticompetitive practices, improper rate setting, provider contract rate disputes, failure to disclose network discounts and various other provider arrangements, general contractual matters, intellectual property matters, and challenges to subrogation practices. For example, a number of hospitals and other providers have asserted that, under their network provider contracts, we are not entitled to reduce Medicare Advantage payments to these providers in connection with changes in Medicare payment systems and in accordance with the Balanced Budget and Emergency Deficit Control

Act of 1985, as amended (commonly referred to as "sequestration"). Those challenges have led and could lead to arbitration demands or other litigation. Also, under state guaranty assessment laws, including those related to state cooperative failures in the industry, we may be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of insolvent insurance companies that write the same line or lines of business as we do. Penn Treaty is a financially distressed unaffiliated long-term care insurance company. A final court ruling on Penn Treaty's insolvency would trigger a guarantee fund assessment that would result in expense for us, based on current information, estimated at approximately $30 million.

As a government contractor, we may also be subject to qui tam litigation brought by individuals who seek to sue on behalf of the government, alleging that the government contractor submitted false claims to the government including, among other allegations, those resulting from coding and review practices under the Medicare risk adjustment model. Qui tam litigation is filed under seal to allow the government an opportunity to investigate and to decide if it wishes to intervene and assume control of the litigation. If the government does not intervene, the lawsuit is unsealed, and the individual may continue to prosecute the action on his or her own, on behalf of the government. We also are subject to other allegations of non-performance of contractual obligations to providers, members, and others, including failure to properly pay claims, improper policy terminations, challenges to our implementation of the Medicare Part D prescription drug program and other litigation.

A limited number of the claims asserted against us are subject to insurance coverage. Personal injury claims, claims for extracontractual damages, care delivery malpractice, and claims arising from medical benefit denials are covered by insurance from our wholly owned captive insurance subsidiary and excess carriers, except to the extent that claimants seek punitive damages, which may not be covered by insurance in certain states in which insurance coverage for punitive damages is not permitted. In addition, insurance coverage for all or certain forms of liability has become increasingly costly and may become unavailable or prohibitively expensive in the future.

We record accruals for the contingencies discussed in the sections above to the extent that we conclude it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. No estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made at this time regarding the matters specifically described above because of the inherently unpredictable nature of legal proceedings, which also may be exacerbated by various factors, including: (i) the damages sought in the proceedings are unsubstantiated or indeterminate; (ii) discovery is not complete; (iii) the proceeding is in its early stages; (iv) the matters present legal uncertainties; (v) there are significant facts in dispute; (vi) there are a large number of parties (including where it is uncertain how liability, if any, will be shared among multiple defendants); or (vii) there is a wide range of potential outcomes.

The outcome of any current or future litigation or governmental or internal investigations, including the matters described above, cannot be accurately predicted, nor can we predict any resulting judgments, penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities or as a result of actions by third parties. Nevertheless, it is reasonably possible that any such outcome of litigation, judgments, penalties, fines or other sanctions could be substantial, and the outcome of these matters may have a material adverse effect on our results of operations, financial position, and cash flows, and may also affect our reputation.

17. SEGMENT INFORMATION

We manage our business with three reportable segments: Retail, Group, and Healthcare Services. In addition, the Other Businesses category includes businesses that are not individually reportable because they do not meet the quantitative thresholds required by generally accepted accounting principles. These segments are based on a combination of the type of health plan customer and adjacent businesses centered on well-being solutions for our health plans and other customers, as described below. These segment groupings are consistent with information used by our Chief Executive Officer to assess performance and allocate resources.

The Retail segment consists of Medicare benefits, marketed to individuals or directly via group accounts, as well as individual commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and financial protection products. In addition, the Retail segment also includes our contract with CMS to administer the LI-NET prescription drug plan program and contracts with various states to provide Medicaid, dual eligible, and Long-Term Support Services benefits, collectively our state-based contracts. The Group

segment consists of employer group commercial fully-insured medical and specialty health insurance benefits, including dental, vision, and other supplemental health and voluntary insurance benefits, as well as administrative services only, or ASO products. In addition, our Group segment includes our health and wellness products (primarily marketed to employer groups) and military services business, primarily our TRICARE South Region contract. The Healthcare Services segment includes services offered to our health plan members as well as to third parties, including pharmacy solutions, provider services, home based services, and clinical programs, as well as services and capabilities to advance population health. We will continue to report under the category of Other Businesses those businesses which do not align with the reportable segments described above, primarily our closed-block long-term care insurance policies.

Our Healthcare Services intersegment revenues primarily relate to managing prescription drug coverage for members of our other segments through Humana Pharmacy Solutions®, or HPS, and includes the operations of Humana Pharmacy, Inc., our mail order pharmacy business. These revenues consist of the prescription price (ingredient cost plus dispensing fee), including the portion to be settled with the member (co-share) or with the government (subsidies), plus any associated administrative fees. Services revenues related to the distribution of prescriptions by third party retail pharmacies in our networks are recognized when the claim is processed and product revenues from dispensing prescriptions from our mail order pharmacies are recorded when the prescription or product is shipped. Our pharmacy operations, which are responsible for designing pharmacy benefits, including defining member co-share responsibilities, determining formulary listings, contracting with retail pharmacies, confirming member eligibility, reviewing drug utilization, and processing claims, act as a principal in the arrangement on behalf of members in our other segments. As principal, our Healthcare Services segment reports revenues on a gross basis including co-share amounts from members collected by third party retail pharmacies at the point of service.

In addition, our Healthcare Services intersegment revenues include revenues earned by certain owned providers derived from risk-based and non risk-based managed care agreements with our health plans. Under risk based agreements, the provider receives a monthly capitated fee that varies depending on the demographics and health status of the member, for each member assigned to these owned providers by our health plans. The owned provider assumes the economic risk of funding the assigned members' healthcare services. Under non risk-based agreements, our health plans retain the economic risk of funding the assigned members' healthcare services. Our Healthcare Services segment reports provider services revenues associated with risk-based agreements on a gross basis, whereby capitation fee revenue is recognized in the period in which the assigned members are entitled to receive healthcare services. Provider services revenues associated with non risk-based agreements are presented net of associated healthcare costs.

We present our consolidated results of operations from the perspective of the health plans. As a result, the cost of providing benefits to our members, whether provided via a third party provider or internally through a stand-alone subsidiary, is classified as benefits expense and excludes the portion of the cost for which the health plans do not bear responsibility, including member co-share amounts and government subsidies of $13.4 billion in 2016, $12.3 billion in 2015, and $9.7 billion in 2014. In addition, depreciation and amortization expense associated with certain businesses in our Healthcare Services segment delivering benefits to our members, primarily associated with our provider services and pharmacy operations, are included with benefits expense. The amount of this expense was $111 million in 2016, $92 million in 2015, and $116 million in 2014.

Other than those described previously, the accounting policies of each segment are the same and are described in Note 2. Transactions between reportable segments primarily consist of sales of services rendered by our Healthcare Services segment, primarily pharmacy, provider, and home based services as well as clinical programs, to our Retail and Group customers. Intersegment sales and expenses are recorded at fair value and eliminated in consolidation. Members served by our segments often use the same provider networks, enabling us in some instances to obtain more favorable contract terms with providers. Our segments also share indirect costs and assets. As a result, the profitability of each segment is interdependent. We allocate most operating expenses to our segments. Assets and certain corporate income and expenses are not allocated to the segments, including the portion of investment income not supporting segment operations, interest expense on corporate debt, and certain other corporate expenses. These items are managed at a corporate level. These corporate amounts are reported separately from our reportable segments and are included with intersegment eliminations in the tables presenting segment results below.

Our segment results were as follows for the years ended December 31, 2016, 2015, and 2014:

	Retail	Group	Healthcare Services	Other Businesses	Eliminations/ Corporate	Consolidated
			(in millions)

Income (loss) before income taxes	$ 937	$ 257	$ 1,067	$ (520)	$ (189)	$ 1,552

Premium and services revenues derived from our contracts with the federal government, as a percentage of our total premium and services revenues, was approximately 75% for 2016, compared to 73% for 2015, and 73% for 2014.

Premiums revenue for our Retail segment for 2016 includes a reduction of $583 million associated with the write-off of commercial risk corridor receivables as discussed more fully in Note 7.

Benefits expense for Other Businesses for 2016 includes $505 million for reserve strengthening associated with our closed block of long-term care insurance policies as discussed more fully in Note 18.

18. EXPENSES ASSOCIATED WITH LONG-DURATION INSURANCE PRODUCTS

Premiums associated with our long-duration insurance products accounted for approximately 1% of our consolidated premiums and services revenue for the year ended December 31, 2016. We use long-duration accounting for products such as long-term care, life insurance, annuities, and certain health and other supplemental policies sold to individuals because they are expected to remain in force for an extended period beyond one year and because premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. As a result, we defer policy acquisition costs, primarily consisting of commissions, and amortize them over the estimated life of the policies in proportion to premiums earned.

In addition, we establish reserves for future policy benefits in recognition of the fact that some of the premium received in the earlier years is intended to pay anticipated benefits to be incurred in future years. At policy issuance, these reserves are recognized on a net level premium method based on premium rate increase, interest rate, mortality, morbidity, persistency (the percentage of policies remaining in-force), and maintenance expense assumptions. The assumptions used to determine the liability for future policy benefits are established and locked in at the time each contract is issued and only change if our expected future experience deteriorates to the point that the level of the liability, together with the present value of future gross premiums, are not adequate to provide for future expected policy benefits and maintenance costs (i.e. the loss recognition date). As discussed in Note 2, beginning in 2014, health policies sold to individuals that conform to the Health Care Reform Law are accounted for under a short-duration model because premiums received in the current year are intended to pay anticipated benefits in that year.

The table below presents deferred acquisition costs and future policy benefits payable associated with our long-duration insurance products for the years ended December 31, 2016 and 2015.

	2016		2015	
	Deferred acquisition costs	Future policy benefits payable	Deferred acquisition costs	Future policy benefits payable
	(in millions)			
Other long-term assets	$ 119	$ —	$ 135	$ —
Trade accounts payable and accrued expenses	—	(62)	—	(64)
Long-term liabilities	—	(2,834)	—	(2,151)
Total asset (liability)	$ 119	$ (2,896)	$ 135	$ (2,215)

In addition, future policy benefits payable include amounts of $201 million at December 31, 2016 and $205 million at December 31, 2015 which are subject to 100% coinsurance agreements as more fully described in Note 19.

In 2016, we recorded a net increase in benefits expense of $439 million, including a net charge of $505 million associated with our closed block of long-term care insurance policies discussed further below, partially offset by the release of reserves as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law. In 2015, we recorded a net reduction in benefits expense of $80 million associated with future policy benefits primarily due to the release of reserves as individual commercial medical members transitioned to plans compliant with the Health Care Reform Law. Benefits expense associated with future policy benefits payable was $32 million in 2014. Amortization of deferred acquisition costs included in operating costs was $67 million in 2016, $63 million in 2015, and $39 million in 2014. The higher amortization in 2015 and 2016 primarily reflects the effect of existing previously underwritten members transitioning to policies compliant with the Health Care Reform Law with us and other carriers.

Future policy benefits payable include $2.2 billion at December 31, 2016 and $1.5 billion at December 31, 2015 associated with a non-strategic closed block of long-term care insurance policies acquired in connection with the 2007 acquisition of KMG. Future policy benefits payable includes amounts charged to accumulated other comprehensive income for an additional liability that would exist on our closed-block of long-term care insurance policies if unrealized gains on the sale of the investments backing such products had been realized and the proceeds reinvested at then current

yields. There was a $77 million additional liability at December 31, 2016 and no additional liability at December 31, 2015. Amounts charged to accumulated other comprehensive income are net of applicable deferred taxes.

Long-term care insurance policies provide nursing home and home health coverage for which premiums are collected many years in advance of benefits paid, if any. Therefore, our actual claims experience will emerge many years after assumptions have been established. The risk of a deviation of the actual premium rate increase, interest, morbidity, mortality, persistency, and maintenance expense assumptions from those assumed in our reserves are particularly significant to our closed block of long-term care insurance policies. We monitor the loss experience of these long-term care insurance policies and, when necessary, apply for premium rate increases through a regulatory filing and approval process in the jurisdictions in which such products were sold. To the extent premium rate increases, interest rates, and/or loss experience vary from our loss recognition date assumptions, material future adjustments to reserves could be required.

During 2016, we recorded a loss for a premium deficiency. The premium deficiency was based on current and anticipated experience that had deteriorated from our locked-in assumptions from the previous December 31, 2013 loss recognition date, particularly as they related to emerging experience indicating longer claims duration, a prolonged lower interest rate environment, and an increase in policyholder life expectancies. Based on this deterioration, we determined that our existing future policy benefits payable, together with the present value of future gross premiums, associated with our closed block of long-term care insurance policies were not adequate to provide for future policy benefits and maintenance costs under these policies; therefore we unlocked and modified our assumptions based on current expectations. Accordingly, during 2016 we recorded $505 million of additional benefits expense, with a corresponding increase in future policy benefits payable of $659 million partially offset by a related reinsurance recoverable of $154 million included in other long-term assets.

Deferred acquisition costs included $16 million and $26 million associated with our individual commercial medical policies at December 31, 2016 and December 31, 2015, respectively. Future policy benefits payable associated with our individual commercial medical policies were $86 million at December 31, 2016 and $180 million at December 31, 2015. The decline in deferred acquisition costs and future policy benefits payable primarily reflects the effect of existing previously underwritten members transitioning to policies compliant with the Health Care Reform Law with us and other carriers.

19. REINSURANCE

Certain blocks of insurance assumed in acquisitions, primarily life, long-term care, and annuities in run-off status, are subject to reinsurance where some or all of the underwriting risk related to these policies has been ceded to a third party. In addition, a large portion of our reinsurance takes the form of 100% coinsurance agreements where, in addition to all of the underwriting risk, all administrative responsibilities, including premium collections and claim payment, have also been ceded to a third party. We acquired these policies and related reinsurance agreements with the purchase of stock of companies in which the policies were originally written. We acquired these companies for business reasons unrelated to these particular policies, including the companies' other products and licenses necessary to fulfill strategic plans.

A reinsurance agreement between two entities transfers the underwriting risk of policyholder liabilities to a reinsurer while the primary insurer retains the contractual relationship with the ultimate insured. As such, these reinsurance agreements do not completely relieve us of our potential liability to the ultimate insured. However, given the transfer of underwriting risk, our potential liability is limited to the credit exposure which exists should the reinsurer be unable to meet its obligations assumed under these reinsurance agreements.

Reinsurance recoverables represent the portion of future policy benefits payable and benefits payable that are covered by reinsurance. Amounts recoverable from reinsurers are estimated in a manner consistent with the methods used to determine future policy benefits payable as detailed in Note 2. Excluding reinsurance associated with the Health Care Reform Law discussed in Note 2, reinsurance recoverables, included in other current and long-term assets, were $822 million at December 31, 2016 and $668 million at December 31, 2015. The percentage of these reinsurance recoverables resulting from 100% coinsurance agreements was approximately 34% at December 31, 2016 and approximately 43% at December 31, 2015. Premiums ceded were $842 million in 2016, $821 million in 2015 and $357

million in 2014. Benefits ceded were $767 million in 2016, $666 million in 2015, and $272 million in 2014. Ceded premium and benefits reflect a July 1, 2014 amendment ceding all risk under a Medicaid contract to a third party reinsurer.

We evaluate the financial condition of these reinsurers on a regular basis. These reinsurers are well-known and well-established, as evidenced by the strong financial ratings at December 31, 2016 presented below:

Reinsurer	Total Recoverable	A.M. Best Rating at December 31, 2016
	(in millions)	
Munich American Reassurance Company	$ 248	A+ (superior)
Protective Life Insurance Company	182	A+ (superior)
Employers Reassurance Corporation	130	A- (excellent)
General Re Life Corporation	129	A++ (superior)
All others	133	A+ to A- (superior to excellent)
	$ 822	

The all other category represents 18 reinsurers with individual balances less than $76 million. Three of these reinsurers with recoverables of $93 million are subject to trust or funds withheld accounts, requiring amounts at least equal to the total recoverable from each of these reinsurers.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Humana Inc.:

In our opinion, the consolidated balance sheets and the related consolidated statements of income, of comprehensive income, of stockholders' equity and of cash flows present fairly, in all material respects, the financial position of Humana Inc. and its subsidiaries at December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the index appearing under Item 15(a)(2) present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Louisville, Kentucky
February 17, 2017

Humana Inc.
QUARTERLY FINANCIAL INFORMATION
(Unaudited)

A summary of our quarterly unaudited results of operations for the years ended December 31, 2016 and 2015 follows:

	2016			
	First	Second	Third	Fourth (2)(3)
	(in millions, except per share results)			
Total revenues	$ 13,800	$ 14,007	$ 13,694	$ 12,878
Income (loss) before income taxes	500	636	902	(486)
Net income (loss)	254	311	450	(401)
Basic earnings (loss) per common share	$ 1.70	$ 2.08	$ 3.01	$ (2.68)
Diluted earnings (loss) per common share (1)	$ 1.68	$ 2.06	$ 2.98	$ (2.68)

	2015			
	First	Second	Third	Fourth (4)
	(in millions, except per share results)			
Total revenues	$ 13,833	$ 13,732	$ 13,363	$ 13,361
Income before income taxes	744	793	648	246
Net income	430	431	314	101
Basic earnings per common share	$ 2.86	$ 2.88	$ 2.11	$ 0.68
Diluted earnings per common share (1)	$ 2.82	$ 2.85	$ 2.09	$ 0.67

(1) The calculation of diluted earnings per common share is based on the weighted average shares outstanding during each quarter and, accordingly, the sum may not equal the total for the year. In addition, for 2016, the sum of quarterly amounts does not equal full year results due to the anti-dilutive impact of a loss in the fourth quarter. The loss position in the fourth quarter required the use of basic weighted-average common shares outstanding in the calculation of diluted loss per share.

(2) The fourth quarter of 2016 includes an expense of $505 million ($318 million after tax, or 2.11 per diluted common share) for reserve strengthening associated with our closed block of long-term care insurance policies.

(3) Total revenue for 2016 includes a reduction of $583 million ($367 million after-tax, or $2.43 per diluted common share) in premiums associated with the write-off of risk corridor receivables.

(4) The fourth quarter of 2015 includes an expense of $176 million ($112 million after tax, or $0.74 per diluted common share) for a premium deficiency reserve associated with our individual commercial medical policies compliant with the Health Care Reform Law associated with the 2016 coverage year.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements and Other Information

We are responsible for the preparation and integrity of the consolidated financial statements appearing in our Annual Report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States and include amounts based on our estimates and judgments. All other financial information in this report has been presented on a basis consistent with the information included in the financial statements.

Our control environment is the foundation for our system of internal control over financial reporting and is embodied in our Code of Ethics and Business Conduct, which we currently refer to as the Humana Inc. Ethics Every Day. It sets the tone of our organization and includes factors such as integrity and ethical values. Our internal control over financial reporting is supported by formal policies and procedures which are reviewed, modified and improved as changes occur in business conditions and operations.

