

## <Project Name> Schedule Assumptions and Constraints

Updated <date>

### <Project Name> Schedule Assumptions

Assumptions are factors in the planning process considered to be true. Plans will be inaccurate when assumptions are untrue. The following assumptions are factored into the <Project Name> Project Schedule:

<The following bullets are examples of possible assumptions that may apply to a project. Please note, this list is not exhaustive and other types of assumptions can exist.>

1. <Assumptions about non-working time>
2. <Assumption(s) about resource allocation>
3. <Assumptions about changes to the project charter>
4. <Assumptions about tasks, e.g. number of reviews>
5. <Assumptions about procurement risks, if appropriate>
6. <Assumptions about review period>
7. <Other assumptions>

### <Project Name> Schedule Constraints

Constraints are limiting factors which will affect the execution of the project. The following constraints are factored into the <Project Name> Project Schedule:

<The following bullets are examples of possible constraints that may apply to a project. Please note, this list is not exhaustive and other types of constraints can exist.>

1. <Constraint(s) related to appropriation/budget>
2. <Constraint(s) related to resource availability>
3. <Constraint(s) related to CMS Certification, if applicable>
4. <Other constraints>