The Audit Committee of the Board of Directors, which is composed solely of independent outside directors, meets periodically with members of management, the internal auditors and our independent registered public accounting firm to review and discuss internal controls over financial reporting and accounting and financial reporting matters. Our independent registered public accounting firm and internal auditors report to the Audit Committee and accordingly have full and free access to the Audit Committee at any time.

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to members of senior management and the Board of Directors.

Based on our evaluation as of December 31, 2016, we as the principal executive officer and the principal financial officer and the principal accounting officer of the Company have concluded that the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as specified in Securities and Exchange Commission rules and forms.

Management's Report on Internal Control Over Financial Reporting

We are responsible for establishing and maintaining effective internal control over financial reporting as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2016. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework* (2013). Based on our assessment, we determined that, as of December 31, 2016, the Company's internal control over financial reporting was effective based on those criteria.

The effectiveness of our internal control over financial reporting as of December 31, 2016 has been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm, who also audited the Company's consolidated financial statements included in our Annual Report on Form 10-K, as stated in their report which appears on page 138.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2016 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Bruce D. Broussard
President and Chief Executive Officer (Principal Executive Officer)

Brian A. Kane
Senior Vice President and Chief Financial Officer (Principal Financial Officer)

Cynthia H. Zipperle
Vice President, Chief Accounting Officer and Controller (Principal Accounting Officer)

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the caption "Proposal One: Election of Directors" in such Proxy Statement.

Executive Officers of the Registrant

Set forth below are names and ages of all of our current executive officers as of February 1, 2017, their positions, and the date first elected an officer:

Name	Age	Position	First Elected Officer	
Bruce D. Broussard	54	President and Chief Executive Officer, Director	12/11	(1)
James E. Murray	63	Executive Vice President and Chief Operating Officer	08/90	(2)
Roy A. Beveridge, M.D.	59	Senior Vice President and Chief Medical Officer	06/13	(3)
Jody L. Bilney	55	Senior Vice President and Chief Consumer Officer	04/13	(4)
Christopher H. Hunter	48	Senior Vice President and Chief Strategy Officer	01/14	(5)
Timothy S. Huval	50	Senior Vice President and Chief Human Resources Officer	12/12	(6)
Brian A. Kane	44	Senior Vice President and Chief Financial Officer	06/14	(7)
Christopher Kay	51	Senior Vice President and Chief Innovation Officer	03/14	(8)
Brian P. LeClaire	56	Senior Vice President and Chief Information Officer	08/11	(9)
Heidi S. Margulis	63	Senior Vice President – Corporate Affairs	12/95	(10)
Christopher M. Todoroff	54	Senior Vice President and General Counsel	08/08	(11)
Cynthia H. Zipperle	54	Vice President, Chief Accounting Officer and Controller	12/14	(12)

(1) Mr. Broussard currently serves as Director, President and Chief Executive Officer (Principal Executive Officer), having held these positions since January 1, 2013. Mr. Broussard was elected President upon joining the Company in December 2011 and served in that capacity through December 2012. Prior to joining the Company, Mr. Broussard was Chief Executive Officer of McKesson Specialty/US Oncology, Inc. US Oncology was purchased by McKesson in December 2010. At US Oncology, Mr. Broussard served in a number of senior executive roles, including Chief Financial Officer, Chief Executive Officer, and Chairman of the Board.

(2) Mr. Murray currently serves as Executive Vice President and Chief Operating Officer, having held this position since December 2011. Mr. Murray has held the position of Chief Operating Officer since February 2006, and was the Chief Operating Officer – Market and Business Segment Operations from September 2002 to February 2006. Mr. Murray joined the Company in December 1989. On February 8, 2017, the Company announced that Mr. Murray intends to retire from the position of Executive Vice President and Chief Operating Office effective March 31, 2017.

(3) Dr. Beveridge currently serves as Senior Vice President and Chief Medical Officer, having held this position since joining the Company in June 2013. Prior to joining the Company, Dr. Beveridge served as Chief Medical Officer for McKesson Specialty Health from December 2010 until June 2013. Prior to McKesson's acquisition of US Oncology, Dr. Beveridge served as the Executive Vice President and Medical Director at US Oncology from September 2009 through December 2010.

(4) Ms. Bilney currently serves as Senior Vice President and Chief Consumer Officer, having held this position since joining the Company in April 2013. Prior to joining the Company, Ms. Bilney served as Executive Vice President and Chief Brand Officer for Bloomin' Brands, Inc. from 2006 until April 2013.

(5) Mr. Hunter currently serves as Senior Vice President and Chief Strategy Officer, having held this position since joining the Company in January 2014. Prior to joining the Company, Mr. Hunter served as President of Provider Markets at The TriZetto Group, Inc. from July 2012 until December 2013, and as Senior Vice President, Emerging Markets at BlueCross BlueShield of Tennessee from 2009 through July 2012. While at BlueCross BlueShield of Tennessee, Mr. Hunter was simultaneously President and Chief Executive Officer of Onlife Health, a national health and wellness subsidiary of BlueCross BlueShield of Tennessee.

(6) Mr. Huval currently serves as Senior Vice President and Chief Human Resources Officer, having been elected to this position in December 2012. Prior to joining the Company, Mr. Huval spent 10 years at Bank of America in multiple senior-level roles, including Human Resources executive and Chief Information Officer for Global Wealth & Investment Management, as well as Human Resources executive for both Global Treasury Services and Technology & Global Operations.

(7) Mr. Kane currently serves as Senior Vice President and Chief Financial Officer, having been elected to this position in June 2014. Prior to joining the Company, Mr. Kane spent nearly 17 years at Goldman, Sachs & Co. As a managing director, he was responsible for client relationships as well as for leading strategic and financing transactions for a number of companies in multiple industries.

(8) Mr. Kay currently serves of Senior Vice President and Chief Innovation Officer, having been elected to this position in March 2014. Prior to joining the Company, Mr. Kay was most recently Managing Director and CEO of Citi Ventures, Citigroup's global corporate venturing arm. Prior to joining Citi in 2007, Mr. Kay held several leadership positions at Target over a 12-year period.

(9) Mr. LeClaire currently serves as Senior Vice President and Chief Information Officer, having held this position since January 2014. Prior to that, he served as Senior Vice President and Chief Service and Information Officer from August 2011 to January 2014, and as Chief Technology Officer from 2002 to August 2011. Mr. LeClaire joined the Company in August 1999.

(10) Ms. Margulis currently serves as Senior Vice President – Corporate Affairs, having held this position since January 2000. Ms. Margulis joined the Company in November 1985.

(11) Mr. Todoroff currently serves as Senior Vice President and General Counsel, having held this position since August 2008. Prior to joining the Company, Mr. Todoroff served as Vice President, Senior Corporate Counsel and Corporate Secretary for Aetna Inc. from 2006 through July 2008. Mr. Todoroff joined Aetna's Legal Department in 1995 and held various positions of increasing responsibility.

(12) Mrs. Zipperle currently serves as Vice President, Chief Accounting Officer and Controller, having held this position since December 2014. Mrs. Zipperle previously served as the Vice President - Finance from January 2013 until her election to her current role, and as the Assistant Controller from January 1998 until January 2013.

Executive officers are elected annually by our Board of Directors and serve until their successors are elected or until resignation or removal. There are no family relationships among any of our executive officers.

Section 16(a) Beneficial Ownership Reporting Compliance

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" of such Proxy Statement.

Code of Conduct for Chief Executive Officer and Senior Financial Officers

We have adopted a Code of Conduct for the Chief Executive Officer and Senior Financial Officers, violations of which should be reported to the Audit Committee. The code may be viewed through the Investor Relations section of our web site at www.humana.com. Any amendment to or waiver of the application of the Code of Conduct for the Chief Executive Officer and Senior Financial Officers will be promptly disclosed through the Investor Relations section of our web site at www.humana.com.

Code of Business Conduct and Ethics

Since 1995, we have operated under an omnibus Code of Ethics and Business Conduct, currently known as the Humana Inc. Ethics Every Day. All employees and directors are required to annually affirm in writing their acceptance of the code. The Humana Inc. Ethics Every Day was adopted by our Board of Directors in June 2014, replacing a previous iteration of our Code of Ethics and Business Conduct – the Humana Inc. Principles of Business Ethics – as the document to comply with the New York Stock Exchange Corporate Governance Standard 303A.10. The Humana Inc. Ethics Every Day is available on our web site at www.humana.com. Any waiver of the application of the Humana Inc. Principles of Business Ethics to directors or executive officers must be made by the Board of Directors and will be promptly disclosed on our web site at www.humana.com.

Corporate Governance Items

We have made available free of charge on or through the Investor Relations section of our web site at www.humana.com our annual reports on Form 10-K, quarterly reports on Form 10-Q, proxy statements, and all of our other reports, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Also available on our Internet web site is information about our corporate governance, including:

- a determination of independence for each member of our Board of Directors;
- the name, membership, role, and charter of each of the various committees of our Board of Directors;
- the name(s) of the directors designated as a financial expert under rules and regulations promulgated by the SEC;
- the responsibility of the Company's Lead Independent Director, if applicable, to convene, set the agenda for, and lead executive sessions of the non-management directors;
- the pre-approval process of non-audit services provided by our independent accountants;
- our by-laws and Certificate of Incorporation;
- our Majority Vote policy;
- our Related Persons Transaction Policy;
- the process by which interested parties can communicate with directors;
- the process by which stockholders can make director nominations (pursuant to our By-laws);
- our Corporate Governance Guidelines;
- our Policy Regarding Transactions in Company Securities, Inside Information and Confidentiality;
- Stock Ownership Guidelines for directors and for executive officers;
- the Humana Inc. Ethics Every Day and any waivers thereto; and
- the Code of Conduct for the Chief Executive Officer and Senior Financial Officers and any waivers thereto.

Additional information about these items can be found in, and is incorporated by reference to, our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017.

Material Changes to the Procedures by which Security Holders May Recommend Nominees to the Registrant's Board of Directors

None.

Audit Committee Financial Expert

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the caption "Corporate Governance – Audit Committee" of such Proxy Statement.

Audit Committee Composition and Independence

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the caption "Corporate Governance – Committee Membership and Attendance" of such Proxy Statement.

ITEM 11. EXECUTIVE COMPENSATION

Additional information required by this Item is incorporated herein by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the captions "Corporate Governance – Organization & Compensation Committee – Compensation Committee Interlocks and Insider Participation," "Director Compensation," "Compensation Discussion and Analysis," "Organization & Compensation Committee Report," and "Executive Compensation" of such Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Equity compensation plan information

We maintain plans under which options to purchase our common stock and awards of restricted stock may be made to officers, directors, key employees, and consultants. Stock options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant. Our stock plans, as approved by the Board of Directors and stockholders, define fair market value as the average of the highest and lowest stock prices reported on the composite tape by the New York Stock Exchange on a given date. Exercise provisions vary, but most options vest in whole or in part 1 to 3 years after grant and expire up to 7 years after grant.

Information concerning stock option awards and the number of securities remaining available for future issuance under our equity compensation plans in effect as of December 31, 2016 follows:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column(a))	
Equity compensation plans approved by security holders (1)	1,021,590	$ 143.043	7,052,923	(2)(3)
Equity compensation plans not approved by security holders	—	—	—	
Total	1,021,590	$ 143.043	7,052,923	

(1) The above table does not include awards of shares of restricted stock or restricted stock units. For information concerning these awards, see Note 13.

(2) The Humana Inc. 2011 Stock Incentive Plan was approved by stockholders at the Annual Meeting held on April 21, 2011. On July 5, 2011, 18.5 million shares were registered with the Securities and Exchange Commission on Form S-8.
(3) Of the number listed above, 3,079,879 can be issued as restricted stock at December 31, 2016 (giving effect to the provision that one restricted share is equivalent to 2.29 stock options in the 2011 Plan).

The information under the captions "Security Ownership of Certain Beneficial Owners of Company Common Stock" and "Security Ownership of Directors and Executive Officers" in our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017, is herein incorporated by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the captions "Certain Transactions with Management and Others" and "Corporate Governance – Independent Directors" of such Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item is herein incorporated by reference from our Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on April 20, 2017 appearing under the caption "Audit Committee Report" of such Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The financial statements, financial statement schedules and exhibits set forth below are filed as part of this report.

(1) Financial Statements – The response to this portion of Item 15 is submitted as Item 8 of Part II of this report.

(2) The following Consolidated Financial Statement Schedules are included herein:

Schedule I	Parent Company Financial Information
Schedule II	Valuation and Qualifying Accounts

All other schedules have been omitted because they are not applicable.

(3) Exhibits:

2.1 Agreement and Plan of Merger, dated as of July 2, 2015 among Aetna Inc., Echo Merger Sub, Inc., Echo Merger Sub, LLC and Humana Inc. (incorporated herein by reference to Exhibit 2.1 to Humana Inc.'s Current Report on Form 8-K filed on July 7, 2015).

2.2 Letter Agreement, dated as of December 21, 2016, between Aetna Inc., Echo Merger Sub, Inc., Echo Merger Sub, LLC and Humana Inc. (incorporated herein by reference to Exhibit 10.1 to Humana Inc.'s Current Report on Form 8-K filed on December 22, 2016).

2.3 Termination letter dated as of February 14, 2017, by and among Humana Inc., Aetna Inc., Echo Merger Sub, Inc. and Echo Merger Sub LLC (incorporated herein by reference to Exhibit 10.1 to Humana Inc.'s Current Report on Form 8-K filed on February 14, 2017).

3(a) Restated Certificate of Incorporation of Humana Inc. filed with the Secretary of State of Delaware on November 9, 1989, as restated to incorporate the amendment of January 9, 1992, and the correction of March 23, 1992 (incorporated herein by reference to Exhibit 4(i) to Humana Inc.'s Post-Effective Amendment No.1 to the Registration Statement on Form S-8 (Reg. No. 33-49305) filed February 2, 1994).

(b) By-Laws of Humana Inc., as amended on January 4, 2007 (incorporated herein by reference to Exhibit 3 to Humana Inc.'s Annual Report on Form 10-K for the year ended December 31, 2006).

4(a) Indenture, dated as of August 5, 2003, by and between Humana Inc. and The Bank of New York, as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).

(b) First Supplemental Indenture, dated as of August 5, 2003, by and between Humana Inc. and The Bank of New York, as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).

(c) Second Supplemental Indenture, dated as of May 31, 2006, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on May 31, 2006).

(d) Third Supplemental Indenture, dated as of June 5, 2008, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on June 5, 2008).

(e) Fourth Supplemental Indenture, dated as of June 5, 2008, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.3 to Humana Inc.'s Current Report on Form 8-K filed on June 5, 2008).

(f) Indenture, dated as of March 30, 2006, by and between Humana Inc. and The Bank of New York Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.2 to Humana Inc.'s Registration Statement on Form S-3 filed on March 31, 2006).

(g) There are no instruments defining the rights of holders with respect to long-term debt in excess of 10 percent of the total assets of Humana Inc. on a consolidated basis. Other long-term indebtedness of Humana Inc. is described herein in Note 12 to Consolidated Financial Statements. Humana Inc. agrees to furnish copies of all such instruments defining the rights of the holders of such indebtedness not otherwise filed as an Exhibit to this Annual Report on Form 10-K to the Commission upon request.

(h) Fifth Supplemental Indenture, dated as of December 10, 2012, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.1 to Humana Inc.'s Current Report on Form 8-K filed on December 10, 2012).

(i) Sixth Supplemental Indenture, dated as of December 10, 2012, by and between Humana Inc. and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated herein by reference to Exhibit 4.3 to Humana Inc.'s Current Report on Form 8-K filed on December 10, 2012).

Humana Inc.

SCHEDULE I—PARENT COMPANY FINANCIAL INFORMATION
NOTES TO CONDENSED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

Parent company financial information has been derived from our consolidated financial statements and excludes the accounts of all operating subsidiaries. This information should be read in conjunction with our consolidated financial statements.

Related Party

Refer to Note 2 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of our related party transactions. A related party note receivable is included with other long-term assets in our condensed balance sheet at December 31, 2016 and December 31, 2015 in the amount of $314 million and $284 million, respectively. The related interest income of $30 million for 2016 is included in investment and other income in our condensed statement of income.

2. TRANSACTIONS WITH SUBSIDIARIES

Management Fee

Through intercompany service agreements approved, if required, by state regulatory authorities, Humana Inc., our parent company, charges a management fee for reimbursement of certain centralized services provided to its subsidiaries including information systems, disbursement, investment and cash administration, marketing, legal, finance, and medical and executive management oversight.

Dividends

Cash dividends received from subsidiaries and included as a component of net cash provided by operating activities were $763 million in 2016, $493 million in 2015, and $927 million in 2014.

Guarantee

Through indemnity agreements approved by state regulatory authorities, certain of our regulated subsidiaries generally are guaranteed by our parent company in the event of insolvency for: (1) member coverage for which premium payment has been made prior to insolvency; (2) benefits for members then hospitalized until discharged; and (3) payment to providers for services rendered prior to insolvency. Our parent has also guaranteed the obligations of our military services subsidiaries.

Notes Receivables from Operating Subsidiaries

We funded certain subsidiaries with surplus note agreements. These notes are generally non-interest bearing and may not be entered into or repaid without the prior approval of the applicable Departments of Insurance or other state regulatory authorities.

Notes Payable to Operating Subsidiaries

We borrowed funds from certain subsidiaries with notes generally collateralized by real estate. These notes, which have various payment and maturity terms, bear interest ranging from 1.93% to 6.65% and are payable in 2017 and 2019. We recorded interest expense of $1 million related to these notes for each of the years ended December 31, 2016, 2015 and 2014.

3. REGULATORY REQUIREMENTS

Certain of our subsidiaries operate in states that regulate the payment of dividends, loans, or other cash transfers to Humana Inc., our parent company, and require minimum levels of equity as well as limit investments to approved securities. The amount of dividends that may be paid to Humana Inc. by these subsidiaries, without prior approval by state regulatory authorities, or ordinary dividends, is limited based on the entity's level of statutory income and statutory capital and surplus. In most states, prior notification is provided before paying a dividend even if approval is not required.

Although minimum required levels of equity are largely based on premium volume, product mix, and the quality of assets held, minimum requirements vary significantly at the state level. Our state regulated insurances subsidiaries had aggregate statutory capital and surplus of approximately $7.7 billion and $6.6 billion as of December 31, 2016 and 2015, respectively, which exceeded aggregate minimum regulatory requirements of $4.8 billion and $4.6 billion, respectively. Subsidiary dividends are subject to state regulatory approval, the amount and timing of which could be reduced or delayed. Excluding Puerto Rico subsidiaries, the amount of ordinary dividends that may be paid to our parent company in 2017 is approximately $850 million in the aggregate. This compares to dividends that were paid to our parent company in 2016 of approximately $763 million. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

Our parent company funded a subsidiary capital contribution of approximately $535 million in the first quarter of 2017 for reserve strengthening associated with our closed block of long-term care insurance policies discussed further in Note 18 of the notes to consolidated financial statements in this Annual Report on Form 10-K.

Our use of operating cash flows derived from our non-insurance subsidiaries, such as in our Healthcare Services segment, is generally not restricted by state departments of insurance (or comparable state regulators).

4. ACQUISITIONS AND DIVESTITURES

Refer to Note 3 of the notes to consolidated financial statements in this Annual Report on Form 10-K for a description of certain acquisitions and divestitures. On June 1, 2015, we completed the sale of our wholly owned subsidiary, Concentra Inc. During 2016, 2015 and 2014, we funded certain non-regulated subsidiary acquisitions with contributions from Humana Inc., our parent company, included in capital contributions in the condensed statement of cash flows.

5. INCOME TAXES

Refer to Note 11 of the notes to consolidated financial statements included in this Annual Report on Form 10-K for a description of income taxes.

6. DEBT

Refer to Note 12 of the notes to consolidated financial statements included in this Annual Report on Form 10-K for a description of debt.

7. STOCKHOLDER'S EQUITY

Refer to Note 15 of the notes to consolidated financial statements included in this Annual Report on Form 10-K for a description of stockholders' equity, including stock repurchases and stockholder dividends.

Humana Inc.

Introduction to Pro Forma Financial Statements

Introduction to Pro Forma Financial Statements

As requested in Section e., Financial Information, item 2., Pro Forma Financial Statements, Humana has included pro forma financial statements for Humana Medical Plan, Inc.'s Florida operation, broken down by line of business beginning with 10/31/2018. We have also provided supplemental data for 2016 and 2017 for additional context. The pro forma financial statements are prepared on an accrual basis by month for the first three (3) years.

The pro forma financial statements, which immediately follow, are tabbed separately as shown below:

		Page Numbers
1.	Assets	1-7
2.	Liabilities, Surplus and Capital	8-14

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

RESPONDENT NAME: Humana Medical Plan, Inc.

A. RESPONDENT BACKGROUND / EXPERIENCE

SRC# 1 – Managed Care Experience (Statewide):

The respondent, including respondent's parent, affiliate(s) and subsidiary(ies), shall provide a list of all current and/or recent (within five (5) years of the issue date of this solicitation (since July 14, 2012) contracts for managed care services (e.g. medical care, integrated medical and behavioral health services, transportation services and/or long-term services and support).

The respondent shall provide the following information for each identified contract:

a. The Medicaid population served (such as TANF, ABD, dual eligible);
b. The name and address of the client;
c. The name of the contract;
d. The specific start and end dates of the contract;
e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services;
f. The use of administrative and/or delegated subcontractor(s) and their scope of work;
g. The annual contract amount (payment to the respondent) and annual claims payment amount;
h. The scheduled and actual completion dates for contract implementation;
i. The barriers encountered that hindered implementation (if applicable) and the resolutions;
j. Accomplishments and achievements;
k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid); and
l. Whether the contract was capitated, FFS or other payment method.

In addition, the respondent shall describe its experience in delivering managed care services (e.g. medical care, integrated medical and behavioral health services, transportation services and/or long-term services and support), to Medicaid populations similar to the target population (such as TANF, ABD, dual eligible) identified in this solicitation.

For this SRC, the respondent may include experience provided by subcontractors for which the respondent was contractually responsible, if the respondent plans to use those same subcontractors for the SMMC program.

Response:

Humana Medical Plan, Inc., along with its parent company Humana, Inc. (Humana), is pleased to submit our proposal for the Florida Agency for Health Care Administration's (AHCA) Statewide Medicaid Managed Care (SMMC) Program. For this ITN, Humana is bidding as a Comprehensive Long-Term Care Plan (Comprehensive Plan) across all eleven (11) SMMC regions statewide.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS AND EVALUATION CRITERIA (10-2-17)

We have served Florida's Medicaid populations since 1997. As a Comprehensive Plan in Florida Medicaid today, Humana serves enrollees across both the Managed Medical Assistance (MMA) and Long-term Care (LTC) programs. We are also Florida's largest health plan for both Medicare Advantage (MA) and Dual-Eligible Special Needs Plans (D-SNP). Our unique set of program experience, population expertise, and provider and community relationships both nationally and in Florida positions us ideally to help the State meet its goals for the SMMC Program.

Nationally, Humana manages the care of fourteen million (14,000,000) medical benefit enrollees and six point nine million (6.9M) specialty benefit enrollees with an approach built around the understanding that health encompasses much more than just medical care; that is, health is comprised of an individual's physical, mental, and social well-being. While many services may be delivered in clinical or institutional settings, it is in the many communities across Florida and the nation where individuals' and families' health and well-being are truly impacted and influenced. Those communities are, therefore, the focus of our model. We recognize that it is imperative to understand and impact the social and environmental dynamics individuals and families face in their homes and communities. To that end, Humana established an enterprise-wide initiative, our "Bold Goal": to improve the health of the communities we serve by twenty (20) percent by 2020. We are working to accomplish this goal through partnerships with local non-profit organizations, businesses, government agencies, and providers. In Florida specifically, we have piloted these efforts and initiatives in three communities: Broward County, Tampa, and Jacksonville. Due to the success of these pilots in Florida and similar pilots in several other communities around the nation, in the coming years, we intend to expand the initiative to many more communities throughout the state and across the country.

In this section, we will discuss Humana's experience and presence in Florida, our national managed care experience, and the key elements of our approach to the SMMC program. We will then address requirements (a) through (l) for our managed care experience with Temporary Assistance for Needy Families (TANF), Aged, Blind, and Disabled (ABD), and Dual Eligible populations.

HUMANA IN FLORIDA

In Florida today, Humana serves Medicaid-eligible enrollees through our Comprehensive Medicaid contract, which covers MMA and LTC benefits, MA, Prescription Drug Plans (PDP), D-SNPs, and Tricare. Through decades of experience, Humana has cultivated strong relationships and an intimate knowledge of the health, social, and community care and support needs of Florida's vulnerable populations at both the statewide and local levels. Our Florida operations are deeply embedded into communities across the state, with more than ten thousand (10,000) associates based in Florida. Humana currently has Florida Medicaid plans in all eleven (11) SMMC Regions, offering MMA and LTC coverage through an integrated Comprehensive Plan in five regions and LTC coverage across all eleven (11) regions.

Prior to the MMA program, Humana started coordinating care for Florida Medicaid enrollees in 1997 through a Medicaid HMO plan. We served over fifty thousand (50,000) enrollees in Broward, Dade, Hillsborough, Pinellas, and Pasco Counties until the inception of the MMA program. In 2013, Humana was selected to serve as a managed care organization (MCO) for the MMA program. We currently serve over three hundred twenty-five thousand (325,000) MMA

enrollees, including TANF, ABD, and dual eligible populations. Through the MMA program, Humana covers and integrates services including medical, behavioral health, pharmacy, and transportation. According to the National Committee on Quality Assurance (NCQA), from 2011 to 2015 Humana had the highest rated plan in Florida Medicaid, amongst a group that includes many national and local MCOs.

Through a partnership with the Florida Department of Elder Affairs, Humana participated in the Nursing Home Diversion (NHD) program for Florida's frail and elderly population from 2007 to 2013. The coordination of LTC services in the NHD program enabled enrollees to maintain their lives in the community and prevent unnecessary transitions into nursing facilities. The state transitioned the NHD program in 2013 to the Long-term Care program. Today, Humana provides managed LTC services to approximately twenty-one thousand (21,000) enrollees across all eleven 11 regions, serving as the only statewide LTC health plan. We cover LTC for ABD and dual eligible enrollees in the LTC program.

Effective coordination across Medicaid and Medicare improves health outcomes and enrollee experience for the highly vulnerable dual eligible populations (duals). As the largest Medicare Advantage plan in the state, with over six hundred nineteen thousand (619,000) enrollees across all eleven (11) SMMC regions, Humana is uniquely positioned to support AHCA's short and long-term duals integration goals. Our MA D-SNPs, which includes Medicaid benefits, integrate services for more than one hundred five thousand (105,000) duals in Florida, more than any other D-SNP plan in the state. Additionally, our experience serving our nearly three hundred ninety thousand (390,000) MA Prescription Drug Plan (PDP) enrollees has afforded us with valuable experiential insights into this critically impactful component of care and supports integration for duals. Moreover, given Humana's statewide MA and D-SNP presence, we can maintain continuity of care for SMMC enrollees' medical and social needs as their health status changes or as they age into Medicare.

Humana is also proud to be the long-time contractor for the U.S. Department of Defense (DOD) Tricare South Region, which includes more than seven hundred thousand (700,000) Florida residents, to provide benefits for active duty and retired military and their families. Given the prevalence of behavioral health and severe or persistent mental illness (SPMI) within the Tricare population, we have developed significant local experience addressing these conditions from both a medical and social perspective. This unique experience has provided us with insights and perspectives that translate directly into serving the Medicaid population given the overlap of demographics across Tricare and Medicaid enrollees as well as the common community and social complexities they face.

Alongside the enrollees Humana serves through the SMMC program, Medicare plans, and Tricare, we also offer coverage through individual commercial plans (on and off-exchange), commercial employer group plans, and managed dental and vision plans. In total, Humana serves more than two (2) million medical enrollees in medical plans across the state of Florida. Humana offers Florida a unique combination of deep local experience and expertise paired with the capabilities, best practices, scale, innovation, and stability of a national health and well-being company.

HUMANA NATIONALLY

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Humana's fifty-six (56) years as a health services organization has afforded us broad experience serving vulnerable populations through a variety of different models. David Jones and Wendell Cherry founded Humana in 1961 as a nursing home company and long-term care provider on the belief that they could impact many of the problems associated with the care delivery models of the day. Since then, our company has evolved and grown tremendously, adapting with the needs of the day and the enrollees we serve, but we remain dedicated to improving enrollees' health and well-being.

In addition to our Florida programs, our national experience includes working with Medicaid beneficiaries through Medicaid managed care (MMC) and managed long-term care (MLTC) programs, CMS Dual Eligible Financial Alignment Demonstrations (Duals Demos), and MA D-SNPs. Humana has served Medicaid populations continuously for more than two decades, and currently manages traditional Medicaid benefits for more than five hundred twelve thousand (512,000) enrollees. Through these years of experience, we have developed significant expertise in integrating medical and behavioral health services to positively impact health outcomes.

In January 2013, Humana began serving Kentucky Medicaid-eligible beneficiaries in the Louisville metropolitan area. We subsequently expanded coverage statewide and began to serve the ACA Expansion population. This contract now serves the TANF, ABD, dual eligible, and ACA Expansion populations statewide for more than one hundred forty-five thousand (145,000) enrollees. Humana provides integrated medical and behavioral health services for enrollees in this program.

Since 2014, Humana has provided managed Medicaid coverage under Illinois' Integrated Care Program (ICP) for more than five thousand, six hundred (5,600) ABD enrollees. In this program we cover integrated medical and behavioral health services, long-term services and support (LTSS), and transportation services.

In Illinois, we also contract with the Department of Healthcare and Family Services (HFS) and CMS to participate in the Greater Chicago Region for the Medicare-Medicaid Alignment Initiative (Duals Demonstration). We currently have serve more than six thousand, three hundred (6,300) dual eligible enrollees enrolled, for whom we provide integrated medical and behavioral health services, LTSS, and transportation services. By serving both programs, we are able to ensure that we can continue providing LTSS to our enrollees as their Medicare eligibility status changes.

In Virginia, we contract with the Department of Medical Assistance (DMAS) and CMS for the Commonwealth Coordinated Care program (Duals Demonstration) to operate in all regions, serving over eight thousand, six hundred (8,600) dual eligible enrollees. Humana covers integrated medical and behavioral health services, LTSS, and transportation services through the CCC program.

Over the past thirty (30) years, Humana has become an industry leader in Medicare Advantage (MA) and Medicare Part D Prescription Drug Plans (PDPs), both in terms of enrollment and quality. Nationally, Humana administers and manages the Medicare benefits for more than three million two hundred (3,200,000) beneficiaries through our MA plans, as well as more than five million (5,000,000) through our stand-alone PDP plans. More than four hundred seventy-six thousand (476,000) of our MA enrollees are also eligible for Medicaid. Given our extensive

experience with this population, we understand these individuals, their needs, and how to best serve them to achieve health and social outcomes as well as their personal definitions of well-being.

Humana also has broad experience with care coordination for the dual-eligible population nationally and in Florida through our D-SNPs, which we have been operating since 2006. Today, we are a national leader in D-SNPs, with more than one hundred ninety thousand (190,000) enrollees across twenty-two (22) states and Puerto Rico.

Humana also provided traditional Medicaid benefits to more than five hundred thousand (500,000) TANF, ABD, and dual eligible enrollees in Puerto Rico from 1995 until 2013. Through this program we covered medical and transportation services for our enrollees.

In addition to our Medicaid and Medicare experience, Humana offers individual commercial coverage (on and off-exchange), commercial employer group coverage, managed dental and managed vision, Tricare Military, and Go365, Humana's wellness incentive program. Nationwide, Humana provides medical benefits for fourteen million (14,000,000) enrollees and employs fifty-one thousand six hundred (51,600) associates.

KEY ELEMENTS OF HUMANA'S SMMC APPROACH

Humana's person-centered approach to improving Florida SMMC enrollees' health and well-being is built on a strong foundation of experience with similar populations. Through our Comprehensive Plan offering, Humana will support AHCA in achieving its goals for the SMMC program through our clinical care model, integrated technology platforms, quality-oriented service delivery, provider engagement models, and community development programs.

CLINICAL CARE MODEL

An effective approach to identifying, assessing and implementing interventions for high-risk enrollees must be multi-faceted, enrollee-driven, and encompass all levels of care. Humana has decades of experience providing case management and care coordination for Medicaid populations and vulnerable subpopulations. Our comprehensive case management program is dedicated to identifying, engaging, and managing our enrollees who require care coordination and case management services, and tailoring those services to the specific needs of the enrollee. Humana's process for identifying and monitoring the highest need and highest risk enrollees integrates robust data analytics with specialized care coordination strategies. This approach allows us to proactively identify high-risk enrollees and proactively address emerging health issues. Humana's case management program includes a Multi-Disciplinary Team (MDT) model. The MDT promotes holistic, integrated care by inviting key stakeholders to participate in care planning, including the enrollee and their representatives, case managers, PCPs, and behavioral health providers.

SYSTEMS INTEGRATION

Through ongoing clinical monitoring of claims, pharmacy utilization, and diagnoses, we identify and refer enrollees into case management and disease management programs. All of our various sources of identification and referral – from predictive modeling to claims data and lab results – are integrated into our powerful CareHub platform, Humana's innovative enterprise solution for complete program integration for Humana's provider community and enrollees. The

CareHub Clinical Guidance eXchange (CGX) clinical workflow system supports an integrated approach to care coordination. As a fully integrated approach, this enterprise solution provides enhanced capabilities to identify enrollees for programs, document gaps in care, automate care planning, monitor plan compliance, and identify undesirable outcomes for further intervention. Through CGX, case managers can also monitor care across enrollees' varied coverage, including MMA, LTC, MA, PDP, and D-SNPs. Integrated systems like these are particularly important for coordinating care across MMA and LTC for Humana's Comprehensive Medicaid enrollees.

QUALITY-ORIENTED SERVICE DELIVERY

We prioritize quality initiatives that ensure we are effectively supporting enrollees and providers and driving continuous improvement. Humana's Quality Improvement (QI) program helps us monitor, evaluate, and facilitate improvement in the quality of healthcare services we provide. Humana's current SMMC program coordinates quality initiatives across both corporate and local market support. Corporate support helps provide direction, oversight, and guidance when needed, while the local market leadership leads quality initiatives in Florida. Our QI program aligns with The National Quality Strategy, which the Agency for Healthcare Research and Quality leads on behalf of the U.S. Department of Health and Human Services. Further, we have designed this program to comply with contractual, governmental, accreditation, and organizational requirements and guidelines, including the National Committee for Quality Assurance (NCQA). In the Florida Medicaid HMO program, Humana was Florida's top NCQA quality-rated Medicaid health plan from 2011 to 2015. In MA, we are an industry-leader in quality. Humana Medical Plan's Florida MA and D-SNP plans each have a CMS Star Rating of four point five (4.5) (out of five (5)). These quality ratings are the result of our commitment to continuous quality improvement and our strongly engaged provider relationships.

PROVIDER ENGAGEMENT MODELS

Humana is deeply committed to improving outcomes and impacting unnecessary costs through provider engagement and Value-Based Purchasing (VBP) arrangements. We now have more than eight hundred thousand (800,000) Florida Medicaid and Medicare enrollees attributed to local PCPs engaged in VBP arrangements throughout the state. These providers deliver better performance when offered thoughtful incentives, consultative provider guidance, and care gap alerts that are integrated with comparative metrics and benchmarks. Humana offers a continuum of VBP arrangements that incentivize providers to undertake initiatives to reduce preventable events, improve chronic condition care delivery, reduce medical costs, and improve enrollee satisfaction. We meet providers at their respective levels of readiness for VBP and help them to move along this continuum of programs using data analytics and in-person support.

COMMUNITY DEVELOPMENT PROGRAM

While access to high quality health care is a top priority, we understand that social, environmental, and economic factors can have an even greater impact on health and well-being. Our determination to address these issues is captured in Humana's Bold Goal to make the communities we serve twenty (20) percent healthier by 2020. Achieving this goal is only possible through strong relationships with local organizations that help enrollees adopt healthy behaviors and address the many social determinants of health and wellness. In 2015, Humana launched Bold Goal markets in Florida, including Broward County, Tampa, and Jacksonville. In each of these regions, Humana established a local Bold Goal Health Advisory Board, which brings dozens of local stakeholders together to collaborate and find solutions to improve the local systems of care. The Humana Foundation, a 501(c)(3) entity with a governing and grant-

making body separate from Humana Inc. market leadership, has also contributed more than four million one hundred thousand dollars ($4,100,000) to local Florida non-profits since 2012, demonstrating dedication to community organizations and the individuals they work to serve. Most recently, in the immediate aftermath of Hurricane Irma, the Humana Foundation donated one million dollars ($1,000,000) to the American Red Cross and one hundred thousand dollars ($100,000) to Feeding America affiliates in Florida. Finally, Humana's Florida associates are highly-engaged in their communities, with more than thirty-three thousand six hundred (33,600) volunteerism hours logged in 2016.

APPROACH: IN SUMMATION

Through our diverse managed care experience, we have developed expertise providing service coordination, care planning, and specialized clinical management for the complex needs of TANF, ABD, and dual eligible populations within a social supports-based framework. This experience will help us effectively deliver an enhanced coordination and social support model in Florida's MMA and LTC programs. Humana's national and Florida-based experience demonstrates a strong ability to manage complex populations in large numbers and at industry-leading levels of quality while continually improving health and well-being outcomes for enrollees.

APPLICABLE TANF, ABD, AND DUAL ELIGIBLE EXPERIENCE

FLORIDA MANAGED MEDICAL ASSISTANCE

a. The Medicaid population served (such as TANF, ABD, dual eligible):
TANF, ABD, dual eligible

b. The name and address of the client:
Agency for Health Care Administration, 2727 Mahan Drive, Tallahassee, Florida 32308

c. The name of the contract:
Florida Managed Medical Assistance

d. The specific start and end dates of the contract:
January 2014 – September 2018

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

Humana covers medical, behavioral, pharmacy, dental, and transportation services for Medicaid populations including TANF, ABD, and dual eligible individuals in five (5) of eleven (11) regions. To help our enrollees manage conditions and receive appropriate care, we offer care coordination, disease management programs, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Florida MMA program, Humana uses select delegated subcontractors to cover behavioral health services and management, dental services, vision services, hearing services, non-emergency medical transportation services, 24/7 nurse advice line services, and translation services. For select services, we use administrative subcontractors for utilization management, claims processing, credentialing services, and network management.

We select subcontractors with strong performance metrics and positive reputations. When possible, we seek to establish long-standing relationships with strategic partners across our managed care programs nationwide. For instance, Humana is proud of its relationship with Beacon Health Options. Beacon's extensive behavioral health experience includes participating in twenty-six (26) states for Medicaid and six (6) states for dual-eligibles. Beacon also received or achieved accreditation by both URAC and NCQA. They are a trusted partner we use across all of our managed care programs covering behavioral health. Moreover, Humana ensures our subcontractors meet quality standards through continuous evaluation and oversight.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $1,317,449,049
2016 claims expense: $1,158,520,115

h. The scheduled and actual completion dates for contract implementation:
Scheduled: June to August 2014
Actual: June to August 2014

For the Florida MMA program, Humana successfully met all scheduled implementation deadlines.

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:
Barrier: During MMA program implementation, Humana's Florida Medicaid enrollment quickly grew from fifty thousand (50,000) to more than two hundred thousand (200,000) enrollees. This large influx of new enrollees created challenges to rapidly scale operations and meet enrollment requirements.

Resolution: To accommodate this high level of new enrollment, we brought in expert managers and representatives from our Care Centers to handle calls through implementation, and backfilled their previous roles in long-running centers with new associates. Moreover, given the scale of Humana's enrollment across all lines of business, we were capable of leveraging vast company-wide resources to ensure enrollee satisfaction didn't suffer.

Barrier: Another issue related to the large increase of enrollment was the ability to conduct all welcome calls within the required sixty (60)-day timeframe.

Resolution: To meet this requirement, Humana utilized both temporary and permanent staffing. We also created a sophisticated autodialing service to effectively serve our enrollment volume. Moreover, we reached out to enrollees six (6) times as compared to the required three (3) times. Ultimately, Humana was able to conduct all welcome calls within the required timeframe.

j. Accomplishments and achievements:

Humana has attained some notable quality achievements in the MMA program. In 2016, we performed above the statewide average on the following HEDIS areas of care:
- pregnancy-related care
- keeping kids healthy
- keeping adults healthy
- living with illness

For the AHCA MMA Health Plan Report Card, these quality scores resulted in ratings of three 4-star ratings and one five (5)-star rating in each area of care. Only one other standard MMA plan received more four (4) and five (5) star ratings on the MMA Health Plan Report Card. Further, Humana's enrollee satisfaction with help received from customer service was rated higher than all other standard MMA plans for adult enrollees.

Another area of achievement is our success limiting preventable hospital readmissions. In 2016, we reached a sixteen percent (16%) readmission rate, a seven-percent improvement over the previous year. As one example of an initiative to reduce readmissions, for our most complex enrollees, we operate our Frequently Admitted Member (FAM) program. In FAM, our clinical teams use real-time data and analytics to identify enrollees with the most acute facility inpatient admissions during the most recent 3-month period. As a result, we have achieved a fifty percent (50%) reduction in readmission rates for enrollees targeted by this program in a twelve (12)-month period.

We are also particularly proud of our accomplishments in our Bold Goal community development programs. In Broward County, Tampa, and Jacksonville, Humana has implemented its Bold Goal program, in which we have launched Health Advisory Boards that bring dozens of local stakeholders together to improve the communities' nutrition, access to care, and health education. The Humana Foundation, a 501(c)(3) entity with a governing and grant-making body separate from Humana Inc. market leadership, has also contributed more than four million one hundred thousand dollars ($4,100,000) to Florida non-profit organizations since 2012.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
325,909 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

FLORIDA LONG-TERM CARE

a. The Medicaid population served (such as TANF, ABD, dual eligible):
ABD, dual eligible

b. The name and address of the client:
Agency for Health Care Administration, 2727 Mahan Drive, Tallahassee, Florida 32308

c. The name of the contract:
Florida Long-term Care

d. The specific start and end dates of the contract:
January 2014 – September 2018

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Florida Long-term Care program, Humana covers institutional and community-based long-term services and supports and transportation services for the ABD and dual eligible populations in all eleven (11) regions. Further, we provide care coordination, utilization management, network management, and enrollee and provider call centers to ensure enrollees receive the most appropriate services.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Florida LTC program, Humana uses various delegated subcontractors to cover non-emergency medical transportation. For expanded benefits, Humana uses subcontractors for non-medical transportation, vision services, and hearing services. For select services, Humana uses administrative subcontractors for claims processing, credentialing services, and network management. We select subcontractors with long-standing and significant experience in their fields. For instance, our vision services partner, iCare Health Solutions, has over three million enrollees in its networks. Humana ensures our subcontractors meet quality standards through continuous evaluation and oversight.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $757,356,420
2016 claims expense: $707,311,910

h. The scheduled and actual completion dates for contract implementation:
Scheduled: August 2013 to December 2013
Actual: August 2013 to March 2014

For the Florida LTC program, Humana successfully met all scheduled implementation deadlines.

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: To meet the needs of a relatively larger enrollment as compared to the NHD program, Humana needed to appropriately staff its care management operations.

Resolution: Humana developed a rapid hiring and training process to ensure we could effectively meet all of our enrollees' needs upon go-live. To do so, we developed an intensive six- (6) week training course for new care managers to guarantee they were capable of meeting all contract requirements and serving enrollees.

Barrier: Similarly, another barrier faced in implementing the Florida LTC program was the availability of qualified care management associates to meet contractual care coordinator eligibility requirements. Facing a large influx of new enrollees, there was a significant need for

Humana to hire additional care coordinators to provide ongoing care management services for enrollees.

Resolution: To alleviate this issue, Humana partnered with local area agencies on aging (AAA) for many care management functions. The AAAs were especially critical in providing continuity of care to waiver enrollees. In addition to alleviating a workforce shortage, the AAAs also provided historical expertise on the population, which further aided in better serving our membership. This partnership also allowed us to maintain and further develop existing enrollee relationships. Moreover, this approach allowed us to enhance, rather than supplant, local health care resources.

Barrier: For Comprehensive enrollees enrolled across both LTC and MMA, benefit integration between the two programs presented another implementation barrier. To provide holistic care across all benefits, Humana needed to develop systems that integrate information from both programs for care coordinators.

Resolution: Humana's current Comprehensive Plan has served as the catalyst for Humana to make significant investments in our integrated care delivery platform, CGX, which promotes enhanced care coordination for LTC eligible enrollees. CGX is a proprietary system that provides real-time coordination capabilities between primary and acute care, LTC, behavioral health, and a wide range of additional benefits and social supports categories. CGX gives clinical associates a 360-degree view of enrollees' clinical and social needs as well as the care being provided by MMA, LTC, and even the Medicare Advantage program for Duals enrolled across Humana's Medicaid and Medicare plans (including D-SNPs). This enhanced care coordination enables Humana to provide the most person-centered and individualized care plans possible. In our experience, effective clinical interventions are one of the keys to providing better health to enrollees and CGX has enabled our care management team to deliver essential integrated care. Humana supports integrated models because holding a single entity – as compared to multiple entities or bifurcating services across multiple programs – responsible for coordinating care can more likely improve health outcomes and enrollee experience while reducing avoidable costs. For these reasons, Humana is bidding as a Comprehensive Plan in all regions.

j. Accomplishments and achievements:

Humana is committed to helping LTC enrollees live in their setting of choice. For many enrollees, that means aging at home, rather than in an institution. Through extensive experience managing LTC services, we have developed evidence-based programs and processes to support enrollees with the services needed to stay in their homes and communities. For enrollees that are living in institutions with an interest and appropriate health status to move back to a community setting, we are proud of our accomplishments in coordinating their successful transitions. Most notably, Humana has helped more than one thousand seven hundred (1,700) Florida LTC enrollees transition from institutions to community settings since 2014.

We have also achieved notable success with our LTC performance measures. For the percentage of LTC plan enrollees who have documentation of a comprehensive health assessment within the appropriate time frame in 2016, Humana surpassed the benchmark of ninety (90) percent. Additionally, for the percentage of LTC plan enrollees who have

documentation of a comprehensive LTC care plan within the appropriate timeframe in 2016, Humana surpassed the benchmark of ninety percent (90%) with a score of ninety-five percent (95%).

Additionally, Humana performed above the AHCA's target benchmark rates for the following LTC quality measures in 2016:
- Advanced Care Planning - Total: 69.52% (AHCA target rate: 31.6%)
- Medication Review - Total: 98.84% (AHCA target rate: 80.9%)
- Functional Status Assessment - Total: 93.89% (AHCA target rate: 61.8%)
- Call Answer Timeliness: 97.75% (AHCA target rate: 81.50%)
- Required Record Documentation - Freedom of Choice Form: 90.71% (AHCA target rate: 90.0%)
- Face-to-Face Encounters (F2F) = 93.95% (AHCA target rate: 90.0%)
- Timeliness of Service (TOS) = 93.27% (AHCA target rate: 90.0%)

Our Florida SMMC program executive management team has extensive knowledge and experience both in health care generally and specifically in Florida Medicaid. Combined, our Florida leadership has one hundred thirty-three (133) years of experience serving LTC-eligible elderly and disabled populations. This experience is critical to managing health plans and improving the health outcomes of our enrollees.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
21,239 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

KENTUCKY MEDICAID MANAGED CARE

a. The Medicaid population served (such as TANF, ABD, dual eligible):
TANF, ABD, dual eligible

b. The name and address of the client:
Kentucky Department for Medicaid Services, 275 East Main Street, Frankfort, KY 40621

c. The name of the contract:
Kentucky Medicaid Managed Care

d. The specific start and end dates of the contract:
Origination: January 2013
Current contract period: July 2017 – December 2017, with optional contract renewals through 2020

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Kentucky Medicaid Managed Care program, Humana covers medical, behavioral, pharmacy, and dental services for the TANF, ABD, and dual eligible Medicaid populations on a statewide basis. We also offer care coordination, disease management programs, and utilization

management to help our enrollees manage conditions and receive appropriate care. Humana also manages the provider network for this program.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Kentucky Medicaid Managed Care program, Humana delegates behavioral services and management, dental services, vision services, medical management, case management, utilization management, claims processing, and enrollee and provider call centers.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
Fiscal Year 2016 revenue: $795,085,463
Fiscal Year 2016 claims expense: $674,825,083

h. The scheduled and actual completion dates for contract implementation:
Scheduled: June 2012 to January 2013
Actual: June 2012 to January 2013

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:
Barrier: Upon receiving the contract initial award, Humana had a timeframe of only six (6) months to implement all contract requirements before enrollment began. Moreover, as Humana expanded its contract from the Louisville metropolitan region to the entire state, we experienced a more than one hundred percent (100%) enrollment increase.

Resolution: To ensure all contract requirements were met effectively and comprehensively, Humana developed an implementation command center. We focused resources to guarantee all issues were rapidly resolved. Humana developed an internal information sharing repository to house all communication surrounding contract implementation activities. Ahead of enrollment, Humana conducted numerous cross-functional tests to limit any problems thereafter. Further, to handle the large increase in enrollment, Humana took the lessons of its original, rapid contract implementation to establish a long-term, methodical process.

Barrier: With the implementation of the new managed care program, Humana identified enrollee engagement and education regarding the benefits of their new plan as an important barrier to address.

Resolution: To ensure all enrollees received effective program education, Humana took a multi-pronged approach. In addition to traditional welcome calls and welcome kits, we understood one of the most effective ways to reach enrollees was in their communities. Humana participated in copious community events, such as fairs and festivals, to reach our enrollees close to their homes. In August 2016 alone, Humana participated in over four hundred 400 public events.

j. Accomplishments and achievements:

Non-emergent use of the emergency room is a notable problem in the Kentucky Medicaid managed care program. As a result, Humana has increased its focus on addressing this matter. From 2014 to 2016, Humana’s quality initiatives on this issue led to a nearly fifteen (15) percent decrease in non-emergency use of the emergency. Moreover, Humana plans to launch a pilot focused on communication with the homeless of how to most appropriately access care.

Humana and Beacon Health Options played a major role in the rollout of a substance se Medicaid service continuum across the state by partnering with several new substance use provider types. Humana was one of the first health plans to successfully contract the bulk of Suboxone providers in Kentucky, and continues to assist providers with innovative treatment programing, such as the use of partial hospital and intensive outpatient programs in conjunction with inpatient residential services.

NCQA completed the annual review of HEDIS® data for 2017 as outlined in the 2017 Standards and Guidelines for the Accreditation of Health Plans. Based on our HEDIS 2017 results, the accreditation status for Humana Health Plan, Inc. (Kentucky)'s Medicaid HMO increased to Commendable.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
145,088 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

VIRGINIA COMMONWEALTH COORDINATED CARE

a. The Medicaid population served (such as TANF, ABD, dual eligible):
ABD, dual eligible

b. The name and address of the client:
Virginia Department of Medical Assistance Services (DMAS), 600 East Broad Street, Richmond, VA 23219

Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244

c. The name of the contract:
Virginia Commonwealth Coordinated Care

d. The specific start and end dates of the contract:
April 2014 – December 2017

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Virginia Commonwealth Coordinated Care program (CCC), Humana covers medical, behavioral, pharmacy, LTSS, and transportation services across Medicare and Medicaid for the ABD and dual eligible populations in all regions. To help our enrollees manage conditions and receive appropriate care, we offer care coordination, utilization management, disease management programs, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Virginia CCC program, Humana partners with delegated subcontractors for behavioral health services and management, vision services, non-emergency medical transportation, and LTSS transition services and care management.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $97,712,326
2016 claims expense: $87,428,433

h. The scheduled and actual completion dates for contract implementation:
Scheduled: March to November 2014
Actual: March to November 2014

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: One of the primary issues with a new managed care program is lack of enrollee and provider education. This is particularly true for demonstration programs such as this. As a result, the Virginia CCC program initially experienced high opt-out rates.

Resolution: To address this issue with providers, we conducted ongoing educational meetings to understand the benefits of the program and how to handle administrative changes (e.g., billing). We also learned that conducting educational meetings early and often with community-based organizations prior to program implementation was necessary. Prior to the CCC program, many organizations still operated on a fee-for-service (FFS) basis, had limited exposure to managed care programs, or were unaware of the dynamics of managed care. During program implementation, we helped educate these groups on the benefits of the program, how they could best support the program goals, and their reporting needs. We made it clear how highly we value their continued relationships with enrollees. Many were concerned the CCC program and the advent of the care coordination role would replace the need for their role. To alleviate these concerns, we met with them personally to propose how we planned to collaborate, gain their feedback, and include them in the model of care (MOC). Additionally, given the unique education needs of the program, we also provided education on more tangible items, such as coordination of benefits and enrollee identification cards.

Our existing processes help us consistently review implementation progress and adapt early to any identified needs and any gaps. Through our experience, we have finely tuned many areas of our implementation plan, such as:
- Program management structure organized across functional areas
- A structured playbook that outlines our implementation process, deliverables, roles and responsibilities
- Command Center structure for go-live to quickly react to production issues
- Continued commitment to remain aligned with the Department of Medical Assistance Services to best meet their objectives through our existing relationship
- To further streamline and simplify the LTSS implementation process, Humana recently invested more than $9,000,000 in a new LTSS integrated care management platform

Barrier: Access to health care and social support services varies across Virginia's regions. For example, the Southwest Region in the Appalachian Mountains is less populated and particularly

underserved. Ensuring access to care in regions like these was an important implementation barrier to address for the Virginia CCC program.

Resolution: To overcome these barriers, we used mobile health clinics and telehealth capabilities to try to reach enrollees in geographies with limited access to care, and worked to leverage our community relationships across the state to refer to community-based social supports that play a role in preventing the need for utilization of some of these services.

Barrier: Some nursing facility enrollees were previously receiving services from unaffiliated providers without Medicaid credentials. Upon implementation of the CCC program, these enrollees had difficulty receiving care within the facility.

Resolution: To overcome this misalignment, Humana worked to ensure the unaffiliated providers became credentialed for facilities in which they had patients. Humana worked closely with these facilities and providers to resolve any administrative burdens preventing alignment. This process guaranteed enrollees could retain their providers and receive care within their facility.

j. Accomplishments and achievements:

Humana has achieved some notable quality results in the CCC program. In an evaluation of Humana's first year performance, we had an overall score of 90.28%. Specifically, we scored over 90% in 9 of the 14 standards. In 2015, enrollees of Humana's CCC program provided strong, positive reactions to their care coordinator (CC) relationships:
- 90% responded "the CC understands what is important to me"
- 97% responded they received satisfaction with support and help from the CC
- 97% responded the CC helped them learn to better care for themselves
- 93% responded the CC helped form a plan and followed up
- 83% responded they would likely recommend care management services

89.4% of enrollees rated the help received from the CC was excellent, very good, or good; further, more than eighty percent (80%) indicated they have better control of their health since working with their CC.

Humana has achieved a strong adoption of value-based payment models among primary and acute providers. With focused investment in provider development to build infrastructure and capabilities that support these engagements, Humana now has more than 1,500 Virginia providers under VBP arrangements and approximately 80% of our CCC primary and acute care payments going to these providers.

As the CCC program rolled out, we noticed there were issues with process for transferring enrollees from one MCO to another. Specifically, the authorization transfer process lacked critical information elements to smoothly conduct this process. Humana noted these information gaps and submitted a revised form to DMAS to use for this process. Ultimately, DMAS selected Humana's revised form as the new template for the authorization transfer process.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
8,621 Medicaid-Medicare enrollees

l. Whether the contract was capitated, FFS or other payment method:

ILLINOIS MEDICARE-MEDICAID ALIGNMENT INITIATIVE

a. The Medicaid population served (such as TANF, ABD, dual eligible):
ABD, dual eligible

b. The name and address of the client:
Illinois Department of Healthcare and Family Services (DHFS), 201 South Grand Avenue E, Springfield, IL 62704

Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244

c. The name of the contract:
Illinois Medicare-Medicaid Alignment Initiative

d. The specific start and end dates of the contract:
March 2014 – December 2017 (renewals through December 2019)

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Illinois Medicare-Medicaid Alignment Initiative (MMAI), Humana covers medical, behavioral, pharmacy, LTSS, and transportation services across Medicare and Medicaid for the ABD and dual eligible populations in the Greater Chicago area. To help enrollees manage conditions and receive the most appropriate care, we offer care coordination, disease management programs, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Illinois MMAI program, Humana uses delegated subcontractors for behavioral health services and management, dental services, vision services, non-emergency medical transportation services, and LTSS care coordination and claims processing.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $161,877,647
2016 claims expense: $140,921,786

h. The scheduled and actual completion dates for contract implementation:
Scheduled: December 2013 to June 2014
Actual: December 2013 to June 2014

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: Through the MMAI program, we noticed there was a strong need to conduct provider engagement and education early and often in new managed care programs.

Resolution: We connected with providers before MMAI was implemented to educate on what it is, how it works, the benefits of participating, and how it positively impacts the health of those they serve. Humana gave providers opportunities to ask questions and voice their concerns, and we were responsive to their needs. Forums were also available to community-based organizations to ensure all parties effectively engage in and support the program's enrollees. Additionally, Humana conducted face-to-face sessions with providers who needed further assistance. A specific example was our successful partnership with the AIDS Foundation of Illinois. Through this unique partnership we developed a 'Medicaid Managed Care Training Program' focused on educating case managers who work directly with enrollees in their homes or in the field. These training sessions bridged gaps in communication, increased the understanding of the managed care program, and increased access to care for the hard-to-reach population. Participants were supplied with a 'Medicaid Guide' brochure and a Resource Guide which contained valuable forms and information for all participating health plans.

Barrier: Another barrier Humana experienced in the Illinois MMAI program was unable-to-contact (UTC) enrollees.

Resolution: In the dual eligible population, the UTC problem is particularly problematic as these enrollees often have a higher risk acuity. To help alleviate this issue, we worked closely with DHFS, community organizations, and our care model partners to ensure we received all available contact information on enrollees. Our call center also alerted care managers when a UTC enrollee called. Humana employed a feet-on-the-street approach to more actively find enrollees. For instance, we visited community-based partners, such as homeless shelters, in an attempt to find enrollees in locations where they might be.

j. Accomplishments and achievements:

For the Illinois MMAI program, Humana's 2017 HEDIS scores are in the top fifth (5th) percentile relative to national benchmarks for all measures. For example, below are select screening rates for our MMAI enrollees:
- Diabetes A1c testing: 87%
- Diabetes Nephrology testing: 91%
- Adult BMI assessment: 92%

Humana partnered with Thresholds, a community mental health center provider in Cook and Kankakee counties in Illinois, to provide wraparound services to enrollees identified as having a severe mental health diagnosis and who have also been identified as being high utilizers of inpatient services to manage their healthcare. The goal of the program is to connect these vulnerable enrollees to resources within their community. These resources include emergency housing, food pantries, counseling services, psychiatric services, substance abuse programs, vocational rehabilitation programs, long-term housing, primary care services, safe housing for victims of domestic violence, and medication management. Enrollees who have been involved for six (6) months have seen a sixty-four percent (64%) decrease in inpatient utilization.

Humana also noticed issues related to language translation services with this program's population. Specifically, our care coordinators realized telephonic translation services weren't

always an effective means of communication, especially as it related to overcoming cultural barriers. As a result, we identified and contracted with a local and certified community agency that provides culturally appropriate in-home translation services between the enrollees, Humana care coordinators, and case managers. This helped to build trust between enrollees and case managers and increase the success rate of care assessments and screenings.

We have also sought to improve problems related to food deserts and food insecurity in our service areas through a health and nutrition program. Specifically, Humana identifies communities with a high concentration of individuals experiencing food disparities. We provide education on the functionality of various grains, produce, meat, and dairy products and nutrition label interpretation. Additionally, our program demonstrates the cooking of various food products. Finally, our associates help enrollees through a "grocery store shopping challenge" (meal planning for under ten dollars ($10.00)) by showing how to find ingredients to cook the most nutritional meals on a small budget.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
6,355 Medicaid-Medicare enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

ILLINOIS INTEGRATED CARE PROGRAM

a. The Medicaid population served (such as TANF, ABD, dual eligible):
ABD

b. The name and address of the client:

Illinois Department of Healthcare and Family Services (DHFS), 201 South Grand Avenue E, Springfield, IL 62704

c. The name of the contract:
Illinois Integrated Care Program

d. The specific start and end dates of the contract:
February 2014 – January 2018

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Illinois Integrated Care Program (ICP), Humana covers medical, behavioral, pharmacy, dental, LTSS, and transportation services for the TANF, ABD, and dual eligible populations in the Greater Chicago area. To help our enrollees manage conditions and receive appropriate care, we offer care coordination, disease management programs, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For Illinois ICP, Humana uses delegated subcontractors for behavioral health services and management, dental services, vision services, non-emergency medical transportation services, and LTSS care coordination and claims processing.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $97,712,326
2016 claims expense: $87,428,433

h. The scheduled and actual completion dates for contract implementation:
Scheduled: February to May 2014
Actual: February to May 2014

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: During implementation of Illinois ICP, health plans were not receiving proper documentation of new enrollees' transition from existing care plans. As a result, authorization for services could not be provided until after an initial visit with the enrollee, which could be up to 90 days from the enrollee's effective date.

Resolution: To overcome this barrier, Humana obtained access to the Department on Aging and Department of Rehabilitation Services Systems to proactively verify enrollees' care plans. Providers were encouraged to request authorization at the time the enrollee became effective with the new health plan. When an authorization was requested, Humana could now verify services through the State and create shell service plans with provider authorizations pending the initial enrollee assessment. This process significantly reduced denied claims, complaints from providers, and the need to reprocess claims once the initial assessment was completed.

Barrier: Similarly, Humana experienced issues educating enrollees about the new program.

Resolution: In addition to providing enrollees with a welcome kit and handbook, we also conducted program education seminars in the community. For instance, we held these sessions at local community and faith centers. These events were aimed at gathering enrollees within their neighborhoods and communities to better educate them on how the program works and its benefits.

j. Accomplishments and achievements:

Throughout this program, Humana made significant strides in improving encounter data reporting. Specifically, we formed a specialized Encounter Submission Team that collaborated with the Department of Healthcare and Family Services and other ICP MCOs to find innovative solutions to this issue. As a result, Humana increased its encounter acceptance rate from 43.5% in Q3 2014 to 90.8% in Q2 2016.

To more proactively address complications related to homelessness, Humana worked to increase communication between shelters, health care facilities, and health plans about how to place homeless enrollees within shelters. Additionally, Humana is working with local housing agencies in an attempt to increase the availability of affordable housing.

To further address issues associated with homelessness in our service area, Humana had its associates volunteer to fill one thousand (1,000) lunch bags and also distributed snack packs to local community agency partners. For our volunteerism, Humana received the 2016 CASA Central Community Builder Award, which is presented to a company who has distinguished themselves as a close partner who has consistently engaged in volunteer efforts, special events, educational programs, and in-kind donations.

For the Illinois ICP, Humana's HEDIS scores are in the top fifth (5th) percentile compared to national benchmarks in all measures. For instance, below are select screening rates our ICP enrollees:
- Diabetes A1c testing: 85%
- Diabetes Nephrology testing: 93%
- Adult BMI assessment: 88%

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
5,626 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

MEDICARE ADVANTAGE

a. The Medicaid population served (such as TANF, ABD, dual eligible):
ABD, dual eligible

b. The name and address of the client:
Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244

c. The name of the contract:
Medicare Advantage

d. The specific start and end dates of the contract:

February 1986 – present. Humana's first MA contract began in February 1986. Since then, we have obtained and operated numerous MA contracts with varying durations and renewal periods on a continual basis.

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

In Humana's Medicare Advantage plans, we cover medical, behavioral, pharmacy, and transportation services for the ABD and dual eligible populations on a nationwide basis. To help our enrollees manage conditions and receive appropriate care, we offer care coordination, disease management programs, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For its MA plans, Humana uses delegated subcontractors for telemedicine services, 24/7 nurse advice line services, claims processing, and credentialing services.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $35,247,406,498
2016 claims expense: $28,146,219,949

h. The scheduled and actual completion dates for contract implementation:
Scheduled: February 1986
Actual: February 1986

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: When Humana associates interacted with our enrollees through experiences such as an in-home visits or phone calls, they weren't able to see important enrollee milestones and key interactions that have occurred or will occur with other departments across the Humana organization. This limited view hampered their ability to provide complete, personalized, and connected support. It also limited their ability to go above and beyond to help the enrollee with potential best next decision.

Resolution: To resolve this issue, Humana launched its Customer Relationship Management (CRM) Service to associates across the organization. This service provides a single, consistent view of our enrollees and their interactions with Humana in order to deliver a more informed and valuable experience. Our associates are now better enabled to help enrollees get the specific care and support they need through a consistent experience across their health journey. CRM and its parallel platforms, Consumer360 and CRM Marketing, can help deliver targeted and personalized messaging based on enrollee preferences, health needs, and recent life events.

Barrier: A general challenge frequently faced with MA plans is coordinating with other types of insurance, specifically Medicaid. For instance, there is a need for comprehensive, integrated data spanning enrollees' Medicare and Medicaid benefits and services.

Resolution: To resolve this matter, Humana has invested significant time and resources toward building a fully integrated, all-internal care management IT platform – Clinical Guidance eXchange (CGX) – that provides a 360-degree view across an enrollee's full spectrum of care, including medical, behavioral health, LTSS, and social services. Another issue MA plans can face in coordinating with Medicaid is identifying enrollees' primary care provider (PCP) of record when the PCP is not in a Humana program (enrollee is in an unaligned plan or FFS Medicare). Humana care coordinators work diligently with enrollees and their points of care to identify the appropriate PCP and incentivize the PCP to join the enrollee's care team and Humana's provider network. Additionally, ensuring appropriate provider payment can present a challenge in coordinating across MA and Medicaid. Humana establishes detailed, effective coordination of benefits policies and procedures to ensure providers are paid properly and timely.

j. Accomplishments and achievements:

Humana's leadership in quality improvement is evident in many associated accomplishments and achievements for our MA plans. For example, we were the first publicly-traded health plan

to achieve a full 5-Star rating from CMS. In the recently-published 2018 ratings, all Humana MA HMO membership in Florida received a 4.5-star rating. Other notable accomplishments from the most recent ratings include:
- 2,400,000 Humana MA enrollees are in contracts with ratings for 4 stars or greater
- Humana received a 4.5-star rating for five Medicare Advantage contracts offered in 8 states
- For Humana Medical Plan, Inc.'s Florida MA contract (CMS number H1036), we have achieved a CMS Rating of 4.5. Further, this plan has an NCQA status of Commendable.

Overall, this contract has more than 456,000 enrollees; in Florida specifically, this contract has nearly 365,000 enrollees.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
3,263,400 Medicare enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

DUAL ELIGIBLE SPECIAL NEEDS PLAN

a. The Medicaid population served (such as TANF, ABD, dual eligible):
Dual eligible

b. The name and address of the client:
Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244

c. The name of the contract:
Dual Eligible Special Needs Plans

d. The specific start and end dates of the contract:

January 2006 – present. Humana's first D-SNP contract began in January 2006. Since then, we have obtained and operated numerous MA contracts with varying durations and renewal periods on a continual basis.

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

In Humana's Dual Eligible Special Needs Plans, we cover medical, behavioral, pharmacy, and transportation services across Medicare and Medicaid for the dual eligible population in 22 states and Puerto Rico. To help our enrollees manage conditions and receive appropriate care, we offer care coordination, disease management programs, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For its D-SNP programs, Humana uses delegated subcontractors for telemedicine services, 24/7 nurse advice line services, claims processing, and credentialing services.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2016 revenue: $2,762,606,316
2016 claims expense: $2,152,521,416

h. The scheduled and actual completion dates for contract implementation:
Scheduled: January 2006
Actual: January 2006

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: Upon implementation of the D-SNP program, customer service representatives and providers were unfamiliar with cost sharing and benefits. Customer Service at times misquoted the enrollee responsibility for medical cost-sharing for D-SNPs and providers were erroneously billing D-SNP enrollees for cost shares for medical services.

Resolution: To address the matter, Humana took the following approaches:

- Overhauled training and source documentation for Customer Service

- Added alerts that display to a customer service representatives when they take a call for a D-SNP enrollee that reminds them of a D-SNP enrollee's protection from cost-sharing for medical services

- Added more specific information to the provider training on cost share protection

- Added information to the enrollee materials (Evidence of Coverage, Acknowledgement of Enrollment Letter, Welcome Packet) that asks the enrollee to display their Medicaid ID card along with their Humana D-SNP ID Card to ensure the provider and their front office associates know they are serving a cost-share protected enrollee

Barrier: Humana had a state-specific automated crossover claims process whereby the provider was taken out of the middle of having to bill two entities – Humana and the state – for a single service rendered. Initially, we experienced challenges with national provider identifier (NPI) data matching between Humana systems and the state database. This NPI "mismatch" created a backlog of pended/incorrect/unidentifiable claims for our state partner and created provider complaints, as some weren't receiving their "secondary" payment.

Resolution: Humana implemented a new process to eliminate the NPI "mismatch" proactively by utilizing a provider data report the state published monthly and by developing a program using comparison logic to identify and eliminate the mismatch. This remediation effort included a provider outreach campaign to help educate providers of the importance of keeping their state and Humana registration information up-to-date.

Barrier: Additionally, D-SNP enrollees were losing and gaining eligibility frequently, causing enrollees to be dis-enrolled frequently and then be re-enrolled in the plan when they regained eligibility soon thereafter. Continual changes in eligibility presented negative impacts on continuity of care.

Resolution: To resolve the issue, Humana changed its policy to move from the minimum deeming period allotment of one (1) month to the maximum CMS allowed grace period of six (6) months. This allows those enrollees that are frequently losing and then regaining their qualifying level of Medicaid status, to remain on the plan and receive consistent care management.

j. Accomplishments and achievements:

For Humana's Florida D-SNP contract (H1036), we have achieved a Medicare Stars Rating of 4.5. Additionally, this plan's NCQA status is Commendable.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
190,992 Medicare (dual-eligible) enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

FLORIDA MEDICAID HMO

a. The Medicaid population served (such as TANF, ABD, dual eligible):
TANF, ABD, dual eligible

b. The name and address of the client:
Agency for Health Care Administration, 2727 Mahan Drive, Tallahassee, Florida 32308

c. The name of the contract:
Florida Medicaid HMO

d. The specific start and end dates of the contract:
Origination: 1997
Last Contract Period: September 2012 – December 2013

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Florida Medicaid HMO program, Humana covered medical, behavioral, pharmacy, and dental services for the TANF, ABD, and dual eligible populations in Broward, Dade, Hillsborough, Pinellas, and Pasco Counties. To help our enrollees manage conditions and receive appropriate care, we offered care coordination, disease management programs, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Florida Medicaid HMO program, Humana used delegated subcontractors for utilization management, behavioral health services and management, dental services, non-emergency medical transportation, and vision services. We selected subcontractors with strong performance metrics and positive reputations. Humana ensured our subcontractors met quality standards through continuous evaluation and oversight.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
Contract revenue: approximately $161,000,000
Contract claims expense: approximately $143,000,000

h. The scheduled and actual completion dates for contract implementation:

Scheduled:
- Origination: 1997
- Last Contract Period: September 2012

Actual:
- Origination: 1997
- Last Contract Period: September 2012

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: Prior to the introduction of managed care in the state of Florida, the majority of enrollees had never been in a managed care program and were thus unaccustomed to these changes.

Resolution: As a result, some enrollees experienced confusion surrounding benefit changes and their relationship with Humana. To address these matters, Humana worked closely with enrollees ensure they received comprehensive information about their plan benefits and how to access care.

Barrier: Similarly, many providers were unaccustomed to managed care. Some providers seemed frustrated with programmatic changes and had difficulty adjusting to the new program.

Resolution: To resolve these issues, Humana ensured providers received education – both remotely and in-person – on items such as prior authorization and claims submission and on the broader goals and potential of managed care.

j. Accomplishments and achievements:

In the Florida Medicaid HMO program, Humana was Florida's top NCQA quality-rated Medicaid health plan from 2011 to 2013. Specifically, Humana achieved an NCQA accreditation status of Commendable and was rated the number one Medicaid plan in Florida by NCQA and number 50 in the nation based on HEDIS, CAHPS, and accreditation scores. Additionally, Humana scored 95.8 percent on the 2012 ACHA On-Site Survey and Comprehensive Desk Review Complied, with 100% of ACHA contract deliverables.

To further drive quality performance in the Florida Medicaid HMO program, Humana created an Advisory Panel and ER Overutilization Task Force to identify best practices including: real-time data sharing with hospitals allowing early enrollee intervention; improve communication; targeting PCP practices with high ER utilization and encouraging them to extend office hours, improve enrollee accessibility, and engage around best practices.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
50,438 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

FLORIDA NURSING HOME DIVERSION

a. The Medicaid population served (such as TANF, ABD, dual eligible):
ABD, dual eligible

b. The name and address of the client:
Florida Department of Elder Affairs, 4040 Esplanade Way, Tallahassee, Florida 32399

c. The name of the contract:
Florida Nursing Home Diversion

d. The specific start and end dates of the contract:
March 2007 – February 2014

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Florida Nursing Home Diversion program, Humana covered long-term services and supports for the ABD and dual eligible populations on a statewide basis. To ensure enrollees received the most appropriate services, we offered care coordination, utilization management, network management, and enrollee and provider call centers.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Florida NHD program, Humana delegated subcontractors for non-emergency medical transportation. We selected subcontractors with strong performance metrics and positive reputations. Humana ensured our subcontractors met quality standards through continuous evaluation and oversight.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
Contract revenue: $23,342,071
Contract claims expense: $17,662,742

h. The scheduled and actual completion dates for contract implementation:
Scheduled: March 2007
Actual: March 2007

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: Prior to the introduction of managed care in the state of Florida, the majority of enrollees had never been in a coordinated care program. Because were unaccustomed to managed care plans, they needed education to understand their benefits, the clinical programs available, and more.

Resolution: As a result, some enrollees experienced confusion surrounding benefit changes and their relationship with Humana. To address these matters, Humana worked closely with enrollees ensure they received comprehensive information about their plan benefits and how to access care.

Barrier: Similarly, many providers were unaccustomed to managed care. Some providers seemed frustrated with programmatic changes and had difficulty adjusting to the new program.

Resolution: To resolve these issues, Humana ensured providers received education – both remotely and in-person – on items such as prior authorization and claims submission and on the broader goals and potential of managed care.

j. Accomplishments and achievements:

As an NHD plan, Humana developed six (6) years of experience in Florida helping the frail dual eligible population remain in the community and stay out of nursing facilities. By providing our enrollees with home and community-based services (HCBS), including intensive case management, we have been able to reduce their Medicare costs. Humana's NHD plan consistently received high satisfaction evaluations from enrollees. For four (4) consecutive annual enrollee satisfaction surveys, more than 86% of our enrollees ranked the plan 8 through 10 on a scale of 1 through 10 with 10 being the highest ranking

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
1,669 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

PUERTO RICO MI SALUD

a. The Medicaid population served (such as TANF, ABD, dual eligible):
TANF, ABD, dual eligible

b. The name and address of the client:
Departamento de Salud, Centro Médico Norte Calle Periferial Interior, Bo. Monacillos Rio Piedras, San Juan, Puerto Rico

c. The name of the contract:
Puerto Rico Mi Salud

d. The specific start and end dates of the contract:
December 1995 – June 2014

e. A brief narrative describing the role of the respondent and scope of the work performed, including covered populations and covered services:

For the Puerto Rico Mi Salud program, Humana covered medical, pharmacy, dental, and transportation services for the TANF, ABD, and dual eligible populations in the state on a

territory-wide basis. To help our enrollees manage conditions and receive appropriate care, we offer care coordination, disease management programs, and utilization management.

f. The use of administrative and/or delegated subcontractor(s) and their scope of work:

For the Puerto Rico Mi Salud program, Humana used a delegated subcontractor for dental services.

g. The annual contract amount (payment to the respondent) and annual claims payment amount:
2012 revenue $812,286,892
2012 claims expense: $775,052,363

h. The scheduled and actual completion dates for contract implementation:
Scheduled: December 1995
Actual: December 1995

i. The barriers encountered that hindered implementation (if applicable) and the resolutions:

Barrier: In 2010, Humana expanded into Puerto Rico's Southwest region, the transition of care information for new enrollees we received from other MCOs was often incomplete, making it difficult to effectively meet continuity of care requirements.

Resolution: In order to ensure access and continuity of care for the new enrollees, Humana established partnerships with all PCPs, independent provider associations, and the territorial government to collaborate in the exchange of enrollee information. Humana built databases and diagnoses registries based on information provided by each individual PCP. Such partnerships helped us in establishing a starting point to make sure all enrollees had access to the benefits they required in a seamless transition upon their enrollment with Humana.

j. Accomplishments and achievements:

Since 1999, Humana was in full compliance with NCQA Certified external audit requirements. Auditors are in charge of performing a full NCQA/HEDIS Compliance Audit of the HEDIS reporting measures. Every audit report has confirmed that Humana Performance Reports have been prepared according to the corresponding HEDIS Specifications and standard procedures. The aforementioned audit reports indicated that improvements have been observed in many types of care: i.e., prevention, acute care and treatment of chronic illness.

Humana launched the PulmonesSanos program in 2007, targeting beneficiaries with severe stratification in respiratory health. The program integrated a comprehensive clinical evaluation, self-assessments utilizing the evidenced based Asthma Control Test (ACT), medication optimization, as well as continued telephonic follow-up based on risk. This model differs from the traditional disease management model since Humana had the pulmonologist directly assessing health risks and respiratory health of participating beneficiaries and Humana assuming the financial risk for these specialists as well as for the prescriptions they prescribe for participants. The program resulted in a reduction in ER visits and admissions and improved ACT scores.

k. Number of enrollees, by health plan type (e.g., commercial, Medicare, Medicaid):
532,588 Medicaid enrollees

l. Whether the contract was capitated, FFS or other payment method:
Capitated

Evaluation Criteria:

1. The extent of the respondent's experience with providing integrated medical and behavioral health services.

2. The extent of the respondent's subcontractors' experience in coordinating or providing services to Medicaid recipients.

3. The extent to which the barriers to implementation experienced by the respondent have clear resolutions outlined.

4. The extent to which the respondent has listed accomplishments and achievements that are relevant to this solicitation.

5. The extent to which the respondent's Medicaid populations served are similar to the populations served by the SMMC program.

Score: This section is worth a maximum of 25 raw points with each of the above components being worth a maximum of 5 points each.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

SRC# 2 – Florida Experience (Regional):

The respondent shall provide documentation of the extent to which it has experience operating as a Florida Medicaid health plan in the region in which it plans to provide services or in any other region in the State of Florida. If applicable, the respondent shall provide the Agency Contract number and the regions of operation to show it has experience providing managed care services and/or LTC services in Florida. The respondent shall provide documentation of any Medicare Advantage Plan contracts for counties in the State of Florida.

Response:

FLORIDA REGION 1 PRESENCE

In Region 1 of Florida's Statewide Medicaid Managed Care (SMMC) program, Humana has a:
- Comprehensive SMMC contract (FP023), and
- Medicare Advantage (MA) contract (Centers for Medicare and Medicaid Services (CMS) contract number H1036).

Attachment 2-1, the CMS 2017 Contract Management Report, provides documentation for Humana's MA contract number H1036 in Region 1.

FLORIDA STATEWIDE PRESENCE

Humana's SMMC contract includes all eleven (11) regions. We have a Comprehensive Long-Term Care (LTC) plan in Regions 1, 6, 9, 10, and 11. Similarly, we have an LTC plan in Regions 2, 3, 4, 5, 7, and 8.

Humana's MA contract (H1036) covers counties in all eleven (11) SMMC Regions. Additionally, Humana operates an MA Dual-Eligible Special Needs Plan (D-SNP) contract (H1036) in Region 1 and every other SMMC region.

Evaluation Criteria:

For the Managed Care Plan that is proposing to provide services under this solicitation, whether the respondent has:

- An existing SMMC Contract in that region;
- An existing SMMC Contract in another region in the State of Florida; or
- A Medicare Advantage Plan contract in that region.

Score: This section is worth a maximum of 30 raw points as outlined below.

1. 20 points if the respondent already has an SMMC Contract in the region that it plans to provide services (MMA, LTC and/or Specialty).

2. 10 points if the respondent has an SMMC Contract in other regions in the State.

3. 5 additional points will be awarded if the respondent has a comprehensive (MMA & LTC) SMMC Contract in the region that it plans to provide Medicaid services.

4. 5 additional points will be awarded if the plan has a Medicare Advantage Plan in the region that it plans to provide services.

5. 0 points will be awarded if the plan does not have an SMMC Contract in Florida or a Medicare Advantage Plan contract in the region.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 3 – Statutorily Required Florida Presence (Statewide):

The respondent shall provide information regarding whether each operational function, as defined in Section 409.966(3)(c)3, Florida Statutes, will be based in the State of Florida, and the extent to which operational functions will be conducted by staff in-house or through contracted arrangements, located in the State of Florida. This includes:

a. Specifying the location of where the respondent's corporate headquarters will be located (as defined by Section 409.966(3)(c)3, Florida Statutes);

b. Indicating whether the respondent is a subsidiary of, or a joint venture with, any other entity whose principal office will not be located in the State of Florida; and

c. Identifying the number of full-time staff, by operational function (as defined in Section 409.966(3)(c)3, Florida Statutes), that will be located in the State of Florida and out of state.

Note: Pursuant to Section 409.966(3)(c)6., Florida Statutes, response to this submission requirement will be considered for negotiations.

Response:

Humana's Florida operations are deeply embedded into communities across the State, employing more than ten thousand (10,000) associates throughout our Florida offices. Our current participation in the Florida Medicaid Managed Medical Assistance (MMA) and Long-term Care (LTC) programs has led to a strong foundation of existing operational infrastructure. Since 1997, Humana has provided exceptional care and support to our Florida Medicaid enrollees. Our operational functions align with our staffing plan to ensure all services meet or exceed the Agency's and enrollees' expectations. Humana's Florida-based leadership and associates have built a strong relationship with the Agency and we will continue to work together to carry out our shared mission of improving the health and well-being of Florida Medicaid recipients.

==========
a. Specifying the location of where the respondent's corporate headquarters will be located (as defined by Section 409.966(3)(c)3, Florida Statutes);
==========

Incorporated in Florida in 1986, Humana Medical Plan, Inc. (HMP) headquarters is located at 3501 SW 160th Avenue, Miramar, Florida, 33027. HMP continues to operate as a licensed Health Maintenance Organization (HMO) in the State of Florida today.

==========
b. Indicating whether the respondent is a subsidiary of, or a joint venture with, any other entity whose principal office will not be located in the state of Florida
==========

As a legal entity established more than thirty (30) years ago, Humana Medical Plan, Inc. (HMP) has drawn upon the experience and resources of its parent company, Humana Inc., and

affiliates to support its delivery of accessible and timely care to enrollees. Humana's integrated organizational model allows for our principal corporate office to be located outside Florida while still allowing us to deliver highly localized care and support in Florida. Our principal corporate office is located at 500 West Main Street, Louisville, Kentucky, 40202.

==========

c. Identifying the number of full-time staff, by operational function (as defined in Section 409.966(3)(c)3, Florida Statutes), that will be located in the State of Florida and out of state.

==========

Humana's operational functions staffing plan was built recognizing the value of having in-state personnel supplemented by an infrastructure of shared services support. In-state associates primarily address the most critical elements of care and support delivery. For example, four hundred and ninety-nine (499) out of five hundred and one (501) case managers reside in Florida, a ninety-nine (99) percent in-state ratio. Out-of-state shared services associates enables Humana to handle peak volumes or seasonal variances without interruption to in-state services, agencies, or enrollees. In addition, out-of-state shared services associates provide necessary back-up in the event of a natural disaster or other outage with in-state functional operations. For instance, Humana can quickly shift Customer Care operational functions to a backup site. By shifting certain operational functions out-of-state during a disaster, Humana ensures business continuity and support for our plan enrollees, as well as Humana personnel. For example, during Hurricane Irma, we shifted our inbound Customer Care functions away from our Florida associates to unaffected locations until normal business service could be resumed. This ensured our enrollees could personally connect with us for current plan information and any related concerns regarding disaster relief.

Humana employs nine hundred and fifty-nine (959) full-time, Florida-based associates to perform our Medicaid operational functions as defined in Section 409.966(3)(c)3, Florida Statutes. Our full-time, Florida-based associates account for seventy-five percent (75%) of the total workforce attributed to the Medicaid operational functions outlined. The remaining twenty-five (25) percent are Humana associates located outside the State of Florida. All operational functions provided outside of Florida are accountable to Florida leadership, governance, and executive management escalation processes.

Humana performs the vast majority of our operational functions in-house, while delegating a small portion to specific subcontractors, primarily behavioral health and transportation, to perform relevant functions (e.g. claims processing). Oversight and monitoring procedures are conducted by Humana associates located in and outside the State of Florida to effectively manage the subcontractors performing these operational functions.

FULL-TIME ASSOCIATES BY OPERATIONAL FUNCTION

The operational functions (as defined in Section 409.966(3)(c)3) performed by existing full-time, Florida-based associates and existing, full-time associates outside of Florida is provided below and in Attachment 3-1.

Claims Processing:

- Forty-four (44) full-time Humana associates located in the State of Florida (twenty-seven percent (27%) of the total Humana associates performing Florida Medicaid Claims Processing)
- One hundred eighteen (118) full-time Humana associates located outside the State of Florida (seventy-three percent (73%) peXrcent of the total Humana associates performing Florida Medicaid Claims Processing)

Enrollee/Member Services:
- One hundred eighty-one (181) full-time Humana associates in Florida (sixty-nine percent (69%) of the total Humana associates performing Florida Medicaid Enrollee/Member Services)
- Eighty-three (83) full-time Humana associates located outside the State of Florida (thirty-one percent (31%) of the total Humana associates performing Florida Medicaid Enrollee/Member Services)

Provider Relations:
- Sixty-five (65) full-time Humana associates located in Florida (One hundred (100) percent of the total Humana associates performing Florida Medicaid Provider Relations)
- Zero (0) out-of-state Humana associates (zero percent (0%) of the total Humana associates performing Florida Medicaid Provider Relations)

Utilization and Prior Authorization:
- Forty-eight (48) full-time Humana associates in Florida (Sixty-one percent (61%) of the total Humana associates performing Florida Medicaid of Utilization and Prior Authorization)
- Thirty-one (31) full-time Humana associates located outside the State of Florida (thirty-nine percent (39%) of the total Humana associates performing Florida Medicaid Utilization and Prior Authorization)

Case Management:
- Four-hundred fifty-nine (459) full-time Humana associates in Florida (ninety-nine percent (99%) of the total Humana associates performing Florida Medicaid Case Management)
- Two (2) full-time Humana associates located outside the State of Florida (one percent (1%) of the total Humana associates performing Florida Medicaid Case Management)

Disease Management and Quality Functions:
- Seventy-four (74) full-time Humana associates in Florida (Eighty-one percent (81%) of the total Humana associates performing Florida Medicaid Disease and Quality Functions)
- Seventeen (17) full-time Humana associates located outside the State of Florida (Nineteen percent (19%) of the total Humana associates performing Florida Medicaid Disease and Quality Functions)

Finance and Administration:
- Eighty-eight (88) full-time Humana associates in Florida (fifty-eight percent (58%) of the total Humana associates performing Florida Medicaid Finance and Administration)
- Sixty-four (64) full-time Humana associates located outside the State of Florida (forty-two percent (42%) of the total Humana associates performing Florida Medicaid Finance and Administration)

Beyond the operational functions described above, our Florida-based teams are also comprised of a number of specialized employees who ensure the delivery of integrated, person-centered, comprehensive care to our SMMC enrollees. In alignment with the SMMC contract, our current

Humana Florida Medicaid Contract Manager, Humana Florida Medical Director, Humana Florida Medicaid President, and Humana Florida Medicaid Compliance Officer dedicate one hundred percent (100%) of their time to this contract and are located and operate within the State of Florida. Additionally, we meet or exceed all contractual staffing requirements, including the following areas: Medicaid Quality, Medicaid Recipient/Provider Assistance, Medicaid Policy, Medicaid Data Analytics, Medicaid Finance, Claims and Encounter Data, Program Integrity, and Subcontractor Oversight.

Not only does the State of Florida house a majority of our Humana Florida Medicaid leadership, our presence also provides an extensive opportunity for enrollees to seek guidance in-person about their benefits, as they are able to do so at any of our office locations in Florida. As an extension of the in-person enrollee services provided, we also have an Inbound Enrollee Customer Care Center located in Tampa and an Outbound Enrollee Customer Care Center located in Miramar. Furthermore, case managers and their teams live in the Florida regions they serve. Our office locations, Customer Care teams, and case managers enable enrollees to discuss their current health plan benefits and services with local associates.

In addition to Humana office locations, we have neighborhood Humana locations across Florida. These neighborhood locations are open to the public and are an integral part of our Bold Goal initiative—making every community we serve twenty percent (20%) healthier by 2020. Our neighborhood locations provide health and wellness education, healthy cooking classes, computer and technology classes to help visitors better manage their health, community experts who come to share their knowledge, walking clubs, and social events. Individuals can also speak with a Humana Care Specialist to address questions about their current health plan benefits and services and get help navigating their health care choices. Humana enrollees can also access additional programs, such as exercise classes, to encourage physical fitness and social interaction. Our neighborhood locations are listed below.

- Bradenton location: Bayshore Gardens, 6036 14th Street West, Bradenton, FL 34207

- Clearwater location: Bayside Bridge Plaza, 1530 N. McMullen Booth Road, Suite D2, Clearwater, FL 33759

- Kissimmee location: 3189 W. Vine Street, Kissimmee, FL 34741

- Port Richey location: Embassy Crossing, 9550 US Highway 19, Suite D-4, Port Richey, FL 34668

- Spring Hill location: 4314 Commercial Way, Spring Hill, FL 34606

- Tamarac location: Kings Point Shopping Center, 7666 Nob Hill Road, Tamarac, FL 33321

- Tampa location: Carollwood Center, 10037 North Dale Mabry Highway, Tampa, FL 33618

- Zephyrhills location: Zephyr Commons, 7920 Gall Boulevard, Zephyrhills, FL 33541

Humana has managed the care of Floridians for decades, from clinics to pharmacies to enrollee education to outreach, we have built a robust and experienced team within the State. As a nationwide health and wellness company, we have resources available on-demand to ensure

our enrollees receive the care they need when they need it. Humana offers the State of Florida the background, experience, and financial strength of a company with a strong national presence and local Florida associates who deliver hands-on care and support.

Evaluation Criteria:

1. Whether the respondent's corporate headquarters will be located in Florida (it is not a subsidiary of or a joint venture with any other entity whose principal office will be located outside of Florida).

2. The extent to which operational functions (claims processing, enrollee/member services, provider relations, utilization and prior authorization, case management, disease management and quality functions, and finance and administration) will be performed in the State of Florida.

Score: This section is worth a maximum of 15 raw points. Each of the above components is worth a maximum of 5 points each as described below. 5 additional points will be awarded if respondent meets Items 1(a) and 2(a) below.

For Item 1:

(a) 5 points for corporate headquarters in Florida and no parent or joint venture organization outside Florida;
(b) 0 points if no relevant corporate headquarters in Florida.

For Item 2:

(a) 5 points if all functions will be performed in Florida;
(b) 4 points for 6-7 functions to be performed in Florida;
(c) 3 points for 4-5 functions to be performed in Florida;
(d) 2 points for 2-3 functions to be performed in Florida;
(e) 1 point for 1 function to be performed in Florida;
(f) 0 points for no functions to be performed in Florida;
(g) 0 points if only community outreach, medical director and State administrative functions will be performed in Florida.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

SRC# 4 – Contract Performance (Statewide):

The respondent shall state whether, in the past five (5) years (since July 14, 2012), it has voluntarily terminated all or part of a managed care contract under which it provided health care services as the insurer; has had such a contract partially or fully terminated before the contract end date (with or without cause); has withdrawn from a contracted service area; or has requested a reduction of enrollment levels. If so, describe the contract; the month and year of the contract action; the reason(s) for the termination, withdrawal, or enrollment level reduction; the parties involved; and provide the name, address and telephone number of the client/other party. If the Contract was terminated based on the respondent's performance, describe any corrective action taken to prevent any future occurrence of the problem leading to the termination. Include information for the respondent as well as the respondent's affiliates and subsidiaries and its parent organization and that organizations' affiliates and subsidiaries.

Response:

The respondent, Humana Medical Plan, Inc., its affiliates, subsidiaries, and parent company Humana Inc. and its subsidiaries and affiliates, are hereinafter collectively referred to as "Humana".

In the past five (5) years, Humana has not voluntarily terminated all or part of a managed care contract under which it provided health care services as the insurer, has not had such a contract partially or fully terminated before the contract end date (with or without cause), has not withdrawn from a contracted service area, and has not requested a reduction of enrollment levels.

==========
1. The extent to which the respondent or parent or subsidiary or affiliates have requested enrollment level reductions or voluntarily terminated all or part of a contract.
==========

Humana has not requested enrollment level reductions or voluntarily terminated all or part of a contract.

==========
2. The extent to which the respondent or parent or subsidiary or affiliates has had contract(s) terminated due to performance.
==========

Humana has not had any contracts terminated due to performance.

==========
3. The extent to which the respondent or parent or subsidiary or affiliates had terminations for performance issues related to patient care rather than administrative concerns (e.g., reporting timeliness).
==========

Humana has not had terminations for either performance issues related to patient care or administrative concerns (e.g., reporting timeliness).

==========
4. The extent to which the respondent or parent or subsidiary or affiliates had terminations for performance issues related to provider network management, claims processing or solvency concerns.
==========

Humana has not had terminations for performance issues related to provider network management, claims processing, or solvency concerns.

Evaluation Criteria:

1. The extent to which the respondent or parent or subsidiary or affiliates have requested enrollment level reductions or voluntarily terminated all or part of a contract.

2. The extent to which the respondent or parent or subsidiary or affiliates has had contract(s) terminated due to performance.

3. The extent to which the respondent or parent or subsidiary or affiliates had terminations for performance issues related to patient care rather than administrative concerns (e.g., reporting timeliness).

4. The extent to which the respondent or parent or subsidiary or affiliates had terminations for performance issues related to provider network management, claims processing or solvency concerns.

Score: This section is worth a maximum of 20 raw points with each of the above components being worth a maximum of 5 points each as described below.

For Item 1:

(a) 5 points for no voluntary termination of all or part of a contract, no requests for enrollment level reduction and no service area withdrawals;
(b) 0 points for any voluntary terminations, requests for enrollment level reductions, or service area withdrawals.

For Item 2:

(a) 5 points for no involuntary terminations;
(b) 0 points for any involuntary termination based on performance.

For Item 3:

(a) 5 points for no contract terminations related to patient care;
(b) 0 points if termination related to patient care.

For Item 4:

(a) 5 points for no contract terminations related to provider network management, claims processing or solvency concerns;

(b) 0 points if termination related to performance issues related to provider network management, claims processing or solvency concerns.

REMAINDER OF PAGE INTENTIONALLY LEFT BLANK

B. Agency Goals

SRC# 5 – Disease Management (DM) Program (Statewide):

The respondent shall describe its proposed approach to implementation of specific disease management programs and how they will be used to advance the Agency's goals as stated in **Attachment A**, Instructions and Special Conditions, **Section A.,** Overview, **Sub-Section 15.**, Program Objectives and Goals, of this solicitation. The respondent's description shall include:

a. A description of each proposed disease management program;

b. A description of the algorithm used to identify and stratify eligible enrollees by severity and risk level;

c. A description of the evidence-based guidelines utilized in the approach;

d. A description of how disease management programs are integrated with case management/care coordination programs; and

e. A description of performance metrics used to evaluate the efficacy of the disease management program, including cost-savings, increase in treatment adherence, and measurement of the impact on potentially preventable events, including relevant experience to provide support for the use of the specific performance metrics.

Response:

Empowering enrollees with chronic diseases to care for themselves on a daily basis is critical to minimizing the impacts of these illnesses. Routine and consistent self-care, monitoring change in condition, and enrollee-initiated rapid response when an impending exacerbation is detected will help control the condition, avert medical emergencies, and forestall disease progression. Thus, enrollee self-management in collaboration with the disease management (DM) and healthcare team ultimately reduces or prevents the need for unnecessary acute interventions and hospitalizations. Humana's approach to disease management is to deliver a system of coordinated healthcare interventions for populations with conditions in which patient self-care efforts can have a significant impact on the condition. Our multi-faceted approach is designed to achieve the best possible outcomes based on access to care, assessment of enrollee needs, ongoing care monitoring and evaluation, and tailored enrollee and provider interventions, including wellness and prevention.

Central to Humana's approach is that our disease management programs are much more than population health strategies; they are, at their core, disease-focused case management programs. Humana recognizes that the management of chronic conditions involves more than addressing the disease process. Living with and managing diseases is challenging; therefore, Humana's DM programs provide support and guidance so the enrollee does not have to manage their condition alone. We deliver a holistic, interdisciplinary structure designed to take into account the individual's physical, behavioral, and social conditions along with comorbid diagnoses. The intent of this approach is to assist enrollees and their caregivers in meeting their personally-identified health improvement goals. In addition to addressing and increasing an

enrollee's knowledge of their disease process and treatment plan, each disease management program aims to assist them in the development of improved health-related behaviors and coping skills, while providing them with needed support and resources. The program uses a versatile approach to achieve the best possible therapeutic outcomes based on assessment of enrollee needs, ongoing care monitoring, evaluation, and tailored enrollee and practitioner interventions.

Humana has a long history of offering a comprehensive portfolio of educational programs and health support services that complement physicians' care and promote enrollee self-management. Among these offerings are a wide array of disease management programs that reinforce the importance of adhering to physician instructions and plan of care, such as, education on chronic diseases, and promoting healthy living. Our DM programs focus on specific diseases that are of particular concern to the populations we serve and are tailored to the needs of those populations.

OVERVIEW OF PROGRAM OFFERINGS

The disease management programs that will be available to all enrollees in our Comprehensive Plan living in the community include those that are currently available in our Managed Medical Assistance (MMA) program and those available in our Long-term Care (LTC) program. Our disease management programs cover a range of chronic diseases, with a focus on those conditions that are of particular concern to our enrollee population.

Our DM programs for Congestive Heart Failure, Diabetes, Hypertension, Asthma, and HIV/AIDS have been offered to our MMA-only enrollees for years. In 2014, we added a Cancer DM program to our MMA offerings.

SPOTLIGHT ON INNOVATION: In June 2017 we added Sickle Cell Disease. The impetus for this addition was our concern that the high ER utilization and high overall costs we were experiencing for enrollees with this condition suggested that care for this condition was not being managed efficiently. We designed this DM program to help our enrollees benefit from self-management techniques that can have a positive impact.

Also available to our Medicaid enrollees is our End-Stage Renal Disease (ESRD) DM program offered through our contract with Village Health, the country's largest renal disease management organization and the first to achieve National Committee on Quality Assurance (NCQA) DM accreditation.

Our Diabetes and Cancer DM programs have also been available to our LTC enrollees. In addition, we offer DM programs in Chronic Obstructive Pulmonary Disease (COPD), Dementia and Alzheimer's Issues, and End of Life Issues to our LTC enrollees.

As noted above, all of our current programs will be offered to all of our enrollees living in the community under the new contract, whether they are MMA only or receive comprehensive MMA and LTC benefits through our plan. All of our DM programs are managed internally, with the exception of our Mental Health and Substance Abuse programs, which are currently provided by our behavioral health partners, and ESRD, which Village Health manages.

We have developed a policy to deliver a consistent referral of enrollees to appropriate programs whereby enrollees with more than one of these conditions are referred to the DM program that addresses their primary need. That program is supplemented by selected efforts aimed at any co-morbidities noted to deliver a holistic approach to the enrollee's care.

==========

1. The extent to which the respondent proposes an innovative and evidence-based approach to disease management for the following conditions: (a) Cancer, (b) Diabetes, (c) Asthma, (d) Hypertension.

==========

In addition to the six (6) DM programs mentioned in this ITN (i.e., Cancer, Diabetes, Asthma, Hypertension, Mental Health, and Substance Abuse) Humana also offers another seven (7) programs to our Comprehensive enrollees.

CANCER

Each enrollee of our Cancer DM program is assigned a Registered Nurse (RN) DM case manager. Our qualified case manager educates enrollees to better understand the diagnosis, proper nutrition, and disease process. The case managers stress the importance of following the treatment plan and pain control regimen.

The Cancer DM Program is measured by the following outcomes:

- Decreased inpatient utilization
- Decreased emergency department utilization for a primary diagnosis of cancer.
- Improved pain control
- Reduced BMI
- Increased medication adherence

DIABETES

Eligible enrollees who choose to participate in Humana's Diabetes DM program are assigned a DM case manager who supports them through preventative and ongoing care. The DM case manager provides the enrollee with a working blood glucose meter and contact number for additional supplies and ensures the enrollee is compliant with testing and examinations recommended by their PCP or specialist. This program educates our enrollees on the disease process, potential end organ damage, and diet and food choices.

The Diabetes Disease Management Program is measured by improvement in the following HEDIS rates for comprehensive diabetic care outcomes:

- HbA1c testing
- HbA1c poor control
- HbA1c good control
- Eye examination
- LDL cholesterol screening

- LDL cholesterol level <100mg/dL
- Nephropathy screening
- Blood pressure control
- Medication adherence

ASTHMA

Through our Asthma DM program enrollees are assigned a RN DM case manager. The DM case manager helps the enrollee gain an understanding of asthma triggers, how to minimize the triggers, the disease process, and the complications associated with not following a provider issued treatment plan. With the DM case manager's help, they work with their PCP to develop and adhere to an Asthma Action Plan and set goals around appropriate lifestyle changes. The DM case manager also educates the enrollee on Asthma mitigation strategies and community resources.

The Asthma Disease Management Program is measured by the following outcomes:

- Decreased inpatient utilization
- Decreased average length of stay for inpatient services
- Decreased emergency department utilization for a primary diagnosis of asthma
- Decreased Per Member Per Month (PMPM) costs
- Improved Healthcare Effectiveness Data and Information Set (HEDIS) rate for use of appropriate medications for enrollees with asthma

HYPERTENSION (HTN)

The goal of Humana's HTN DM program for eligible enrollees is to lower high blood pressure and protect important organs from damage. DM case managers guide enrollees in this program to more positive results stemming from daily blood pressure readings, lab work monitoring, adherence to appropriate nutritional and exercise regimens, treatment compliance, and regular communication with doctors and/or specialists.

The HTN Disease Management Program is measured by the following outcomes:

- Decreased inpatient utilization
- Decreased average length of stay for inpatient services
- Decreased emergency department utilization for a primary diagnosis of Hypertension
- Decreased PMPM costs
- Adequate control of blood pressure
- Medication adherence

CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD)

Through our COPD DM program, RN DM case managers help enrollees gain an understanding of the early warning signs of COPD exacerbation and the importance of following their medication regimen, routine blood work, proper diet, PCP follow-up, and influenza and

pneumonia vaccines. Enrollees participate in goal setting around appropriate lifestyle modifications, often related to exercise and smoking cessation.

The COPD DM Program is measured by the following outcomes:

- Decreased inpatient utilization
- Decreased average length of stay for inpatient services
- Decreased emergency department utilization for a primary diagnosis of COPD
- Enrollment into a smoking cessation program
- Enrollee is under the care of a pulmonologist
- Medication adherence

CONGESTIVE HEART FAILURE (CHF)

DM Case Managers help enrollees in our CHF program adhere to disease-specific, individualized treatment plans and medication regimens. The CHF DM program encourages enrollees to have active communication with doctors and specialists (e.g., cardiologist, pulmonologist) and are given ongoing education with helpful tips to manage their condition. Key components also include following appropriate nutritional and exercise plans and participating in a smoking cessation program.

The CHF Disease Management Program is measured by the following outcomes:

- Decreased inpatient utilization
- Decreased average length of stay for inpatient services
- Decreased emergency department utilization for a primary diagnosis of congestive heart failure
- Decreased PMPM costs
- Medication adherence

ALZHEIMER'S/DEMENTIA

Humana's Alzheimer's/Dementia DM program explores options to increase support for caregivers of enrollees with these diseases. Caregivers learn about the disease progression, building strong partnerships with the health community, the financial and legal impacts of the disease, and the importance a safe, secure, and familiar home environment for the enrollee from DM case managers specializing in dementia care.

The Alzheimer's/Dementia DM Program is measured by the following outcomes:

- Impact ADL decline
- Use of PERS
- Use of Pill Organizer
- Measure BMI
- Medication adherence

END OF LIFE ISSUES

Humana's End of Life Issues DM program attends to not just the physical, but the psychosocial and spiritual needs of the enrollee and their family. By proactively addressing care needs and concerns, as well as barriers to care, this program offers goal oriented quality of life directives, religious support, and financial affairs preparation, among others.

The End of Life DM Program is measured by the following outcomes:

- Enrollee is participating in a palliative/ hospice program
- PCP accessibility and medical support.
- Enrollee has pain control
- 5 Wishes given to enrollee

HIV/AIDS

Our HIV/AIDS DM program provides enrollees with an individualized plan of care (POC), optimizing management of the disease process and minimizing the risk of related complications. Humana's DM case managers help enrollees to remain compliant with active treatment and medications, monitor lab work, and assist with ongoing communication with doctors and specialists to have a better understanding of the progression of this illness and opportunistic infections that may arise.

The HIV/AIDS Disease Management Program is measured by the following outcomes:

- Decreased inpatient utilization
- Decreased average length of stay for inpatient services
- Decreased emergency department utilization for a primary diagnosis of HIV/AIDS
- Decreased PMPM costs
- Medication adherence
- HIV lab results (Viral Load, T-cell counts)

SICKLE CELL DISEASE

The Sickle Cell DM program at Humana is offered to eligible enrollees to effectively promote preventative treatment, understand the importance of regular PCP health checkups and healthy habits. Specialized DM case managers also assist enrollees in accessing support groups and community organizations.

The Sickle Cell DM Program is measured by the following outcomes:
- Decreased inpatient utilization
- Decreased average length of stay for inpatient services
- Decreased emergency department utilization for a primary diagnosis of Sickle Cell Disease
- Decreased PMPM costs
- Medication adherence
- Improvement in acute pain

END-STAGE RENAL DISEASE (ESRD)

Through an agreement with VillageHealth® Disease Management, Humana offers a renal disease management program designed to provide individual care guidance, patient education, and coordination of care for enrollees with ESRD. Each identified member is assigned a RN DM case manager with extensive experience in renal disease. The DM case manager monitors the member's health status, facilitates compliance with physician-directed goals, communicates with the member's physicians and serves as a liaison and advocate for the member and his or her family.

Details on our DM program approach are provided in the remainder of this response to SRC# 5. Throughout our response, we address the components of our DM programs that are common across all of the programs (e.g., algorithm for identification and stratification, and key program capabilities such as symptom management and medication support) and those components that vary by program, including disease-specific goals and disease-specific evidence-based guidelines.

All of our disease management programs operate under the aegis of approved and proven clinical practice guidelines, such as those specified by the American Heart Association (AHA), American Diabetes Association (ADA), and Centers for Disease Control (CDC), and are compliant with federal, state, and National Committee for Quality Assurance (NCQA) guidelines. At a broad level, Humana's DM programs incorporate the NCQA guidelines for accredited disease management programs in each of the following areas addressed by NCQA:

- Element A: Program Content
- Element B: Identifying Members for DM Programs
- Element C: Frequency of Member Identification
- Element D: Providing Members with Information
- Element E: Interventions Based on Assessment
- Element F: Eligible Member Active Participation
- Element G: Informing and Educating Practitioners
- Element H: Integrating Member Information
- Element I: Experience with Disease Management
- Element J: Measuring Effectiveness

Nationally-recognized care guidelines from MCG (formerly Milliman Care Guidelines) and specific disease clinical-based guidelines (e.g., American Heart Association, American Diabetes Association) are accessible through the disease management documentation database as on-line resources for best practices in the industry. These guidelines provide DM with an evidence-based clinical approach to teaching that integrates pathophysiological rationale, caregiver experience, and patient preferences with valid and current clinical research evidence. Please see Attachment 5-1 for the disease-specific evidence-based guidelines used as resources in supporting and educating enrollees in our in-house DM programs and in creating the plan of care.

EXHIBIT A-4-a
GENERAL SUBMISSION REQUIREMENTS
AND EVALUATION CRITERIA (10-2-17)

Below are high-level summaries of our Mental Health and Substance Abuse DM programs, which are administered by our Behavioral Health partners. Again, these programs incorporate the key program components and capabilities described in the remainder of our response.

==========
The extent to which the respondent proposes an innovative and evidence-based approach to disease management for the following conditions: (e) mental health and (f) substance abuse.
==========

A unique and distinct feature of Humana's Behavioral Health disease management program is our partnership with two behavioral health vendors. We have partnered with Access Behavioral Health (ABH) to serve our enrollees in regions 1 and 2, and Beacon Health Options (Beacon) to serve our enrollees in all other regions, based on these vendors' unique capacities, networks, and strengths in their respective regions, as well as on our enrollees' established provider relationships. This attention to the regional needs of our enrollees helps us to deliver behavioral health management in the most flexible, adaptive, and effective manner possible.

Through Beacon and ABH, we deliver enhanced disease management and case management programs for enrollees who are identified with high risk behavioral conditions. Eligibility criteria for the program include rapid readmission (within 60 days); frequent emergency department visits; recent suicide attempt; and co-morbid medical condition with mental health and/or substance abuse disorder that could result in exacerbation of the enrollee's fragile medical status. Enrollees are identified through various means, including but not limited to the following:

- Utilization data

- Clinical triage and assessment – completed by Humana, Humana's behavioral health partner, or Primary Care Provider (PCP)

- Enrollee outreach to Humana for assistance

- Pharmacy data – certain medications and frequency can also trigger case reviews for possible referral

The program incorporates both short- and long-term goals specifically tailored toward the management of condition-specific symptomology through education, community connection, increasing functional ability in areas such as self-care, work and school, family, interpersonal relations to reduce barriers to treatment, and long-term health management. Behavioral Health DM interventions are generally telephonic though may also include face-to-face field-based interventions. Field-based case managers work directly with enrollees in their community at facilities or, in some instances, in practitioner offices to review medical and treatment records, develop care plans and to better engage enrollees in their care. Self-management plans are a subset of the larger care plan. They contain activities undertaken by enrollees, and when appropriate, their treating providers, to help them manage their condition, and include instructions or materials. The DM Case Manager provides the enrollee with health information and education to increase disease or condition knowledge that supports adherence and self-management, as well as condition-specific self-management tools and assistance in developing self-management strategies. Enrollees are also given instructions for accessing self-management and self-assessment tools online. The Behavioral Health DM Case Managers

work closely with community resources, patient advocates, community mental health centers (CMHCs), providers, and others to provide the enrollee with the tools they need to live healthy, successful, and productive lives.

Behavioral Health DM Case Managers are licensed behavioral health professionals who are trained to effectively address the full range of behavioral health conditions utilizing condition-specific assessment tools and treatment guidelines. The following tools are used to monitor enrollee condition-specific acuity and DM effectiveness:

- PH Q-2 and PH Q-9 (depression screening)

- PH-Q A-A (depression screening for adolescents)

- Modified Mini Screening Tool (assesses 3 major areas of mental illness – mood disorders, anxiety, and psychotic disorders)

-The Mood Disorder Questionnaire (MDQ) is also used to assess the needs for enrollees with conditions such as bipolar disorder

- Generalized Anxiety Disorder (GAD) Screening – assesses the severity of anxiety

- CAGE-ID (drug and alcohol assessment that is used to assess the existence of substance use, severity, and clinically appropriate next steps)

Assessment tools and guidance used for program delivery and ongoing case management are based upon clinical best practices tools and guidelines as well as evidence-based practices identified by organizations such as Substance Abuse Mental Health Services Administration (SAMHSA), World Health Organization (WHO), National Institute on Drug Abuse (NIDA), and the National Institutes of Health (NIH). Programs and tools are evaluated annually to ensure that the most current research on clinical best practices and condition-specific assessment and management are incorporated and being applied.

The evaluation of our Behavioral Health DM programs focuses on outcomes that include, but are not limited to, the following:

- Program activity
- Clinical and functional outcomes
- Individual goal attainment and participant satisfaction
- Length of stay in the facility
- Ambulatory follow-up post discharge
- Length of time in the community following discharge (without a relapse)
- Re-admission rates
- Enrollee satisfaction

In addition to our mental health and substance abuse DM programs described above, Humana also offers an Agency for Health Care Administration (AHCA) approved “Healthy Behaviors” Substance Abuse Program, administered by Beacon throughout the state. The program offers enrollees eighteen (18) years of age or older an incentive to attain and maintain a drug-free and alcohol-free lifestyle. Enrollees in the six-month program are engaged in treatment with

community practitioners and providers; Alcoholics Anonymous and Narcotics Anonymous; on-line and face-to-face support groups; and other resources to assist the enrollee in attaining sobriety and working through their recovery. Beacon's Case Management department has a Healthy Behaviors track within the Encompass Program and utilizes a process to facilitate referrals from the plan, primary care providers, and other providers. The program has multiple elements to address the needs of the enrollees, from the identification of an existing substance abuse clinical issue or diagnosis, through the treatment phase of the interventions, and to the abstinence and recovery period. Program components including case management, active participation in community support groups, and access and engagement in appropriate treatment have all been shown effective in facilitating recovery. Beacon uses an interdisciplinary approach to address substance abuse issues. With oversight by Beacon's Medical Director, a board-certified psychiatrist and certified physician in addiction medicine, all treatment interventions and coordination efforts promote a path from addiction to recovery that is readily accessible to all individuals.

==========

2. The adequacy of the respondent's description of how its respective disease management programs will be incorporated into its overall approach to advance the Agency's goals.

==========

The goals of all of our disease management programs include the following:

- To encourage enrollees in the self-management of their illness through education;

- To encourage a collaborative effort with their medical and behavioral health provider or specialist;

- To assist the enrollee in attaining and or maintaining optimal disease-specific management, including any potential comorbidities; and

- To assess enrollee needs and facilitate increased enrollee compliance and disease specific knowledge with a plan of care, timely medical and psychological visits, and appropriate access to, and utilization of, care to include use of home healthcare services with appropriate referral to community resources.

These goals align well with the Agency's stated goals, particularly its goals to: (a) reduce potentially preventable inpatient and outpatient hospital events and unnecessary ancillary services, and (b) rebalance long-term services and supports systems by increasing the percentage of enrollees receiving services in the community instead of an institution. Our DM programs utilize innovative, evidence-based approaches to achieve these goals and enhance the enrollee and provider experience. Moreover, they have resulted in high rates of enrollee satisfaction.

We continually explore DM additions and innovations that will help achieve Humana's and AHCA's mutual goals. For example, AHCA's Spring 2017 Quarterly Statewide Medicaid Managed Care Report, Analyzing Potentially Preventable Healthcare Events of Florida Medicaid Enrollees, indicates that in Regions 9, 10, and 11, sickle cell anemia is a primary cause of potentially preventable hospital admissions and potentially preventable hospital readmissions. Our recent introduction (in June 2017) of our new Sickle Cell DM program is indicative of our

commitment to partner with AHCA to improve outcomes for enrollees struggling with sickle cell anemia and achieve reduction in potentially preventable events.

*SPOTLIGHT ON INNOVATION: Separate from but related to our DM programs, Humana's Bold Goal initiative is focused on making the communities we serve twenty percent (20%) healthier by 2020. Broward County is one of Humana's Bold Goal Florida communities. The current campaign we are conducting through our Broward Bold Goal Health Advisory Board is a "Know Your Numbers/Did You Know" campaign that includes a series of flyers that provide medical information and link the audience to free services in the community. We have started with Hypertension and Diabetes and will be adding others in the future. Please see Attachment 5-2 for examples of this initiative's flyers.

==========

3. The extent to which the respondent's algorithm and risk stratification approach is well defined and describes the data sources that will be utilized.

==========

IDENTIFICATION AND ENGAGEMENT OF ELIGIBLE ENROLLEES

Medicaid enrollees are identified by their unique group identifier. Through queried claims data that is inclusive of medical and pharmacy codes related to any of the specified conditions, a report known as the "Potentials Report" is generated and pulled by the disease management unit on a monthly basis. Additional potential identifiers for DM inclusion are as follows:

- Data collected through Utilization Management or Case Management processes
- Hospital admission and discharge data including Readmission Reports
- Claims and encounter data
- Health Risk Assessment
- High Utilizer Report
- New enrollee welcome calls
- Electronic medical record access
- Outlier Report
- Pharmacy data
- Electronic and automated reports
- 24/7 nurse call line
- Enrollee referrals
- Referrals from caregivers, providers, and community agencies
- Laboratory reports
- Health management and wellness and health coaching programs

Humana includes a description of disease management program opportunities for self-referral in the enrollee handbook and through our quarterly enrollee newsletter. To further disseminate information about these programs, we include descriptions in our Provider Manuals that are given to all physicians and are available online.

All enrollees with a confirmed diagnosis are eligible for the DM program. If a behavioral health diagnosis is confirmed during the completion of the Behavioral Health survey within the Humana General Survey, the enrollee is referred to Humana's behavioral health partner in their region for

initial outreach and further assessment and stratification. If no physical health needs are identified, the DM Case Manager (DM CM) will close the medical case and our behavioral health partner will manage the enrollee's behavioral health issues. If the enrollee has both behavioral health and physical health needs, we will co-manage with our Behavioral Health partner.

Enrollees identified for our DM programs through these various sources are contacted by telephone within seven (7) to ten (10) days of identification and given the choice of participating in the DM program. If the DM CM is unable to contact an enrollee in two (2) attempts, he or she refers the case to an Unable to Contact (UTC) Customer Care Specialist within Humana's Medicaid Administration Education and Satisfaction Unit (ESU), who will begin the process of locating the enrollee in the most effective and timely manner possible. Additionally, the DM CM will enter a notation in the file of an unreachable enrollee so that if the enrollee later calls Customer Care, the specialist can "warm transfer" the enrollee to the DM CM. Once the enrollee is located, the DM CM is notified and we update our clinical information system to include best time to call, alternative numbers, and other pertinent information.

Upon reaching the enrollee, the primary diagnosis and co-morbidities are confirmed with the enrollee (and subsequently with the enrollee's PCP). The enrollee is given the choice of accepting participation in the DM program and informed that he or she may end participation voluntarily at any time.

Our DM CMs are selected based on qualifications of nursing license (or behavioral health license for our Behavioral Health DM programs) and who have the skills to triage, assess, monitor, evaluate, instruct, intervene, and document goals and outcomes of enrollees with the specific condition they are hired to manage. Pediatric enrollees who are identified are managed by a DM CM who specializes in pediatric care. Humana's Clinical Learning and Development (CLD) team delivers a two (2) week orientation that includes training on Medicaid, Humana's systems, ethics, cultural competency, motivational interviewing, and other computer-based training. After initial orientation, DM CMs are mentored by senior case managers for eight (8) weeks through onsite-office, field based, and WebEx training. This training equips DM CMs to find and locate appropriate community resources and help resolve enrollee issues in a timely manner. They learn strategies to identify barriers to access to care, prioritize immediate needs, identify enrollee health literacy, and display empathy and emotional support. Humana delivers a half-day monthly meeting of continuous education and training, in addition to oversight, ensuring DM CMs have the most up-to-date information.

ASSESSMENT, STRATIFICATION, AND MANAGEMENT

An initial acuity level is assigned prior to the enrollee's consent of participation (i.e., as enrollees are identified for potential disease management) based on data available in our Clinical Guidance eXchange (CGX) system. CGX supports an integrated, comprehensive approach to medical, behavioral health, pharmacy, utilization, and care management. Full system integration allows our care team the capability to identify potential enrollees for programs, document gaps in care, automate care planning, monitor plan compliance, and identify opportunities for intervention. We use proprietary predictive modeling tools to identify enrollees who would benefit from our various clinical programs and to provide an initial stratification. This risk stratification does not determine the level of case management or disease management

needed, but instead stratifies enrollees by severity score for prioritization of outreach. Our predictive modeling capabilities, which have led the industry for years and continue to innovate, include the following:

- Humana's Medicaid Severity Score Predictive Model is the primary predictive model used across the entire Medicaid population (i.e., not just on those who are hospitalized as with the Readmission Predictive Model described below). Using this proprietary model, a severity score generated from medical, behavioral health, and pharmacy claims is incorporated into monthly reports identifying enrollees with high costs and clinically complex health conditions over a rolling twelve (12) month period. The severity score is a predictor of future medical and pharmacy costs over the next twelve (12) months. Use of this data allows Humana to identify enrollees with changing care needs, enrolling them in case management, moving them between acuity levels, or altering their level of case management intervention, all the while gauging the stage of readiness of the enrollee to accept disease management support.

SPOTLIGHT ON INNOVATION: This innovative model addresses the challenges of modeling for a diverse group such as that represented by Humana's Medicaid population. For such diverse populations, the large array of characteristics makes it difficult to score the enrollees under the same circumstances. Humana's model groups the individuals together based on certain characteristics and builds individual models for each group. This two-stage meta modeling is reliable and efficient with greater accuracy.

The severity scores are stratified into complex, high, moderate, and low categories allowing our case management team to identify the enrollees at greatest risk for a clinical event that could be devastating to the enrollee and their family. Disease management processes are prioritized to ensure that enrollees identified as complex or high risk receive intervention first, so potential crises or transition situations are mitigated to the extent possible.

- Humana also calculates the Readmission Predictive Model (RPM) to assess the probability of an enrollee being readmitted into a facility within thirty (30) days. The RPM is a true predictive modeling process with inputs from over fifty (50) variables including demographics, such as the enrollee's age and gender, previous medical and pharmacy claims including physician visits, admissions, days since last admission, Charlson Comorbidity Index (validated instrument regarding co-morbidities), and number of medications, as well as information regarding their current admission (procedure, diagnosis, bed type, length of stay, and discharge disposition). The process generates a numerical RPM score, which allows stratification and prioritization based on the risk of all-cause readmission within thirty (30) days.

- Humana uses Emergency Department (ED) Predictive Models that prospectively identify enrollees likely to use EDs, likely to become high ED utilizers, and likely to use EDs for non-emergent reasons, creating the following benefits:

-- Opportunity for proactive enrollee engagement and education to mitigate barriers to optimal health management

-- Referrals to clinical programs and alignment with support services

-- Prevention of repeated ED visits as a substitute for primary care, often detrimental to enrollees with chronic conditions, which also helps create a stronger patient-physician care partnership.

On acceptance to the DM program by the enrollee, the DM CM:

- Completes a Consent and Disclosure Form attesting that the enrollee has consented to participation;

- Sends the enrollee an introductory letter with the DM Case Manager's name and contact information, as well as an easy-to-read one-page tool that includes tips on self-management of the relevant disease; and

- Completes a telephonic assessment (for enrollees in the HIV-AIDS DM program in Broward and Dade Counties, the assessment is administered by an HIV-AIDS dedicated field case manager).

The disease-specific assessment includes, but is not limited to:

- Gathering a health history;

- Completing a multi-system assessment that includes cognitive, psychological, or depression screenings and psychological growth and development assessment; determining whether a current treatment plan is in place with a physician or medical specialist;

- Assessing emotional issues of the caregiver; reviewing current medication regimen identifying compliance, adverse reactions, or contraindications; and identifying any transportation obstacles.

The additional information gathered through the assessment enables the DM CM to make a final determination on acuity. With all factors in mind, including predictive model scores and information gathered during the comprehensive assessment, the DM CM makes a final determination on acuity based on clinical judgment. Within each level, there are specific sets of enrollee and provider initiatives and interventions. Attachment 5-3 presents the acuity levels and related contact frequencies used in our DM programs administered in-house. Our Mental Health, Substance Abuse, and ESRD programs utilize similar risk categories.

At all acuity levels, Humana's provider interventions include disease-specific information on the provider website and in provider newsletters, introductory letters, sharing of clinical guidelines, the provider manual, enrollee summary, and monthly care gap reports.

The assessment also gives the DM CM the ability to formulate a plan of care that is tailored to the individual's needs. The plan of care assists in monitoring the enrollee's ongoing medical conditions, ensuring the enrollee is receiving necessary routine medical care and has adequate support at home, addressing any safety concerns that are identified, and assisting the enrollees who are unable to access necessary care due to their medical or emotional conditions. As necessary, the DM CM will refer the enrollee who also has behavioral health needs to our behavioral health partner in the region.

Care is directed as clinically indicated by DM guidelines through enrollee assessment and determination of acuity. The disease management activities are documented using assessments, case notes, care plans, and referrals to internal and external resources contained within the Humana clinical system, CGX. The CGX workflow system supports an integrated approach to utilization and case management. It documents both medical and LTC information, allowing us a full view of our comprehensive enrollees. We currently are building additional integrated capabilities within CGX so that not only is it a 360° view for all Humana associates, but also for our Behavioral Health DM Case Managers.

Education is based on the enrollee assessment of health risks and the enrollee's specific chronic condition and co-morbidities. Follow-up communication with the enrollee or enrollee's designee (if applicable) is scheduled as the enrollee's condition warrants, but at least per acuity assessment levels outlined above. Ongoing disease management focuses on previous contact with a collaborative update and prioritized interventions and goals contained within the care plan. Any new areas identified are addressed, documented, and updated in the care plan accordingly. Previous documentation is easily accessible in the documentation system, allowing for review of new or previous issues and actions. Compliance with the plan of care, including physician visits, therapy sessions, diet, and medication are discussed to identify and successfully address barriers. Enrollees are continually educated on medicinal contraindications and adverse effects and interactions.

SPOTLIGHT ON INNOVATION: We have developed a Disease Management Resource Guide for case and disease managers and the enrollees they serve. Its purpose is to supply tools to aid the development of self-management skills. The Resource Guide contains evidence-based guidelines and treatment goals, disease basics, websites, print materials, educational programs, videos, phone applications, support groups, and games. Instructions are given so that assistance can be given to help enrollees find each tool. An excerpt from the DM Resource Guide is included in Attachment 5-4.

SPOTLIGHT ON INNOVATION: In June of 2016, we implemented field case management for enrollees participating in our HIV/AIDS DM program and residing in Dade and Broward counties. Humana has one dedicated HIV/AIDS DM case manager in Broward and one in Dade who meet with their assigned enrollees wherever is best for the enrollee – in the home, PCP office, hospital, or other location. We initiated this program to enhance our disease management services for this population, as we found that many enrollees with HIV/AIDS felt uncomfortable engaging over the phone. We selected these counties because they are home to a large number of new infections. Through the successful engagement of these enrollees, guiding them to the appropriate care setting and enrolling them in DM, Humana was able to reduce our average per enrollee per month cost by forty-eight percent (48%). Lower PMPM costs indicate better overall management of these enrollees, thereby improving overall outcomes.

In addition to our HIV/AIDS Field Case Management, we have recently instituted a field visit component for all of our telephonic DM CMs in our MMA program. While the majority of enrollee contacts continue to be telephonic, each DM CM conducts at least one (1) field visit per month at the hospital or PCP office to engage enrollees identified for disease management whom they have been unable to contact. For instance, if a high utilizer with asthma whom we have been unable to reach and engage in disease management is hospitalized, there will be an alert in the system so that the asthma DM CM may visit the enrollee in the hospital and try to engage them. Similarly, if a complex-acuity enrollee is already engaged, but would benefit from direct contact

between the DM CM and the PCP, the DM CM can meet with the enrollee and the PCP at an office visit.

==========

4. The adequacy of the respondent's description of how its disease management programs will be integrated into case management/care coordination programs.

==========

The integration of Humana's DM programs with our case management and care coordination programs differs by eligibility group as a result of their differing needs and characteristics.

For our MMA-only population, enrollees with the disease processes that are addressed by our DM programs are assigned to a DM Nurse who becomes their primary Case Manager. That is, the DM programs are fully formulated disease-specific case management programs that manage and coordinate care for enrollees with one or more of the conditions addressed by our DM programs who agree to participate. For enrollees in one of these DM programs, the DM CM is the Case Manager. (For MMA-only enrollees who are eligible for and participate in the Village Health ESRD program, they retain their market-based Humana Case Manager, and disease management services are provided by Village Health programs as a supplement.)

For our LTC enrollees living in the community, their disease management needs often are additional to their broader long-term services and supports needs. For this reason, they retain their primary LTC Case Manager as their overall care coordinator, and the DM CM supplements the role of the LTC Case Manager with disease-specific expertise. We should note a significant number of our LTC enrollees are dual eligibles and enrolled in Medicare fee-for-service or a Medicare health plan that is primary for acute care. Many of our dual eligible enrollees participate in a Humana Medicare plan, which offers DM programs in CHF, Coronary Artery Disease, COPD, and Diabetes. Regardless of whether the LTC dual eligible enrollee is in a Humana Medicare plan or another Medicare plan, the enrollee's LTC Case Manager coordinates with the Medicare plan's DM and other clinical programs to ensure seamless, comprehensive care for the enrollee.

==========

5. The extent to which the respondent's disease management programs include the following components: Symptom management; Medication support; Emotional support; Behavior change; and Communication with providers, including the PCP/specialists.

==========

The education and support our DM programs provide address a number of areas to assist the enrollee and caregiver in managing chronic diseases, including symptom management, medication support, emotional support, behavior change, and communication with providers. Our program capability in each of these areas is summarized below.

SYMPTOM MANAGEMENT

DM CMs deliver information on symptom management to enrollees and caregivers of enrollees identified with a chronic disease. In addition, Humana provides information and educational materials and programs to assist the enrollee and caregiver in self-management of symptoms.

Finally, enrollees and caregivers are encouraged to be active participants in development and monitoring of the enrollee's plan of care, where symptom management issues and recommendations will be discussed.

Example: For enrollees participating in our CHF DM program, the DM CM nurses will provide information about daily weight monitoring and keeping daily logs of such weights; fluid intake and signs/symptoms of fluid retention, which may lead to edema and shortness of breath with or without exertion; and sodium intake. The DM CM will stress the importance of reading nutrition labels and will encourage enrollees to contact their PCP immediately if they have a weight gain or begin experiencing shortness of breath.

MEDICATION SUPPORT

DM CMs review each enrollee's medication regimen with him or her and his or her caregiver (if applicable so that the caregiver can help monitor medication use) during each contact. The focus of the review is to ensure the enrollee understands the reason for taking the medication(s), the proper route, side effects, adverse reactions, and contraindications, and when to seek medical attention from the prescribing physician. DM CMs are also trained to identify signs of medication non-adherence through methods such as reviewing refill history, and will work with the enrollee and caregivers to ensure they understand the importance of each medication. They also help enrollees obtain devices that promote adherence, such as pill boxes and pill cutters. In addition, pharmacists provide medication consultation and reviews to enrollees and caregivers as necessary. Finally, the Pharmacy Management program offers comprehensive oversight and management by working with all providers along the care continuum to ensure management and oversight of pharmacy services.

Example: The HIV/AIDS FCMs have the ability to visit enrollees in their homes to, among other things, review the enrollee's medications. The FCMs collaborate with a pharmacist in real time, with the enrollee present, to conduct an in-depth review of the medications to ensure the enrollee understands the medications and to reinforce compliance with the medication regimen. The HIV/AIDS nurses also review medication adherence reports that indicate which enrollees are not compliant and will intervene with those enrollees as needed to reinforce the education provided and encourage compliance.
